Comment:

San Bernardino County commends OPR for the effort put into the CEQA Guidelines to address greenhouse gas emissions (GHG). Overall, the revisions help guide lead agencies in how to address GHG in CEQA. We have a few suggested language changes to improve the revisions:

1) Wherever the term “Climate Action Plans” is used please revise to say “Greenhouse Gas Reduction Plans.”

2) Section 15130(f) should be eliminated or change the language to use the summary of projections approach.

3) Appendix G, Section XVI-Transportation/Traffic, do not eliminate the question on LOS, Rather qualify it to include “LOS or other means of measuring Traffic Flow such as Vehicle Trips or VMT.”
