

To the Office of Planning and Research,

As an Inglewood resident, I am very scared about what is happening to my community. The Clippers arena project is looking for a shortcut, but their application for special treatment should be denied.

The Clippers arena would be harmful to the health of the people who live in Inglewood. We are already overburdened by being in the LAX flight path and there have been several new, major developments in our area recently. Just look at the huge new football stadium being built! Our residents cannot handle more, especially from a project team that doesn't seem to care about environmental protections whatsoever. Rather than providing real local reductions, the Clippers are trying to cheat the system.

The Clippers have demonstrated a complete lack of regard for the residents of Inglewood and show they won't make any necessary changes to their plan to make it acceptable. They shout about fairness but don't play by the rules they sought and agreed to. Please deny the project application.

Best,

IBRAHIM OMER

Hello,

I am a resident of Inglewood and I am writing today to ask that you not approve the Clippers application as currently presented. The proposed arena will take a real toll on the residents of Inglewood through tailpipe emissions and other hazards, and the greenhouse gas mitigations included in the project application are completely inadequate. Climate change is a real threat, and this project deserves a lot more scrutiny from our representatives.

Please halt any fast-tracking of this application and require the thorough proper analysis and full, local mitigations that the residents of Inglewood deserve.

Sincerely,

JESSE SPILLERS

SUSTAINABLE LIVING
(A-CLEAN PLACE TO LIVE)

Hello,

I am writing to you today because I do not think the Clippers have done enough to offset the pollution that will result from the new arena. They have been operating under the assumption that on nights there are events at the Clippers Inglewood arena there won't be events of the same size at Staples Center. Not true!! This idea will be harmful to our warming planet and for local residents who will have to deal with even worse air quality and traffic. I understand that any new building or construction will increase pollution. I do not think that the Clippers have done enough to offset these negative impacts.

They could be committing real money and effort to protecting residents of Inglewood or supporting our economy. That is what AB 987 requires! But they aren't. They have made a couple of minor promises regarding local greenhouse gas mitigation, but only after major pressure. Why are they fighting so hard to NOT provide real local mitigations. Do they think that just because we are a minority community we are willing to trade the environment and our health for development. It is so offensive.

For these reasons, I hope you do not allow the Clippers to build an arena here.

Best,

Francine Bradsha

To Whom It May Concern:

I understand that the proposed Clippers stadium in Inglewood (#2018021056) continues to move through the review process quickly. I would like to ask the state government to please say no to special treatment for this project in light of the Clippers' refusal to provide environmental protections and project benefits that will help the people who live in Inglewood.

I also have been concerned that the project will not provide high-wage, quality jobs to Inglewood residents. Why should we endure years of construction, gridlock, and harmful pollution if we are not even going to benefit economically? I am even more concerned now that I've learned how little greenhouse gas mitigations are part of the project. I would have assumed that a new construction project of this size would be held to very high standards by our elected officials. I've been shocked to learn what is really in the project's application, which has lots of strange assumptions and ridiculous claims.

The people who live in Inglewood have been completely disregarded by the Clippers.

Please say no to this application.

Sincerely,

one @speicuttia APT 26

Hello—

We do NOT need another arena in Inglewood! Especially when the owners and builders have shown they do not care about protecting the residents they will be displacing when rents rise or people are pushed out because of pollution and traffic increases. As a resident of Inglewood, I strongly oppose construction of the arena and hope you will deny the Clippers application to streamline. Not only is ANOTHER arena unnecessary and foolish, the Clippers seem oblivious to the damage arena construction and operation will do to quality of life in the area. According to the materials submitted by the Clippers they are barely making any serious effort to mitigate the negative effects of the arena.

Their very reluctant local greenhouse gas reductions show they are NOT a good community partner. They have not convinced me or my neighbors that they will protect us from any future damage the arena will cause. For these reasons I hope you will reject the Clippers application and tell them to actually meet the requirements of AB987.

Sincerely,

Carolee Forbes

Dear Governor Newsom,

Please deny project number #2018021056 and its request to streamline. This is the proposed arena development in Inglewood that would eventually become the home of the LA Clippers. I am strongly opposed to this project for a variety of reasons.

- Economic: The Clippers promised to bring high quality, long term jobs to Inglewood. I have not seen any evidence there will be any real impact for Inglewood residents.
- Environmental: Construction creates pollution and operating an arena creates pollution. Not to mention the 4 million cars that will come to the arena, which all add to pollution in our neighborhoods.
- Equity: this project is fundamentally unfair. If building an arena was really a positive thing for local residents, then we would see arenas in Beverly Hills and Bel Air. It clearly will not have a positive impact on residents and the Clippers think they can silence our opposition.

Do not let the Clippers build the arena in Inglewood. I strongly hope their application for streamlining is denied.

Thank you.

Dear Air Resources Board:

As an Inglewood resident I am scared that the proposed Clippers arena will hurt my community. I can only imagine how much damage a THIRD big venue in Inglewood will have on our air, our streets, our children, and our seniors. This arena should receive the highest level of review possible to ensure that the environment remains healthy for my family, friends and neighbors.

So far, I have not seen evidence that the Clippers plan on working very hard to make sure that the arena doesn't impact the people of Inglewood or our air quality, etc. I see no evidence that they are willing to live up to AB 987.

The Clippers have simply not done enough at this point to qualify for streamlining.

Thank you.

Dear Governor's Office,

It is your job to act in the best interest of California residents. I don't see how the new Clippers arena will benefit anyone besides the Clippers organization and others who will make money off the arena. I do not want traffic in Inglewood to get any worse than it already is, and this will bring in almost 4 million more cars. I do not want to have to constantly worry about the health of my family, friends and loved ones because of the increase in pollution. This arena is a bad idea on a number of levels and, when all is said and done, it ignores what is in the best interest of the people living here.

I hope you will make sure this project lives up to the law, and that you will think twice before letting it enjoy special treatment.

Thank you.

Jenna J.

Hello,

I am very concerned about the possibility of having the new Clippers arena in my community. I live right near the area where the project is being proposed and I cannot imagine an arena of this size and scale in our neighborhood. The details of the application trouble me as well – it clearly does not meet the strict requirements of the law the Clippers asked for. Why are special exceptions being given to the Clippers? Inglewood residents deserve a project that protects the environment and provides special local mitigations to protect Inglewood residents. It seems that our needs are being cast aside to make way for Steve Ballmer's newest pastime.

This project deserves serious scrutiny from the representatives who are in power to be the voice of the people. Please don't let us down.

Deny this project!

Best,

Hello,

My neighbors and I are extremely worried about the health impacts on local residents that will result from the construction and operations from the Clippers arena. As someone who lives right near the proposed site of the arena, I must request that you reject the application.

This is a residential neighborhood full of families. It is not fair to force this City to roll out the red carpet for a billionaire to profit while our community suffers from pollution and traffic.

This plan was supposed to prompt significant projects in our community to reduce greenhouse gas emissions and pollution. But helping the community is clearly not a priority for this application. The Clippers do not take their responsibility seriously. Please protect Inglewood residents!

Best,

MARIA Elena Olalde

Hello,

This letter is regarding the proposed Clippers arena. As an Inglewood resident, I ask that you deny the project application.

The Clippers' application fails to protect Inglewood residents. The proposed greenhouse gas calculations, which assume that other venues won't hold large events during Clippers games, are very mistaken and false. We will still deal with incredible levels of air pollution, fumes, pollutants, and grid lock traffic. And the plan provides no true local measures.

It feels like this project is being forced through even though my neighbors and I want it stopped.

Please say NO to fast tracking this project.

Thank you.

To the Office of Governor Newsom,

I am a resident in the neighborhood where the Clippers want to build a new Clippers Arena. Such a massive undertaking does not properly take into account the impact this project will have on the community's health. There are children, young families, and elderly folks who live here. I urge you to please consider how children's rates of asthma will rise, how it will be more difficult for seniors to get from place to place in their own neighborhoods, and how they too and the greater community will suffer ill health effects from breathing in pollution and smog. The Clippers proposal does not go far enough in protecting this community from the adverse health risks.

Even further, this land should be used more effectively. There is so much room to create a space for public housing, and addressing the homeless and home affordability problem in this community. Instead, developers and politicians appear to care more about making profits and gentrifying this neighborhood.

Sincerely,

BRIAN QUASH

Dear State of California Office of Planning and Research,

I have lived in Inglewood for several years. It is a good place to grow up and enjoy family. Inglewood is a residential neighborhood full of hard-working people that is at risk of being destroyed by the construction of the new Clippers Arena. We will soon have two major venues in the area, and it would be ridiculous to build a new arena without properly consulting the residents of Inglewood, which has not been done to any decent or satisfactory level.

Besides the unimaginable traffic that would become a new unlivable feature of life in my neighborhood, the pollution alone would devastate this area. The law the Clippers asked for is supposed to protect against these concerns, but we are being ignored here. The developers counter that jobs will be attracted to the area, but they will be low-skill, part-time more than likely, and without medical benefits. Why would we want anything like that here? I am strongly opposed to the building of this new arena and I would hope that the state will hear my concerns.

Best,
Anthony Tec

To whom it may concern –

I live in Inglewood, just a stone's throw from the proposed Clippers arena. I ask that you reject the application given that it falls very short of the requirements of AB 987.

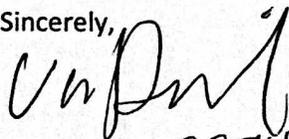

This project will generate a huge amount of greenhouse gas emissions that our environment cannot handle. The state of California is supposed to be a world leader in the effort to combat climate change. How can the state not only approve – but expedite – a project that is clearly so detrimental to the health of our planet?

If that weren't enough, local residents in Inglewood will suffer too. People from all over the region are going to drive to Inglewood to attend events at the new arena, creating gridlock traffic on our streets. Inglewood has enough going on right now and doesn't deserve to endure construction and operations from a massive arena in a residential neighborhood.

The governor just signed an order requiring the state to reduce greenhouse gases. And the state is suing President Trump over lower car pollution. But we are asked to think it is okay to put millions of cars in our neighborhood, and okay for our children to breathe the pollution from the tailpipes of these cars. It is not ok!

Please reject this project.

Sincerely,
