Subject: Comments on amended CEQA Guidelines

The following comments are being made on behalf of the City of Anaheim's Public Works Department-Transportation/Traffic Engineering Division:

Regarding the proposed revised guidelines:

XVI – Transportation –

- a) Recommend the following language for a): Result in a substantial increase in the number vehicle trips, roadway vehicle **delay**, or vehicle miles traveled? As vehicle delay leads to a greater source of emissions rather than vehicle volume.
- b) Recommend the following language for e): Conflict with adopted policies, plans, or programs supporting alternative transportation (e.g., **transit amenities**, bicycle **facilities**). This language offers greater flexibility and is more inclusive of transit amenities, including, but not limited to bus stops, etc.).

Thank you for the opportunity to comment on the proposed amended CEQA Guidelines.
