**Subject: Fw: OPR Releases Preliminary Draft CEQA Guidelines for GHG**

In reviewing the proposed changes to the Initial Study, I noticed that Greenhouse Gas Emissions are not identified in the list under "ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:". I believe this issue should be included. Also, I was wondering why OPR chose to entitle the issue "Greenhouse Gas Emissions" rather than "Climate Change". It seems like most people are using the more comprehensive term "Climate Change".
