STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**
(Formerly SCH NEWSLETTER)

April 1 – 15, 2012

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **April 1 – 15, 2012**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Director

CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

USPS:

State Clearinghouse
P.O. Box 3044
Sacramento, CA 95812-3044

<u>Documents Received on Monday, April 02, 2012</u>			
2012041008	Proposed Rule 1177 - Liquefied Petroleum Gas Transfer and Dispensing South Coast Air Quality Management District -- To reduce emissions of volatile organic compounds (VOC) from the transfer and dispensing of liquefied petroleum gas (LPG) during deliveries to residential, industrial and commercial users, transfers to fueling stations and cylinder refueling, SCAQMD staff is proposing to adopt Proposed Rule (PR) 1177 - Liquefied Petroleum Gas Transfer and Dispensing. PR 1177 would apply to the transfer of LPG to and from stationary storage tanks and cargo tanks, including bobtails, tanker trucks and rail tank cars, and into portable refillable tanks. Key components of PR 1177 would require the following: 1) the use of low emission connectors for transfer and dispensing of LPG to limit the discharge of LPG upon disconnection to four cubic centimeters or less, effective July 1, 2013; 2) installation of low emission fixed liquid level gauges (FLLG) or use of an equivalent technique or technology on applicable receiving tanks (e.g., stationary tanks, cargo tanks, and portable tanks) in accordance with the installation schedule of the proposed rule ranging from July 1, 2013 and July 1, 2017; 3) routine LPG transfer equipment and component leak detection and repair by trained personnel; 4) associated recordkeeping and reporting to demonstrate compliance with the proposed rule requirements; and, 5) conduct proper maintenance of vapor recovery or equalization systems at bulk loading facilities. Upon full implementation, PR 1177 is estimated to reduce VOC emissions by 6.1 tons per day. The environmental analysis in the Draft EA concluded that PR 1177 would not generate any significant adverse environmental impacts.	EA	05/01/2012
2012044001	Minuteman III and Peacekeeper Silo Elimination, MT, W, and CA U.S. Air Force Lompoc--Santa Barbara The proposed action is to dismantle 50- missile silos in Montana, 50 missile silos in Wyoming, and 4 missile silos at Vandenberg AFB in California in order to comply with the new Strategic Arms Reduction Treaty that entered into force in February 2011.	EA	05/01/2012
2007012089	Humboldt County General Plan Update Humboldt County --Humboldt Note: Extended Review Per Lead. The project consists of updating the Humboldt County General Plan (referred to as the proposed General Plan Update or GPU for purposes of this EIR). A complete project description is in chapter 2 of this EIR, but in Summary, the GPU is intended to be a comprehensive update of the County's current 1984 General Plan. The General Plan expresses the community's goals for the distribution of future land uses for approximately the next 20 years, both public and private, and establishes policies, standards and implementation measures for future development. It reviews and revises the basic assumptions regarding population projections and future land use demand and proposes land use designations and diagrams (maps), together with policies to meet that demand in a manner consistent with State law.	EIR	06/15/2012

<u>Documents Received on Monday, April 02, 2012</u>			
2011102051	Revised SMP-30 Use Permit, Sunol Valley Aggregate Quarry Alameda County --Alameda The current Sunol Valley Aggregate Quarry is under operation on an approximately 323-acre site. The quarry was approved for aggregate mining by the County in 1992 pursuant to Surface Mining Permit-30 (SMP-30). Under this currently effective permit, quarry operations can continue through year 2021. An adjacent 58-acre parcel has now become available, and the applicant seeks to revise the SMP-30 permit to increase aggregate reserves by expanding and deepening the quarry pit, which will ultimately be used for water storage. The proposed revised permit (the project) seeks to increase the area under permit, deepen the excavation, extend the permit expiration date to 30 years after approval, to add an on-site asphalt batch plant and a concrete batch plant, and to amend the Reclamation Plan for the site.	EIR	05/16/2012
2009092082	Lynbrook High School Sports Fields Improvements and Lighting Fremont Union High School District San Jose--Santa Clara Note: FYI - Amendment The project proposes to reconfigure and reconstruct the existing sports fields and related athletic facilities (e.g., bleachers, bullpens, batting cages, etc.) and install sports lighting at the main field and track.	FIN	
2009092083	Monta Vista High School Sports Fielding Improvements and Lighting Fremont Union High School District Cupertino--Santa Clara Note: FYI - Amendment The project proposes to reconstruct the existing sports fields and related athletic facilities (e.g., bleachers, bullpens, batting cages, etc.) and install sports lighting at the main field and track.	FIN	
2011112046	Rezone Application No. 2011-02 - Randy Thomas Properties McHenry Stanislaus County Modesto--Stanislaus Request to rezone ~42 acres in five different zoning districts into one new Planned Development zone to allow C-2 (General Commercial) and LI (Limited Industrial) uses. The new major tenant will be an auction house specializing in vehicle auctions and auctions for surplus equipment and furniture. There will also be an area for consignment vehicles sales.	MND	05/01/2012
2012041002	Draft Remedial Action Plan for Former Clay Skeet and Trap Shooting Range, Chula Vista, CA San Diego County Chula Vista--San Diego The project is an investing and remediation of surface and subsurface areas impacted from historic shooting range activities at the former Otay Skeet and Trap Shooting Range. The project consists of remediation of soil impacted by lead and polynuclear aromatic hydrocarbons.	MND	05/01/2012

2012041004	<p>UPS Expansion Facility Planning Case 2009-111 Plot Plan and Environmental Assessment Menifee, City of Menifee--Riverside</p> <p>Planning Case No. 2011-093 (Plot Plan) is a proposal to permit the construction of one new industrial building, one guard house and the modification to an existing building for a package distribution facility. The project will include a total of 49,650 sf on the 6.71 gross acre subject parcel of land. The facility will include two run-out services areas for loading vehicles. The expanded facility will include 15 tractor trailer docks, 17 long haul trailer parking spaces, 93 parcel van docks, 222 automobile parking spaces, a truck washing area, a below ground fuel tank and four fuel islands. The new construction will also involve the construction of an outdoor employee lunch area adjacent to the new building. In addition, the current application includes the following additional modifications: Adding a new auto shop in the existing building; Relocating the outside vehicle wash area to inside the existing structure; Relocating an existing office to the new building; Relocating employee parking area; Removing the northern 1,080 sf portion of the building and replacing it with a new run-out; Removing an existing covered dock on the south side of the existing building; Removing the two existing fuel islands; Relocating two on-site fire hydrants and protective bollards; Relocating existing bicycle racks; Removing an existing drywell; Removing various interior chain link fencing; Removing an existing concrete pad on the western portion of the site; Removing existing lighting at the rear of the existing building; Removing and relocating utilities; and Abandon existing septic tanks. The plans also delineate the construction of a 242 sf guard house to the southeast of the existing building.</p>	MND	05/01/2012
2012041005	<p>Proposed Runway Safety Area (RSA) Improvements to Runway 11L-29R at Fresno Yosemite Intl. Airport Fresno, City of Fresno--Fresno</p> <p>The project consists of shifting the Runway Safety Areas for Runway 11L/29R through the application of FAA-established declared distances and by adding 312 feet of runway to the west end. The additional length will have no effect on capacity for the airport. To properly interface with existing airport facilities, two stub taxiways will be constructed, an existing taxiway (Taxiway C12) will be reconstructed, and an aircraft holding apron will be created at the west end of Taxiway C. Certain runway lighting systems will also be relocated. Because the addition of 312 feet of runway to the west involves a minor shift of the adopted noise contours and safety compatibility zones for the airport, as identified in the City's CLUP, a plan amendment is also required.</p>	MND	05/01/2012
2012041010	<p>Wastewater Flow Re-Routing Project Templeton Community Services District Paso Robles--San Luis Obispo</p> <p>The Templeton Community Service District proposes a change in wastewater operations. The Project would re-route the treatment and disposal location of 200,000 gallons per day to the Meadowbrook wastewater treatment plant and Selby Percolation Pond Facility. This wastewater is currently discharged to the Salinas River after treatment from the City of Paso Robles WWTP. The Project would require construction of new conveyance infrastructure (pipelines and</p>	MND	05/02/2012

	pumps). The new pipeline alignment would run along approximately 2.4 miles connecting to existing TCSD facilities and pipelines.		
2012042007	Zone Amendment 10-003 (Gordon) Shasta County --Shasta The project site is currently a designated "Timberland Production Zone" pursuant to the Timberland Productivity Act of 1982 (Government Code Section 51100). The Timberland Production Zone is comprised of five parcels' totaling ~160 acres of forestland. The applicant has requested to immediately rezone ~35 acres of forestland from the Timber Production (TP) zone district to the Timberland (TL) zone district to facilitate development of a future home site and pursuant to Government Code Section 51130. A typical home site in rural areas of the County would consist of the development of a well, septic system, dwelling, residential accessory building(s) and areas dedicated to landscaping and/or agricultural activities.	MND	05/01/2012
2012041003	Los Angeles International Airport (LAX) Northside Plan Update Los Angeles World Airports Los Angeles, City of--Los Angeles The proposed LAX Northside Plan Update will change development standards and uses for the LAX Northside area of the LAX Specific Plan to permit up to 2,320,000 sf of new employment, retail, restaurant, office, hotel, research and development, education, civic, airport support, recreation, and buffer uses on ~340 acres of land located north of LAX. The proposed project would also permit areas for open space for recreational and buffer uses and would allow uses and development rights to be transferred within limited areas of the site, not to exceed specified development, environmental, and design constraints. Implementation of the proposed Project may also include a street vacation of Cum Laude Avenue.	NOP	05/01/2012
2012041006	Upland General Plan Update Upland, City of Upland--San Bernardino Comprehensive General Plan Update to include the Cable Airport Land Use Compatibility Plan. Anticipated growth over existing conditions: 11,720 dwellings units, 530,599 s.f. of office uses, 2,944,449 s.f. of commercial uses, and 3,180.443 s.f. of industrial uses.	NOP	05/01/2012
2011122074	Tentative Parcel Map Application No. 2011-08 - Brah/Basrai Stanislaus County Patterson--Stanislaus Request to create two 58.75 acre parcels from a 117.5 acre parcel.	Neg	05/01/2012
2012041007	General Plan Amendment 10-002 (Main) Shasta County Redding--Shasta The request is to amend Shasta County General Plan Policy CO-k which limits minimum parcel sizes in Urban Residential (UR) and Suburban Residential (SR) area to five acres if public water and sewer systems are not available. The proposed policy amendment would promote using on-site septic systems and wells to allow parcel sizes as small as one-acre in certain UR and SR General Plan areas where the availability of community water or sewer services is not feasible. 2012042001	<p>Prima Bella Produce, Inc. and Mark Bacchetti, Prima Bella Food Processing Facility Regional Water Quality Control Board, Region 5 (Central Valley), Sacramento Tracy--San Joaquin</p> <p>The project is expansion of an existing food processing facility wastewater management system that occurred in 2008. The Prima Bella food processing facility has operated since the early 1970's. The project consists of construction of a wastewater pond, expanding an existing wastewater land application area (LAA), constructing a ditch to convey supplemental irrigation water, wastewater conveyance improvements, and discharging wastewater to land. The project does not involve any expansion of buildings. San Joaquin County issued building permits for recent facility improvements, but those permits were ministerial. Therefore, the Central Valley Water Board will be the lead agency for CEQA review to support adoption of Waste Discharge Requirements (WDRs).</p>	Neg	05/01/2012
2012042006	<p>Use Permit 11-015 (Munson) Shasta County Anderson--Shasta</p> <p>Munson Pump Services has requested approval of a Use Permit for a contractor's yard for a contractor which specializes in flood control equipment and industrial applications. Site development would include a 7,000 sf shop, a 2,400 sf office, a 1,000 sf awning, and about a 4.5-acre outside equipment and materials storage area.</p>	Neg	05/01/2012
2006062157	<p>California Pacific Medical Center Long Range Development Plan Project San Francisco, City and County of San Francisco--San Francisco NOTE: Comments and Responses 1 CD</p> <p>The California Pacific Medical Center (CPMC) Long Range Development Plan (LRDP), or otherwise referred to as the proposed project, is CPMC's multi-phased strategy to meet State seismic safety requirements for hospitals (SB 1953) and create a 20-year framework and Institutional Master Plan for its four existing medical campuses (Pacific Campus at Sacramento and Buchanan Streets; California Campus at Maple and California Streets Davies Campus at Castro and 14th streets; and St. Luke's Campus at Caesar Chavez and Valencia Streets), and a proposed new medical campus (Cathedral Hill Campus at Van Ness Avenue and Geary Boulevard) in San Francisco. Completion of the proposed Cathedral Hill Campus by 2015 would allow CPMC to consolidate duplicative services at existing CPMC campuses. The existing acute-care services, primary emergency services, and Women's and Children's Center at CPMC's existing Pacific and California Campuses would be relocated to the proposed Cathedral Hill Hospital.</p>	Oth	
2012042005	<p>Madrone Avenue Left-Turn Channelization Project Caltrans #4 Cotati--Sonoma Note: Draft Initial Study.</p> <p>Caltrans plans to improve safety at the intersection of Madrone Ave. and State Route 84 (Old Gravenstein Highway) in Sonoma County by including a left-turn lane in each direction. The project will widen the pavement several feet northwards towards Derby Lane to make the needed room. In doing so it will</p>	Oth	05/01/2012

	extend drainage culverts to the edge of the new pavement. Drainage ditches that the project will fill will be replaced with new ditches and culverts.		
1984020113	Non-Exclusive Geophysical Survey Permit on Tide and Submerged Land California State Lands Commission --STATEWIDE Authorize issuance to Coastal Frontiers Corporation of a non exclusive general permit to conduct low-energy geophysical surveys for the period April 1, 2012 through March 31, 2013.	NOD	
1991103064	Grafton Plaza Dublin, City of Dublin--Alameda The Planning Commission reviewed and approved a Site Development Review and Vesting Tentative Parcel Map on .95 acres with Silvera Ranch, Phase 4 (subject to a General Plan and Eastern Dublin Specific Plan Amendment and Stage 1 and Stage 2 Development Plan Amendment).	NOD	
1991103064	Grafton Plaza Dublin, City of Dublin--Alameda The Planning Commission reviewed and approved the Vesting Tentative Map (subject to a General Plan and Specific Plan Amendment and a Stage 1 and Stage 2 Development Plan Amendment) for development of 19 single-family detached homes in a medium density land use on 3.0 net.	NOD	
1992041089	Hanson Aggregates Major Use Permit and Reclamation Plan, Baxter Drilling Company Major Use Permit and Reclamation Plan San Diego County LAKESIDE--San Diego The Hanson Aggregates Pacific Southwest, Inc. (Hanson) proposes to extend existing aggregate extraction on areas described as future reserve in an EIR prepared for the current Special Use Permit (P 77-066) and Reclamation Plan (RP 79-011) approved in 1978. The applicant is proposing to extend the life of this operation for approximately 30 years to enable the extraction of the regionally significant Stadium Conglomerate aggregate resources which occur on-site. The proposed Major Use Permit (P 77-066W) would extend extraction operations, but will not result in expanded production capabilities. The State Lands Commission action is a 10-year State Mineral Extraction Lease through December 30, 2021.	NOD	
1993112027	River Islands at Lathrop Lathrop, City of Lathrop--San Joaquin The City proposes to construct a new bridge spanning the San Joaquin River as the westerly extension of the River Islands Parkway within the City of Lathrop. The bridge will consist of two parallel, three-span, cast-in-place, pre-stressed concrete box girder bridges. The State Lands Commission action is a 25-year General Lease - Public Agency Use through June 28, 2032.	NOD	
1999091079	Inyo County Salt Cedar Control Program Inyo County Bishop, Big Pine, Lone Pine, Independence--Inyo CDFG is executing a Lake and Streambed Alteration Agreement pursuant to Section 1602 (SAA #1600-2011-0246-R6) of the Fish and Game Code to the project Permittee, Inyo county Water Department. Permittee proposes to continue an ongoing saltcedar removal and control effort within the Lower Owens River	NOD

	Project (LORP) area that will be implemented in a strategic manner with a goal of eradication on saltcedar from this area.		
2001042115	Marin-Sonoma Narrows HOV Widening Project Caltrans #4 Petaluma, Novato--Sonoma, Marin The Marin Sonoma Narrows (MSN) HOV Widening Project B2 is one segment of the overall MSN Project is limited to upgrading the existing U.S. 101 four lane expressways into a full access freeway, replacing the existing South Petaluma Boulevard interchange with a new interchange, construction of frontage roads on both sides of U.S. 101 for maintaining access to intersecting roadways and adjacent parcels and widening of the Petaluma River Bridge.	NOD	
2006021071	San Juan Road Interchange Caltrans #6 --Monterey, San Benito The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement, pursuant to Section 1602 of the Fish and Game Code, to the Project applicant, Caltrans proposes to construct an overcrossing at a right angle with Route 101 northeast of the Monterey/San Benito County line. The southbound on-ramp and southbound off-ramp would be a compact diamond interchange configuration; the northbound off-ramp and northbound on-ramp would be a one-quadrant cloverleaf interchange configuration. The purpose of the proposed project is to eliminate the left turn from San Juan to north bound Route 101 and improve the safety features of the transportation facility. Construction is currently scheduled to begin in 2013 and continue until closeout in 2016.	NOD	
2006102058	City of Modesto Tuolumne Riverbank Restoration Modesto, City of Modesto--Stanislaus The city of Modesto proposes to make repairs and add riverbank protection measures to sections of the northwestern bank of the Tuolumne River that were damaged by recent high flows from upstream releases. The State Lands Commission action is a 20-year General Lease - Public Agency Use through March 28, 2032.	NOD	
2007091149	Butterfield Specific Plan Banning, City of Banning--Riverside Note: Reference SCH# 1990020698 The project proposes 5,387 dwelling units (936.4 acres of residential), a golf course and open space (253.9 acres), parks (66.5 acres) and other open space (108.4 acres, two school sites (23.0 acres), and existing utility substation facility (4.2 acres), a potential fire station site (1.6 acres), a potential 1.5-2.0 MGD satellite wastewater treatment plant (3 acres), commercial/office sites (36.0 acres) and backbone roadways (113.6 acres). The project also includes the construction of major onsite and offsite infrastructure, including, but not limited to: various offsite conveyance pipelines (water, wastewater and recycled water), a multi-purpose recharge/storage/detention basin, and drainage improvements and roadway improvements. The project includes the following approvals: a General Plan Amendment and Zone Change, Amended Specific Plan, and Amended Development Agreement.	NOD

2011061027	New Glendale Courthouse Judicial Council of California Glendale--Los Angeles Note: Recirculated Sections	EIR	05/17/2012
------------	---	------------	------------

The proposed project includes the construction of a five story (maximum) approximately 110,000 sq. ft. courthouse with a basement. The new courthouse would be constructed generally in the same location as the existing courthouse. Portions of the existing courthouse of architectural relevance are intended to be preserved where feasible, while the remainder of the courthouse would be demolished. A small site behind the existing courthouse at 124 South Isabel Street will also be acquired for the related parking. This site is currently owned by the Board of Realtors. The Jewel City Bowl site, located at 135 South Glendale Avenue, is no longer being considered for acquisition.

2012031093	Allow a Photovoltaic Solar Power Generation Facility with Related Improvements. Application No. 6470 Fresno County San Joaquin--Fresno Allow a photovoltaic solar power generation facility with related improvements including a substation with a 30-foot tall electrical utility tower, 35 utility poles up to 80 feet tall, 18 approximately 160 s.f. inverter/transformer buildings, a 1,200 s.f. operations and maintenance building, and a six-foot tall chain-link fence on a 160-acre parcel in the AE-20 (Exclusive Agricultural, 20-acre minimum parcel size) Zone District. The project site is located on the south side of Nebraska Avenue, between Derrick and Stanislaus Avenues approximately nine miles southwest of the nearest city limits of the City of San Joaquin (SUP. DIST.: 1) (APN: 038-080-24T).	MND	05/02/2012

2012041015	Bert Crane Solar Facility Atwater, City of Atwater--Merced Installation of a 1.1 megawatt photovoltaic solar facility at the Bert Crane Wastewater Treatment Plant (WWTP) site. The project consists of 204 strings of 20 270-watt solar modules on azimuth trackers installed on approximately 10 acres. A future second phase of the project anticipates expansion to 10 adjacent acres with a similar type and number of modules. Timing for future construction of the second phase has not been defined, but is anticipated before the year 2020.	MND	05/02/2012
2012042009	Site-Specific Weed and Pest Management Project Midpeninsula Regional Open Space District Los Gatos, Saratoga, Cupertino, Woodside--Santa Clara, San Mateo The Midpeninsula Regional Open Space District proposes to implement a site-specific weed and pest management project on select sites on open space preserves in Santa Clara and San Mateo counties, CA. Weed and pest management activities would occur at 42 distinct treatment sites within 13 of its 26 designated open space preserve (OSP) areas in the years 2012 through 2014. The purpose of the project is to control noxious and invasive weed and pest species in high priority natural areas of the District to halt or minimize the spread of those species in areas where substantial progress has been made towards eradication or site restoration to more natural conditions. The District would carry out an IPM approach in the implementation of this project.	MND	05/03/2012
2010101065	Hudson Ranch Power II Geothermal Plant/Simbol Calipatria II Plant Project Imperial County Calipatria--Imperial Note: Revised/Extended Review. The Proposed Project includes two separate development activities; the Hudson Ranch Power II Geothermal Flash Power Plant (HR2) and the Simbol Calipatria Plant II (SmCP 2) mineral extraction plant on agricultural land within the Salton Sea known Geothermal Resource Area in Imperial County, California. The proposed HR2 project consists of a 49.9 MW geothermal power plant, supporting geothermal production and injection wells/pipelines; and, an interconnection to the Imperial Irrigation District's existing electrical transmission system. The proposed SmCP-2 is a lithium carbonate production plant located adjacent to the HR2 site. SmCP-2 would use geothermal brine from the HR2 plant to produce lithium carbonate and other products for commercial sale and would not be developed without the HR2 project.	NOP	05/07/2012
2012041009	Downtown Neighborhoods Community Plan, Fulton Corridor Specific Plan, and Downtown Development Code Fresno, City of Fresno--Fresno The City of Fresno intends to introduce and adopt a new downtown Neighborhoods Community Plan (DNCP) for the residential neighborhoods surrounding Downtown and the Fulton corridor Specific Plan (FCSP) for the core of Downtown, a Downtown Development Code that will apply within the boundaries of the DNCP; make amendments to the 2025 City of Fresno General Plan and various Community Plans and repeal various Community and Specific plans	NOP	05/02/2012

2012041013	Moreno Master Drainage Plan Revision Riverside County Flood Control and Water Conservation Moreno Valley--Riverside Note: Reference SCH# 1991022073.	NOP	05/02/2012
	The DPEIR for the revisions to the Moreno MDP will evaluate three separate components: Administration of the MDP, Future Construction of the MDP facilities, and Future Operations and Maintenance of MDP facilities, hereinafter collectively referred to as the "Project".		
2012041014	Ultramar, Inc. Wilmington Refinery Proposed Cogeneration Project South Coast Air Quality Management District Diamond Bar--Los Angeles Ultramar, Inc., a Valero Energy Company, is proposing to install a 45 megawatt cogeneration unit at the Wilmington Refinery. The cogeneration unit will be equipped with a selective catalytic reduction (SCR) unit and catalyst for emissions control of nitrogen oxides and carbon monoxide. Aqueous ammonia for the SCR unit will be supplied from an existing storage tank. A new control room for the cogeneration unit will also be built.	NOP	05/02/2012
2012042008	Round Valley Pedestrian Bridge Valley Regional Preserve East Bay Regional Parks District Brentwood--Contra Costa The EBRPD is proposing to construct pedestrian bridge to connect recreation trails on either side of Round Valley Creek at Round Valley Regional Preserve. Activities involved in implementing the proposed project include: installation of abutments and a 60-foot clear span prefabricated steel bridge over Round Valley Creek; and minor realignment of the existing natural surface trails to conform to the bridge approaches.	Neg	05/03/2012
2007121088	Gordon Highlands Grading: Modification of HDPR89-05; and HDPR90-21; V05-03 Glendora, City of Glendora--Los Angeles The Project involves remedial grading necessary to address unpermitted grading impacts, including impacts to biological resources, on two tracts and a variance to grade in areas exceeding 35 percent slopes. The combined acreage of both tracts is 166.8 acres. A combined total of 30 single family homes will eventually be constructed on individual buildings pads at both tracts.	NOD	
2009021009	California Valley Solar Ranch & Twisselman Conditional Use Permits (DRC2008-00097, DRC2009-00004) San Luis Obispo County San Luis Obispo--San Luis Obispo The Project entails constructing, operating, and maintaining a 250-megawatt solar photovoltaic energy facility, including solar panel arrays, gathering power lines, a substation, access roads, buildings, two evaporation ponds, and an approximately three-mile long generation tie-line to convey electricity to the existing Morro-Bay-Midway transmission line. The Project will result in permanent impacts to 1,782 acres and temporary impacts to 80 acres of San Joaquin kit fox, giant kangaroo rat, and San Joaquin antelope squirrel habitat.	NOD

2012022066	Richvale Irrigation District 2012 Water Transfer Program Richvale Irrigation District --Butte Richvale Irrigation District will idle up to 6,400 acres of rice land to make up to 21,120 acre-feet of water available for transfer to the participating member public agencies of the State Water Contractors Incorporated.	NOD	
2012049006	Serrano Creek Maintenance Project (SAA #1600-2011-0164-R5) Fish & Game #5 --Orange The project involves routine maintenance activities within the 1.1-mile reach of Serrano Creek described above. For the purposes of this long-term maintenance agreement, routine maintenance activities are defined as: vegetation removal and minor debris removal (including sediment, trash, and woody debris) to maintain the current channel alignment. The current channel alignment shall be maintained by incorporating a 50-foot maintenance zone. This 50-foot maintenance zone shall consist of a 10-foot wide thalweg zone, and a 20-foot wide medium-growth zone on both sides of the 10-foot thalweg zone (Figures 3a, 3b, and 3c). Maintenance within the 10-foot wide thalweg zone shall include removal of all non-herbaceous plants. Maintenance within the medium-growth zone shall involve the removal of any tree or shrub species larger than 2-inches in diameter (measured at the base), and the removal of any observed non-native species regardless of their size. Vegetation removal shall involve cutting plants at the base, and leaving the root systems in place. Sediment removal is limited to the outfall structures located throughout the 1.1 mile reach of Serrano Creek and shall only be accomplished using hand crews (no heavy equipment).	NOD	
2011038110	Uranium Treatment Project Eastern Sierra Unified School District --Mono The California Department of Public Health is a responsible agency for this project. The Coleville School proposes to construct a 2400 square feet building on the Coleville High School campus to house a water treatment system, water storage tanks, and booster pump systems to deliver both treated and untreated water to the existing distribution system and general storage. The treatment system will remove naturally occurring uranium from the well water that supplies the Coleville campus.	NOE	
2012048120	Culvert Repair Project Caltrans #3 Oroville--Butte The existing culvert will be relined with either a cured-in-place pipeliner or a HDPE plastic pipeliner.	NOE	
2012048121	Route 101 Re-striping between Eureks and Arcata Caltrans #1 Arcata, Eureka--Humboldt The existing facility is a divided expressway (south of Gannon Slough Bridges) and freeway (north Gannon Slough Bridges) with two 12-foot wide lanes, a 5-foot wide inside median shoulder, and 8 to 10-foot wide outside shoulder in both the northbound and southbound directions. This project proposes to remove and replace roadway striping, rumble strips, and pavement markings to provide consistent 19-foot wide outside shoulders for both northbound and southbound directions. This additional width for the outside shoulders will be obtained by	NOE

	reducing the width of the inside (median) shoulder and #1 (inside) travel lanes by 1-foot each.		
2012048122	Install rumble Strips Caltrans #1 --Mendocino The project is to install centerline and shoulder ground-in rumble strips. The purpose is to reduce frequency of and severity of cross over and 'run-off-road' collisions by alerting drivers when they are veering out of their lane. Investigation of traffic fatality indicates treatment is needed at this location. All work, including staging, will occur within the Caltrans Right of Way on existing pavement, and there will be no ground disturbance.	NOE	
2012048123	Apply High Friction Surface Treatment Caltrans #1 --Del Norte Project is to apply a high friction surface tretment (HFST) to the traveled lanes, turning lanes and both shoulders of the highway. HFST is an epoxy-resin or polyurethane-resin binder topped with a calcined bauxite aggregate topping. Standard pavement markings will be applied to the road after HFST application. Shoulder backing is not anticipated. Purpose of treatment is to reduce collisions by increasing the traction of cars o the roadway. Treatment is needed because Fataality-plus-injury and Total Collision rates are 8 and 11 times the statewide average for a similar facility.	NOE	
2012048124	Replace Damaged Tile, Torrey Pines Lodge (11/12-SD-35) Parks and Recreation, Department of --San Diego This project will protect public health and safety by replacing the damaged tile on the steps at the main entrance to the Lodge at Torrey Pines State Reserve.	NOE	
2012048125	Water Well System Improvements Parks and Recreation, Department of --Los Angeles The purpose of this project is to replace a failed water system near the Visitor Center at Hungry Valley State Vehicular Recreation Area (SVRA). This project will also investigate water system conditions at two existing well locations within the SVRA.	NOE	
2012048126	Quail Canyon Special Event Area Chlorination Facility Parks and Recreation, Department of --Los Angeles The purpose of this project is to install a fiberglass structure over an existing waterline to protect vital equipment providing chlorinated water to the Quail Canyon Special Event Area (SEA). This project is being required by Los Angeles County Department of Water and Power to achieve a 0.4 mg/1 of free chlorine residual at the end of a distrubition system. The location of this project will be to the north west of the entrance to the quail Canyon SEA.	NOE	
2012048127	Honey Valley Group Campground Improvements Parks and Recreation, Department of --Ventura The purpose of this project is to make improvements to the Honey Valley Group Campground in the form of vault toilets, cement walkways, a group shade structure with BBQ's, and a fire pit. An amphitheater with seating, stage, fire pit, and wood fencing will also be added.	NOE

2011082023	Foothill Blvd/Wyman Ravine Bridge Replacement Butte County Oroville--Butte The proposed project includes the removal of the existing bridge, construction of a three span, cast-in-place triple box culvert bridge, and the reconstruction of approximately 800 linear feet of roadway; on Foothill Blvd. and Oro-Bangor Highway.	NOD	
2011112039	Water Treatment Plants Rehabilitation Project Sacramento, City of Sacramento--Sacramento The proposed Water Treatment Plant Rehabilitation project consists of replacing existing outdated equipment and facilities, constructing miscellaneous improvements at SRWTP and constructing solids handling improvements at SRWTP and EAFWTP. The project does not increase the capacity of either the SRWTP or the EAFWTP. Construction of the proposed project will take approximately three years. At SRWTP, the existing flocculation and sedimentation Basins 1 and 2, old filters 1 through 16 and pump station will be replaced with new facilities. To construct these new facilities, Basin 2 and the former 911 Call Center building north of the plant will be demolished. Basin 1, pump station and old filters 1 through 16 will be decommissioned, but not demolished. As part of these proposed improvements there are associated improvements including, miscellaneous asphalt concrete roads and parking areas and pipelines. In addition, new solids handling improvements and miscellaneous electrical/process improvements will be installed to improve plant efficiency. At EAFWTP, the existing FWW basins will be retrofitted with mechanical sludge collection systems to allow regular removal of settled sludge and transfer to the solids handling facility. A new dewatering building will be constructed and fitted with equipment to dewater solids. The existing chlorine system will be expanded and other improvements to the electrical and operating system will be installed as required.	NOD

	duration of the Redevelopment Plan from 2012 to 2022 and extend the time period that the Redevelopment Agency can receive tax increment funds from 2022 to 2032, as allowed by Senate Bill 211 (codified at Health and Safety Code Section 33333.10 et. Seq.). Second, it would increase the cap on the receipt of tax increment revenue to account for the proposed time extension, as the Redevelopment Agency is anticipated to exceed its existing cap if the time extension is adopted.		
2011051018	2012-2035 Regional Transportation Plan and Sustainable Communities Strategy Southern California Association of Governments --Los Angeles, Ventura, San Bernardino, Imperial, Riverside, ... The Proposed 2012-2035 RTP/SCS provides land use and transportation recommendations to help achieve a coordinated balance of land uses and transportation improvements such that vehicle trips and vehicle trip lengths are reduced and land is used efficiently and sustainably, thereby minimizing energy and water consumption. The 2012-2035 RTP/SCS contains transportation and urban form strategies that encourage compact growth, increased jobs/housing balance and transit-oriented development, where feasible, in all parts of the region.	NOD	
2011071066	Mount Signal and Calexico Solar Farm Project Imperial County Calexico--Imperial The project would consist of two primary components: (1) the construction and operation of solar facility sites at the Mount Signal Farm 1, Calexico Solar Farms 1A and 1B, and Calexico Solar Farms 2A and 2B site locations; and (2) the construction and operation of off-site electrical transmission infrastructure and associated interconnections. A portion of the transmission corridor traverses BLM lands. The primary components within the solar farms will be solar arrays, electrical substation facilities, and other operation and maintenance facilities.	NOD	
2011091007	Honda Center Enhancement Project Anaheim, City of Anaheim--Orange The proposed project includes an increase in the number of annual events at Honda Center through the addition of another permanent tenant, as well as other permanent improvements described below. The 1990 Environmental Impact Report (EIR) for Honda Center (formerly Arrowhead Pond) analyzed up to 162 events per year. Honda Center currently averages up to 153 events per year with average attendance at an event of up to 11,264 people. The maximum number of events, in any one year, over the last five year was 162 events in 2008.	NOD	
2011122030	Guadalupe River Invasive Exotic Vegetation Removal Project Santa Clara Valley Water District San Jose--Santa Clara Restore/improve approximately two acres of riparian vegetation habitat by removing invasive species in the riparian corridor, including weeping willow, acacia, and holly oak. These non-native, invasive plant species are threatening to displace native species that provide riparian habitat in the corridor.	NOD

1988050215	<p>Silva Valley Parkway Interchange with U.S. Highway 50 El Dorado County --El Dorado</p> <p>The proposed project will construct a new interchange on U.S. Highway 50 at Silva Valley Parkway in El Dorado Hills. Referred to as the "Ridge Design" Alternative (approved by the Board in 1990), proposed improvements include: loop on-ramps in the northeast and southwest quadrants; diagonal on-and off-ramps in each direction; an overcrossing for Silva Valley Parkway; safety lighting; on-ramps designated to accommodate future ramp metering and HOV lanes.</p>	NOD	
1998072050	<p>Construction, Relocation, and Abandonment of Water and Sewer Facilities in Saratoga Road, Project No.s 02016E and 02014E, Work Order No.s 47432 and 47433 El Dorado County Folsom--El Dorado</p> <p>Divide Phase 2B into 2 sub phases to separates construction timing of westbound on-and off-ramps, (Phase 2B.1) from eastbound ramps (2B.2). Phase 2B.1 slightly modifies westbound ramps within the same footprint approved in 2003 EIR, consistent with Caltrans Hwy Design Standards.</p>	NOD	
2011032051	<p>Hyatt Place Hotel Expansion and Old Davis Road Extension University of California Davis--Yolo</p> <p>The project will extend Old Davis Road from its existing terminus east of the existing hotel to the southern terminus of A Street. The proposed extension of Old Davis Road has been previously identified as a component of the long-term UC Davis roadway plans and the road was partially extended by 800 feet in 2009 with the conference center and hotel construction projects. The proposed extension would construct approximately 1,100 feet of new roadway and would connect to the south side of Parking Lot 5 allowing through access on the connected roadway. Once connected, the road extension would provide an alternate route to the existing Old Davis Road alignment. UC Davis eventually would convert the existing Old Davis Road along the south side of the UC Davis Arboretum to a bike and pedestrian path with emergency vehicle and service vehicle access.</p>	NOD	
2011102032	<p>Via Verdi Repair Project - San Pablo Creek Culvert Replacement Richmond, City of Richmond--Contra Costa</p> <p>The project is limited to replacement of a partially collapsed CMP culvert supporting two road crossings with a new concrete box culvert with interior dimensions of 20 feet (width) by 14 (height). Prior to collapse, the CMP culvert was 430 linear feet in length. The new culvert will be approximately 400 linear feet, with 30 feet of creek day lighting. The new culvert will follow approximately the same alignment as the existing culvert. Replacement of the existing culvert will be done with open cut methods to minimize shoring. The project is at the intersection of El Portal Drive and Via Verdi Road in the City of Richmond, at San Pablo Creek, in the County of Contra Costa, State of California. The California Department of Fish and Game is executing Lake and Streambed Alteration Agreement Number 1600-2011-0327-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, the City of Richmond.</p>	NOD

2011011002	<p>Water Storage Reservoir Replacement Project Lake Arrowhead Community Services District --San Bernardino</p> <p>The California Department of Public Health (CDPH), as the Responsible, will be issuing a water supply permit to Lake Arrowhead Community Services District (District) for the retrofitting of many water reservoirs in the District's water system. The Brentwood Reservoir, Mittry Reservoir, Shasta Reservoir and Banff Reservoir do not meet modern earthquake standards. The District determined that the most economical way to ensure the reservoirs at the aforementioned sites have the structural integrity to withstand most strong earthquakes over the long term would be to replace the reservoirs with new reservoirs that meet all applicable standards. In addition to providing replacement reservoirs with enhanced structural integrity, expanding the storage capacity of the replacement reservoirs is needed. The proposed project consists of replacing the existing reservoirs with new reservoirs that can withstand greater ground shaking forces from potential earthquakes and also increasing water storage capacity at each of the four existing reservoir sites. The project will also include the demolishing of the existing water reservoirs at four sites (five reservoirs total), removing the demolished reservoir materials, re-grading each of the four sites and installation of one replacement reservoir, and related facilities, at each of the four sites in the Lake Arrowhead community.</p>	NOD	
2011082053	<p>Renner General Plan Amendment and Zone Reclassification Humboldt County --Humboldt</p> <p>A General Plan Amendment to change the General Plan designation from Commercial General to Industrial General. The change would facilitate the use of the property for a fence contracting business, including truck and equipment storage, office space, a work area and additional storage. The property would be used mainly as a contractor's storage yard and office, with a small amount of retail sales and metal fabrication. In addition to the change to the General Plan designation, the zoning classification would change from Highway Service Commercial with a Qualified combining zone to Limited Industrial (ML). The property is served with on-site water and on-site wastewater treatment systems.</p>	NOD	
2012012052	<p>Arsenic Treatment Project Rio Vista, City of Rio Vista--Solano</p> <p>The City of Rio Vista Arsenic Treatment project involves the following installations at the Well 10 and the Trilogy Site: the installation of a new chemical storage/electrical and controls structure that will house two double-walled chemical storage tanks - one each for ferric chloride (1,000 gallons), sodium hypochlorite (6,650 gallons), and a potassium permanganate saturator (55 gallons); the installation of a new 42,000 gallon backwash reclaim tank for the Well 10 site, and a 63,000 gallon backwash reclaim tank for the Trilogy site; and all associated water, sewer and storm drain pipeline installations and/or relocations.</p>	NOD

2012048183	Pajaro Watershed Agricultural Irrigation and Nutrient Management Project (hereinafter referred to a "Project") Santa Cruz County Resource Conservation District --Santa Clara, Santa Cruz, Monterey, San Benito The Project is located in the Pajaro Watershed which spans 150 square miles through Santa Cruz, Monterey, San Benito and Santa Clara counties. The Pajaro Watershed is listed on the section 303(d) of the 1972 Federal Clean Water Act as having impaired water bodies due to high levels of nitrate, sediment, pathogens, mercury and fecal coliform. The goal of this Project is to enhance water quality by improving efficiency of crop irrigation systems and nutrient applications. The RCDSCC will collaborate with growers and partners in the Pajaro Watershed to implement a maximum of thirteen (13) Best Management Practices.	NOE	
2012048184	Prosser Creek and Little Truckee River Wild Trout Spawning Gravel Enhancement Project Regional Water Quality Control Board, Region 6 (Lahontan), South Lake Tahoe Truckee--Nevada The purpose of the project is to continue the ongoing restoration of wild trout spawning habitat in Prosser Creek below Prosser Creek Dam and in the Little Truckee River below Stampede Dam. Construction of the dams led to the interruption of alluvial transport in both watercourses; natural replenishment of these materials no longer occurs. The sections of the watercourses immediately below the dams are now largely devoid of appropriately-sized gravel for fish spawning. The artificial introduction of spawning gravels is intended to enhance spawning habitat and eliminate further erosion and degradation to the Prosser Creek and Little Truckee River streambeds.	NOE

2011042089	New Ukiah Courthouse Administrative Office of the Courts Ukiah--Mendocino Note: FINAL 1 HC 1. Library Site (near the existing county public library, bounded by E. Perkins Street, N. Main Street, Mason Street, and including properties fronting Smith Street): This site is comprised of 14 parcels within the immediate downtown area of Ukiah. The site is approximately six acres in size and is bounded by E. Perkins Street on the south, N. Main Street on the west, and Mason Street on the east. The Mendocino County Assessor Parcel No. include: 002-191-20, -21, -22, -23, 002-192-1, -2, -3, -11, -14, -17, -18, -22, -24, -25. The city of Ukiah owns six of the 14 parcels; the remaining parcels are privately-owned. Gibson Creek flows through the northeastern portion of the site; however, the Creek is contained by a culvert and is situated primarily underground. The site is currently improved with a number of structures. 2. Railroad Depot Site (bounded by E. Perkins Street, Leslie Street, Clay Street, and railroad tracks, located adjacent to 309 E. Perkins Street): This site was utilized as the former Ukiah rail yard. The approximately 10-acre site is located south of E. Perkins Street and west of Leslie Street. The Mendocino County APNs for the site include 002-232-12, -13, and 002-282-18 and -19. The site is owned by the North Coast Railroad Authority, which is located in Ukiah. Inactive railroad tracks from the western boundary of the site. Gibson Creek flows through the northeastern portion of the site. The site is no longer an active rail yard, and is primarily vacant, with the exception of a historic train depot (which would not be removed), and two small warehouses. The proposed project includes the construction of a three-story (maximum), approximately 114,000 s.f. courthouse with a basement, and nine courtrooms.	FIN	
2012022015	Route 20/29 Intersection Safety Project Caltrans #3 --Lake Caltrans proposes to construct a roundabout or signalize the intersection of SR 20 and 39. The purpose of this project is to reduce the frequency and severity of collisions at the intersection. The project is needed because the collision rate at the intersection is 3.7 times greater than the statewide average. The proposed improvements consist of two project alternatives. Alternative 1 is a roundabout with a raised central island and three approaches. Alternative 2 is a signalized intersection that will add a passing lane and crosswalk improvements.	FIN	
2012041035	595 Munras Monterey, City of Monterey--Monterey The project site is 17,950 s.f. in area and is located at the intersection of Munras Avenue and Webster Street. A 25' x 95' public utility easement exists along the property's northeastern edge. The easement area contains a walkway to the historic Robert Louis Stevenson house, various public utilities and vegetation.	MND	05/11/2012

2012041032	<p>Security and Maintenance of the Dietz Garage Site Ontario, City of Ontario--San Bernardino</p> <p>The objectives of the proposed project are to (1) secure the Dietz Garage site and (2) maintain the site in a manner that prevents the structure from becoming an attractive nuisance. The Successor Agency to the Redevelopment Agency (Successor Agency) has acquired the subject property. The Successor Agency does not currently have reuse plans for the site. As such, after acquiring the site, the Successor Agency intends to simply secure and maintain the site indefinitely. Securing and maintaining the site would involve securing the site/building to restrict trespassing, occasional site inspections by City personnel, and occasional physical maintenance activities as needed to prevent the site/structure from becoming dilapidated. The City does not have immediate or definite plans to demolish the Dietz Garage structure. Rather, demolition would only be pursued if it becomes unreasonable or infeasible to adequately secure and prevent the structure from becoming an economic hardship per the City of Ontario's Historic Preservation Ordinance.</p>	NOP	05/11/2012

	will remove existing ramada, level 22' x 22' area, replace with approximately 19' x 19' wooden with metal roof interpretive shade structure with 5' posts set in concrete, and reinstall existing iron ranger to a depth of 2'. Bathroom work will remove three existing portable toilets and install approximately 14' x 12' x 15' precast vault double restroom set on a level concrete base.		
2012048187	NG2012-02 NextG MetroPCS Phase 8 South LA Network Public Utilities Commission Huntington Park--Los Angeles Installation of fiber optic cable in new and existing conduit to augment existing AboveNet network.	NOE	
2012048188	Snap Tite Pipe Liner Install Caltrans #10 --Calaveras The California Department of Transportation (Caltrans) District 10 is proposing install a Snap Tite pipe culvert liner on State Route 49 in the town of San Andreas in Calaveras County at post mile 17.17. Construction would occur on previously disturbed areas within Caltrans right of way. Prior to the installation of the liners, the existing culverts would be cleaned of all debris either by flushing or by manual removal. Any protrusions and/or holes would be repaired before the installation of the liners. Minor clearing and grubbing of vegetation and removal of accumulated sediment may be required.	NOE	
2012048189	Grizzly Road Culvert Work Caltrans #10 --Tuolumne The California Department of Transportation (Caltrans) proposes to place concrete at the invert of an 84-inch diameter steel-reinforced concrete culvert located at the bottom of Old Priest Grade, west of the community of Groveland in Tuolumne County. Construction would occur on previously-disturbed areas within Caltrans right of way.	NOE	
2012048190	lone-Washington Street Ditch Caltrans #10 lone--Amador Replace an open ditch with an enclosed drainage system on State Route 124 in Amador County in the City of lone at the Washington Street Intersection. Construction would occur on previously disturbed areas with part of the work occurring approximately ten (10) feet outside of State right of way.	NOE	
2012048191	Agreement 2011-0217-R4 - Pipeline Replacement Fish & Game #4 Taft--Kern The Project consists of excavation of approximately 18.5 cubic yards of soil to expose and repair a damaged section of existing 6-inch underground petroleum transmission pipeline. The disturbance area will be approximately 5 feet wide and extend over a span of approximately 20 feet. The pipeline will be repaired using a sleeve or a new section of pipe if the damage is greater than anticipated. Excess material will be removed from the channel and the channel surface will be restored to pre-Project conditions. The pipeline repair will be conducted while the stream is dry after the irrigation season. Any perched water will be pumped out.	NOE

	facility sited on 1,208 acres of BLM-managed lands north of the community of Desert Center in Riverside County, CA. An associated 220-kilovolt generation-intertie transmission line would be sited within a 204-acre right-of-way on BLM-managed land and 52 acres of non-BLM managed land, which would extend from the solar facility site to the planned Red Bluff Substation.		
2007102037	Sears Point Wetland and Watershed Restoration Project Fish & Game #3 Novato--Solano FYI: Final	FIN	
	The Project would restore tidal wetlands and rehabilitation diked wetlands and upland habitats for a wide range of species and develop public access and educational opportunities, including extending the San Francisco Bay Trail. Alternatives considered for the restoration of Sears Point include the Proposed Project, and the No Action and Full Tidal Alternatives. The Project includes options for varying degrees of dredging and breach sizes, as well as Bay Trail alignments.		
2011102034	PG&E Pittsburg-Tesla 230 kV Transmission Line Reconductoring Project - Revised IS/MND State Water Resources Control Board Pittsburg, Tracy--Alameda, Contra Costa In order to maintain service reliability and meet increasing electric load demands in the City of Pittsburg and surrounding areas in Contra Costa and Alameda counties, PG&E proposes to replace approximately 31 miles of 230 kilovolt transmission line between Pittsburg and Tesla Substations. This project will minimize the potential for future power demand overloads, and ensure service reliability to the East San Francisco Bay area. As part of this project, PG&E proposes to modify approximately 43 of 147 existing steel lattice towers. Of the 43 towers to be modified, four towers will receive dead end conversions, and 39 towers will receive approximately 16.5-foot cage extensions. All modifications are above ground and no foundation improvements will be required. The work performed at the towers will be conducted by helicopter. Ground access will take place at 12 areas along the existing rights of way. The project is scheduled for 19 months between September 2012 and May 2014.	MND	05/14/2012
2012032052	Bordigioni Family Winery, LLC (UPE09-0071) Sonoma County Santa Rosa--Sonoma Note: Recirculated.	MND	05/14/2012
	The proposed Bordigioni Family Winery involves the development of a phased new winemaking facility on a 33 acre parcel (APN 030-110-059) located at 6687 Hwy 12 in Santa Rosa, Sonoma County, CA. The facility will be an owner-operated winery dedicated primarily to the production of ultra-premium wines of the Bordeaux varietals. The winery will be located on the historic property along Hwy 12 (33.58 acres), which currently has vibrant flower farm, existing vineyards and limited wedding/corporate events, 10 per year with maximum of 225 people (under separate approved Use Permit UPE97-0017). These permitted events will continue during Phase I of the winery project.

2012041036	Plant 143 Improvement Project East Valley Water District San Bernardino--San Bernardino The proposed project is located within the City of Highland. The project site is generally located south of Merris Street and east of Church Street on Abbey Way. Plant 143 is located in the Upper Pressure Zone and is located next to wells 143, 146, 146A, and 147. All of the well sites mentioned above are located in East Valley Water District's (EVWD) Upper Pressure Zone and have a history of contributing dissolved air into the distribution system. The purpose of the project is to mitigate excessive dissolved air from EVWD's Upper Pressure Zone by aerating the water in tank at Plant 143 and in particular, Well 143. The objectives of the project include 1) continued use of all wells at maximum capacity; 2) decrease excessive dissolved air from wells 143, 146, 146A, and 147; and 3) additional water storage capacity to meet Master Plan design requirements.	MND	05/14/2012
2012041039	Upland Hills Country Club Wedgewood Event Structure (CUP No. CUP-11-05) Upland, City of Upland, Rancho Cucamonga--San Bernardino The Wedgewood Event Structure (proposed project) consists of a permanent fabric and glass structure within which events (e.g., weddings) would be hosted in association with the existing Wedgewood facilities at the Upland Hills Country Club clubhouse. The proposed project would be approximately 81 feet in length by 50 feet in width for a total of approximately 4,050 s.f. in size. The proposed project would be limited to a maximum of 269 persons within the event structure. The proposed project would not host events before 2:00 PM on any given day and would cease at 10:00 PM during weekdays (Sunday through Thursday) and would cease at 11:00 PM on Friday and Saturdays.	MND	05/14/2012
2012041040	Biodiesel Feedstock Production Facility Eastern Municipal Water District Perris--Riverside Eastern Municipal Water District intends to construct and operate a Biodiesel Feedstock Production Facility within its Perris Valley Regional Water Reclamation Facility (PVRWRF). The BFPF would process restaurant waste collected from within EMWD's service area. The facility would recover brown grease and produce a brown grease waste product that would be suitable to serve as a feedstock for biodiesel production. The brown grease waste product would be transported to an existing regional biodiesel production plant to be refined and then brought back to EMWD facilities where it would be used to supply EMWD diesel-powered vehicles and stationary engines. Upon completion, the BFPF will keep approximately 5,000,000 to 10,000,000 gallons per year of waste out of landfills and produce diesel fuel that would be utilized in EMWD diesel-powered vehicles and stationary engines. <u>Documents Received on Friday, April 13, 2012</u>			
	<p>approximately 20-foot section of the existing levee would be breached, and earth fill removed. The gap would be spanned with either a bridge constructed out of a concrete box culvert, or fabricated out of steel piles, beams and wood decking. The remaining levee edges under the bridge and resulting open channel surface would be armored with rock to protect against tidal scour and erosion. The opening of tidal exchange under the bridge would improve water quality in Whistlestop Lagoon by increasing nutrient and energy exchange with the rest of the estuary. This opening in the levee would also improve passage for fish and wildlife between Whistlestop Lagoon and the adjacent estuarine habitat (Parsons Complex). Rock placed under the bridge would provide additional hard substrate habitat to support native oysters, and would minimize the potential for tidal scour and erosion. Placement of a bridge at this location would improve safety of Elkhorn Slough National Estuarine Research Reserve (ESNERR) staff and the public when accessing Hummingbird Island on the west side of the levee.</p>		
2012042024	<p>PA-1100024 San Joaquin County Lodi--San Joaquin</p> <p>This project is a Use Permit for the expansion of an existing, 111,000 s.f. winery in two phases. 2012048205	Windmill Installation Parks and Recreation, Department of --Sonoma Install a gifted replica windmill monument near the Visitor Center parking lot at Fort Ross State Historic Park to appreciate the Fort's Russian heritage.	NOE	
2012048206	Rock Creek Powerhouse Efficiency Upgrade Project State Water Resources Control Board --Plumas The existing Rock Creek Powerhouse is part of Pacific Gas and Electric Company's (PG&E's) Rock Creek-Cresta Project, Federal Energy Regulatory Commission (FERC) Number 1962, for which FERC issued a new operating license on October 24, 2001. PG&E proposes to increase the efficiency of the Rock Creek Powerhouse by upgrading the existing hydropower turbine-generators and associated equipment. The Rock Creek Powerhouse Efficiency Upgrade Project (Project) activities are exclusively contained within the Rock Creek Powerhouse and are not expected to involve any encroachment into either the North Fork Feather River or the Rock Creek Reservoir.	NOE	
2012048207	Move CXT on Main Street Parks and Recreation, Department of --San Diego The purpose of this project is to move a CXT Vault restroom in Ocotillo Wells State Vehicular Recreation Area to another location within the park. The restroom is currently located at the intersection of Main Street and Roadrunner Trail. The restroom will be relocated at or near the intersection of Main Street and Benson Lake Loop. To remove the CXT Vault Restroom from its current location at Main Street and Roadrunner Trail, project activities will include the removal of concrete around the CXT Vault and excavation around the CXT Vault. The excavation for the CXT Vault will be approximately 3' x 5'. The hole created from removing the vault will be back filled with the excavation spoils from the CXT Vault's new location. The actual work area for the CXT Vault removal will be 75' x 40'.	NOE	
2012048208	Vehicle Wash Station Parks and Recreation, Department of Los Angeles, City of--Los Angeles The project will construct a vehicle and equipment wash facility at Hungry SVRA. The wash station will be installed in the same location as the existing wash pad. The storage tank for the used wash water will be located slightly to the north of the existing storage building in the Hungry Valley maintenance yard. The system will be designed to accommodate pre-wash of muddy vehicles and equipment on a concrete slab. A high pressure, hand held nozzle will be available to spot clean when necessary.	NOE	
2012048225	Stevinson Water District Central Valley Flood Protection Board Merced--Merced East Side Canal approximately 400 feet down-stream (north west) of the confluence of Bear Creek and East Side Canal (both being Flood Control Project Works)(Lower San Joaquin Levee District, Unit No. 22, Levee Mile 3.77).	NOE
