STATE CLEARINGHOUSE

---

**SUMMARY  
OF  
POSTINGS**

**April 1 – 15, 2014**

# STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **April 1 – 15, 2014**.

## CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613  
Fax: (916) 323-3018  
e-mail: [state.clearinghouse@opr.ca.gov](mailto:state.clearinghouse@opr.ca.gov)  
website: [www.opr.ca.gov](http://www.opr.ca.gov)

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

**Scott Morgan**  
Director

## CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

### USPS:

State Clearinghouse  
P.O. Box 3044  
Sacramento, CA 95812-3044

OR

### USPS/Courier Service / Hand Deliveries:

State Clearinghouse  
1400 Tenth Street, Room 113  
Sacramento, CA 95814

## INFORMATION AVAILABLE ON-LINE

The CEQA Statute and Guidelines are available through the Natural Resources Agency's website at:

<http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

## Environmental Document Filings with the State Clearinghouse 1999-2013

All CEQA documents filed with the State Clearinghouse are available for viewing on the internet at <http://www.ceqanet.ca.gov>

<b><u>Documents Received on Tuesday, April 01, 2014</u></b>			
2014042001	Airport Sewer Infrastructure Project - Yosemite Blvd & Kerr Ave. Stanislaus County Modesto--Stanislaus Note Reference SCH# 2011122080	<b>EA</b>	04/30/2014
	<p>The proposal is a sewer infrastructure project within the unincorporated area of Stanislaus County's Airport Neighborhood. The Neighborhood is a disadvantaged community on the southeast side of the City of Modesto with approximately 416 parcels (predominantly residential) that rely on septic tanks for treatment of sewage. The project is proposed in response to health and safety concerns associated with failing septic systems. The project will include the installation of a sewer system with approximately 23,000 linear feet of sewer main and street overlays. This will allow for individual sewer connections and removal of existing septic systems and may provide an opportunity to connect to area commercial and industrial properties in the future. The new sewer infrastructure will connect into the City of Modesto's existing public sewer system. The project was circulated for CEQA purposes in July of 2012 (SCH# 2011122080). A Neg Dec was adopted on October 2, 2012.</p>		
2007121023	Scholl Canyon Landfill Expansion Glendale, City of Glendale--Los Angeles Note: Extended Review	<b>EIR</b>	05/30/2014
	<p>The Sanitation Districts has identified two variations for the proposed project, which include a vertical expansion only (Variation 1) and a vertical and horizontal expansion (Variation 2). Variation 1 will provide approximately 11.5 million cubic yards (or five million tons) of additional capacity and will extend the life of the landfill by 13 years (assuming a continued baseline disposal rate of 1,400 tons per day [TPD]). Variation 2 will provide approximately 16.5 million cubic yards of additional capacity and will extend the life of the landfill by 19 years (assuming a continued baseline disposal rate of 1,400 TPD). The proposed project will increase fill capacity for the continued operation of the project site and increase the life of the landfill to ensure long-term disposal for the watershed. Neither variation would change current operations at the Scholl Canyon Landfill.</p>		
2009092086	Wildwood Road Realignment and Widening Project Trinity County --Trinity	<b>EIR</b>	05/15/2014
	<p>The project purpose is to widen the roadway to two standard travel lanes with shoulders, improve the alignment to reduce the severity of curves and improve sight distance, and to rehabilitate the roadway structural section and drainage. The road would part from its existing alignment in one or more areas, requiring large amounts of fill in some ravines and stream crossings. Culverts at all stream crossings will be replaced with new pipes equipped to handle the anticipated 100-year storm events, and to facilitate fish passage where appropriate. Excavation of the slope above the road will also be required in several locations. Retaining walls, rock slope protection, and guardrails may be used to enhance stability and safety. The road will be reconstructed with new structural section, aggregate base and asphalt concrete pavement with edge and centerline striping</p>

2013012020	Larkspur SMART Station Area Plan Larkspur, City of Larkspur--Marin Note: Review per lead	<b>EIR</b>	06/02/2014
	<p>The City of Larkspur is preparing the Larkspur SMART Station Area Plan. The SMART (Sonoma-Marina Area Rail Transit) is a passenger train and multi-use pathway project planned to extend 70 miles from Cloverdale in Sonoma County to Larkspur in Marin County. The Larkspur SMART Station Area Plan will identify potential land use and regulatory changes that are intended to support transit oriented development in the area surrounding the planned SMART station. More information on the SMART Station Area Plan can be found on the City of Larkspur website at: <a href="http://www.larkspurcityhall.org/index.aspx?nid=157">http://www.larkspurcityhall.org/index.aspx?nid=157</a>.</p>		
2013051029	Materials Recovery Facility and Transfer Station (MRF/TS) Irwindale, City of Irwindale, Baldwin Park--Los Angeles Athens Services (Applicant/Operator) has submitted an application to the City of Irwindale (City) to construct and operate a Materials Recovery Facility and Transfer Station (MRF/TS), with a Fueling Facility/Convenience Store (see NOP attached, figure 1 - 4). A MRF/TS is a facility where residential, commercial, and/or industrial municipal solid waste and recyclable materials are delivered by commercial and non-commercial haulers, and sorted and processed in one central location prior to delivery at end use distributors.	<b>EIR</b>	05/16/2014
2013121093	Olson San Gabriel Residential Community Project San Gabriel, City of San Gabriel--Los Angeles The proposed project consists of 88 new condominium residential units of 5.4 acres and demolition of a portion of a 170,000 sf warehouse building that overlaps the cities of San Gabriel and Rosemead. The entire property occupies 9.18 acres and spans both sides of the Rubio Wash, a Los Angeles County flood control channel, and is also just south of the UPRR line. The EIR will examine the impacts of the new proposed housing and demolition of the warehousing within San Gabriel. The existing warehousing use in Rosemead will continue and is being processed as Categorical Exemption (Class I - Existing Facilities) but the EIR will examine the cumulative effects of both discretionary actions. The portion of the building located west of the Rubio Wash in the City of San Gabriel will be demolished and the remaining 77,000 sf building located in Rosemead will be converted to a freestanding warehouse building.	<b>EIR</b>	05/16/2014
2014021045	Hollister Solar Project San Benito County Hollister--San Benito Note: Re-Distribution Conditional Use Permit to enable construction of a 1.5 MW solar power generation facility. Minor subdivision to divide the 39.61 acre site into three parcels. Two approximately five-acre parcels would be created, one of which is occupied by an existing home. It is assumed that one new single-family home could be developed in the future on the second of these two parcels. The third approximately 29-acre parcel would contain the solar power facility, which would have a development	<b>MND</b>	05/15/2014

	footprint of about 17 acres. A semi-permeable gravel road would provide access from Buena Vista Road to the solar facility. The solar facility would interconnect to an existing 21-kV PG&E line located along the northern boundary of the site.		
2014041002	CSUB Hotel and Conference Center Project California State University Trustees Bakersfield--Kern The proposed project would involve development, by the University's public/private partner, or a complex consisting of a hotel and conference center on a currently vacant piece of property (the Project site) on the southern portion of the CA State University, Bakersfield (CSUB) campus. The hotel would be four or five stories, 85,000 to 87,000 sf, would have occupy between four to six acres of the Project site, which is located north of Camino Media between Roadrunner Drive and Scarlet Oak Boulevard. The 2007 CSUB Master Plan identifies the site as one of a number of such public/private development sites fronting Camino Media.	<b>MND</b>	04/30/2014
2014041003	E.P. Foster House Site Outbuildings Demolition Project Ventura Unified School District Ventura--Ventura Currently, the project area contains the Avenue School (not in use), remnants of the E.P. Foster residence, and two portable classrooms used by Head Start Program. The proposed project involves the demolition of two vacant outbuildings. The two outbuildings consist of a one-story building thought to have either been an employee residence or a guest house and an adjacent two-story building thought to have served as a carriage house/garage with guest quarters above. The District now proposes two demolish the two outbuildings, as they are in serious disrepair, are unsafe, and have become an attractive nuisance. The outbuildings are located in the northwest corner of the project area.	<b>MND</b>	04/30/2014
2014041004	GPA Case No. 1, Map No. 102-10; Amendments of Zoning Map No. 102-10, Zone Change Case No. 38; Zone Change 39; Mahavir gill by Maximus III Company (PP14123) Kern County Bakersfield--Kern The applicant is requesting the following actions in order to establish land use designation and zone classification that is compatible with future multifamily development. The project site consists of two noncontiguous parcels (1.99 acres and 0.81 acres) totaling 2.8 acres in size. As proposed as many as 48 multifamily units (34 units and 14 units) would be constructed on the project site. Access would be via Norris Road, which is designated as a "collector" alignment by the Circulation Element of the Metropolitan Bakersfield General Plan. Water supply and sewage disposal for future residential development would be by the CA Water Service Company and the North of the River Sanitation District, respectively.	<b>MND</b>	04/30/2014
2014041006	Ironwood State Prison Heating, Ventilation, and Air Conditioning System Project Corrections and Rehabilitation, Department of Blythe--Riverside CDCR is proposing upgrades of the existing heating, ventilation, and air conditioning system at Ironwood State Prison, which is aging and currently requires continuous maintenance. The existing evaporative cooling unit would be replaced with a site-wide chilled water system for air conditioning. New facilities would include a central chilled water plant and thermal energy storage tank, as well as a separate electrical substation and associated power line that would be	<b>MND</b>	04/30/2014

<b><u>Documents Received on Tuesday, April 01, 2014</u></b>			
	constructed by Southern CA Edison. The project does not include any new beds and would not increase inmate capacity. Up to three additional employees would be hired for operation and maintenance of the facilities.		
2014041007	ENV-2013-3287-MND / 1759 N. New Hampshire Avenue Los Angeles, City of --Los Angeles Construction of six residential units, each ranging in size from 1,715 to 1,989 sf for a total of 10,638 sf of new residential construction on an approximately 9,279 sf lot. Each residential unit will provide a two care garage within a private garage at grade level for a total of 12 parking spaces. Each unit will be built at a height of 32' 11 3/4". The site is currently vacant with no existing trees.	<b>MND</b>	04/30/2014
2014042003	College Park High School Athletic Facilities Improvements Project Mount Diablo Unified School District Pleasant Hill--Contra Costa The District is proposing to introduce new permanent lighting fixtures to illuminate the sports field as well as the right and center field of the baseball diamond on a limited basis, install a new Public Address (PA) system, construct new bleachers to meet the demand for seating capacity at the sports field, construct new accessory athletic facilities, and complete improvements to the existing sports field entry driveway and plaza.	<b>MND</b>	04/30/2014
2014042004	Upper Truckee Marsh Sewer Facilities Protection Project South Tahoe Public Utility District South Lake Tahoe--El Dorado The District is proposing to implement an adaptive management plan (AMP) to protect its existing force and gravity sewer mains along with its Bellevue Pump Station facility in South Lake Tahoe. During the record-snowmelt year of 2011, a portion of the Trout Creek channel near the Bellevue Pump Station completely filled with sand and small gravel, causing the stream to overflow northward approximately 70 feet onto the District's easement. The intent of the AMP is to protect the sewer infrastructure from flooding and reduce the risk of a sewer spill. The AMP consists of measures designed both to prevent permanent establishment of Trout Creek over the sewer lines and adjacent to the pump station facility and to encourage flows to establish new paths to the south, away from the District's facilities.	<b>MND</b>	04/30/2014
2014042006	Spring Valley Subdivision Rocklin, City of Rocklin--Placer The project is generally described as a request for approval of a General Plan Amendment, a General Development Plan Amendment, a Rezone, Tentative Subdivision Map and Design Review entitlements to allow the development of a 370 lot single family residential subdivision with lots less than 6,000 sf in area on an approximately 56.6 acre site. The 370 lots would be comprised of 210 lots sized at 40' x 70', and 160 lots sized at 45' x 75'. The project also includes 2 open space lots, 3 landscape lots, and requests for deviations from the City's approved development standards and reduced public utility easements.	<b>MND</b>	04/30/2014

<b><u>Documents Received on Tuesday, April 01, 2014</u></b>			
2014042008	<p>Rock Creek Siphon Project Nevada Irrigation District Auburn--Placer</p> <p>The proposed Rock Creek Siphon Project would allow NID to convey water from the Combie Ophir II Canal to Rock Creek Reservoir, as well as turnout to the NID North Auburn WTP. The Project involves the installation of a gravity pipeline to interconnect the existing Combie Ophir II Canal to Rock Creek Reservoir. The connection will increase the reliability of the raw and treated water systems in the North Auburn area providing an increased level of service and fire protection. Specifically, the proposed siphon connection will provide redundancy and delivery for treated and raw water customers in North Auburn. Additionally, the Project would include the installation of a 24 inch pipeline between Locksley Lane and Shale Ridge Road, connecting the WTP to an existing water storage tank.</p>	<b>MND</b>	04/30/2014
2014042009	<p>Valhalla Residential Condominium Project Sausalito, City of Sausalito--Marin Note: Review Per Lead</p> <p>The Valhalla Residential Condominium project (Project) includes redevelopment of the former Valhalla site and building on the parcel at 206 Second Street and 201 Bridgeway in Sausalito. The Project would maintain an existing single-family home located at 206 Second Street and renovate and expand the Valhalla structure to accommodate seven new residential condominium units. The Project would subdivide the Project site to create a separate lot for the single-family residence. Project plans indicate that the subdivision map for the Project will be followed by a condominium plan identifying air space condominium ownership areas for the seven residential units, exclusive use common areas, and common areas. The proposed Project includes on-site parking and landscaping components.</p> <p>In total, the proposed Project adds 610 sf of new floor area to the existing 9,290 sf of building space on the Valhalla property, for a total of 9,900 sf of floor area, and removes 567 sf in floor area from the existing 2,018 single-family house. Overall, the proposed Project would result in 43 sf of net new sf.</p>	<b>MND</b>	05/14/2014
2006071134	<p>East Area 1 Specific Plan Amendment Santa Paula, City of Santa Paula--Ventura</p> <p>An amendment to the approved East Area 1 Specific Plan is proposed to reflect refinements to the land use plan. The Development Agreement, approved along with the Specific Plan would also be amended to reflect the changes to the Specific Plan. In addition, approval of a tentative map is being requested at this time.</p> <p>The revised land plan for the Amended Specific Plan is presented in Revised Land Use Plan. The number of residential units allowed by the Specific Plan would remain at 1,500. The intensity of commercial, business park, and institutional uses would be reduced. The structure of the neighborhoods and districts defined in the Specific Plan would be modified.</p>	<b>NOP</b>	05/01/2014

2014041001	<p>Watson Corporate Center Chino, City of Chino--San Bernardino</p> <p>The Project proposes a General Plan Amendment, Specific Plan Amendment, Master Site Plan, and potential Development Agreement to develop a 189.1-acre site with multiple buildings suitable for industrial, distribution warehousing, manufacturing, assembly, e-commerce, etc. with a total building area of 3,706,740 s.f. Ultimate development of the Project also would require future approval of applications for a Vesting Tentative Map, Site Approval, and CUP; these future discretionary applications also will be evaluated as part of the require EIR.</p>	<b>NOP</b>	04/30/2014
2014041005	<p>EIR 04-14; Grapevine Specific and Community Plan by Tejon Grapevine, LLC Kern County --Kern</p> <p>The proposed project is both a Specific and Community Plan that encompasses ~8,010 acres of the 15,644 acre Grapevine Planning Area in southwestern Kern County, CA. The project includes up to 12,000 residences and 10,748,400 sf of commercial development; and the project would provide parks, public and private recreational amenities, schools, public services, helipad(s), a transit center/park and ride, and water and waste water treatment facilities. Portions of the site would be left as open space, particularly along the southern edge of the CA Aqueduct and the foothills of the Tehachapi Mountains; in areas that have previously been identified as wildlife corridors. Access to the site would be taken from I-5 at the Laval Road and the Grapevine interchanges. A new interchange is proposed to replace the existing Grapevine interchange.</p>	<b>NOP</b>	04/30/2014
2014042002	<p>Esposti Park Apartments Windsor, City of Windsor--Sonoma</p> <p>Request for a General Plan Amendment, Zone Change, Use Permit, and Design Review for a 36-unit multi-family market rate apartment project on Old Redwood Hwy. A General Plan Amendment and Zone change are requested to change the existing land use designation from Village Residential (VR 5-8 units/acre) to Compact Residential (CR-24 units/acre). The property is located within the Shiloh Road Village Vision Plan area.</p>	<b>Neg</b>	04/30/2014
2014042005	<p>Highway 1 Cheney Gulch Slope Stabilization Caltrans #4 --Sonoma</p> <p>Repairing the embankment along the southbound Highway 1 at Postmile 7.2. Major elements of the project include: excavating the loose material on the hillside below the highway; protecting the soil surface from erosion by placing rock slope protection fabric; installing rock slope protection; filling voids with native topsoil; applying biodegradable erosion control; and reseeding to restore the original naturalized slope. The proposed project is both within and outside of the existing highway right-of-way. A temporary construction easement, and permanent easement of acquisition, would be required. The construction would take approximately 45 to 60 days. No traffic lanes would be closed during this work.</p>	<b>Neg</b>	04/30/2014

<b><u>Documents Received on Tuesday, April 01, 2014</u></b>			
2014042007	North Richmond Urban Agriculture General Plan Amendment and Zoning Text Amendment Contra Costa County Richmond--Contra Costa The project entails a General Plan Amendment to add new policies in the Contra Costa County General Plan (2005-2020) Land Use Element for the North Richmond area to support and promote urban agriculture and a zoning text amendment that would update the North Richmond P-1 (Planned Unit) Zoning District to include a permit a wider range of urban agriculture uses and activities in North Richmond. The proposed project was initiated by the Board of Supervisors on April 24, 2012. County Files: GP#12-0002 and ZT#14-0001.	<b>Neg</b>	04/30/2014
2013071052	T&R Mini Storage Major Use Permit, Boundary Adjustment with Certificate of Compliance and Draft Habitat Loss Permit San Diego County Escondido--San Diego The project is a Major Use Permit, Boundary Adjustment with Certificate of Compliance and draft Habitat Loss Permit for a lot line adjustment and to construct a storage facility pursuant to Zoning Ordinance Section 2185 and 6909. The project consists of the 119,929 sf of total building area comprised of storage facilities, office and a single living quarters.	<b>Oth</b>	
1990030006	Willits Bypass Caltrans, Planning Willits--Mendocino The project involves construction of an approximate 5.8 mile-long four-lane freeway bypass around the City of Willits between PMs R43.1 and R49.0 on U.S. Highway 101, and built in two phases. The Project will include 12-foot-wide lanes with a 45.3-foot median separating the northbound and southbound lanes. At the crossing over Center Valley Road, the roadway embankment will be replaced by a floodway viaduct spanning approximately 6,000 feet long until it crosses Mill Creek. The project includes excavation and placement of fill; construction of permanent bridge and viaduct piers and stream crossings; construction of temporary access roads, haul roads and stream crossings; removal of culverts and reconstructing stream reaches for fish passage; installation of wick drains; erosion control and revegetation of disturbed areas; and an optional borrow site at Oil Well Hill on the east side of U.S. 101 approximately 0.85 mile north of the intersection of Reynolds Highway and U.S. 101. The project also includes compensatory restoration, enhancement, preservation, enhancement, preservation and management activities on a minimum of 1795 acres of off-site mitigation lands, and design and implementation of a fish passage project on Ryan Creek.	<b>NOD</b>	
2003021100	Long-term Irrigated Lands Regulatory Program Regional Water Quality Control Board, Region 5 (Central Valley), Fresno Bakersfield, Fresno, Redding, Sacramento-- Project is the adoption of water discharge requirements general order to regulate discharges of waste from Sacramento Valley rice and to surface water and groundwater to assure water quality standards are met. Rice lands are non-point source discharges that are not covered under National Pollutant Discharge Elimination System (NPDES) permits, Municipal Separate Storm Sewer System permits, or other NPDES permits.	<b>NOD</b>

2004011055	Regional Landfill Options for Orange County (RELOOC) Strategic Plan - Olinda Alpha Landfill Implementation EIR Orange County --Orange Vertical and horizontal expansion of the Olinda Alpha Landfill. The Addendum to Final EIR 588 allows for minor changes to Sections 4.5 Project Description, 5.5 Transportation and Circulation, 5.6 Air Quality and 5.7 Noise.	<b>NOD</b>	
2007042022	San Ramon City Center Project San Ramon, City of San Ramon--Contra Costa On October 8, 2013, the City and Sunset Development Company entered into a Memorandum of Understanding for the construction of a new City Hall in Central Park in exchange for the development rights to the former City Hall site within the City Center Project Sunset Development rights to the former City Hall site within the City Center Project. Sunset Development Company, pursuant to Section 2(a)(1) of the MOU, has applied for modification to the approved City Center Project and conditions of approval to replace the previously approved City Hall and Library with office uses. Additionally, the City Center Project's office/flex retail space will be reduced by 50,142 square feet to ensure that the combined square footage of City Center and the future City Hall in Central Park does not exceed the total square footage for the City Center Project approved in 2007. No physical changes are proposed to the approved City Center site plans or architecture at this time.	<b>NOD</b>	
2007072023	Modesto Master EIR Update and General Plan Amendment Modesto, City of Modesto--Stanislaus Addition of two new pad buildings (both include drive-throughs) in the Briggsmore Shopping Center.	<b>NOD</b>	
2007072126	Biofuels Oasis (1441 Ashby Avenue) Berkeley, City of Berkeley--Alameda Project would establish a Full Service Restaurant (FSR) within an existing vacant commercial tenant space, with no expansion or substantial exterior changes to the existing building. The subject tenant space is located in the southeast corner of the building and includes 3,405 square fet at the ground floor and a 1,877-square-foot basement, for a total of 5,282 square feet. The portion of the ground floor devoted to customer seating (including a bar) is approximately 1,900 square feet. The FSR includes incidental service of beer, wine and distilled spirits, and hours of operation until 11:30 p.m., Sunday through Thursday, and 12 midnight, Friday and Saturday.	<b>NOD</b>	
2008012032	Camels Hump Caretaker Residence (PMPC 20110109) Placer County Colfax--Placer The project proposes a Minor Use Permit to allow for the construction of a caretaker's residence on a portion of a 597.5-acre property.	<b>NOD</b>

2008121042	Mitaa Plaza Project Glendale, City of Glendale--Los Angeles The proposed Project includes the development of up to 225 multi-family units on the 2.25 acre project site. Of these units some would be located in a 5-story residential building located on the eastern side of the site and some would be attached to a 6-story parking garage located on the western side of the site adjacent to the Southern Pacific railroad. The two structures would be separated by the LA County easement. Project approvals included Stage II Design Review approval for a modified project consistent with Alternative 3; Reduced Density (25% Reduction) described in the Final Subsequent EIR for the proposed project; a Parking Exception allowing above-grade parking, and a Conditional Use Permit allowing an all-residential project in the Industrial/Commercial-Residential Mixed Use zone. Future approvals that may be required include a parking exception and the introduction of an Ordinance authorizing the sale of surplus City property.	<b>NOD</b>	
2009091040	Western Riverside County Regional Wastewater Treatment Plant Enhancement and Enlargement Project Western Riverside County Regional Wastewater Authority Corona--Riverside Due to planned growth in its service area, Western Riverside County Regional Wastewater Authority intends to expand the capacity of its Western Riverside County Regional Wastewater Treatment Plant from 8.0 mgd to 16.0 mgd in phases. The first phase would include and increase to 13.25 mgd.	<b>NOD</b>	
2009112006	Upper Butte Basin Wildlife Area Draft Land Management Plan (LMP) Fish & Game #2 Chico--Butte, Glenn The project is the adoption and implementation of the Upper Butte Basin Wildlife Area (UBBWA) Land Management Plan (LMP). The UBBWA consists of three units totaling more than 9,597 acres in both Butte and Glenn counties. UBBWA is a mosaic of seasonal wetland, permanent wetland, upland, riparian, and commercial rice habitats. These areas provide diverse and valuable wildlife habitat and public use programs, where appropriate. The LMP will guide the Department's management, planning, and operations of the UBBWA.	<b>NOD</b>	
2012041041	Whistlestop Levee Repair and Public Access Improvement Project Fish & Game #4 --Monterey CDFW is issuing an amendment to Streambed Alteration Agreement No. 1600-2012-0081-R4, to allow seasonal work to begin April 15th rather than June 15th.	<b>NOD</b>	
2013042015	Delta Flood Emergency Facilities Improvement Project Water Resources, Department of Stockton, Rio Vista--San Joaquin, Sacramento, Solano The proposed project includes two new material storage and transfer facility sites. One is located on West Weber Avenue in Stockton, and the second one is located at Brannan Island State Park on Brannan Island. The proposed project would also modify an existing material storage facility located in the City of Rio Vista. The sites would store quarry rock, sand, soil, and other flood fighting materials. Site improvements include fencing, docking and loading facilities, parking, temporary office trailers, utilities (water, power, communications, and wastewater) lighting and security facilities.	<b>NOD</b>

	Improving fish passage at this site will restore anadromous fish access to an additional five miles of historic spawning, rearing and holding stream habitat. The project is being funded by the USFWS through the Anadromous Fish Restoration Program (AFRP). The CDFW is providing equipment, supplies and agency personnel to implement the dam demolition portion of the project. The Central Valley Regional Water Control Board is the lead agency for the project under CEQA.		
2014042014	Leona Heights Sulfur Mine Remediation Oakland, City of Oakland--Alameda The purpose of the proposed project is to improve the water quality of Leona Creek downstream of the closed Leona Heights Sulfur Mine in the Oakland hills by remediating the waste mine tailings and stabilizing the Leona Creek channel. Currently, the water quality in Leona Creek, at the remediation site, is degraded due to acid mine drainage which is being caused by contact between the onsite runoff and piles of mining waste rock. The proposed project would consolidate and cap the mine tailings, and create drainage improvements, in order to minimize contact between storm water runoff and tailings, thereby reducing the acid mine drainage into Leona Creek.	<b>MND</b>	05/01/2014
2003101095	Isla Vista Master Plan Supplemental EIR Santa Barbara County --Santa Barbara The Isla Vista Master Plan is a planning document for the Isla Vista area. It sets forth community goals and policies to guide the future growth of Isla Vista. The IVMP will amend the County's Local Coastal Program by adding policies, land use and zoning designations, and development standards within the Plan Area. The objectives of the Plan are to: address public infrastructure problems; reduce automobile dependency; revitalize the Isla Vista downtown; and develop and up-grade the housing stock for all income levels. The SEIR will consider minor amendments to the Plan, including: revisions based on the dissolution of the Isla Vista Redevelopment Agency; policies addressing on-street parking; and potential cumulative effects of the project's greenhouse gas emissions (GHGs).	<b>NOP</b>	05/01/2014
2014042013	Tesoro Avon Marine Oil Terminal Lease Consideration California State Lands Commission Martinez--Contra Costa The proposed Project involves Tesoro Refining and Marketing Company (Tesoro) entering into a new 30-year lease of State sovereign land with the CSLC to continue operating the Avon Marine Oil Terminal, thereby maintaining the operation and viability of Tesoro's associated Golden Eagle Refinery. Tesoro will also be conducting upgrades on the Avon Terminal to meet Marine Oil Terminal Engineering Maintenance Standards (MOTEMS). Upgrades will include: the decommissioning (demolition and removal) of Berth 1; construction of a new berthing area, Berth1A; repairs, retrofits, and construction on the existing approach trestle; and demolition and removal of existing Berth 5.	<b>NOP</b>	05/01/2014

	Sacramento Area Council of Governments (SACOG) region.		
2014012044	Nelson Road Reestablishment Santa Cruz County Scotts Valley--Santa Cruz The proposed project is the removal of the temporary access road crossing, restoration of the crossing area, and reestablishment of the permanent road adjacent to the previous alignment, Ruins Creek and the toe of the 2011 landslide. The scope of the work for the entire project shall consist of the following: excavation and backfill (2,675 cubic yards), two mechanically stabilized earth backfill (MSE) retaining walls, drainage culvert improvements, asphalt concrete pavement, erosion control, restoration of the creek channel, and removal of approximately 220 feet of the existing temporary bypass road where it crosses Ruins Creek, with associated upland and riparian revegetation.	<b>NOD</b>	
2014022046	Miner Slough Levee Repair Water Resources, Department of --Solano DWR proposes to repair the Miner Slough levee from approximate river miles 1.8 to 5. The levee repair will be completed from a barge within Miner Slough with assistance from equipment, most likely an excavator, on the levee crown. DWR proposes to repair the levee by placing a rock slope protection and soil mix to reshape the area to the original levee slope. The work will be done in a manner that will not change the character, scope, or size of the original levee design and will not result in expanding the existing use of the levee. Seeding and replanting with native seed and trees will follow up the repair work. The project is located within the Liberty Island Quadrangle, Township 5 North, Range 3 East, MDB&M.	<b>NOD</b>	
2014022050	Eureka Waterfront Trail Phase C Eureka, City of Eureka--Humboldt As designated in the City of Eureka General Plan, the City of Eureka proposes to construct an approximately 1.17 mile multi-use trail between Tydd Street and Front Street. The trail will serve as both an important non-motorized transportation/commuter corridor and a recreational facility. The proposed project includes the construction of: a new Class I multi-use trail; boardwalk; three bridges; viewing areas and interpretive signs; drainage improvements; fencing; trailheads; lighting; and landscaped buffers. The trails alignment passes through public and private properties. Most of the trail is located within City right-of-way (ROW); however, the City will need to obtain ROW for areas within private property.	<b>NOD</b>	
2014049001	Spanish Ranch THP 1-12-014 SCR Forestry and Fire Protection, Department of --Santa Cruz The project is limited to a temporary skid trail crossing over an unnamed Class II watercourse. The project is located on an unnamed Class II watercourse tributary to Soquel Creek, in the County of Santa Cruz, State of California. The California Department of Fish and Wildlife is executing a Lake and Streambed Alteration Agreement Number 1600-2014-0040-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Harlan Tranmer, Big Creek Lumber Company.	<b>NOD</b>

2012022046	<p>Pacifica General Plan Update Pacifica, City of Pacifica--San Mateo Note: Extended Review</p>	<b>EIR</b>	07/10/2014
------------	---	------------	------------

The proposed Pacifica General Plan is intended to replace the existing General Plan, which was last updated in 1980. The General Plan is composed of goals, policies, a land use diagram, and other graphic figures and maps (e.g. open space systems, transportation network, and public facilities) to guide future development within the City's boundaries, through the year 2035. The Local Coastal Program Land Use Plan is also being updated in conjunction with the General Plan update.

Pacifica is located along the Pacific coast of the San Francisco Peninsula in San Mateo County, part of the San Francisco-Oakland-San Jose metropolitan area. The City is approximately 13 miles south of downtown San Francisco, 40 miles northwest of San Jose, and 6 miles west of San Francisco International Airport. It

	drilling and excavating equipment will be located within the roadways and shoulder areas while work is being performed. Approximately five native trees, two non-native trees will be removed and other vegetation will also be removed for a maximum of six feet beyond the existing edge of pavement to facilitate the installation of stabilization walls. The California Department of Fish and Wildlife (CDFW) are executing a Lake and Streambed Alteration Agreement Number 1600-2013-0402-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Town of Hillsborough.		
2007072036	San Francisco Bay and Delta Sand Mining Project California State Lands Commission San Francisco, Pittsburg, Oakland--San Francisco, Marin, Contra Costa, Solano The proposed project involves commercial hydraulic sand mining operations for the next 10 years in central San Francisco Bay, the Middle Ground Island Shoal, and Suisun Channel of Suisun Bay. This operation provides local marine aggregate for use in highway maintenance and construction, new residential complexes, and commercial and public buildings within the greater San Francisco Bay Area. Project activities include hydraulic sand mining and san offloading.	<b>NOD</b>	
2010111070	Goleta West Sanitary District Trunk Improvement Project - Mesa Road Trunk Sewer Goleta West Sanitary District Goleta--Santa Barbara DFW is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code (# 1600-2013-0224-R5) to the project applicant, Goleta West Sanitary District. The project proposes to install a new section of sewer pipeline between ManHole-1 and the intersection of Los Carneros Road and Mesa Road. The old pipeline which runs through a section of the eastern Storke Wetlands will be abandoned in place, with six of the manholes removed and the pipeline capped at the manholes. Each manhole will be excavated to a depth of one foot, and cut around its circumference with a hand operated saw and the top portion will be removed. The base of the manholes will be demolished with a hammer like hoe-ram jackhammer powered by an air compressor or by hand. The sewer line will be filled with cement slurry with a hose from a cement truck drive on Mesa Road. The entire pipeline will be filled with cement from the manhole to the next manhole. The areas excavated will then be filled with native materials to match the existing grade. Mitigation for this project includes the removal of the existing road to the elevation of the active brackish marsh wetland, and the salvage of pickle weed and salt grass, to be replanted upon completion of the project. Wetland plants to be salvaged shall be hand excavated and set aside on clear plastic tarps outside of the wetland, and the roots shall be kept wet. Plant salvage operations shall be monitored by a qualified biologist and under the guild lines outlined in Mitigated Negative Declaration.	<b>NOD</b>

	policies and programs that are intended to guide the City's housing efforts through the 2015-2013 RHNA planning period.		
2014049002	Walnut Meadows Novato, City of Novato--Marin The project involves the development of a 12 unit subdivision Utility work for the development will include trenching through the channel of Wilson Creek; installing storm drain outfall pipes on the stream bank; and stabilizing a section of stream bank. The project will occur on a 3.4-acre residential parcel in Novato. The parcel has an existing address of 840 McClay Road, Novato, California 94947; Assessor's Parcel Number 140-091-01. The California Department of Fish and Wildlife is executing a Lake and Streambed Alteration Agreement Number 1600-2013-0347-R3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Aaron Rodern of Ryder Homes of California Inc.	<b>NOD</b>	
2014048036	Planning for West Lake Tahoe Regional Water Treatment Plant Tahoe City Public Utility District --Placer The Tahoe City Public Utility District seeks to use Safe Drinking Water State Revolving Funds to conduct a planning project for the contemplated West Lake Tahoe Regional Water Treatment Plant Project. The planning project would include a feasibility assessment, preparation of a Preliminary Design Report, completion of environmental review under CEQA, and permitting for a permanent all-season surface water treatment plant utilizing Lake Tahoe as the water source.  A key goal of the future construction project that would be facilitated by this planning project is to replace an existing seasonal (May-September) water treatment plant and supplement or replace groundwater sources for up to seven different water systems, providing a long-term solution of water delivery needs along the West Shore of Lake Tahoe consistent with contemporary public health and related standards. The future construction project would ensure provision of high quality drinking water and attainment of fire suppression standards.	<b>NOE</b>	
2014048037	Tentative Parcel Map No. 650 El Cajon, City of El Cajon--San Diego 4-lot subdiision of existing shopping center.	<b>NOE</b>	
2014048038	Phillips 66 Pipeline Repair Project Fish & Wildlife #3 --Alameda Issuance of a Streambed Alteration Agreement No. 1600-2013-0404-03 is pursuant to Fish and Game Code Section 1602. At each repair site, the total area of disturbance will be 4,000 square feet including the pipeline excavation area, the adjacent side-cast area, and staging area. Access to the repair sites will be via existing roads and overland access to a few of the repair sites. For those repair sites that do not require overland access, the repair sites are located immediately adjacent to the existing road. The repair site footprints and overland access routes will be staked and fenced with silt fencing backed by orange construction fencing prior to the commencement of the repairs. All construction equipment will be limited to the existing roads and the area within the fence lines.	<b>NOE</b>

2014048039	Chevron Pipe Line Company KLM 32 PIM Repair Project Fish & Wildlife #3 Brentwood--Contra Costa Project proposes to conduct repairs on the Chevron Pipe Line Company KLM 32. The Chevron Pipeline Company (CPL) proposes to complete on site investigations of the BAPL to assess anomalies in the system. The assessment and repair will require a section of the pipeline to be excavated and trenched at the location referenced above. The trench will be approximately 20 feet long, 10 feet wide and 6 feet deep and will be supported in place by a trench box. Corrective actions include welding of a sleeve around the pipe in question. Equipment to be used includes rubber tire backhoes, track excavator, welding truck, water truck, pick-up truck, and hand tools. Issuance of a Streambed Alteration Agreement Number 1600-2013-0411-R3 is pursuant to Fish and Game Code Section 1602.	<b>NOE</b>	
2014048040	Madera and Kings County Pavement Replacement (06-0S040) Caltrans #6 --Madera, Kings Remove and replace pavement due to failure. All work is within the paved roadway.	<b>NOE</b>	
2014048041	Food Storage Lockers Parks and Recreation, Department of --Santa Cruz Replace 54 existing non-animal proof wooden food lockers with animal proof metal food storage lockers located at Portola Redwood State Park.	<b>NOE</b>	
2014048042	Organics Recycling Program Costa Mesa Sanitary District Costa Mesa--Orange Implement an organics recycling program that will source separate green waste and food scraps that will be converted into Renewable Natural Gas (RNG) and soil amendments. The program will divert 75% of residential waste stream away from landfills while at the same time provide protection of the environment.	<b>NOE</b>	
2014048043	Trampas Canyon Dam, No. 1795-6 Water Resources, Department of San Juan Capistrano--Orange Drill five borings at the dam as part of a geotechnical exploration program.	<b>NOE</b>	
2014048044	Permission to Enter State School Lands to Conduct Environmental and Cultural Resources Surveys; Section 16, Township 20 South, Range 43 East, MDM California State Lands Commission --Inyo Authorization to enter State school lands to conduct Environmental and Cultural Resources Surveys; Section 16, Township 20 South, Range 43 East, MDM, in Inyo County.	<b>NOE</b>

2010121044	2013 Firestone Education Center Master Plan Los Angeles Community College District South Gate--Los Angeles NOTE: Final 1 CD	<b>FIN</b>	
	<p>The proposed project consists of the construction and operation of a new LACCD satellite community college campus that would replace the existing South Gate Education Center and accommodate up to 9,000 students. The proposed project includes the demolition of a 220,550 sf building and its connections to the adjacent building, and the construction of a new approximately 100,000 gsf building and a 1,600-space parking structure. The project site would also be improved with a surface parking lot, landscaping, an open space area, and other outdoor amenities. Vehicular access and circulation improvements would be implemented on- and off-site and new traffic signals would be installed at the existing Firestone Boulevard driveway and the proposed Santa Fe Avenue driveway opposite Ardmore Avenue.</p>		
2013112062	Use Permit and Parcel Map Application No. PLN2013-0101 - Mike Girdner Stanislaus County Modesto--Stanislaus	<b>MND</b>	05/05/2014
	<p>This is a request to utilize existing horse stables, riding arena, trails, and associated facilities to provide training for horse drawn carriage driving and carriage driving seminars and events. The facility will operate Monday thru Friday from 2:00 pm to 7:00 pm and weekends from 6:00 am to 7:00 pm. The project also includes a request to parcel the four (4) acre carriage training facility and residence from the remaining 40 acre farming operation.</p>		
2014041019	Avalon and Fries Street Segments Closure Project Draft IS/MND Los Angeles, Port of --Los Angeles Note: Extended Per Lead	<b>MND</b>	06/04/2014
	<p>The proposed Project includes the closure of segments of: 1) Fries Avenue (approximately 1,337 linear feet of roadway) between Water Street at the Union Pacific Rail Tracks and the intersection with West A Street; and 2) Avalon Boulevard between the Union Pacific Rail Tracks and the intersection of North Broad Avenue (approximately 438 linear feet of roadway). The project site is not identified on the Cortese list (Government Code Section 65962.5). Construction is anticipated to begin in early, 2015 for a period of approximately 10 months.</p>		
2014041020	Biddle Ranch Company LLC and AT&T Mobility Conditional Use Permit San Luis Obispo County Arroyo Grande--San Luis Obispo	<b>MND</b>	05/05/2014
	<p>A request by Biddle Ranch Company LLC and AT&amp;T Mobility for a CUP to allow for the co-location, construction and operation of an unmanned wireless communications facility involving: a) the replacement of an existing wood pole (monopole) and four omni "whip" antennas with two new 63-foot high steel monopoles; b) six 96.42 inch panel antennas in two sectors of three antennas each, mounted at a height of 63 feet above grade (measured to top of antennas) and attached to each steel monopole; c) an additional 182.5 sf of fenced lease area; d) new equipment cabinets and racks located within the approximately 640 sf fenced lease area; and e) the relocation of one 4-foot diameter drum antenna from the existing wood monopole to one of the proposed steel monopoles. The project will result in the disturbance of approximately 400 sf of a 629-acre parcel.</p>

2014048050	Annual "Live Fire" Safety Preparedness Training Los Angeles County --Los Angeles The Annual "Live Fire" Safety Preparedness Training exercises prepare County of Los Angeles Fire Department personnel in all aspects of safe and effective use of fire suppression tactics in preparation of the upcoming fire season. The total project area is 398 acres of County owned land adjacent to the Wayside Honor Rancho/Pitchess Detention Center, however not all of this area will be impacted by training activities. Training exercises consist of firing off small patches of land (10 acres and less) in increments of 30 minutes. Type 1 Hand Crews will construct hand line using hand tools to remove surface vegetation. Engine Crews will conduct progressive hose lays which will not involve the cutting of vegetation. Fire apparatus will be operated from pre-existing roads/motorways and previously graded surfaces to pump water for the progressive hose lays. No heavy equipment will be operated off pre-existing road/motorways or on previously undisturbed soil surfaces. Directed aerial water drops will be made by helicopter pilots utilizing air to ground communication with ground personnel.	<b>NOE</b>	
2014048051	Issuance of Streambed Alteration Agreement No. 1600-2013-0371-R1, Howell Avenue and Highway 3 Conduit Replacement Fish & Wildlife #1 Etna--Siskiyou The project is limited to horizontal directional drilling under Johnson Creek for the installation of multiple conduits into a 12-inch bore to support the installation of fiber optic cable and copper distribution cable along the highway.	<b>NOE</b>	
2014048052	Temporary Emergency Permit to Transfer Hazardous Waste from Disabled Tanker Truck Toxic Substances Control, Department of Hayward--Alameda A temporary emergency Hazardous Waste Permit (Permit) has been granted to Thermo Fluids Inc. (TFI), to transfer hazardous waste from a disabled tanker truck into another tanker truck. The permit allows for approximately 3000 gallons of used oil to be transferred from one tanker truck to another. The disabled tanker is currently parked at California Fleet Maintenance Inc. located at 2450 Whipple Rd, in Hayward, CA. The truck cannot be driven because of a cracked left rear equalizer spring and the used oil must be removed so the truck can be repaired. Once the hazardous waste is transferred, it will be transported offsite for proper disposal. TFI does not hold a hazardous waste facility permit for this activity at the location where the transfer would take place.	<b>NOE</b>

2014048061	Drought Emergency Grant Funding Request for Lompico County Water District (CWD) Public Health, Department of --Santa Cruz The California Department of Public Health is a responsible agency for this project. The Department's Public Water System Drought Emergency Funding Program is providing state funds for the project. Lompico CWD proposes to construct a booster station and a 2,400 ft. intertie to San Lorenzo Valley Water District (4410014) to add additional source capacity to allow Lompico CWD to meet demand and decrease current reliability upon the three small groundwater sources that are declining in production.	<b>NOE</b>

2011011004	EIR 13-02/GPA 07-02/ZCA 07-01/LCPA 07-02 General Plan Update Carlsbad, City of Carlsbad--San Diego Note: Extended Review per lead  The project analyzed by the draft EIR is the General Plan Update, including an update to the Carlsbad Housing Element. Other new/updated related plans & programs to implement the broad direction of the General Plan include: a Draft Climate Action Plan, amendments to the city's Zoning Map & Local Coastal Program land use & zoning maps, & amendments of the circulation Level of Service standards in the Citywide Facilities & Improvements Plan to ensure consistency with the updated General Plan.	<b>EIR</b>	06/20/2014
2008021002	ProLogis Eucalyptus Industrial Park EIR (formerly Prologis Park Moreno Valley Eucalyptus Project) Moreno Valley, City of Moreno Valley--Riverside FYI Revised Final EIR  The proposed project consists of construction and operation of a warehouse facility with six individual warehouses of varying sizes with a total of 2,244,638 sf on 122.8 acres. The project includes construction of parking and driving areas, detention basins, erosion protection and a bridge over Quincy Channel, offsite road and utility improvements, and landscaping along the perimeter and roadway frontages.	<b>FIN</b>	
2014041029	ENV-2014-0228-MND Los Angeles, City of --Los Angeles The project involves the expansion of an existing market from 53,271 sf to 93,408 that currently sells a full-line of alcoholic beverages for off-site consumption. The market is requesting to continue selling alcoholic beverages for off-site consumption and would like to offer instructional alcohol tastings on-site as part of the store expansion.	<b>MND</b>	05/06/2014

2014041031	HAMM; Conditional Use Permit; DRC2013-00026 San Luis Obispo County Paso Robles--San Luis Obispo Request by Rudolph Hamm and Verizon Wireless for a Conditional Use Permit to allow the construction and operation of an unmanned wireless communications facility. The proposed facility would consist of: a) twelve panel antennas mounted at a height of 36 feet above ground level within the cylinder portion of a new 40-foot high faux elevated water tank; b) one new 176 sf prefabricated equipment shelter, designed to resemble a barn; c) one new 132-gallon diesel standby emergency generator; and d) associated utility trenching for the installation of power and telco lines. The project is located on a 13 acre parcel and will result in the disturbance of approximately 2,500 sf (50-foot by 50-foot concrete pad) for the construction of the proposed facility. The facility will be accessed by an existing agricultural road. No road improvements or grading are proposed. The proposed project is within the Residential Suburban land use category and is located at 833 Gahan Place, approximately 326 feet south of the intersection of Highway 41 (Green Valley Road) and Gahan Place and east of the City of Paso Robles. The subject property is within the Salinas River planning area.	<b>MND</b>	05/07/2014
2014042024	Beechcraft and Cessna Warehouse Project Vacaville, City of Vacaville--Solano The project proposal is to construct two warehouse buildings on vacant land located at the southwest corner of Beechcraft Road and Cessna Drive, in Vacaville, Solano County. The proposed buildings are one-story structures of 597,816 sf and 112,115 sf, placed on two parcels totaling approximately 40 acres. The site plan includes access via two driveways on Cessna Drive, and 514 total parking spaces. The project also includes a storm water outfall into Horse Creek, which adjoins the site to the south.	<b>MND</b>	05/06/2014
2014042026	South Sacramento Stream Project Florin Creek Project Sacramento Area Flood Control Agency Sacramento--Sacramento Florin Creek is a tributary to Morrison Creek that traverses the City of Sacramento and unincorporated Sacramento County. The Proposed Project consists of refinements to previous designs approved of in a SEIR prepared and certified by SAFCA in February 2005 (SCH#2004102009). The Proposed project would provide flood protection measures capable of conveying flows of a 100-year flood event within Florin Creek downstream of SR 99 based on more recent studies and design changes since certification of the SEIR. The Proposed Project would include changes to channel widening and flood conveyance design, shortening the length of construction along the creek, and the removal of trees and fences encroaching into the channel right-of-way to meet the USACE engineering requirements. In combination with the Florin Creek Multi-Use Basin Project, under separate consideration by SAFCA, the Proposed Project would provide flood protection for up to 450 structures downstream of the Project site.	<b>MND</b>	05/06/2014

	Sonoma Valley Area Plan 1 amendment, and 3) a precise Development Plan Use Permit to accommodate a Mixed Use Development including a Type A 100% density bonus affordable housing proposal with 60 affordable family rental units, 40 affordable senior rental units, and a 6,500 sf commercial building on a total of 6.76 acres located at 17310 and 17366 Highway 12, Sonoma;		
2014041021	Pico Rivera General Plan Update Draft Program EIR Pico Rivera, City of Pico Rivera--Los Angeles Note Reference SCH# 1992071076	<b>NOP</b>	05/06/2014
	The proposed project involves the comprehensive update of the Pico Rivera General Plan and rezoning related to the Housing Element. Updates would occur to the goals and policies to the existing elements as well as the creation of two new elements, including an Economic Prosperity Element and a Healthy Communities Element. The proposed General Plan Update would also include the creation of a new mixed-use land use designation.		
2014042025	San Pablo Avenue Specific Plan El Cerrito, City of Richmond, El Cerrito--Contra Costa The San Pablo Avenue Specific Plan represents a collaborative planning effort between the cities of El Cerrito and Richmond to identify a shared vision for the future of San Pablo Avenue, identify improvement needs, and adopt implementing regulations that can be applied consistently in planning area. A major goal of the planning effort is to achieve a coordinated, cohesive environment and character in the plan are through (1) a Form-Based Code; (2) multi-modal transportation goals and policies, recommended streetscape design improvements, and design standards as part of a Complete Streets chapter of the Specific Plan; (3) community facilities; and (4) infrastructure improvements.	<b>NOP</b>	05/06/2014
2014042021	Event Center Zoning Text Amendment (PZTA 20130133) Placer County --Placer The project proposes a Zoning Text Amendment to revise sections 17.04.030 (Definitions of Land Uses, Specialized Terms and Phrases) and 17.06.050.D (Land Use and Permit Tables) of the Placer County Code (Zoning Ordinance), which regulate Community Centers. The proposed amendments would result in the creation of an Event Center section in the Zoning Ordinance that would establish five definitions for different types of event centers, which are Community Event Center, Commercial Event Center, Small Agricultural Event Center, Intermediate Agricultural Event Center, and Large Agricultural Event Center.	<b>Neg</b>	05/06/2014
2014042022	Use Permit #13-08, AT&T Wireless (Lake California POA, landowner) Tehama County --Tehama To establish a wireless telecommunications facility consisting of 100' monopine tower and an 11.5'x20' equipment shelter located within a 50'x50' fenced leased area. Power and telephonic delivery will be routed underground from an existing utility pole and will follow the same route as the proposed ingress/egress to the leased area.	<b>Neg</b>	05/06/2014

2014042023	PA-1300190 (SA) San Joaquin County Lathrop--San Joaquin A Site Approval application to expand an existing gas station and convenience market to include demolition of an existing 720 sf convenience store, construction of a 2,600 sf convenience store, and relocation of an existing 186 sf storage building. The existing 2,494 sf canopy to remain in use.	<b>Neg</b>	05/06/2014
2007042059	Shamrock Materials, Inc./Dave Ripple - Wetland Mitigation Site - Butler Avenue, APN 134-051-005 and -016 Sonoma County Santa Rosa--Sonoma The proposed project involves the development of approximately 15 acres of the 17.5 acres of undeveloped land into a facility at the Todd Road site and enhancement of 6.58 acres of degraded seasonal wetland habitat, creation of approximately 10.24 acres of seasonal wetlands and swales, and removal of approximately 31.20 acres of a eucalyptus plantation and non-native flower cultivation at the 50.18-acre Terra Bagnata mitigation site. Approximately 2.13 acres of high quality seasonal wetlands will be preserved at the Terra Bagnata mitigation site.	<b>NOD</b>	
2008041038	Barren Ridge Renewable Transmission Project Los Angeles, City of --Kern, Los Angeles The Project is limited to a single stream crossing a Haskell Canyon Creek (Latitude 34.473945, Longitude - 118.509053). Temporary, four inch gravel fill and Best Management Practices (BMPs) may be placed prior to any creek flows if vehicular access during periods of creek flow is unavoidable. Temporary fill and BMPs will follow the direction of an approved Storm Water Pollution Plan. Temporary fills and BMPs will be removed following construction of the Haskell Canyon Switching Station. No water diversion are proposed or approved under this Agreement and the Haskell Canyon Creek crossing will not otherwise be changed except for the installation of approved sediment control BMPs.	<b>NOD</b>	
2009042133	Enclave at Granite Bay, The (PSUB T20080329) Auburn, City of --Placer The California Department of Fish and Wildlife is executing Lake or Streambed Alteration Agreement Number 1600-2013-0198-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, Granite Bay Development.  The project is limited to extension of an existing culvert located in an intermittent drainage channel that crosses through the northeast corner of the project site. Extension of the culvert is necessary to accommodate an emergency vehicle access road that will be constructed at the eastern boundary of lot 1 to provide gated-access for emergency vehicles from the cul-de-sac to be constructed off to Pastor Lane to Sky View Lane.	<b>NOD</b>

	<p>Amendments 1, 2 and 3, to extend the deadline to permanently protect the Habit Management (HM) lands from April 6, 2014 to October 6, 2014, and corrects two types in the ITP. No other changes were made to the ITP, as amended by Amendments 1, 2, and 3.</p> <p>The Project will result in impacts to 766 acres of desert tortoise (<i>Gopherus agassizii</i>) and Mohave ground squirrel (<i>Spermophilus mohavensis</i>) habitat including temporary impacts to 92 acres; the Project will permanently remove 674 acres of desert tortoise and Mohave ground squirrel habitat. The project is expected to result in incidental take of desert tortoise and Mohave ground squirrel, which are designated as a threatened species under California Endangered Species Act. The ITP, as amended by Amendments 1, 2, and 3 and Minor Amendments No. 4 authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.</p>		
2012112012	<p>EA 2012-0011 (Loma Rica Road Safety Improvement Project Phase 2) Yuba County --Yuba</p> <p>The California Department of Fish and Wildlife is executing Streambed Alteration Agreement Number 1600-2013-0024-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, Yuba County - Department of Public Works.</p> <p>The County is proposing to construct improvements along Loma Rica Road to increase safety at two locations along the alignment. The Project involves shoulder widening, culvert replacement and extension, drainage improvements, a two inch asphalt overlay, new pavement markings and striping. Roadway improvements along Loma Rica Road include realigning approximately 1,500 feet of Loma Rica Road at the intersection of Los Verjeles Road and extending Los Verjeles Road to the new intersection. Realigning approximately 1,300 feet of Loma Road at the intersection of Cross Star Trail and, regarding a short section of Cross Star Trail to match grades with new roadway section. In stream work includes replacement of or extending 4 culverts that bisect Loma Rica Road and Los Verjeles Road.</p>	<b>NOD</b>	
2014012007	<p>Station E Substation Project Draft IS/MND Sacramento Municipal Utility District Sacramento--Sacramento</p> <p>The Proposed Station E Substation Project would involve the design construction and operation of a new substation on a 15.42 acre parcel near the 20th Street and C Street intersection in Sacramento. The proposed project would replace the existing adjacent North City Substation, which was constructed in the 1950s and has reached its planned operational end of life. The Proposed Project would meet SMUD's performance objectives by locating the new substation near the existing service area's load center. The Proposed Project would address projected future growth in the service area as well.</p>	<b>NOD</b>	
2014022034	<p>Camino Tassajara Shoulder Widening - 1.1 Miles South of Highland Road to 0.3 Mile North of Windemere PKWY Contra Costa County --Contra Costa</p> <p>The project proposes to widen the existing lanes to 12-foot wide travel lanes and add 8-foot paved shoulders on each side which will bring the pavement cross section along this segment of Camino Tassajara up to current Contra Costa County standards. Road widening will be conducted in varying degrees on both sides of the roadway along the entire 2,100-foot length. In support of the Project,</p>	<b>NOD</b>

2012021046	CalMat Site Vegetation Restoration Project Riverside County Regional Park and Open Space District San Jacinto--Riverside Rehabilitate an existing 280-acre-open-space site that has been used for illegal off-highway vehicle riding for several years and has a network of illegal OHV riding trails. No structures are proposed.	<b>NOD</b>	
2013012072	County Jail Project Napa County Napa--Napa The project proposed the purchase of approximately 27 acres of property located at 2300 Napa Vallejo Highway, Napa APN 046-370-021 (commonly known as the Pacific Coast site) and construction of a new jail including ancillary facilities such as a storage and maintenance unit, food services, laundry, medical and mental health units, programming rooms, and inmate intake and release. It also includes construction of a staff faculty that would house 50-100 additional inmates.	<b>NOD</b>	
2014022036	Stony Creek Constant Head Office Rediversion Project Tehama Colusa Canal Authority Orland--Glenn The proposed Project is the rediversion of water stored in Black Butte Reservoir into the Tehama-Colusa Canal through a Constant Head Orifice located at the intersection of the Tehama-Colusa Canal and Stony Creek, pursuant to State Water Resources Control Board Permit No. 13776. The rediversion involves construction of temporary gravel berms in the Stony Creek creek bed, which divert water into the Stony Creek Constant Head Office (CHO) and then into the Tehama-Colusa Canal. Rediversions will occur only from April 1 through May 15, and from September 15 through October 29 of each year. Annual diversions at the Stony Creek CHO will not exceed 38,293 acre-feet. Rediversions at the CHO have occurred in this manner since 1993.	<b>NOD</b>	
2014022075	State Route 20 Connection Project Williams, City of Williams--Colusa The project will construct a new public road connection to SR 20 between the I-5 northbound off-ramp and Husted Road in the City of Williams. This section of SR 20 will be denominated from "freeway" to "controlled access expressway". Improvements associated with the Project include the extension of Margurite Street, installation of a concrete culvert across the drainage canal parallel to SR 20, and construction of new intersection at Margurite Street and SR 20.	<b>NOD</b>

2014048074	13-150 Beta Offshore CP Testpoint Regional Water Quality Control Board, Region 4 (Los Angeles) Long Beach--Los Angeles The proposed project (Project) will retrofit and improve pipeline corrosion detection on the BETA off shore existing 16-inch oil pipeline from Platform Elly to shore. The pipeline has been in service since 1984, and the existing 16-inch oil pipeline from Platfrom Elly to shore. The pipeline has been in service since 1984, and the existing cathodic protection (CP) system is approaching the end of its 30 year design life. The proposed CP system retrofit will improve the accuracy and repeatability of the survey data collection in order to better predict and estimate the actual conditions of the pipeline coating and CP system. The proposed Project would include installation of one Test Point, one SubMar Mat over the Test Point location, one Retromat, and two associated wire cables.	NOE	
2014048075	Window Replacement, Residences 1 and 2 Parks and Recreation, Department of --San Luis Obispo The purpose of this project is to replace all the non-functional wood frame windows in both residence 1 and 2 and the garage. The existing windows are not safe or energy efficient as they do not close or open properly. The window hardware has deteriorated to the point of being inoperable. The new windows will be vinyl framed single slider and the color and appearance will match the existing windows as closely as possible. The replacement windows will be dual paned and energy efficient.	NOE	
2014048076	Los Osos Knoll Parks and Recreation, Department of --San Joaquin The purpose of this project is to identify desirable routes from existing trails within an 11 acre area. The trails that are identified as unsustainable and/or obsolete for recreational purposes will be closed (approx. 6,000 feet) and rehabilitated. Approximately 5,000 feet of trail will remain to allow recreation. These trails are identified as conceptual at this point since the Carnegie Advisory Team will be providing input on desired trail locations working within the parameters needed to protect the environment. This area will be managed as "trails only" riding zone. In order to accomplish the trail rehabilitation work, native soil will be brought in from the park's sediment basin stockpile. Permanent fence (approximately 3,770 feet) will be used to enclose the area allowing for controlled entrance to the project areas. Sediment and erosion control Best Management Practices (BMPs) will be used to stabilize exposed soils and no work will occur during storm events. Rare plant surveys will be conducted throughout the growing season and will be avoided if found. Existing vegetation will be preserved and animal burrows will be inspected and avoided if active. The work crews will be given species training to help identify sensitive species and instructions to stop work if a sensitive species is observed.	NOE	
2014048077	Dust Control Treatment Pilot Project Parks and Recreation, Department of --San Diego This project will develop a pilot treatment and testing program for various dust control treatments and measure their effectiveness. Various treatments will be applied on selected park roads, trails, and parking areas. All spraying will be contained within the roadbeds of existing roads and trails and overspray prevented	NOE

	by directional spray guides on the equipment. Washes and road or trail crossings of washes will not be treated. Testing will be conducted with a tow-behind air monitor and temporary air quality stations. Temporary air quality monitoring stations will be used at 11 sites and be fenced with above ground security fencing within a 14 foot x 14 foot area. Hay bales and additional speed limit signs will be installed at specific sites. A sea container, high water tank, and equipment will be placed within the maintenance facility at the Toner site. The project duration will be approximately 3 years.		
2014048078	Plant-Pollinator Network Restoration Project (Project) Fish & Wildlife #2 --Santa Barbara, Santa Cruz CDFW is issuing a permit to the Santa Barbara Botanic Garden pursuant to Fish and Game code section 2081(a) for a project to conduct plant and pollinator monitoring activities and the collection of seed or cuttings from plants for conservation collections. Work will be conducted in spring and early summer, and three visits to project locations will likely be conducted each year.	<b>NOE</b>	
2014048079	Nicasio School District Planning Project Nicasio School District --Marin Nicasio must develop a good water supply alternative. The project is necessary because after hydrogeological assessment & geophysical analysis, test wells were drilled but no viable water supply was located. Water supply from an existing water system across the creek may be feasible making the project beneficial.	<b>NOE</b>	
2014048080	Big Foot Subdivision Shaded Fuel Break Forestry and Fire Protection, Department of --Humboldt Construct a shaded fuel break for approximately 2000 by 100 feet (5 acres) along the western property line of parcel number 52251101 in the town of Willow Creek. Crews will utilize chainsaws, chippers, and hand tools to clear brush and small trees adjacent to a neighborhood parcel line. The project will provide approximately 155 structures in the community of Willow Creek an increased fire protection for both egress and ingress for a fire threat from the East. Hazardous fuel loading will be greatly reduced. The project will include limbing, pruning, small tree removal, and brushing along the parcel line. The resulting hazardous fuels will be treated by a combination of chipping, lop, and scatter material to within eighteen inches of the ground. The project area is made up of various brush species as well as several tree species which include Alder, White fir, Douglas fir and pine trees. The area will remove brush and small trees to allow trees to be spaced at a target of fourteen by fourteen foot spacing. The maximum tree diameter for removal is 8 inches. Remaining trees will be limbed to reduce ladder fuels. The resulting project area will result in an increase in fire reduction and protection for the community of Willow Creek.	<b>NOE</b>	
2014048081	Whispering Pines Apartments PWSDE Funding Project Public Health, Department of --Mariposa The California Department of Public Health (Department) is a lead agency for this project. The Department's Public Water System Drought Emergency Funding Program is providing state funds for the project. The proposed project includes three phases: Phase I: Drill and equip well 1A, conduct pump test, collect and analyze water	<b>NOE</b>

quality samples, and install new 5,000 gallon storage tank near existing well 1.  
Phase II: Drill and equip well 2A, conduct pump test, collect and analyze water quality samples.  
Phase III: Install new pump in existing well 5A.

2014048082	Horse and Group Campsite Improvements, Chino Hills SP (12/13-IE-9) Parks and Recreation, Department of Chino Hills--San Bernardino This project involves improving the Equestrian Staging Area to accommodate 10 horse campsites and two group campsites as well as upgrading the driveway. Each horse camp site will contain two corrals, a tent pad, trailer space, RV space, parking, a table, water supply and a campfire ring. An ADA mounting ramp will be located at the center of the campground. Two group sites will be developed to include tables, campfire rings, tent pads, and 12 parking spaces. The driveway to the campground will be widened and improved to allow for easier trailer access and increased visibility for all vehicles; a traffic pattern will be designated within the campground. Two new vault toilets will be installed; one will be built to ADA standards. DPR-approved standard project requirements have been incorporated into this project. A copy of these requirements may be obtained by submitting a request to the project Environmental Coordinator listed below.	<b>NOE</b>

2014022015	Pacific Gas and Electric Manufactured Gas Plant Toxic Substances Control, Department of Red Bluff--Tehama DTSC is considering approval of a Remedial Action Plan for the Pacific Gas & Electric (PG&E) company an additional adjacent parcel, and a right-of-way (hereinafter "the Site or Site Area") pursuant to Health & Safety Code, Division 20, Chapter 6.8 Section 25356.1 as submitted by PG&E. The RAP consists of remedial activities to address elevated levels of volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), polycyclic aromatic hydrocarbons (PAHs), and total petroleum hydrocarbons (TPH) in soil, soil vapor and groundwater at the Site and lead in the soil.	<b>FIN</b>	
2014041035	Buena Outfall Fource Main Phase III Project (Capital Improvement Project 8131) Buena Sanitation District Carlsbad--San Diego The District is proposing to construct a new Buena Outfall sewer pipeline with a new alignment to replace the existing pipeline. The alignment begins at an existing force main at the northeast corner of El Camino Real and Palomar Airport Road in the city of Carlsbad. The new sewer pipeline would cross under El Camino Real then proceed within the westbound lanes of Palomar Airport Road toward the intersection of Palomar Airport Road and Paseo Del Norte. The pipeline will then turn south and proceed within the southbound lanes of Paseo Del Norte at a distance of approximately 1,200 feet, and tie into the existing trunks sewers which flow to the Encina Water Pollution Control Facility located west of Interstate 5. Up to five above ground odor control facilities are also proposed. The majority of construction will occur at night to minimize disruptions to traffic.	<b>MND</b>	05/08/2014

2014041036	Iris Canyon Residential Care Facility for the Elderly Monterey, City of Monterey--Monterey The Iris Canyon Residential Care Facility for the Elderly (proposed project) is located on a 8.29-acre site at 200 Iris Canyon Road (formerly 1700 Del Monte Center) north of State Highway 1, west of Iris Canyon Road, and south of Don Dahvee Lane adjacent to the Del Monte Shopping Center in the City of Monterey, CA. Regional access to the property is provided by State Highway 1 via Munras Avenue and Soledad Drive exits, and local access to the property is provided by Iris Canyon Road.	<b>MND</b>	05/08/2014
2014041037	Harbor Hamilton - 28 Unit Project Costa Mesa, City of Costa Mesa--Orange Master Plan for a 28-unit detached three-story townhouse development including seven live/work units with ground floor workspace. The site includes two vacant commercial buildings. The project site is located in Planned Development Commercial Zoning district where ancillary residential use of up to 20du/acre is permitted by approval of a master plan. The proposal includes detached three-story townhome units with seven of these units (abutting southerly property line) providing a workspace on the ground floor. A total of 55 garage parking spaces and 58 open parking spaces are proposed (four spaces per unit, except one two bedroom unit (3 spaces).	<b>MND</b>	05/08/2014
2013041063	Belmont Pool Revitalization Project Long Beach, City of Long Beach--Los Angeles The project proposes the demolition of the existing Belmont Pool complex (the indoor and outdoor features) and the construction and operation of a replacement pool complex that includes indoor and outdoor pool components. Spectator seating will be provided for approximately 3,500 people through a combination of permanent and portable seating in the indoor and outdoor areas.	<b>NOP</b>	05/08/2014
2014042029	Chevron Hensley Street/Formal Kelham Warehouse Properties Redevelopment Project Richmond, City of Richmond--Contra Costa On the Hensley site, the proposed project would demolish the approximately two dozen existing industrial buildings and ancillary structures on the 43.6 acre site and redevelop the site with two large warehouse buildings and one smaller building to be used for industrial purposes. On the Kelham site, the proposed project would redevelop approximately 18.5 acres of vacant land owned by Chevron with up to five buildings to be used for industrial purposes. The current plan is for Chevron to retain ownership of both sites and secure the necessary land use entitlements. Four of the five proposed buildings on the Kelham site would be leased or sold. The building not leased to other industrial businesses would accommodate Chevron's Richmond Refinery Learning and Development Training Center (Training Center) that are currently housed at the Hensley site.	<b>NOP</b>	05/08/2014

2006081093	<p>supplement to Development Code Update (DRC2010-00571) amending Title 17 (Development Code) of the Rancho Cucamonga Municipal Code to clarify definitions administrative procedures and correct prior errors and omissions.</p> <p>Cucamonga Canyon Rehabilitation Project Cucamonga Valley Water District Rancho Cucamonga--San Bernardino The California Department of Public Health (Department), as the responsible agency, will be issuing a water supply permit. The original 2006 project involved repairing damage from flood events. The original project consisted of repairing the access road and pipelines, removing the sediment, and repairing the damaged inlet facilities and control features. Environmental impacts as a result of the project included two (2) acres of land disturbance. Mitigation measures consisted of restoring and enhancing 2 acres of in-kind habitat within the project area of cucamonga Creek.</p> <p>On September 3, 2012, the CVWD prepared addendum 1. During the heavy storm events of 2010, excessive runoff from the canyon caused significant damage to the intake basins. In an effort to minimize the impact of future storm runoff, the District redesigned the intake basin facility within the same footprint of the original facilities. The modification set forth in Addendum No. 1 constituted a minor technical change to the original project intended only to address this runoff issue and the addendum found that the changes would not result in any significant environmental effects.</p> <p>In September 2013, the District drafted addendum 2 and proposed to ease 17 acres of District-owned land with an endowment to an approved natural resource management entity, i.e. the Inland Empire Resource Conservation District (IERCD) for the purpose of conservation in perpetuity. Of the 17 acres, 0.5 acre will be set aside as mitigation required by the original 2006 project and 1.5 acres will be set aside for the mitigation required by addendum 1. The remaining 15 acres will be set aside for future CVWD projects, which have not yet been proposed and are not a part of the Cucamonga Canyon Rehabilitation Project. The District has determined that the changes proposed in addendum 2 do not constitute a substantial change in the project which would result in any new significant or substantially increased environmental impacts, and constitute only a minor technical change in the project, and so would not require a separate, full environmental review.</p>	<b>NOD</b>	
2008021075	<p>Seashore Village Newport Beach, City of --Orange</p> <p>The Approved Project involved development of 12 single family detached units and 6 duplex units, for a total of 24 units on a 1.49-acre site at 5515 River Avenue in Newport Beach. The Modified Project would modify the approved site layout and change the architectural styles. Instead of 12 single-family units and 6 duplex units, the Modified Project would provide 24 detached units. The new development plan would provide a total of 50,916 square feet of building area, an increase of 210 square feet from the Approved Project (50,706 square feet), and change the architectural style from Craftsman and Plantation styles to Modern contemporary style. The new development would have a front setback of 10 feet for Seashore Avenue, River Avenue, and the west side. The east side setback would range from 6 feet to 12 feet. These setbacks are within the range of or exceed the respective values established for the Approved Project. The maximum midpoint height would range from 28 feet 11 inches to 30 feet 9 inches, exceeding</p>	<b>NOD</b>

2014022025	<p>Veolia ES Technical Solutions L.L.C. - Hazardous Waste Facility Permit Renewal Toxic Substances Control, Department of Richmond--Contra Costa</p> <p>DTSC has made a final decision on a project regarding the renewal of a Hazardous Waste Facility Permit (Permit) for Veolia ES Technical Solutions L.L.C. (Veolia) Richmond Facility (Facility), as authorized by the California Health and Safety Code, Chapter 6.5, and the Resources, Conservation and Recovery Act (RCRA). Veolia currently operates under a Permit issued on January 24, 1994. A permit renewal authorizes the continued storage and transfer of off-site generated hazardous waste. The Permit is effective April 10th, 2014 and shall expire on April 10th, 2024.</p>	<b>NOD</b>	
2014022056	<p>Remedial Action Plan for Site 6/Former Fire Training School at Treasure Island Toxic Substances Control, Department of San Francisco--San Francisco</p> <p>DTSC approval of Record of Decision/Final Remedial Action Plan (ROD/Final RAP) pursuant to authority granted under Chapter 6.8, Division 20, California Health &amp; Safety Code (H&amp;SC). The purpose of this RAP is to implement remedial actions for Site 6 that are protective of public health and safety and the environment. Site 6 is a former fire training school at the former Naval Station at Treasure Island. The human health risk assessment identified potential future risks to hypothetical future residential use of the Site from soil contaminants including benzene, ethylbenzene, manganese, meta-chlorophenylpiperazine, naphthalene, xylkenes, 1,1,2-trichloroethane and total petroleum hydrocarbons. The ROD/Final RAP accomplishes the remedial action objectives by implementing the following activities: excavation of contaminated and offsite disposal to permitted facilities; backfilling of excavation with clean fill; long-term groundwater monitoring; and placing land use restrictions.</p>	<b>NOD</b>	
2014049005	<p>The Woodbury Lafayette, City of Lafayette--Contra Costa</p> <p>The Project is limited to the removal and replacement of an existing culvert that passes beneath Risa Road in the city of Lafayette, Contra Costa County, in the State of California. The culvert is approximately 24 inches in diameter and will be in approximately the same location as the previously existing culvert. The outfall will be protected with 234 square feet of non-grouted rip-rap. Disturbed soils will be seeded with a native mix. The California Department of Fish and Wildlife is executing a Lake or Streambed Alteration Agreement No. 1600-2013-0401-R3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Matt Branagh for the Woodbury, LLC.</p>	<b>NOD</b>

<b><u>Documents Received on Thursday, April 10, 2014</u></b>			
2013091086	Reuse of the Desiderio Army Reserve Center Pasadena, City of Pasadena--Los Angeles The 5.1-acre site was formerly the grounds and recreation area of the Vista del Arroyo Hotel and Resort complex built in 1903. The hotel property was acquired by the US War Department in 1943 and the Desiderio USARC was built on the western lot in 1956. The Desiderio Hall building and OMS are eligible for the National Register of Historic Places (NRHP) under Criterion C as an excellent and rare example of an unmodified Reisner & Urbahn design for USARCs. The proposed project includes two primary components, a 3.87-acre city park, and nine single-family detached bungalow homes in a courtyard formation. The southeast portion of the site would be developed into nine bungalow homes by Habitat for Humanity encompassing a total of 1.29 acres. The bungalows would be sold at affordable prices to families that earn up to 80 percent of the area median income.	<b>EIR</b>	05/27/2014
2014044001	Tuolumne Wild and Scenic River Final Comprehensive Management Plan and EIS Yosemite National Park --Tuolumne The purpose of the Tuolumne River Plan is to preserve the Tuolumne River in free-flowing condition, and to protect the water quality and outstandingly remarkable values that make the river worthy of designation, for the benefit and enjoyment of present and future generations. In accordance with WSRA "the plan shall address resource protection, development of lands and facilities, user capacities, and other management practices necessary or desirable to achieve the purposes of this Act" (WSRA section 3(d)). This plan will fulfill the specific direction of the 1984 legislation designating the Tuolumne River as a component of the national wild and scenic river system and make appropriate revisions to the park's 1980 General Management Plan. Consistent with the guidance provided by WSRA, the guidelines for its implementation, published jointly by the Secretary of Agriculture and the Secretary of the Interior, and the technical papers prepared by the Interagency Wild and Scenic Rivers Coordinating Council, the Tuolumne River Plan specifically addresses the elements.	<b>FIN</b>	05/27/2014
2014012024	Conveyance of 56.79 Acres of Fee Property to Federal Trust, Berry Creek Rancheria Bureau of Indian Affairs Oroville--Butte Conveyance of five parcels approximately 56.79 acres from "fee" to "Federal trust" status for the Tyme Maidu Tribe of the Berry Creek Rancheria for the construction of 36 to 40 single-family dwellings within the next 5 to 10 years subject to funding from the Native American Housing Assistance and Self Determination Act (NAHASDA).	<b>FON</b>	05/09/2014
2014041038	San Bernardino Ave, Riverside Ave, Willow Ave, and Valley Blvd Street Improvements Rialto, City of Rialto--San Bernardino The City of Rialto proposes to construct street improvements along segments of San Bernardino Avenue, Riverside Avenue, Willow Avenue, and the intersection of Willow Avenue and Valley Boulevard in general accordance with the City's Circulation Element. Street improvements include partial widening of San Bernardino, Willow and Riverside Avenues, reconstruction of intersections, and modification of intersection traffic signals. Traffic signals at the intersection of Riverside Avenue/San Bernardino Avenue and Riverside Avenue/Value Center	<b>MND</b>	05/09/2014

	would be modified. A new signal and would be added to the intersection of Willow Avenue/Valley Boulevard. Right-of-way would be acquired along the project alignment. Partial acquisitions are anticipated for 7 parcels. Temporary construction easements would be needed for 9 parcels, where temporary staging is anticipated. Traffic would be accommodated during construction to allow movement through the area. Construction is anticipated to take 8 months.		
2014041039	a) Specific Plan AMendment Case No. 80, Map No. 101; b) Amendment of Zoning Map No. 101, Zone Change Case No. 180; c) Alteration of the Boundaries of Agricultur Kern County --Kern  The applicant is requesting: (a) An amendment to the Western Rosedale Specific Plan Map from R-IA (Intensive Agriculture) to RR (Rural Residential - Minimum 2.5 Gross Acres/Unit) or a more restrictive map code designation; (b) A change in zone classification from A (Exclusive Agriculture) to A-I or a more restrictive district; (c) Exclusion of 10.4 acres from the boundaries of Agricultural Preserve No. 10. The request is to facilitate future subdivision of the land to create four, 2.5-acre rural residential lots. Access would be provided by Brimhall Road, which is designated as an "arterial" alignment by the Circulation Element of the Western Rosedale Specific Plan. Water supply and sewage disposal for the future residential development is proposed by Vaughn Water Company and individual septic systems, respectively.	<b>MND</b>	05/09/2014
2014041041	Live Oak Lanes Buellton, City of Buellton--Santa Barbara  The proposed project consists of a Final Development Plan (13-FDP-03) for a 30,630 sf Family Entertainment Center, a 14,500 sf storage facility, and parking and landscaping in support of those facilities. The Family Entertainment Center includes a bowling alley, arcade, sports bar and lounge, party and meeting rooms, toddler area and office space. A Conditional Use Permit (13-CUP-02) is required for the proposed outdoor batting cages and outdoor deck for the proposed sports bar. The 5.08 acre property is located at the south end of Industrial Way, and includes two parcels (APN No. 099-690-045 and 099-690-046). The property is currently vacant.	<b>MND</b>	05/09/2014
2014041043	Joint Transmission Main (JTM) Valve Replacement Project South Coast Water District Laguna Woods--Orange  The South Coast water District (District) is the contract operator for a large water main known as the Joint Transportation Main (JTM). The District proposes the replacement of a 42-inch, 30-inch, 24-inch and 8-inch isolation valves along the 60-inch JTM and a 24-inch Eastern Transmission Main (ETM) located in the City of Laguna Woods. These valves and flow meter have not been operated in several decades and have become inoperable. The valves associated with the JTM will require repair and replacement. The valve vaults will be raised to grade for future safe access and maintenance. Due to the size, depth, and location of the vaults, the construcion activities will require large excavations and removal of some trees and other vegetation to provide contractor access.	<b>MND</b>	05/09/2014

2014041069	Tentative Map Application 2013-5, Villages at Santa Ana Creek (Brigantino Subdivision) Hollister, City of Hollister--San Benito Tentative map proposes to subdivide 32.36 acres as follows: 155 single family lots (lots #1-#155) on 21.37 net acres; 7.46 acres dedicated to the public right-of-way; with 3.33 acres of open space to preserve the are surrounding the tributary tot he Santa Ana Creek. Project will include widening improvements along frontage of Santa Ana Road, including expanding culvert of creek tributary.	<b>MND</b>	05/09/2014
2014042030	Bethany Dams Improvement Project Water Resources, Department of Tracy--Alameda Maintenance is proposed to ensure the continued safe operation of the earthen dams at Bethany Reservoir in Alameda County, CA. This project includes the replacement of a temporary seepage monitoring weir (sandbag ring) with a permanent structure, removal of a palm tree from the Interim Plant outlet sructure, extension of toe drain outfall pipes and accompanying vegetation removal to restore recommended grade within the drainage, and the repair of the culvert at Dam 1 and accompanying vegetation removal.	<b>MND</b>	05/09/2014
2014042031	Dry Creek Trunk Sewer Bank Stabilization Project Roseville, City of Roseville--Placer The project porposes to construct Vegetated Rock Slope Protection (VRSP) bank protection along a segment of channel bank that has eroded within Dry Creek in order to protect an existing 39-inch sewer line directly adjacent to the area of erosion. To accommodate the planned VRSP, the project requiries bank cuts in certain areas due to the existing steep slope. VRSP will be placed both in the creek bed and along the bank above the ordinary high water mark (OHWM).	<b>MND</b>	05/09/2014
2014041042	Rough Acres Ranch San Diego County --San Diego The project consists of a Major Use Permit for a Conference / Retreat and Wellness Center and Campground Facility located on 713 acres. The project will retain the following existing uses on-site: 22 bungalows, a lodge, a bunk house, one residence, an agricultural building, hay barn, corrals, a cold room building, an auxiliary building, restroom facilities, a kitchen/communal living area, and an existing helipad recently built by SDGE. The helipad is to be utilized as an emergency helicopter facility. Existing uses to be re-built as part of this project include an existing guesthouse and three existing poultry coops. The project would add two campground areas including 149 campsites (both dry and full hookups), 2 clubhouses, 2 swimming pools, an equestrian center, a 200 person amphitheater, an archery course, a skeet shooting range, a multi-purpose athletic field, and improving and widening several un-paved roads.	<b>NOP</b>	05/09/2014
2014042032	Sacramento Commons (P14-012) Sacramento, City of Sacramento--Sacramento The project would enhance the pedestrian walkways and replace 206 existing garden apartment units with approximately 1,400-1,500 new dwelling units (including the existing 203-unit Capitol Tower high-rise) of various types and densities (a net increase of approximately 1,200-1,300 dwelling units), new	<b>NOP</b>	05/09/2014

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<b><u>Documents Received on Thursday, April 10, 2014</u></b>			
2009072068	<p>parking structures with up to 1,778 spaces serve uses on-site, approximately 65,000-69,000 sf of neighborhood-serving retail and/or support uses, and 44,000 sf of live-work space to activate the streets, public areas, and pedestrian spaces of the community.</p> <p>Combie Reservoir Sediment and Mercury Removal Project Nevada Irrigation District --Nevada, Placer The California Department of Fish and Wildlife is executing Lake or Streambed Alteration Agreement number 1600-2013-0206-R2, pursuant to Section 1602 of The Fish and Game Code to the project applicant, Geysers Power Company, LLC.</p>	<b>NOD</b>	
2011062063	<p>The project is limited to the installation of abutments to support a new 90-foot long pipe-bridge over Bear Canyon Creek (see Exhibit B). The pipe-bridge will span the creek approximately 35 feet about the creek-bed. Construction is to occur during the long-flow regime of the creek, and the bridge will be replaced with a crane or helicopter. The ground disturbance will be during the installation of the abutments, which will be placed on the banks on either side of the creek approximately 30 feet above the creek. The west side abutment will be integrated into a condensate collection basin foundation. The condensate basin will have secondary containment. The east side abutment will be a combination of drilled footings and excavated footings. No water diversion will be necessary as the project will not enter the active channel. All work will be done from either side of the creek. Limited vegetation removal will be necessary. Two less than 12-inch diameter oak trees and one 8-inch diameter pine tree will be removed. Some chaparral species will be removed for access to the site.</p> <p>East Trunk Sewer Replacement Project Thermalito Water and Sewer District Oroville--Butte The California Department of Fish and Wildlife is executing Streambed Alteration Agreement number 1600-2013-0270-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, Thermalito Water and Sewer District.</p> <p>The overall Project consists of placing a new trunk line tandem to the existing sanitary sewer collection system where feasible, utilizing the existing rights-of-way and existing sanitary sewer collection system easements already in place. The replacement pipeline will be constructed of 12 inch and 15 inch Polyvinyl Chloride gravity sewer pipe; these larger pipe sizes will accommodate the current capacity deficiencies.</p> <p>Work within the jurisdiction of the Department will include temporary impacts to three unnamed ephemeral drainages that bisect the existing sewer line. Impacts are considered temporary since all trenched material will be backfilled and regarded to match pre-construction conditions.</p> <p>An excavator with a buck, no larger than three feet will be required to trench and backfill the area in which the new pipe will be installed.</p>	<b>NOD</b>

2014042039	San Jose / Santa Clara Regional Wastewater Facility Cogeneration Project San Jose, City of San Jose--Santa Clara The project would include the installation of up to four natural gas/biogas fired reciprocating engines (up to 12.5 MW total for three of the four operating at any one time. The proposed engines would meet or exceed Achieved in Practice emissions standards maintained by the Bay Area Air Quality Management District (BAAQMD). The proposed engines would be housed in a new, 36,300 sf (330 feet x 110 feet) Cogeneration Building that would be constructed within the Project area near Zanker Road. The Cogeneration Building would be constructed as a high-bay concrete design, with a height similar to the existing Blower Generation Building. The proposed Cogeneration Building would also include four new stacks for air emissions. The stacks would be 24 inches in diameter and would reach to approximately 40 feet in height, which is the same height as the existing stack for the adjacent Blower Generation Building.	<b>MND</b>	05/12/2014
2014041044	CalTrans Building Demolition and Immediate Public Use Plan Parks and Recreation, Department of San Diego--San Diego This project proposes to establish Immediate Public Use of the former CalTrans District 11 office complex located at 2829 Juan Street within the community of Old Town in the City of San Diego and within OldTown San Diego State Historic Park. The complex is bound on the northwest by Taylor Street, northeast by Juan St., southwest by Calhoun St. and southeast by Wallace St. The site encompasses an area of approximately 2.47 acres and contains a total of 115,735 sf of office space. IPU as defined by the CDPR allows for improvements required to provide temporary public use of operational support facilities in recently acquired property and which do not constitute a permanent commitment of resources.	<b>NOP</b>	05/12/2014
2014041049	Guadalupe Recycling and Disposal Facility/Landfill, file number PDA93-018-03 San Jose, City of San Jose--Santa Clara The purpose for the landfill gas collection and control system is to minimize emissions from the landfill and to minimize the potential for landfill gas to migrate laterally from the landfill.	<b>NOP</b>	05/12/2014
2014041050	Berths 121-131 Yang Ming Container Terminal Redevelopment Project Los Angeles, Port of --Los Angeles The proposed Project would be accomplished in two phases. Phase I includes performing deepening and improvements at Berths 126-129, disposal of dredge material, expanding the West Basin Container Transfer Facility (WBCTF) by adding two loading tracks, demolishing the existing wharf and constructing a new wharf, replacing three of the eight existing 50 foot gauge container cranes with up to ten new 100-or 120 foot gauge cranes, installing associated infrastructure, and replacing and reconstructing asphalt and concrete to accommodate those changes. Phase II would demolish the existing wharf at Berths 121-126, cut back 3.7 acres of the land and create 2.1 acres of new land, construct a new, 1,400 foot long wharf, reconfigure the container yard, demolish existing buildings and construct new ones, and further expand and modernize the WBCTF.	<b>NOP</b>	05/12/2014

	treated wastewater, and utility lines. The CLSP EIR was certified in 2004; an addendum adopted in 2005; and the CLSP area was annexed into the City in 2005. Limited CLSP development has occurred to date.		
	The CLSP proposes use of recycled water for irrigation of public landscaping and potentially private yards. Temporary storage would be required for excess recycled water and during periods when irrigation is not feasible (e.g., during periods when of winter precipitation). Recycled water may also be disposed of through irrigation land. The CLSP EIR identifies six potential storage or disposal areas (413 acres within the northern portion of the CLSP and five areas outside of the CLSP area).		
2007032113	Eureka Road Widening Project (DGP 5075) Placer County Roseville--Placer The project proposes a Grading Permit to widen and improve a section of Eureka Road to accommodate future developments.	<b>NOD</b>	
2007072023	Modesto Master EIR Update and General Plan Amendment Modesto, City of Modesto--Stanislaus Rezone of a 1.81-acre vacant parcel located at 106 Hintze Avenue, east of McHenry Avenue, from Planned Development Zone, P-D(497) to Low Density Residential Zone, R-1, No development is proposed with this rezoning.	<b>NOD</b>	
2008032115	Westbrook Amendment to the Sierra Vista Specific Plan Roseville, City of Roseville--Placer The project is located in the north western portion of the City of Roseville. The Project consists of a mixed-use development on approximately 400 acres. The Project site is divided into two separate development phases as well as phased establishment of a 35.8 acre Wetland Preserve. The Project will permanently impact waters of the United States. A tiered Initial Study/Mitigated Negative Declaration was prepared to confirm that, pursuant to CEQA Guidelines section 15168(c), no impacts would be greater than identified in the previously certified EIR for Sierra Vista Specific Plan (SCH2008032115).	<b>NOD</b>	
2012092011	Troutdale Creek Bridge Replacement Project Caltrans #4 Calistoga--Napa The Project will demolish the existing Route 29 bridge over Troutdale Creek, and construct a new bridge along an improved alignment. The Project is located on Route 29 at the Troutdale Creek crossing in Napa County. CDFW is executing a Lake and Streambed Alteration Agreement No. 1600-2013-0453-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Caltrans.	<b>NOD</b>	
2013071049	Equestrian and Large Animal Overlay District Chino Hills, City of Chino Hills--San Bernardino The Equestrian and Large Animal Overlay Ordinance includes standards and parameters to preserve the City's equestrian heritage while ensuring, that the animals on a property and associated uses and operations do not create a negative impact on the environment and the surrounding community. The Equestrian and Large Animal Overlay District proposes to create five different overlay categories (or Levels) throughout the City, namely "Level 1", "Level 2",	<b>NOD</b>

<b><u>Documents Received on Friday, April 11, 2014</u></b>			
	"Level 3", "Bayberry", and "Boys Republic" (see Figure 1m Proposed Equestrian and Large Animal Overlay Areas). Each overlay Level will have standards for maximum number of animals allowed, permitted uses, and best management practices in order to comply with water quality requirements. The underlying General Plan Land Use and Zoning designation for the properties will not change; the purpose of the new Overlay is to permit equestrian and large animal businesses to operate while ensuring that they comply with water quality and other requirements.		
2013071080	Reservoir 4701-2 Coachella Valley Water District Indio--Riverside The California Department of Public Health (Department), as the responsible agency, will be issuing a water supply permit. The Coachella Valley Water District proposed project was for the construction of a 100,000 gallon, domestic water storage reservoir adjacent to existing Reservoir 4701.	<b>NOD</b>	
2014031015	Coachella Canal Water Conveyance System Relocation - SilverRock Coachella Valley Water District La Quinta--Riverside CVWD proposes the relocation and reconstruction of approximately 4,600 lineal feet of the Coachella Canal immediately parallel to the existing Canal within U.S. Bureau of Reclamation (USBR) right-of-way between the existing drop structure at Milepost 120.8 and the existing drop structure at Milepost 121.8. The project is located mostly within the SilverRock Resort and Golf Course in La Quinta, Riverside County, within portions of section 8 and 17, township 6 south, range 7 east, San Bernardino Base and Meridian (see Exhibit 1). Differential land subsidence has resulted in a loss of the original flow capacity of the Canal. The purpose of the project is to reestablish the original design flow rate of 480 cubic-feet per second in this section of the Canal. The existing section of Canal between the Milepost 120.8 drop structure and the Milepost 121.8 drop structure would be decommissioned through demolition and/or back-filling. The project includes the construction of a bridge across the new portion of the Canal at Avenue 54. Three power poles, currently located along the western USBR right-of-way near the existing drop structure at Milepost 121.8, will be relocated to the east side of the new Canal.	<b>NOD</b>	
2014049007	Camden Yards - GPA 2012-01; ZR 2310; SP 522; TSM 656 El Cajon, City of El Cajon--San Diego A general plan amendment, zone reclassification, specific plan, and tentative subdivision map for an 11-unit, common-interests residential development, in a fully-developed urban setting with no habitat value.	<b>NOD</b>	
2014049008	Robertson Ranch West Village Carlsbad, City of Carlsbad--San Diego CDFW is intending to execute Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code (# 1600-2013-0044-R6) to the project applicant, Rancho Costera, LLC. The project proposes to impact 0.81 acre of streambed, including 0.49 acre of permanent impact and 0.32 acre of temporary impact. The project also proposes to mitigate impacts with 1.40 acre of habitat restoration.	<b>NOD</b>

2014048113	<p>Perris II Desalter - Relocation Feasibility Eastern Municipal Water District Menifee--Riverside</p> <p>EMWD designed the Perris II Desalter to be located at the north east corner of Watson Road and Hull Road (adjacent to the existing Perris Valley Water Reclamation Facility) in the City of Perris. Recently, EMWD acquired property adjacent to the existing Perris I and Menifee Desalters, at the east end of Valley Boulevard at Murrieta Road in the City of Menifee. EMWD recognizes that having the three Desalters adjacent to each other would offer a number of synergies and advantages. The proposed study will evaluate the feasibility of siting the Perris II Desalter on the recently acquired property. The evaluation will include; (1) identifying the synergies and cost savings of constructing and operating Desalters adjacent to each other; (2) reviewing the Value Engineering recommendations for the original Perris II Desalter design; (3) evaluating the revisions needed for proposed pipelines to convey the raw water and finished water; and (4) identifying requirements to the existing CEQA/NEPA document completed in February 2006.</p>	<b>NOE</b>	
2014048114	<p>Temporary Emergency Permit for Treatment by Detonation, Naval Air Station (NAS) North Island Toxic Substances Control, Department of El Centro--Imperial</p> <p>DTSC has issued an Emergency Permit to NAS North Island located in San Diego, CA to treat hazardous waste by open detonation. The items to be treated are one (1) 3" projectile, nine (9) marine flares and one (1) flare kit. The items were discovered and recovered from both military and non-military sites and are current being stored at NAS North Island in an Explosive Ordnance and Disposal (EOD) safe holding area. The items will be transported to the Naval Air Facility (NAF) Bombing Range in El Centro, California where they will be treated by open detonation. Both transport and open detonation will be done following military protocols. NAS North Island EOD personnel have determined that the items are unstable and considered unsafe for continued storage. The NAF Bombing Range in El Centro has been chosen as the closest, safest, and most appropriate location for disposal.</p> <p>The Emergency Permit is effective from April 11, 2014 through July 9, 2014. Treatment is scheduled to occur within that timeframe. The treatment activities will be conducted by qualified EOD personnel. The detonation will be performed at the Naval Air Facility (NAF) in El Centro on an active EOD training area.</p>	<b>NOE</b>	
2014048115	<p>Becker Small Pond Project Fish &amp; Wildlife #3 St. Helena--Napa</p> <p>The project is located on an unnamed tributary to Conn Creek. The site is located at 1200 Rossi Road in Napa County; Assessor's Parcel Numbers 025-060-011. The project has an approximate Latitude of 38 degrees 32.117' N, and Longitude of 122 degrees 23.936' W. The pond is covered under a small domestic use registration (D032033) from the State Water Resources Control Board for storage and use of an on channel 1.6 acre-foot pond/reservoir. Water is diverted for domestic use using a 10 gallon per minute pump. An overflow channel conveys water to the unnamed downstream creek tributary to Conn Creek. CDFW is issuing a Streambed Alteration Agreement No. 1600-2013-0444-3 pursuant to Fish and Game Code Section 1602.</p>	<b>NOE</b>

Vanowen Street Los Angeles, City of --Los Angeles</p> <p>The project is to allow the sale of a full line of alcohol for off-site consumption in conjunction with an existing 26,800 sf warehouse style supermarket of which 14,000 sf is dedicated to retail space, 2,520 sf for office, and 9,718 sf warehouse/storage space. Hours of operation are from 9 am to 8 pm Monday through Saturday and 9 am to 7 pm on Sunday. No new construction or additions are proposed, just interior renovation and change of use (Certificate of Occupancy already issued) from manufacturing to retail/supermarket. The project requires a Conditional Use Permit for alcohol sales.</p>	<b>MND</b>	05/13/2014
2014041055	<p>ENV-2012-2582-MND / 135 and 139 N. Western Avenue Los Angeles, City of --Los Angeles</p> <p>The project is the proposed on-site sale of alcoholic beverages in conjunction with three proposed restaurants within a mini-shopping center. The site is currently developed with the Waa Waa Plaza mini-shopping center, which consists of three commercial buildings surrounding a central, shared surface parking lot. Since the application was originally filed, proposed Restaurant 1 (Unit 113) and proposed Restaurant 3 (Units 111 and 112) have since been developed as a Tom N' Toms Coffee shop and Issan Station Thai restaurant, respectively. Restaurant 2 (Unit 108) is currently vacant. Restaurant 1 is proposed to be a 6,008 sf restaurant with 264 seats (130 seat rooftop outdoor patio). Restaurant 2 is proposed to be a 4,066 sf restaurant with 198 seats. Restaurant 3 is proposed to be a 1,830 sf restaurant with 54 seats. The applicant is requesting a Master Conditional Use to permit the sale of alcoholic beverages at the three existing tenant spaces.</p>	<b>MND</b>	05/13/2014

2014041059	VTT-72647-SL, CPC-2014-196-VZC-BL-SPR-ZV-ZAA Los Angeles, City of Los Angeles, City of, Van Nuys--Los Angeles Demolition of an existing religious institution consisting of two one-story buildings and surface parking lots, the subdivision of an approximately 2.15-acre site to create 60 small lots for single-family dwelling purposes, and the construction, use and maintenance of 60 three-story, townhouse-style single-family dwellings with 130 on-site parking spaces, including two on-site parking spaces in an enclosed garage on the first level of each dwelling and ten guest parking spaces in a separate surface lot at the southeast corner of the site. Vehicular access to all dwellings and the guest parking area will be via a proposed common access driveway system providing access from Nordhoff Street. The project also includes site grading with the export of approximately 1,000 cubic yards of dirt and the removal of 32 non-protected trees.	<b>MND</b>	05/13/2014
2014041060	Morro Bay Watershed Road Erosion Prevention Project Coastal San Luis Resource Conservation District San Luis Obispo, Morro Bay--San Luis Obispo Project is part of watershed-wide approach to reduce sedimentation by preventing deliver through erosion control methods and capturing sediment through restoration of historic floodplain areas. Because of steep terrain, erosive soils, poor road design, and flashy rain events, many roads throughout the Chorro Creek watershed are now failing, delivering significant sources of sediment to nearby streams. The proposed project builds on ongoing efforts to implement cost-effective erosion control and erosion prevention work on roads identified as the largest contributors of sediment to fish-bearing streams. Road treatments are site-specific but all treatments are intended to make roads more resilient to large storms and flood flows by addressing sediment delivery at the source.	<b>MND</b>	05/13/2014

2013031022	<p>Corona Regional Medical Center Expansion Corona, City of Corona--Riverside</p> <p>Universal Health Services is proposing the expansion and renovation of the 47-year-old Corona Regional Medical Center (CRMC or the Hospital). The Hospital sits on more than 9 acres of UHS owned property located at 800 S. Main Street within the City of Corona, CA. The project is in response to community need and entails the phased construction and long-term operation of an expanded CRMC which will provide a total of thirty emergency rooms and 241 hospital beds for acute care, 50 licensed non-acute patient beds at full project build out by 2035, and approximately 490,000 total sf of medical-related uses for the expanded Hospital and new adjacent Medical Office Building. The project would involve a multi-phased expansion of the CRMC, thereby implementing UHS Inc. goals and growth strategies for full build-out of the CRMC by 2035. In addition, the partnership between CRMC and a local medical clinic group (to be determined at a later time) will serve to improve the delivery of health care to the greater Corona valley.</p>	<b>EIR</b>	05/29/2014
2014011059	<p>Pacific Pointe East Development Project Long Beach, City of Long Beach--Los Angeles</p> <p>The proposed Pacific Pointe East development is located on an unaddressed, approximately 25-acre parcel at the southeast corner of Lakewood Boulevard and Conant Street near the Long Beach Airport, with a Los Angeles County Assessor's ID Number of 7149-005-006. The proposed project involves three new industrial buildings on a site that is currently undeveloped with a paved surface parking lot. These buildings have an open floor plan and would be intended for light industrial, light manufacturing, warehouse, office, and/or research &amp; development land uses. The three buildings would have a maximum height of about 41 feet and total floor area of 494,000 sf.</p>	<b>EIR</b>	05/29/2014

2000092026	Elverta Specific Plan Amendment Sacramento County --Sacramento The 2007 Adopted Drainage Master Plan (DMP) for the Elverta Specific Plan relies on linear channelization three natural waterways that flow east-west through the plan area. These drainage facilities were planned as straight channels turning at right angles. The Amendment to the DMP would widen and modify the existing natural channels instead of creating deep, narrow linear channels. The Amended channel design includes the creation of a meandering low-flow channel, freshwater marsh, and other wetland and riparian areas within the new channel corridors.	<b>NOD</b>	
2006042175	Davis Woodland Water Supply Project (DWWSP) Davis, City of Woodland, Davis--Yolo This proposed project involves the construction of a new screened pumping facility and the demolition of the old existing structures.  The Project will result in impacts to 1.56 acres of Delta smelt ( <i>Hypomesus transpacificus</i> ) Central Valley spring-run Chinook salmon ( <i>Oncorhynchus tshawytscha</i> ), Sacramento River winter-run Chinook salmon ( <i>Oncorhynchus tshawytscha</i> ), Sacramento River winter-run Chinook salmon ( <i>Oncorhynchus tshawytscha</i> ), and the Giant garter snake ( <i>Thamnophis couchi gigas</i> ) habitat, including temporary impacts to 0.22 acres; the Project will permanently remove 0.83 acres of Shaded Riverine Aquatic habitat and 0.51 acres of giant garter snake aquatic habitat. The project is expected to result in incidental take of Delta smelt, Central Valley spring-run Chinook salmon, Sacramento River winter-run	<b>NOD</b>

	Chinook salmon, and Giant garter snakes, which are designated as threatened and endangered species under the California Endangered Species Act. The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.		
2008111025	Landfill Gas Renewable Energy Project at FRB Landfill Orange County Irvine--Orange The proposed project would allow for the development of a landfill gas renewable energy project at the FRB Landfill.	<b>NOD</b>	
2010081080	Alta La Jolla Drive Drainage Repair Phase II San Diego, City of La Jolla--San Diego CDFW is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code (#1600-2010-0053-R5) to the project applicant, City of San Diego, Engineering and Capital Projects. The applicant proposes to alter the stream to conduct earthwork to stabilize canyon slopes, repair and restore the severely incised drainage channel, construct a storm drain system to restore the hydraulics in the restore channel to pre-development conditions, construct a detention basin to improve water quality and to attenuate peak flood events to the extent possible, and restore degraded sensitive upland vegetation in the project footprint.	<b>NOD</b>	
2014012017	William Kent Campground Redevelopment Project Regional Water Quality Control Board, Region 6 (Lahontan), South Lake Tahoe --Placer The US Forest Service-LakeTahoe Basin Management Unit is planning to redevelop facilities and conduct water quality improvements at William Kent Campground property. The Project includes redesign and upgrade of campground facilities, day-use beach area water quality improvements, and restoration of stream environment zones within the campground.	<b>NOD</b>	
2014012021	Fair Oaks Boulevard-Day Avenue to Arden Way Project Sacramento County --Sacramento The project is called "Day Avenue to Arden Way", but while the improvements begin at Day Avenue they stop about 600 feet away from Arden Way. The proposed project involves the construction of pedestrian facilities and improvements in sections where facilities are lacking along the southeastern side of Fair Oaks Boulevard; facilities are absent and will be installed in the section from Day Drive to Jardin Lane and then in the section from Day Drive to Jardin Lane and then in the section from Elsdon Circle to about 330 feet beyond Elsdon Circle. The project does not involve changes to the existing sidewalk, curb and gutter from Jardin Lane to Elsdon Circle, because facilities already exist in this section. The project involves clearing and grubbing, traffic control, pavement removal, sidewalk construction, curb and gutter installation, ADA ramp construction, drain inlet and pipe installation, minor pavement repair, roadway restriping and bicycle lane improvements. The project will include improvements to enhance pedestrian and bicyclist safety and mobility, as follows: the creation of a 4-foot bicycle lane, the construction of a 3-foot Type 2 curb and gutter and the construction of a 4-foot sidewalk.	<b>NOD</b>

2014032032	2014 Tehama-Colusa Canal Authority Water Transfers Tehama Colusa Canal Authority --Glenn The Tehama-Colusa Canal Authority (TCCA) and its Member Units will experience serves water shortages in 2014 and are soliciting willing sellers to transfer water. A number of entities have expressed interest in transferring water to the Member Units of the TCCA. The project includes transfers of Central Valley Project (CVP) water or transfers that require the use of SVP facilities. The water would be made available for transfer through cropland idling/crop shifting and groundwater substitution.	<b>NOD</b>	
2014048135	Stout Grove Trail Repair Parks and Recreation, Department of --Del Norte Reestablish a section (5 feet wide by 30 feet in length) of Stout Grove Trail, in Jedediah Smith Redwoods State Park, Del Norte County, which was damaged when a large, 25-30 foot diameter- at - breast - height redwood tree fell. The purpose of this project is to repair, and return continuity to, the existing trail alignment.  Due to the large diameter and ecological and aesthetic value of the tree, the trail section reroute will be established to follow alongside the fallen tree. The realignment will require the removal of two redwood logs, three feet in diameter by ten feet in length, and one damaged bay laurel.	<b>NOE</b>	
2014048136	Letter of Non-Objection to Enter and Conduct Archaeological Surveys for Lake Minerals Road on State-Owned Sovereign Lands on the Historic Bed of Owens Lake California State Lands Commission --Inyo Authorize permission to enter property to conduct the archaeological surveys beginning the date of the California State Lands receipt from LADWP executed copy of the letter of non-objection, and will be effective through September 30 2014.	<b>NOE</b>	
2014048137	Blg Lagoon Bog Exotic Plant Removal Parks and Recreation, Department of --Humboldt Remove exotic plants from an approximately 3-acre project area within the Big Lagoon bog and the immediately adjacent coastal scrub and forest in Harry A. Merlo State Recreation Area (HMSRA). The project consists of removing exotic plants with hand tools (e.g. shovel, chainsaw, Pulaski) from within the project area and restoring the integrity of the bog.  Excavation will not exceed 24 inches. Chainsaws will be used to remove the upper portion of the plant and digging tools will be used to remove the root ball. An alternate method for removal should cultural resources restrict excavation would be to cut the vegetation to the ground and cover with tarps.	<b>NOE</b>	
2014048138	Lake Almanor Spillway Bridge Caltrans #2 --Plumas The California Department of Transportation (Caltrans), plans to conduct subsurface investigations at the Lake Almanor Spillway Bridge (BR.#09-0044) on	<b>NOE</b>
