

Jerry Brown, Governor

STATE CLEARINGHOUSE

NEWSLETTER

April 16 – 30, 2011

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **April 16 – 30, 2011**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Director

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 212) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 2010 CEQA Guidelines are available from the Resources Agency's website at

<http://ceres.ca.gov/ceqa/>.

2011 CEQA Guidelines will be available soon.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

MEMORANDUM

DATE: July 1, 2010
TO: State Agency CEQA and Intergovernmental Review Coordinators
FROM: Scott Morgan, State Clearinghouse Director
SUBJECT: Distribution of Environmental Documents in CD-ROM Format

The State Clearinghouse has distributed EIR's and EIS's in CD-ROM format for state agency review and comment since August 1, 2003. Based on our experience with those documents, a survey conducted of state reviewing agencies and the cost savings to local and state agencies, we extended this policy to other environmental documents including Negative Declarations, Mitigated Negative Declarations and Environmental Assessments. CD-ROMs are cheaper for the lead agency to reproduce and mail, and cheaper for the State Clearinghouse to distribute, especially in the case of multi-volume documents.

The State Clearinghouse will accept environmental documents on CD-ROM under the following terms:

- Lead agencies must provide fifteen (15) copies of the CD-ROM to the State Clearinghouse. In addition, each CD-ROM must be accompanied by 15 *printed* copies of the DEIR summary (as described in CEQA Guidelines §15123), executive summary, or introduction section of a Negative Declaration or Mitigated Negative Declaration. The State Clearinghouse has created a Summary for Electronic Submittal Form that may be used as a summary for any project submitted on CD-ROM. The Summary for Electronic Submittal Form is available at www.opr.ca.gov. A printed summary allows both the State Clearinghouse and agency CEQA coordinators to distribute the documents quickly without the use of a computer.
- The document must be on a CD-ROM in a common file format such as Microsoft Word or Acrobat PDF.
- Final environmental documents may be provided in CD-ROM format without a printed summary. Distribution of the final documents is optional under CEQA.
- Federal lead agencies may send electronic copies of environmental documents to the State Clearinghouse in the same manner described for CEQA lead agencies. Distribution of NEPA documents to state agencies through the State Clearinghouse is encouraged pursuant to Presidential Executive Order 12372 and NEPA §102 (42 USC §4332)
- All notices of preparation must continue to be provided in printed format.
- One Notice of Completion Form must be provided with all document submittals.

If your agency has difficulty downloading and reviewing any environmental documents please contact:

Scott Morgan, State Clearinghouse Director
916-445-0613
scott.morgan@opr.ca.gov .

Thank you for your cooperation in the CEQA review process.

CEQA Documents

<u>Documents Received on Monday, April 18, 2011</u>			
2011044004	California Valley Solar Ranch Project Energy, Department of --San Luis Obispo, Kern Note: Review Per Lead	EA	05/16/2011
	<p>The California Valley Solar Ranch Project includes construction of a 250-MW solar PV electricity generating facility on previously disturbed, former agricultural land and the construction of related electrical transmission facilities. The Project also includes construction of a 4-mile 230-kilovolt (kV) interconnection line to connect to PG&E's existing Morrow Bay-Midway transmission line. As part of the Project, a 35-mile segment of the Morro Bay-Midway transmission line would be reconducted (upgraded), traversing from San Luis Obispo County to Kern County. To produce aggregate base for access road construction, the Twisselman aggregate mine would be established nearby on the site of an existing borrow pit (addressed as a connected action in the EA).</p>		
2009012021	Improvements at SR-17/I-280/I-880 and I-880/Stevens Creek Boulevard Interchanges Caltrans #4 San Jose, Burbank--Santa Clara Note: Shortened Review	EIR	05/17/2011
	<p>The Build Alternative would construct improvement to the SR-17/I-280/I-880, I-280/Winchester Boulevard, and I-88-/Stevens Creek Boulevard Interchanges in the City of San Jose. The improvements include the reconfiguration of the I-880/Stevens Creek Boulevard interchange and the construction of the northbound I-280 to northbound I-880 direct connector ramp.</p>		
2010031022	EIR 09-10 SSK: SPA 17, ZCC 34, CUP 28, Map 232; SPA 3, ZCC 13, CUP 8, Map 233 Kern County --Kern, Los Angeles	EIR	06/01/2011
	<p>A Specific Plan Amendment to the Willow Springs Specific Plan, Zone Change, Conditional Use Permit for 5,400 acres, and cancellation of Williamson Act Land Use Contracts for portions of the site to allow for construction of a 650 MW photovoltaic solar facility.</p>		
2011032070	Trail Change in Use and Improvement Project Samuel P. Taylor Parks and Recreation, Department of --Marin Note: Extended Review Note: Reference SCH #2009058116	EIR	07/01/2011
	<p>Bill's Trail is currently used by equestrians and hikers only. More recently mountain biking interest groups have petitioned to open Bill's Trail to biking as well. DPR proposes to change the use of Bill's Trail to allow mountain biking in addition to hiking and horseback riding making the trail consistent with the Department's policy to construct multiple use trails. In order to convert the trail to Class I that would allow mountain biking, DPR must "catch up" with the deferred maintenance that has narrowed the trail, reduced drainage function, allowed exotic species to flourish and reduced user safety.</p>

Documents Received during the Period: 04/16/2011 - 04/30/2011

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<u>Documents Received on Monday, April 18, 2011</u>			
	Bill's Trail has a constructed width of 48", the standard for multi-use trails in State Parks and continues nearly four (4) miles between the trail head in Devil's Gulch and the junction with the Barnabe Fire Road at 1,160-foot elevation.		
2007071039	Vista Canyon and Ancillary Annexation Areas (Fair Oaks Ranch, Sand Canyon, and Jakes Way) Santa Clarita, City of Santa Clarita--Los Angeles Note: 1 CD The project site is mostly undeveloped and located in an unincorporated portion of the County of Los Angeles. A single family residence and outside storage yard presently is located on a portion of the project site. The applicant is requesting approval to amend the City of Santa Clarita Plan, and to pre-zone the project site Specific Plan (SP) and annex approximately 185 acres of land into the City of Santa Clarita (City). The applicant also is requesting approval of a Tentative Tract Map, Conditional Use Permit (CUP), and Oak Tree Permit to allow for the construction of a mixed-use/transit-oriented development consisting of 1,117 residential dwelling units and up to 950,000 square feet of commercial, retail, theater, and hotel uses within four Planning Areas on site. A residential overlay over the corporate office lots would permit the conversion of 250,000 square feet of office floor area to 233 multi-family residential units, resulting in a project mix of 1,350 residential units and 700,000 square feet of commercial floor area.	FIN	
2010111012	Westbound On-Ramp at Grand Avenue/State Route 60 Interchange Improvements Project Caltrans #7 Industry, Diamond Bar--Los Angeles NOTE: FONSI of a Notice of Availability NOTE: Joint Document: MND/EA Caltrans proposes to construct a direct westbound on-ramp to State Route 60 at the Grand Avenue interchange to improve its geometric and operational deficiencies. The project site is located in the cities of Industry and Diamond Bar in Los Angeles County, approximately at the midpoint of the two-mile common alignment of the State Route 57 and State Route 60 freeways. In addition, minor improvements along Grand Avenue will consist of additional left and right turn lanes to the eastbound and westbound on-ramps, respectively. Drainage improvement will also be included throughout the project area.	FON	
2011042049	Taylor Minor Subdivision Humboldt County --Humboldt A Minor Subdivision to divide an approximately 17.3 acre parcel into two parcels of 2.0 acres and 15.3 acres. The parcel is currently developed with several legal, non-conforming residences, specifically eight (8) single family residences, one duplex, three (3) garages and a barn. Seven (7) residences and two (2) garages are proposed to remain on proposed Parcel 1. A manufactured home is proposed to be removed on proposed Parcel 2 such that it can be replaced with a new single family residence. The duplex on proposed Parcel 2 will be converted to secondary dwelling unit and the barn will remain. All development is currently served with water and sewer by McKinleyville Community Services District.	MND	05/17/2011

2011042052	Elizabeth George - Loma Rica Intertie Pump Station Project Nevada Irrigation District Grass Valley--Nevada NID is proposing to construct the Elizabeth George - Loma Rica Intertie Pump Station to increase water supply reliability in the NID water distribution system. The proposed project will allow the Elizabeth George WTP to supplement the Loma Rica WTP capacity as needed.	MND	05/17/2011
2011042053	PA-1000131 Truck Stop San Joaquin County Lodi--San Joaquin This project is a Use Permit for truck stop that will include a 7,700 square foot convenience store with an attached 3,000 square foot fast food restaurant, a 3,500 square foot maintenance building, and a 1,200 square foot storage building. The project is expected to generate 1,133 new daily trips including 77 new AM and 95 new PM peak-hour trips. The project site is currently vacant. This project is not under Williamson Act contract. The project is located on the east side of Thornton Road, 800 feet north of State Route 12, west of Lodi, near I-5 in Flag City.	MND	05/17/2011
1998052052	Pacific Herring Commercial Fishing Regulations Fish & Game Commission -- The Fish and Game Commission will be the lead agency and the Department of Fish and Game will prepare environmental document for commercial herring fishing in California's ocean waters for 2011-2012 season. This document supplements the revised environmental document certified by the Commission in August 1998, as well as the Supplemental Environmental Documents certified by the Commission in August 1999 through 2010. The project to be described is commercial fishing as an element of the Department's Pacific herring management program. The locations of the project are San Francisco Bay, Tomales Bay, Humboldt Bay and Crescent City Harbor.	NOP	05/17/2011
2011052051	Chinese Hospital Replacemnt Project - 835-845 Jackson Street San Francisco, City and County of San Francisco--San Francisco The proposed project includes demolition of the 1925 MAB at 835 Jackson Street and the Chinese Hospital Parking Garage on the main project site and construction of a 54-bed acute-care Replacement Hospital building with a new 22-bed skilled nursing facility in place of the demolished buildings. The replacement hospital would be approximately 101,545 gsf in size with seven stories and a basement. The replacement hospital would be approximately 90.5 feet tall (excluding a 30-foot-tall mechanical penthouse on top of the roof). The 1979 Chinese Hospital building would remain in operation until the proposed Replacement Hospital building is fully functional; the 1979 hospital building would then be renovated to serve as a Medical Administration and Outpatient Center (MAOC). Interior circulation between the proposed Replacement Hospital building and the renovated MAOC would be provided.	NOP	05/17/2011

2011042051	Brown Vineyard Conversion Napa County --Napa The applicant proposes to convert 34.6 acres to vineyards on a 95.64-acre holding. The Erosion Control Plan Application includes construction plans, specifications and erosion and sediment mitigation measures for the vineyards. The site plan designates 7 vineyard blocks, on topography that ranges from gently to steeply sloping lands, at elevation between approximately 780 and 960 feet above mean sea level. The Assessor's Parcel Number for the site is 018-090-082; 018-310-009 & -010.	Neg	05/17/2011
1983091212	320 ACRE WIND FARM/MOJAVE/ Kern County -- The applicant proposes to construct a wind energy farm on 320 acres. The project includes a change of Zone from A-I (Light Agricultural) to A W-E (Exclusive Agricultural - Wind Energy).	NOD	
2002021120	Irvine Ranch Water District San Diego Creek Watershed Natural Treatment System (NTS) Irvine Ranch Water District Irvine, Tustin, Lake Forest, Laguna Hills, Laguna Woods, ...--Orange The project involves installation of an infiltration gallery and discharge structure within Peters Canyon Wash for Irvine Ranch Water District's Cienega Selenium Treatment Facility. The influent structure will be installed approximately 60-feet upstream of an existing check dam, and is composed of twelve, slotted, 12-inch stainless steel pipes, installed perpendicular to the invert of Peters Canyon Wash. Each pipe will be approximately 110-feet long, and the twelve pipes will be placed 20-feet apart. The pipes will be buried in a 3-foot filter bed and covered by 1/4 ton of rip rap. The twelve infiltration pipes will gravity feed into four manholes, which will gravity feed into one 24-inch PVC header pipe. The PVC header pipe will discharge into a pump station wet well which will pump the water to the treatment system for selenium removal.	NOD	
2007071096	Mesquite Regional Landfill CUP #06-0003 Imperial County --Imperial, San Bernardino, Riverside The Mesquite Regional Landfill was originally permitted under CUP #1036-91 for receipt of municipal solid waste (MSW) by rail of up to 20,000 tons per day in five trains per day along with 1,000 tons of MSW per day from Imperial County. The current CUP #06-0003 is amending the previous CUP to allow trucking of up to 4,000 tons per day of MSW and treated ash to the landfill site. The County Planning Commission recommended approval of February 9, 2011, and the Board of Supervisors approved the environmental document and the CUP #06-0003 on April 5, 2011. The site is located on a portion of 4,250 acres that includes the Mesquite Gold Mine, Assessor's Parcel Number 039-340-027-000, et. seq. and is within Township 1e South, Range 19 East, SBB&M.	NOD

	single-family lots and related infrastructure to facilitate construction of 112 custom and semi-custom homes.		
2010031086	El Dorado High School Practice Gymnasium & District Performing Arts Center Placentia-Yorba Linda Unified School District Placentia--Orange Construct a 600-seat performing arts center (PAC) at EDHS. The project involves reconfiguration of the existing Lot A and Lot B, removal and relocation of existing portable classrooms, and relocation of two tennis courts. The PAC encompasses 18,000 SF and would serve all District students for various events such as drama, musical, band, choir, and speech performances. The parking lot reconfiguration would require relocation of the two northern most tennis courts to the east of the existing tennis courts, thereby connecting Lot A and Lot B, and thus providing a combined total of 499 spaces in Lot A and Lot B. No change to Lot C is required. The project would limit access to Driveway 3 (center driveway) to emergency trucks and buses only and divert traffic to Driveway 1 and Driveway 2 for Lot A and Lot B access.	NOD	
2010101058	Interstate 215 Widening Project Scott Road to Nuevo Road Caltrans #8 Perris, Menifee, Murrieta--Riverside The California Department of Transportation (the Department), in cooperation with the Riverside County Transportation Commission (RCTC). Propose to widen Interstate 215 (I-215) from Scott Road to Nuevo Road Riverside County. I-215 would be widened from two to three lanes both the northbound and southbound directions by adding a third mixed-flow lane. The total length of the project is approximately 14.3 miles (post mile 14.2 to 28.5).	NOD	
2010111012	Westbound On-Ramp at Grand Avenue/State Route 60 Interchange Improvements Project Caltrans #7 Industry, Diamond Bar--Los Angeles Caltrans proposes to construct a direct westbound on-ramp to SR 60 at the Grand Avenue interchange, which is located in the City of Industry.	NOD	
2011011008	Adoption of Addendum No. 4 to Cleanup and Abatement Order No. R9-2004-0258 Directing Cleanup and Abatement of Waste Regional Water Quality Control Board, Region 9 (San Diego), San Diego San Diego--San Diego Adoption of Addendum No. 4 to Cleanup and Abatement Order No. R9-2004-0258 which addresses the cleanup and abatement of waste discharged to land at the former Teledyne Ryan Aeronautical (TDY) site located at 2701 North Harbor Drive, San Diego, CA.	NOD	
2011012059	Humboldt Regional Food Waste Digester Humboldt County Waste Management Authority Eureka--Humboldt The HWMA is developing a regional food waste anaerobic digester facility that will convert food waste (diverted from the waste stream) into renewable energy and fertilizer. The proposed facility will have an ultimate capacity of 60 tons per day of source separated food waste, fats, oils and grease as well as other industrial organic waste streams.	NOD

2011048188	Water Meter Project for Industrial and Commercial Enterprises Brawley, City of Brawley--Imperial The City desires to embrace the provision and protection of the drinking water supplied to the consumers of its water treatment and water distribution system. The City proposes to meter all commercial, industrial, parks, and school entities. This will allow the City to properly evaluate consumption. The City is currently mandated by state requirements to install water meter on all commercial, industrial, schools and park facilities. This will enhance the City's water conservation efforts by properly meter its consumption.	NOE

2011041056	Engh Farms (Geothermal Permit #11-0001/Six Major Exploratory Wells) Imperial County --Imperial It is the intent of the applicant to drill, sample, flow test and monitor up to six geothermal exploratory wells to determine the potential geothermal resource in this area. Each well site, approximately 4.6 acres (500 feet by 400 feet) in size, will be prepared to create a level pad for the drill rig, and a graded surface for the support equipment. Containment basins will be constructed at each site for the containment and temporary storage of drilling mud and cuttings and storm water runoff from the constructed site. Each containment basin will be approximately 80 feet by 400 feet by 7 feet deep with a 2 foot freeboard. The access to each well pad/site location will be off of County-maintained roads, i.e. English road for Well Sites 3 and 4 and McDonald Road for Well Sites 1 and 2. The drilling time at each well pad is estimated to be about 60 days. 24 hours per day, 7 days per week with approximately 9 to 18 workers on location at any given time.	MND	05/18/2011

2011041057	ILWU Local 13 Dispatch Hall Los Angeles, City of Los Angeles, City of--Los Angeles Note: Shortened Review The proposed project involves site preparation activities and construction of a two-storied steel framed 32,565 square foot ILWU Local 13 Dispatch Hall to provide a meeting space and administrative offices for dispatching longshore workers at 1500 E. Anaheim St in Wilmington. The proposed ILWU Local 13 Dispatch Hall would have a total occupancy of 2,962 (2,307 on the dispatch floor). The proposed project would include construction of a dedicated on-site parking lot (812 spaces) with outdoor lighting, which would be enclosed by a 6-foot metal fence and parking lot entrances secured by 6-foot-high rolling gates. As a related project, the proposed project would construct improvements for a future bike path along Alameda and Anaheim Streets.	MND	05/09/2011
2011041058	4201 E. Willow Street Mixed Use Project Long Beach, City of Long Beach--Los Angeles The proposed project is mixed-se development that would include a 9,121 square feet (sf) retail building and a 4,296 sf automated car wash. There will be 67 parking spaces on site after project implementation, including 14 spaces for the car wash and 53 spaces for the retail uses. Due to the unique architecture and potential historic significance of the existing buildings and features, the project would reuse the entire Ray Vines Chrysler Plymouth Dealership showroom building and the original pole sign. The adaptive reuse of the showroom would retain all the Google elements of the design that make the property eligible for the California Register, including the entire west wall with decorative concrete block. The proposed project is expected to be operational by May 2012. The project site is not listed as a hazardous waste site under Government Code Section 65962.5.	MND	05/18/2011
2011042054	Use Permit #11-1-1 (Bristol 1), Royale Energy, ED #11-4 Colusa County Williams--Colusa The project will consist of the construction of a production natural gas well. The project will be located on a 150-foot by 150-foot (22,500-square feet) lease area of an approximately 40-acre parcel. The production equipment will not require the entire approximate 1-acre site. Production equipment will include as well head, heater/separator, dehydrator, compressor, 200 barrel water storage tank, and flow meter. Other ground disturbing activities include the digging of a water sump trench and trenching for gas distribution lines.	MND	05/18/2011

within the interstitial spaces of the trashracks. Due to the high volume of aquatic weeds, the current system has been insufficient to remove the debris. Damages to the removal system, predominantly the chains, have occurred frequently and mandated outages for repair work. The trashrack and trashrake replacement project for the site will include a new trashraking system and trashracks to replace the existing system at three of the four bays located at the check structure. The fourth bay has been decommissioned and will not be in this project.

2011048191	<p>Mount Bullion Conservation Camp - Propane Gas Line Replacement Project Forestry and Fire Protection, Board of --Mariposa</p> <p>Replace the existing propane gas line that services the Mt. Bullion conservation Camp, 5730 Mount Bullion Access Road Mariposa, CA 95338. This facility is located approximately 3.4 miles north of Highway 49. The existing underground propane gas line is leaking. This condition is a health and safety threat. This project would replace the underground gas propane steel pipe with 1 1/4 inch HDPE (plastic pipe). There is no proposed or expected increase in capacity. The replacement of pipe system will involve the excavation of a trench 3 feet deep, approximately 1800 feet long and 2 feet or less in width (with backhoe), installing the pipe, and backfilling and compacting the trench. The old pipe will be abandoned in place. The new pipe will feed existing buildings as close as possible to the structures and existing points of connections.</p>	NOE

	and institutional use on a 23.8 parcel located on the east side of I-805, northwest of Dennerly Road and south of the Otay River. The site is located in the Otay Mesa community planning area. The project is anticipated to include a religious facility on a 5 net-acre lot (Lot 1) and neighborhood park on an 11 net-acre lot (Lot 2); however, no specific plans have been prepared for either use.		
2008052103	Kaiser Center Office Project Oakland, City of Oakland--Alameda FYI: Final	FIN	
	The Proposed Project includes a Vesting Tentative Parcel Map, Planned Unit Development Permit, and a Preliminary Development Plan that would add two new office towers to a 2.2 acre portion of the existing 7.2 Kaiser Center site. The project includes 1) demolition of 280,000sf of existing retail/commercial development along 20th and Webster streets; 2) construction of a new 24-story office tower (469 ft height); 3) construction of a 42-story (573 ft high) office tower; 4) construction of 46,200sf of ground floor and mid-level retail; 5) addition of 697 parking spaces; and 5) expansion of the rooftop garden by approximately 4,500 sf.		
2011041061	Topanga Underground Utility District (UUD) Project Los Angeles County --Los Angeles Los Angeles County is proposing a resolution to establish the Topanga UUD along Old Topanga Canyon Road and Topanga Canyon Boulevard. The proposed project would relocate overhead utility distribution lines along Old Topanga Canyon Road and Topanga Canyon Boulevard. Those utility lines that currently cross aerially over Topanga Creek at the bridge just north of Topanga Canyon Boulevard on Old Topanga Canyon Road would be placed alongside the bridge via a utility conduit. All other utility lines, would be placed underground primarily within the existing right-of-way. The proposed Topanga UUD is approximately 3.6 acres. The proposed project would remove 28 existing utility poles, which is comprised of approximately 2,100 linear feet of overhead utility distribution conductor lines.	MND	05/19/2011
2011041062	EA-899 - Chevron Regional Optimization Center (R.O.C.) El Segundo, City of El Segundo--Los Angeles The proposed project consists of an Environmental Assessment for the construction of a 38,000 square-foot Refinery Optimization Center (ROC) building to serve as the operations center for most of the Chevron refinery. The ROC building operations will be housed in a modern computer control room and the remainder of the building will house support staff for the operators, computer infrastructure, and communications. The building will be staffed 24 hours a day, 365 days a year. The daytime shifts will employ approximately 65 personnel, while the night-time shifts will employ fewer personnel. The maximum number of persons in the building at any time will not exceed 135. The refinery control operations are currently dispersed into several buildings throughout the subject property. The ROC building is intended to consolidate those functions to one location and replace the existing buildings. All the personnel anticipated to work at the ROC building are current employees performing the same work at other locations on the refinery property.	MND	05/19/2011

<u>Documents Received on Wednesday, April 20, 2011</u>			
2011042067	Laird Family Vineyard - Vineyard Conversion #P10-00224-ECPA Napa County American Canyon--Napa The project includes the conversion of non-native grassland to 42.6 acres consists of 4.0 acres planted without the benefit of an erosion control plan, the replant of 12.7 acres of existing vineyard planted without the benefit of an approved Track II erosion control plant, and then redevelopment of 3.1 acres of existing vineyard planted prior to 1993, and the development of 22.8 acres of new infill vineyard within existing blocks within a 354.95-acre parcel. The project proposes the maintenance of existing and proposed erosion control measures within six vineyard blocks with topography ranging from gently to moderately sloping (slopes typically 2% to 27%) non-native grassland at elevations between approximately 160 and 265 feet above mean sea level.	MND	05/19/2011
2011042068	Laguna Treatment Plant Driveway Widening Santa Rosa, City of Santa Rosa--Sonoma The project proposes to cap and abandon the existing northern inlet and storm drain in favor of routing water from the existing and new impervious surfaces on the northern portion of the driveway through a "over side drain" or curb inlet and into the ditch below. This will allow landscaped based treatment of the runoff and ground water recharge of the water from the northern side of the drive to occur. The existing drain inlet connected to the 42" concrete pipe currently serving the ditch would provide for water conveyance during large storm events and times of high water flows. Portions of the southern driveway expansion would continue to be served by the existing catch basin blind connected to the larger concrete storm drain while the areas further south along Llano Road will be served by a new curb drain which conveys any remaining water into the ditch below, also allowing land based treatment of the runoff and ground water recharge of the water from the southern side of the drive along Llano Road.	MND	05/19/2011
2011042071	Fisherman's Wharf Public Realm Plan San Francisco, City and County of San Francisco--San Francisco The project sponsor, the Planning Department, on behalf of the City and County of San Francisco, is proposing the Fisherman's Wharf Public Realm Plan ("FWPRP or proposed project"). The San Francisco Planning Department is the lead agency under the California Environmental Quality Act (CEQA). The proposed project's general boundaries are San Francisco Bay to the north. The Embarcadero to the east, Bay Street to the south, and Van Ness Avenue to the west. The FWPRP would provide an overall vision for the streets, open spaces and building design in Fisherman's Wharf. The Plan would adopt design guidelines, minor zoning changes and policies to the Plan Area. It would also implement parking signage program, traffic circulation plan, passenger and freight loading management, two neighborhood gateway improvement projects, nine streetscape improvement projects and three open space improvement projects to the neighborhood. The FWPRP would include the following design elements: realignment of streetcar rails on Jefferson Street, street trees; raised crosswalks, curb extensions; high visibility crosswalks; permeable paving, stormwater planters and other landscape improvements; seating; informational stationary signage; and pedestrian lighting. 2008082041	<p>El Dorado Canal 2011-2012 Flume Replacement Program El Dorado Irrigation District --El Dorado</p> <p>The project involves replacing Flumes 39-40, 41, construction of two staging areas along Rock Crusher Road and one staging area on the canal, and improving Rock Crusher Road for safe equipment access to the Flume 41 site. Additional access and staging locations for each replacement would be at existing roads, road turnouts, and helispots identified in the EID Transportation System Management Plan (TSMP), approved by FERC, which regulates the hydroelectric operations of Project 184 and include: staging areas at the Sierra Pacific Industries (SPI) privately owned site, Sand Flat site, Alder Spoils site, and areas along the Canal bench. Helicopter use would be required during construction activities.</p>	NOP	05/19/2011
2011041059	<p>John B. Pires Dairy Expansion Merced County Gustine--Merced</p> <p>Conditional Use Permit CUP 10-007 proposes to bring the existing dairy facility into compliance with Merced County's permit requirements, and to expand the existing dairy so that the modified dairy would house a total 6,050 animals. This would represent an increase of 1,036 animals from existing numbers. The proposed project would include construction of approximately 120,000 sq. ft. of heifer pens and a cattle shade adjacent to the north edge of the operation. Construction of the proposed structures (in addition to ancillary dirt roadways & operation staging areas) would convert approximately 12 acres of existing cropland to active dairy facilities, increasing the area of operation from 53 to 65 acres.</p>	NOP	05/19/2011
2011041060	<p>Calexico Zoning Ordinance Update Calexico, City of Calexico--Imperial</p> <p>The proposed project analyzed in this IS/ND is the adoption and implementation of the City of Calexico's (City) Zoning Ordinance and Zoning Map Update. The existing Zoning Ordinance was adopted by the City in 1992. The City's General plan was updated in 2007 and was analyzed in a programmatic EIR that assessed the environmental impacts resulting from the development of land uses and implementation of policies established by the general Plan (Calexico 2007a). The Zoning Ordinance Update is intended to implement the new land uses and policies established by the General Plan.</p> <p>A city's zoning ordinance provides regulations by which a city can regulate land use. Typical zoning ordinances include both text regulations and a zoning map. Types of regulations in an ordinance include allowed uses, heights, setbacks and lot coverage. The purpose of zoning is to promote and protect public health, safety, and welfare, and to safeguard and enhance the appearance and quality of development within the City. State law requires that zoning on any parcel be in conformance with the city's general plan land use designation (Section 65860 of the Government Code).</p>	Neg	05/19/2011

2009072008	Pinoleville Pomo Nation Casino Project Pinoleville Pomo Nation Ukiah--Mendocino Note: Final FYI The Tribe proposes to develop a casino and hotel complex in central Mendocino County, approximately one mile north of the City of Ukiah, California. The Proposed Project consists of the development of a new approximately 90,000 square foot (sq. ft.) casino and operational support structure. There would be approximately 28,500 sq. ft. of gaming floor and another 61,000 sq. ft. of associated facilities including food and beverage services, retail space, and banquet/meeting space. Food and beverage facilities would include a buffet, a specialty restaurant and a lounge. A four-story hotel containing 125 guest rooms is proposed for the northern portion of the project site.	FIN	
2011041063	Madison Lane Street Improvements Project and Assessment District Monterey County Salinas--Monterey The Redevelopment Agency of the County of Monterey (hereinafter referred to as the "Agency") is proposing the construction of the Madison lane Street improvement Project ("Project"). The Project is then proposed to be acquired by the County of Monterey through the creation and implementation of a benefit assessment district ("District").	MND	05/20/2011
2011041070	Groundwater Extraction Well Number 93 and Appurtenances Eastern Municipal Water District --Riverside EMWD intends to construct and operate a groundwater extraction well and appurtenances on APN 307-210-024 in the community of Nuevo. The purpose of the extraction well is provide EMWD with an additional water supply while at the same time remove total dissolved solids and nitrogen from the groundwater basin. The well casing diameter would be up to 18 inches and would extend between 350 and 550 feet below ground surface. It would produce between 500 and 1500 gpm of brackish water for feed to EMWD's brackish groundwater desalters. A 12-inch diameter pipeline would connect the well to EMWD's existing 24-inch diameter transmission main in Nuevo Road.	MND	05/20/2011
2011041071	Temescal Canyon Road Improvement Project ("Project") Riverside County --Riverside The Temescal Canyon Road Improvement Project ("Project") consists of the widening of a two lane road to a "modified" Major Highway. The four lane road will range from a minimum eighty-six foot (86') to a maximum ninety-three foot (93') right-of-way along the road improvement section. The Project also includes the addition of sidewalk, curbs, and gutters for public safety purposes, the relocation of a 14" Elsinore Valley Water District gravity agricultural line, and the construction of a 12" Lee Lake Water District non-potable reclaimed water line which is to be operated and maintained by the Lee Lake Water District. 2011042075	Use Permit Application UP-10-10, by B&L Motels, Inc. Redding, City of Redding--Shasta The project proponent is requesting approval for construction of a 64-room, 3-story hotel of approximately 38,000 square feet in size. The hotel includes a continental breakfast area, board room, and indoor pool and exercise room.	MND	05/23/2011
2004052060	Canyon Springs Subdivision (formerly Tahoe Boca) Truckee, City of Truckee--Nevada The project would include a total of 185 residential lots comprised of 177 for-sale single-family parcels ranging in size from 14,000 to 31,000 square feet and eight affordable housing parcels to be sold, developed, or donated for future multi-family attached housing. In addition, the project would include approximately 175 acres of public open space and 4 miles of on-site trails. The site is comprised of 283.76 acres located at the most-northeastern corner of Truckee within the town boundaries. Of the approximately 285-acre site, roughly 213 acres are located in the RS-1.0 (single-family residential, one dwelling unit per acre) zoning district and 70 acres are located in the Open Space (OS) zoning district. The 2025 General Plan land use designations are Residential (0.5 to 1 dwelling unit per acre) and Resource Conservation/Open Space.	NOP	05/20/2011
2010042063	Permanente Quarry Comprehensive Reclamation Plan Amendment Santa Clara County Cupertino--Santa Clara Proposal is to amend the 1985 Reclamation Plan to include the areas mined outside of the existing reclamation plan boundary and a Use Permit for a proposed mining area located south of Permanente Creek. New mining area will be located adjacent to Permanente Creek, approximately 100 feet, requiring a new bridge crossing, and cut slopes to the top of the ridge. The reclamation includes grading and revegetation of cut and fill areas of both the new mining location adjacent to Permanente Kaiser Cement plant, and some structures when Henry Kaiser acquired property including 1890's wagon road, Kaiser cabin, sugar shack.	NOP	05/20/2011
2011041064	Orange and Central Apartment Project Glendale, City of Glendale--Los Angeles The proposed project is a multi-family residential development that would consist of two separate five-story buildings connected by a pedestrian bridge over an existing public alley on the second floor. The proposed project would contain a total of 306 residential units and three live-work units in two buildings. The proposed building on Parcel A would include 103 multi-family residential units, plus three live-work units on the ground level facing Central Avenue. These proposed 103 multi-family residential units would consist of 78 studio and one-bedroom units and 25 two-bedroom units. The proposed building on Parcel B would include 203 multi-family residential units. These proposed 203 multi-family residential units would consist of 158 studio and one-bedroom units and 45 two-bedroom units.	NOP	05/20/2011

	proposed project activities would result in a geomorphically stable channel more consistent with the current flow and sediment transport needs of the river. The streambanks would be stabilized with riparian vegetation, sod blocks, large wood, and/or rock placement. The project would reduce streambank erosion, increase sediment deposition on the floodplain, decrease suspended sediments and nutrient contributions to Lake Tahoe, and enhance riparian and aquatic habitat in the river, increase seasonal groundwater levels and improve habitat quality of the wet meadow.		
2011042070	Sierra Tract Erosion Control Project, Phase 1c South Lake Tahoe, City of South Lake Tahoe--El Dorado This Initial Study/Negative Declaration (IS/ND) has been prepared to address the environmental impacts of the proposed Sierra Tract Extension Control Project Phases 1c Project. The Proposed project will result in the construction of additional retro-fit water quality improvements in an older existing residential neighborhood in South Lake Tahoe, CA. The improvements have been designed in accordance with the Regional Storm Water Quality Improvement Committee (SWQIC) and California Tahoe Conservancy (Conservancy) Program Objectives and Preferred Design Approach for such facilities in the Lake Tahoe Basin, emphasizing source control first, then hydrologic controls, and finally, treatment controls. The source controls included in the proposed project are designed to stabilize soils and prevent associated nutrients from entering the storm water runoff stream.	Neg	05/20/2011
2011042074	Feasibility Study and Remedial Action Plan, Oakland Power Plant Toxic Substances Control, Department of Oakland--Alameda The California Department of Toxic Substances Control (DTSC) is considering approval of the final remedy, identified as Alternative 3 in the Feasibility Study and Remedial Action plan (FS/RAP) for the Oakland Power Plant (OPP) site (the Site). The FS/RAP, which is incorporated by reference, summarizes the final remedy and its proposed implementation activities. The FS/RAP proposes a cleanup plan for removal of hydrocarbon-contaminated soils on the power plant parcel and in the street area, capping contaminated areas at the power plant parcel and adjacent sidewalks areas, land use restrictions, ongoing operation and maintenance of the caps, and monitoring of groundwater.	Neg	05/23/2011
2002032132	Freeport Regional Water Project Freeport Regional Water Authority Sacramento--Sacramento, San Joaquin The project involves the construction and operation of a new water intake facility on the Sacramento River in conjunction with a new water pipeline from the intake facility to the Folsom South Canal in eastern Sacramento County, a new water treatment plant in central Sacramento County, a new water pipeline from the southern terminus of the Folsom South Canal to the East Bay Municipal Utility District's Mokelumne Aqueduct in San Joaquin County, and two water pumping stations between the Folsom South Canal and Mokelumne Aqueduct. 2011044005	Rehabilitate Water Distribution System National Park Service --Tulare Note: Review Per Lead The environmental assessment / assessment of effect (EA/AoE) analyzes long-term options for addressing deficiencies in the existing water distribution system that serves that Giant Forest, Wolverton, Lodgepole, Wuksachi, and Red Fir maintenance areas within Sequoia National Park, Sections of the existing water distribution system range from 30-70 years old. The system is in poor and deteriorating condition, fails on a regular basis, and does not comply with current state drinking water regulations. The EA/AoE evaluates alternatives to address the deteriorating and non-compliant water distribution system, and analyzes the potential effects of the alternatives. The purpose of this project is to develop a comprehensive plan that considers the overall water system and prioritizes work elements based on the most critical needs.	EA	05/25/2011
2008031002	Roeding Regional Park and Fresno Chaffee Zoo Facilities Master Plans (Including Rotary Playland and Storyland) Fresno, City of Fresno--Fresno NOTE: Recirculated The 148-acre Roeding Regional Park consists of three components: the portion devoted to active and passive recreation areas and the PARCS maintenance yard (123 acres), the Fresno Chaffee Zoo (18 acres), and they Rotary Storyland and Playland facilities (7 acres). The planned expansion of the zoo (by 21 acres) and Storyland and Playland (by 2 acres) would reduce the amount of land for active and passive recreation uses, a decrease from 123 acres currently to 100 acres. These 100 acres would include public recreation/open space (76 acres), parking (9 acres), multiple purpose paths (6 acres), public access roads (5 acres), a non-public access road (2 acres) and a new PARCS maintenance facility (2 acres). Some of the roads and parking included in the active and passive recreation area of Roeding Regional Park would also serve the Fresno Chaffee Zoo and Rotary Storyland and Playland facilities.	EIR	06/06/2011
2008051066	YULA Boys High School Expansion Project Los Angeles, City of Los Angeles, City of--Los Angeles NOTE: Final EIR The project substantially implements the campus expansion authorized by the existing CUP issued in 1999 (Case Number ZA-1999-279-CU-ZV-PA1), (and accompanying Mitigated Negative Declaration, MND-99-0151), while requesting amendments to specific permit conditions. Among the specific amendments requested is the alteration of the enrollment composition, including an increase in the number of high school students, while retaining the total enrollment cap established by the 1999 CUP. The applicant also requests amendments to specific operating conditions in order to provide increased flexibility for typical high school activities. The project also includes a reduction of the site to eliminate approximately 7,153 square feet on the second and third floors of the project site known as the "West Wing." The West Wing will be the subject of separate applications filed by the Simon Wiesenthal Center. The project proposes a	FIN

	subterranean parking garage that would provide 100 parking spaces, and a total of approximately 19,953 square feet of new construction. The project Applicant is requesting the following discretionary approvals: Site Plan Review Findings pursuant to LAMC Section 16.05-E; Conditional Use Permit/Modification; Parking Variance/Modification; and Haul Route(s) approval, as necessary.		
2007081125	San Joaquin River Restoration Program Water Resources, Department of Fresno, Firebaugh--Fresno, Madera, Merced, Tulare, Kern Note: Extended Review Per Lead	JD	06/21/2011
	Reclamation is proposing to temporarily change Friant Dam operation in WY 2010 (October 1, 2009 through September 30, 2010) to release WY 2010 interim flows from Friant Dam in the San Joaquin River and potentially downstream (potentially through the use of the Eastside Bypass) as far as the Delta, as specified in the Stipulation of Settlement (Settlement) in NRDC st. al. v. Kirk Rodgers et al., and as part of the SJRRP. Consistent with a Memorandum of Understanding with the Settling Parties and the State, the California natural Resources Agency will play a major role in funding and complementing actions needed to route WY 2010 Interim Flows through the Restoration Area including the potential use of the Eastside Bypass. The WY Interim Flows would be recaptured by existing water diversion facilities along the San Joaquin River or in the Delta for agricultural, municipal and industrial, or fish and wildlife uses. The project would not involve construction activities. The purpose of the Proposed Action is to implement the provisions of the Settlement pertaining to WY 2010 and collect relevant data to guide future releases of Interim Flows and Restoration Flows under the SJRRP.		
2010091087	Mauel Family Park and Library Project Riverside County --Riverside Revised and recirculated Initial Study for a proposed neighborhood park and replacement library building. Project would be located on eight acres of vacant land in-between and adjacent to the existing Nuview Fire Station #3 and the existing Nuview Branch Library building (which would be replaced with a 5,500 square foot single-story structure). Proposed amenities include a parking lot with 100 spaces, a basketball court, tot-lot play area, picnic acres with shade structures, a skate park, amphitheatre, horseshoe pit, walking trail, open turf area, and a 280 square foot restroom/storage facility. Lakeview Avenue and 10th Street would also undergo half-width street widening improvements adjacent to the proposed park. Construction is proposed to commence in 2011 and would be completed in approximately nine months.	MND	05/23/2011

2011041075	<p>UCLA Glenrock & Landfair Apartments Redvelopment Project University of California, Los Angeles Los Angeles, City of--Los Angeles</p> <p>UCLA proposes to redevelop four off-campus residential properties owned by the University which currently provide housing for 241 upper level undergraduate and transfer students. The properties at 625 and 641 Landfair Avenue and 558 and 564 Glenrock Avenue are located to the west of campus in north Westwood Village, an area consisting of student apartments, fraternity houses, and other rental properties. The proposed project would demolish the existing buildings (116,717 gross square feet (gsf)) and construct a total of 100 apartment units accommodating 355 beds with 148 below-grade parking spaces; developing a total of 196,544 gsf of new construction.</p>	MND	05/23/2011
2011041076	<p>Huntington Education and Visitor Center Project San Marino, City of San Marino--Los Angeles</p> <p>The proposed project would: 1) modify the existing Historical and Cultural Ordinance; 2) request a conditional use permit to allow redevelopment of facilities, parking, landscaping, and other improvements within the existing entry complex area; and 3) request a conditional use permit to allow The Huntington to exceed maximum daily vehicle counts on 12 days per year, exceed standard operation hours 4 times per year, and to allow larger outdoor events with amplified sound to be conducted only in certain areas of the site. The total increase in above ground floor area would be ~43,000 sf. The total site area proposed for redevelopment is ~ 26.8 acres of the 207 acre Huntington property. The proposed project would not materially change existing activities or attendance at The Huntington.'</p>	MND	05/23/2011
2011041078	<p>El Monte Educational Center Rio Hondo Community College District El Monte--Los Angeles</p> <p>The proposed El Monte Educational Center would serve as a new satellite classroom facility for Rio Hondo Community College. The new one-story building would comprise approximately 5,943 square feet, and include 4 classrooms, toilet facilities, a workroom, and offices. Each classroom would be approximately 919 to 963 square feet in size. Total seating capacity for the classroom building is estimated to be approximately 192. The District intends that the El Monte Educational Center would also serve as a local community facility when the classrooms are not in use.</p>	MND	05/23/2011
2011041079	<p>Mead Valley Library Riverside County --Riverside</p> <p>The Project proposes a one-story, 23,000-square-foot Library featuring children's, teens, and family reading rooms, study areas, two multipurpose rooms, as well as an outdoor amphitheater. The Library site would be accessed from two driveway entrances located along Oakwood Street. The Project proposes two parking lots to serve Library patrons and employees. The Project proposes a total of 92 parking spaces to serve Library patrons and employees.</p>	MND	05/23/2011

2011042077	Draeger Santa Cruz County --Santa Cruz Proposal to recognize the unpermitted construction of two horse stalls of approximately 981 (#1) and 1,235 square feet (#2), one 788 square foot tackroom and workshop, one 356 square foot tackroom and office, a 2,600 square foot nonhabitable storage structure, and grading of approximately 2,359 cubic yards of excavation and 7,209 cubic yards of fill. In addition, the applicant proposed to replace the existing (unpermitted) mobile home with a new 1,200 square foot mobile home, to construct a 1,300 square foot addition to the existing 2,600 square foot storage structure, to construct a 1,300 square foot addition to the existing 2,600 square foot storage structure, to construct a new 2,160 square foot nonhabitable workshop/office, and to construct a new rail car bridge to replace the culvert crossing at Old Timber Road.	MND	05/23/2011
2011042078	Old Pilkington Road Culvert Replacement Santa Cruz County Santa Cruz--Santa Cruz Proposal to replace a failed culvert with a precast concrete box culvert within an existing emergency access right-of-way.	MND	05/23/2011
2011042079	Alvarado Recreation / Staging Unit Land Use Plan Amendment for Wildcat Canyon Regional Park East Bay Regional Parks District Richmond--Contra Costa The East Bay Regional Park District proposes a project to increase parking capacity access, and pedestrian circulation between the staging area and main areas of public use in Alvarado Park, the Recreation/Staging Unit for Wildcat Canyon Regional Park.	MND	05/23/2011
2011042080	Deer Valley Shoulder Widening Project Contra Costa County Brentwood--Contra Costa The purpose of this project is to improve two sections of Deer Valley Road, and existing arterial route in eastern Contra Costa County. The improvements to Deer Valley Road will provide wider recovery areas, and greater sight distances for drivers. The first section (Location 1) begins at the intersection of Deer Valley Road and Marsh Creek Road and ends approximately 140 feet south of the bridge that crosses Marsh Creek. The second section (Location 2) is along a reversing curve beginning 2,100 feet north of the Deer Valley Road and Marsh Creek Road intersection and ending 3,200 feet north of the same intersection. Both locations will include widening lanes from 10 foot wide to 12 foot wide with 6 foot paved shoulders and 2 feet of shoulder backing on both sides. Curve warning signage will be installed as needed to increase safety along the two project locations and Class II bike lanes will be established at both locations with appropriate bike lane signage and striping.	MND	05/23/2011
2011042081	North Yuba Water District Forbestown Water Tank & Pipeline Project North Yuba Water District --Butte, Yuba The Project entails the replacement of an existing 100,000 gallon water tank, which was purchased used in 1964 and is in poor condition, with a 300,000 to 400,000 gallon tank. The existing 6-inch diameter transite (asbestos cement) water line is unreliable due to age and does not provide sufficient peak and	MND	05/23/2011

	emergency water flows. The existing water line will be abandoned and capped, but not removed. The line will be replaced by approximately 4,400 lineal feet of 8-inch PVC pipeline with three fire hydrants, The water transmission main will connect the water tank to the District water treatment plant.		
2011042082	El Cerrito Relief Line Project San Mateo, City of San Mateo--San Mateo The project proposes to upsize an existing 18-inch to a 24-inch sewer line approximately 1,200 feet long along El Cerrito Avenue and Tilton Avenue, to carry flow from the Town of Hillsborough. A new 27 or 30-inch sewer pipeline approximately 9,000 feet long will also be constructed in a new alignment that will ultimately be discharged into the South Trunk sewer system at Idaho Street and Sunnybrae Boulevard. The project proposes a dedicated relief line will not connect to other local lines along its alignment.	MND	05/23/2011
2011042083	Sewer Maintenance District (SMD) 1 Wastewater Treatment Plant Upgrade and Expansion Project Placer County Auburn--Placer The proposed SMD 1 WWTP upgrades are needed to achieve compliance with permit requirements. Upgrades would include new facilities for biological removal of nutrients and a new ultraviolet (UV) disinfection system as well as a septage receiving station and other miscellaneous elements (i.e. operations and control building, chemical storage, water quality monitoring equipment, storm drainage, flood protection, and potentially solar power and a cogeneration turbine). The new WWTP would also be constructed with a capacity to treat up to 2.7 mgd average dry weather flow to accommodate planned growth in accordance with the Auburn/Bowman Community Plan.	MND	05/24/2011
2011041077	Cal Poly Pomona Campus Master Plan Revision California State University Trustees Pomona, Walnut--Los Angeles The proposed Campus Master Plan Revision involves demolition, and in some cases relocation, of certain existing buildings and uses on campus; the renovation of existing buildings; and the construction and eventual operation of new buildings and campus facilities. The master plan revision would also involve improvements to the circulation network in and around campus, to include realigning main vehicular roadways and improving bicycle and pedestrian linkages, and enhancements to the campus open space network. To address existing infrastructure deficiencies and accommodate construction and operation the proposed master plan, the Campus Master Plan Revision may also include improvements to the on-site water, wastewater, storm drain, chilled water, hot water, electrical distribution, reclaimed water, and natural gas systems.	NOP	05/23/2011
2011042076	Mission Boulevard Corridor Specific Plan Hayward, City of Hayward--Alameda This project consists of a Specific Plan which includes a Form-Based Code and Economic Strategy covering properties along the northern portion of the Mission Boulevard Corridor from Harder Road to the northern City limit with the exception of the Downtown. The project area comprises approximately 600 parcels on 240 acres and has a total length of approximately two (2) miles.	NOP	05/23/2011

2007062069	Circle S Ranch Vineyard (#06-01508-ECPA) Napa County Yountville--Napa The Draft EIR was circulated through the Governor's Office of Planning and Research, State Clearinghouse (SCH Number 2007062069) for a 45-day public review period from November 24, 2008 through January 9, 2009. Subsequent to the preparation of the Draft EIR, additional studies were completed to address concerns in the areas of biological resources, groundwater use, transportation and traffic, and greenhouse gas emissions. These studies revealed additional information not available at the time of circulation of the Draft EIR. As a result, it was determined that further analysis would be required to determine the extent of potential impacts as a result of the project. Based on these determinations, this Supplement to the Draft EIR has been prepared and is being circulated pursuant to California Environmental Quality Act (CEQA) Guidelines Section 15088.5. 2011041083	2010-202 (Plot Plan) and 2010-201 (Specific Plan Amendment) - Texas Roadhouse Menifee, City of Menifee--Riverside Planning Case No. 2010-202 (Plot Plan) is a proposal to develop two vacant, graded parcels on the east side of Haun Road, approximately 245 feet north of Newport Road. The easternmost parcel (APN 336-380-049) has been designed with a parking field and a future building pad for a maximum building area of 9,500 square feet. The first phase of construction will entail complete build out of the sit-down restaurant, parking, landscaping, water quality, improvements, utilities, drive aisles/driveways and signage. The second phase of the project will involve the development of the building pad adjacent to Haun Road. The proposed Texas Roadhouse is a sit-down restaurant with a lounge and bar. The owners will be applying through the California Department of Alcoholic Beverage Control for a Type 47 On-Sale General alcoholic beverage license in association with the restaurant. This license type authorizes the sales of beer, wine, and distilled spirits for consumption on the premises where sold for a bona fide eating place.	MND	05/24/2011
2011042085	Bald Hills Road Rehabilitation Project, Post Miles 10.1-13.4 Humboldt County --Humboldt The proposed project consists of the rehabilitation of a 3.3-mile stretch of paved roadway and various drainage improvements on Bald Hills Road between post miles 10.1 and 13.4. The project is designed to improve transportation facilities to AASHTO standards (to the extent possible) and improve road drainage.	MND	05/24/2011
2011042086	Northstar-at-Tahoe Mountain Lodge (PCPA 20110043) Placer County Truckee--Placer The project proposes the construction of an approximately 15,750 square-foot Mountain Lodge at the Northstar-At-Tahoe ski slope. The lodge will provide restaurant and cafeteria services, along with a lounge, restrooms, retail and guest services and special events, and will accommodate indoor seating for approximately 500 guests and outdoor seating for approximately 250 guests.	MND	05/24/2011
2011042087	I-80 Integrated Corridor Mobility (ICM) Project Caltrans #4 --Alameda, Contra Costa The I-80 ICM project proposes the installation of operational improvements and the use of an intelligent Transportation System (ITS), along a 19.5 -mile portion of I-80, from the San Francisco-Oakland Bay Bridge Toll Plaza to the Carquinez Bridge. ITS is a combination of computer and communication technologies that make transportation systems operate more efficiently and safely.	MND	05/24/2011

	quality pond, public street extension and public trails on 138.9 acres of undeveloped land. The CDFG is executing Lake and Streambed Alteration Agreement No. 1600-2010-0399-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Kevin Fryer//BJP-ROF Jordan Ranch, LLC.		
2006021033	Joint Point of Entry Caltrans #8 Barstow--San Bernardino CDFG is executing a Lake and Streambed Alteration Agreement (SAA # 1600-2010-0166-R6) pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Caltrans, represented by Mr. Craig Wentworth, 464 West 4th Street, 6th Floor, San Bernardino, State of CA, 90210, Phone (909) 383-6936. The Applicant is proposing to construct of a Joint Port of Entry (JPOE) station to provide for Agricultural Inspection Facility (AIF) and Commercial Vehicles Enforcement Facility on 133 acres. The project will impact 18.31 acres desert wash habitat.	NOD	
2008121017	Trabuco Road Streetscape Project Lake Forest, City of --Orange The project involves construction of a new catch basin and 36-inch reinforced concrete pipe (RCP) outlet to replace existing over-side drains on Trabuco Road. The new RCP will connect to the existing outlet facility for Serrano Creek. An existing 36-inch RCP creek outlet will also be extended by approximately 48-feet to an existing in-street storm drain.	NOD	
2009021009	California Valley Solar Ranch & Twisselman Conditional Use Permits (DRC2008-00097, DRC2009-00004) San Luis Obispo County San Luis Obispo--San Luis Obispo A request to establish a utility-grade 250 MW solar (photovoltaic) power plant on 25 properties totaling approx. 4,685 acres. The project includes: ten solar photovoltaic arrays, electrical equipment, internal overhead and underground connecting electrical lines, access roads, substation, overlook trail, operations/maintenance bldg. (5,000 sq. ft.), water processing facility, water tank, and a 3.6-mile connecting transmission line from the substation to an existing transmission line to the north. The project will also reclaim two idle gypsum mines.	NOD	
2009072028	Sabercat Creek Trail Restoration and Improvement Project (PLN2008-00114) Fremont, City of Fremont--Alameda The City of Fremont is proposing to improve an existing public trail by completing an unfinished segment underneath the Paseo Padre Parkway. The City will also be restoring the creek's riparian corridor by stabilizing various portions of the creek bank that have eroded. The CDFG is executing a Lake and Streambed Alteration Agreement No. 1600-2009-0387-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Barbara Silva / city of Fremont.	NOD	
2010021034	Yucca Loma Road/Yates Road/Greentree Boulevard Transportation Improvement Project Apple Valley, City of Apple Valley, Victorville--San Bernardino CDFG is adopting the Joint Document, State Clearinghouse number 2006051008. CDFG is executing a Lake and Streambed Alteration Agreement pursuant to Section 1601 (SAA # 1600-2010-0093-R6) of the Fish and Game Code to the	NOD

	<p>project applicant, the Town of Apple Valley. The proposed project is limited to The Yucca Loma Bridge/Yates Road/ Green Tree Boulevard Transportation Improvement Project. The proposed Project will provide a new route across the Mojave River between the Town of Apple Valley, County of San Bernardino, and City of Victorville. The eastern limit of the Project is at the intersection of Yucca Loma Road and Apple Valley Road. The eastern limit of the Project is at the intersection of Yucca Loma Road and Apple Valley Road. The western limit is at the intersection of Green Tree Boulevard and Hesperia Road. The eastern limit of the project is at the Intersection of Yucca Loma Road and Apple Valley Road. The western limit is at the intersection of Green Tree Boulevard and Hesperia Road.</p>		
2010071025	<p>Conrad N. Hilton Foundation Headquarters Campus Project Agoura Hills, City of Agoura Hills--Los Angeles The Applicant proposes to develop a 24,000 sq. ft. office building, a maintenance structure, parking and circulation elements, drainage improvements, as well as landscaping and related outdoor features. The project also includes grading on the slope east of a debris basin along the south side of Agoura Road, grading within the Agoura Road right-of-way from the eastern property boundary to the western debris basin, improvement of Agoura Road from the eastern property boundary to the proposed western boundary of the eastern parcel, and rough grading for an additional building pad.</p>	NOD	
2010082037	<p>Oakmont Sewer Line Relocation Santa Rosa, City of Santa Rosa--Sonoma The project is limited to the construction of 3,000 feet of sewer trunk main line to replace the existing 2,550 feet of sewer trunk main currently running along Oakmont Creek, tributary to Santa Rosa Creek in the vicinity of Melita Road and Channel Drive. The City is rerouting a portion of the existing sewer to remove the majority of the line from the creek environment. The work will include abandoning in place the existing trunk sewer, removal of the existing manholes to 4 feet below grade, and pumping full the existing trunk with a sand-cement slurry mixture.</p>	NOD	
2010112055	<p>South Hutchins Annexation Project Lodi, City of Lodi--San Joaquin The project consists of annexation of one parcel covering a total of approximately 30 acres of farm land from San Joaquin County into the City of Lodi. Implementation of the proposed project would result in development of medical facility with a laboratory, professional offices, a retail center, a restaurant, & a bank. The project site is located in northern San Joaquin County, within the southwest portion of the City of Lodi Planning Area, immediately south of the City's southern boundary (along Harney Lane) and west of SR-99.</p>	NOD	
2011021050	<p>2008-2014 Diamond Bar Housing Element Update Diamond Bar, City of Diamond Bar--Los Angeles Update to the Housing Element of the Diamond Bar General Plan for the 2008-2014 planning period.</p>	NOD

	all sides of the project.		
2011048222	12122 Dry Creek Road Cellular Collocation Placer County Auburn--Placer The project will collocate microwave dish wireless communication antenna on an existing cellular communications tower.	NOE	
2011048223	Tahoe City Chevron Outdoor Display Variance and Design Review Placer County --Placer This Minor Use Permit and Design Review authorizes the outdoor display of inflatable river rafts and an ice cream cooler in an auto service station.	NOE	
2011048224	Giovana Residence Administrative Review Permit for a Secondary Residence and Variance to Parking Variance Placer County --Placer This Variance allows for increase parking in a proposed Secondary Residence also approved by this Administrative Review Permit.	NOE	
2011048225	Beaulieu Vineyards Pipeline Replacement at Bale Slough Fish & Game #3 --Napa The Project is limited to the construction of a double containment pipeline designed to carry winery discharge waste to the storage ponds northwest of the winery. Issuance of a Streambed Alteration Agreement No. 1600-2010-0405-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2011048226	Rural Road Erosion Control Assistance Program Santa Cruz County Resource Conservation District --Santa Cruz This Program works with local landowners and road associations to implement Best Management Practices (BMPs) on rural roads. The BMPs focus on improving water quality by decreasing erosion and reducing sediment loads. These projects will result in a decrease in sediments and other road-induced pollutants in waterways. The BMPs to be implemented include access road improvement (outsloping, critical dips, and rolling dips), structures for water control (inlet/outlet protection and ditch relief culverts), installation of trash racks, repairs and maintenance to existing culverts and critical area planting / vegetative erosion control.	NOE	
2011048227	Gonzales Forest Fire Station - Hazard Tree Removal Forestry and Fire Protection, Department of Soledad--Monterey This project will remove approximately 10-12 hazardous trees on the fire station property. These include 10 large Monterey pines and 2 cypress trees. One of the Monterey pines is leaning at a 25 degree angle over the messhall and presents a serious hazard which needs to be addressed before it crashes into the building. Another Monterey pine is leaning over the parking lot. The trees will be felled either by state employees or contractors using chain saws. The large material will be cut up and used for firewood. The limbs will be chipped and used as mulch on the property. It is anticipated that minor damage to a fence and landscaping will result upon removal of some of the trees. CAL FIRE will repair, clean up, and re-landscape the area upon tree removal.	NOE

<u>Documents Received on Monday, April 25, 2011</u>			
2011048228	Carmel Highlands Forest Fire Station - Hazard Tree Removal Forestry and Fire Protection, Department of --Monterey This project will remove one hazardous Monterey pine on the fire station property. The tree to be removed is a large Monterey pine which is leaning at a 30 degree angle over the community room, parking lot, and neighboring structure and presents a serious hazard which needs to be addressed before it crashes into one of the buildings. The tree will be felled either by state employees or contractors using chain saws. The large material will be cut up and used for firewood. The limbs will be chipped and used as mulch on the property. No equipment shall leave the paved road prism to complete this project. It is anticipated that minor damage to a fence and landscaping will result upon removal of some of the trees. CAL FIRE/Carmel Highlands Fire Protection District will repair, clean up, and re-landscape the area upon tree removal.	NOE	
2011048229	Stream Alteration Agreement No. 2011-0036-R4: Erosion and Bank Failure Prevention Project. Fish & Game #4 Atascadero--San Luis Obispo Installing two Allen block mortarless retaining walls, each approximately 21 feet long and 3 feet high, along the left bank (looking downstream) to prevent erosion and bank failure along the tributary. The blocks have already been installed and were stacked by hand directly onto the soil surface. No concrete or mortar has or will be used on the walls. Work was done when no water was in the stream channel.	NOE	
2011048230	Scott River Groundwater Study Plan Implementation Siskiyou County Etna--Siskiyou The purpose of this project is to continue to collect information related to surface flow and groundwater in the Scott River in order to address the Temperature and Sediment TMDL for the Scott River. Specifically this project will collect the following data: 1.) static well level monitoring, 2.) Stream flow gage operation, 3.) complete aquifer pump tests to refine the Scott River Water Balance Model developed by U.C. Davis, and complete stream geomorphic surveys. This data will be incorporated into the ongoing efforts of the Scott River Water Balance Model, the Scott River Groundwater Model, and the Scott River and Schedule for Riparian Restoration.	NOE	
2011048231	Removal of Flagstone Pavement and Grass Planting Parks and Recreation, Department of San Clemente--Orange The project will remove approximately 450 sq. ft. of flagstone pavement on the front-eastside of the front yard area of the San Clemente Visitor Center/Custodians Cottage, and replace the flagstone pavement with water efficient Santa Ana Bermuda Grass to match the turf on the other side of the front yard. The irregular-shaped flagstone pavement presents a significant tripping hazard and provides a non-ADA accessible area in the front yard. This change appears historically accurate to what was once located in the front yard area when the cottage was the custodian's residence.	NOE

2011048232	Stream Crossing Project-Clay Pit SVRA Parks and Recreation, Department of --Butte The above project will designate 3 shallow water crossings at Clay Pit SVRA and install a total of 6 stream gauges with signs saying "Designated Water Crossing-Variable Depth". These stream gauges will help to distinguish how deep the water is especially during flood stage as well as delineate the shallower crossing edges when the banks are no longer visible. This will improve public safety in the area by defining crossings and will allow park employees and visitors to assess the water crossing depth accurately. All stream gauges with signs will be installed out of the water and on top of the bank. Signs will be installed with an adjustable metal sign post as the base so when they are not needed they will be removed.	NOE

2011031065	San Marcos High School Reconstruction & Expansion San Marcos Unified School District San Marcos--San Diego Note: Shortened Review The project would consist of two phases: 1, development of a temporary high school for 2,925 students; and, 2, demolition and reconstruction of the existing high school. The temporary school would include 90 relocable classrooms and 67 other portable units including restroom buildings. The rebuilt high school would have 118 classrooms in four buildings, plus two additional buildings (mechanical and field house); administrative offices, library, student union, and gymnasium; in a total of about 447,300 square feet of building area. The stadium bleacher capacity would be decreased by 73 seats to 3,849 seats. A total of 632 parking spaces would be provided.	EIR	05/25/2011		
2008112004	Sir Francis Drake Boulevard Rehabilitation Project Marin County --Marin NOTE: Final A section of Sir Francis Drake Boulevard located about one mile west of the Town of Lagunitas between Shafter Bridge and Platform Bridge Road contains segments of severely deteriorated pavement that has exceeded its design life. Without major rehabilitation, the roadway's condition will likely further deteriorate as cracks in the pavement allow water to infiltrate weakening the sub grade and creating additional distress.	FIN

2009101015	College Park Specific Plan Palm Springs, City of Palm Springs--Riverside Specific Plan on ~510 acres of partially developed land, with future planned land uses including 119 acre community college campus, business park, industrial, commercial, mix of residential lands, and parks and open space.	NOD	
2010121050	General Plan Amendment (GPA) No. 2010-03 (Renewable Solar and Wind Energy) Inyo County --Inyo NOTE: Extended Review per lead An update to the Inyo County General Plan is proposed to address renewable solar and wind energy development. As part of the update, a General Plan Land Use Designation Overlay is proposed in which renewable energy projects, specifically solar and wind, may be developed, based on site specific studies pursuant to the County's Renewable Energy Ordinance and other applicable State, federal, and local laws. Other updates proposed include the following: identifying appropriate means to develop renewable wind and solar energy resources, provided that social economic, and environmental impacts are minimized; offsetting costs to the County and lost economic development potential, and mitigation of economic effects; working to protect military readiness, and considering conversions of lands utilized for agriculture, mining, and recreation.	NOD	
2011011030	San Antonio Creek Spreading Grounds Rehabilitation Ventura County Watershed Protection District Ojai--Ventura The Ventura County Watershed Protection District proposes to increase groundwater storage and recharge in the Ojai Valley Groundwater Basin by rehabilitating four existing relict spreading grounds ponds, and constructing a new intake structure, diversion piping/channels, and four passive percolation recharge wells. The project would allow diversion of surface flow at a maximum rate of 25 cubic feet per second from upper San Antonio Creek when minimum in-stream flow requirements are met (an average of 12 days per year). The project would divert up to a maximum of 914 acre-feet per year of surface flow for percolation and replenishment of groundwater for future municipal, domestic and irrigation uses.	NOD	
2011032047	Humboldt Bay Rowing Association Non-Seasonal Floating Dock and Gangway Coastal Development Permit Eureka, City of Eureka--Humboldt The HBRA is seeking regulatory approval to convert the existing private floating dock and gangway (City CDP-01-02, Coastal Commission CDP 1-02-147) from seasonal to non-seasonal (i.e. year-round) structures. This conversion requires an amendment to both the City and Coastal Commission CDPs. No additional structures or improvements are proposed; the existing structures would simply remain in place throughout the year and would no longer be subject to seasonal removal. Therefore, the initial study will address only those impacts associated with the conversion of the dock and gangway from a seasonal to a non-seasonal structure. All previously adopted conditions of approval and mitigation measures remain unaltered and in force, unless otherwise specifically modified.	NOD

2011049018	Winery and Fruit Stand Facility Water Supply Public Health, Department of --Fresno The project proposal is to allow a small winery and fruit stand facility to sell produce which are harvested, cured, processed, and packaged on the premises including packaged foods and related items.	NOD	
2011048233	Amador Water Agency Water Transmission Pipe Aerial Crossings (1600-2010-0078-R2) Fish & Game #2 --Amador The project is limited to construction of concrete footings at the top of the creek banks adjacent to bridges over Tiger Creek, Mill Creek, and Antelope Creek for supporting aerial crossings of these creeks with water supply pipe. A trench will be constructed across Barton Creek to allow for burial of a 20 inch diameter water supply pipe. Any water present in the creek at the time of construction will be diverted around the construction site and returned to the creek bed downstream of the site. The trench will be backfilled and compacted to specification once the pipe has been installed.	NOE	
2011048234	GIL-7 Drainage Restoration Fish & Game #2 Yuba City--Sutter The project is limited to a 2,600 feet linear zone along Gilsizer Slough. The work will include excavation of the bank in order to install concrete-block type revetment in the bank to a height of eight feet (with one foot being below the waterline). A concrete cap will be placed along the top of the revetments to lock them in place. All spoils will be removed to where they will not re-enter a watercourse. The expected working time for this project is 65 days.	NOE	
2011048235	Asphalt Concrete Pavement Preservation Project Caltrans #3 Williams--Colusa The scope of work includes: Grind to remove damaged top layer of asphalt concrete, dig outs to make spot repairs, seal cracks, and overlay with new asphalt concrete	NOE	
2011048236	Well No. 2 Replacement Public Health, Department of Stockton--San Joaquin The California Department of Public Health is a responsible agency for this project. The Lockeford Community Services District has proposed to replace the existing Well No.2 with a new well drilled on the same site. The new well would have the same capacity as the well it is to be replacing.	NOE

2009072013	Glen Park Community Plan San Francisco, City and County of San Francisco--San Francisco The Glen Park Community Plan - Working Draft for Community Discussion (2010 Community Plan) introduces goals, objectives, and policies aimed at preserving and enhancing the unique character of Glen Park. The plan contains three elements; Land use and Urban Design, Transportation, and Open Space. The plan area is bounded generally by Chenery Street to the north, Roanoke Street to the east, San Jose Avenue and Bosworth Street to the south, and Elk Street to the west. Upon adoption by the San Francisco Planning Commission and Board of Supervisors, the 2010 Community Plan would be incorporated into the San Francisco General Plan as an area plan.	EIR	06/10/2011
2010051035	Columbus Elementary School Joint Use Soccer Field Glendale, City of Glendale--Los Angeles The proposed project includes the replacement of an existing natural turf field with a new 49,500 square foot artificial turf sports field with sports field lighting and surrounding synthetic (runout area) on the campus of Columbus Elementary School. Additional Project amenities include a 53 space parking lot, a restroom facility that includes a small storage area, and a maintenance shed.	EIR	06/10/2011
2007091064	Fresno Southeast Walmart Expansion Project Fresno, City of Fresno--Fresno NOTE: Review per lead The proposed project consists of the following two main development phases: 1) Expansion and remodeling of the existing Walmart store and parking area from an existing developed area of 15.2 acres to a planned developed area of 19.2 acres; 2) Development of 5.7 acres of vacant land in the southwest portion of the project site with four retail buildings and two restaurants on four parcels ranging in size from 1.0 acres to 2.0 acres.	FIN	
2009042133	Enclave at Granite Bay, The (PSUB T20080329) Auburn, City of --Placer Note: Addendum, Review Per Lead Project proposes the subdivision of 12.07 acres into a 27 lot residential Planned Development with 7 open space/common area lots.	MND	05/27/2011
2010091013	Donlon Road Realignment Project Ventura County --Ventura The project involves the realignment of the Donlon Road/SR 118 intersection to align Donlon Road with Somis Road. The County is considering two alternative alignments. Both of the proposed roadway realignments traverse an existing nursery and cross over Coyote Canyon Creek. Both alternatives would require the establishment of a new right-of-way through the nursery that would connect to Donlon Road to the north and to SR 118/Somis Road intersection to the south. The alignment would cover between 0.64 and 0.74-acres depending on the alternative selected.	MND	05/26/2011

2011041088	Kit Carson Elementary School Expansion Kit Carson Union School District Hanford--Kings KCUSD plans to construct a new parking lot on the southern portion of the property and aligned in consultation with Caltrans to correspond to improvements to Lacey Boulevard west of the project Site. KCUSD will also construct a new bus loop on the northern portion of the property to separate the bus loading area from parent drop-off. The Master Plan design includes 12 new classrooms in the campus core and a Kings County Office of Education (KCOE) preschool on the south side of the school; new playfields will comprise the remainder of the expansion parcels.	MND	05/26/2011
2011041091	Pyrite Street Improvement Project Riverside County --Riverside The Project will include improvements to an approximately 3,400-foot (or approximately 0.65 mile) segment of Pyrite Street, between Mission Boulevard and Jurupa Road. The Project includes the following primary components: Right-of-Way ("ROW") acquisition, road widening/rehabilitation, and drainage improvements.	MND	05/26/2011
2011041092	Town And Country Parking Lot San Diego, City of San Diego--San Diego Site Development Permit that would permit the prior unauthorized construction of a 112-space paved parking lot along with remediation and mitigation for the unauthorized placement of soil into sensitive biological resources during the unauthorized construction. At the direction of the State Regional Water Quality Control Board and the City of San Diego staff, the parking lot was modified through the removal of the existing asphalt pavement and a portion of the curb closest to the San Diego River. A new curb and pavement was installed to observe the drip-line of existing trees along the river. Additionally, a ten-foot-wide easement extending from the western portion of the property at the existing footbridge to the eastern portion of the property would also be included for development of a future five-foot-wide trail. The 1.7-acre project site (that is part of the larger 39.4-acre Town and Country Hotel site) is located at 500 Hotel Circle North within the MV-M/SP Zone, the OF-1-1 Zone, the Transit Overlay Zone within the Mission Valley Planned District Ordinance of the Mission Valley Community Plan area. (Legal Description: Portions of Lot 2 and 4 of Map 3755; portions of Lot 4 partition of Pueblo Lot 1105, map No. 1029). Applicant: Town and Country Hotel and Resort.	MND	05/26/2011
2010011049	Whittier Main Oil Field Development Project Whittier, City of Whittier--Los Angeles The project is a revision to the previously Oilfield project, described in the DEIR (submitted for public review 10/6/2010 through 12/6/2010). The revised project incorporates aspects of the environmentally superior project alternative and is being proposed by the applicant in order to reduce areas of disturbance and potentially significant environmental impacts. The revised project will consist of wells, oil processing, gas plant, oil and gas pipelines, and oil truck loading facilities, to be located within portions of the 1,290-acre City owned Whittier Main Field, now part of the Authority Habitat Preserve. The oil and gas production and processing facilities will be physically located at a central Consolidated Site within	NOP	05/26/2011

	the Whittier Main Oil Field. The site encompasses ~ 6.9 acres.		
2011041089	College of the Desert Indio Education Center Desert Community College District Indio--Riverside The College of the Desert is proposing to construct a three-story, 40,000 sf building and provide 198 parking spaces on a 2.5 acre site located on the Old Town area of the City of Indio. The subject property includes an existing Greyhound Bus station and vacant lands. Of the planned 40,000 sf, 10,000 sf is planned for street-level retail, with the balance dedicated to community college uses.	NOP	05/26/2011
2011041090	Desert Sky Plaza Victorville, City of Victorville--San Bernardino The project proposes the development of approximately 346,916 square feet (sf) of assorted retail/commercial buildings on an approximately 30-acre site. the development proposes the construction of 15 buildings and would be developed in two phases: Phase A includes the development of a 138,516 square foot Target retail store, and Phase B proposes the development of 208,400 sf of additional retail/commercial uses.	NOP	05/26/2011
2011042097	Central Valley Independent Network Fiber Optic Communications Network Project Public Utilities Commission --Amador, Calaveras, Colusa, El Dorado, Fresno, Kern, Kings, ... The Central Valley Independent Network (CVIN), in partnership with the Corporation for Education Network Initiatives in California (CENIC), has applied to National Telecommunications and Information Administration (NTIA) for American Recovery and Reinvestment Act (ARRA) funding to plan, install, operate and maintain a fiber optic communications in 17 California counties, in portions of the northern Sacramento Valley, Sierra Nevada foothills, and the northern and southern San Joaquin Valley (proposed project). The proposed network would also accommodate several other planned future connections; statewide interconnection of major public safety answering points, a statewide public safety network, and connection of health facilities within the proposed project's 17-county service area through the future California Telehealth Network. The proposed project involves developing approximately 94 miles of new fiber optic cable would be installed in existing conduits.	Neg	05/26/2011
1998101061	Lower Mission Creek Flood Control Santa Barbara, City of Santa Barbara--Santa Barbara The project is designed as to replace the structurally deficient Ortega Street Bridge and is part of the ACOE Lower Mission Creek Flood Control Feasibility Study, EIS/EIR. The project includes the demolition of the existing bridge and adjacent residential buildings. The new bridge will be 60 feet wide and 52 feet long and will be composed of single span precast/prestressed concrete slabs supported by cast in place concrete abutments founded on cast in steel shell piles. Concrete semi-gravity cantilever and soldier pile channel walls will be constructed both up and down stream of the bridge to affect smooth hydraulic transition between the bridge and the existing banks. 2011048237	Casing Hammer Test Well for the Monterey Park Tract CSD Monterey Park Tract Community Services District --Stanislaus Drilling of a casing hammer test well to sample groundwater quality and quantity to see if a municipal well can be constructed at the site with or without water treatment. The test well will be destroyed after testing is completed. If water quality and quantity are within acceptable limits, a separate environmental document will be prepared in the future for the well and site improvements. The well and improvements, if constructed, will benefit the Monterey Park Tract Community Services District.	NOE	
2011048238	Agreement No. 2010-0165-R4; Grant Lake Restoration Project Fish & Game #4 --San Luis Obispo The proposed project would excavate an existing sag pond to enhance habitat for California tiger salamander. Disturbance at the project site would be limited to 5 acres or less. Sediment would be removed from pond to a depth of ~5 to 6 feet below the existing grade at the southern end and 2 to 3 feet at the northern end to allow water to remain on-site for salamanders to complete their aquatic life stage. Material removed from the sag pond would be used to create a berm around the pond perimeter. Fencing would be installed to control cattle access to the site. All work would be done when the pond is dry and devoid of water. Equipment used will include dozers, front end loaders, and scrapers.	NOE	
2011048239	Pilarcitos Creek Road Culvert Replacement Project Fish & Game #3 --San Mateo The project entails replacement of three deteriorated culverts. Existing corrugated metal pipes will be replaced with high density polyethylene pipes. The pipes will be adequately sized to convey a 100-year storm event. The trenches will then be backfilled, compacted, and resurfaced. New concrete headwalls will be constructed at the inlets. A small quantity of rock will be placed at the outlet to dissipate energy and prevent erosion. Construction will primarily take place within the existing road prism. The total surface disturbance will be ~ 170 feet. Temporary surface disturbance outside of the road prism will be limited to 10 linear feet at the inlets and outlets. Issuance of a Streambed Alteration Agreement Number 1600-2010-0282-R3 is pursuant to Fish and Game Code Section 1602.	NOE	
2011048240	MidCoast Channel Maintenance Project Fish & Game #3 --San Mateo The project entails channel maintenance including vegetation management and removal of accumulated sediment to restore channel capacity and prevent flooding. Issuance of a Streambed Alteration Agreement Number 1600-2011-0001-R3 is pursuant to Fish and Game Code Section 1602.	NOE

2011042098	County File #LP09-2037 Verizon Telecommunications Facility at 19430 Vasco Road in the Byron Area Contra Costa County Byron--Contra Costa The applicant seeks approval of a land use permit to establish a new wireless telecommunications facility on a property owned by the Contra Costa Water District on which the District operates a water transfer station. The proposed facility consists of nine (9) Verizon Wireless panel antennas and six (6) Metro-PCS panel antennas to be mounted inside of and concealed by a proposed 48-foot tall faux water tower. In addition to the antenna, an equipment area is proposed which would contain eight (8) equipment cabinets, one (1) diesel generator and a 210 gallon fuel tank, one (1) power meter, two (2) GPS antennas, and two (2) electrical boxes to work in conjunction with Verizon antennas. There is no Metro-PCS equipment proposed aside from the antennas. The proposed electrical equipment area is to be mounted on a concrete pad supported by a retaining wall up to three (3) feet in height in places. The entire equipment area is encircled by a fence with a maximum height of up to six (6) feet (not including three strands of barbed wire proposed on top of it). The total height of the entire retaining wall/fence combination never exceeds nine (9) feet at any point.	MND	05/27/2011
2011042101	Marsh Creek East Cell Site Contra Costa County Clayton--Contra Costa County File #LP09-2078. The applicant seeks approval of a land use permit to establish a wireless telecommunications facility on the subject property. The proposed facility will be comprised of three poles: one 30-foot tall pole with 6 antennas attached, one 16-foot tall with three antennas attached and a third 16-foot tall pole with an additional three antennas attached for a total of 12 antennas. The facility will also incorporate one 400-square-foot (20' x 20') Verizon sublease area with electrical equipment and a 170-square-foot lease area for the back-up generator. An eight-foot tall chain-link fence will be constructed around the equipment pads to delineate the perimeter of the facility. Included in the project is a request for a tree permit to allow work within the dripline of thirteen (13) code protected Oak trees.	MND	05/27/2011

2011042102	Riparian Sanctuary Restoration Project Fish & Game #2 Chico--Glenn, Butte The proposed project would consist of a combination of measures to restore riparian habitat on ~500 acres of the Riparian Sanctuary, which is currently dominated by non-native plants with poor wildlife habitat values, and protect the banks of the Sacramento River in the vicinity of the Riparian Sanctuary in order to protect the PCGID-PID pumping plant and fish screen facility. Several alternatives for restoration and bank stabilization will be considered in the EIS/EIR.	NOP	05/27/2011
2011042100	County File #LP10-2057 - Kentco Construction Contractor's Yard Contra Costa County Oakley--Contra Costa The applicant seeks approval of a land use permit and development plan to allow the continued operation of an existing building contractor's yard. On May 9, 1979, the Zoning Administrator approved County File #2009-79, which allowed the establishment of a yacht sales yard in the northeastern corner of the subject property. Approximately seven years later the yacht sales use ended, and was replaced by a building contractor's yard in the same location on the property. The existing contractor's yard has been in operation at the site for approximately 25 years, but the land use permit was never amended to allow the contractor's yard. There is no proposal to expand...the capacity, location, or manner in which the contractor's yard has been used for the past 25 years.	Neg	05/27/2011
1999051058	Monterey Park Market Place Precise Plan Monterey Park, City of Monterey Park--Los Angeles The proposed Monterey Park Market Place Precise Plan alters the previous project (Monterey Park Towne Plaza, March 2000) by increasing the amount of retail square feet to 600,000, an increase of 84,618 square feet. The redevelopment would cover 42.1 acres of the north parcel, plus approximately 9 acres of the adjacent SCE easements, totaling 51.1 acres. Four retail anchor stores would be the largest buildings onsite. At most two garden centers would also be included with these anchor stores. The smaller retail buildings would be for mixed retail or restaurant use. Smaller retail pads include a bank, fast food restaurant, two sit-down restaurants, and a gas station.	SIR	06/13/2011
2005072087	Ash Creek Bridge Siskiyou County Yreka--Siskiyou The Project proposes the construction of a new bridge on a new alignment approximately 60 feet downstream from the existing site and the removal of the historical Ash Creek Bridge.	NOD	
2007052094	Concord Community Reuse Project Concord, City of Concord--Contra Costa The Concord Community Reuse Redevelopment Project Plan (the "Redevelopment Plan" or the "Project") provides the City Council acting as the Redevelopment Agency for the City of Concord with powers, duties, and obligations to implement and further the program for the redevelopment, rehabilitation, and revitalization of the Concord Community Reuse Redevelopment Project Area ("Project Area"). The Redevelopment Plan does not present a	NOD

	precise plan or establish specific projects for the redevelopment, rehabilitation, and revitalization of any area within the Project Area, nor does the Redevelopment Plan present specific proposals. Instead, the Redevelopment Plan presents a process and a basic framework within which specific plans will be presented, specific projects will be established, and specific solutions will be proposed, and provides certain tools to the Redevelopment Agency to fashion, develop, and proceed with such specific plans, projects, and solutions.		
2008101028	Longley Well No. 3 and Camino Real Well No. 3, Project No. 6372039 Arcadia, City of Arcadia--Los Angeles The City of Arcadia is proposing to construct two new wells to ensure that adequate system capacity is available to use as a source of blend water to keep the existing St. Joseph Well No. 2 operating in the event one of the City's existing wells becomes inoperable. The St. Joseph well exceeds the nitrate standard. Blending all three wells will allow the city to meet the nitrate drinking water standard. A water main extension will also be constructed to connect the two new wells to the existing distribution system.	NOD	
2011032035	Cured-in-Place Pipe Project - Siphon to Treatment Plant East Palo Alto Sanitary District Palo Alto--Santa Clara The Cured-in-Place Pipe, Siphon to Treatment Plant Project, proposed by the East Palo Alto Sanitary District, involves trenchless improvements along the upland area of the San Francisquito Creek levee and within the Palo Alto Airport, in Palo Alto.	NOD	
2011048270	Grant Award # ARV-10-037 to American Biodiesel d/b/a Community Fuels (Recipient) Energy Commission -- The project will fund the expansion of the Community Fuels Biodiesel Plant on a 3.31 acre parcel of vacant land adjacent to the Recipient's existing facility. The expansion includes installing two 250,000 gallon tanks for biodiesel storage, an automated pressure filtration system for treatment, dispensing units for truck and rail loading, a red dye injection unit for labeling fuel, an automated fuel delivery system, and piping. For this project, the Port of Stockton prepared an Addendum to its program EIR for the West Complex Development Plan.	NOD	
2011048246	Existing Facility Conversion and Use Public Health, Department of Bakersfield--Kern Grace Community Church is a newly created water system from an existing facility. The church recently just became classified as a public water system due to an increase in population. The church was granted approval to operate the water system with an interim approval letter dated August 29, 2008. They are applying for a permit to use the existing water system.	NOE	
2011048247	Replacement Well Public Health, Department of Kerman--Fresno The water system plans to build a new well to replace an existing well that exceeds the state MCL level for nitrates.	NOE

2011048264	Hunter's Point Shipyard/Candlestick Point Title Settlement, Public Trust Exchange and Boundary Line Agreement and Candlestick Point State Recreation Area Reconf Parks and Recreation, Department of San Francisco--San Francisco This project would resolve title and boundary issues at the Hunter's Point Shipyard and candlestick Point through two agreements. The parties to the agreements are the City and County of San Francisco, the Redevelopment Agency of the City and County of San Francisco, the Port Commission of the City and County of SF, Parks and Rec, and the CA State Lands Commission. The agreements would implement an exchange of public trust lands, clarify and settle land ownership, set an agreed boundary between former tidelands and historic uplands, provide the reconfiguration of the CPSRA and facilitate the redevelopment and improvement of the CPSRA. The project will benefit the statewide public and the local community through the redevelopment of the area and the reconfiguration and improvement of the CPSRA.	NOE	
2011048265	Mill Creek Interpretive Panel Installation Parks and Recreation, Department of --Sonoma Install one interpretive panel at the newly restored Coon Trap project site in Jack London State Historic Park to facilitate a better understanding of the interconnectivity between the Mill Creek and the ecological conditions of downstream Sonoma Creek. Work will manually excavate postholes to install the base according to ADA Exhibit Guidelines, or approximately 3' x 3' by X 2' deep, within which we will set the single post panel.	NOE	
2011048266	Grant Award # ARV-10-032 to the Association of Bay Area Governments (Recipient) Energy Commission --Marin, Santa Clara, Alameda, San Francisco, Monterey, ... The project will fund the installation of up to 337 electric vehicle chargers in existing public and private parking lots, structures, and spaces throughout counties in the Bay Area. Each charger is approximately 2' wide x 4' tall, with a sign that is 1' tall by 8" wide. The chargers would not eliminate, change, or intensify parking capacity in the parking lots. Some locations will require minor trenching to install the chargers, with the land restored to its original condition after installation. The project benefits electric vehicles users and the public by providing cost-effective public charging, demonstrating the feasibility of alternative and renewable vehicle technology, reducing reliance on petroleum fuels, and reducing greenhouse gas emissions.	NOE

who comprise the market and local workforce; suppliers AC Propulsion, Flux Power, and Dynatrac; and the public by increasing the cost-effectiveness and demonstrating the feasibility of alternative and renewable vehicle technology, thereby reducing reliance on petroleum fuels and reducing greenhouse gas emissions.

2011048281	<p>San Joaquin Valley Unified Air Pollution Control District Rule Development: Amendments to Rule 2201 (New and Modified Stationary Source Review Rule) San Joaquin Valley Air Pollution Control District --Fresno, Kern, Kings, Madera, Merced, San Joaquin, ...</p> <p>This is a rule development project to amend existing District Rule 2201 (New and Modified Stationary Source Review Rule). The Clean Air Act and applicable regulations require that PM2.5 nonattainment areas, such as the San Joaquin Valley, incorporate permitting requirements into their New Source Review (NSR) rules. The U.S. Environment Protection Agency (EPA) found the permitting exemption for agricultural emissions sources in section 4.6.9 of District Rule 2201 to be ambiguous. Therefore, for these reasons the project is to incorporate mandatory provisions of the federal nonattainment PM2.5 permitting program requirements into District Rule 2201 and to clarify the agricultural permitting requirements.</p>	NOE

2011048278	UCLA Seismic Properties of Organic Soils Project University of California, Los Angeles --Sacramento The project would construct a man-made mound of soil on unconsolidated peat in the interior of Sherman Island to perform field testing that will measure the seismic deformation potential of the existing levee system in the Sacramento / San Joaquin Bay Delta and in the Suisun Marsh. To perform the seismic testing, mobile field shakers would be used to impose large dynamic horizontal	NOE	
2011048279	Asphalt Concrete Pavement Repair Project Caltrans #3 Grass Valley--Nevada The scope of work includes: Remove by grinding the top layer of damaged asphalt concrete (AC), spot repairs as needed, and overlay with new AC. Reset metal beam guard rail.	NOE	
2011048280	Asphalt Concrete Pavement Repair Project Caltrans #3 Sacramento--Sacramento The scope of work includes: Remove by grinding the top layer of damaged asphalt concrete (AC), spot repairs as needed, and overlay with new AC. Reset metal beam guard rail. Grind to install rumble strip.	NOE	
2011048282	Districtwide School Reprogramming and Related Actions Twin Rivers Unified School District Sacramento--Sacramento The proposed project is a programmatic series of actions at several schools within the Twin Rivers Unified School District (TRUSD). In general, these actions involve maintenance or minor alterations to existing facilities. In some cases, these actions include realigning existing programs as a result of school closures or other internal TRUSD actions. In other cases, a small number of additional classrooms would be added, in part to accommodate closures elsewhere in the District.	NOE	
2011048283	North East Trees - Roadside Rain garden Demonstration Project Forestry and Fire Protection, Board of Los Angeles, City of--Los Angeles This project, to be carried out by the North East Trees, involves planting 15 trees along Ballona Creek in the City of Los Angeles. It is anticipated that this project will commence in April of 2011, and be completed by March 2013. Trees will be native and non-native ornamentals that have been selected for their disease resistance, adaptation to the urban landscape, shade capacity, and minimal litter production. Trees will be planted using 15 allong commercial stock. All trees will be planted, staked and tied, watered and maintained in accordance with CAL FIRE guidelines.	NOE	
2011048284	Ishi Crew Exercises Forestry and Fire Protection, Board of --Tehama The project, located on a 1000-acre parcel of State land within the Tehama State Wildlife Area, involves the use of the property for the purpose of providing training exercises for CAL FIRE crews from the Northern Region. The total area encompassing the project activities is approximately 320 acres. The only ground disturbing activities will be within portions of a 7-acre area of fireline construction consisting of cutting brush and scraping to bare mineral soil 6 feet in width. The larger 320 acre area will be used onl for the purposes of hiking, fire shelter	NOE

	deployment and tool up and parking areas.		
2011048285	Trail Repair at the Notches Parks and Recreation, Department of --Imperial This project will utilize volunteer crews to repair small sections of trail in an area just north of Palm Wash within the Notches area at Ocotillo Wells SVRA. The repairs will consist of leveling sections of trail out so that stock vehicles can travel safety through the area. Volunteers will use material scraped off the surface of the bottom of the trail in areas that have an almost ninety degree slope, and then lay and compact the material for long term stability. No excavation holes or pits will be created. Approximately eight sections of trail would be repaired and would account for approximately ten lineal feet of trail. Volunteers will use hand tools and a Kubota tractor.	NOE	
2011048286	USFS Stanislaus National Forest, Restoration - Lyons Creek, G08-02-19-R04 Parks and Recreation, Department of --Stanislaus Project consists of permanent closure and restoration of 12 unauthorized user-created OHV route segments totaling approximately 2 miles and restoration of 4 acres of meadow area.	NOE	
2011048287	Carbon Capture and Storage for Natural Gas Combined Cycle Plants Energy Commission Sacramento--Sacramento This project will evaluate both the technical design considerations and ability to capture carbon dioxide (CO2) from natural gas combine cycle (NGCC) power plants, and also estimate the costs and performance impacts associated with capture and storage of a plant's CO2 emissions. Project work will include development of the following evaluations and reports: 1. A basic evaluation of CO2 capture technology options for use at NGCC power plants; 2. An engineering and economic assessment report on the installation and operation of selected CO2 capture technologies, in retrofit and new-build applications, at California utility-scale NGCC power plants; and 3. A preliminary design report for a pilot-scale CO2 capture, compression/dehydration, transport, and injection well test facility.	NOE	
2011048288	Evaluation and Improvement of Particulate Matter Measurement from NG Power Plants Energy Commission Riverside--Riverside The overall goal of this project is to evaluate and recommend improvements to the current ARB test methods in order to more accurately measure the very low particulate matter (PM) emissions from NG-fueled power plants. The project consists of several objectives: 1) Evaluate current methods for measuring PM to determine the limitations in providing accurate data, 2) Undertake a pilot-scale study of the PM measured from a NG-fired turbine with the input parameters for the turbine and the PM dilution system varied over a wide range. The project will measure PM from the NG fired turbine using current regulated methods, proposed dilution methods and recently available realtime PM measurement tools, 3) Verify the findings developed from the pilot-scale project and demonstrate an improved PM measurement method in a number of larger commercial units, and 4) In coordination with ARB and other appropriate regulatory agencies, develop new PM	NOE
