STATE CLEARINGHOUSE

NEWSLETTER

August 16-31, 2008

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **August 16-31, 2008.**

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov/clearinghouse/clearinghouse.shtml

Questions regarding federal grant notices should be directed to **Sheila Brown.**

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Senior Planner

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 212) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 2001 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

MEMORANDUM

DATE: February 13, 2007
TO: State Agency CEQA and Intergovernmental Review Coordinators
FROM: Scott Morgan, Senior Planner
SUBJECT: Distribution of Environmental Documents in CD-ROM Format

The State Clearinghouse has received an increasing number of requests from local and state lead agencies to distribute CEQA documents to state reviewing agencies in an electronic format, typically CD-ROM. The most common reason for these requests is to reduce cost. CD-ROMs are cheaper for the lead agency to reproduce and mail, and cheaper for the State Clearinghouse to distribute, especially in the case of multi-volume documents.

The State Clearinghouse has distributed EIR's and EIS's in CD-ROM format for state agency review and comment since August 1, 2003. Based on our experience with those documents, a survey conducted of state reviewing agencies and the potential cost savings to local and state agencies, we are extending this policy to other environmental documents including Negative Declarations, Mitigated Negative Declarations and Environmental Assessments. The State Clearinghouse will accept environmental documents under the following terms:

- CEQA Lead agencies may provide copies of draft environmental documents to the State Clearinghouse for state agency review in an electronic format. The document must be on a CD-ROM in a common file format such as Word or Acrobat.
- Lead agencies must provide fifteen (15) copies of the CD-ROM to the State Clearinghouse. In addition, each CD-ROM must be accompanied by 15 printed copies of the DEIR summary (as described in CEQA Guidelines §15123), executive summary, or introduction section of a Negative Declaration or Mitigated Negative Declaration. The printed summary allows both the State Clearinghouse and agency CEQA coordinators to distribute the documents quickly without the use of a computer.
- Final environmental documents may be provided in CD-ROM format without a printed summary. Distribution of the final documents is optional under CEQA.
- Federal lead agencies may send electronic copies of environmental documents to the State Clearinghouse in the same manner described for CEQA lead agencies. Distribution of NEPA documents to state agencies through the State Clearinghouse is encouraged pursuant to Presidential Executive Order 12372 and NEPA §102 (42 USC §4332)
- All notices of preparation must continue to be provided in printed format.
- Please provide one Notice of Completion Form with all submittals.

If your agency has difficulty downloading and reviewing any environmental documents please contact:

Scott Morgan, Senior Planner
916-445-0613
scott.morgan@opr.ca.gov

Thank you for your cooperation in the CEQA review process.

**ENVIRONMENTAL DOCUMENT FILINGS WITH THE STATE CLEARINGHOUSE
1999 through 2007**

All CEQA documents filed with the State Clearinghouse are available for viewing on the Internet at <http://www.ceqanet.ca.gov/>

<u>Documents Received on Monday, August 18, 2008</u>			
2007011144	<p>Marina Specific Plan for WatersEdge, Cottages by the Lake, and Wetland Enhancement Site EIR Lake Elsinore, City of Lake Elsinore--Riverside</p> <p>The 176-acre project proposes three components: the Marina Specific Plan for WatersEdge, the Cottages by the Lake, and the Wetland Enhancement Site. The Marina Specific Plan for WatersEdge proposes to utilize approximately 76 acres of undeveloped land for the construction of a mixed-use marina development complex that combines pleasure-craft marina uses with recreational watercraft sales, service and storage, hotel, retail commercial, multi-family attached condominiums, and a private event viewing area. The Cottages by the Lake component proposes to utilize 13 acres of undeveloped land for the construction of 169 single-family residential condominium units. The Wetland Enhancement Site will provide 87 acres of compensatory mitigation land for permanent, temporary, and off-site impacts for the Marina Specific Plan for WatersEdge and Cottages by the Lake components. Construction activities are anticipated to be phased over four years.</p>	EIR	10/01/2008
2008022031	<p>Scotts Valley Town Center Specific Plan Scotts Valley, City of Scotts Valley--Santa Cruz</p> <p>The Scotts Valley Town Center Specific Plan would include development of a pedestrian friendly downtown and civic center. The project would consist of commercial retail uses, mixed-use buildings, multi-family housing, parking structures, a town green/plaza, and civic uses.</p>	EIR	10/01/2008
2008031109	<p>Charnock Well Field Restoration Project Santa Monica, City of Los Angeles, City of--Los Angeles</p> <p>The project involves implementation of a water treatment system and other improvements that would help to remove groundwater contamination from the Charnock groundwater sub-basin and restore this resource as a water supply for the City of Santa Monica. As part of the project upgrades, improvements will be required at two existing City-operated water service facilities. The City is planning to return the Charnock groundwater wells to full production using a treatment system to be constructed at the Charnock well field. This system will use granular activated carbon filtration to treat water from the three contaminated wells at the well field. Water treatment improvements are also proposed for the Santa Monica Water Treatment Plant. Improvements for the SMWTP may include two salt water wells, as part of a water softening system.</p>	EIR	10/01/2008
2008041121	<p>South Region Elementary School No. 12 Los Angeles Unified School District --Los Angeles</p> <p>The 6.4 acre school project would provide approximately 800 two-semester seats for students in grades kindergarten through five (K-5) and require approximately 65 full and part-time faculty and staff. The campus would also have a gymnasium; and a multipurpose building with food service facilities, turf playfields, hardcourts, and a surface parking lot for 72 vehicles.</p>	EIR	10/01/2008

2008081066	Acquistapace Elementary School Project Santa Maria-Bonita School District Santa Maria--Santa Barbara The proposed project consists of constructing an elementary school that would serve up to a maximum of 700 students attending kindergarten through sixth grade and would employ 42 full time staff and 24 part-time staff (teachers and administration). The school will include 27 classrooms and administrative and multi-purpose buildings. Various ball courts and play areas would also be built. The school would relieve overcrowding at Liberty, Adams, and Battles Elementary Schools.	MND	09/16/2008
2008081068	Mid-Peninsula Housing Coalition - Cynara #1 Monterey County --Monterey Mid-Peninsula Housing Coalition (Mid-Pen), the project applicant, is requesting a Combined Development Permit consisting of: (1) a Lot Line Adjustment to combine four existing lots (total 67,222 square feet) into two new lots of 58,502 square feet and 8,720 square feet; (2) a General Development plan for a mixed-use development including 40, 100% affordable apartments and townhouses, a 1,800 square foot community center, and 750 square foot retail/office/commercial uses; (3) Site Plan and Design Review for development in the Castroville Community Plan Merritt Street Corridor Opportunity Area. The project includes a 1,850 square foot community center for residents; grading is approximately 20,000 cubic yards of fill and 20 cubic yards of cut.	MND	09/16/2008
2008081069	Felicity Monterey County --Monterey Combined Development Permit consisting of: (1) a Coastal Administrative Permit for the demolition of 2,577 square feet of an existing single family dwelling and demolition of an existing 480 square foot guesthouse, and the addition of 7,089 square feet to the single family dwelling, and grading of approximately 890 cubic yards of cut and fill; (2) a Coastal Development Permit for the construction of an 850 square foot caretaker unit; (3) a Coastal Development Permit to allow development within 50 feet of a coastal bluff; (4) a Coastal Development Permit to allow development within 750 feet of a known archaeological resource; (5) a Coastal Development Permit to allow development within 100 feet of environmentally sensitive habitat; and (6) Design Approval.	MND	09/16/2008
2008081070	5438 PS 2-07; ZCC #9, Map 139-27 Kern County --Kern (a)A change in zone classification from E(20) to E(1) RS or a more restrictive district; (b) Tentative Tract Map 6911. The applicant is seeking a change in zone classification from E(20) to E(1) RS to process with a subdivision map, Tentative Tract Map 6911, which would divide the site into 20 lots ranging from 1 acre (net) to 1.8 acres (net) for single-family residential use and a 27,750 square foot (net) sump lot. Access is proposed from Flint Street.	MND	09/17/2008
2008081071	Renovation of the Vega Mutual Water System Facilities Pajaro Sunny Mesa Community Service District Unincorporated--Monterey This project will renovate and replace various water storage, pumping and transmission facilities that were previously owned and operated by the Vega Road	MND	09/17/2008

	Mutual Water Company. The renovation project will replace the majority of existing 10" waterline along Lewis Road, Vega Road, Marlin Way, and Oakleaf Drive. All storage tanks except the new Vista Verde Tank will also be replaced. Staging areas for the construction activity are planned to be vacant lots either owned by the PSMCSD or chosen by the construction contractor.		
2008082075	PA-0600287 San Joaquin County Stockton--San Joaquin A Use Permit application for a new church with a maximum seating capacity of 1,000 people (Use Type: Religious Assembly-Regional). The church will be constructed in five (5) phases over a twelve (12) year period. Phase includes the construction of one 12,500 square foot classroom building with an assembly hall to serve 350 people. Services will be held in this building until completion of Phase V. Phase II includes the construction of one 6,000 square foot classroom building and a 2,400 square foot maintenance building. Phase III includes the construction of a 6,200 square foot administration building. Phase IV includes the construction of a 16,000 square foot multi-purpose building. Phase V includes the construction of a 34,000 square foot church sanctuary.	MND	09/16/2008
2008082076	Brown-Grove Ditch Piping and Associated Actions Western Shasta Resource Conservation District --Shasta The purpose of the proposed project is to make improvements to the Brown-Grover irrigation ditch located in Shasta County, California approximately 24-miles east-northeast of Palo Cedro near the community of Whitmore. The Brown-Grover ditch begins, as an intake in a side channel of Old Cow Creek, approximately 10 miles upstream of the confluence of Old Cow Creek and Cow Creek. The proposed improvements include: <ul style="list-style-type: none"> - Installation of a concrete intake structure, headgate and fish screen - Installation of a temporary dam at the entrance to the side channel - Placement of pipe, ½ pipe, concrete junction boxes and wildlife water stations in portions of the ditch - Repairs to a flume crossing - Improvements to access trail and road 	MND	09/16/2008
2008082077	Northstar at Tahoe Skier Access Trail (PCPA T20080242) Placer County Truckee--Placer Project proposes approval of a Conditional Use Permit to construct a ski trail that connects the existing Home Run ski trail to existing Ski trail condominiums.	MND	09/16/2008
2008082078	Village @ Horseshoe Bar (PEAQ T20060869) Placer County Loomis--Placer Project proposes approval of a Minor Use Permit, Design Review, Improvement Plans, and Tree Permit to allow for the construction of three buildings consisting of 21,800 square feet of new commercial structures on the site. 2008082079	Los Gatos Creek/Glen Eyrie Towers Bank Stabilization Project Fish & Game #3 San Jose--Santa Clara The purpose of the project is to replace a failed portion of a sack concrete retaining wall with an engineered soldier pile wall, and to reinforce the footing of the remainder of the sack concrete wall.	MND	09/16/2008
2008082080	Brickyard Plaza 07-0212 Santa Cruz County --Santa Cruz This is a proposal to demolish an existing commercial building; construct three new commercial buildings of 6316, 6216, and 14,497 square feet; excavate approximately 1294 c.y. of earth and fill approximately 495 c.y., for a total of 799 c.y. of export; and to construct associated site improvements to include parking and landscaping. The property is located on the south side of Soquel Drive, approximately 450 feet east from 7th Avenue, at 2776 and 2806 Soquel Avenue, Santa Cruz, California.	MND	09/16/2008
2008082081	Papermill Building Mixed-Use Project Emeryville, City of Emeryville--Alameda The project applicant is proposing to demolish most of two existing buildings and to construct two new mixed-use buildings on the project site. The project would demolish a one-story building known as the Papermill building on the eastern portion of the site fronting Powell Street, Doyle Street, and Stanford Avenue and a one- to three-story building located on the western portion of the site fronting Powell Street, Hollis Street, and Stanford Avenue. The facades of the Papermill building that front Doyle Street and Stanford Avenue would be retained and incorporated into one of the two new buildings proposed for the site. Two new four-story buildings are proposed for the site, which would contain 187,224 square feet of residential space, 4,245 square feet of live/work space, 3,446 square feet of flex-space, and 10,516 square feet of retail/restaurant space. The project would also include a park, plaza, and two courtyards.	MND	09/16/2008
2008082083	260 El Camino Real Project Burlingame, City of Burlingame--San Mateo The project sponsor, S.C. Properties, proposes to demolish the existing gas station and construct in its place a two-story retail building ("proposed project") at 260 El Camino Real, at the corner of Burlingame Avenue, in the City of Burlingame. The proposed retail building would have a 9,813 square-foot footprint, covering approximately 77 percent of the 13,191 square-foot parcel. This proposed site coverage combined with the second floor area results in a floor area ratio of 0.94. The total floor area of the proposed structure would be approximately 13,755 gross square feet, the majority of which would be devoted to a retail sales floor. The building would be 25.75 feet tall as measured to the top parapet around the perimeter, with 28.75 foot-tall parapets flanking the entrance. The ground floor would contain a pharmacy, a photo shop, two bathrooms, a receiving area, a trash area, and electrical, gas, and janitorial closets. The 3,942 square-foot second floor would include storage and stock rooms, an electrical room, an employee room, a training room, office, and two restrooms, and would be located above the pharmacy and receiving area. The roof plan includes five HVAC units, a condenser unit, a six-inch satellite dish, an elevator penthouse, and a roof drainage and overflow plan.	MND	09/16/2008

2008081067	Santa Rita Hills Wine Center Project Lompoc, City of Lompoc--Santa Barbara The Santa Rita Hills Wine Center is a proposed 9.6 acre "wine center village" at the eastern entrance to the City, at the northeastern corner of the intersection of State Highway 1 and State Highway 246. The proposed project would include "wine industry related hospitality and service", a 55-room bed and breakfast, restaurant, bar, an event center, and spa. The event center ballroom would provide for 225 occupants and when used with the adjacent 80 occupant banquet room would accommodate 300 attendees. Other proposed uses include mixed-use buildings for retail, second story professional office space and possible 'live/work' residential units, walled patio areas, and other on-site amenities. Limited wine production is proposed during the months of August through October in one of the existing on-site industrial buildings. The site will have on-site parking and landscaping. The Wine Center would operate 7 days a week, all year round.	NOP	09/16/2008
2008081064	RENV T200700078 / PM 068934 26839 Triumph Avenue, Canyon Country Los Angeles County Santa Clarita, Unincorporated--Los Angeles The proposed project is a request for a Parcel Map to subdivide 4.93 acres (one existing parcel) into two (2) lots, for single family residential use. The current property use is single family residential. There is an existing residence on the northern portion of the property, the southern portion is vacant, undeveloped and undisturbed. The new parcel is proposed for future a single family residence use. No construction is proposed at this time. The project will use domestic water and septic sewer disposal systems. No grading is proposed on the project site.	Neg	09/16/2008
2008081065	Salton Sea Estates IV, LLC - CUP08-0019 & V08-0002 Imperial County --Imperial The applicant, Salton Sea Estates is applying for a Condition Use Permit 08-0019, in order to construct a large 69' high x 19' wide pole sign on the corner of a large truck stop operation currently in the construction phase of development. The future pole sign will advertise the onsite and offsite commercial truck stop (ARCO) am-pm, a Travel Center, two electronic signs showing current fuel prices and a Arco fuel display, certified scale sign, RV Disposal sign, a Propane Racing Fuel sign, a business across the street called Travertine Grill and there two space available for advertising businesses on two smaller adjacent parcels which are associated with the truck fuel operations. The Arco Fuels and fuel pricing display will be a Daktronics Galaxy 46mm RGB Outdoor LED Matrix Display. The remainder of the signs will be illuminated except for a County of Imperial Welcome display which is located on the bottom of monument above the rock work and will be non-illuminated. The majority of the digester work will occur on the current MWWTP site. The FOG facility construction and building demolition will take place on the newly-acquired former U.S. army Reserve property.</p>	NOD	
2008071071	<p>Robertson's Ready Mix Plant Relocation and Absolute Self-storage (Case Numbers PA06-0179/0180 & P08-047) Moreno Valley, City of Moreno Valley--Riverside</p> <p>The proposed project involves two components. The first is a batch plant for manufacture of ready mix concrete. The batch plant is a replacement for the existing Robertson's batch plant on Day Street in the City of Moreno Valley and proposes both central mixer (wet) and traditional transit-mix (dry) plants. Proposed batch plant site improvements include silos, a central mixer, aggregate bins, conveyors, a two-story office building, an underground diesel storage tank, on-site circulation and parking, and a detention/infiltration basin. A three-sided concrete tilt-up structure resembling nearby warehouse buildings will contain on-site aggregate and sand storage.</p> <p>The self-storage facility proposes approximately 690 units in seven, one and two story buildings (approximately 99,000 square feet total building area) with an office and caretaker's residence. This aspect of the proposed project is designed as an integral aspect of the overall site design, and is intended to screen the batch plant.</p>	NOD	
2008089016	<p>Construction of Arsenic Compliance Facility at Existing Well Site #7 Victor Valley Water District Victorville--San Bernardino</p> <p>The project involves the construction of a treatment facility in compliance with Federal Environmental Protection Agency (EPA) and California State Department of Health Services Safe Drinking Water Standards under the new arsenic rule.</p>	NOD

<u>Documents Received on Monday, August 18, 2008</u>			
	The arsenic removal facility is covered under a separate CEQA review.		
2008089017	Self Help Enterprises Parksdale Well Installation Madera County --Madera To drill and equip a new drinking water well that will include a 125 horsepower pump, designed to produce from 800 to 1000 gallons per minute. There will be a 10,000 gallon hydro-pneumatic tank (approximately 8 feet diameter by 28 feet in length) with no storage tank. There will also be one light pole to provide light to the site.	NOD	
2008088184	Existing Halfpipe Relocation Placer County --Placer The project will consist of the relocation of an existing halfpipe. The existing halfpipe will be relocated approximately 20 feet to the southeast to be more underneath the Vista Express lift and uphill converging ski trails. Approximately 130 trees will be removed on the east of the existing halfpipe. The new halfpipe radius will be increased by four feet from the existing 18 feet to 22 feet. Approximately 93,456 square feet of new disturbance will occur, of which most will be located on an existing ski trail. Cuts and fills will be approximately 30,500 cubic yards, resulting in a balanced cut and fill area. Dirt maintenance roads will be used for construction access. The purpose of the new halfpipe is to provide increased terrain between merging skier and snowboard traffic as well as to meet the demands of modern snowboard equipment and the advancements being made in snowboard technique. Ski resort customers will benefit from these improvements.	NOE	
2008088185	Replace two cross-culverts Caltrans #2 --Tehama The California Department of Transportation (Caltrans) is proposing to replace two cross-culverts to improve maintenance operations. The project is located in Tehama County on Highway 36 approximately 2.5 miles east of Mineral. The proposed culvert replacement will occur at Postmile Marker (PM) 85.58 and 85.65. The culverts are in poor condition and can no longer be repaired. They are undersized and often become blocked with woody debris. As a result, water overflows the culvert inlet and causes erosion to the hillside and road banks along the highway. Furthermore, the existing inlets do not meet current design standards and are difficult to maintain. The project will replace each of the cross-culverts with an appropriately sized pipe designed to meet the specific needs at each location. The inlets will be replaced with new structures and relocated to meet current design standards. Paved shoulders will connect the existing edge of pavement of the new inlet structures. Limited staging will be available at a dirt pull out near the outlet of the culvert at PM 85.58. Additional staging for equipment and materials is available at a paved pullout just east of the project site at postmile 86.3. Replacing the culverts will require permits from the California Department of Fish and Game, Regional Water Quality Control Board and the Army Corps of Engineers. Caltrans is consulting with Lassen National Forest Service on this project. All work will take place within the existing right-of-way limits. No additional right-of-way is needed to complete the project. No biological or archaeological resources were identified to occur inside the limits of the project.	NOE	

CEQA Daily Log

Documents Received during the Period: 08/16/2008 - 08/31/2008

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<u>Documents Received on Monday, August 18, 2008</u>			
2008088186	<p>Highway Improvement Caltrans #2 --Tehama</p> <p>The California Department of Transportation (Caltrans) is proposing to improve a segment of highway by increasing the land width, adding paved shoulders and providing an unpaved catchment area next to the roadway. The project is located in Butte County approximately 40 miles northeast of Chico and one mile east of Soda Springs Road. The project site is located in mountainous terrain above 3,900 feet of elevation. The section of highway to be improved is a narrow through-cut with uphill slopes next to each side of the road. The travel lanes are 10 to 11 feet wide and the distance between the edge of pavement and the bottom of the uphill slope is as little as 2 feet in most places. This results in narrow lane width, no shoulders, and ice formation on the roadway and limited sight distance through the curve. Due to the lack of space between the road and the hillside, there is not enough room to allow maintenance crews the ability to perform standard debris removal and snowplow operations. In order to improve safety and ability to maintain the highway, the through cut between Post Miles 4.2 and 4.5 will be widened. Once completed, the new roadway will have 12-foot travel lanes and 2 foot paved shoulders. A 5 foot unimproved (dirt) catchment area will be provided adjacent to the shoulder to keep falling rock and debris from entering the roadway in addition to providing snow storage for snow plows during the winter season. Grading activities to widen the through-cut are expected to generate an excess of 1x800 cubic yards. Most of the excavation will take place along the northbound lane between PM 4.3 and 4.4. Selective tree removal will also take place in this area at the top of the slope. Thinning the stand of trees at the top of the slope will increase sun exposure on the highway and reduce the formation of ice on the road in the winter.</p>	NOE	
2008088187	<p>Median Improvement Caltrans #2 --Shasta</p> <p>The California Department of Transportation (Caltrans) plans to improve the median of Interstate 5 (I-5) in Shasta County. Improvements are planned for two separate sections of the median. The first section begins in the City of Anderson at the Deschutes Road under crossing, and ends north of Anderson 1.3 miles south of the Knighten Road over crossing. The second section begins at the south end of the City of Redding at the Churn Creek Road/South Bonnyview over crossing and ends at the Hilltop Drive over crossing. The improvements planned for the median, consist of constructing a median barrier. A barrier is needed to protect north and southbound traffic from accidents, caused by vehicles crossing the median and colliding with other vehicles. The type of barrier selected for this project will use 3 strands of steel cable supported by metal posts. A 4-foot-wide weed barrier will be placed below the cable system to reduce long-term maintenance costs. In order to maximize the effectiveness of the barrier system, the median of I-5 will be modified to be almost level within the project limits. Minor excavation and vegetation removal will occur in the elevated segments of the median, however most of the project limits will require fill material in order to raise the median to the desired elevation. Raising the median will require extending the existing drainage inlets and the use of fill material brought in from an outside source. The source for fill material that has been approved for this project is the north end of a small hill between I-5 and the northbound on ramp, at the northeast intersection of I-5 and Lake Boulevard. All work associated with this project will</p>	NOE	

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<u>Documents Received on Monday, August 18, 2008</u>			
2008088188	<p>take place within the existing right-of-way. No additional right-of-way will be necessary. The median of I-5 within the project limits was extensively graded and recontoured when the highway was originally built.</p> <p>Improve Safety Caltrans #2 --Shasta</p> <p>The California Department of Transportation (Caltrans) proposes to improve the safety of this section of State Route (SR) 299, between Post Miles (PM) 6.9 and 7.6 in Shasta County, because there is a higher than average accident rate occurring within the project area. It is anticipated that the accidents will be reduced by improving sight distance, improving the roadway geometrics by increasing the curve radius, and increasing the clear recovery zone. Caltrans will employ a "through cut" to realign the curve. This cut will generate approximately 102,000 cubic yards of material, which will be disposed of on site as an embankment. Slope ratios will be ¾:1 (H:V) for cut slopes and a maximum of 1.5:1 (H:V) for fill slopes reconstructed. Drainage systems will be replaced, extended, or removed as appropriate. The Reinforced Concrete Box (RCB) culvert at Yankee Gulch will also be extended 135 feet. The existing Lewiston Toll Road (Shasta County Road No. 5E01) will be reconstructed. Approximately 5.3 acres of new right of way will need to be acquired from two private landowners to facilitate the construction of this project. During clearing and grubbing operations, minimal trees and vegetation will be removed to prepare for the new roadway alignment. It is anticipated that blasting will be required for some of the roadway excavation; the blasting is not anticipated to produce any fly rock. Earthwork operations will be staged to allow traffic to pass through the construction site during the construction process. From Station 110 to 129, the new alignment is proposed to shift about 40 feet north of the existing curve. Material will be cut from the existing slopes and placed on the existing roadway. Work on extending the reinforced concrete box at Yankee Gulch, drainage system 5, will progress simultaneously with the earthwork activities; a clear water diversion will be utilized at this location during construction of the concrete box extension. Once the major earthwork operations are complete, a new sub base will be constructed and work on the remaining drainage systems will be completed. Scotch broom (invasive species) populations occur along the roadside in various areas with the project limits; it is anticipated that removal of the scotch broom will occur prior to the start of project construction, due to interagency eradication efforts.</p> <p>Project construction will take place during the dry season and all construction disturbed areas will be stabilized, by applying hydro-seed and or mulch, prior to the onset of winter rains to prevent sediment loss into Yankee Gulch and Willow Creek. Safety fencing and hazardous material cleanup will be available at the construction staging areas to prevent material and petroleum products from entering these drainages. No riparian vegetation will be removed to create staging areas. The project will conform to the Department's water pollution control standards; Best Management Practices (BMPs) will be utilized, as needed to further reduce the potential for sediment delivery into Willow Creek and Yankee Gulch. Environmental Sensitive Area (ESA) fencing will be place at the eastern end of the project to isolate a potential archaeological area from construction activities. Approximately 2,100 feet of silt fence will be installed along the southern catch line to prevent material from spilling into Willow Creek. The portion of the Lewiston Toll Road that is being impacted by this project is not eligible resource for listing with the National Historic Register. The following approvals will be</p>	NOE

	required prior to construction beginning: Army Corps of Engineers Nationwide Permit 404 authorization, Central Valley Regional Water Quality 401 Certification, and a California Department of Fish and Game 1602 Agreement.		
2008088189	California State Parks South Fire Road Reroute Project, Sugar Pine Point State Park Regional Water Quality Control Board, Region 6 (Lahontan), South Lake Tahoe --El Dorado To reroute 400 linear feet of dirt fire road away from General Creek. The new road would cross an intermittent tributary to General Creek. The old road and crossing would be restored. The Project will include approximately 100 feet of restoration along General Creek, which currently has steep, unstable bank.	NOE	
2008088190	Temporary Emergency Permit to Store and Treat Hazardous Waste by Dilution, Northrop Grumman Space Technology Toxic Substances Control, Department of Redondo Beach--Los Angeles A temporary emergency Hazardous Waste Permit has been granted to Northrop Grumman Space Technology (NGST) to store hazardous waste for up to 90 days and then to treat the hazardous waste by dilution in order to transport it offsite for disposal. The hazardous waste to be stored and treated is approximately 2 gallons of a reactive mixture, consisting of 20% hydroxyethylhydrazinium nitrate (HEHN), 70% water, and 10% organic solvents. The hazardous waste was generated from research activities. The waste was inaccurately classified as a flammable liquid rather than an explosive hazard, delaying shipment of the waste to a disposal site. The 90-day limit for storage of a hazardous waste will expire before permission is secured from Department of Transportation to ship the hazardous waste. Before shipment, the mixture will be treated by further dilution with water from approximately 20% HEHN to 1% to 2% HEHN. The final volume of hazardous waste will be approximately 40 gallons. As NGST does not hold a facility hazardous waste management permit for the location where the storage and treatment would take place, the Department of Toxic Substances Control (DTSC) has determined that an emergency permit should be issued. The permit is effective from August 15, 2008 to November 12, 2008.	NOE	
2008088191	Design Review Permit DR08-040 Tuolumne County --Tuolumne Design Review Permit DR08-040 to allow the installation of three modular homes to be used as a transitional shelter on a 0.4 plus or minus acre portion of a 5.1 plus or minus acre parcel zoned R-3:D (Multiple Family Residential:Design Control Combining) and O (Open Space) under Title 17 of the Tuolumne County Ordinance Code.	NOE	
2008088192	Tentative Parcel Map T08-006(1) Tuolumne County --Tuolumne Tentative Parcel Map T08-006(1) to reconfigure two parcels that total 6.6 plus or minus acres. The project site is zoned RE-5 (Residential Estate, Five Acre Minimum:Mobilehome Exclusion Combining) under Title 17 of the Tuolumne County Ordinance Code.	NOE

2008084001	Proposed Helipad at the San Francisco Department of Veterans Affairs Medical Center U.S. Department of Veterans Affairs San Francisco--San Francisco NOTE: Joint Document consists of EA and FONSI The VA proposes to build a 54 ft diameter helipad at the San Francisco VA Medical Center to complete its roles as a Federal Coordination Center (FCC) with the Federal Emergency Management Agency (FEMA) and the Department of Homeland Security. The helipad would be used only by helicopters transporting coordination officials and supplies to support the City of San Francisco and local community during natural and manmade disasters. The helipad would be constructed at the northwestern edge of the Medical Center campus.	JD	09/16/2008
2008081073	Circle Way Shoreline Protection, Stairway and Storm Drain Rehabilitation Laguna Beach, City of Laguna Beach--Orange The existing beach access stairs would be removed from the entrance at Circle Way to the terminus on the existing beach. In its place, the City would construct new access stairs. While the stairs are de-commissioned, the City will rehabilitate the existing 18" storm drain from Circle Way to the beach with a 42" storm drain and enlarges to 60" with velocity rings for the last 50' for energy dissipation. Nuisance flows will be diverted at the top of the stairs to the existing sewer system within Circle Way. Lastly, the City will construct approx. 75' long shoreline protective devise along the toe of the bluff from the existing sea wall to the west, to the new stairs.	MND	09/17/2008
2008082085	Marchi Parcel Map Subdivision and Special Permit Humboldt County Eureka--Humboldt A minor subdivision of an approximately 14,211 +/- gross square foot parcel into two parcels. Proposed Parcel 1 will be approximately 6,523 +/- gross/5,892 +/- net square feet and is developed with concrete slabs remnant of the building site for a manufactured home removed more than two years ago. No new development is proposed at this time on proposed Parcel 1. Proposed Parcel 2 will be approximately 7,688 gross/net square feet and is intended to accommodate the existing single family residence, carport, detached shop and shed. Minimal grading is anticipated and no trees are proposed to be removed as a part of this project. Water and sanitary services will be provided by the Humboldt Community Services District. A Special Permit is required for an exception to the minimum lot size requirement per Humboldt County Zoning Code Section 314-99.1.2 for proposed Parcel 1. The applicant has also requested approval of an exception to allow for a reduced frontage to allow for a flag lot configuration of Proposed Parcel 2 per Section 325-9 of the Subdivision Regulations. Cabral Station and Vicinity San Joaquin Regional Rail Commission Stockton--San Joaquin Project development at Site A is realignment/reconstruction of access to existing transit station, reconstruction and addition of new parking facilities, and construction of new open space, architectural and security features. Project (Site B) also proposes rehabilitation of historic station building and construction of additional passenger services, circulation, and parking facilities.	NOD	
2008032095	2006-126 TSTM, CUP, PD for Villa del Lago, the Resort at Lake Tulloch / Abramson Calaveras County --Calaveras Tentative Subdivision Tract Map, Conditional Use Permit and Planned Development for 30 residential lots ranging in size between 1,900 and 2,800 square feet to construct townhomes and a 3.8-acre common area, a Conditional Use Permit for common parking areas and recreational facilities to serve the subdivision and a Planned Development permit for the proposed townhouse and common area design to provide more detailed design review as required by the existing zoning of General Commercial - Planned Development (C2-PD). Each unit will have a single car garage and there will be a common driveway with adjacent guest parking for 48 vehicles.	NOD	
2008041140	Fish Passage Improvements at Cross Creek Ranch Cachuma Operation and Maintenance Board Lompoc--Santa Barbara The Applicant proposes to alter the streambed to modify an existing low flow crossing with a series of 5 rock weirs, extending downstairs for a linear distance of 250 feet. The weirs will be in approximately 40 to 50 foot intervals, U-shaped, a minimum of 3 feet across at the top, a maximum of 12 feet at the base, with no more than a 1-foot jump height and will be keyed into the bank with 2 to 3 ton rock. Most of the rock keys will be vegetated. Bank restoration will include the removal of the pipe and wire revetment and the gabion baskets. The bank will be terraced and graded as much as the property owner allows. A toe trench will be dug about 4 feet deep, and 2 to 3 ton rock will be placed into the trench. Three boulder rootwad structures will be installed along the upper reach and anchored to the boulders with 5/8 inch galvanized cable and Hilti adhesive. Coir erosion control fabric will be used on the upper portion of the bank above the terrace. About 600 native plants will be planted and native seeds will be spread on the terrace, bank, and on the top of the bank. Willows will be planted in the trench with the anchor boulders and rootwads. A concrete curb on the apron will be constructed to help centralize low flows across the apron and deepen the water on the crossing. A new drainage swale that collects water from a Highway 1 culvert will direct runoff into the creek, there will be some grading to the existing road that crosses low flow crossing. This project is in cooperation with the Santa Ynez River Technical Advisory Committee, and supported by the Department's fishery grants program.	NOD	
2008052095	Pacific Gas and Electric Line 2 In-Line Repair Project Fish & Game #3 Byron--Alameda, Contra Costa Pacific Gas & Electric Company proposes to perform a direct external examination of two pipeline sites, one located in rural southern Contra Costa County and the other located in rural northern Alameda County. 2006051135	Sanger Wastewater Treatment Plant Sanger, City of Sanger--Fresno The project consists of the adoption of the proposed "Waste Water Treatment Master Plan" for the City of Sanger's Wastewater Treatment Plant (WWTP) and the associated upgrade and expansion and operation of the facility through the year 2035. The project site is located about 1.5 miles southeast of the center of the City of Sanger (City) and west of the Kings River. New improvements include the following: construction of a headworks to replace the existing domestic headworks, a parshall flume for influent flow metering, two mechanical bar screens, two aerated grit chambers, an anoxic basin, an influent pump station, an oxidation ditch and associated facilities, two 55-foot diameter secondary clarifiers, a Return Activated Sludge (RAS) pump station disinfection facilities including a duplicate of the existing tank and metering pumps, a chlorine contact basin, and a second centrifuge. In addition, new support facilities include: Control/Administration Building, expansion of maintenance building, a new standby generator, upgrade of existing electrical system, and Supervisory Control and Data Acquisition (SCADA) workstations through the plant. Two of the existing effluent pumps would be replaced with larger pumps. A second domestic force main (18-inch diameter) to transport treated effluent to the Lincoln Ponds will be constructed parallel to the existing force main. The route for the second pipeline will be 4 miles long and is within the right-of-way for Newmark Avenue. A second electrical transmission line may also be necessary and will run parallel with the existing transmission line along Ross and North Avenues.	EIR	10/14/2008

	The proposed project would expand the WWTP to treat an Average Day Maximum Month Flow (ADMMF) of 5.3 million gallons per day (mgd).		
2007071145	New Leaf Homes Los Angeles, City of Los Angeles, City of--Los Angeles At the time the Notice of Preparation (NOP) for this project was sent out the project included the construction of 11 new homes (compared to the one new home now proposed) and remodeling of the five existing unfinished homes (now the applicant proposes to complete these five homes rather than substantially remodel and complete them). Since publication of the NOP the project applicant has held extensive discussions with surrounding property owners and has agreed to reduce the project to the currently proposed plan.	EIR	10/06/2008
	The applicant, Alan Kapilow, now proposes to construct one new home and complete 5 partially constructed homes on a 3.37 acre site. About 0.40 acre of unimproved street would remain on the site (Leicester Drive). The full improvement of about 0.39 acre of public streets (Woodstock Road) is proposed; Woodstock Road through the site is currently graded but not paved. Woodstock Road and Leicester Drive pass through the site and terminate just southwest of the site. A large area of the site (13 lots) would be maintained as an open space easement through donation to the Santa Monica Mountains Conservancy or other means.		
2008022102	Pilgrim Haven Expansion/Redevelopment Los Altos, City of Los Altos--Santa Clara The project is the modernization of the existing Pilgrim Haven Continuing Care Retirement Community to change the unit mix and increase the number of living units or "beds" from 153 to 181 (a net increase of 28) and upgrade administrative offices, dining facilities, and activity rooms. The mix of living units after construction would include 105 independent living apartments, 33 assisted living beds, 14 memory support beds, and 29 skilled nursing beds. The proposed project would construct approximately 189,335 square feet of new facilities in two buildings and an approximately 52,037-square foot, one-story, below-grade parking garage. The project is located at 323 and 373 Pine Lane in Los Altos.	EIR	10/03/2008
1998052052	Pacific Herring Commercial Fishing Regulations Fish & Game Commission -- The proposed project is a body of proposed regulations governing the commercial harvest of herring for roe products, bait, pet food, as fresh fish, and the harvest of herring eggs-on-kelp. The proposed project takes the form of recommendations for continuation, amendment, or change to an existing body of regulations in effect since November 2007 (Sections 163 and 164, Title 14, CCR). It also includes regulations from Section 163.1 (herring permit transfers) and 163.5 (penalties in lieu of suspension or revocation-herring permittees), Title 14, CCR that were adopted by the Commission on March 2006 and October 2002, respectively. 2008072008	55 Oak Hill Way Los Gatos, City of Los Gatos--Santa Clara Construction of one single family residence on a vacant lot.	MND	09/18/2008
2008081076	5473 SSK 2-08 Kern County Shafter--Kern Franchise Application by BioEnergy Solutions within the County of Kern. The project is comprised of an approximately 10-mile pipeline to be placed in the right-of-way of County roads. The pipeline is proposed to transport biogas from several dairies generally located south of Lerdo Highway between the City of Shafter and Interstate 5. The dairies participating in the project incorporate an on-farm anaerobic dairy manure digester to capture and collect biogas. The collected biogas is then compressed into a BES pipeline that transports that gas to an offsite upgrade and injection facility.	MND	09/18/2008
2008081080	Sweetwater Reservoir Loop Trail Project San Diego County --San Diego The proposed project is intended to establish and formalize the northern portion of the Sweetwater Reservoir Loop Trail. The project will connect to the existing southern portion of the trail so as to eventually allow for non-motorized recreational opportunities completely around the Sweetwater Reservoir, a 14.1-mile loop trail. The proposed northern trail to be constructed by the County is divided into eight trail segments (Segments 1, 1a, and 3 through 8), including drainage crossings over several named and unnamed drainages and two staging areas. The proposed project (northern loop trail proper) is approximately 5.3 miles in length. Segment 1a is approximately 0.64 mile in length.	MND	09/18/2008
2008082090	Environmental Assessment 2008-0002, Star Bend Boat Ramp Dredging Yuba County --Yuba The project site is located adjacent to the Feather River, and west of the intersection of Feather River Boulevard and Star Bend Boat Ramp in the unincorporated area of south Yuba County. The project sponsor is requesting County review and approval of an Environmental Assessment plan to allow the dredging of 2,730 cubic yards of silt material in the existing Star Bend Boat Ramp on approximately a 9 acre parcel (APN 016-010-017). Dredging of the project would restore the existing boat ramp channel and allow the re-launching of boats in an un-navigable channel. High water events in 2005-2006 led to high levels of silt and sediment in the boat launch channel.	MND	09/18/2008

	Drive approximately 40 feet north of the current Shastina Drive/Black Butte Drive intersection. In essence, the functional orientation of these two roadways would be reversed.		
	In conjunction with the proposed realignment of Black Butte Drive, the segment of Black Butte Drive between Vista Drive and Shastina Drive would be widened to accommodate the resulting increase in traffic. Lastly, the Black Butte Drive/Vista Drive intersection would eventually be signalized and existing depressions at the intersection filled.		
2008088209	Rio Linda/Elverta Community Water District - Well #16 Test Well Rio Linda/Elverta Water District --Sacramento The project consists of drilling a single pilot well boring and construction of a test well to: sample water quality; conduct geophysical logging to identify water bearing formations; conduct aquifer performance testing to evaluate well productivity. The primary purpose of this well is to collect information before committing to developing a municipal production well.	NOE	
2008088210	Student Housing Phases 3 and 4 California State University, Fullerton Fullerton--Orange Construction in the northeast quadrant of the Fullerton campus of five residence halls and related administrative and support space totaling approximately 315,000 gross square feet; plus a dining facility of approximately 24,000 gross square feet. The project will expand existing student housing capacity by 1,064 residents.	NOE	
2008088212	John Muir Drive Erosion Repair Project Fish & Game #3 San Francisco--San Francisco The SFPUC proposed project will stabilize three areas subject to flooding that results in severe erosion of the bank supporting John Muir Drive and the shoreline of Lake Merced in San Francisco, San Francisco County. A stacked boulder wall will be engineered at each project site. The stacked boulder wall will include a drilled pier acting as a retaining wall, geotextile fabric supporting riprap bedding and chinking, and large boulders acting as both a spillway and stilling basin for floodwaters. In addition, a loose riprap blanket will be placed at the base of the stilling basin to transition the floodwaters to a Bioengineered Zone with Coir biologs and shrub stakes. Plantings in the Bioengineered Zone would consist of stakes of native plants found in the vicinity of Lake Merced placed in Coir biologs to serve as sediment traps. The proposed project also includes a new alignment for the damaged handicap ramp. The California Department of Fish and Game is issuing Streambed Alteration Agreement Number 1600-2008-0340-3 pursuant to Fish and Game Code Section 1602, to the applicant, Ms. YinLan Zhang, San Francisco Public Utilities Commission.	NOE	
2008088213	20 Hilton Court, Emergency Watershed Program Streambank Repair Fish & Game #3 Walnut Creek--Contra Costa The project consists of the installation of vegetated loose rock slope protection to prevent further erosion to the existing stream bank located adjacent to the creek. Forty feet of vegetated rock slope protection will be installed. A three foot deep keyway will be dug in the stream invert. The rip-rap will extend approximately 4 ½ feet high from the stream invert. The rip rap will be vegetated with willows at the	NOE

	toe of slope and grass and sedge plugs at the top of slope.		
2008088214	40 Hilton Court, Emergency Watershed Program Streambank Repair Fish & Game #3 Walnut Creek--Contra Costa The project consists of the installation of vegetated loose rock slope protection and a vegetated, precast concrete block wall (Loffelstein wall or equivalent) to prevent further erosion to the existing stream bank located adjacent to the creek. Seventy-two feet of vegetated block wall will be installed. A 3 foot wide, by 3 foot deep L-shaped concrete footing will be trenched into the stream invert. The vegetated block wall will tie into the existing gabion wall on the upstream end and the native soil streambank at the downstream end.	NOE	
2008088215	Seasonal Crossings on Dry Creek and the Russian River for Syar Industry Fish & Game #3 Healdsburg--Sonoma The project will involve minor grading of the gravel bar to place seasonal bridges over the Russian River and Dry Creek. The project will result in minor alteration of land with negligible impacts to fish and wildlife. Issuance of a Streambed Alteration Agreement Number 1600-2008-0238-03 is pursuant to Fish and Game Code Section 1602.	NOE	
2008088216	3027 Kadema Drive/107 Highley Court Fence Use Permit Sacramento County --Sacramento The proposed project consists of a Use Permit to allow an 8 foot high fence between two adjacent properties in the RD-4 zone, in the Sierra Oaks Neighborhood of the Arden Arcade community.	NOE	
2008088217	1850 Maple Glen Road Variance Sacramento County --Sacramento The proposed project consists of the following: 1. A Variance to reduce side yard setbacks from 20 feet to approximately 12 feet to legitimize a garage structure and kitchen addition on an approximately 1.2 acre parcel in the RD-2 (NPA) combining zone. Note: Both structures were built in 1985. However, neither Variance approvals as required by the Arden Oaks Neighborhood Preservation Ordinance. 2. A Variance to reduce the side yard setback from 20 feet, as required by the Arden oaks Neighborhood Preservation Area Ordinance, to approximately 14 feet 6 inches for a garage addition to an existing one-story single family dwelling.	NOE	
2008088218	Tentative Parcel Map T08-032 Tuolumne County --Tuolumne Tentative Parcel map T08-032 to adjust an area of 1.6 plus or minus acres from a 62.84 plus or minus acre parcel, APN 66-181-72 to a 28.13 plus or minus acre parcel, APN 66-181-71. The resulting parcels will be 61.3 plus or minus acres and 29.7 plus or minus acres in size. The site is zoned A-20 (General Agricultural, Twenty Acre Minimum) under Title 17 of the Tuolumne County Ordinance Code.	NOE

2008088219	Williamson Act Contract 05WA-132 Tuolumne County --Tuolumne Application 05WA-132 to rescind the existing Williamson Act land conservation contract on a 3,535 plus or minus acre site pursuant to Resolution 134-85 and execute a new Williamson Act land conservation contract pursuant to Resolution 106-04, including approval of the agricultural management plan.	NOE	
2008088220	Approval of water transfer agreements to allow 8,350 acre feet of Colorado River Aqueduct water to be delivered to Desert Water Agency's Mission Springs.. Desert Water Agency --Riverside On August 19, 2008, the Board of Directors of the Desert Water Agency approved (1) Execution of a Water Supply Agreement Between North Kern Water Storage District and Desert Water Agency, (2) Execution of a Water Supply Agreement Between CPV Sentinel, LLC and Desert Water Agency, and (3) Execution of an Agreement Between the California Department of Water Resources, Kern County Water Agency, and Desert Water Agency for the Transportation of Water in State Water Project Facilities. These agreements authorize the purchase of 8,350 acre feet of water from North Kern Water Storage District and the transfer of that water, via existing State Water Project facilities, to the Metropolitan Water District of Southern California. In exchange for that water, Metropolitan Water District shall deliver to Desert Water Agency an equal quantity of water from its Colorado River Aqueduct entitlements for delivery to Desert Water Agency's Mission Springs Spreading Grounds for potential future purchase by CPV Sentinel, LLC in connection with a power project being analyzed by the California Energy Commission.	NOE	
2008088221	Hansen Dam Parking Lot Mountains Recreation and Conservation Authority Los Angeles, City of--Los Angeles Project proposes the installation of bioswales and treatment wetlands to capture, treat and reuse wet and dry weather flows from three parking lots. The project would redesign and resurface portions of one parking lot and redirect flows from this and two other parking lots into a complex of constructed storm water treatment wetlands, including the removal of invasive plants and native plant restoration.	NOE	
2008088222	Modification of Processes at Sierra Del Oro Water (SDO) Treatment Plant Corona, City of Corona--Riverside The modification to SDO WTP will be the addition of plastic floating Bird Balls to the flocculation and sedimentation basins, switching to chloramines as a primary and secondary disinfectant, and the addition of baffle curtains to the existing reservoirs. These modifications will help the City in continuing to provide high quality water as well as staying in compliance with the Long Term 2 Enhanced Surface Water Treatment Rule and Stage 2 Disinfectants and Disinfection Byproducts Rule.	NOE	
2008088223	Zone Change RZ08-013 Tuolumne County --Tuolumne Ordinance for Zone Change RZ08-013 to rezone a 1.8 plus or minus acre portion of a 295 plus or minus acre parcel from M-2 (Heavy Industrial) to O (Open Space) under Title 17 of the Tuolumne County Ordinance Code.	NOE

2008088224	Student Health Building Yurt Project University of California, Santa Barbara Santa Barbara--Santa Barbara The University of California, Santa Barbara proposes to install a 24-foot diameter canvas clad structure with a maximum height of 14 feet at the center (yurt). The yurt is a pre-engineered modular structure purchased in components and would not be connected to any utilities and would not require electricity, gas, water, or sewer. An American Disabilities Act (ADA) ramp would be attached for access into the yurt. A stone pathway would be installed from the sidewalk to the ramp. The yurt has a wooden lath interior which supports for the canvas skin. The yurt would be installed in a vacant lawn area adjacent to the north side of the Student Health building and parking. The total site area is 1,200 square feet and the yurt footprint is 452 square feet.	NOE	
2008088225	Transfer of coverage to El Dorado County Tahoe Conservancy --El Dorado Project consists of the sale and transfer of 555 square feet of potential coverage rights from Conservancy-owned land to a receiving parcel on which a private residence will be constructed. The transfer enables the receiving landowner to carry out the project without any net increase in the amount of existing land coverage in the hydrologically-related area.	NOE	
2008088226	Acquisition of Castagnola Parking Lot Parks and Recreation, Department of Santa Barbara--Santa Barbara The project consists of proposed acquisition (County of Santa Barbara Assessor's Parcel Numbers 031-012-002 and 031-012-021) of land which is currently a paved asphalt parking lot. The two contiguous parcels encompass the area named as the Castagnola Parking Lot. The project is part of an ongoing program to provide an eventual opportunity to restore properties associated with the early historic development of Santa Barbara.	NOE

	seventy-five acres within the Specific Plan area. The project also proposes to vacate Rincon Street from Main Street to Sheridan Street and to extend Sheridan Street from Rincon Street to River Road.		
1999101054	Copper Creek South, Revised Vesting Tentative Tract Map No. 43589 Los Angeles County Santa Clarita--Los Angeles The proposed revision for this subdivision is for 31 single family residential lots on 6.91 acres (a reduction from a previous high for 90 single family unit and subsequent 52 unit proposals), six open space lots totaling 60.81 acres, one debris/retention basin lot at 0.63 acres, and streets totaling 5.31 acres. A conditional use permit for hillside management, off-site grading transport and density controlled development, and a zone change to re-zone the property from A-1-1 DP (light agricultural, one acre min. size lot required/development program) and A-1-1 (light agricultural, one acre min. size lot required) to R-1-5,500 (single family residential, 5,500 sq. ft. min. size lot required) are also proposed for this project. Grading is proposed for 139,000 cubic yards of cut and 425,000 cubic yards of fill, which will include 286,000 cubic yards of imported fill from the Copper Creek North project site (VTTM 47760). Copper Creek South is a reduced project with an DEIR Amendment to the original DEIR, circulated for the larger sized 90 unit project (a.k.a. Copper Hill Homes) in October 2003, with subsequent hearings before the Los Angeles County Regional Planning Commission for that project in January 2004, and in November 2006 for the 52 unit proposal.	EIR	10/09/2008
2003072087	Teichert Quarry General Plan Amendment, Rezone, Use Permit and Reclamation Plan and Development Agreement Sacramento County Folsom, Rancho Cordova--Sacramento The project proposes a hard rock mine and consists of the following discretionary entitlements -General Plan Amendment to remove the Resource Conservation Area designation which covers a 260-acre portion of the site, and add the Aggregate Resource Area Designation over the entire approximately 580-acre site. -Rezone of 580 acres from AG-80 (Agriculture - 80-acre minimum lot size) to AG-80 (SM) (surface mining combining) for the entire approximately 580-acre site. The Surface Mining combining zone allows mining and associated ancillary uses with the approval of a conditional use permit and reclamation plan. -Conditional Use Permit to allow (a) hard rock mining on a 380-acre portion of the 580-acre site, and (b) operation of an aggregate processing and conveyor system (the conveyor transporting material to an existing permitted mining operation). -Reclamation Plan to adequately demonstrate reclamation and reuse of the 380 acre mining area. -Grading Permit for (a) construction of an aggregate conveyor, water pipeline, electric infrastructure, and associated maintenance road on land adjacent to the mine site that is zoned AG-80; and (b) construction of a public access road within an existing unimproved County Right of Way (ROW) along the eastern boundary of the mining area and northerly to White Rock Road; and -Encroachment Permit for (a) connection of the proposed access road to White Rock Road, and (b) construction of a conveyor passage beneath Scott Road. -A Development Agreement between the applicant and the County of Sacramento. 2004071030	Copper Creek North, Vesting Tentative Tract Map No. 47760 Los Angeles County Santa Clarita--Los Angeles The enclosed Draft Environmental Impact Report (DEIR) has been prepared for the above project located in the unincorporated area of Bouquet Canyon of the County of Los Angeles, approximately one quarter mile north of Copper Hill Drive and the City of Santa Clarita, and approximately one mile west of Bouquet Canyon Road. The proposed project site is 452.8 acres in size and is currently vacant, and is accessible from Copper Hill Drive through a dirt road which runs adjacent to Haskell Canyon Wash which is used to service power lines and towers, and a movie ranch and the National Forest to the north. The proposed subdivision is for 484 single family residential lots, a public park lot, an elementary school lot, seven debris basin lots, and a water tank lot. Open space dedications are also proposed. A conditional use permit, oak tree permit, zone change, general plan and area plan amendments are also proposed for this project. The project site is also bisected by a 300 to 600 foot wide Los Angeles City Department of Water and Power (DWP) fee ownership traversing from north to south. Also, a 600 foot wide Southern California Edison (SCE) easement traverses the site from east to west at the southern project limit. Grading is proposed for 6.3 million cubic yards of cut and 6.0 million cubic yards of fill, with the excess of 0.3 million cubic yards to be exported to the proposed Copper Creek South project site (VTTM 43589).	EIR	10/06/2008
2006112002	Angels Camp 2020 General Plan Angels Camp, City of Angels Camp--Calaveras The Angels Camp 2020 General Plan is a comprehensive update of the Angels Camp 1995 General Plan to govern land use development through year 2020 including the following elements: Land Use, Housing (previously adopted), Circulation (Transportation), Conservation & Open Space, Noise, Health & Safety, Public Facilities & Services, Cultural Resources, Air Quality, Economics, Community Identity and Parks & Recreation. The current city limits encompasses 2,270 plus or minus acres on 2,331 plus or minus parcels. A revised Primary Sphere of Influence is included in the 2020 General Plan.	EIR	10/09/2008
2007032029	SacPort Regional Terminal Tankfarm Project West Sacramento, City of West Sacramento--Yolo The Project proposes to relocate the operations of up to four existing petroleum terminals from along the banks of the Sacramento River which are currently operated by Chevron, ConocoPhillips, Shell and BP/Arco. The construction of the proposed SacPort Terminal would include the consolidation of 49 existing petroleum storage tanks to approximately 17 new tanks at the Port of Sacramento site. In addition, the Project proposes to construct a new 1.8 mile pipeline connection to an existing 8-inch Chevron pipeline that currently serves Chevron's Sacramento River terminal. Construction of the new pipeline connection would extend along the south side of the Port Turning Basin and Barge Canal from the west side of the Palamidessi Bridge to just east of Jefferson Boulevard.	EIR	10/06/2008
2008031020	South Region High School No. 15 Los Angeles Unified School District --Los Angeles Development of an approximately 107,627-square-foot high school that include 30 classrooms, administration areas, a multipurpose room, a library, 36 wind turbines, and 600-seat outdoor amphitheater. These facilities would be contained in	EIR	10/06/2008

	two-story buildings approximately 43 feet high. Athletic facilities such as baseball, softball, soccer fields, and basketball courts are planned along the southern perimeter of the site. The proposed project may also provide for adult and continuing education programs (approximately 15 classrooms with up to 450 students), which would operate weekdays from 6:00 p.m. to 9:00 p.m. and on Saturdays between 8:00 a.m. and 2:00 p.m.		
2006091037	Merced County Enterprise Zone Merced County Atwater, Dos Palos, Gustine, Livingston, Los Banos, Merced--Merced The project would re-establish the Enterprise Zone in portions of Merced County and in certain areas within the cities of Atwater, Dos Palos, Gustine, Livingston, Los Banos, and Merced that are considered to be disadvantaged areas (i.e., high unemployment and low-income). The project objective is to generate new private sector economic growth in disadvantaged areas of Merced County and the cities of Atwater, Dos Palos, Gustine, Livingston, Los Banos, and Merced by providing access to a variety of incentives for increased employment and business investment within those areas.	FIN	
2008081087	County Line Center (J&R Oil) Calimesa, City of Calimesa--Riverside The Project involves the development of a gas station development with 16 fueling stations under a 4,395 square foot canopy, a 2,900 square foot convenience store, a 1,200 square foot carwash, a 6,500 square foot retail center, and a 3,200 square foot fast food restaurant. The total building area is 18,195 square feet.	MND	09/22/2008
2008081088	Variance DRC2006-00166 San Luis Obispo County --San Luis Obispo Request by Michael Deveau for a Coastal Development Permit and Variance to allow a 1,800 square foot single family residence with a 600 square foot detached garage on slopes steeper than 30%. The project will result in the disturbance of approximately 7,000 square feet on a 9,000 square foot parcel and within the road right-of-way of Old Creek Road (for road improvements). The proposed project is within the Residential Single Family land use category and is located on the north side of Old Creek Road, approximately 1/4 east of Highway 1, in the community of Cayucos.	MND	09/22/2008
2008081089	Mary Street (Frances Mary Relocation) Booster Station Project Riverside, City of Riverside--Riverside The proposed Project is a capital improvement project to relocate the pump station and pressure reducing valve to a new location and increase the capacity. The Project involves several components; the construction and operation of a proposed booster station and pressure reducing valve; installation of pipelines in existing roadways; and the decommissioning of the existing Frances Mary booster station. The proposed pump station and pressure reducing valve would be sited together on the southwestern portion of Washington Park. The proposed pipelines would be located in Mary Street and Victoria Avenue and connect proposed facilities to the existing system.	MND	09/22/2008

2008081091	Riverside County Fire Dept.'s Cajalco Fire Station and Improvements to WMWD's Operations Center Riverside County Riverside--Riverside The project consists of five main components: (1) construction and ongoing operation of a new approximately 8,000 square foot, 12-person (Heavy Urban Station) Cajalco Fire Station (the Fire Station), which will replace the existing Cajalco Fire Station located at 17650 Cajalco Road, by the Riverside County Fire Department and a new 1,200 square foot Meeting Room that will accommodate up to 75 people on approximately 2 acres; (2) construction and operation of an approximately 19,000 square foot operations building for approximately 90 staff and an approximately 12,600 square foot shop building, installation of a natural gas refueling station and chlorine scrubber, 195 covered parking stalls, and widening of the driveway/internal site access road from two lanes to four lanes on 7.6 acres at WMWD's Operations Center at 16451 El Sobrante Road in unincorporated Riverside County; (3) installation of a 15,000 gallons per day (gpd) package wastewater treatment plant (WWTP) or as an alternative to the construction of a lift station and a 4- to 6-inch diameter force main to one of two WMWD collection systems; (4) removal of a subsurface septic system; and (5) installation of a traffic signal on El Sobrante Road at the entrance to WMWD's Operations Center.	MND	09/22/2008
2008081092	Santa Ana River Trunk Sewer Replacement Project Riverside, City of Riverside--Riverside The proposed project consists of the construction of approximately 19,600 feet of a new 48-inch diameter trunk sewer to replace an existing trunk sewer. The project alignment is located roughly parallel to and south of the Santa Ana River, within the City of Riverside and unincorporated areas of Riverside County, starting at the northeastern corner of the 120-acre Riverside Regional Water Quality Treatment Plant and proceeding northeasterly along the existing Santa Ana River Trail to connect with the Tequesquite Trunk Sewer in Tequesquite Avenue. In addition to the trunk sewer placement, the proposed project includes the repair of two storm drains along the alignment.	MND	09/22/2008
2008081093	Highway 126 Bicycle Path Gap Closure Phase II San Buenaventura, City of Ventura--Ventura The project includes the construction of a paved bicycle/pedestrian path that would close the existing gap in the bicycle/pedestrian path between the Ventura Community Park and a residential neighborhood west of the Park. The bike path would be approximately 1,100 linear feet. About 560 linear feet of the bike path would be installed along the SCE right-of-way and approximately 240 linear feet would be installed within a Caltrans slope easement. The remaining portion would be installed within the City right-of-way. A prefabricated bridge would span approximately 70 feet of the slope.	MND	09/22/2008
2008081111	Wastewater Treatment Plant Expansion Project Heber Public Utility District --Imperial The project is a capacity expansion of the Heber Public Utility District's Wastewater Treatment Plant from .81 million gallons per day capacity to 1.2 million gallons per day capacity. The proposed project is proposed within the existing wastewater treatment site which encompasses an approximate 6.7 acres.	MND	09/24/2008

	the North Fork of the American River. The antennae sites will be near the bank, above the height that water would reach during winter floods. Placement of equipment will not involve removal of trees, nor cutting branches because the sites will be chosen in clearings where trees are already sparse enough for the solar panels. Placement of equipment will not involve significant movement of vegetation, soil, or rocks. One or two rocks (weighing less than 20 pounds) may be moved to stabilize the tripod. In-stream work will include snorkeling to survey fish, amphibians, macroinvertebrates, water quality, and substrate, and tagging fish cause by recreational anglers. The stream channel will no be modified.		
2008088264	San Diego DSA Office Lease Architect, Division of the State San Diego--San Diego The Division of the State Architect proposes to lease about 22,060 square feet of office space in an existing office building in San Diego. The space would accommodate about 79 employees performing general office duties and there are no special tenant improvements required. Approximately 88 parking spaces are available for visitors and employees use. Local transit service is available near the project site.	NOE	
2008088265	2007-087 Variance for Richardson Calaveras County --Calaveras The applicants are applying for a corner as-built setback variance for APN # 098-005-008 from 20' to 10' (East side) and 10' to 6.5' (South side) for a residential addition.	NOE	
2008088266	Air Cooling Systems-Arnold Housing Unit Corrections and Rehabilitation, Department of Susanville--Lassen CDCR will design and install air cooling systems in the Arnold housing units at the California Correctional Center (CCC) in accordance with CDCR's Design Criteria Guidelines (DCG), which require indoor temperatures in the housing units to be maintained at or below 90 degrees Fahrenheit. The existing Mammoth brand units on the Arnold housing unit rooftops were designed and equipped to heat the buildings, but do not provide any type of air cooling system. Summertime temperatures inside the inmate housing units often rise above 90 degrees, and have been as high as 104 degrees. In addition to meeting DCG requirements, CDCR was mandated by the Coleman court order to establish and adhere to a Prevention Plan for Heat Related Pathologies due to the potential risk of inmate death when "heat-risk inmates" are exposed to extreme high temperatures, as experienced at CCC. This plan requires the Department to initiate Stage II and III Heat Alerts when the inside temperatures of a building housing "heat-risk" inmates reaches 90 and 95 degrees. This project includes the installation of small (residential) condensing units ground mounted on concrete pad. They will be installed on the property next to each building. Electrical capacity for the condensing units is available at each housing unit building equipment room.	NOE	
2008088267	Central Kitchen Water Treatment System Corrections and Rehabilitation, Department of Stockton--San Joaquin CDCR will install a water treatment system that will be used to condition the water supplied to the Central Kitchen at the NCYCC. A water treatment system is urgently needed to stop costly "hard water" damage in the existing pot washer	NOE

	<p>dishwashing machine and the existing cooling tower that supplies chilled water to the refrigeration system of the walk-in refrigeration boxes that store perishable commodities such as raw shell eggs and milk and milk products. The hard water is creating damage, premature failure of dishwashing equipment and cooling towers in the form of corrosion and scale incrustations. The current situation could potentially result in insufficient cleaning and sanitation of utensils and dishes, and lowering of the cooling capacity of the cooling tower would compromise the refrigeration system, comprising the safety of foods, and potentially resulting in spoiled food supplies and a lack of cold storage needed for prepared foods. The proper operation of the pot washing machine and cooling towers is vital to the facility to maintain compliance with California Health and Safety Code requirements. The installation of the in-line water softening treatment system will mitigate the damage being caused by the hard water that is running through this equipment. This project directly impacts the ability of CDCR to maintain a sanitary food processing facility, which is necessary to feed the youthful offender population housed at O.H. Close Youth Correctional Facility (YCF) and N.A. Chaderjian YCF, which are both located at NCYCC.</p>		
2008088268	<p>Retherm Kitchen Remodel Corrections and Rehabilitation, Department of Delano--Kern</p> <p>Food that is prepared in a separate kitchen is transported to NKSP Reception Center Retherm Kitchen for warming and serving. CDCR is planning to remodel and install additional equipment in the existing Reception Center Retherm Kitchen at NKSP. A remodel of the existing layout of the kitchen, along with the installation of an additional tray washing machine, will increase operational efficiencies and reduce the excessive number of repairs on the existing overburdened equipment, which must operate an average of 18 hours per day in order to complete food service cleaning tasks for approximately 4,400 inmates in the Reception Center at NKSP. Modifications to existing facilities include relocation of the pot and pan washer; installation of a new stainless steel table and sink with new industrial grade garbage disposal; installation of a new tray wash machine; and refurbishing the existing stainless steel table and sink with industrial grade garbage disposal.</p>	NOE	
2008088269	<p>Additional Freezers for Capacity Corrections and Rehabilitation, Department of Lone--Amador</p> <p>CDCR is planning to install two additional walk-in freezers to maintain adequate cold food storage space necessary to feed the inmate population at MCSP. A 10'x10'x 9' freezer is needed in the Correctional Treatment Center (CTC) and a 30'x10'x9' freezer is needed in the main kitchen to accommodate the inmate population. The existing freezers at MCSP are filled beyond the manufacturer's specifications, creating mechanical overload conditions; thus resulting in an escalation of food storage temperatures to unsafe levels and subsequent food spoilage. Modifications to existing facilities include the preparation of concrete pads to set the freezers on and the installation of the support utility access extending to the freezers.</p>	NOE	
2008088270	<p>Visitor Processing Center Corrections and Rehabilitation, Department of Vacaville--Solano</p> <p>The project will include installing a pre-built modular visitor processing center at the southeast corner of SOL, adjacent to an existing visitor parking area. Existing utilities will be extended to the modular. The single-story building will provide</p>	NOE

visitation area, restrooms, and offices. The project area is an open disturbed area with no sensitive resources.

The project will bring the facility into compliance with Title 15 (Crime Prevention and Corrections) of the California Code of Regulations (Article 7, Sec.3170), to provide for orderly, safe, accommodating environment conducive to "establish and maintain meaningful family and community relationships." The project will maximize visiting time by increasing the efficiency of visitor processing, will provide more secure visitor processing, and will provide acceptable shelter from inclement weather for visitors. Installation of the modular building will include construction of concrete pad, utility hook ups, and new concrete walkway; all site work and construction will be in compliance with Americans with Disabilities Act (ADA).

2008088271	Sacramento Southern Railroad Engine Repair and Maintenance Facility Parks and Recreation, Department of Sacramento--Sacramento Construct and operate a new facility to accommodate the Department's onsite maintenance of railroad equipment such as diesel and steam-powered train locomotives, and other railroad equipment. The project site is currently paved with asphalt concrete and used primarily for staff parking. Project work includes pavement demolition and removal; landscape tree removal; excavation and earthwork; a storm-water drainage system; underground utilities including water and electrical; a concrete block retaining wall; asphalt concrete paving; chain link fencing and gates; extended railroad track spurs; concrete flatwork; and new landscaping at the California State Railroad Museum. Included in the project work is the placement of up to 5 modular shipping containers for the Department's use for storage and work space.	NOE

2007052109	San Joaquin Regional Water Quality Improvement Project San Francisco, City and County of Tracy--San Joaquin The San Francisco Public Utilities Commission (SFPUC) proposes to improve the disinfection capabilities of the Tesla Portal site and the Thomas Shaft site. The proposed Tesla Portal Disinfection Station would be located at the Tesla Portal site and includes closing the existing Tesla Portal Hypochlorite Station and the construction and operation of replacement facilities. Also at the Tesla Portal site, the project would include the construction and operation of a new Advanced Disinfection Facility that would pass water by a series of ultraviolet light arrays. At the Thomas Shaft site, the Lawrence Livermore Water Quality Improvements would upgrade water treatment facilities.	EIR	10/08/2008
2007061078	Metro Universal Los Angeles, City of Los Angeles, City of--Los Angeles The Metro Universal Project proposes the development of approximately 1.47 million square feet of new commercial and possible residential uses in two phases. Phase 1 would include a 655,200 square-foot office and 315,000 square foot media production complex with up to 1,929 parking spaces, and a separate parking garage with up to 1,780 parking spaces, which would include park and ride spaces for Metro patrons. Phase 1 would also include up to 25,000 square feet of retail/restaurant facilities. Phase 2 would include a 489,100 square-foot office building or a mixed use hotel/residential building with 400 residential units, 300 hotel rooms and ancillary meeting rooms, 1,467 parking spaces would be provided. The project would also include new bus drop-off, transfer, and layover facilities associated with the Metro Red Line station.	EIR	11/24/2008
2008041015	San Diego Consortium for Regenerative Medicine (SDCRM) Project University of California, San Diego La Jolla--San Diego Note: Cross Reference SCH# 2003081023 The SDCRM proposes to construct a 135,000 sf research building that would consist of four levels of research laboratories, offices, and educational facilities. The site would also include 418 parking spaces and 3.2 acres of landscaping.	EIR	10/08/2008
1998072036	Wilfred/Dowdell Village Specific Plan Rohnert Park, City of --SONOMA The project is the Wilfred/Dowdell Village Specific Plan and Annexation, which encompasses a 24.77 acre site that is within the County of Sonoma and the Sphere of Influence and Urban Growth Boundary of the City of Rohnert Park and is generally located on each side of Wilfred Avenue, east of Dowdell Avenue, and north, east, and south of the current City limits in the vicinity of the intersection of Redwood Drive and Wilfred Avenue. The project is proposed to include approximately 302,114 square feet of commercial uses, with the potential for a hotel use on the site. The project will also include the annexation of the properties to the City of Rohnert Park.	FIN

	Agency, Metropolitan Water District of Southern California, Napa County Flood Control & Water Conservation District, Palmdale Water District, San Bernardino Valley Municipal Water District, and Tulare Lake Basin Water Storage District.		
2008088274	Issuance of Streambed Alteration Agreement No. R1-08-0172 Fish & Game #1 Redding--Shasta The project proposes the filling of 140 linear feet of an unnamed drainage with native fill material and installation of an 18-inch diameter, 140-foot long culvert placed 15-feet north of original drainage to handle any water that would have drained into the original drainage. There will be no removal of healthy, mature, scenic trees as a result of this project. The project will have no significant effect on the environment.	NOE	
2008088275	Issuance of Streambed Alteration Agreement No. R1-08-0294, Amaral Ranch Culvert Project Fish & Game #1 Red Bluff--Tehama The project proposes the installation of four corrugated metal pipe culverts in unnamed tributaries to the Sacramento River. DFG is also aware that in the proposed General Plan Amendment, Tehama County intends to change the land use designations in the vicinity of this project from what is currently upland agricultural/grazing to rural small/large lots, and from rural small lot to suburban development.	NOE	
2008088276	Humboldt Co. DPW - Fieldbrook Road and Murray Road, Rehabilitation and Shoulder Widening Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa --Humboldt The project consists of shoulder widening and drainage improvements along an approximately 1.5 mile segment of Fieldbrook Road that runs through the community. The existing roadway within the project area has two 10-foot wide travel lanes with minimal (zero to 2 feet wide) paved shoulders. The existing road provides insufficient space for motorists to adjust to emergency situations and for bicyclists and pedestrians to travel adjacent to the vehicle travel lanes. The project will improve line-of-sight distances and safety for pedestrians, bicyclists, and motorists by widening the roadway to include continuous four to six-foot wide paved shoulders along both sides of the 1.5 mile long section. A 3 mile long section of the road surface, including the 1.5 mile long section in the project area, will be rehabilitated and repaved shortly after the shoulder widening and drainage improvement activities are complete.	NOE	
2008088277	Wise Canal Bridge Replacement Placer County --Placer Remove and replace existing bridge over Wise Canal, connect 36-inch pipe to stubbed drain inlet on west side of canal only.	NOE	
2008088278	City of Anaheim Grade Crossing Improvements Anaheim, City of Anaheim--Orange The purpose of the project is to improve safety at ten railroad crossings within the City of Anaheim. The project proposes to construct new medians, exit gates, pedestrian and security gates; modify existing medians and install cantilever signals.	NOE

2008088279	Francis House Selective Demolition and Stabilization Work Calistoga, City of Calistoga--Napa (1) demolition of a dilapidated single-family home and detached shed located at 1409 Myrtle Street (APN 011-242-004); (2) demolition of a dilapidated single-family home at 1007 Spring Street (APN 011-242-015); (3) demolition of the non-historic "hospital additions" to the Francis House located at 1403 Myrtle Street (APN 011-242-015); and (4) performance of emergency interior stabilization work on the Francis House, including interior deconstruction and structural stabilization, removal of destroyed interior materials, and interim weatherization.	NOE	
2008088280	Tehama County Department of Social Service HVAC Mechanical Project Tehama County Red Bluff--Tehama The project consists of the completion of duct work and the mechanical connection of two existing HVAC units to heat and cool a storage area of an existing building.	NOE	
2008088281	Tehama County Sheriff/Library Parking Lot Seal Coat Project Tehama County Red Bluff--Tehama The project consists of the cleaning, crack sealing and seal coating approximately 14,676 sq. ft. of the parking lot and driveway at the Tehama County Sheriff's Department and approximately 28,548 sq. ft. of parking lot and driveway at the Tehama County Library.	NOE	
2008088282	Location and Development Plan 06-14, Conditional Use Permit 06-06 Adelanto, City of Adelanto--San Bernardino A request to construct a 750 bed Community/Correctional Detention Facility on a 10.98 acre property within the Manufacturing/Industrial (M/I) zoning district.	NOE	
2008088283	Mountain Home Conservation Camp - Runoff Containment Project Forestry and Fire Protection, Department of --Tulare This project involves the construction of a three-foot high earthen berm for the length of about 200 feet placed on a gentle hill slope below the existing spray-field at an existing CalFire Conservation Camp facility. A roughly 10-foot by 10-foot by 6-foot high concrete basin will be constructed at the downstream end of the berm, and a narrow trench will be dug from the basin up to an existing upper wastewater settling pond for a return line and an electrical line. The purpose of this work is capture wastewater runoff if a rain event occurs within 24 hours following spraying before it can enter into the nearby watercourses. The project is being done to carry out recommendations provided by the Regional Water Quality Control Board.	NOE	
2008088284	El Rancho Alegre Restoration Project Fish & Game #5 Moorpark--Ventura The Applicant (in agreement and coordination with the City of Moorpark) intends to alter the streambed by removing approximately 15,500 cubic yards of fill over a 1.95 acre area along the western bank of the Arroyo Simi. This process will include the removal of fill material, rip-rap and cement debris to restore the creek to the FEMA-defined functional capacity. Temporary impacts will occur to 0.25 acres near the active channel. The active channel will not be disturbed and all equipment will be excluded from entering the streambed and project access will	NOE

2004012088	Red Bluff Wal-Mart Supercenter Red Bluff, City of Red Bluff, Redding--Shasta	EIR	10/09/2008
------------	--	------------	------------

Red Bluff Wal-Mart Supercenter project at 608 Luther Road, APN 033-180-860. The proposed project includes single major tenant identified as Wal-Mart Stores, Inc., with a building size of approximately 180,824 square feet and a 20,517 square foot attached garden center (10,722 square feet under a hard canopy and 9,795 square feet fenced but uncovered). The revised project design reduces the overall building area by approximately 16,763 square feet - from 218,104 square feet to 201,341 square feet (including the attached open fenced garden center). The revised store floor area is comprised of approximately 140,387 square feet of retail floor area and 40,437 square feet of non-sales area (e.g., stockroom and ancillary space). The total retail use area square footage is 140,387 and 40,437 square feet of non-sales area (e.g. stockroom and ancillary space). The proposed parking area is 339,765 square feet gross. Approximately 775 parking spaces are proposed at a ratio of approximately 4.3 parking spaces per 1,000 square feet of retail space, or one parking space per 233 square feet. Based on the reduced size of the project and components for which the City calculates required parking, the number of required parking spaces would be 767. The proposed project includes a request for General Plan Amendment and Rezoning to extend the commercial

	land use designation and zoning that exists on the eastern approximately 14.0 acres of the project site to the existing residential zoning over the western approximately 2.0 acres of the approximately 16-acre parcel. The 2.0 acres are currently designated residential and zoned R-2 and R-4, Single Family Residential. An Administrative Use Permit is being requested to allow outdoor seasonal sales in a designated area of the parking lot consisting of approximately 8,369 square feet with enclosed fencing. The proposed project also includes applications for Design Review and Tree Replacement Plan approval.		
2007051115	Adelanto South Annexation Adelanto, City of Victorville--San Bernardino The South Adelanto Annexation proposes the annexation of approximately 2,823 acres of land from San Bernardino County into the City of Adelanto. The land uses rezoned for this area include single family residential, commercial, manufacturing/ industrial, open space/ public land/ school, and power easement. Development potential from these land uses could allow up to 9,211 residential dwelling units and 4.9 million square feet of commercial and industrial manufacturing uses within this portion of the City of Adelanto.	EIR	10/09/2008
2007072111	651 Addison Street Mixed Use Project Berkeley, City of Berkeley--Alameda The 651 Addison Street Mixed Use Project would involve the construction of a 5-story, mixed-use housing project with street level commercial. The proposed building would consist of 94 residential units, approximately 2,600 square feet of commercial space, and a 102 space parking garage with 26 bicycles. The proposed project would be comprised of 4 stories of residential over a ground floor comprised of commercial spaces, a parking garage, and a residential lobby. The residential component of the project would consist of a mixture of unit sizes, including 21 2-bedroom units, 51 1-bedroom units, and 22 studio units, for a total of 94 units. The project would also feature landscaping and open space features including an Aquatic Park Connection Streetscape Improvements.	EIR	10/09/2008
2008052011	San Tomas Business Park Santa Clara, City of Santa Clara--Santa Clara The project proposes a General Plan Amendment to Office/Research & Development and rezoning to PD - Planned Development (PD) to allow for the demolition of existing structures on the site and the construction of up to 1,950,000 square feet of office/industrial development in buildings up to 132 feet tall (99 feet to the top of occupied floor and 132 feet to the top of parapet). The proposed campus is intended as offices and high-tech lab facilities. Actions to be considered include approval of General Plan Amendment, Planned Development Rezoning, Tentative Parcel Map, Lot Line Adjustment and Development Agreement.	EIR	10/09/2008
2007122096	Point West Plaza Sacramento, City of Sacramento--Sacramento The proposed project includes the development of a neighborhood center that includes both commercial and office uses. The northern half of the project site (between the Bonfair Avenue extension and Del Paso Road) would feature a combination of small and medium sized retail and service providers in an upscale, walkable layout centered around a large plaza. In addition to the restaurants and	FIN	09/24/2008

<u>Documents Received on Tuesday, August 26, 2008</u>			
	stores, approximately 44,600 square feet of office uses would be located in the center of the project along the western boundary. The office complex would feature an extensively landscaped interior courtyard, and is anticipated to include medical service providers. The southern half (below the Bonfair Avenue extension) would be primarily composed of large format retail pads of 181,670 and 80,000 square feet. In addition, several smaller drive-thru restaurants and gas station pads of less than 4,500 square feet would be located in the southern half of the site. The overall project would include 403,849 square feet of retail uses and 44,600 square feet of office uses, for a total of 448,449 square feet. A total of 1,877 parking spaces would be located throughout the complex, and bicycle parking spaces would be located throughout the site.		
2008072002	Ossagon Trail Rehabilitation Project Parks and Recreation, Department of --Humboldt DPR proposes to rehabilitate approximately 1.0 mile section of the Ossagon Trail by converting the current trail alignment from a road to a trail. The road would be converted to a trail by narrowing the existing road surface. Road embankment fill would be excavated and stabilized on the inboard edge of the cutbench. A narrow portion of the cutbench would be preserved to serve as the new trail bed. Trail structures such as drain lenses, drain dips, turnpikes, and one bridge would be installed along the converted trail to control erosion and provide a low-maintenance trail tread. Trail crew and equipment access to the site would be by way of the Newton B Drury Scenic Parkway located north of the Ossagon Trailhead. Because the original trail is currently a mountain biking route, the trail conversion would be designed for mountain biking and hiking.	FIN

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<u>Documents Received on Tuesday, August 26, 2008</u>			
2008061118	Tentative Tract Map Application 2007-278, Tentative Tract Map 18678, Burbank Manor Big Bear Lake, City of Big Bear Lake--San Bernardino Subdivide an 11-acre commercially-zoned property into 8 lots for land sales only.	NOD	
2008071001	Santa Ana Regional Interceptor Pipeline Reach IV-B Santa Ana Watershed Project Authority Corona--Riverside The proposed project consists of repairs to the existing pipeline and does not include any new structures or additional pipeline construction. The work efforts associated with the repairs of the pipeline system includes chemical grout repair of interior joints (the pipeline will require at least three repairs), clear and grub work to re-establish the 10-foot wide access road, clear and grub work to provide a 50-foot diameter turn around at manholes, and incidental related work. Localized excavation work around the manholes will be required to expose the manholes and to add riser pieces to the manholes. The manhole risers will be backfilled once the work is complete. No grading or excavation is required for the pipeline.	NOD	
2008071053	MNWD Inter-tie Vault to El Toro Water District 24-inch R-6 Fill Line Moulton Niguel Water District Mission Viejo--Orange The project constructs an inter-tie between MNWD and El Toro Water District (ETWD) to allow MNWD to deliver water from the Joint Transmission Main through the MNWD transmission system to the R-6 Reservoir in the event of an emergency. Moulton Niguel Water District, El Toro Water District, and Santa Margarita Water District customers benefit from these improvements.	NOD	
2008072002	Ossagon Trail Rehabilitation Project Parks and Recreation, Department of --Humboldt DPR proposes to rehabilitate approximately 1.0 mile section of the Ossagon Trail by converting the current trail alignment from a road to a trail. The road would be converted to a trail by narrowing the existing road surface. Road embankment fill would be excavated and stabilized on the inboard edge of the cutbench. A narrow portion of the cutbench would be preserved to serve as the new trail bed. Trail structures such as drain lenses, drain dips, turnpikes, and one bridge would be installed along the converted trail to control erosion and provide a low-maintenance trail tread. Trail crew and equipment access to the site would be by way of the Newton B Drury Scenic Parkway located north of the Ossagon Trailhead. Because the original trail is currently a mountain biking route, the trail conversion would be designed for mountain biking and hiking.	NOD	
2008088287	West Struve Slough Restoration Project on the Watsonville Sloughs Ecological Reserve Santa Cruz County Resource Conservation District --Santa Cruz The California Department of Fish and Game owned, Watsonville Sloughs Ecological Reserve at West Struve Slough, is comprised of 110 acres of freshwater wetlands, wet meadow, coastal prairie, and coastal scrub habitats. Approximately 60 acres of the property is inundated with fresh water for the majority of the year in wet years and 50 acres of the property remain as upland throughout the year the property was acquired by the CA DFG in the 1970's after extensive use of the land for row crop farming and orchards, which led to its	NOE

<u>Documents Received on Tuesday, August 26, 2008</u>			
	<p>current condition of greatly reduced native habitat diversity and a predominance of exotic vegetation divergent from native ecosystem structure and composition. The West Struve Slough Restoration Project will remove invasive plant species and plant native species to restore and enhance coastal prairie, wet meadow, and coastal scrub habitat on 30 acres of the 50 acres of upland habitat on the property. The project will also maintain and enhance a grassed waterway planted with native perennial plant species, designed to filter storm water run-off from the adjacent urban land use (Pajaro Valley High School). Resulting habitat improvements will greatly benefit the numerous avian, reptile, and mammal species on the ecological reserve. Re-establishment of native wet meadow habitat in-particular will enhance the connectivity of wetland and upland habitat and contribute to greater potential for dispersal and habitat integration across ecological boundaries. Water quality improvements associated with the grassed waterway will reduce sediment and nutrients in the West Struve slough as well as throughout the hydrologically connected Watsonville Sloughs Wetland Complex. The project will also integrate an education component for students and community groups.</p>		
2008088288	<p>San Vicente Lower Pond Enhancement Project Santa Cruz County Resource Conservation District --Santa Cruz</p> <p>The main goal of the project is to enhance and stabilize documented rearing habitat and refuge function for coho salmon and steelhead trout, while also maintaining and improving long-term habitat function for California red-legged frog. Project design includes 1) reconfiguration of the upstream portion of the inlet channel, including installation of a sediment sluice gate, to decrease sediment transport into the pond via the inlet channel; and 2) minor sediment removal from the pond to re-establish salmonid rearing habitat quantity and quality, while maintaining a shallow-water limnic area with emergent vegetation to support habitat requirements for California red-legged frog. The need for maintenance of sediment removal is not expected to arise more often than once every eight to ten years.</p>	NOE	
2008088289	<p>Minor Precise Plan of Development MPPD-733 Stanton, City of Stanton--Orange</p> <p>A Minor Precise Plan of Development MPPD-733 for improvements to the interior and exterior of an existing business and expansion of an outside patio area located in the C-2 (General Commercial) zone.</p>	NOE	
2008088290	<p>Jurupa Unified School District Network Public Utilities Commission Riverside--Riverside</p> <p>Sunesys installs/operates fiber optic ethernet networks on behalf of school districts, universities, and library systems. The Jurupa Unified School District Network project will involve the installation of 5.03 miles of underground fiber (trenching) and 23.70 miles of aerial fiber in existing structures.</p>	NOE	
2008088291	<p>Issuance of Streambed Alteration Agreement No. R1-08-0201, Anderson Creek Overflow Ditch, tributary to Anderson Creek, Shasta County Fish & Game #1 Anderson--Shasta</p> <p>The project proposes to mechanically remove debris, silt and weeds from an overflow channel to prevent winter flooding.</p>	NOE

<u>Documents Received on Tuesday, August 26, 2008</u>			
2008088292	Issuance of Streambed Alteration Agreement No. R1-08-0353, Stillwater Creek, tributary to the Sacramento River, Shasta County Fish & Game #1 Redding--Shasta The project proposes to divert water pursuant to a legal water right.	NOE	
2008088293	Issuance of Streambed Alteration Agreement No. R1-08-0296, Salt Creek, tributary to Churn Creek, Shasta County Fish & Game #1 Shasta Lake--Shasta The project proposes to construct a retaining wall and footing to connect with an existing retaining wall and box culvert.	NOE	
2008088294	Issuance of Streambed Alteration Agreement No. R1-08-0318, North Fork Bridge Abutment Repair Project Fish & Game #1 --Trinity The project proposes the repair and replacement of rock slope protection on the south side of the North Fork of the Trinity River directly downstream of the East Fork Road bridge	NOE	
2008088295	Issuance of Lake or Streambed Alteration Agreement No. R1-07-0020, Beesler Culvert Project, Del Norte County Fish & Game #1 --Del Norte Decommission one stream crossing and temporarily draft water on an Unnamed Tributary to Myrtle Creek. The culvert pipe and associated fill, and road sidecasting will be excavated and stored in stable upland locations.	NOE	
2008088296	Issuance of Lake or Streambed Alteration Agreement No. R1-08-0192 Fish & Game #1 --Humboldt A 24-inch culvert will be replaced, and approximately 33 cubic yards of rip rap will be placed at the culvert outlet.	NOE	
2008088297	Issuance of Lake or Streambed Alteration Agreement No. R1-08-0191, Mattole Road Post Mile 7.55 Storm Damage Repair Project, Humboldt County Fish & Game #1 --Humboldt Construct a 48-foot long, 15-foot high welded wire retaining wall adjacent to Squaw Creek.	NOE	
2008088298	Estero Americano Gorse Removal Project Gold Ridge Resource Conservation District (GRRCD) --Sonoma This project will involve removal of invasive, non-native gorse (<i>Ulex europaeus</i>) in the Estero Americano watershed and revegetation with native grasses, trees, and shrubs in order to provide habitat for special-status wildlife species. The goals of this project include: enhancing critical coastal habitat, documenting effectiveness and cost efficiency of eradication techniques, and synthesizing information in a useful way for surrounding landowners and regional agencies. The project will entail mechanical removal of the above-ground biomass with the use of equipment outfitted with a mower/mulcher. Gorse will be ground up and left in place as mulch. The mulch will act to prevent soil erosion, reduce and slow re-growth from gorse roots, and inhibit established of other weed species.	NOE

<u>Documents Received on Tuesday, August 26, 2008</u>			
2008088299	Raise Road Profile, El Dorado County, SR 49, EA 03-4E4500 Caltrans #3 --El Dorado The scope of this project is to raise the profile of the road, which has dropped down and outward on the embankment side, back to its original state by placing an asphalt concrete (AC) leveling coarse. This portion of Route 49 is a conventional two-way rural highway located in the Auburn State Recreation Area just south of the City of Auburn and runs adjacent to the Middle Fork of the American River. All work will occur within Caltrans right of way.	NOE	
2008088300	2007-099 Conditional Use Permit for Elhard/Herrera Calaveras County --Calaveras The applicants are requesting approval of a Conditional Use Permit to allow a single family residence on property that is commercially zoned. APNs 018-006-012 are a portion of Section 7, T5N, R12E, MDM.	NOE	
2008088301	Temporary Emergency Permit for Treatment by Open Detonation, Sierra Army Depot Toxic Substances Control, Department of --Lassen Department of Toxic Substances Control (DTSC) has issued an emergency permit to Sierra Army Depot (SIAD) to treat hazardous waste munitions by open detonation (OD). The hazardous waste to be treated consists of two M117, 750 pound General Purpose Bombs which are exuding reactive material, and one 1-pound lot of propellant charge containing stabilizer potentially deteriorated due to its age. The bombs were discovered to be defective during a routine ammunition inspection. The propellant was determined to be potentially unstable in accordance with guidance contained in the Ammunitions Surveillance Procedures Supply bulletin 742.1, February 2007. Although the items will be treated at one time, the emergency permit is effective from September 8, 2008 through September 12, 2008 to allow treatment to be scheduled depending on weather, logistics, and availability of personnel. The emergency detonation will be conducted by military Explosive Ordinance Disposal personnel in accordance with specified Standard Operating Procedures. The items will be detonated in pits located in the Demolition Area within the Upper Burning Grounds of SIAD. The OD pits were built and used for demilitarization OD operations from the 1950's until 2001. Currently the SIAD OD units are undergoing closure. As the interim status authority for treatment has been terminated, the Department of Toxic Substances Control (DTSC) has determined that an emergency permit for treatment should be issued. The damaged munitions are a potential safety hazard and present an unacceptable risk for continued storage. SIAD determined that the damaged munitions are too unstable for transportation, and therefore, treatment at an off-site facility is not feasible. There is no alternative on-site treatment available. The munitions are too large to be handled by any available transportable treatment chamber that could be brought to the site.	NOE	
2008088302	Leasing of Existing Office Space Health Services, Department of Fresno--Fresno Project sponsor proposes to lease existing office space at the above location to the Medical Eligibility Branch field office.	NOE

<u>Documents Received on Tuesday, August 26, 2008</u>			
2008088303	<p>Modular Office Building Corrections and Rehabilitation, Department of --Marin</p> <p>A modular will be placed on the grounds of San Quentin State Prison (SQSP), adjacent to the staff residential area in the northwest section of the property, in a former playground area. The modular will house offices for the Decentralized Revocation Unit (that is, offices for processing revoked paroles). The project is needed to provide adequate program space to accommodate the DRU operation, which has been relocated to insufficient facilities to accommodate other programming functions. Existing on-site utilities will be extended to the modular building, requiring some trenching. The project will require some tree removal, however, none of the trees are listed in Marin County's Native Tree Preservation and Protection Ordinance.</p>	NOE	
2008088304	<p>Right of Entry to Relocate Modular Office Building Corrections and Rehabilitation, Department of Folsom--Sacramento</p> <p>California Department of Corrections and Rehabilitation (CDCR) is granting Right of Entry (ROE) to the U.S. Army Corps of Engineers (ACOE) to relocate a modular office building to a different location at Folsom State Prison.</p> <p>As part of construction of the Folsom Dam Road Project, the ACOE placed a modular office building at Folsom State Prison, covered under the Folsom Dam Road Project environmental document. At its current location, the office modular is within the footprint of the new Folsom Dam Project to construct a new control structural structure, spillway and stilling basin for protecting the City of Sacramento from floods that, without the project, would inundate the City.</p> <p>When the Folsom Dam Road Project is completed, ACOE will vacate the modular, and Folsom State Prison will continue to use the modular for offices. Relocating the modular includes some excavation for footings, constructing a gravel parking area, and installing a security fence around the project site. Electrical utilities will be extended overhead from an existing source at Folsom Dam Road. Other utilities will be provided by a water tank and wastewater pump tank. The project will be constructed to avoid a wetland (creek drainage). Site surveys and a records search at the North Central Information Center confirmed that there are no cultural resources that would be impacted in the project area. The possible removal of one mature oak tree was considered and mitigated for under the Folsom Dam Road project.</p>	NOE	
2008088305	<p>Recreational Vehicle Sewage Dump Station Parks and Recreation, Department of --Tulare</p> <p>The project involves the installation of a sewage dump station for the use by recreation vehicles. The installation will involve subsurface disturbance to a depth of 6.5 feet and surface area of 9,000 sq. feet. The proposed dump station will tie into existing lift station/sewer that supports the existing facilities. No external permits will be sought or required.</p>	NOE	
2008088306	<p>Traveling Exhibit Temporary Housing Parks and Recreation, Department of --Tulare</p> <p>The project involves the installation of a temporary building within the Park as housing for the Colonel Allensworth's Traveling Exhibit for the Centennial Celebration in October. The temporary building will house artifacts, displays and multimedia materials. The installation will involve subsurface disturbance to a</p>	NOE

	depth of 2.5 feet and a surface area of 5,000 sq. feet. The installation of the building will take place in September of 2008 and last approximately 6 months. No external permits will be sought or required.						
2008088307	Wolf Creek Rehabilitation - Phase 1 Regional Water Quality Control Board, Region 5 (Central Valley), Redding --Plumas Project will address problematic bank erosion, channel incisement, and degraded aquatic habitat by installing logs and rootwads in channel.	NOE					
2008088308	Geotechnical Testing Parks and Recreation, Department of --Monterey Test the soil within the wastewater treatment plant compound at Pfeiffer Big Sur State Park to observe subsurface soil conditions and design facilities to meet California Building Code. Work will excavate a maximum of four test pits approximately 3 feet wide and 18 feet deep or to refusal, collect soil samples, and backfill the pits with material removed during excavations.	NOE					
2008088314	King Ranch Enhancement Project Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa Ukiah--Mendocino In 2003, a 12-acre riparian slough was constructed by excavating an upland terrace near the Russian River at the King Ranch. The constructed slough was then planted with a variety of native plants. Since the project was constructed, yellow star thistle has spread from surrounding areas into much of the created vineyard site and the slough. In order to increase native plant coverage and diversity, the yellow star thistle needs to be eradicated and controlled. Eradication will consist of mowing only the areas without native plants and application of herbicide to the yellow star thistle only. Application will be done in conformance with the label directions and notice will be provided to the County Agricultural Commissioner. Once the thistle is eradicated additional native riparian plants will be installed.	NOE

	be occupied a variety of retail and service businesses including fast food franchises, sit-down restaurants, pharmacy, financial services/bank, professional/business services, and other retail sales and services.		
2008081115	Paso Robles Watertreatment Plan and Main East Pipeline Project Paso Robles, City of Paso Robles--San Luis Obispo The City of Paso Robles plans to construct a plant to treat water from the Nacimiento Water Project, up to 12 million gallons per day, store treated water and convey treated water to the East Side of the City.	MND	09/25/2008
2008081116	Scripps Green Hospital Campus San Diego, City of San Diego--San Diego Site Development Permit (SDP), Coastal Development Permit (CDP), Conditional Use Permit (CUP), Planned Development Permit (PDP) and Amendments to CUP No. 86-0262, CDP/Hillside Review Permit (HR)/Planned Industrial Development Permit (PID) No. 88-0244, CUP No. 92-0501, and CDP No. 92-0506 to consolidate all of the existing discretionary permits for the Scripps Green Hospital Campus and construct an Outpatient Cancer Treatment and Research Center and a four-level employee parking structure on a 34.57-acre site. The project site is located at 10660 John Jay Hopkins Drive, 3506 Cray Court, and 10596 and 10710 North Torrey Pines Road in the IP-1-1 (Industrial - Park) Zone within the University Community Plan, Coastal overlay Zone (Appealable), Coastal Height Limitation Overlay Zone, Local Coastal Program, Community Plan Implementation Overlay Zone - Type B, parking Impact Overlay Zone, Residential Tandem parking Overlay Zone, Marine Corps Air Station Miramar Airport Influence Area and Airport Environs Overlay Zone (Accident Potential Zone 2). The site is not included on any Government Code Listing of hazardous waste sites.	MND	09/25/2008
2008082118	East Natoma Street Widening Folsom, City of Folsom--Sacramento The City of Folsom is proposing to widen East Natoma Street to the north in the westbound direction from one to two lanes and widen the eastbound shoulder to provide for a Class II bicycle land. The widening would occur between Folsom Dam Road and Green Valley Road.	MND	09/25/2008
2008082119	Community of All Nations Project (IS4-08) Stockton, City of Stockton--San Joaquin The project site is an 8.95-acre parcel of land located in southeast Stockton at the northeast corner of South D Street and East Eighth Street. The proposed project would redevelop an existing multi-family residential complex of 75 units as a new 141-unit multi-family development. The proposed redevelopment would be under the new ownership of Visionary Homebuilders. The project includes a day care facility, three child play areas, a family recreational area, a basketball court, a community building, and a day care play area. The proposed site plan would construct five three-story apartment buildings and 11 two-story apartment buildings and will be completely gated with site access from East Eighth Street. Open space and recreational areas would total at least 20 percent of the proposed site.	MND	09/26/2008

<u>Documents Received on Wednesday, August 27, 2008</u>			
2007011041	Lifeguard Headquarters Project Laguna Beach, City of Laguna Beach--Orange The proposed project would consist of reconstructing the existing Lifeguard Headquarters and Main Beach public restrooms to provide additional space for existing lifeguard operations, and construction of support facilities for lifeguards and beach visitors. The proposed facilities would replace the two existing structures and would not be expected to result in a change in lifeguard activity or an increase or decrease in staff. The new Lifeguard Headquarters would be at the location of the existing restrooms and an annex with a public restroom facility would be located at the current site of the Lifeguard Headquarters. The two buildings, approximately 4,500 square feet, would be adjoined by an uncovered raised deck walkway.	NOP	10/29/2008
2008081117	Birtcher Center at Corona Valley Riverside County --Riverside Overall, the proposed project consists of an industrial development consisting of several buildings totaling approximately 760,000 square feet on 53.37 gross acre site. The buildings will consist of concrete tilt-up structures supported by conventional slab-on-grade foundation system. Concrete and asphaltic pavement, as well as landscaping and hardscape, are proposed.	NOP	09/25/2008
2008082114	City of Milpitas Water and Sewer Master Plan Update Milpitas, City of Milpitas--Santa Clara The City intends to formally adopt its 2009 Water and Sewer Master Plan Updates and is preparing a Program-level EIR to assess the potential environmental impacts of implementing the water and sewer capital improvement projects (CIPs) identified in each of the updates. The Program EIR will analyze the impact of the City's preferred land use buildout scenario, which is identified as Scenario 3 in the Master Plan Updates. These improvements are expected to be constructed over the course of the next 20-years and include various water distribution and sewage collection facilities, which would be constructed at various locations throughout the City's corporate limits.	NOP	09/25/2008
2008082116	Applegate Wastewater Treatment Plant Closure & Pipeline Project Placer County --Placer The proposed improvements would decommission the treatment ponds at the Applegate Wastewater Treatment Plant (WWTP) and install pump stations and a pipeline to convey Applegate's wastewater to the existing sewer collection system that conveys wastewater to the SMD 1 WWTP on Joeger Road in North Auburn.	NOP	09/25/2008
2008082117	Timberline at Auburn (PEIR 'T20080139) Placer County Auburn--Placer The proposed project involves the construction of a continuing care community, commercial/retail center, trails, and wetlands on a 119-acre site.	NOP	09/25/2008

The ground-floor retail/commercial and restaurant uses would be located on Wilshire Boulevard and La Brea Avenue. Of the proposed 562 residential units, 138 would be studio units, 315 would be one-bedroom apartment units, 99 would be two-bedroom apartment units, and 10 would be two-bedroom townhome units. The proposed project would provide a total of 1,083 parking spaces. Parking would be provided in a partial above-ground "mezzanine" level, in a ground level and in a 2.5 level subterranean structure.</p>	EIR	10/14/2008
2008022007	<p>The Campus at McCarthy Ranch Industrial Project Milpitas, City of Milpitas--Santa Clara</p> <p>The project proposes to add 424,814 square feet of office space to an existing office campus. The site includes 469,494 square feet of existing built office out of 991,000 entitled previously for the site. Essentially, the project contemplates increasing the Floor Area Ration for the site from .35 to .50 as allowed for in the City's General Plan.</p>	EIR	10/14/2008
2008081099	<p>Johansen Parcel Map SUB2007-00005 San Luis Obispo County --San Luis Obispo</p> <p>Request by Dennis and Jane Johansen for a parcel map (CO 07-0099) to subdivide an existing 5.12 acre parcel into two parcels of 2.53 acres and 2.59 acres each for the purpose of sale and/or development. The project will result in the disturbance of approximately 21,350 square feet square feet of a 5.1 acre parcel due to future development of a residence, and approximately 17,850 square feet of road/driveway improvements.</p>	MND	09/26/2008
2008081120	<p>Interstate 215 and Van Buren Boulevard Interchange Caltrans #8 Riverside, Moreno Valley--Riverside</p> <p>The California Department of Transportation (Department) proposes to improve the Interstate 215 (I-215)/Van Buren Boulevard interchange in Riverside County. The total length of the proposed project, which extends between Oleander Avenue and Cactus Avenue, is approximately 3.6 miles. The existing interchange has insufficient capacity to accommodate existing and projected future traffic volumes. The proposed congestion-relief improvements would include the addition of an eastbound to northbound entrance ramp, reconfiguration of the existing entrance and exit ramps, construction of auxiliary lanes from Van Buren Boulevard to Cactus Avenue, and expansion of the Van Buren Boulevard bridge structure.</p>	MND	09/26/2008
2008081122	<p>Strawberry Peak Communications Tower Replacement Project Forestry and Fire Protection, Department of --San Bernardino</p> <p>The proposed project involves replacement of two-existing communications towers and associated structures on Strawberry Peak, an unincorporated area of San Bernardino County approximately 4.4 miles southwest of Lake Arrowhead. The proposed project would demolish and replace a 40-foot communications tower, an 80-foot communications tower, an equipment vault, and other supporting</p>	MND	09/29/2008

	<p>infrastructure to meet current construction and safety standards. The new tower would be a 150-foot-tall, self supporting, four-legged lattice structure with upper monopoles, safety ladders, platforms, and lightning arrestors. Based on consultation with USFS, CalFire may consider constructing two shorter towers, less than 100 feet in height, within the same footprint as the proposed project. The site is presently under the jurisdiction of CalFire through a 20-year Special Use Permit (SUP) provided by the USFS, with an expiration date of December 3, 2020. The two existing CalFire communications towers, the vault, and a generator building would be demolished after construction of the new tower and associated facilities. The equipment vault would be a concrete masonry unit (CMU) building or prefabricated concrete building. No new roads or road improvements are anticipated; however, loose gravel may be used.</p>		
2008082122	<p>Vesting Tentative Parcel Map, PM-9329 Alameda County --Alameda Subdivision into four lots with net lot areas between 6,430 and 8,250 square feet. The project would entail construction of a new 20'-wide private roadway through the center of the site with a hammerhead turn-around for emergency and service vehicles, a 4'-wide sidewalk, new grading for the roadway, house pads and retaining walls, stormwater drainage swales, four visitor parking spaces, and preservation of an existing windrow of eucalyptus trees and some other mature vegetation.</p>	MND	09/26/2008
2008082123	<p>Water Supply Well San Juan Water District --Sacramento The project addresses the need for development of a groundwater supply source within the SJWD retail service area to supplement the water supply during times of drought or surface water restrictions. Exploration drilling and monitoring well construction are planned to determine whether favorable conditions are present for the development of a groundwater supply well.</p>	MND	09/26/2008
2008081118	<p>Children's Hospital of Orange County (CHOC) Master Plan Orange, City of Orange--Orange The proposed project provides for the multi-phased upgrade of the CHOC Hospital campus that would allow for the continued use of the existing Hospital and supporting facilities during the implementation of the CHOC Master Plan through the year 2020. The development program for the proposed project would be accomplished in three phases (2012, 2015, and 2020) and result in demolition activities, new construction, and the remodeling of buildings on the project site.</p>	NOP	09/26/2008

2008088336	Diaz Lake Fish Deck Inyo County --Inyo A platform for the elderly and handicapped is proposed at Diaz Lake. The deck will be approximately 16 feet by 20 feet and constructed of two-by-six trex material, and will cantilever about four-to-five feet out over the water. Two-inch steel side rails, either 32 or 36 inches high, will be installed. Other minor improvements for access to the deck may also be required. In addition, minor dredging will be undertaken in the vicinity of the deck to deepen the water to improve fishing opportunities.	NOE	
2008088337	Approval of Petition to Transfer Territory Between Merced City School District and Weaver Union School District Merced County Merced--Merced Territory transfer between Merced City School District and Weaver Union School District to provide that Ellen Avenue Area Properties like within Weaver Union School District. Residents of the area currently attend school and vote in Weaver School District but are taxed in Merced City School District. There is no possibility that the activity in question may have significant effect on the environment.	NOE	
2008098084	Sediment Removal at Cantua Creek and Harlan Drain Inlet (Milepost 133.67) at the California Aqueduct Water Resources, Department of Coalinga--Fresno Cantua Creek is an ephemeral creek that if not properly managed can allow flood waters to undermine the protection levees of the California Aqueduct (CA) compromising the integrity of the Aqueduct as well as inundate surrounding agricultural lands outside of USBR-owned (DWR managed) land and flood easements. It has been observed that unauthorized encroachments and structure have been created by adjacent landowners that will potentially disrupt the water flow to the appropriated areas. A low flow channel will be constructed from the mouth of Cantua Creek (about 750-feet west of the CA protection levee) that will continue north along the CA protection levee and daylight just past the Harlan Drain Inlet (DI) milepost 133.67. From Cantua Creek at Harlan Avenue to a mile north to Cerini road and a mile south to Mt. Whitney vegetation along the embankment and in the flow channel's path will need to be cleared, excluding designated large shrub and woody areas, to allow for surveys and construction to be conducted in the area. The clearing will be done by a mower or CCC crews. An unauthorized berm to the north and parallel with the Aqueduct was created by an adjacent landowner on land that is within a designated flood easement. Up to 2,000-feet of the berm will be removed or lowered during the construction of the low flow channel in order to provide adequate freeboard for the protection levee. District staff will conduct a topographic survey to determine the volume of spoil to be removed (approximate estimated volume is about 3,700 cubic yards) and where the low flow channel will be located. The spoil will be placed in an area that has been approved by a biologist to avoid potential impacts most likely to be placed on top of the adjacent aqueduct protection levee. By maintaining this area, DWR can further protect water quality and water deliveries for downstream municipal and agricultural water uses.	NOE

<u>Documents Received on Friday, August 29, 2008</u>			
	<p>project site is made up of the Yuba County/Placer County line. State Route 65 and the Union Pacific Railroad (UPRR) tracks are located west of the annexation. The proposed project is primarily composed of three separate properties - the Johnston Rancho property, the Bear River Hop Farm property, and the Dave Browne property. Two of the proposed project's three requested entitlements, annexation and prezone, involve the entire 4,069-acre area composed of the Johnson Rancho, Bear River Hop Farm, Dave Browne properties, and five additional 'Wheatland' parcels. The additional 'Wheatland' parcels consist of five parcels that have been included in the proposed annexation boundaries so as to avoid the creation of county "islands." The five 'Wheatland' parcels comprise a total of 14.0 acres. The proposed project would include the development of up to approximately 14,329 residential lots, varying from Very Low Density Residential to High Density Residential. In addition, development of the project would include other land uses, such as Employment/Office, Commercial, Civic Center, Elementary and Middle Schools, Parks and Open Space, and a potential hospital.</p>		
2008081127	<p>Edison Field, Racetrack Hill Area Division of Oil, Gas, and Geothermal Resources --Kern Project proposes activities necessary to drill and test five exploratory oil and gas wells.</p>	Neg	09/29/2008
2008081128	<p>Garzoli Water Well Arsenic Treatment McFarland, City of McFarland--Kern Design and construct a well head arsenic treatment system to treat an existing water well including, but not limited to, add stages to the existing pump, increase the motor horsepower, construction of concrete pads, and modifications to site piping, valving, and electrical.</p>	Neg	09/29/2008
2008082125	<p>Landowner Groundwater Well Program for 2008-2009 Glenn-Colusa Irrigation District (GCID) Willows, Colusa--Glenn, Colusa Glenn-Colusa Irrigation District (GCID) may not have adequate surface water supplies to meet irrigation demands from November 1, 2008 through October 31, 2009. To address this potential shortage, GCID needs to immediately begin the development of a groundwater pumping program with GCID landowners/well owners to pump groundwater and make it available to GCID for distribution to all landowners within GCID. GCID estimates that 45 to 60 wells will be required to meet the forecasted shortage. The candidate wells have well casing perforations ranging from 30 to 50 feet below ground surface elevation (bgse) to a depth of 350 to 450 feet bgse. This range of perforation elevations indicates that these wells will be producing water from the Tehama Formation. Average yields from this aquifer range from 2,500 to 3,000 gallons per minute. Based upon the projected surface water supply shortages, GCID will need up to 160,000 acre-feet of groundwater to meet the total water supply shortage. This amount of groundwater is still less than the 180,000 acre-feet of water that GCID recharges to the aquifer system on an annual basis during non-critical years. Therefore, any groundwater pumped during this project will be recharged during the next year that GCID receives 100% of its surface water supplies, which occurs in nine of every ten years.</p>	Neg	09/29/2008

	<p>The locations of this development within the Evergreen area have not been determined. However, for analytical purposes the above-mentioned development capacities have been distributed. The distribution is based on a review of infill parcels throughout the Evergreen area that are undeveloped, underutilized, or potential candidates for redevelopment.</p> <p>The revised Policy would limit the number of dwelling units to a maximum of 35 on any one site unless the development incorporates affordable housing, historic preservation, or mixed-use components.</p> <p>For purposes of the update, the revised Policy is proposed to be called the Evergreen - East Hills Development Policy.</p>		
2008088328	<p>Sediment Removal at Salt Creek and Gated Inlet (Milepost 136,000) at the California Aqueduct Water Resources, Department of Coalinga--Fresno Salt Creek is an ephemeral creek that if not properly managed can allow flood waters to undermine the protection levees of the California Aqueduct compromising the integrity of the Aqueduct as well as inundate surrounding agricultural lands outside of USBR-owned (DWR managed) land and flood easements.</p> <p>Vegetation will be cleared out of the channel bed of Salt Creek approximately one mile along Parkhurst road west of the 90 degree bend and continuing northeast in the existing low flow channel to the CA protection levee. Sediment that has deposited in the channel from recent flooding will be removed and placed on Parkhurst Avenue near the bend approximating a 2 feet increase in elevation along a 1,000 feet length. District staff will conduct a topographic survey to determine the volume of soil to be removed (approximate estimated volume is about 1,800 cubic yards). The vegetation within the small triangle area, owned by USBR, that is between Parkhurst Avenue and the Aqueduct will not be removed. Vegetation will be cleared from the immediate area of a gated inlet at milepost 136.00 of the California Aqueduct. Sediment blocking the gated inlet will also be removed (approximate volume is about 100 cubic yards) and the spoil will be placed on an existing mound adjacent to the levee. By maintaining this area, DWR can further protect water quality and water deliveries for downstream municipal and agricultural water users.</p>	NOE	
2008088338	<p>AT&T Wireless (PCEL 20060146) Placer County --Placer The applicant requests approval of a one year Extension of Time for an Administrative Approval to construct a cellular communications facility. 2008088340	<p>Joint Use of Multipurpose Room, Library, and Playfields by adults Lindsay Unified School District Lindsay--Tulare</p> <p>The Lindsay Unified School District completed a Negative Declaration (5-4-07) and filed a Notice of Determination (8-9-07) for the construction of Hickory Elementary School OPR #2007051031. This action is to expand the educational and training programs at the new school to include the adult population of the district and to permit minor changes to the new facility if needed to accommodate adults.</p>	NOE	
2008088341	<p>Replacement of existing library with permanent library for joint use. Lindsay Unified School District Lindsay--Tulare</p> <p>The existing library on Lindsay High School consists of relocatable structures. This project will replace the relocatable structures and authorize joint use of the facilities by students and adults. The project will be a 13,000 square foot new constructed library located on the grounds of the Lindsay High School campus. Project includes children's, student and public reading areas, computer lab and book stacks.</p>	NOE	
2008088342	<p>McKinleyville Land Trust, Applicant, Permit & Case No.: Coastal Development Permit (CDP-07-33) Conditional Use Permit (CUP-08-01), File No.: APN 510-271-18 Humboldt County --Humboldt</p> <p>A Coastal Development Permit and Conditional Use Permit for enhancement of recreational amenities on the McKinleyville Land Trust's approximately 74 acre Mad River Bluffs site. The development proposed includes trail improvement and decommissioning and bluff stabilization using re-vegetation techniques. Also, several benches and safety railings are proposed. An ADA compliant parking area and overlook will be developed along with a new picnic area. Signage consisting of 4x4 posts for directional signs, interpretive signs, kiosks, and hazard warning signs are also proposed. Three dogi-pot stations will be added to encourage users to clean up after pets. No structures exist nor are there any proposed for the property. Minimal grading is required and no trees will be removed. There are no water or sewer services to the property. Recreational use is conditionally permitted at the site; therefore, a Conditional Use Permit is required.</p>	NOE	
2008088343	<p>Canyon Inn Acquisition (to become part of the Azusa River Wilderness Park) Resources Agency, The Azusa--Los Angeles</p> <p>The project is the acquisition of 26 acres which is partially developed. The Watershed Conservation Authority (WCA) proposed to acquire the property mainly for open space and habitat enhancements.</p>	NOE	
2008088344	<p>Vallecito Conservation Camp - Generator Replacement and French Drain Project Forestry and Fire Protection, Department of --Calaveras</p> <p>This project involves the replacement of an old, inefficient generator and the installation of two French drains at Vallecito Conservation Camp. Parts for the existing generator are becoming difficult to find and are expensive. The new generator will fit in the existing generator building and on the existing pad so no new building construction will be required except for the possibility of 50 feet of new trench on previously disturbed ground to connect to an existing electrical panel.</p>	NOE

2008088345	Fawn Lodge Forest Fire Station - Installation of Hydroelectric Plant (Pelton Wheel) Forestry and Fire Protection, Department of --Trinity This project is located on an 80-acre parcel of state-owned land which currently operates as the California Department of Forestry and Fire Protection (CAL FIRE) Fawn Lodge Forest Fire Station. Project will include installation of a small hydroelectric plant (Pelton Wheel) that will generate electricity that will supply a portion of the stations electricity needs. The hydroelectric plant will use water from an existing diversion from a tributary to Grass Valley Creek that was used for a decorative waterfall at the fire station. Water flows from the diversion via an existing 2 inch pipe line. An additional 300 feet of pipe will be installed that will connect to the existing pipe line to supply water to the hydroelectric plant. Vegetation at the site is primarily mixed conifer. No vegetation or significant ground disturbance will be required to install the hydroelectric plant.	NOE	
2008088346	Dry Creek Parkway Acquisitions - Clifton Parcel Sacramento Area Flood Control Agency --Sacramento The acquisition of the identified parcel using grant and local funds for the purpose of reducing flood risks, preserving wildlife habitat, and adding to the Dry Creek Parkway by relocating the occupants and demolishing the homes.	NOE
