STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS
(Formerly SCH NEWSLETTER)**

February 1 – 15, 2012

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **February 1 – 15, 2012**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Director

CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

USPS:

State Clearinghouse
P.O. Box 3044
Sacramento, CA 95812-3044

OR

USPS/Courier Service / Hand Deliveries:

State Clearinghouse
1400 Tenth Street, Room 1113
Sacramento, CA 95814

INFORMATION AVAILABLE ON-LINE

The 2011 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

Environmental Document Filings with the State Clearinghouse 1999-2011

All CEQA documents filed with the State Clearinghouse are available for viewing on the internet at www.ceqanet.ca.gov.

<u>Documents Received on Wednesday, February 01, 2012</u>			
2012022003	Use Permit Application No. 2012-01 and Vesting Tentative Parcel Map Application No. 2012-01 - VA Rodden Huller Stanislaus County Oakdale, Waterford--Stanislaus Request for a use permit to place walnut huller and dryer buildings totaling 46,795 sf on a site with an existing walnut orchard operation. A parcel map is also being requested to create three parcels (166.25 and 94.88 acres for the Orchard and 10 acres for the hulling operation) from the existing 271+ acre site.	CON	02/17/2012
2009121020	Circulation Element Update Oceanside, City of Oceanside--San Diego The Revised DEIR identifies potential effects with respect to land use, biological resources, aesthetics, hydrology/water quality, air quality, GHGE, traffic, noise, geology/soils, agriculture, hazardous materials and hazards, paleontological resources, and cultural resources. The Revised DEIR also includes proposed mitigation measures that will offset and/or minimize any significant, adverse effects on the environment. The City's decision to prepare a Revised DEIR should not be construed as a recommendation of either approval or denial of this project. The Revised DEIR public review period is from Feb. 1, 2012 to March 16, 2012. The City invites members of the general public to review and comment on this environmental documentation.	EIR	03/16/2012
2012021002	Sunrise Park Tulare, City of Tulare--Tulare The project proposes to develop a 6-acre environmental enhancement area that will function as a neighborhood park for passive recreational use. The project proposes the planting of approximately 16 native Valley Oak trees per acre around the outer edges of the park, plus water-efficient shrubs and ground cover. A multi-use turf area will be in the center. No buildings are proposed.	MND	03/01/2012
2012022002	Barron Creek Channel Flood Control and Realignment Project Los Altos Hills, City of Los Altos Hills--Santa Clara The proposed project consists of flood control measures to allow for continuous, unobstructed flow of water within Barron creek. The realignment, maintenance and revegetation of this 600 foot length of Barron Creek is located in the Town of Los Altos Hills. The existing creek channel has historically been modified from its original location and has been constructed with man-made materials.	MND	03/01/2012
2010031050	San Benito County Resource Recovery Park San Benito County Hollister--San Benito Amend the County General Plan land use designation to Public/Quasi-Public and change the zoning designation of a 30-acre site to a new Resource Recovery Park zoning district to provide for the phased development of a Resource Recovery Park (RRP) for recycling and energy generation uses. County may create one or more separate parcels at the site and may license, lease, sell or jointly operate portions of RRP to third party(ies) for development consistent with RRP purpose. 2012022001	City-wide Sign Ordinance Amendment to Allow Digital Billboard Signs Colfax, City of Colfax--Placer #PL-01-12/Sign Ordinance Amendment to Allow Digital Billboard Signs on City-Owned Property as defined in the Amendment. The project proposes to amend the Colfax Sign Ordinance (Colfax Municipal Code Title 17) to allow one or more digital billboard signs, each with two displays, to be constructed and operated on City -owned property along Interstate Highway 80 and SR 174 within the Colfax corporate boundaries, provided such locations are approved by Caltrans. Approval of the Digital Billboard Sign Ordinance would not permit the immediate construction of operation of digital billboard signs.	Neg	03/01/2012
1998041006	Polo Ranch - Draft Recirculated EIR Scotts Valley, City of Scotts Valley--Santa Cruz Project activities include upgrading a box culvert, installing three storm water outfalls, constructing three road crossings with small drainages, constructing up to three pedestrian bridges and construction and grading activities associated with the development of a subdivision along Carbonera Creek on Santa's Village Road, in the City of Scotts Valley, Santa Cruz County.	NOD	
2002082057	Fiddymment Ranch Specific Plan Amendment 3 Roseville, City of Roseville--Placer The California Department of Fish and Game is executing Lake or Streambed Alteration Agreement number 1600-2011-0161-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, Westpark Associates. The project is limited to completion of a project previously covered by Department of Fish and Game 1600 agreements: 1600-2004-0279-R2.	NOD	
2003092006	American Basin Fish Screen and Habitat Improvement Project Fish & Game #2 Sacramento--Sacramento, Sutter Natomas Central Mutual Water Company (Natomas Mutual) submitted change petitions to the Division of Water Rights to add the new Sankey diversion on the Sacramento River to its water rights. The Sankey diversion is a new state-of-the-art screened diversion on the Sacramento River that is part of the American Basin Fish Screen and Habitat Improvement Project.	NOD	
2010102035	Cowell Ranch/John Marsh State Historic Park General Plan and EIR Parks and Recreation, Department of --Contra Costa A State Park General Plan for the development, operation and management of Marsh Creek State Park, property formerly known as Cowell Ranch/John Marsh State Historic Park. The California Department of Parks and Recreation is the Lead Agency.	NOD	
2010112064	Wentworth Spring Road at Gerle Creek Bridge Low Water Crossing Conversion El Dorado County --El Dorado The California Department of Fish and Game is executing Lake or Streambed Alteration Agreement under 1600-2011-0085-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, El Dorado County - Department of	NOD

2010122091	<p>2011 Georgiana Slough Non-Physical Barrier Study Water Resources, Department of --Sacramento</p> <p>Addendum consists of adding 2012 to the 2011 GSNPB Study which includes installation and operation of an under-water Bio-Acoustic Fish Fence (BAFF) at the divergence of Georgiana Slough from the Sacramento River during part of the juvenile salmon migration period. The BAFF is being tested for its effectiveness as a behavioral deterrent to prevent out-migrating juvenile salmonids in the Sacramento River from entering into Georgiana Slough using a combination of sound, lights, and bubbles.</p> <p>Following installation, the barrier would be operated for up to 60 days, beginning after February 1, 2012. Upon completion of operation, the entire barrier structure and associated structures and equipment would be removed. Barrier removal would be complete by the end of June 2012. All disturbed areas will be restored to pre-project conditions.</p>	NOD	
2011122052	<p>Approval of CA Carpet Stewardship Plan Resources Recycling and Recovery, Department of --</p> <p>This project is the approval of the California Product Stewardship for Carpet Plan (Plan) that is submitted by the carpet stewardship organization, Carpet America Recovery (CARE), on behalf of the carpet manufacturers who are participating in the Plan, in compliance with AB2398. The Plan will be implemented by private businesses engaged in the manufacture, sales installation, and recycling of carpet in California.</p>	NOD	
2011122062	<p>Comanche Creek Greenway Improvement Project Chico, City of Chico--Butte</p> <p>To construct an approx. 6.7-mile long bicycle facilities project generally along the east side of the SR 99 corridor over two phases. The bikeway is a combination of Class I/II/III facilities commencing at Eaton Road to the north and traversing south to Southgate Avenue. The bikeway will be located on surface streets, drainage easements, Butte County owned SUDAD Ditch, and City park land, Associated safety devices, including lighting, fencing, controlled crossings and median refuges, will be incorporated when appropriate.</p>	NOD	
2012029001	<p>Streambed Alteration Agreement No. 2011-0199-R4, issued in conjunction with 2012 South Shore Timber Harvest Plan (THP) No. 4-11-016/FRE-1 Forestry and Fire Protection, Department of --Fresno</p> <p>The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code to the Project applicant, Southern California Edison Company. The applicant will install one (1) permanent culvert each at Crossing "1A" and "22A," and improve a temporary, existing native surface crossing at Crossing "31A" as part of the commercial harvesting of timber per 2012 South Shore THP-4-11-016/FRE-1.</p>	NOD

2012028001	<p>Periodic Weed Abatement Along the Upper Feeder Metropolitan Water District of Southern California Riverside--Riverside</p> <p>The project proposes to remove weeds/vegetation for fuel management to an approximate 40ft to 50ft strips (three strips) of property adjacent to residence and roadways. The vegetation maintenance proposed for removal consists of annual weeds (i.e. grasses, mustards, and Russian thistle). In addition, the project also proposes to clear weeds/vegetation around a structure, station 736+64, which is adjacent to the access road. Approximately 10ft to 15 ft radius from the structure will be cleared.</p>	NOE	
2012028002	<p>Globe Disposition and Development Agreement Culver City Culver City--Los Angeles</p> <p>Disposition and Development Agreement and the Sale of Property at 4044-4068 Globe Avenue to Habitat for Humanity of Greater Los Angeles to develop up to 10 for-sale affordable single-family townhome units.</p>	NOE	
2012028004	<p>Carlmont Dredging Maintenance Project Fish & Game #3 Belmont--San Mateo</p> <p>The Project consists of removing 100 cubic yards of sediment from approximately 270 feet of channel in order to maintain the channel at the designed flood conveyance capacity. An excavator will be stationed from the adjacent parking lot. A silt catchment basin will be installed at the downstream end of the project site, coffer dams will be installed and temporary pump will be used to divert flow upstream of the upper coffer dam. The flow will then be directed into a conveyance pipe to the silt catchment basin. SAA # 1600-2011-0379-R3.</p>	NOE	
2012028005	<p>Las Virgenes Creek Catch Basin Debris Screens Calabasas, City of Calabasas--Los Angeles</p> <p>Installation of curb screen on all storm drain catch basins with the Las Virgenes Creek watershed in the City of Calasasas to capture trash and debris.</p>	NOE	
2012028006	<p>Profile Grinding, Place Sealer Caltrans #3 --Placer</p> <p>Maintenance project to correct rutting, consists of Cold Planing off 0.08' AC on the eastbound direction from PM 45.7 to 49.2 and Grinding PCC pavement (0.08' Max) in both directions from PM 44.8 to 49.2, EP to EP. All ground PCC surface will be treated with a surface hardener sealer.</p>	NOE	
2012028007	<p>Interim Water Tank Ravine Burn Dump Stabilization Proejct Fish & Game #5 Laguna Beach--Orange</p> <p>SAA #1600-2011-0329-R5 - The project will compact the soil and debris of approximately 150 linear feet of the most rapidly eroding area (ravine) within the drainage feature/burn dump. Steel mesh reinforcement material and shot-crete will be applied to the bed and banks of the ravine up to a height of five-feet from the channel invert. The steel mesh reinforcement material and shot-crete will be applied upstream for approximately 150 linear fee to contain future flows and protect the surrounding debris laden slopes from erosive forces. Four velocity mat at the downstream end of the 150-foot shot-crete lined section of streambed.</p>	NOE

2012028008	See/Davis Canyon Fuel Break Forestry and Fire Protection, Board of --San Luis Obispo The proposed project will create an approximately 80' wide ridgeline shaded fuel break extending about 2 1/2 miles from the Davis Peak area southeast to near the termination of the ridgeline separating See and Davis Canyons near Avila Beach. Approximately one mile of an existing shrub covered road will be opened as well. A mechanical mulcher will be used to open the road and open a "P-line" down the ridgeline in order to provide access for hand crews. Due to steep slopes just off the ridgeline, the mulcher will only operate on approximately 10-20 feet in the center of the +/-80' wide fuelbreak.	NOE	
2012028009	HFT Tree and Brush Modification Project - Cuyamaca Forest Ranch HOA - Right-Of-Way Forestry and Fire Protection, Board of --San Diego The intent of this project is to create a reduced fuel zone on right-of-way adjacent to a main subdivision transportation network that will provide a greater degree of wildfire defensibility for the nearby residents and insure safe access to public a communication infrastructure site. The project consists of one (1) site totaling approximately 31 acres. Throughout the project site, vegetation will be modified 30 feet on both sides of a subdivision road network in a discontinuous pattern retaining well-spaced clumps of vegetation, brush, and trees representative of the current species diversity.	NOE	
2012028010	Phase III Delhi County Water District Waste Water Treatment Facility Modification Project Delhi County Water District --Merced The Phase III Delhi County Water District WWTF Modification Project consists of (1) underdraining the existing Algae Drying Beds and installing a ADB filtrate wet well, pump, and pipeline in order to prevent any potential nitrogen contamination of the underlying groundwater; and (2) constructing an impervious area onsite where the dried algal solids will be stored until they have been tested and approved for general use offsite under the Federal 503 Sludge Rule. 	015-030-089, and 015-030-050 will be renovated and adapted for the Tribe's use, or demolished and removed, as the condition of the structures and the needs of the Tribe warrant. The Tribe proposes to build housing the Tribal members on APN's 015-030-005, 015-030-46, 015-030-048, 015-030-050, 015-030-079, 015-030-080, 015-030-081, 015-030-082, 015-030-083 and 015-030-089.		
2008011092	Colton Lee Manufactured Housing Community, GPA/ZN/CUP Case Nos. GP05-0009/ZN05-0012, LU05-0121 Ventura County Simi Valley--Ventura Colton Lee Communities, LLC proposes to amend the General Plan and Zoning from Santa Susana Knolls Existing Community RE-5ac (Rural Exclusive, 5 acres minimum lot size), RE-1ac (Rural Exclusive, 1 acre minimum lot size), and RE-20,000 (Rural Exclusive, 20,000 s.f. minimum lot size) to Santa Susana Knolls Existing Community RPD-5.14 du/ac (Residential Planned Development, 5.14 dwelling units per acre) and requests a CUP to develop a 100-unit manufactured home community.	EIR	03/19/2012
2011041002	Hyundai Motor America North American Corporate Campus Fountain Valley, City of Fountain Valley--Orange HMA proposes to replace its former headquarters facility with an expanded, 469,700 s.f. corporate campus that would serve as its North American headquarters. The proposed project would accommodate a similar range of uses as the previous facility (i.e., administrative and executive functions; research, design, and testing; dealership/technician training and support; marketing; customer support and relations; and parts/accessories support). The project is anticipated to generate approximately 1,300 jobs (for a net increase of approximately 500 new jobs in comparison to existing conditions). The primary components associated with the proposed project would include an approximately 419,700 s.f. office building, an approximately 50,000 s.f. technical services building, a four story (five-level) parking structure (1,574 spaces), and surface parking (426 spaces). Access to the site would continue to be provided from the two existing access points along Talbert Avenue.	EIR	03/19/2012
2012021003	Pine Valley Sheriff's Substation San Diego County --San Diego The new Pine Valley Sheriff's Substation would be located approximately 1,200 feet northwest of the existing Sheriff's Substation and would replace the older leased facility. The project generally includes construction of a single approximately 4,200 s.f. building for the Substation, employee and visitor parking (seven public, one handicapped accessible, and 10 oversized secured/loading spaces), a paved access driveway and an unpaved decomposed granite (d.g.) secondary driveway (for emergency vehicle use only) connecting to Old Highway 80 to the west, septic pits, an emergency generator enclosure, a trash enclosure, and extension of water/utility service lines to the building. The Project site is currently vacant, with the surrounding area supporting a mixture of uses including a library, park, stores, residences, and commercial uses.	MND	03/02/2012

	roadway and 4-foot wide pedestrian walkway is proposed on portions of Lots 1 through 4 to provide access to Lots 2 through 5. Access to Lot 1 would be from Valota Road. The maximum height of the dwelling units would vary between 25.5 feet and 27 feet.		
2012022010	Mill Creek Watershed Young Forest Restoration Plan Parks and Recreation, Department of Crescent City--Del Norte The Department of Parks and Recreation proposes to restore young forests (11-24 years old) by mechanically thinning (using chainsaws) approximately 941 hectares (2,325 acres) of formerly harvested stands to promote historic species composition, encourage rapid tree growth, and accelerate the development of late-seral forest characteristics. The project is located in the Mill Creek Watershed of Del Norte Coast Redwoods State Park. A minimum of 185 trees per hectare (tph) (75 trees per acre (tpa)) will be retained after restoration and most stands will have at least 370 tph (150 tpa) retained. Prescriptions may be modified when necessary to protect sensitive resources such as rare plants or animals, wetland habitats, cultural resources, and geologically unstable areas.	MND	03/05/2012
2012021006	EIR 12-01 - Sewer, Water, and Recycled Water Master Plan Updates PEIR Carlsbad, City of Carlsbad--San Diego The proposed project is the update of the City of Carlsbad's Sewer Master Plan, and the Carlsbad Municipal Water District's (CMWD) Water and Recycled Water Master Plans. The Master Plans identify the Capital Improvement Programs (CIP) required to meet current and future demand through buildout of the service areas in 2035. The PEIR will address the potential physical environmental impacts that would result from the implementation of the proposed CIP projects.	NOP	03/02/2012

1990020202	Folsom Lake Community College Campus Los Rios Community College District The California Department of Fish and Game is executing Lake or Streambed Alteration Agreement number 1600-2011-0166-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, Los Rios Community College District.	NOD	
2002122056	Ord Ferry Road Bridge Seismic Retrofit Butte County --Butte The proposed project is a seismic retrofit of State bridge 12C-120 on Ord Ferry Road across the Sacramento River approximately seven miles south of Hamilton City, and 10 miles west of the city of Chico. State bridge 12C-120 is a nine-span reinforced box girder having a total length of 1,308 feet and width of 32 feet 7 inches. The structure is supported on round columns founded on driven pile-supported footings. This structure has been deemed by the State to be inadequate for the seismic region in which it is located. The State Lands Commission action is a 25-year General Lease - Public Agency Us through January 25, 2037.	NOD	
2006041048	Planada Wastewater Treatment Plant Improvement Project Planada Community Services District --Merced The Planada Community Services District proposes to upgrade and expand their wastewater treatment plant capacity from 0.53 to 0.75 mgd. The project would also implement a new disposal method. Effluent disposal would consist of evaporation and agricultural reclamation. The current practice of treated effluent discharge to Miles Creek would terminate.	NOD	
2007021127	2008 Owens Valley PM10 Planning Area Demonstration of Attainment State Implementation Plan Great Basin Air Pollution Control District --Inyo Authorize amendment of Lease No. PRC 8079.9, a General Lease-Public Agency Use, effective October 22, 2009, to amend Section 1-Basic Provisions of the Lease: Land Use or Purpose and Authorized Improvement; to amend Section 2-Special Provision for the construction, installation, operation and maintenance of the T-5 drip irrigation components associated with the Phase VII of the Owens Lake Dust Control Project.	NOD	
2008121074	Owens Lake Revised Moat and Row Dust Control Measures Los Angeles, City of --Inyo Construct, install, operate, monitor and maintain 3.5 square miles of moat and row dust control measures. A moat and row element is composed of a berm (row) 5-feet high with 1.5 to 1 sloping sides and a base 19 feet wide, an access road on both sides of the row up to 15 feet wide, flanked on either side by ditches (moats) 4 to 5.5 feet deep and up to 20 feet wide. The moat and row elements will be oriented perpendicular with the primary and secondary wind directions and serve as wind breaks. A portion of the rows will have a five foot high sand fence placed on top of them. Moat and row elements will disturb up to 33 percent of the 3.5 square miles. The State Lands Commission action is the amendment of Lease No. PRC 8079.9, a General Lease - Public Agency Use, to include the placement of	NOD

	above-grade sprinkler systems in the Sand Fence Area T1A-1.		
2009122009	Shiloh III Wind Energy Project Solano County Rio Vista--Solano The project involves the installation of 59 wind turbine generators (WTG) and foundations, access roads, control cables, power collection cables, and an electrical substation. The project will permanently remove 15 acres and temporarily impact 65 acres of California tiger salamander (<i>Ambystoma californiense</i>) habitat. The project is expected to result in incidental take of California tiger salamander, which is designated as a threatened species under the California Endangered Species Act. Minor Amendment No. 2, at issue here, adds two Permittees to the ITP and does not change the scope of impacts or the conditions of the ITP. The ITP reference above as issued by DFG authorizes incidental take of California tiger salamander subject to various terms and conditions, including the requirement that all authorized impacts are fully mitigated.	NOD	
2010052024	Russian River Estuary Management Project (Estuary Project) Sonoma County --Sonoma In order to comply with the requirement of the National Marine Fisheries Service's (NMFS) Russian River Biological Opinion, the Water Agency will implement adaptive management of the Estuary with the dual objectives of enhancing rearing habitat for juvenile salmonids, particularly steelhead, and managing estuary water levels to minimize flood hazard. Rearing habitat may be enhanced by reducing tidal influence on the Russian River Estuary from May 15 to October 15 to increase freshwater habitat available for rearing salmon and steelhead. Adaptive management requires 1) monitoring of biological productivity, water quality, and physical processes in the Estuary in response to the changes in management actions that control water surface elevations in the estuary-lagoon system; and 2) refinement of the management actions to achieve desired water levels to support biological productivity, while simultaneously providing flood control for properties adjacent to the Estuary.	NOD	
2010112006	UP #10-1-3, Butte Creek Farms Colusa County Colusa--Colusa A Use Permit for replacement of the existing mechanical boat launch ramp and parking area to support the existing marina with a permanent year round boat launch facility. The State Lands Commission action is a 20-year General Lease - Commercial Use through January 25, 2032.	NOD	
2011012077	Humbug Valley - Yellow Creek Meadow Restoration Project Plumas County --Plumas Treatment of 4,460 feet of gullied stream channel and 1,936 feet of unnamed tributary with a series of pond and plugs using heavy equipment. The treatment will redirect flows into remnant channels on the surface of the meadow.	NOD

2011122018	690 East Middlefield Road Office Project Mountain View, City of Mountain View--Santa Clara The project proposes a rezoning of an existing office/light industrial site from Limited Industrial-Transit Overlay Zone (ML-T) to a Planned Community (P) zoning district, which would allow for the development of the site up to a floor-area-ratio (FAR) of 1.0. The increase in FAR would allow for construction of up to 680,132 sf of office space, which would be an increase of ~496,072 sf over the existing 184,060 sf of development on the site. The project proposes to demolish three existing one-story attached buildings and would construct up to three detached office buildings (two six story buildings and one eight-story building), up to two parking structures (one one-story structure and one two-story structure), landscaping, and other site improvements. The buildings may be constructed at the same time or in phases.	EIR	03/19/2012

2008122111	Napa Pipe Napa County Napa--Napa FYI: Final The project proposal includes amendments to the County General Plan and zoning ordinance and would redevelop a "Brownfield" site involving the remediation of contaminated soil and groundwater, importing fill to raise the elevation of the site above the base flood elevation, and construction of a new neighborhood with: - 2,580 dwelling units, consisting of apartments and town houses, with an average size of 1,200 sf (20% of the units constructed will be affordable) - 150-unit continuing care retirement center for seniors - 40,000 sf of neighborhood serving retail uses - 190,000 sf of business park space (office, warehouse, R&D) - A 150-room condominium hotel with supporting uses - 34 acres of publicly accessible parks and open space w/connections to Kennedy Park and regional trails - privately-maintained roads, infrastructure and community facilities	FIN	
2012021008	Wireless Network Implementation Project Moulton Niguel Water District Laguna Hills, Laguna Niguel, Mission Viejo--Orange The project is the completion of the implementation of a wireless network for MNWD's Supervisory Control and Data Acquisition System (SCADA) to enhance communication/system function. The project includes the construction of 17 poles/towers ranging from 10 to 60 feet within MNWD's service area. This includes two towers in Aliso Viejo, five in Laguna Hills, seven in Laguna Niguel and three in Mission Viejo. Equipment attached to the poles/towers would be a wireless device. The poles/towers and the wireless communication equipment would be painted a neutral color so as to blend with the surrounding visual environment at each pole/tower location. Project construction will occur over a three to four month period.	MND	03/05/2012
2012021009	Loma Linda Alzheimer's Special Care Center Loma Linda, City of Loma Linda--San Bernardino JEA Senior Living is proposing to construct a 31,992 s.f., 24-hour, 66-bed, state of the art specialized memory care facility which focuses on Alzheimer's, dementia and related memory issues. The applicant is providing 41 parking spaces, and 48,946 s.f. of landscaping/open space. The project also requires approval of a General Plan Amendment from High Density Residential to Health-Care, and a Zone Change from Multiple Family Residence (R-3) to Institutional. The property is currently partially developed with a single-family home and accessory structures, with the remaining portion of the lot being vacant. The dwelling unit and accessory structures will be demolished as a result of the proposed development.	MND	03/05/2012

2012022009	Northern Regional Connector Pipeline San Jose, City of Santa Clara, Sunnyvale--Santa Clara The Northern Regional Connector is a 16,000-foot pipeline that would connect to the existing SBWR 30-inch pipeline on Lafayette Street at Tasman Drive. The pipeline would travel north and west through the cities of Santa Clara and Sunnyvale with creek crossings include San Tomas Aquinas Creek and Calabazas Creek. The pipeline would tie into the existing 24-inch pipeline on the east bank of the Sunnyvale East Channel.	MND	03/05/2012
2012022011	Holiday Inn Windsor, City of Windsor--Sonoma 100 unit hotel, including 1450 s.f. / 50 seat (interior) restaurant, and 2650 s.f. of meeting rooms. Building is 4 stories constructed over a basement garage. Overall floor area, excluding garage, totals 64,200 s.f.	MND	03/05/2012
2012022012	Campus Development Project San Lorenzo Valley Water District --Santa Cruz Expansion of SLVWD's service boundary to absorb the existing Olympia Mutual Water Co. service area and installation of associated water distribution system improvements. Improvements consist of installing approximately 7,500 lineal feet of new water main within W. Zayante Road from Moon Meadows Lane to Quail Hollow Road and along Newton Drive, Lilac Drive, Pine Drive, Azalea Drive, Madrone Drive, and Willow Drive.	MND	03/05/2012
2012022014	Parcel Map 10-007 (Duprey-Kibler) Shasta County Anderson--Shasta The request is for a land division that would create a 2.5-acre residential parcel and a 4.9-acre remainder parcel. The project would require improvement of a driveway encroachment to serve the residential parcel. The project would also require the installation of waterlines and fire hydrants as necessary to comply with Shasta County fire safety standards and policies regarding the provision of water service. If the remainder parcel is developed at a future point in time, a paved flag-lot driveway, emergency fire escape road, waterlines, and fire hydrants as necessary to comply with Shasta County fire safety standards and policies regarding the provision of water service would have to be constructed prior to development of the parcel.	MND	03/05/2012
2012022015	Route 20/29 Intersection Safety Project Caltrans #3 --Lake Caltrans proposes to construct a roundabout or signalize the intersection of SR 20 and 39. The purpose of this project is to reduce the frequency and severity of collisions at the intersection. The project is needed because the collision rate at the intersection is 3.7 times greater than the statewide average. The proposed improvements consist of two project alternatives. Alternative 1 is a roundabout with a raised central island and three approaches. Alternative 2 is a signalized intersection that will add a passing lane and crosswalk improvements.	MND	03/05/2012

2012022016	<p>Petition for Change of Place of Use for Water Right Permit 20295 (Application 27758) of Anderson Vineyards State Water Resources Control Board --Mendocino</p> <p>Permit 20295 (Application 27758) was issued December 29, 1988 by the Division of Water Rights. Permit 20295 allows for the diversion to storage of 75 acre-feet of water per year from an Unnamed Stream tributary to Mill Creek thence the Navarro River in an existing offstream reservoir for the purposes of irrigation, frost protection, and heat control. This Petition for Change for Permit 20295 would add 36 acres to the place of use (POU), for a total of 246 acres. A portion of the proposed POU is located on a parcel adjustment to the property which the Petitioner is leasing. The entire 246-acre POU is currently developed in vineyard and includes vineyard avenues and turnspaces. No additional development would occur with the petition. No changes to the water diversion authorized by Permit 20295 are proposed.</p>	MND	03/06/2012
2012022019	<p>Zone Amendment 11-006, Property Line Adjustment 11-009, Grading Permits BP11-00960 and BP11-01110 Shasta County --Shasta</p> <p>Request for an approval to rezone approximately 24.1 acres within an existing Planned Development (PD) zone district to a Rural Residential zone district with a 10-Acre Minimum (R-R-BA-10), and rezone approximately 52 acres within an existing Planned Development (PD) zone district to a Rural Residential zone district with a 20-Acre Minimum (R-R-BA-20). The purpose of the rezone is to facilitate a lot line adjustment/merger of 4 existing parcels into three parcels which could be developed for residential uses. The two grading permits will be for the construction of a new access road to the parcels and preparation of a homesite on one of the parcels.</p>	MND	03/05/2012
2012022013	<p>Phi Delt Alumni Association Demolition & Replacement Project Davis, City of Davis--Yolo</p> <p>The proposal is to demolish the existing 5,871 s.f., 26 beds, two and one-half bathrooms (1 four person shower, 4 toilets, 1 urinal), two-story building and replace it with 5,312 s.f., 19 beds, two and one half bathrooms (5 showers, 5 toilets, 3 urinals), two-story building. The proposed new building will be approximately 559 s.f. smaller, and seven beds less, than the existing building. The building down-size is intended to create a more compact footprint and allow for efficient use of the property, while acknowledging that rehabilitation of the existing building is financially difficult. The separate vacant parcel at 324 C Street (the southern 1/3 of the original three lots properties), will continue to be used as a recreational area.</p>	NOP	03/05/2012
2006062086	<p>City of Roseville 2020 Transportation System Capital Improvements Program Roseville, City of Roseville--Placer</p> <p>The California Department of Fish and Game is executing Lake or Streambed Alteration Agreement number 1600-2010-00194-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, City of Roseville Public Works Department. The applicant proposes to widen an approximate one-mile reach of Fiddyment Road from Pleasant Grove Boulevard intersection on the north to the Baseline Road intersection on the south. In order to allow road widening from 50 feet to 139 feet, the project includes limited extensions of two existing culvert</p>	NOD

2010121070	Addendum to the California Department of Public Health "Plant F41A Replacement Project." Public Health, Department of Fontana--San Bernardino The FWC water supply system includes 34 operating groundwater wells which supply water to the FWC system. One of the existing FWC wells, Well F41A, was constructed in 1925 and has been producing water from the Lytle Creek Groundwater Basin (Lytle Creek Basin) for more than 85 years. While attempting to refurbish existing Well F41A, FWC determined the existing well casing had collapsed. The age of the well and the weakness of the casing, combined with the loss of water flow from the well after relining, make it impractical to refurbish the existing well and more economical and water production efficient to abandon the existing well and construct a new replacement well. Existing Well F41A is no longer serviceable and has been taken out of production by FWC. FWC has selected a site that meets the identified criteria for location of the replacement well. FWC has designated the replacement site as Plant F54A and designated replacement well as Well F54A. In addition to constructing and operating the replacement well, this project will include the installation of an underground water pipeline to connect the new Plan F54A Well to FWC's existing water distribution system. The existing Plant F41A Well will be abandoned and filled in accordance with CDPH standards	NOD

	for the destruction of water production wells.		
2011052050	1260 Westridge Drive Shorenstein Subdivision and Planned Unit Development Project Portola Valley, City of Portola Valley--San Mateo The project is a 3 lot subdivision of an 11.6 acre parcel at 1260 Westridge Drive in Portola Valley, San Mateo County, CA. The parcel currently contains an estate home. The applicant plans to sell the parcel, and the proposed subdivision is intended to provide a future owner with the option to subdivide the parcel and either sell the parcels or use the parcels to develop additional estate uses (guest house, stable, etc...). Per town regulation each lot is required to have some form of residential use on it.	NOD	
2011052081	Countywide Siting Element, First Amendment Solano County Manteca--Solano Issuance of a Solid Waste Facilities Permit for Forward Landfill, Inc., an existing Landfill.	NOD	
2011102004	Mammoth Lakes Parks and Recreation Master Plan Mammoth Lakes, City of Mammoth Lakes--Mono The Parks and Recreation Master Plan is intended to provide a vision for future parks and recreational facilities to serve the year-round recreational needs of the Town through the year 2025, and may replace the 1990 Parks and Recreation Element and update the Parks, Open Space and Recreation Element of the Town's 2007 General Plan. The PRMP establishes goals, policies, and implementation strategies to guide future improvements; revised level of service standards for parks and recreation facilities; and identifies opportunity sites within the Town that could provide for expanded and/or new recreational facilities. The opportunity sites would be subject to further study and coordination with public and private participants, which may modify the potential locations of future parks and recreation facilities identified in the PRMP, and the specific facilities that would be developed at those locations.	NOD	
2011111051	United States Route 95 (US-95) Vertical Profile Realignment Project Caltrans #8 Needles--San Bernardino United States 95 (US-95) vertical profile realignment, construction of lanes, shoulders and a "no passing" restriping from PM 51.22 to 51.65 in San Bernardino County.	NOD	
2012028118	Interim Water Tank Ravine Burn Dump Stabilization Project, SAA No. 1600-2011-0329-R5 Fish & Game #5 Laguna Beach--Orange CDFG is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code (SAA# 1600-2011-0329-R5) to the project applicant, City of Laguna Beach. The project will compact the soil and debris of approximately 150 linear feet of the most rapidly eroding area within the drainage feature/burn dump. Steel mesh reinforcement material and shot-crete will be applied to the bed and banks of the ravine up to a height of five-feet from the channel invert. The steel mesh reinforcement material and shot-crete will be applied upstream for approximately 150 linear feet to contain future flows and	NOE

	protect the surrounding debris laden slopes from erosive forces. Four velocity dissipating elements will be installed within the channel in addition to a rock-lined erosion protection mat at the downstream end of the 150-foot shot-crete lined section of streambed.		
2012028119	Valtierra Swim Platform Project Regional Water Quality Control Board, Region 5 (Central Valley), Sacramento --Tuolumne The Valtierra Swim Platform Project consists of removing all the concrete that was placed below the normal high water line. The portion of concrete that prevents erosion around the swim deck footing will remain in place. The purpose is to restore the shoreline and protect the columns of the existing swim deck. Water will not be present during construction. The Valtierra Swim Platform Project will result in 0.0056 acre of permanent impacts to water of the United States.	NOE	
2012028120	Clear Lake Core Drilling Project Regional Water Quality Control Board, Region 5 (Central Valley), Sacramento --Lake The Clear Lake Core Drilling Project consists of drilling two, 3-inch in diameter, 394-foot deep sediment cores from the Upper Arm of Clear Lake for scientific research. Drilling will proceed from a barge assembled from 8 shipping containers using a 50-ton crane. To minimize disturbance to the water column, sediment cores will be collected using hydraulic piston methods within a coring chamber oriented on the lake bed.	NOE	
2012028121	Ballona Creek Catch Basin Debris Excluders Project Inglewood, City of Inglewood--Los Angeles The City of Inglewood - Public Works Department will install 205 catch basin debris excluders in existing catch basins located within the City boundaries in catch basins that drain to Bellona Creek which drains to the Santa Monica Bay.	NOE	
2012028122	Greenbelt Low Flow Infiltration Project Manhattan Beach, City of Manhattan--Los Angeles Installation of perforated pipe in existing landscaped parkway area and connection to existing storm drain system pipe.	NOE	
2012028123	Amie Detention Basin Restoration Torrance, City of Torrance--Los Angeles The project involves rehabilitation of a City of Torrance detention basin that discharges to the Herondo Stormwater drain, then conveys the runoff into the Santa Monica Bay, a SWRCB impaired water body. The rehabilitation will involve the cleaning and overlay of existing concrete area with shot-crete, 3 trash interceptors and concrete bridges with culvert, a crushed aggregate access road around the base's perimeter, relocation of existing pumps, an infiltration basin, a 1.5" irrigation line to use water from the basin to irrigate the newly introduced native vegetation Marsh-like and Semi-Wet Zone landscaped areas. This rehab is expected to result in reduction of stagnant water (improvement in vector control), reduction of bacterial concentrations (via treatment of wetlands and infiltration), decrease in the amount of runoff (via infiltration Basins) and improvements in aesthetics. 2012021014	School #39 K-8 Poway Unified School District San Diego--San Diego The District proposes to construct a new educational facility designed to accommodate kindergarten through eighth grade students. The proposed K-8 school would be constructed on approximately 22 acres of land. The school would consist of centrally located classroom villages (40 classrooms), a kindergarten (6 classrooms) with a play area, a pre-school (2 classrooms) with a play area, Special Day classrooms (4), and a student center. The southeastern part of the school would contain an administration building, a multi-purpose room, food services, a fitness center, and locker rooms. Parking would be provided at the southwest corner of the school site. Hard courts and the athletic field area would be located primarily on the northeastern half of the school. The athletic field would be equipped with field lighting. Construction activities would start in November 2012, and terminate in August 2014. The school would open for instruction in September 2014.	MND	03/07/2012
2012022021	PA-1200011 San Joaquin County Lathrop--San Joaquin This project is a Use Permit application to add urban green waste (which may include some food waste handling activities) to an existing agricultural waste composting facility. No new buildings will be constructed. Material is accepted into the facility and incorporated into windrows. The windrows will be turned periodically with a windrow tuner and monitored for temperature and moisture. The final product will be cured and sold as organically certified compost to agricultural and landscape users in the region. A maximum of five hundred tons per day and 182,500 tons per year of material will be accepted at the facility. The project is located on the south side of W. Frewert Road, 1.3 miles west of S. Manthey Road, west of Lathrop. This parcel is not under Williamson Act contract.	MND	03/07/2012
2012021016	Plasco Salinas Valley Salinas Valley Solid Waste Authority Gonzales--Monterey The project would involve the construction and operation of a Plasco Conversion System that would convert post-recycled municipal solid waste (MSW) into electricity, usable co-products, and residual wastes. The project would include the construction of a new plasma gasification facility on approximately 10 acres, located within the existing Johnson Canyon Landfill property, near the City of Gonzales, in unincorporated Monterey County. The project would include the construction and installation of a MSW receiving and sorting building, conversion processing facilities, electricity generation facilities, and utilities connections. Facility operation would include sorting of incoming waste (such as metals, recyclables, and unwanted inert materials), gasification of the MSW feedstock and sale of usable products. Together, these actions constitute the project. The Salinas Valley Solid Waste Authority (SVSWA) is a joint powers authority (JPA) that serves the waste diversion and disposal needs of approximately 270,000 people in the cities of Salinas, Gonzales, King City, Greenfield, and Soledad, as well as unincorporated areas of eastern Salinas Valley and southern Monterey County. SVSWA has prepared this IS to determine whether the project has the potential for significant effects on the environment.	NOP	03/07/2012

	square feet (sf) of common open space would be provided in a courtyard deck. A community room of 2,461 net sf would be included. Total floor area would be 94,193 sf. The project will exceed Title 24 by 14 percent, resulting in an energy savings of 40.5 percent, and 18 percent of energy use will come from renewable energy sources. The project will also include high-efficiency and low-flow fixtures as well as drought-tolerant landscaping.		
2012028140	Bridge Maintenance Project Caltrans #3 --Del Norte, Humboldt Caltrans is proposing to perform maintenance on thirteen bridge structures. The purpose of the project is to preserve the integrity of the structures. All work will occur within the Caltrans right of way, no acquisition is required. The bridges located at Post Miles: 87,87,88,92,99,122,R128,21,R28,39,7,17, & 19.	NOE	
2012028141	Bridge Maintenance and Preservation Caltrans #3 --Colusa, Glenn, Sutter, Yuba Provide bridge maintenance and preservation to 17 bridges in Colusa, Glenn, Sutter and Yuba Counties on State Route 5, 20, 45, and 99.	NOE	
2012028142	Peabody Road - Union Pacific Railroad Grade Separation Project Fairfield, City of Fairfield--Solano The City of Fairfield proposed to construct a grade separation (overcrossing) over the Union Pacific Railroad Tracks located on Peabody Road, just south of Vanden Road. The project will eliminate the existing at-grade crossing of the tracks at this location. The overcrossing will be built with a combination of cast in place/pre-stressed reinforced concrete box girders and pre-stressed/pre-cast "I" girders on cast in drilled hole piles. The overcrossing will extend from approximately the intersection at Vanden Road/Peabody Road intersection to approximately 400 ft south of the existing Markeley Lane. It will have the capacity to carry 6 lanes of traffic once completed, with bike lanes in each direction and a sidewalk on the east side. The following will be involved/occur as part of this project.	NOE	
2012028143	Reissuance of NPDES Permit for Calera Creek Water Recycling Plant and Associated Collection System San Francisco Bay Regional Water Quality Control Board Pacifica--San Mateo Reissuance of NPDES permit.	NOE	
2012028144	Deadwood Staging Area Forestry and Fire Protection, Department of Fort Jones--Siskiyou This project will involve the development of a staging area for inmate fire crews at Deadwood Conservation Camp. The entire project area is 6.5 acres. Four area within the forested eastern portion of the project area will be developed as camping sites for fire crews. Within each of these four areas an approximately 30x50 foot plot will be cleared of trees and leveled with a tractor. Additional trees may need to be removed at each campsite to accommodate parking for crew buses and utility vehicles. The area will retain a forested condition for shade and scenic quality. The maximum area to be cleared and graded is estimated to be 1/4 acre.	NOE

2012028145	Point Arena Ranch Acquisition California State Coastal Conservancy Point Arena--Mendocino Partial funding of acquisition of 123 acre coastal bluff by the US Bureau of Land Management for the purposes of providing public access, preserving open space; protecting wildlife habitat; and protecting coastal agriculture (grazing).	NOE	
2012028146	Time-Critical Removal Action (TCRA) for Disposal of Contaminated Soil at the Gompers High School Site Toxic Substances Control, Department of Richmond--Contra Costa The project activities will commence in February 2012 and are expected to take approximately 15 days to complete. The purpose of the TCRA is to address the threat of a release or potential release of leachable lead to the environment from contaminated soil stockpiled at the site. The lead-contaminated soil was excavated from a boiler room basement that serviced the old high school facilities.	NOE	
2012028147	Grevillea Housing, LP Inglewood, City of Inglewood--Los Angeles The purpose of this project is to develop affordable multi-family housing for low-income and very low-income residents of the City of Inglewood. The Project will partially meet the City's affordable housing needs.	NOE	
2012028148	Sutro Reservoir Dam, No. 10-24 Water Resources, Department of San Francisco--San Francisco Construction of a geo-composite drain layer and concrete slab on the floor of the dam, valve replacements in the gate tower, and replacement of subdrain under the floor slab.	NOE	
2012028149	Idyllwild Facilities Maintenance, Mt. San Jacinto SP, (11/12-IE-12) Parks and Recreation, Department of --Riverside Structures within the Idyllwild historic zone, including the two staff residences, garage, and maintenance shop, are in need of routine and deferred maintenance. Structures will be tested for lead, repainted, and rotted and damaged wood replaced in kind according to the Secretary of the Interior's Standards for Historic Preservation. Windows will be reglazed as needed; deteriorating concrete will be repaired, and other repairs as needed. All work will be conducted to DPR standards.	NOE	
2012028150	Idyllwild Interpretive Center, Mt. San Jacinto SP, (11/12-IE-13) Parks and Recreation, Department of --Riverside This project consists of removing the existing 1980's vintage 12'x60' modular building which acts as a reception area, visitor center, non-profit sales area, and sector office located at the entrance to the Idyllwild campground. It will be replaced with an approximately 24'x60' modular in the same location. The replacement modular will match exterior horizontal siding and brown and green colors of the adjacent CCC-era historic structures (ranger residence, garage, and shop) to better complement the CCC park rustic design than current structure. All construction will be limited to areas currently developed; there will be no disturbance to previously undisturbed areas.	NOE

2012028151	Lead Abatement and Paint, Wildwood Canyon (11/12-IE-11) Parks and Recreation, Department of --San Bernardino Wooden structures of the historic Hunt and Hi-Up (McCullough) Ranches at Wildwood Canyon are deteriorating as the existing paint weathers and flakes from the buildings. The facilities, dating as early as 1932, have tested positive for lead paint. The Hunt Ranch barn and Hi-Up house will be treated for lead by a licensed abatement contractor to EPA standards, the wood sealed, and both buildings repainted in their original white color scheme. The district archaeologist will be available to monitor and approve all treatments as necessary. Other buildings within the park, including barns, sheds, outbuildings, and fences, will be similarly treated and repainted as future funding allows.	NOE	
2012028152	Septic Tank #8 Replacement Parks and Recreation, Department of --Santa Barbara Will replace "like for like" old septic tank serving combo building #8 at El Capitan State Beach.	NOE	
2012028153	New Water Supply System (Previously Constructed) Public Health, Department of --Kern The California Department of Public Health (Department), as the Lead Agency, will be issuing a water supply permit to Paramount Hulling and Shelling Company LLC for the connection of an existing water system to provide safe water for human consumption. The addition of a surface water treatment plant provided protection from low turbidity and reduction of microorganisms through filtration and disinfection. The new connection will service an industrial facility.	NOE	
2012028154	Adoption of Revisions to the State Energy Program Guidelines Energy Commission Sacramento--Sacramento The purpose of this activity is to revise guidelines previously adopted by the California Energy Commission to govern the administration of its State Energy Program pursuant to Public Resources Code Sections 15460 - 25464. The guidelines describe how the Energy Commission will implement its State Energy Program and identify available funding, eligibility criteria, the evaluation and award process, and other requirements to qualify for funding under the program elements.	NOE	
2012028155	Veterans Home of California at Yountville Cemetery Renovation Project Veterans Affairs, Department of Yountville--Napa The proposed project consists of renovation of the Cemetery at the Veterans Home of Yountville. The project is needed because the cemetery requires repairs to improve use, appearance, and maintenance of grounds, and to provide for Americans With Disabilities Act (ADA) compliance and accessibility to veteran residents and their families. The existing Cemetery is about 10.5 acres and includes about 5,559 gravesites. Many of the gravestones are tilted or leaning, and the small plaza upon which the Monument to the Unknown Soldier is built is deteriorating and ADA inaccessible. The project proposes to clean and realign the headstones, replace damaged fencing, provide landscape measures including additional topsoil, new grass turf, and updated irrigation system, renovate concrete plaza at the Monument, re-grade slope of approach to the Monument and install	NOE

	be provided by a private by a private road connecting to Elfin Forest Road. The project would be served by on-site septic systems and imported water from the Olivenhain Municipal Water District. No extension of sewer of water utilities will be required by the project. Earthwork will consist of cut of 2,090 cubic yards of material and fill of 4,490 cubic yards of material. The project includes the following off-site improvements: improvement of the existing private road easement, Aguilera Lane, from Elfin Forest Road to Street 'A', to a graded width of twenty-eight feet (28') and to an improved width of twenty-four feet (24') wide with asphalt concrete.		
2012022026	1288 West El Camino Real Gas Station Project Mountain View, City of Mountain View--Santa Clara The 0.95 acre project site is currently developed with a four-pump (i.e., eight fueling stations) Shell gas station, a convenience store, and four auto service bays. The existing structure containing the convenience store and auto service bays totals 2,196 s.f. The site has been an operating gas service station since the 1960's, but the repair bays have been out of operation for approximately five years. The project proposes to demolish the existing convenience store and auto bays and construct a new 2,655 s.f. convenience store and a 2,088 s.f. drive-through car wash. The project also proposes to replace the four existing gas pumps and install two additional pumps (for a total of 12 fueling stations), and replace the canopy structure over the fueling area.	MND	03/09/2012
2012022027	Creekside Park Monte Rio Recreation and Park District --Sonoma The Monte Rio Recreation and Park District (MRRPD) plans to redevelop the site known as the Old Monte Rio Elementary School and create recreational opportunities for both local residents and visitors that encompass a range of different interests and age levels. Along with improvements to the main property to create the new Creekside Park, connections will be developed to a network of trails in the larger area that ultimately link Monte Rio to the coast. The project will be implemented in two phases. Phase I was funded as part of redevelopment in the lower Russian River area, with dedicated funds now administered by the Sonoma County Board of Supervisors, and will involve improvements to the landscape and structures, including a new skate park, community garden, public trail along the creek front, permeable parking, public restrooms, and a small concession cafe in the existing building with an outdoor dining patio. Phase II would include additional improvements to Creekside park and connections to a trail system that would accommodate hiking, cycling, and possibly equestrian uses if proposed trail grades are not too steep and trailer parking is available. 	living in Fort MacArthur's housing areas and the general public that uses the sidewalk, roads, and parking areas at the base of the slopes. Additionally, slope stabilization is necessary to maintain the installation's physical security requirements.		
2012022030	C-17 Assault Landing Zone Articulated Concrete Block Shoulders U.S. Air Force Fairfield--Solano This project represents a change in the design of the C-17 Assault Landing Zone currently under construction on Travis AFB. The original design, assessed in a September 2008 EA, included dirt shoulders along the edges of the landing zone. Following the beginning of construction it was determined that similar dirt shoulders at another air base were particularly susceptible to erosion from the vortex created by C-17 aircraft. As a result, the Air Force proposes to change the shoulder design at Travis to include the installation of pre-fabricated articulated concrete blocks to minimize soil erosion. These blocks will result in additional permanent impact over the original design and so a supplemental EA and FONSI have been prepared for review.	JD	03/12/2012
2005052138	Montelena Douglas Rancho Cordova, City of --Sacramento The project would remove 85 residential units from the original 875 units for a new total of 790 units. The 2012 Montelena Douglas project is a revision to approximately 45.3 acres of Villages 4 and 5, previously approved in the original Montelena project. Villages 4 and 5 will be reconfigured into 14.2 acres of commercial, a 1.6-acre park, and a 2.4-acre fire station site. The remaining portion of Villages 4 and 5 will be reconfigured into single-family residential lots.	MND	03/12/2012
2012021023	Mariposa at Ellwood Shores Assisted Senior Living Facility Goleta, City of Goleta--Santa Barbara The proposed project includes the following elements: 1) A Rezone of 7760 Hollister Avenue from M-RP (Industrial Research Park) to C-3 (General Commercial). 2) An Ordinance Amendment for a Development Agreement between the City of Goleta and Mariposa, LLC to implement the project's fair share funding of Fire Station 10. 3) A Development Plan for a 70,510 s.f. assisted-living community accommodating a maximum of 99 elderly residents. The structure would be two stories with a maximum height of 34'2" and include a covered porch at the entrance, a large central courtyard and a barbeque terrace. 4) A Minor CUP to allow a special care home in the C-3 zone district.	MND	03/12/2012
2012021025	U.S. Marine Corps (USMC) Advanced Water Treatment Facility / Utility Corridor Project (P-113) California State Lands Commission --San Diego The proposed Project consists of adding treatment processes to the Haybarn Canyon Drinking Water Iron/Manganese Removal Treatment Facility and constructing a pipeline for disposal of brine to be generated by the facility. A 16-inch internal-diameter (max.) brine disposal pipeline would extend ~10 miles from the Haybarn Facility to the ocean on the southern coast of the U.S. Marine Corps Base at Camp Pendleton. Brine would meet the requirements of the	MND	03/12/2012

	facility's pending NPDES permit and, after collecting in an underground concrete caisson below the beach flow from three screened diffusers, buried ten feet below the sea floor, into the Pacific Ocean, 200 to 250 feet from the caisson and at water depths of approximately 30 feet. The proposed Project is needed to ensure compliance with more stringent secondary drinking water standards.		
2012022028	Citywide Pedestrian Master Plan San Mateo, City of San Mateo--San Mateo The City of San Mateo has developed a Citywide Pedestrian Master Plan to improve the pedestrian environment and to establish itself as a more walkable, livable, and healthy city. The Pedestrian Master Plan provides a broad vision, strategies, and actions for improving the pedestrian environment in San Mateo. Recommendations include infrastructure and programmatic projects. The Plan's recommendations are built on and consistent with City goals and policies for increasing the number of people who walk in San Mateo.	MND	03/12/2012
2012022029	Ohlone College Fremont Campus Photovoltaic Project Ohlone Community College District Fremont--Alameda Ohlone Community College District proposes to install a 1-megawatt (MW) photovoltaic system in a portion of the Ohlone College Fremont campus. Current site uses include athletic fields and open land. The system would be ground-mounted and would supply power to the campus.	MND	03/12/2012
2004081014	Melrose Triangle West Hollywood, City of Beverly Hills, West Hollywood--Los Angeles The Melrose Triangle project includes retail/restaurant floor area designated for general retail, art galleries, design showroom, and cafe/restaurant uses. These retail/restaurant uses would be located along Melrose Avenue and Santa Monica Boulevard at the project's street levels. The second through fifth floors are designated for office and residential uses. All parking would be subterranean. The project would include three primary structures divided by a paseo accommodating pedestrian access from Santa Monica Boulevard through the Melrose Avenue. Three driveways would provide vehicular access from the adjacent streets.	NOP	03/12/2012
2007102106	James Donlon Boulevard Extension Pittsburg, City of Pittsburg--Contra Costa The proposed project would consist of a 1.71-mile extension of James Donlon Boulevard from the western edge of the approved Sky Ranch II Subdivision to Kirker Pass Road. The proposed project would provide a limited access arterial roadway to serve regional circulation needs and relieve existing traffic congestion on Buchanan Road, which currently receives a high volume of commute traffic between the cities of Antioch and Concord. Beginning at James Donlon Boulevard, the extension would transition to a two-lane roadway designed to rural road standards. The road would transition to a four-lane roadway near the intersection with Kirker Pass Road and would be designed to urban road standards. Kirker Pass Road, from Nortonville Road to the City limit line would be upgraded from rural road standards to urban road standards. The James Donlon Boulevard/Kirker Pass Road intersection would be a four-way signalized intersection with the proposed Montreux Drive.	NOP	03/12/2012

1996052075	<p>South Sacramento Corridor Light Rail Project Phase 2 Extension Project Modifications Sacramento Regional Transit District Sacramento, Elk Grove--Sacramento The Project involves developing the extension of Light Rail Transit (LRT) service from the existing Meadowview Station approximately 4.3 miles to CRC.</p> <p>The Project will permanently remove 1.383 acres of giant garter snake (<i>Thamnophis couchi gigas</i>) habitat and temporarily impact 8.44 acres. The Project is expected to result in incidental take of giant garter snake (Covered Species), which is designated as a threatened species under the California Endangered Species Act. The ITP referenced above as issued by DFG authorizes incidental take of Covered Species, subject to various terms and conditions, including the requirement that all authorized impacts are fully mitigated.</p>	NOD	
2005031158	<p>San Jacinto Valley Regional Water Reclamation Facility Title 22 Tertiary Treatment Upgrade Eastern Municipal Water District San Jacinto--Riverside Eastern Municipal Water District (EMWD) San Jacinto Valley Regional Water Reclamation Facility (SJVRWRF) collects and treats municipal sewage and produces recycled water for reuse. The SJVRWRF currently produces only secondary recycled water. Secondary recycled water can be used to irrigate fiber, and feed and seed crops not consumed directly by humans. A higher level of treatment, known as tertiary treatment, effectively removes bacteria, viruses, and virtually all suspended solids. At this level of treatment, recycled water can be used for any purpose except direct human consumption of treatment; recycled water can be used for any purpose exempt direct human consumption (drinking). The SJVRWRF service area is experiencing growth and based on current flow rate projections, the SJVRWRF's treatment capacity must be increased and the capability to produce tertiary recycled water added. To meet present and projected future tertiary treatment requirements, EMWD is proposing the addition of tertiary treatment facilities and the modification of existing facility that will provide the plant with a capacity to produce an annual average of 14 million gallons per day of tertiary treated recycled water. Upon completion, the proposed project will accommodate planned growth within the SJVRWRF services are and improve the quality and increase the potential uses of the recycled water discharged from the plant.</p>	NOD	
2005091136	<p>San Jacinto Regional Water Reclamation Facility Expansion to 14 MGD Eastern Municipal Water District San Jacinto--Riverside Eastern Municipal Water District (EMWD) approved and adopted an Initial Study/Mitigated Negative Declaration (IS/MND) on November 16, 2005 for the San Jacinto Valley Regional Water Reclamation Facility (SJVRWRF) Plant 2 Facilities. The purpose of that project was to expand the treatment capacity of the SJVRWRF to meet current and future treatment requirement by constructing new and modifying existing facilities to accommodate an average annual inflow of 14 million gallons per day (MGD).</p>	NOD

2009072084	<p>West Berkeley Project Berkeley, City of Berkeley--Alameda</p> <p>This Supplemental EIR will consider the potential environmental impacts of the following options relating to the Master Use Permit process, as directed by the City council on July 19, 2011, and September 20, 2011:</p> <p>* Allow increased housing density within four specific potential Master Use Permit ("MUP") sites that also include MUR and/or C-W zoned property:</p> <ol style="list-style-type: none"> 1. Peerless Greens, 2246 Fifth Street; 2. Saul Zantz Media Center, 2657 Tenth Street; 3. Marchant Building, 1035 Folger Avenue; 4. OSH/H.S. Heinz Company Plant Building, 1099 Ashby /2900 San Pablo Avenue. <p>* Allow increased building height (up to 100 feet) for essential industrial equipment and processes in all MUP sites;</p> <p>*Allow flexible placement of manufacturing and residential uses throughout MUP sites;</p> <p>* Address potential impacts of MUPs on Aquatic Park and its habitat</p>	SIR	03/28/2012
1991093067	<p>Edgewood Canyon Estates San Mateo County --San Mateo</p> <p>Amendment to final 6-lot Major Subdivision map to reduce it 2 lots (minor subdivision), including grading permit for 75, 565 cu/yds of grading (previous subdivision had been recorded, but bonded improvements never occurred).</p>	NOD	
2009091127	<p>MDH 04-09; ZCC #4, Map 216; ZCC #11, Map 233; CUP #3, Map 216; CUP #7, Map 233 Kern County --Kern</p> <p>The Project includes construction and operation of a 250-megawatt maximum wind energy generation facility. Major components of the Project include up to 250 wind turbine generators, up to three (3) electrical substations, meteorological towers, one (1) operation and maintenance facility, and up to six (6) concrete batch plants. Grading for the project will excavate, contour, and place fill in a portion of several unnamed ephemeral tributaries and Cottonwood Creek. Project components that will occur in California Department of Fish and Game (CDFG) jurisdictional areas include eight (8) culverted road crossings, 48 at-grade road crossings, and excavating and backfilling trenches for underground electrical lines at 13 locations. Fill material will be placed into approximately 2,016 linear feet of CDFG jurisdictional ephemeral drainage (approximately 15.9 acres of permanent disturbance, and 50,303 cubic yards of fill). An additional 14,501 linear feet (approximately 34.5 acres) will be temporarily disturbed during construction. The CDFG is issuing the Streambed Alteration Agreement referenced above as a Responsible Agency under the California Environmental Quality Act (CEQA).</p>	NOD	
2009101103	<p>Settlers Point TM 5423; REZ 05-004 San Diego County --San Diego</p> <p>The project is a residential subdivision for multi-family housing. The zoning reclassification and tentative map would allow no more than 266 units on 21.89 acres. The rezone proposes to change the zoning from RS4 to RV-14.5.</p>	NOD

2009111046	Edwards Grading Plan San Diego County Fallbrook--San Diego The project is an L-Grade permit to correct previous illegal agricultural grading. Project proponents were authorized under Agricultural Exemption (AE) 296 to clear and perform some grading of the natural site to plant grove trees and construct access roads to the various parts of the grove. A total of 9.4 acres were permanently converted to agriculture. On acre that was cleared, where a home was anticipated to be constructed, was outside the boundaries of AE 296 and is subject to a grading and clearing violation. Five drainage crossings resulting from the construction of the grove roads are also included in the violation.	NOD	
2010112067	San Lorenzo Valley Water District Campus Development Project San Lorenzo Valley Water District --Santa Cruz Proposal to consolidate the San Lorenzo Valley Water District operations onto a common campus by combining parcel 081-204-01, 03, 04, 06 & 07, remodeling the existing office building (District Office Building), constructing a 2,620 square foot addition to the existing office building (Board of Directors Annex), constructing an 8,000 square foot Operations Building, demolishing two existing storage buildings (1900 and 1500 square feet), expanding two existing parking areas by approximately 5,500 square feet and adding approximately 1,870 square foot new parking area at the existing entry driveway, relocating on-site wetlands, and creating two enhanced wastewater dispersal mounds. The project requires 700 cubic yards of cut and 2,500 cubic yards of fill. Requires a Commercial Development Permit, a Riparian Exception, Soils Report Review, Preliminary Grading Review, and Archeological Report Review.	NOD	
2011052073	6731 Tahoe Timeshare (PCPA 20090078) Placer County --Placer The project proposes to remove and replace the existing motel facility with ten, two to three-story duplex fractional timeshare units (Tourist Accommodation Units), a +/- 1,757 square-foot clubhouse with a two bedroom manager's unit above and three single-story residences that will house four employee-owned one-bedroom units.	NOD

2012028176	<p>Agreement 2011-0184-R4; SR Acceleration Lane at La Grange Road Fish & Game #4 --Tuolumne</p> <p>The proposed Project will construct a 1,150-foot long by 12-foot wide acceleration lane with 8-foot shoulder on eastbound SR 120 with a 600 foot lane taper. This will require the addition of 20 feet of new pavement along the east bound lane. The existing left turn pocket on westbound SR 120 will be increased to the standard 8-foot width by re-striping to shift the lanes southward and will be extended to 585 feet for storage and taper. A high-side super-elevation ditch would be constructed along the edge of the new shoulder to direct water run-off to an existing natural channel. The existing AC dike on the eastbound SR 120 will be replaced in kind. The 4 foot dike along westbound SR 120 will be replaced with a 6 foot dike (Type A) to accommodate stormwater runoff from existing and new pavement. An 18-inch Corrugated Metal Pipe (CMP) which 4runs under La Grange road will be replaced with a 24-inch reinforced concrete pipe with flare-end sections, and Rock Slope Protection (RSP) will be placed at the outlet. The Project will require the removal of three oak trees under 24 inches in diameter at breast height (DBH). The Project will avoid impacts to elderberry bushes.</p>	NOE	
2012028177	<p>EA 2011-0009 (River Highlands Community Services District Water System Upgrade) Yuba City Marysville--Yuba</p> <p>The River Highlands Community Service District, in conjunction with Yuba County, plans on upgrading the existing water system for the Gold Village subdivision in order to bring the system into regulatory compliance. The rehabilitation of the water system will include a telemetry upgrade; replacement of the South Well pump; water quality and pump testing; and preparation of an application for construction funds from the California Department of Public Health, Safe Drinking Water State Revolving Fund.</p>	NOE	
2012028178	<p>1600-2011-0195-R2 Wash Creek Restoration Streambed Alteration Agreement Fish & Game #2 --Plumas</p> <p>The projects is limited to the use of hand tools and chainsaw for the removal of about 3.5 cubic feet of native gravel and aquatic weeds from a 200-foot of Wash Creek (tributary to Sulphur Creek), the placement of the gravel on the sides of the channel, and the placement of several native logs, wattles of native willow cuttings and larger rocks along the bank.</p>	NOE	
2012028179	<p>1600-2011-0169-R2 Streambed Alteration Agreement for Antelope Lake. Lost Cove Boat Ramp Replacement Fish & Game #2 --Plumas</p> <p>The project is limited to rehabilitating the existing asphalt parking lot with double chip seal; construction of a boat trailer parking area and a day use area. The day use area will include three shade structures with concrete picnic tables, a dual unit CXT restroom, a five foot wide concrete ADA accessible sidewalk, and tow van-accessible ADA parking stalls. Also, several drain inlets and pipes will be repaired or replaced as needed. The existing boat ramp will be replaced with a 150 foot long by 48 foot wide rv-grooved push slab ramp. The project will include minor grading activities to prepare the subgrade for the base rock material. Riprap will be placed around the perimeter of the ramp to protect the ramp.</p>	NOE

2012028198	Removal Action Workplan, 485 South Monroe Toxic Substances Control, Department of San Jose--Santa Clara The RAW focuses on the excavation of soils in the northern portion of the project site containing the following chemicals of potential concern (COPCs): arsenic, lead, and dichlorodiphenyltrichloroethane (DDE), and the backfilling of these excavated areas with clean soil. The excavated soil will be transported off-site to an appropriate permitted landfill for disposal. The DTSC project does not include the demolition of on-site buildings, which is an activity associated with the subsequent redevelopment project that will undergo a separate CEQA evaluation by the City of San Jose; the scope of the DTSC project is limited to the excavation of impacted soil and backfilling with clean soil.	NOE	
2012028199	Removal Action Workplan for Deep Soil, Former Honeywell Turbo Technologies Facility Toxic Substances Control, Department of Torrance--Los Angeles The purpose of the RAW to address volatile organic compounds (VOCs) in an approximately 13 acre foot parcel of soil at the Honeywell Turbo Technologies facility site (Site) by implementing a soil vapor extraction (SVE) system. The Site investigation history was summarized in the Supplemental Extended Site Characterization Report (Report), dated October 2008. The SVE was selected after a soil vapor extraction pilot and batch test, reported in the CH2MHill;s Site Vapor Extraction Pilot Test Report dated 2010 and Batch Test Report dated 2011, successfully operated at the Site. The SVE is expected to reduce VOC source material in the deep vadose zone soil and soil gas .	NOE

2010041086	Proposed Rule 1420.1 - Emissions Standard for Lead from Large Lead-Acid Battery Recycling Facilities South Coast Air Quality Management District -- Note: Final EA for Proposed Rule 1420.1 (pursuant to PRC S.21080.5 (Certified Regulatory Program) & CCR S15153) On December 31, 2010, the U.S. EPA designated Los Angeles County only as nonattainment for the new National Ambient Air Quality Standard (NAAQS) for lead and required the SCAQMD to prepare a 2012 Lead SIP to demonstrate attainment of the Lead NAAQS no later than December 31, 2015. The 2012 Lead SIP includes a control measure to lower the ambient lead limit in Rule 1420 - Emissions Standards for Lead, from 1.5 to 0.15 ug/m3, consistent with the lead NAAQS and Rule 1420.1. Current monthly lead monitoring data in the Basin at facilities subject to Rule 1420 show average lead concentrations are less than 0.15 ug/m3, so the proposed control measure is not expected to result in modifications at affected facilities. If monitoring near or at a lead facility exceeds 0.15 ug/m3, the proposed control measure may require implementing lead control requirements similar to those in Rule 1420.1, e.g., lead monitoring, housekeeping	EA	03/15/2012

	activities, etc. Because the October 2010 Final EA for Rule 1420.1 (SCH No. 2010041086) meets the requirements of CEQA Guidelines S15153(1)(A through C) as determined through the preparation of an IS, SCAQMD staff has concluded that it is appropriate to rely on the October 2010 Final EA for Rule 1420.1 as the CEQA document for the 2012 Lead SIP.		
2011122065	UCSF Medical Center at Mission Bay - Fourth Street Public Plaza University of California San Francisco--San Francisco The University of California, San Francisco (UCSF) proposes to construct and maintain a public plaza on the Fourth Street right-of-way between 16th and Mariposa Streets that would result in the closure of Fourth Street to vehicular through-traffic at this location. The City and County of San Francisco's planned pedestrian access and bicycle route through Fourth Street would be maintained. The proposed Project also includes two pedestrian bridges across Fourth Street, to be constructed if and when Phase II of the Medical Center at Mission Bay is approved and constructed. Finally, the project would include implementation of various transportation system improvement measures.	EIR	03/30/2012
2008081001	General Plan Amendment Application No. 513 Fresno County --Fresno NOTE: 1 Hard Copy The proposed project includes an update of the Laton Community Plan, which is a component of the Fresno County General Plan. The proposed community plan would increase the planning area to about 583 total acres, an increase of 111 acres. Table ES-1 shows the existing and proposed land use (by acreage) within the community of Laton. A detailed description of the community plan update follows.	FIN	
2012021035	La Mesa Downtown Streetscape Enhancement Project La Mesa, City of La Mesa--San Diego The City of La Mesa is embarking on a streetscape improvement project to enhance the City's public right-of-way. The current streetscape improvements in the Downtown Village area date to the early 1980's. Sidewalks have deteriorated over the years and do not meet current accessibility standards. The project consists of modifications to streets, sidewalks, lighting and landscaping in the downtown area of La Mesa, commonly known as the La Mesa "Village". The City of La Mesa was incorporated in 1912, and some of the buildings in the Downtown Village along La Mesa Boulevard date from the late 1800s and early twentieth century. These structures are not proposed to be altered within the streetscape enhancement project area. The focus of the project is to upgrade street and sidewalk areas to improve public access and mobility to adjacent retail establishments. In addition to new curb, gutter, sidewalks, pedestrian ramps and crosswalk enhancements at intersections, the project will feature new landscaping and street lighting for good aesthetics and an improved pedestrian environment. Sidewalk bulb-outs are proposed in pedestrian-use areas and to reduce pedestrian exposure at intersection crossings at several intersections from Acacia Avenue to 4th Street along La Mesa Boulevard. In addition, this project will remove and dispose of or reuse existing electrical conduits, electrical and mechanical equipment, telecommunications	NOE	
2012028217	Fender and Chain Repairs at Broadway Pier and Tenth Avenue Marine Terminal San Diego Unified Port District San Diego--San Diego The proposed project is replacement of existing fenders and chains at Broadway Pier and the Tenth Avenue marine Terminal (TAMT). Work on the Broadway Pier is the replacement of restraining chains for floating fenders along the south side of the pier. Work at TAMT is the replacement of chain and chain mounting hardware at 37 foam-filled fender locations, replacement of four (4) foam-filled fenders, and replacement of 15 10-inch diameter cylindrical rubber fenders and chains. The work at TAMT is a Berths 10-3 through 10-8. Construction is anticipated to commence in March 2012 and would be complete in approximately 60 days.	NOE	
2012028218	Petaluma Waterline Replacement Parks and Recreation, Department of --Sonoma Replace the failing galvanized water pipe with new 80 PVC pipe to provide reliable service to Petaluma Adobe State Historic Park grounds, buildings, ranger residence, and District offices. Work will excavate up to 18 inches deep to replace water pipe with up to 2 1/2 inch PVC pipe; excavate to install valve vaults and five water meters to the lines to diagnose leaks; and replace the water buffer tank and automated chlorinator.	NOE	
2012028219	Cogeneration Plant and Lighting Retrofits Project Corrections and Rehabilitation, Department of -- The first project component consists of a number of improvements to the existing cogeneration plant. These include the installation of Selective Catalytic Reactors (SCRs), an Ammonia Injection Grid (AIG) and a UREA-to-ammonia on-demand system, as well as the installation of an automation system, and redesign of the operating sequence and logic that controls this system. The net benefits of these improvements will include increased steam capacity, a reduction in boiler run time, cost savings due to reduced demand from external electricity sources (especially during peak use rates), and a significant decrease in greenhouse gas emissions. All of this work will take place on existing mechanical systems within previously developed areas within the existing secure perimeter.	NOE
