STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**

February 1 – 15, 2014

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **February 1 – 15, 2014**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Director

CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

USPS:

State Clearinghouse
P.O. Box 3044
Sacramento, CA 95812-3044

OR

USPS/Courier Service / Hand Deliveries:

<u>Documents Received on Monday, February 03, 2014</u>			
2014022002	Vesting Tentative Parcel Map Application No. PLN2014-0012 - LaCasta Farms LLC Stanislaus County --Stanislaus Request to divide three parcels consisting of 293 acres into a total of six new parcels ranging in size from 40 to 70 acres. Current use of the three existing parcels consists of orchards.	CON	02/18/2014
2008011118	Ferguson Slide Permanent Restoration Project Caltrans #6 --Mariposa The project is located on SR 140 in Mariposa County, from 8 miles east of Briceburg, a small community anchored by a Bureau of Land Management Visitor Center, to 7.6 miles west of El Portal (post mile 42.0 and 42.7) where the Ferguson rockslide covered the highway with 798,000 tons of rock and debris in April 2006. Caltrans proposes to restore full highway access between Mariposa and Yosemite via SR 140 in Mariposa County, CA, by repairing or permanently bypassing the portion of SR 140 that was blocked and damaged by the Ferguson rockslide.	FIN	
2012111086	Vierra Dairy Farm Expansion Project Merced County --Merced FYI Final 1 HC Conditional Use Permit CUP12-005 would allow the expansion of an existing dairy facility and bring it into compliance with Merced County's permit requirements. The existing dairy would be expanded to house a total of 5,600 animals, an increase of 2,225 animals over the existing 3,375. The proposed project would include reconfiguration of the existing dairy facilities, including the removal of two corrals, and the construction of a freestall barn and a 72-stall rotary dairy barn between the corrals and the commodity barns. Additional ancillary improvements would include an entrance driveway, a parking area with 40 spaces and two handicap spaces, landscaping, and a perimeter road located west of the proposed freestall barn.	FIN	
2014021001	ENV-2013-2232-MND / 7300 N. Medical Center Drive Los Angeles, City of --Los Angeles Pursuant to Sections 12.24-W.23 & 12.27-A of the Los Angeles Municipal Code, a Conditional use Permit & Zone Variance to establish a roof-top emergency medical heliport on top of the approx. 2-story tower building of the emergency department/intensive care unit of the West Hills Hospital Medical Facility. The helipad would be the same height of the adjoining mechanical penthouse parapet. The existing elevator would be vertically extended to provide access to the helipad. Additionally, the helipad facility would require the inclusion of two, 22-ft. tall wind cone assemblies on top of the elevator penthouse and also on top of the adjacent 6-story medical building. <u>Documents Received on Monday, February 03, 2014</u>			
2014022001	John Lambirth Soil Amendment Processing and Distribution Colusa County Colusa--Colusa The establishment of a soil amendment processing and distribution operation on a 4.5-acre portion of a 10-acre parcel. The frontage of the project site on Wilson Avenue where the applicant is proposing to build an earthen berm planted with small trees, shrubs and ground cover. Other improvements to the property will include a gated gravel entry way, soil stabilization using limestone fly ash and gravel base rock. Some wind screen fencing on north and east perimeters will be installed. The project also includes the installation of a water distribution system for fire suppression and dust control. The project will include the placement of the following soil amendment processing equipment, a portable tub grinder, water truck, forklift, two wheel loaders, portable screens and shredder, and a 13-horse power tote filler.	MND	03/04/2014
2014022006	Tahoe Donner Association Nordic Ski Center Truckee, City of Truckee--Nevada The Tahoe Donner Association is proposing to demolish the existing Equestrian and Nordic Ski Center located at 15275 Alder Creek Road with construction of a new Nordic Ski Center (Ski Center). The new Ski Center building will replace the existing building in approximately the same location. The facility will continue to function primarily as a Nordic Ski Center and the center point for the Tahoe Donner Cross Country ski course with support services similar to those currently being offered. The offseason equestrian and Bikeworks operations will also be maintained within the new Ski Center. The new Ski Center will be constructed as a single-story, 10,220 sf building and will include office space, locker rooms, light food and beverage service, equipment rental and repair space and service area for the equestrian and Bikeworks operations.	MND	03/04/2014
2014022007	Overlook Tank Project Public Health, Department of Los Gatos--Santa Clara The San Jose Water Company (SJWC) is proposing to improve water storage facilities at the Overlook Station Area in an unincorporated area of Santa Clara County. A new 1.881-million gallon tank would be installed to replace an existing tank and provide the necessary additional storage to meet fire flow requirements. An existing tank and former residence would be demolished. These activities would be on land owned by the SJWC. Improvements to a private road and provides access to the existing tank would also be necessary. Installation of the new tank, removal of an existing tank and former residence, and associated work are collectively referred to as the Overlook Road Tank Project. Tank construction is expected to start in 2014.	MND	03/04/2014
2014021002	Planning Areas 17 & 33 General Plan Amendment & Zone Change Irvine, City of Irvine--Orange The proposed project involves a GPA and Zone Change to reallocate non-residential development intensity from PA 33 (Irvine Spectrum Center) to PA 17 (Quail Hill). The overall square footage contemplated in the General Plan would not be increased and existing land use and zoning designations in PA 17 and PA 33 would not be changed. No development is proposed in PA 33 as part of the proposed project.	NOP	03/04/2014

2008021014	"Site D" Property Specific Plan Diamond Bar, City of --Los Angeles A Vesting Tentative Tract Map to subdivide an existing vacant 30-acre lot into 63 lots for the development of 182 for-sale dwelling units and a minimum two-acre neighborhood public park. A Development Review for the proposed architectural and landscape design elements associated with the proposed residential component of Site D, and a Tree Permit to remove 83 existing protected trees, consisting of 75 Southern Black Walnuts, 6 Willows and 2 Coast Live Oaks, and replace them at a 3:1 ration with 75 Coast Live Oak and 174 Sycamore trees. The property is zoned Specific Plan (SP) with a consistent underlying General Plan land use designation of Specific Plan.	NOD	
2009112087	Hercules Intermodal Transit Center Hercules, City of --Contra Costa The project consists of a passenger train station on the exiting Capitol Corridor line, a bus terminal, parking facilities, access roads, drainage improvements, open space, a multi-use pedestrian trail, improvements to Refugio Creek and related improvements. The Project approved is EIR Alternative 1, with Track Option B, adding a third dedicated station track. The Project is located in the city of Hercules, Contra Costa County, California on the southeastern shoreline of San Pablo Bay (part of the San Francisco Bay) approximately one mile northwest of Interstate 80 and at the terminus of John Muir Parkway. The California Department of Fish and Wildlife is executing a Lake and Streambed Alteration Agreement Number 1600-2012-0325-R3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Applicant/Organization.	NOD	
2010081057	Water Conservation Plant Upgrades Project Visalia, City of Visalia--Tulare The Project consists of WCP upgrades, recycled water conveyance system, and water exchange agreement with the Tulare Irrigation District (TID). The plant upgrades will consist of converting the existing WCP to a water reclamation plant and upgrades to the plant's solid processing facilities. The recycled water conveyance system will consist of the installation of pipeline alignments for the disposal and reuse of treated effluent from the WCP. The conveyance system will deliver tertiary-treated effluent from the WCP to regional users and basins. The exchange agreement with TID consists of providing recycled water in exchange for surface water.	NOD	
2013032061	Collins Curve Improvement Project Caltrans #2 --Trinity The Project proposes to improve traffic safety and operating along State Route 299 in Trinity County by realigning four curves, widening paved shoulders, and increasing tangnt lengths.	NOD	
2013092024	Joint Trunk Sewer Replacement Project Gilroy, City of Gilroy--Santa Clara The City of Gilroy Joint Trunk Sewer Replacement Project proposes to improve the existing sanitary trunk sewer line in Gilroy, CA, by replacing 5,340 feet of existing sanitary trunk sewer line in two locations along the same line. The existing trunk	NOD

2013082015	2040 General Plan Hayward, City of Hayward--Alameda The City of Hayward 2040 General Plan represents the community's view of its future and expresses the community's conservation and development goals for the next 26 years (2014-2040). Some of the City's post-2002 planning efforts that have helped guide the new General Plan process include the Bicycle Master Plan, South Hayward BART/Mission Boulevard Form-Based Code, Draft Mission Boulevard Corridor Specific Plan and Form-Based Code, and Route 238 Bypass Land Use Study. The new 2040 General Plan addresses sustainability, preservation and maintenance of distinct neighborhood characteristics, and the fostering of complementary and innovative infill and redevelopment opportunities.	EIR	03/20/2014
2014021005	7 Tracks Realty Minor Use Permit D010041P San Luis Obispo County --San Luis Obispo Request by 7 Tracks Realty Trust for a Minor Use Permit / Coastal Development Permit to allow a new two story 5,000 sf single family residence. The project will result in the disturbance of approximately 7,300 sf of a 20,036 sf parcel. The project is located at 286 San Leandro Court, in the Cabrillo Estates neighborhood. The project site is located in the community of Los Osos, in the Estero planning area.	MND	03/05/2014
2014022009	NSJWCD Water Right Change Petitions and Tracy Lake Groundwater Recharge Project North San Joaquin Water Conservation District Lodi--San Joaquin The Project involves NSJWCD's requests for approval from the State Water Resources Control Board (1) for an extension of time to 2040 to put water under NSJWCD's Permit 10477 to beneficial use, (2) to expand the permitted place of use to NSJWCD's current boundaries, (3) to add underground storage as a purpose of use, and (4) to add two new points of diversion, one of which would be for small water transfers to the City of Lodi for use in Lodi, and the other for the Tracy Lake Groundwater Recharge Project. These changes are part of NSJWCD's plan to maximize surface water use in NSJWCD.	MND	03/05/2014
2014022010	Yuba Goldfields 100-Year Flood Protection Project Three Rivers Levee Improvement Authority Marysville--Yuba TRLIA is proposing to approve construction of facilities in the Yuba Goldfields required to provide 100-year flood protection to the Reclamation District 784 service area. The proposed project would involve constructing a continuous embankment in the Goldfields designed to intercept and block breach flows, holding them long enough to allow flood peaks to pass. The blocked flows would then return to the Yuba River or percolate into underlying groundwater aquifers. The embankment would begin at the end of the State Plan of Flood Control where it ties into the Goldfields and would terminate just west of the Yuba County Water Agency irrigation canal. The embankment would be built using the Goldfields' existing dredge tailings.	MND	03/06/2014

1998052052	Pacific Herring Commercial Fishing in Ocean Waters Fish & Wildlife Commission -- Note: Supplemental; The project to be described is commercial fishing as an element of the Department's Pacific herring management program. Herring are primarily harvested for their roe (eggs) during the months of January through March (spawning season) using small mesh gill nets to take whole fish. The existing herring fishery is closely regulated through a catch quota system. Other management options under which the fishery has been conducted and which are available to the Commission include, but are not limited to, a limit on the number of permittees, seasons, gear restrictions, closed fishing areas, and landing and monitoring restrictions.	NOP	03/05/2014
2014022008	Manteca Family Entertainment Zone Manteca, City of Manteca--San Joaquin The proposed project is the rezone, subdivision, and site plan review for a family entertainment zone that includes a recreational sports fields and building facilities. The building facilities includes: a 500 room 290,000 sf hotel, 85,000 sf indoor waterpark, 20,000 sf conference facility, 37,500 sf restaurant and retail space, and future expansion area with 200 additional hotel rooms, 76,000 sf additional to the waterpark, and an additional 20,000 sf conference facility. The project recreational sports fields includes: new baseball fields, multi-purpose turf playfields, three international soccer fields, other fields, restrooms, maintenance and storage facilities, and administrative offices.	NOP	03/05/2014
2014021006	Kern 46/99 Separation Bridge Replacement Project Caltrans #6 Wasco--Kern Note: Review per lead Caltrans proposes to build a new bridge on the south side of the existing State Route 46/99 separation bridge and replace the existing ramps on SR 99. The existing bridge would be demolished after the new bridge is in place. The southbound ramps would be replaced with half-diamond standard ramps, and the northbound ramps would be connected with a T-intersection at Famoso Road. The new bridge and ramps would be consistent with current design standards for the SR 99 corridor.	Neg	03/10/2014
2000072011	Hillview Water Company - Oakhurst/Sierra Lakes Water System Health Services, Department of Oakhurst--Madera The California Department of Public Health (Department) Safe Drinking Water Proposition 84 Program is providing state funds for the project. The Hillview Water Company proposes to provide wellhead treatment for the removal of uranium at Sierra Lakes Wells No. 4 and 7. Arsenic removal will be performed with a coagulation/filtration system. The coagulation/filtration system will also remove the excess iron and manganese that exceeds the secondary State MCL standards for some of the sources within the service area. The new treatment facility will replace and increase the capacity of the existing iron and manganese removal plant currently located in the Sierra Lakes area. A generator will be installed at the Sierra Lakes facility to ensure uninterrupted operation.	NOD

2013102008	Karuna LLC Master Plan, Subdivision Vesting Tentative Map and Precise Development Plan Marin County San Anselmo--Marin Jerry Draper, on behalf of Karuna Land, LLC was approved for a Master Plan that allows the future subdivision of a 10.6-acre lot into six lots for residential development, plus one remainder parcel. Future development would entail the construction of six new single-family residences, as well as access, utility, family residences would each be approximately 1,500 square feet in size, and would be built in two groups of three in a row aligned along the east (uphill) side of the proposed driveway. Access would be from the end of Sacramento Avenue on a common private roadway and new driveway. A total of 9 residences at 11 and 58 Sacramento Avenue, and the second unit approved for the barn) would be served by the private roadway and common driveway. A new concrete box culvert/bridge with a natural bottom would replace the two existing 24-inch diameter concrete culverts for the common driveway crossing over the creek. Drainage improvements include bioswales along the driveway, and a portion of the driveway is proposed to construct of permeable materials.	NOD

	<p>riverbed to the borehole location. The borehole locations south of the river will be accessed from the river up the southern bank.</p> <p>In order to obtain quality soil and rock samples at the depths needed, advancement of the test borings will require the use of the mud rotary self-casing drilling system. This drilling system requires the use of drilling fluid to maintain hole stability, bring drill cuttings to the surface, as well as lubricate and cool the drill bit. Drilling fluid may consist of water, water mixed with bentonite clay based powder and/or liquid polymer. The drilling fluid is contained and recirculated through a close system utilizing a drill rod and a primary containment system. After total bore depth is reached, the boreholes will be backfilled appropriately and will likely consist of bentonite chips and/or grout.</p>		
2014028036	<p>Kalfsbeek Creek Repair; Streambed Alteration Agreement No. 1600-2013-0269-R2 Fish & Wildlife #2 --Colusa</p> <p>The project is limited to the installation of approximately 10 yards of rock rip rap and 10 yards of native soils on the bank of Sand Creek to prevent erosion. Excavation will occur within the areas of the bank that have severely eroded. The area will then be backfilled and compacted with native soil before the addition of the rock rip-rap. The rock will be placed with an excavator from the top of the bank and no equipment will be operated within the creek. Space will be left between the rocks to allow for re-growth of vegetation. The bank slope is estimated to be 3:1 at the completion of the project. The project area will be re-seed, covered with straw and watered to establish vegetation.</p>	NOE	
2014028037	<p>Eva Drive Well Project: Construction of a new domestic potable water well - Safe Drinking Water State Revolving Fund Project Number: 1110001-003 Orland, City of Orland--Glenn</p> <p>The project would construct a new potable water production well to replace supply from an abandoned well at a nearby location (Railroad Avenue Well 02). The beneficiaries of the project are citizens, visitors and businesses in Orland.</p>	NOE	
2014028038	<p>Lely Aquatic Park - Spray Park Orland, City of Orland--Glenn</p> <p>The project is to construct a spray park in an existing park. The spray park would consist of a 2,400 square foot concrete slab with six above-ground fountain features. The water used in the spray park will drain into a leach field. The purpose of the project is to provide recreational opportunities for the community. The beneficiaries of the project are the community and the citizens of Orland.</p>	NOE	
2014028039	<p>Kelly Culvert Installation Fish & Wildlife #4 --Kern</p> <p>The California Department of Fish and Wildlife is executing a Streambed Alteration Agreement pursuant to Section 1502 of the Fish and Game Code to the applicant, Michael Kelly. Activities include stabilization of stream banks resulting from a previously installed culvert. No trees will be removed as part of this Project, and work will occur in naturally dry conditions.</p>	NOE

This would be initiated with a Right of Entry Permit and the proposed sites have been located to avoid culturally sensitive areas with an on-site field review for cultural resources. The proposed Ocotillo Wells SVRA sites and the Heber Dunes SVRA site are located within State Park property and will consist of two small structures connected by an underground one and a half inch (1 1/2") PVC conduit. Structure 1 will the solar array, backup power, satellite tracking receiver/antenna and a radio for real time data transfer. The array is approximately seven to eight feet (7'-8') above ground and the concrete support columns are eight inches (8") in diameter and up to 6 feet deep. There will be a distance of twenty-five feet (25') between structure 1 and structure 2. The diameter of the structure 2 vault below ground is four feet (4') and the concrete would be 5 feet and it would be placed in an excavation four feet (4') deep. It would be six feet (6') wide above ground and one foot (1') above grade. The total size of the station and work area would be approximately fifteen feet by forty feet (15'x40') plus the additional construction approach area at Ocotillo Wells SVRA would be determined by the State Park Environmental Scientist. Construction will take approximately one week at each site and subsequent visitation will be approximately once per year. State Parks will initially grant a Right of Entry Permit with the intetion to finalize an easement after project construction.</p>	NOE

	allocated in the District's FY 2014-2018 CIP in the amount of \$500,000.		
2014028051	Adjustments to FY 2013-2014 Major Maintenance Program and Approval of FY 2014-2015 Major Maintenance Project List San Diego Unified Port District San Diego, National City, Chula Vista, Coronado, ...--San Diego The proposed project involves adjustments to the District's FY 2013-2014 (FY 13/14) Major Maintenance Program and approval of the FY 2014-2015 (FY 14/15) Major Maintenance project list. As of December 31, 2013, fourteen of twenty-one FY 13/14 Major Maintenance projects are on track as planned. For all of FY 13/14, the current year-end forecast is projecting the completion of \$3 Million of the \$4.78 Million approved budget. The \$1.78 Million variance is primarily attributed to projects with lower than expected bids (projected budget savings) and schedule delays. As required under Board Policy No. 130, staff will recommend approval of several program adjustments. The carry-over of several projects into FY 14/15 will also be recommended, and the estimated budget amounts will be included in the preliminary FY 14/15 Major Maintenance project list.	NOE	
2014028052	Installation of Storage Containers at Coronado Ferry Landing San Diego Unified Port District Coronado--San Diego The proposed project involves the temporary installation of two steel storage containers at the parking lot serving the Coronado Ferry Landing leasehold. The two storage containers, which measure 20 feet long by 8 feet wide by 8 feet tall and 16 feet long by 8 feet wide by 8 feet tall, will be used to store miscellaneous items such as holiday decorations, extra chairs, and other miscellaneous items and kayaks, respectively. Installation of the storage containers will not require any earthwork as no foundations will be required. The storage containers will occupy a total of six (6) parking stalls at the far southeast corner of the parking lot. This parking lot currently has an excess of approximately 269 parking stalls due to the lack of parking demand resulting from the undeveloped parcel that the parking lot is intended to serve. The addition of these temporary storage containers will not result in a substantial decrease in availability of parking stall and will therefore not affect the public's ability to access the waterfront. 2010084005	Blythe Solar Power Project Bureau of Land Management Blythe--Riverside The Blythe Solar Power Project (BSPP) was fully permitted and approved as a 1,000 megawatt solar thermal generating plant in 2010. NextEra Blythe Solar Energy Center, LLC (Grant Holder) purchased the fully permitted (un-built) project assets in mid-2012 and now proposes to modify the technology and reduce the size of the project entirely within the approved BSPP footprint. The Grant Holder is proposing to construct, operate, maintain, and decommission the BSPP using photovoltaic technology with a 485 MW capacity on 4,138 acres of BLM-administered public land. An amendment to the existing ROW authorization has been submitted to reduce the acreage of the project, change the technology from concentrating solar trough to photovoltaic, adjust the project layout per the new technology, and reduce the capacity from 1,000 to 485 MW.	EIS	03/24/2014
2013071076	IS Application No. 6484 (Mohinder Poonia) Fresno County Sanger--Fresno Allow an agricultural commercial center consisting of a market with fuel sales and a restaurant on a 1.77-acre portion of an 18.95-acre parcel in the AE-20 (Exclusive Agricultural, 20-acre minimum parcel size) Zone District. The project site is located on the east side of McCall Avenue, approximately 700 feet south of its intersection with SR 180 (Kings Canyon Road), approximately one and three quarters of a mile northwest of the nearest city limits of the City of Sanger (Sup. Dist.: 5) (APN: 314-051-29).	MND	03/10/2014
2014021011	Final Site Plan PSR 12-003 and Tentative Parcel Map No. PPM 12-027 (Gill/Zerlang) Tulare County Exeter--Tulare The division of a 146-acre parcel into two parcels (5-acre Parcel No. 1 and 137.53-acre Parcel No. 2. The property is at the base of Rocky Hill, which is known to contain Native American rock art. An Archaeological Survey of two five-acre portions of the subject property, including Parcel No. 1, was prepared in August 2013. Mitigation measures include inspection of a specific building site(s) and access drive(s) by a qualified archaeologist, avoidance of known cultural resources, and a focused biological survey of building sites and access drives. Other mitigation measures are incorporated to avoid the "taking" of any nesting birds or special-status plants. The site is within Agricultural Preserve No. 4168, Land Conservation Contract No. 1532 and a condition of approval require that the 5-acre parcel be partially non-renewed. The land division project may result in the construction of one residence on the 5-acre parcel and two-four additional residences on the 137.53-acre agricultural parcel, if cost-effective. Grazing would continue on the property.	MND	03/10/2014
2014022020	Sheldon Park Elk Grove, City of Elk Grove--Sacramento The Project is a rezone and subdivision of 113 acres (Figure 3 and 4). The rezone would involve changing the zoning designation from AR-5 to AR-2. The General Plan designation of Rural Residential would remain the same. The subdivision would involve dividing APNs 121-0180-012 and 017 into 45 single family lots with a minimum size of 2 acres each, one open space/remainder lot (11.8 acres), and one remainder lot (2.8 acres) for the existing residence. 	plot plan numbers. The proposed residence at 2120 Stunt Road will have two stories, with 9,020 sf of living area, including a basement, a 978 sf garage, terraces and swimming pool. Maximum height of residence shall vary between 30.25 to 31.25 feet. An existing 20 foot wide private access driveway from Stunt Road shall provide access to the subject site, and to additional parcels to the north.		
2013012060	Silverado Village (EG-11-046) Elk Grove, City of Elk Grove--Sacramento Note: Response to Comments	Oth	
	The Project proposes a 230-acre residential community located north of Bond Road and west of Waterman Road. The Project proposes 660 single family units, up to 125 independent/assisted living/memory care units, a community clubhouse, an 11.4-acre park and trail system, 93.7 acres of open space, including a 68.1-acre wetland preservation area and 14.7 acre detention basin, and supporting infrastructure.		
2013101088	Sphere of Influence Establishment for CSA 120 (LAFCO 3157) San Bernardino County Local Agency Formation Commission Rialto, Rancho Cucamonga, Fontana, San Bernardino--San Bernardino Note: Response to Comments	Oth	
	Within each county local agency formation commissions are assigned the responsibility for designating a "Sphere of Influence" for government agencies under its purview that provide services to an area. The San Bernardino Local Agency Formation Commission (LAFCO) is considering the establishment of a Sphere of Influence (SOI) for County Service Area (CSA) 120. CSA 120 was formed under LAFCO Resolution No. 3056, effective July 1, 2009. CSA 120 is a single purpose Board-governed (San Bernardino County Board of Supervisors) Special District that performs open space and habitat management services. Administrative functions for CSA 120 are performed through the San Bernardino County Special Districts Dept. Open Space and Habitat Conservation management services are the only authorized function provided by CSA 120. The range of services includes acquisition, preservation, maintenance and operation of land to protect unique, sensitive, threatened, or endangered species, or historically significant properties.		
2002082057	Fiddyment Ranch Specific Plan Amendment 3 Roseville, City of Roseville--Placer The project would amend the West Roseville Specific Plan to accommodate 1,661 additional residential units, bringing the total unit count in the Fiddyment Ranch area to 5,869. Project would add medium and high density residential and community commercial to the project area and adjust parcel sizes throughout.	SIR	03/26/2014

	with Disabilities Act (ADA) compliant parking stall, a locking entry gate, a 242 square foot , 13 feet high, public restroom facility, a concrete picnic area with concrete picnic tables, 3 viewing areas with concrete benches and curbs and surfaced with decomposed granite, alternative onsite wastewater treatment system, "No Parking" signs along frontage with Pacific Coast Highway, cable rail and chain link fencing, landscaping, grading, monument sign, traffic regulators and signs, drainage and stormwater dispersal wall, and site amenities including bicycle racks, drinking fountains, and 2 dedication pedestals, including a variance request for a reduced bluff setback.		
2010081037	<p>Carmelita Mine & Reclamation Project Fresno County Unincorporated--Fresno Carmelita Resources LLC/Colony Land Company proposes to develop an aggregate mining and processing facility with a 100-year lifespan and maximum yearly production of 1.25 million tons of net saleable materials. The facility will contain an aggregate processing plant, an asphaltic concrete batch plant, a ready-mix concrete batch plant, and a portable concrete/asphalt recycling plant. The areas of the project site that are outside of the mine area boundary will continue to support tree fruit production. Activities at the site will be typical of sand and gravel extraction operations and will be consistent with conventional mining practices.</p>	NOD	
2012061057	<p>Grand Park Specific Plan Ontario, City of Ontario--San Bernardino The proposed project is the Grand Park Specific Plan for the development of a master planned residential community on approximately 320 gross acres of land. The Grand Park Specific Plan is divided into 10 planning areas and an approximately 130-net-acre Grand Park. Planning Area 10 includes a high school and Planning Area 9 includes an elementary school. The remaining planning areas contain a mix of low-density, medium-density and high-density residential development. Exhibit 4 of the IS shows the proposed land use plan. The Grand Park Specific Plan is comprised of 5 land use designations: 1) Residential: Low-Density (6-12 DU/AC Gross Max); 2) Residential: Medium Density (12-18 DU/AC Gross Max); 3) Residential: High Density (18-25 DU/AC Gross Max); 4) public schools; and 5) the Grand Park. The Specific Plan area anticipates the development of up to 1,327 residential units with trails and pocket parks, a high school, elementary school, and the Grand Park. It is also anticipated that Tentative Tract Map application(s), Development Agreement(s), and Williamson Act contract cancellation application(s) will be submitted in conjunction with the Specific Plan.</p>	NOD	
2012121002	<p>Mid Valley Recycling and Transfer Station Facility Expansion Kerman, City of Kerman--Fresno The revised permit will allow for the expansion of the permitted facility acreage, an increase in permitted maximum tonnage, an increase in permitted traffic volume, the addition of compost activity, and in the future, an anaerobic digester.</p>	NOD

2013052072	Community Climate Action Plan Alameda County --Alameda Amend the County General Plan to include the Community Climate Action Plan as an Element of the General Plan, and add policies and programs to reduce greenhouse gas emissions and lessen the impact of County emissions on climate change.	NOD	
2013072062	Waterman Water Treatment Plant Safety Improvements at the Chemical Storage Area Fairfield, City of Fairfield--Solano The Project is located at the Waterman Water Treatment Plant, 2900 Vista Grande, City of Fairfield, Solano County. The Project is limited to the fill and realignment of an unnamed drainage (Drainage), which is a southeast tributary to the main onsite drainage. The Project will fill in the existing Drainage and reroute surface flows underground to facilitate widening the access road to accommodate delivery vehicles. Impacts to the Drainage from Project activities will result in the placement of 139 cubic yards of fill into 183 feet (0.034 acre) of Drainage. To mitigate for the impacts to the Drainage, the City of Fairfield planted native willow and cottonwood cuttings along 317 linear feet of the upper tributary to the Main Drainage. The California Department of Fish and Wildlife is executing a Lake and Streambed Alteration Agreement Number 1600-2013-0407 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, George Hicks, City of Fairfield.	NOD	
2013112044	Use of Copper and Acrolein to Control Aquatic Vegetation in Water Conveyances Reclamation District No. 108 --Yolo, Colusa The use of acrolein and/or copper to treat algae and aquatic weeds in water conveyances, including irrigation canals and ditches. NOD	
2014028100	Emergency Permit For Treatment of Hazardous Waste, Genentech Toxic Substances Control, Department of South San Francisco--San Mateo Department of Toxic Substances Control (DTSC) has issued an emergency permit to Genentech to treat hazardous waste by chemical stabilization. It has been determined that these materials are or may be highly reactive and should be chemically stabilized as a safety precaution prior to being transported offsite. The items are expired and are currently being stored inside hazardous waste storage facilities located within the Genentech Campus in South San Francisco. The treatment of these items will be carried out by Clean Harbor Environmental Services (CHES) and involves the addition of water or solvent to the container to reduce the reactive characteristics of the chemicals. The treatment is anticipated to occur on February 15th, 2014 in exclusion zones set up at the Genentech facilities. The emergency permit is effective beginning February 15th and shall expire on March 3rd, 2014. The treatment activities will be conducted by qualified reactive material technicians from CHES. As Genentech does not have a permit for treatment of hazardous waste, DTSC has determined that an emergency permit should be issued. The expired items are a potential safety hazard and present an unacceptable risk for storage and	NOE

2013121027	Fisherman's Pride Processors, Inc. Project Draft IS/MND Los Angeles, City of --Los Angeles The proposed project would redevelop 91,500 sf of industrial space into a commercial seafood processing facility with freezer and 56,700 sf of vacant land into parking area and a new 5,700 sf structure. The proposed project includes making repairs to the existing structures, updating on-site infrastructure, demolishing interior office and restroom spaces, constructing new office, restroom, shower and lounge spaces, adding a mezzanine, mechanical and storage spaces, and enhancing the exterior of the existing buildings. The project site is not identified on the Cortese list [Government Code Section 65962.5]. Construction is anticipated to begin in early, 2014 for a period of 3 months.	FIN	
2014021019	Reseda Boulevard Pipeline Project Los Angeles, City of Los Angeles, City of, Van Nuys--Los Angeles The proposed project is part of LADWP's long-term seismic improvement program for the water system and would be located in consecutive segment entirely within the public street rights-of-way in urbanized and fully developed areas in the community of Reseda-West Van Nuys, immediately adjacent to the community of Northridge in the San Fernando Valley area of Los Angeles. The proposed project would replace public water distribution mains with earthquake resistant ductile iron pipe in portions of Roscoe Boulevard, Reseda Boulevard, Etiwanda Avenue, Cantara Street, and Strathern Street. The proposed alignment abuts a variety of residential, commercial, and medical-related uses, including the Northridge Hospital Medical Center.	MND	03/13/2014
2014021020	UCLA Engineering VI-Phase 2 Building University of California, Los Angeles --Los Angeles UCLA proposes to construct a new 6-level (including 1 partial basement level), 94,000 gsf research laboratory facility to accommodate multi-disciplinary information science and computation research programs for the Henry Samuel School of Engineering and Applied Science (HSSEAS). The building would house the UCLA Department of Computer Science and would be designed to provide a collaborative environment to foster scientific discoveries; support the development of new technologies, inventions and educational programs; and create new commercial opportunities for high-growth industries dependent on computation research. Dry labs, office and meeting space, a technology incubation lab, and a Learning Center would be provided within the building. Exterior landscape and lighting would be installed.	MND	03/13/2014
2014021022	Shearwater Creek Temecula, City of Temecula--Riverside The Shearwater Creek Project includes a Development Plan to construct a 140-unit attached residential project consisting of 13 buildings, including two-story townhomes and three-story walk-up flats, a pool, and clubhouse for Project residents, located on approximately 7 acres at the southernmost terminus of Pujol	MND	03/13/2014

	(on the west side). The Project also includes a Tentative Tract Map for Condominium Purposes (Condo Map) to define private and common ownership areas for the proposed 140 attached residential units.		
2014021023	IS 6753 and CUP 3423: Proposing a NE Fresno County Mendota--Fresno Proposing to allow a natural gas liquefaction facility for bulk distribution and retail sale of liquefied natural gas (LNG) and compressed natural gas (CNG) on a 66.79-acre parcel in the AE-40 (Exclusive Agriculture, 40-acre minimum parcel size) Zone District. The subject property is located adjacent to the southwest corner of the intersection of Panoche Road and I-5, approximately 14 miles southwest of the nearest city limits of the City of Mendota.	MND	03/13/2014
2014021021	Energy and Climate Action Plan Santa Barbara County --Santa Barbara The proposed ECAP includes a 2007 baseline inventory of community-wide GHG emissions, a forecast of emissions, a forecast of emissions to the years 2020 and 2035, a GHG reduction target of 15% below baseline emissions by 2020, a set of emission reduction measures to meet the target, and a methodology for tracking and reporting emissions in the future. The ECAP would implement a suite of emissions reduction measures across many sectors to achieve community-wide GHG emission reductions and energy-saving measures in support of a thriving, well-balanced, and sustainable community. The emission reduction measures proposed in the ECAP are made of a combination of voluntary, phased, and mandatory measures. Phased measures are those which would initially be implemented on a voluntary basis until a designated check-in year. At this time, if the participation rate of the measure is below a designated threshold, the measure would be phased into containing mandatory requirements. These emission reduction measures, combined with the measures identified in the County's Energy Action Plan for municipal facilities, would collectively provide a decrease in both GHG emissions and energy use in the County. The actions will assist the State in meeting its GHG reduction goals consistent with AB 32 and energy reduction goals consistent with California's Energy Efficiency Strategic Plan.	NOP	03/13/2014
2014022028	PA-1300169-Site Approval Application San Joaquin County --San Joaquin A Site Approval application to expand an existing appliance repair and retail sales operation to include limited outdoor storage of used appliances. The applicant has requested to modify the parking, landscaping, and screening requirements. The project is located on the southwest corner of East Waterloo Road and Report Avenue, Stockton. 2013042070	Central SoMa Plan San Francisco, City and County of San Francisco--San Francisco Note: Initial Study Project is a comprehensive plan for the southern portion of the Central Subway transit line, in the South of Market neighborhood (SoMa). The project is the draft Central Corridor Plan published in April 2013, as well as street network changes throughout the Plan area, including specific designs within, and in some cases extending beyond, the Plan area for the following streets: Folsom, Howard, Harrison, Bryant, Brannan, Third, and Fourth streets. The Central Corridor Plan identifies two height options for the Plan area. The EIR will analyze the Plan's Mid-Rise Height Option, a High-Rise Height Option, and other project alternatives as required by CEQA. The project proposes new planning policies & controls for land use; urban form (bldg. height and design; street network/circulation changes; open space; hist. preservation; and sustainability.	Oth	03/14/2014
2007101102	Drilling and Equipping Wells 30 and 31 Colton, City of Colton--San Bernardino The City of Colton proposes to construct, equip, and operate two domestic water production wells (Wells 30 & 31) to meet a portion of the City's anticipated water requirements. Ancillary components will include the installation of a pipeline to connect the wells to the City's existing water distribution system, valves, electrical components, and an onsite chlorine disinfection system (12.5% sodium hypochlorite).	NOD	
2009032086	Gallagher Wells and Pipeline Project North Marin Water District --Marin The California Department of Public Health (Department) is a responsible agency for this project. The Department's Safe Drinking Water Proposition 50 Program is providing state funds for the project. North Marin Water District proposes to restore the existing standby Gallagher well and construct a 12-inch pipeline to connect with the NMWD's existing sources to lower the overall salinity levels and be an alternate source of supply to improve reliability.	NOD	
2013082069	Truckee R. Br and Donner Lake UC Bridge Scour Treatment Caltrans #3 Marysville--Yuba The California Department of Fish and Wildlife is executing Lake or Streambed Alteration Agreement number 1600-2013-0287-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, California Department of Transportation (Caltrans). The purpose of the project is to repair bridge support structure by repairing bent caps, replacing seismic shear blocks, and replacing seismic restrainer cables on the Truckee River Bridge right side only, which is the I-80 eastbound direction. Water intrusion into the fractured concrete on the bridge deck is causing the bridge bents to spall and fracture. The deteriorated condition is a serious threat to the structural integrity of the bridge. Repair of the bent caps and replacement of the seismic elements are needed to prevent further.	NOD

Evergreen Street in the City of Imperial Beach. The pier, which measures approximately 1,500 feet long by 24 feet wide, consists of a timber deck supported by a steel and timber pile system. The condition of the pier deck has deteriorated over time due to salt vapor and extensive pedestrian use.

Work to complete the proposed project will include replacing worn timber deck boards along the length of the pier. Replacement of the deck boards is necessary to increase the remaining service life of the deck, improve walking surface of the pier, and improve and maintain the function and safety of the pier, all of which directly benefit the public access to the pier and will be maintained during regular public use hours throughout the duration of project construction.

It is anticipated that construction of the proposed project will begin in March 2014 and be completed by July 2014, for a total construction period of approximately four months. Due to its limited scope, construction of the proposed project will generate a minor amount of vehicle trips, and, in turn, will not result in any impacts related to traffic, air quality, or greenhouse gas emissions. The applicant is responsible for complying with all applicable local, state, and federal laws regulating construction demolition debris, storm water, and water quality.

The project is a component of the Soquel Creek Water District Well Master Plan that includes construction of a municipal production well, an iron and manganese removal treatment plant, a potable pipeline approximately 1,750 feet in length, and a lateral connection to the existing sanitary sewer main along Soquel Drive; and installation of an emergency station generator, security fencing at O'Neill Ranch site. No trees will be affected by the project. No work will occur below the ordinary high water mark of the stream. The California Department of Fish and Wildlife is executing a Lake and Streambed Alteration Agreement Number 1600-2013-0387-R3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Taj Dufour, Soquel Creek Water District.	NOD	
2008041070	24th Street Improvement Project Bakersfield, City of Bakersfield--Kern The project would widen 24th St. to the north and encompass the SR 99 interchange and auxiliary lane, Oak St./24th St. intersection, 24th St. widening to the north, and the 24th St. complete area (one-way section of 23rd and 24th Streets). Widening to the north along 24th St. would add two travel lanes (one in each direction). The proposed roadway alignment would be shifted north of the existing alignment about 17 feet, which would minimize the right-of-way acquisition on the south side of 24th St. required for the roadway widening. Impacts include full and partial right-of-way acquisitions and reconstruction of the Carrier Canal on the north and south sides of 24th St.	NOD	
2010031050	San Benito County Resource Recovery Park San Benito County Hollister--San Benito Amend the County Zoning Ordinance to create a new combining/overlay zone called Resource Recovery Park (RRP) and apply this new zone to the project site, defining the permitted, conditional and prohibited uses and applicable development standards within the newly created zoning district. The intent of the RRP combining/overlay zone is to provide increased private opportunities to facilitate temporary solid waste storage, transfer, treatment, processing, source separation and recovery, disposal, recycling, reusable item centers, recycled content manufacturing, construction and demolition materials sort lines, wood and green waste grinding facilities, energy projects. 	change the land use designations to a Mixed-Use Horizontal designation, and a Code Amendment and adoption of Planned Community Development Plan is proposed to establish appropriate zoning regulations and development standards for the site. Other requested approvals are a Lot Line Adjustment and Traffic Study pursuant to the City's Traffic Phasing Ordinance. Specific project design and site improvements approvals will be sought at a later time.		
2012122013	Moore Sheldon Center Elk Grove, City of Elk Grove--Sacramento Request for a General Plan Amendment, Rezone, Tentative Parcel Map, Design Review, and CUP for a retail center. The project includes an office building, gas station, fast food restaurant, car wash, and drive through retail. The project includes a soundwall on the north end of the project site, three patios, 109 parking spaces, and on-site signage. Proposed buildings for the Project would be single story, up to approximately 20 feet in height, with one building component (tower up to approximately 30 feet.	NOD	
2013102047	Fieldstone North Elk Grove, City of Elk Grove--Sacramento The Fieldstone North Project requests a General Plan Amendment, Specific Plan Amendment, Rezone, Large-Lot Tentative Subdivision Map, and Small-Lot Tentative Subdivision Map to allow for the development of 391 single-family residential units with lots ranging in size from 5,460 to 6,600 sf on 107.1 acres.	NOD	
2013122005	Blue Lake Roundstock LLC Dowell Mill Operation (312-161-020 & 313-231-001/2013) Blue Lake, City of Blue Lake--Humboldt Site Plan Approval application to allow Blue Lake Roundstock LLC to operate a dowel mill operation in the City's Business Park that will produce 3-7 inch diameter doweled wood products (e.g. fence posts, tree stakes, etc.). The proposed dowel mill operation will primarily involve the storing and processing of small diameter trees. Equipment that will be used for the operation includes two electric dowel mills, front-end log loaders, forklifts, and hauling trucks. At full production, the operation will have 8 employees on-site and it is proposed to operate year round. Hours of operation for the proposed project will be from 6 a.m. to 12 p.m., Monday - Friday. Maintenance and clean-up will occur on Saturdays and operations on Sundays and Holidays will only occur for emergency repair work.	NOD	
2013122043	Los Carneros Recycled Water Pipeline Project Los Carneros Water District Napa--Napa Pursuant to the California Environmental Quality Act (CEQA; Public Resource Code Section 21000, et seq. and CEQA Guidelines), the Los Carneros Water District (District) prepared a Public Draft Initial Study/Mitigated Negative Declaration (IS/MND) to evaluate potential environmental impacts associated with the District's proposed Recycled Water Pipeline Project (Proposed Project) located in Napa County, California. The purpose of the Proposed Project/Action is to augment the existing surface and groundwater supplies within the District for the irrigation of landscape, vineyards and other agricultural lands within the District. This water will not be used for domestic or direct potable uses.	NOD

2011101007	McCoy Solar Energy Project Riverside County Riverside, Blythe--Riverside FYI Final	FIN	
	Note: Reference SCH# 2012011019 Note: Revised		
	<p>The applicant, McCoy Solar, LLC has requested a conditional use permit (No. 3682) and public use permit (No. 911) from Riverside County to construct, operate, maintain, and decommission an up to 750 MW photovoltaic solar facility and necessary ancillary facilities including a generation tie line, access road and switch yard with the precise generation capacity or megawatts dependent on the technology selected and efficiencies available at the time of a ROW authorization. The applicant also has proposed to enter into a Development Agreement with Riverside County for the project. The portion of the project under the land use authority of Riverside County would be on 477 acres of private land, while the majority of the project is proposed to be located on approximately 4,096 acres of federally administered public land.</p>		
2007031098	Portola Springs Elementary School Irvine Unified School District Irvine--Orange	MND	03/17/2014
	<p>The proposed school would include an approximately 63,000 sf elementary school for existing and projected students to alleviate overcrowding at nearby schools. The project is planned for kindergarten through sixth grade with an expected opening date of 2015.</p> <p>The site plan includes seven buildings, including administration, library, and classrooms. Two parking lots, Lot A and Lots B, would have 47 and 68 spaces, respectively. Other amenities include play fields, hard courts, kindergarten play areas, and driveways with drop-off zones for children.</p>		
2014021028	GPA-011-3031, ZC 011-3035, and Tentative Tract Map 011-3030 (TTM 36328) Project Murrieta, City of Murrieta--Riverside	MND	03/17/2014
	<p>Bear Creek Partners, LLC (Project proponent) is proposing to implement a residential and open space development on an approximate 32.044-acre site (gross and net) located within the City of Murrieta, western Riverside County, CA. As presently proposed, the Project proponent has prepared three applications that allow development of the Project site: General Plan Amendment GPA-011-3031, Zone Change AC-011-3035, and Tentative Tract Map TTM-011-3030 (TTM 36328). GPA-011-3031 and ZC-011-3035 proposes to change the General Plan and Zoning designations on the subject property from open space to residential designations: Single-Family Residential and ER-3 (3.745 acres)/SF-1 (13.377 acres), respectively. If the General Plan and Zone designations are approved by the City, this will allow for a mixed single-family residential development (11 ER-3 lots and 42 SF-1 lots) and remainder open space lots on the site. TTM 36328 proposes a subdivision of the Project site.</p>

2014021029	<p>Water System Improvement Project Quartz Hill Water District Palmdale--Los Angeles</p> <p>The Quartz Hill Water District is proposing to improve their water system by constructing a new 2.2 million gallon water tank on a parcel located within the City of Palmdale, CA. The new water tank will be located adjacent to an existing 2.2 million gallon water tank on the property, which is owned and operated by the Quartz Hill Water District. In addition to the new tank, several pieces of support equipment will be installed alongside the tank. The tank will serve the customers of the Quartz Hill Water District and improve the District's ability to store water for regular service and emergency situations.</p>	MND	03/17/2014
2014021030	<p>Mendota Passing Lanes Caltrans #6 Kerman--Fresno</p> <p>The project proposes to construct westbound and eastbound passing lanes on SR 180 in Fresno County west of the City of Kerman from Yuba Avenue to Lake Avenue. The project extends 2.2 miles between post mile 36.4 and 38.6. The widening will occur on the north side (westbound), approximately 50 feet from the existing right-of-way line on SR 180 and would require right-of-way acquisition from twelve parcels. Work consists of adding 12-foot passing lanes with a 14-foot soft median to accommodate a two way left-turn lane and 8-foot-wide outside shoulders in both directions. The project also includes drainage improvements.</p>	MND	03/19/2014
2014022032	<p>600 National Avenue Office Project Mountain View, City of Mountain View--Santa Clara</p> <p>The project would redevelop an existing light industrial and warehouse site with new high intensity office uses. The project proposes to demolish 63,312 sf of space in four one-story buildings; and remove pavement, landscaping and other improvements. Following demolition, the project would construct a single four-story, 140,654 sf office building, a one-story parking deck, surface parking, landscaping, and other improvements. The new office space would be an increase of approximately 77,342 sf over the existing development on site. The project also includes a lot merger to merge four parcels into one parcel. The proposed project site is located within the area of the Middlefield Ellis Whisman (MEW) Superfund Site.</p>	MND	03/17/2014
2014022033	<p>Cummings Road Burn Ash Site Corrective Action Project Humboldt County Waste Management Authority Eureka--Humboldt</p> <p>The proposed Project is the cleanup of the Cummings Road Burn Ash Site, in compliance with applicable regulations, policies, and orders, and the restoration of stream channels currently containing burn ash debris. The design plans and specifications for the project are presented in the Corrective Action Plan for the Clean Closure of the Cummings Road Burn Ash Site prepared by Lawrence and Associates.</p> <p>The Cummings Road Burn Ash Site extends over 6.1 acres. The Project Area encompasses 23.1 acres and includes the horizontal and vertical extent of all project activities that would result in ground disturbance. Stockpile and staging areas, the Cummings Road Landfill disposal area, haul roads and trails make up the remaining 17 acres. For the entire Project area, approximately 60,000 cubic yards of debris and adjacent soil would be removed from the Site and disposed within the lined portions of the Landfill. After excavation of the waste material and</p>	MND	03/17/2014

	confirmation sampling to document the "clean closure" of the area, the habitat would be restored, and a five year post-closure monitoring and maintenance program would begin.		
2014022034	Camino Tassajara Shoulder Widening - 1.1 Miles South of Highland Road to 0.3 Mile North of Windemere PKWY Contra Costa County --Contra Costa The project proposes to widen the existing lanes to 12-foot wide travel lanes and add 8-foot paved shoulders on each side which will bring the pavement cross section along this segment of Camino Tassajara up to current Contra Costa County standards. Road widening will be conducted in varying degrees on both sides of the roadway along the entire 2,100-foot length. In support of the Project, the side slope on the east side of the roadway will be re-graded to accommodate the widening. Two curve advisory flashing beacons will be installed on both southbound and northbound approaches to notify motorists of the s-curve just north of Windemere Parkway. Existing striping will be removed and the roadway will be restriped and will include a Class II bike lane as indicated in the 2009 Contra Costa Countywide Bicycle and Pedestrian Plan.	MND	03/17/2014
2014022035	Yountville Hill Winery Napa County Yountville--Napa Approval of a use permit and an exception to the conservation regulations, variance, and view shed application to establish a new winery and with an annual production capacity of 100,000. The proposal also includes an exception to the conservation regulations to grade/construct improvements on slopes exceeding 30%, a view shed application to construct on slopes 15% or greater and visible from a view shed designated roadway (SR 29) and a variance to allow the lower cave portal and winery related activities on the pad in front of the cave to encroach approximately 300-feet into the 600-foot setback from SR 29, a staircase at the rear of the winery building to encroach 6-feet into a 20-foot rear yard and a non-habitable portion of the structure/landscaped terrace and stairs at the third or roof level to encroach 15-feet into the 20-foot rear yard. The project site is comprised of two parcels that will be combined.	MND	03/17/2014
2014021027	Ball Road Basin Park Project Anaheim, City of Anaheim--Orange The proposed project includes the development of the approximately 19.5-acre site as an active park with lighted playing fields and a stadium with associated parking and concession areas. The project site currently exists as the Ball Road Basin, a recharge basin which as ab approximately 220-acre foot holding capacity and captures overflow from the adjacent Burris Recharge Basin and storm water runoff from the Orange County Flood Control District facilities. As part of the proposed project, the basin would be filled with engineered soils and the City would develop a park facility to serve City residents with the ability to remain open 24 hours a day. As part of the project, the City proposes a General Plan Amendment to designate the project site as Parks and a Zoning Reclassification to rezone the project site to "PR" Public Recreation. 	The NB Hawthorne approach would be widened from 40 to 52 ft. Additional improvements include striping/signage, traffic signal modification, drainage improvements, utility relocations, and the rehabilitation of the existing pavement. The project also involves the future consideration of the potential acquisition of any right-of-way necessary to install these improvements.		
2013101055	West Antelope Solar Energy Project R2012-01589 / CUP 201200086 / ENV 201200158 Los Angeles County Lancaster--Los Angeles The Project would develop the approximately 263-acre site with solar energy facilities that have a total system capacity of 20 megawatts. The Project would consist of (1) mounted solar PV panels; (2) an electrical collection system; (3) the Project Substation; (4) an underground (or partially underground) transmission line along Avenue J to the SCE Antelope Substation; (5) a meteorological data collection system; and (6) civil infrastructure including driveways, internal access roads, drainage design, a hiking trail, secure fencing, landscaping, and two water tanks.	NOD	
2013111020	Proposed High School Expansion Irvine Unified School District Irvine--Orange IUSD proposes to construct a new classroom building on the existing Irvine High School campus to accommodate approximately 324 additional students. The project would involve the construction of a two-story classroom building totaling approximately 14,000 ft. The new classroom building would include twelve classrooms, two student common area rooms, utility and janitorial rooms, restrooms, and an outdoor learning area. The project would not change the operational hours, or affect the school year calendar of the existing High School. Construction would occur from July 2014 to July 2015. If approved, the building is projected to be ready for occupancy in August 2015.	NOD	
2014029010	Lake or Streambed Alteration Agreement (Agreement) No. 1600-2013-0344-R1, Acorn Curve Improvement Project Post Miles 19.3 - 19.8 on State Route 299, Humboldt Co Caltrans #1 --Humboldt The Department of Fish and Wildlife (Department) is issuing an Agreement pertaining to two encroachments to remove and replace permanent culverts between PM markers 19.3 and 19.8 on SR 299. The project includes widening paved shoulders, improving superelevation of the road, closing a 1000-foot gap between two existing westbound truck climbing lane segments, and removal and replacement of two permanent stream culverts with new new corrugated steel pipes at PM markers 19.48 and 19.72, with downslope rock slope protection at outlets and inlet replacement at PM 19.48. 2014029013	<p>Environmental Determination (ED) 14-01 for Parcel Map (PM) 14-01/Variance (VR) 14-01 Anderson, City of --Mendocino</p> <p>The proposed project consists of a tentative parcel map for the division of .76 acres from two (2) parcels into four (4) parcels that will consist of 8,250 square foot lots with a density of 5.2 dwelling units per acre. This proposal also includes a variance request to create 55 feet wide lots in the Low Density Residential (R-1) zone district.</p>	NOD	
2014028135	<p>Ross Stores Headquarters Wireless Communications Facility Site Development Review Dublin, City of Dublin--Alameda</p> <p>On December 6, 2013, the City of Dublin Community Development Director approved a Site Development Review for one wireless communications antenna to be installed on the roof of 5120 Hacienda Drive, and one wireless communications antenna to be installed on the roof of 5140 Hacienda Drive.</p>	NOE	
2014028136	<p>Sand Hill Road Culvert Repair Project Fish & Wildlife #3 Woodside--San Mateo</p> <p>The project is limited to the repair of a deteriorated 30-inch diameter corrugated metal pipe (CMP) culvert which drains an earthen roadside ditch on Portola Road then crosses approximately 100 feet underneath Sand Hill Road where it enters a concrete catch basin. The repair work will be within the County road right-of-way. The repair will include sealing the deteriorated floor of existing CMP with concrete. A concrete truck and pumper truck will be used to pump concrete through a hose into the pip. A worker will enter the culvert from the inlet and smooth the concrete with a towel as he works his way through the culvert to the other side. Sand bags will be placed at the culvert outlet into the catch basin to prevent concrete from escaping beyond the repair area. All heavy equipment will be operated from the road and roadway shoulder. Issuance of a Streambed Alteration Agreement Number 1600-2013-0373-R3 is pursuant to Fish and Game Code Section 1602.</p>	NOE	
2014028137	<p>Alpine Road Slip-out Repair Project Fish & Wildlife #3 Portola Valley--San Mateo</p> <p>The project includes repairing three road slip-outs at two different locations on Alpine Road. At the first slip-out, the slope will be reconstructed by cutting a 35-foot long by 8-foot wide keyway approximately 12 feet below the roadway, backfilling the constructed keyway with large 3- to 4- foot diameter boulders and placing 2- to 3- foot diameter rock above the keyway to provide support for a reconstructed road embankment. The revetment will be covered with native or imported soil, seeded with a native plant mix, mulched with sterile rice straw, and covered with an erosion control blanket. Live willow stakes and/or willow cuttings will be incorporated into the structure. The Site 2 slip-out consists of two adjacent areas of slope failure. At both failure sites, soil nails and shotcrete facing will be installed into the hillside and the upper sections of the embankments. Heavy equipment will be operated from the roadway and silt fencing will be installed beneath the work area. Issuance of a Streambed Alteration Agreement Number 1600-2013-0372-R3 is pursuant to Fish and Game Code Section 1602.</p>	NOE

2014028138	Islais Creek Trail Project Fish & Wildlife #3 San Francisco--San Francisco The project is limited to the installation of three boardwalk crossings to replace current at-grade crossings, which are contributing sediment to Islais Creek. All boardwalks will be constructed of lumber in areas where the wood would not be in contact with the water and Alaskan cedar or Alaskan cedar glulam for the headwalls and areas where wood may contact the water. The lengths of the crossings are estimated to be approximately 17-20 feet long, and three to five feet wide. Headwalls will be installed on either end of the boardwalk above mean high water and backfilled with one- to four-inch rock to provide subsurface drainage. Construction of each boardwalk will also require installation of two mid-span supports 15 inches in diameter placed 58 inches deep into the creek bed. Issuance of a Streambed Alteration Agreement Number 1600-2012-0426-R3 is pursuant to Fish and Game Code Section 1602.	NOE	
2014028139	High Friction Surface Treatment - 390801 Caltrans #11 --San Diego Apply high friction surface treatment on a portion of the westbound on-ramp and mainlines at Lake Jennings Park Road over-crossing, near the city of Lakeside.	NOE	
2014028140	Water Well De-aeration System Cloverdale, City of Cloverdale--Sonoma The project includes installation of a 5,600 gallon de-aeration tank, appurtenant underground piping to intertie the tank to the existing raw water transmission piping and a booster pump. The de-aeration tank will allow the City to increase the rate and depth of pumping from its existing wells and increase water treatment efficiency.	NOE
