

Jerry Brown, Governor

STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**

February 16 – 28, 2014

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **February 16 – 28, 2014**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Director

CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

USPS:

State Clearinghouse
P.O. Box 3044
Sacramento, CA 95812-3044

OR

USPS/Courier Service / Hand Deliveries:

State Clearinghouse
1400 Tenth Street, Room 113
Sacramento, CA 95814

INFORMATION AVAILABLE ON-LINE

The CEQA Statute and Guidelines are available through the Natural Resources Agency's website at:

<http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

ENVIRONMENTAL DOCUMENT FILINGS WITH THE STATE CLEARINGHOUSE 1999 THROUGH 2013

Descriptions of all CEQA documents filed with the State Clearinghouse are available for viewing at <http://www.ceganet.ca.gov>

<u>Documents Received on Tuesday, February 18, 2014</u>			
2014022037	Verizon Wireless - Conditional Use Permit 2014-01 Turlock, City of Turlock--Stanislaus To develop a wireless communications facility including an 80 foot tall tower and a 40 ft x 40 ft lease area for associated equipment. The equipment area will be surrounded by a chain link fence with privacy slats and barbed wire for added security.	CON	03/10/2014
2013011036	Faculty Club Renovation and Guest House Addition Project University of California, Santa Barbara Goleta--Santa Barbara The Santa Barbara campus proposes to expand and renovate facilities provided by the Faculty Club. The major project element is the development of 30 guest rooms that would provide additional overnight accommodations for visitors to UCSB. The project includes improvements to existing Faculty Club facilities, including: remodeling interior facilities; renovating exterior areas; utility infrastructure and energy efficiency upgrades; and building code compliance upgrades, including seismic strengthening. The project includes exterior renovations the maximum dining capacity of the Faculty Club would increase from 150 to 282 people. After completion of the project, the sf of the building would be increased from 13,915 to 29,600 gsf. The building would be approximately 40-feet high.	FIN	
2013122004	Highway 116 Slope Stabilization Caltrans #6 Petaluma--Sonoma Major elements of the project include excavating the loose material on the hillside above the highway; protecting the soil surface from erosion by placing rock slope protection fabric; installing 6-inch perforated pipe at the base of a 1/2 ton of rock slope protection; filling voids with native topsoil; applying biodegradable erosion control; reseeding to restore the original naturalized slope; re-grading the roadside V- ditch below slope.	FIN	
2007062104	Shasta 10 (P06-189) Sacramento, City of Sacramento--Sacramento The proposed project would be constructed on 10 acres located between Shasta Avenue and Cotton Lane, approximately 700 feet west of SR-99. The project site consists of one vacant parcel (117-0201-014) and one parcel with an existing single-family unit located on it (117-0201-005). The unit would be demolished to accommodate project development. The existing heritage and non-heritage trees would also be removed to accommodate development of the proposed project. Entitlements of the project include: A. Tentative Map to subdivide 10 acres into 60 lots. B. Site Plan and Design Review of 60 lots for single-unit dwellings. C. Inclusionary Housing Plan.	MND	03/20/2014
2012061089	EA No. C-12-113, Conditional Use Permit Application No. C-12-113 Fresno, City of Fresno--Fresno Conditional Use Permit (CUP) Application No. C 12-113 pertains to approximately 5.3 acres of a 117 acre property (APN 327 030 24T) located at 5607 West Jensen Avenue, on the south Cornelia Avenue. This CUP Application proposes to	MND	03/19/2014

	authorize the construction and operation of a tertiary treatment and disinfection facility with a capacity of up to 30 million gallons per day (as outlined in the City of Fresno Recycled Water Master Plan and analyzed in Program EIR for the City of Fresno Recycled Water Master Plan and Ordinance, SCH No. 2010051015) on the subject property, to provide for irrigation and other commercial and industrial purposes allowable for recycled wastewater. The CUP application also includes an ancillary 2 megawatt solar generating facility.		
2014021031	Gateway Industrial, TREH Partners, Inc. San Bernardino County Redlands--San Bernardino The proposed project includes a General Plan Amendment to change the official land use district from East Valley/General Commercial (EV/CG) to East Valley/Special Development (EV/SD), a Tentative Parcel Map for a one lot subdivision, and a CUP to construct a 777,620 sf industrial building with 30,000 sf of office area to be used as a high cube warehouse/distribution facility, and the relocation of an existing telecommunications tower on 35.98 acres. The project site has a gross site area of 37.62 acres and net site area of 35.98 acres. The percentage of building coverage is 50% and landscaping covers 16.1% of the net area. The project will provide 337 (19' x9') standard parking stalls and 162-(12' x 55') trailer parking stalls.	MND	03/19/2014
2014021032	Sand Canyon Sewer Relocation Project Newhall County Water District Santa Clarita--Los Angeles The project involves the replacement of approximately 5,700 linear feet of sewer line presently located in the active channel of the Santa Clara River. The new sewer line would be constructed in adjacent upland areas located on or along the north bank of the Santa Clara River. The existing sewer line would be taken out of operation, then capped and left in place in accordance with applicable requirements. All exposed portions of the existing manholes associated with the existing sewer line would be removed. In summary, each manhole would be capped and cut approximately two feet below the existing bed elevation of the River.	MND	03/19/2014
2014021033	Kanan Road and Agoura Road Roundabout Agoura Hills, City of Agoura Hills--Los Angeles The intersection of Kanan and Agoura Roads would be converted from a traditional intersection to a multi-lane roundabout of two travel lanes entering from each quadrant, and between one and two travel lanes entering each quadrant of the roundabout. One bypass lane is proposed in the northeast quadrant. The roundabout would incorporate bicycle and pedestrian facilities, as well as landscaping, fencing and other design elements.	MND	03/19/2014
2014021035	Wastewater Treatment Facility Improvement Project Delhi County Water District --Merced Note: Ref. SCH No. 1995122023 Proposed expansion of the District's wastewater treatment facility's (WWTF) treatment and discharge (disposal) capacity from 0.8 to 1.2 million gallons per day (mgd). Proposed project includes a new percolation pond with a bottom area of approximately two acres and maximum storage volume of approximately 6-acre	MND	03/19/2014

	feet, increasing the number of WWTF percolation basins from 4 to 5 basins, and a new approximately 52,500 sf algae drying and storage pad. Proposed improvements would be constructed within the boundaries of the District's existing 48 acre WWTF site.		
2014021036	EA No. C-13-065, Conditional Use Permit Application No. C-13-065 Fresno, City of Fresno--Fresno CUP Application No. C 13-065 pertains to an existing 14,500 sf office/warehouse building at 3187 East Commerce Avenue, located on a 1.6-acre property sited of Commerce Avenue (south of East Florence Avenue), between South East Avenue and SR 99 (APN 487 170 06). CUP Application No. C-13-065 proposes to establish a medical waste pickup business and treatment facility on the subject property.	MND	03/19/2014
2014022036	Stony Creek Constant Head Orifice Rediversion Project Tehama Colusa Canal Authority Orland--Glenn The proposed Project is the rediversion of water stored in Black Butte Reservoir into the Tehama-Colusa Canal through a Constant Head Orifice located at the intersection of the Tehama-Colusa Canal and Stony Creek, pursuant to State Water Resources Control Board Permit No. 13776. The rediversion involves construction of temporary gravel berms in the Stony Creek creek bed, which divert water into the Stony Creek Constant Head Office (CHO) and then into the Tehama-Colusa Canal. Rediversions will occur only from April 1 through May 15, and from September 15 through October 29 of each year. Annual diversions at the Stony Creek CHO will not exceed 38,293 acre-feet. Rediversions at the CHO have occurred in this manner since 1993.	MND	03/19/2014
2014021034	Youngman Ordinance Amendments & Conditional Use Permit for Olive Oil Processing Santa Barbara County --Santa Barbara The proposed Ordinance Amendments to the LUDC and the Uniform Rules for Agricultural Preserves and Farmland Security Zones would allow for the small scale processing of agricultural products from a raw form to a milled liquid form. Proposed development standards include the requirement that processing be limited to simple mechanical processing to convert fruit from a solid to a liquid without additives, chemical reactions or changes in natural ambient temperatures. The LUDC amendments would apply to all parcels located within the inland area of the County zoned AG-1 and AG-II. The Uniform Rules amendments would apply to parcels which are under Williamson Act Contracts. The proposed Conditional Use permit would allow for an onsite olive oil processing facility located on APN 141-042-012. The facility would mill raw olives grown both on and off the premises into olive oil and would comply with the proposed development standards included in the proposed Ordinance Amendments. The facility would encompass 8,640 sf of on-site structural development located within three existing horse barns of 2,880 sf each with a maximum height of 22 feet. No grading, tree or vegetation removal is proposed.	Neg	03/19/2014

2003122137	Western Placerville Interchanges Project Placerville, City of Placerville--El Dorado The City of Placerville Development Services Department, in cooperation with the Caltrans, proposes to convert the existing Ray Lawyer Drive overcrossing to a full interchange and modify the existing Forni Road/Placerville Drive/US 50 Interchange in the City of Placerville, CA. The City of Placerville has prepared this SEIR which examines the proposed changes to the project since the 2005 EIR was approved by the City. The proposed changes include reconfiguration of the proposed roadway improvements and changing the intersection improvements at Forni Road and Lo Hi Way from a signalized intersection to a roundabout intersection.	SIR	04/03/2014
1984032808	Rancho California Water District Rancho California Water District Temecula--Riverside The California Department of Public Health (Department), as the responsible agency, will be issuing a water supply permit. The Rancho California Water District proposed project is to equip a chlorination system and appurtenant structures at Well 154.	NOD	
2004071039	Shea / Baker Ranch Lake Forest, City of Lake Forest--Orange Site Development Permit 12-13-3821 is a request to amend previously approved Site Development Permit 2-13-3116 for the development of the westerly portion of the Planning Area 1D of the Shea/Baker Ranch Area Plan (Area Plan 2-11-1732) with 85 single-family dwellings. The project includes three different floor plans, three different architecture styles and nine color schemes. Each unit will include a two-car garage and there are 63 off-alley shared parking stalls and 48 on-street parking spaces available. SDP 12-13-3821 includes a request for an alternative development standard to allow a three-foot minimum setback from the side and rear property lines for mechanical equipment (i.e., air conditioner units) in lieu of the four-foot minimum setback required by the Baker Ranch Planned Community plan. The Site Development Permit was evaluated in and contemplated by the Supplemental Environmental Impact Report (SEIR) that was prepared for the Shea/Baker Ranch project (SCH# 2004071039) and certified by the City of Lake Forest City Council on May 15, 2012. The Shea/Baker Ranch certified SEIR was not challenged within the time period prescribed in subdivision (c) of Public Resources Code section 21167 and thus the SEIR is presumed valid in accordance with Public Resources Code section 21167.2. The proposed Site Development Permit is consistent with scope of the approved Area Plan and Tentative Tract Map 16466. Therefore, the certified SEIR serves as the environmental documentation for the project and the project is in compliance with the requirements of CEQA.	NOD	
2008092051	Folsom South of U.S. Highway 50 Specific Plan Folsom, City of Folsom--Sacramento The California Department of Fish and Game is executing Streambed Alteration Agreement number 1600-2012-0198-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, the Folsom South Area Group. 2010032054	<p>The project is to allow the Folsom South Area Group and its employees, agents, or contractors and their subcontractors to conduct the authorized associated with the Backbone Infrastructure Project within the Folsom Specific Plan Area (SPA). The Backbone Infrastructure Plan includes major roads and trails, water and sewer infrastructure, and storm drain infrastructures within the SPA.</p> <p>Trancas Street Bridge Scour Repair Project Napa, City of Napa--Napa</p> <p>The proposed project consists of placing riprap around Pier No. 3 of the Trancas Street Bridge due to erosion at the base of the pier. Activities would involve placement of large rocks (loose riprap) to cover the top of the pier footing. The riprap would be 2 ft 6 in deep with an apron outside of the pier footing that would slope downward toward the ebb and flow direction of the Napa River. A 5-foot-deep cutoff trench would be excavated around the perimeter of the riprap and filled with rock to minimize the potential for future undermining of the riprap and pier. The needed repairs would require dewatering of a portion of the river, and an approximately 400-foot-long access road would be extended from an existing gravel road located north of the bridge and into the river from the west bank.</p>	NOD	
2010099019	<p>Policy for Maintaining Instream Flows in Northern California Coastal Streams State Water Resources Control Board --Marin, Sonoma, Napa, Mendocino, Humboldt</p> <p>The project consists of principles and guidelines for maintaining instream flows for the protection of fishery resources, while minimizing water supply impacts on other beneficial uses of water, such as irrigation, municipal use, and domestic use. The policy applies to applications to appropriate water, small domestic use and livestock stockpond registrations, and water right petitions.</p>	NOD	
2013102029	<p>Dougherty Valley Specific Plan Modification for New Elementary School in Gale Ranch Phase IV Contra Costa County San Ramon--Contra Costa</p> <p>The applicant is requesting approval of the following applications as they relate to Gale Ranch III and Phase IV of Dougherty Valley;</p> <p>*General Plan Amendment (County File: GP#12-0004): A request to amend the General Plan Land Use Element Map to allow 7.9 acres of land within Gale Ranch Phase IV to be re-designated from Single Family Residential-High Density (SH) to Public/Semi-Public (PS) for a new elementary school site, and to allow a 2.2 acre portion of Gale Ranch Phase III to be re-designated from Parks and Recreation (PR) to Multiple Family Residential-Low Density (ML) to allow the relocation of 25 residential lots displaced by the new elementary school site; and,</p> <p>*Specific Plan Amendment (County File:SP#12-0001): A request to amend the Dougherty Valley Specific Plan to reflect a new elementary school site located within the Gate Ranch development near the future intersection of Dougherty Road and Bollinger Canyon Road, the relocation of 45 lots displaced by the new elementary school site within the neighborhoods of Gate Ranch, and updates to various Maps, Figures, and Tables to the Dougherty Valley Specific Plan.</p>	NOD

2014028147	Benton Pond Fish Habitat Enhancement Project Fish & Wildlife #6 --Mono CDFW is executing a Streambed Alteration Agreement (Agreement) pursuant to Section 1602 (SAA # 1600-2013-0161-R6) of the Fish and Game Code to the Eastern Sierra Land Trust (Permittee). This project is limited to the removal of encroaching hardstem bulrush (<i>Schoenoplectus acutus</i>) and the removal of non-native Sacramento perch (<i>Archoplites interruptus</i>) from a private pond in Benton Hot Springs. These species must be removed to promote the establishment of speckled dace (<i>Rhinichthys osculus</i> ssp.), a native fish, within the project area. The project will include the use of prescribed burning, mechanical cutting, transplanting three-square bulrush (<i>S. americanus</i>) and pond de-watering to fish removal. Prescribed burning will occur in January or February and be overseen by the California Department of Forestry and Fire Protection. Dewatering will be performed outside of the nesting season for birds. No woody vegetation will be removed for this project, nor will there be a permanent change to the water level of the pond or dam or spillway. The intent of this project is to improve the status of speckled dace by increasing the number of secure populations, and to restore and extend the lifespan of the pond for fish, waterfowl, and migratory birds.	NOE	
2014028148	Reconstruction of Existing Water Well No. 36 West Valley Water District Rialto--San Bernardino The reconstruction of water well no. 36 will include raising the well which will get it out of a streambed area that could cause potential infiltration. This well is located at a level that could potentially cause water quality issue so the purpose of raising the well would be to alleviate such problems.	NOE	
2014028149	Letter of Non-Objection to Enter State Sovereign Land to Conduct Hand Auger Borings to Collect Shallow Groundwater Samples California State Lands Commission Benicia--Solano CSLC staff's non-objection of Environmental Resources Management to enter State lands to perform groundwater testing, propose eight auger borings 3-5 feet in depth, three inches in diameter to determine migration of TCE.	NOE	
2014028150	Letter of Non-Objection to Conduct Environmental Surveys for the Minor Slough River Bridge Rehabilitation Project California State Lands Commission --Solano Conduct environmental studies for the purpose of gathering information for the Minor Slough River Bridge Rehabilitation Project. Surface disturbance activities would be limited to conducting soil test pits by hand shoveling at a maximum of two feet deep to assess potential archeological and geotechnical resources.	NOE	
2014028151	Clearwell Replacement / Enlargement & Standby Project Public Health, Department of Clearlake--Lake The California Department of Public Health (Department) is a responsible agency for this project. The Department's Safe Drinking Water Proposition 50 Program is providing state funds for the project. Buckingham Park Water District proposes to install a 200,000 gallon storage tank to provide the required chlorine disinfection contact time and adequate water storage.	NOE

2014028153	Restoration 2013/2014 Stabilization, Supplemental Planting and Seeding, and Test Plot Parks and Recreation, Department of --San Luis Obispo The purpose of the 2013/2014 restoration program is to stabilize, restore or maintain the ecological integrity and function of the native plant communities and surrounding soil in specific areas of the Gaudalupe - Nipomo Dunes Complex within Oceano Dunes SVRA park boundaries. Protection of the vegetated islands within ODSRVA, are mandated to remain in compliance with the Coastal Permit, OHMVRD Directives and State Legislation. Projects proposed for the 2013/2014 restoration season are within the fore dunes, mid-dunes and back dunes. Most of the sites targeted for restoration are within or near the open riding and camping area of Oceano Dunes SVRA. All of the existing vegetated area are closed to OHB recreation by fencing. Restoration techniques will include pre-project surveys, dune stabilization with straw, native plant propagation and native seed dispersal. Pre-project surveys will be carried out for listed species and project boundaries will be marked with GPS polygons. Dune stabilization will be completed with certified "weed free" straw spread at 100-150 bales/acres by a straw blower or punched into the sand surface with "sheepsfoot" pulled by heavy equipment. All native seed and vegetation plant material to be used for this project were collected from on-site locations within ODSRVA.	NOE	
2014028154	Operation of Holly Hills Intertie Public Health, Department of --Monterey The California Department of Public Health (Department), as the responsible agency, will be issuing a water supply permit. 	Placer County Water Agency existing distribution system.		
2014028157	Part 2 Emergency Grand Funding Public Health, Department of Willits--Mendocino The California Department of Public Health (Department) is a responsible agency for this project. The Department's Safe Drinking Water Proposition 84 Program is providing state funds for the project. The City of Willits proposes a project that includes the purchase and installation of approximately 5,000 feet of pipeline to transport water from the Elias Well to the city's existing distribution system, new well pump, fencing setbacks, controls for disinfection system, and replacement of the Elias well so it meets current construction standards.	NOE	
2014028158	Linda and Theodore Howard Central Valley Flood Protection Board Colusa--Colusa To install a 16-inch diameter steel agricultural water supply pip up-and-over the left (east) bank levee of the Sacramento River that replaces an existing 16-inch diameter pipe.	NOE	
2014028159	James and Judith Carter Central Valley Flood Protection Board Sacramento--Sacramento To replace an existing fence and gate.	NOE	
2014028160	West Sacramento Investments Central Valley Flood Protection Board West Sacramento--Yolo To replace an existing pipe with a new 20-inch steel pipe, positive closure device and anti-siphon breaker.	NOE	
2014028161	SRA Highway 32 Wilder Fuels Reduction Forestry and Fire Protection, Department of --Butte This project involves the hand clearing of brush, small trees less than 6 inch in diameter and dead woody debris (snags less than 11 inch in diameter) within the right of way of State Highway 32. The project will be carried out on both sides of the highway from 14 Mile House Road on the north and southward to approximately 1 mile south of Wilder Road. The project will encompass an approximate 35 acres. The purpose of this project is to reduce fuel loads and fire hazard, and create fuel breaks along the highway. Cut vegetation will be piled and burned or chipped, with all work being done by hand. Chipping where desirable will be done only from paved or graveled permanent surfaces. Burning will be done under permit from local Air Quality Management authority and timed to occur when moisture levels are sufficiently high enough to allow for safe disposal with minimal risk of escape. After daily commencement, project will be patrolled as needed in evenings (4 to 8 hours after burning operations) by CAL FIRE Station 23 (Forest Ranch FS) engine crews.	NOE	
2014028162	Residence 2 Improvements Parks and Recreation, Department of --Placer Improve the exterior, entrance walk ways and parking of residence 2 and garage in Tahoe State Recreation Area (TSRA) to upgrade the facilities and provide a safe access for park staff.	NOE

2014022042	Vesting Tentative Parcel Map Application No. PLN2014-0014 - Yamamoto Stanislaus County --Stanislaus Request to divide a 145 acre parcel into one 45 acre parcel and a 100 acre remainder parcel.	CON	03/10/2014
2013041037	Nob Hill Improvements San Diego County Water Authority San Diego--San Diego The Water Authority proposes to replace and realign approximately 800 feet of the Second Aqueduct Pipelines 3 and 4 and construct an access road within the aqueduct right-of-way. The permanent access road would be within the right-of-way, and used during construction and for ongoing operation and maintenance activities. A staging area on a separate parcel located southwest of the access road. Two construction methods for the pipeline improvements are being considered: tunneling (Alternative 1) and open trench (Alternative 2). While the two construction methods would have the same end result with respect to the aqueduct system operations, the equipment required, ground disturbance, and quantity of excavated materials would differ. Thus, these alternatives are analyzed in an equal level of detail throughout the EIR.	EIR	04/04/2014
2012052069	Cal Water, Water Storage Tank Project - Station 119, Melendy Drive and Station 120, Crestview Drive San Carlos, City of San Carlos--San Mateo The project involves the installation of two new water storage tanks by the CA Water Service Company (Cal Water) on two sites within the City of San Carlos. The sites are owned by Cal Water and are located at 3376/3384 Melendy Drive, known as Station 119, and 700 Crestview Drive, known as Station 120. Both sites currently contain existing welded steel water storage tanks with a 460,000-gallon tank at the Crestview Drive site and a 400,000-gallon tank on the Melendy Drive site. The existing tanks would remain, with one new tank installed at each site. At Station 119 (3376/3384 Melendy Drive) the proposal is to construct a new 400,000-gallon above-ground, welded steel water storage tank and at Station 120 (700 Crestview Drive) the proposal is to construct a new 410,000-gallon above-ground, weld storage tank for emergency water supply.	MND	03/20/2014
2012094003	Beckwourth-Genesee Road Project Federal Highway Administration --Plumas Plumas County, in combination with the Federal Highway Administration and U.S. Department of Agriculture, Forest Service (Plumas National Forest), is proposing to improve and realign the southern 9.6 miles of Forest Highway (FH) 177 (Beckwourth-Genesee Road) from SR 70 in Beckwourth to County Road 111 in Clover Valley. The existing roadway is a combination of paved and unpaved surfaces. The project would widen, realign, and resurface the road to improve the operational and design deficiencies of the roadway to be consistent with current design standards. The main realignment would shift the road outside the Ceresola Ranch.	MND	03/20/2014

<u>Documents Received on Wednesday, February 19, 2014</u>			
2014021037	Nickelodeon Office Project Burbank, City of Burbank--Los Angeles The proposed project includes construction of: one 113,760 sf office building (5 stories maximum); one 137,229 sf parking structure (5 stories maximum) with 450 parking spaces; a fence/hedge up to ten feet in height along the front and street-side property lines; and related on-site improvements such as driveways, landscaping, and lighting. The project requires approval of a Development Review permit for the proposed construction, a CUP for the height of the office building greater than 70 feet, and a Variance for reductions to specified development standards (a 5-foot reduction in the front and street side setbacks to 10 feet minimum, up to a 10-foot high fence/hedge greater than three feet in height along the front and street-side property line, and eliminating the requirement for one tree per 40 linear feet of street frontage). The perimeter wall along the southwesterly 133 feet of the subject property would be removed, and the outdoor courtyard on the current Nickelodeon property located at 231-239 West Olive Avenue would be open to the project site.	MND	03/20/2014
2014022039	Kingswood 500 Tank / 120 Booster Demolition and Griff Creek Restoration North Tahoe Public Utility District --Placer The Project involves the removal of the existing water tank, pump station, and associated above ground infrastructure constructed adjacent to Griff Creek. The underground piping will be abandoned in place. The large cut and associated cut slope at the location of the water tank will be filled and regraded to match adjacent natural topography. An existing berm constructed on top of the left bank of the creek when the tank was built will be removed. Removal of select conifers and overgrown willows which inhibit the establishment of riparian grasses and shrubs on the left bank will be performed. Willow stakes and alder will be planted to encourage the growth of riparian vegetation. The existing compacted road will be ripped to eliminate compaction and soil conditioning and revegetation with native grasses, willows, and alders will be implemented.	MND	03/20/2014
2014022041	Nichols Tentative Parcel Map (TPM-13-02) Siskiyou County --Siskiyou The project would subdivide an approximately 37.5-acre parcel into four parcels consisting of approximately 11.0 acres (Parcel 1), 10.4 acres (Parcel 2), 13.3 acres (Parcel 3), and 2.8 acres (Parcel 4). Proposed Parcel 1 is currently developed with the property owners' residence and is not being proposed for further development, nor is development of the other three parcels being proposed at this time. Access to each of the proposed parcels would be via existing driveways and/or roadways and no new roads are currently being proposed.	MND	03/20/2014
2014022043	Valley Springs Recycling Conditional Use Permit 2013-030 Calaveras County --Calaveras Valley Springs Recycling, an existing developed State-registered recycling center located at 148 Main Street in Valley Springs, CA on a 1.24 acre parcel zoned M2 (General Industrial), is requesting a CUP to allow for the additional processing of ferrous and non-ferrous metals, E-waste, and mixed recyclables. <u>Documents Received on Wednesday, February 19, 2014</u>			
2014022044	Auto Zone Tentative Parcel Map Application - TPM 2013-004 Calaveras County --Calaveras The proposed project consists of subdividing a 37.05-acre parcel into two (2) lots, 0.79 and 0.70 acres in size with a 35.56 remainder parcel. Development of the 0.79 and 0.70-acre parcels will consist of retail/commercial, with one of the parcels committed to being an Auto Zone retail automotive parts store. Water and sewage services will be provided by the Valley Springs Public Utility District.	MND	03/20/2014
2014021038	Talaria at Burbank Project Burbank, City of Burbank--Los Angeles BMV Investment Co., LLC has filed an application to permit the development of an approximately 43,000 sf supermarket and 241 residential units on an approximately 3.9 acre site in the City of Burbank. Discretionary approvals requested include approval of a Development Review, Lot Line Adjustment, Parcel Map, and Planned Development as defined in the Burbank Municipal Code to provide unified development standards for the site. The proposed project would additionally require the vacation of Avon Street between Alameda Avenue and Olive Avenue, as well as an alley.	NOP	03/20/2014
2001102011	Oroville Facilities Relicensing FERC Project No. 2100 Water Resources, Department of Oroville--Butte This proposed project involves improvements to five salmonid spawning sites on the Lower Feather River, which will require active restoration in the stream channel to modify channel hydraulics. This will include changes in channel elevations, gravel augmentation and loosening of armored surface layers. Approximately 8,300 cubic yards of highly suitable spawning gravel will be placed into the river to improve spawning habitat.	NOD	
2005062010	Fallon Village Project Dublin, City of Dublin--Alameda The proposed Project includes the construction of a residential development including 780 housing units, 12,000 square feet of commercial development, a future development parcel, a community and neighborhood park, a school site, a water quality pond, public street extension and public trails on 138.9 acres of undeveloped land.	NOD	
2007041119	State Route (SR-) 11 and the Otay Mesa East Port of Entry (POE)-Phase I Caltrans #11 San Diego--San Diego DFW is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code (#1600-2013-0242-R5) to the project applicant, Caltrans District 11. The project proposes to impact 0.68 acres of streambed, including permanent impacts to 0.42 acre of riparian habitat and 0.26 acre of open water/unvegetated streambed (4999 linear feet) and to mitigate with 3.31 acres (5162 linear feet) of restoration and/or enhancement.	NOD

2008122033	Solid Waste Transfer Station Expansion Brentwood, City of Brentwood--Contra Costa The permit will allow for the operation of a new large volume transfer/processing facility.	NOD	
2010122091	2011 Georgiana Slough Non-Physical Barrier Study Water Resources, Department of --Sacramento The Georgiana Slough Floating Fish Guidance Structure Project consists of placing a temporary steel fish barrier in Georgiana Slough, and 130 fish monitoring devices at 17 temporary fish monitoring stations.	NOD	
2013082012	Housing Element Update Elk Grove, City of Elk Grove--Sacramento The City of Elk Grove Housing Element, a mandatory element of the City's General Plan, identifies the policies and actions which the City will implement to ensure that housing in Elk Grove is affordable, safe, clean, and fit for a human habitation. It addresses housing needs by encouraging the provision of an adequate quantity of sites designated for multifamily housing, by assisting in affordable housing development, and through the preservation and maintenance of existing affordable housing stock. Pursuant to State law, the City is required to update the Housing Element on a regular basis with the next review required to be submitted by early 2014. The draft 2013-2021 Housing Element addresses this requirement.	NOD	
2014028163	Emergency Permit for Treatment of Hazardous Waste, MWEST Properties Toxic Substances Control, Department of San Jose--Santa Clara The hazardous waste to be treated is approximately 100 grams of picric acid in a container. Picric acid is a shock sensitive material and should be stabilized prior to being transported offsite. The container of picric acid is expired and is currently being stored inside a laboratory, previously operated by Solopower located at 5981 Olptical Court in San Jose. The treatment of these items will be carried out by Clean Harbor Environmental Services (CHES) and involves the addition of water and alcohol to the container to reduce the reactive characteristics.	NOE	
2014028164	Electrical Infrastructure Upgrade California State University, Fresno --Fresno The existing campus electrical infrastructure has not had a major upgrade since the campus moved to its current location in 1953, and has surpassed its useful service life. The purpose of this project is to ensure that electrical utilities are in place to meet the current demand, and provide long term infrastructure capable of supporting planned growth, consistent with the campus master plan, to the target year of 2008. This project includes replacement of the main campus substation, campus distribution system, building substations and generators. The scope also includes installing a new central power managements control system with individual building metering.	NOE

2014028165	Entrance Sign Relocation Parks and Recreation, Department of --Monterey Relocate destroyed entrance sign at Moss Landing State Beach to signify entrance to park in a safe location. Work will excavate and install concrete footings in two holes approximately 18" wide X 24" deep; install 72" X 48" standard entrance sign on posts; replace two gates and steel posts set in existing footings 24" wide X 48" deep set in concrete.	NOE	
2014028166	A New Minor Waste Tire Facility Permit for Southbay Production, LLC Resources Recycling and Recovery, Department of --Los Angeles Issuance of a New Minor Waste Tire Facility Permit (WTFFP) for the outdoor storage of up to 4,999 waste tires and/or waste tire equivalents on-site, at any one time.	NOE	
2014028167	Elderberry Forebay Dam, No. 6-49 Water Resources, Department of Santa Clarita--Los Angeles The proposed work consists of repairing and reconstructing approximately 100 lineal-feet of the spillway retaining wall.	NOE	
2014028168	Part 2 Emergency Grant Funding Public Health, Department of --Mendocino The California Department of Public Health (Department) is a responsible agency for this project. The Department's Safe Drinking Water Proposition 84 Program is providing state funds for the project. Redwood Valley County Water District (CWD) proposes a project that includes the installation of a new water main, tie-in connection between Redwood Valley CWD and Calpella Water System, installation of a new pump station and appurtenances.	NOE	
2014028169	Yosemite Lakes Camp New Small Well Operation Public Health, Department of --Tuolumne The California Department of Public Health (Department) as the lead agency will be issuing a water supply permit. The Yosemite Lakes Camp has installed a small well to augment water production. The new well is only producing 5-6 gpm according to the 72 hour pump test. The water system would like to have the well ready for production before the season begins or before the river runs dry. The Camp has a surface water treatment plant to treat water from the Tuolumne River. They also activated a standby well to prepare for the drought conditions.	NOE	
2014028170	Petition for Temporary Urgency Change (TUOP) for Permits 15026, 15027, and 15030 State Water Resources Control Board --Yuba On February 4, 2014, YCWA submitted the TUCP for Permits 15026, 15027, and 15030 to the Division of Water Rights to request a temporary variance in instream flow requirements in the lower Yuba River. The variance would enable YCWA to conserve water in storage at New Bullards Bar Reservoir.	NOE

2014028171	Open Bay Bass Tournament San Diego Unified Port District San Diego--San Diego The proposed project is the 19th annual Open Bay Bass Tournament, which took place at Shelter Island Park on February 1, 2014. The District will provide event sponsorship and financial assistance for the event, a saltwater bass fishing tournament. The event involved approximately 150 two-man teams fishing in the San Diego Bay for approximately six hours then weighing in their fish. After the weigh-in, a barbecue was held at Shelter Island Park, where various sponsors and vendors set up tables to showcase their products. Parking was provided at the parking lots serving Shelter Island Park. The event had an attendance of over 600 people.	NOE	
2014028172	Batalla de Mariachis Festival San Diego Unified Port District National City--San Diego The proposed project is the second annual Mariachi Festival and Competition, which will take place at Pepper Park in the City of National City on Saturday, March 15, 2014. The District will provide event sponsorship and financial assistance for the event, a community-friendly festival that will provide entertainment for families to come together and celebrate San Diego's Mexican heritage through mariachi music and traditional ballet folklorico dancing. The festival will highlight mariachi music in the schools by showcasing mariachi student groups from throughout the United States and Mexico. The festival will also celebrate Mexican arts, culture, and culinary delights.	NOE	
2014028173	Tidelands Use and Occupancy Permit to Wyndham San Diego Bayside for 4 Parking Spaces San Diego Unified Port District San Diego--San Diego The proposed project is a tidelands use and occupancy permit (TUOP) to Wyndham San Diego Bayside (tenant) for its continued use of four (4) parking spaces on North Harbor Drive adjacent to its leasehold at 1355 North Harbor Drive in the City of San Diego. The area proposed for use under this TUOP is currently used by the tenant only and exclusively for the purpose of short-term gratuitous vehicle parking (i.e., valet parking) for tenant's employees, guests, and invitee's. The proposed TUOP would continue this use. No new development, construction, or increase in the size of the tenant's leasehold or the TUOP area is proposed or authorized as part of this TUOP.	NOE

	main design objectives of the project. Work within CDFW jurisdiction includes placement of approximately 10 cubic yards of rock slope protection at town unnamed creek crossings, and the replacement of two 18 inch culverts within ephemeral channels.		
2013112071	Alder Drive at EID Canal - Bridge Replacement (No. 25C0069) El Dorado County --El Dorado The purpose of the Project is to replace the functionally obsolete Alder Drive Bridge over the EID Canal with a culvert that meets current design standards. The Project involves replacing the existing 32-foot-long, 18-foot-wide, 2-lane reinforced concrete slab bridge with a double-barrel culvert (two 36-inch or equivalent size circular culverts) that meets current design standards. The proposed culvert would tie in with the existing 30-foot-wide roadway providing two 12-foot traffic lanes and 3-foot shoulders on each side of the roadway. The proposed culvert would be located at the existing bridge location. All widening would occur along the eastern side of the existing roadway.	NOD	
2014029015	Bukema Driveway Culvert El Dorado County --El Dorado The project is limited to placement of two 36-inch diameter culverts in a drainage swale (Clear Creek) with associated fill around the culverts. The level on the bottom of the culverts will be below grade for the upstream end of the culverts to avoid undercutting and erosion around the culverts. The downstream ends of the culverts will be at grade and rock armoring will also be placed under the outflows and for a distance of at least 6-feet in the creek bed to act as a flow dissipater. An 18-foot wide road with 2-foot wide shoulders on either side will be constructed above the culverts, crossing perpendicular to the creek. The road will consist of earthen fill topped by at least 6-inches of compacted gravel road base. The crossing of the creek will be approximately 20-feet from bank to bank.	NOD	
2014028174	Coronado Cays Dock Replacement at 37 The Point San Diego Unified Port District Coronado--San Diego The proposed project involves the replacement of one existing floating concrete dock and gangway located at 37 The Point within the Coronado Cays. One existing 564.5 square-foot concrete floating dock will be removed and replaced with a 564.5 square-foot winchester grey TREX composite brand floating dock attached with stainless steel screws. Components comprising the replaced floating dock will include the following: 4-foot by 8-foot framing with 5-foot by 7-foot clips and 1/2-inch bolting; floatation pontoons; 2-foot by 12-foot fascia with white rubstrip and corners; 3/4 inch thick nonskid fiberglass decking; 8- to 14-inch bolted cleats; composite decking attached with stainless steel screw.	NOE	
2014028175	Trail Closure Signs, Chino Hills SP (13/14-IE-10) Parks and Recreation, Department of --San Bernardino Informational trail closure signs will be placed at designated entrances to Chino Hills State Park, in locations already containing regulatory and informational signs. These signs are 34 inches in height by 36 inches in width and will be installed on wooden posts. Wooden outdoor exhibit case shelters will be installed in the same locations. These outdoor exhibit shelters can hold information panels, maps, bulletin boards for posting of temporary information about the park or its programs,	NOE

	other informational or regulatory signs, and educational/informational panels from the Park Panel Program. All signs and structures conform to ADA requirements.		
2014028176	Roadbed Modification Project Parks and Recreation, Department of --Merced Rehabilitate 14,726 square feet of the existing road from the park entrance to and including the 21,600 square foot day use parking lot to improve the crumbling road and parking lot for public safety. Work will pulverize existing asphalt, aggregate base and sub-base a minimum of 8" deep; grade pulverized material to meet grade and slope requirements; add reagent, compact, and pave with asphalt. Work will replace wood edging with asphalt curbing.	NOE	
2014028177	Laytonville Fuel Break Forestry and Fire Protection, Department of Fort Bragg--Mendocino This project consists of the reduction of hazardous fuels on various private property parcels and will be conducted by the California Conservation Corps under Cal Fire contract. Hand crews will create a shaded fuel break for the purpose of reducing fire hazard to the nearby community of Laytonville. The treatment area will be approximately 200-ft wide by 4,500-ft in length (20 acres). The vegetation consists of oak woodland, dense shrubs and mixed oak/conifer stands. Project work will involve utilizing chainsaws and hand tools to remove brush and dead ground fuels.	NOE	
2014028178	Kinder Morgan Anomaly Dig: Streambed Alteration Agreement No. 1600-2013-0275-R2 Fish & Wildlife #2 Rocklin--Placer The project is limited to the excavation of a pipeline to assess, validate and remediate anomalies and to verify the integrity of a petroleum products pipeline. Work will be scheduled when no rain is forecasted and when water levels are at their lowest. In order to perform the inspection, Kinder Morgan (KMEP) proposes to use sand or gravel bags to divert surface water along the southern creek bank away from the dig location. The inspection pit will be excavated using a rubber-tire backhoe and hand tools, with a shoring box to stabilize the pit walls. The top 12-inches of soil and any grassy/herbaceous vegetation will be segregated during excavation and used to backfill the upper 12-inches of the inspection pit.	NOE	
2014028179	Acquisition of 210 acres in Nevada County University of California Unincorporated--Nevada The proposed project is the acquisition of 210 acres in Nevada County, including a main residence and caretaker residence and a lake. The current approval is for the acquisition alone, and no change in use. Following acquisition, the University will continue to evaluate the scope and feasibility of redevelopment of the property as an Alumni Family Camp for use by the California Aggie Alumni Association. Should development costs or project components be determined to make the project infeasible, the University may sell the property. Any future development of the property is conditioned on CEQA compliance.	NOE

2014028180	Median Drainage Project Caltrans #3 Placerville--El Dorado This project will improve median drainage. During rain events the concentrated flow of water in the median poses a danger to the traveling public. The purpose of this project is to collect and safely redirect the water off of the roadway. The median pavement will be re-contoured and a median drainage system will be installed.	NOE	
2014028181	Calaveras High School Performing Arts Center Project Calaveras Unified School District --Calaveras Performing Arts Center facility within the existing footprint of the Calaveras High School Campus.	NOE	
2014028182	Roadside Vegetation Maintenance, Chino Hills SP (13/814-IE-11) Parks and Recreation, Department of --San Bernardino The project proposes to maintain adequate vegetation clearance consistently along the major access roads and four foot wide road shoulders within Chino Hills State Park in order to facilitate access for vehicles during emergencies. The majority of the work will be done with hand crews. Mowing equipment will be used in some areas so that impacts to sensitive habitat or species will not occur, and will be accompanied at all times by separate qualified staff and equipment assigned as wildfire safety spotters.	NOE	
2014028183	Pavement Repair/Repair Drainage Facilities & Guardrail Caltrans #2 --Trinity Using both Federal and State funds, the California Department of Transportation (Caltrans) proposes to repair the pavement on (SR) 299, between (PM) 36.9 and (PM) 53.5, in Trinity County. Additionally, the Project includes repairing drainage facilities, reconstructing guardrail and guardrail end treatments, placing shoulder backing, improving pedestrian curb ramps, upgrading roadway signs, and upgrading the existing Roadway Weather Information System.	NOE	
2014028184	Updates to the State's Appliance Efficiency Regulations Energy Commission -- Because the Appliance Efficiency Regulations include the federal appliance efficiency requirements, when federal law changes, it is necessary to update the Appliance Efficiency Regulations to correctly reflect these changes. Other changes include clarifying language and eliminating obsolete requirements.	NOE	
2014028185	Alder Camp Road Emergency Repair Forestry and Fire Protection, Department of --Del Norte Emergency repair a road slip out on the Alder Camp north access road. The road failed on 15 Feb 2014. This is the only permanent all-weather road that accesses this Conservation Camp. Alder Conservation Camp is operated jointly with Cal Fire and the California Department of Corrections and Rehabilitation (CDCR) and is a 106 bed State prison facility. This project will effect emergency repairs to re-open the road. Work will include removal of slide materials to an existing Cal Trans approved spoils site, stabilizing the failure site, and filling and rebuilding the road base and prism. Cal Fire has a permanent easement for this road that	NOE

2007102040	<p>Mather Airport Master Plan Sacramento County Rancho Cordova--Sacramento</p> <p>The purpose of the Revised Mather Airport Master Plan (Master Plan) is to guide airport development over a 20-year period. The entire Revised Mather Airport Master Plan can be viewed at: http://www.sacramento.aero/scas/about/planning_design/</p>	EIR	04/07/2014
2013041085	<p>College Town Specific Plan Fullerton, City of Fullerton--Orange</p> <p>The proposed project involves the development of a specific plan on an ~88.1 acre site in the eastern portion of the City. Specific plans act as a bridge between the Fullerton Plan and individual development proposals. The College Town Specific Plan would be adopted as ordinance and serve as the zoning for the project site. It would establish the necessary plans, development standards, regulations, infrastructure requirements, design guidelines, and implementation programs on which subsequent project-related development activities would be founded. The proposed project would be developed by a number of landowners over time, within the framework established by the College Town Specific Plan. The specific plan calls for a range of residential product types, neighborhood commercial, office, community facilities, and recreational land uses to be distributed throughout seven planning areas. The type, location and distribution of the varying land uses would be governed by the land use designations that would be established under the specific plan: Mixed-Use and /or Multi-family residential (MU/MFR), Mixed-Use /Institutional (MU/I), Commercial/Office (C/O), Mixed-Use (MU), and Public Street Right-of-Way (ROW). Other components of the specific plan include parks, open space and paths; transit accessibility; vehicular access, circulation and parking improvements and infrastructure; other infrastructure improvements, including storm drains, wastewater, water and dry utilities; and the establishment of customized parking standards.</p>	EIR	04/07/2014

2014021040	SCORE Imperial Valley 250 Imperial County --Imperial Superstition Mountain Ventures, LLC./Martin Coyne (applicant/property owner) has submitted Conditional Use Permit #14-0001 to establish a "race event area" for the "SCORE Imperial Valley 250" international off-road racing" and up to five (5) additional races throughout the year. The race events will take place in the "Superstition Mountain Off-Highway Vehicle (OHV) Open Area", which is on federal and military target range lands. Approximately 95 percent of the races will be conducted within the Superstition Mountain OHV area.	MND	03/24/2014
2014021042	Tehachapi East Afterbay Turnout Pump Station Project Antelope Valley-East Kern Water Agency Gorman--Los Angeles The Lead Agency is proposing to construct a new pump station off the California Aqueduct Turnout north of the Oso Pumping and Power Plant. The pump station will include a single vertical turbine pump with provisions for an additional 3 similar units for a total of 4 (3 operating, 1 standby) with an ultimate flow capacity of 4,500 gpm. The project also includes installation of associated 12-inch diameter discharge piping, 24-inch diameter manifold piping, valves, meter, appurtenances, electrical and controls equipment, drainage piping, and a block building to house the meter and motor control center for the pump station.	MND	03/24/2014
2014021043	Tentative Map Application 2013-5 Hollister, City of Hollister--San Benito Tentative Map Application 2013-5 to subdivide 43.72 acres into 241 single-family lots; streets/driveways and right of ways including cul-de-sacs at the west terminus of Pear Street and Cherry Street, 2.65-acres dedicated as common open space, and one 2.21 acre parcel to be retained for an existing single family residence. Single family lots will range from 4,500 sf to 5,000 sf. Density consistent with City's Medium Density residential zoning.	MND	03/24/2014
2014021044	PL13-0046 Ventura County --Ventura This project involves the drilling of three test oil wells at two existing sites (two wells on the upper pad and one well on the lower pad) to determine the commercial viability of reactivating the Modelo Area of the Piru Oil Field. This oil field was discovered in the 1890s and was previously operated under CUP-4387.	MND	03/24/2014
2014021045	Hollister Solar Project San Benito County Hollister--San Benito Conditional Use Permit to enable construction of a 1.5 MW solar power generation facility. Minor subdivision to divide the 39.61 acre site into three parcels. Two approximately five-acre parcels would be created, one of which is occupied by an existing home. It is assumed that one new single-family home could be developed in the future on the second of these two parcels. The third approximately 29-acre parcel would contain the solar power facility, which would have a development footprint of about 17 acres. A semi-permeable gravel road would provide access from Buena Vista Road to the solar facility. The solar facility would interconnect to an existing 21-kV PG&E line located along the northern boundary of the site.	MND	03/24/2014

2014021049	Proposed Amended Rule (PAR) 1130 - Graphic Arts South Coast Air Quality Management District --Orange, Los Angeles, Riverside, San Bernardino PAR 1130 would partially implement Control Measure CTS-02- Further Emission Reductions from Miscellaneous Coatings, Adhesives, Solvents and Lubricants and the Reasonably Available Control Measures (RACM) Demonstration of Appendix VI, of the 2012 Air Quality Management Plan (AQMP). PAR 1130 would improve consistency with the United States Environmental Protection Agency's (U.S. EPA) Control Techniques Guidelines (CTG) for Offset Lithographic Printing and Letterpress Printing (EPA 453/R-06-002) and Flexible Package Printing (EPA 453/R-06-003) applicable to printing operations regulations by amending the overall add-on control device efficiency requirements and VOC content limits for fountain solutions. The proposed amendment further adds prohibition of storage of non-compliant VOC-containing materials at a worksite, removes obsolete rule language, updates definitions for consistency with other SCAQMD rules, adds an exemption for graphic arts materials that have a VOC content of no more than 10 g/L, as applied, and makes minor corrections and clarifications. Since affected facilities already comply with the proposed requirements, the proposed amendments are not expected to achieve additional VOC reductions.	EA	03/25/2014
2008021002	ProLogis Eucalyptus Industrial Park EIR (formerly Prologis Park Moreno Valley Eucalyptus Project) Moreno Valley, City of Moreno Valley--Riverside FYI Final 1 CD The proposed project consists of construction and operation of a warehouse facility with six individual warehouses of varying sizes with a total of 2,244,638 sf on 122.8 acres. The project includes construction of parking and driving areas, detention basins, erosion protection and a bridge over Quincy Channel, offsite road and utility improvements, and landscaping along the perimeter and roadway frontages.	FIN	
2012042050	Infrastructure and Facility Improvements Project at SNARL University of California, Santa Barbara Mammoth Lakes--Mono The Project involves replacement of (5) existing concrete stream control structures in Convict Creek within the Reserve property; grinding and reconstruction of the entrance road and paved parking areas with installation of underground utility lines; and construction of a classroom/lecture hall building.	FIN	
2008111025	Landfill Gas Renewable Energy Project at FRB Landfill Orange County Irvine--Orange The proposed project would allow for the development of a landfill gas renewable energy project at the FRB Landfill.	MND	03/25/2014

2012042029	Alderpoint County Water District Water Improvement Project Alderpoint County Water District --Humboldt Note: Supplemental Since project approval in June 2012, the project design has been amended as follows: - New Surface Water Treatment Facility will be constructed as planned - New Water Storage Facility: One 160,000 gallon water storage facility will be installed, the existing tank will be demolished - Distribution System Repairs will be performed as planned - New intake pumps will not be installed - New transmission main and telemetry cable will not be installed	MND	03/25/2014
2014021047	Solar WWTP Sanger, City of Sanger--Fresno The proposed project consists of construction and operation of a 1 megawatt photovoltaic tracking system to provide a sustainable energy resource for the existing WWTP. The project consists of single-axis trackers, grid-interactive inverters on concrete slabs and panel washing equipment. A total of 3,780 tiltable photovoltaic panels will be installed. The solar arrays will be enclosed by a 6-foot high chain link fence. The project system footprint is 574 feet by 499 feet or 286,041 sf (6.57 acres). The proposed will utilize the existing dirt road that is located just east of the project site for vehicular access to the facility. There will be a 6-foot high chain link fence around the entire perimeter of the arrays with a vehicle gate and a personnel gate.	MND	03/25/2014
2014021050	Rancho Guejito Farm Road Restoration and Revegetation Plan San Diego County Escondido--San Diego The project is a restoration grading plan to restore approximately 10.7 acres of unpermitted grading that occurred in 2011 to create a farm access road to connect an agricultural operation to San Pasqual Valley. The unpermitted grading involved the movement of approximately 32,500 cubic yards of cut and 32,500 cubic yards of fill and crossed five unnamed tributaries to Guejito Creek, with loose fill material being pushed into the drainage channels. The restoration plan includes 4,500 cubic yards of cut and 4,500 cubic yards of fill to remove the loose fill material that was deposited into the five unnamed tributaries, perform remedial grading, placing rock at the base of one of the previous fill slopes for stabilization, and installation of BMPs and other erosion control measures. Grading for the fill removal and remedial grading will take place in approximately 1.4 acres, including 0.3 acres are not previously disturbed. Material removed from the crossings and the remedial grading areas will be utilized to stabilize and restore flatter portions of the unpermitted farm road.	MND	03/25/2014

	deficiencies. The Proposed Project is expected to occur over a 15-month period, approximately between Fall 2014 and Winter 2015.		
2014022045	Anthem Telecom c/o Gordon Bell (UP13-0008) Butte County --Butte A CUP for the development of a 130-foot tall, multi-carrier (up to 48 panel antennas), lattice wireless communication tower. The applicant is requesting the 130 feet in height to provide the ability for additional carriers on the tower. The project proposes 12 panel antennas at the 119-foot level and a 6-foot diameter microwave dish at the 127-foot level. Subsequent sets of antennas (colocations) will be placed at every 10 feet separation, down to 89 feet. Also proposed are 15 remote radio units, one equipment shelter, 2 A/C units mounted on the shelter, 500 gallon emergency generator and associated cabling from the shelter to the tower. The communication facility will be located in a 3,600 sf area, secured by a 6-foot chain link fence.	MND	03/25/2014
2014022046	Miner Slough Levee Repair Water Resources, Department of --Solano DWR proposes to repair the Miner Slough levee from approximate river miles 1.8 to 5. The levee repair will be completed from a barge within Miner Slough with assistance from equipment, most likely an excavator, on the levee crown. DWR proposes to repair the levee by placing a rock slope protection and soil mix to reshape the area to the original levee slope. The work will be done in a manner that will not change the character, scope, or size of the original levee design and will not result in expanding the existing use of the levee. Seeding and replanting with native seed and trees will follow up the repair work. The project is located within the Liberty Island Quadrangle, Township 5 North, Range 3 East, MDB&M.	MND	03/25/2014
2014022048	13-020 (Mundeep Dhami) Sutter County Yuba City--Sutter A request for a General Plan amendment from COM (Commercial) to IND (industrial) designation, a Rezone from C-2 (General Commercial) District to M-1 (Light Industrial) District, and design review for a 2.22-acre parcel. No development of the site is identified at this time. The property is developed with four single-family residences. The residences are proposed to remain on the property until a specific development project is proposed in the future.	MND	03/25/2014
2014022049	SBA Communications c/o Tom Johnson (UP13-0007) Butte County Oroville--Butte A CUP for the development of a 90-foot tall, multi-carrier (up to 48 panel antennas), monopole wireless communication tower. The first sector of antennas shall be located at 85-feet, and then subsequent sets of antennas (colocations) will be placed at every 10 feet separation, down to 55 feet. Also proposed are 24 remote radio units, one surge suppressor, ground related enclosures and equipment and back-up generator within the fenced, 3,300 sf area. Access to the site will be via existing dirt roads on the parcel.	MND	03/25/2014

2014028208	Shadow Glenn Stables Fence Repair/Construction and Quarantine Stable Installation Parks and Recreation, Department of --Sacramento Install a quarantine stalls, Repair and replace 1400 lineal feet of existing fence and install new fencing that partially surrounds the Shadow Glen Stables at Mississippi Bar along Lake Natoma within Folsom Lake State Recreation Area.	NOE	
2014028209	Palmdale Water District Energy Bridge Removal and Delivery Energy Commission Palmdale--Los Angeles The goal of this project is to remove energy storage equipment from the Palmdale Water District Facility and deliver it to the California State University, Sacramento campus.	NOE	
2014028210	Improvement of an Airborne Natural Gas Leak - Detection System Energy Commission Davis--Yolo Plumes from leaking natural gas lines disperse in the atmosphere in a turbulent, chaotic manner. Surveillance flights searching for evidence of such plumes will be typically flown at a minimum safe altitude (usually 500 feet above ground level). This requires the airplane to fly at a substantial distance downwind of a pipeline to allow the plume time to rise to 500 feet. Once the airplane is in the proper position and detects a large methane enhancement using a highly responsive and fast response methane monitor, a numerical air dispersion model (run back in time) can be used to identify the location of the leak. However, the "black trajectories" estimated by the air dispersion model to identify the source of the leaks have relatively large uncertainties. The proposed research will investigate ways to verify the accuracy of the "back" trajectories" that are essential to locate the position of the leaking source and perhaps, test the system using leaks detected by other means or intentional testing leaks to see if the proposed approach is able to identify the location of the known leaks. Multiple configurations of the numerical air dispersion model and the "back trajectories" that are essential to locate the position of the leaking source and perhaps, test the system using leaks detected by other means or intentional testing leaks to see if the proposed approach is able to identify the locations of the known leaks. Multiple configurations of the numerical air dispersion model and the black trajectory module would be tested to find the optimum setting under different weather conditions. In addition, since there are other sources of methane (e.g., wetlands, dairy farms) improvements is needed to determine the ambient measurements that originate from leaks from the natural gas system Research will be conducted on how to best identify methane that is coming from leaks in the natural gas system (e.g., use of other gaseous species to co-emitted with methane in the natural gas system to "fingerprint" methane from natural gas). 2014028218	Truckee River Bridge Repair Project Regional Water Quality Control Board, Region 6 (Lahontan), South Lake Tahoe --Nevada The purpose of this project is to rehabilitate the bridge support structure by repairing bent caps, replacing seismic shear blocks, and replacing seismic restrainer cables on the Truckee River Bridge.	NOE	
2014028219	Approval of California Land Reuse and Revitalization Act (CLRRRA) Response Plan, Cupertino Village Cleaners Toxic Substances Control, Department of Cupertino--Santa Clara The California Department of Toxic Substances Control (DTSC) has approved a CLRRRA Response Plan (Response Plan) for the Cupertino Village Cleaners (Site) pursuant to Health & Safety Code, Chapter 6.82, as submitted October 30, 2013 by Northgate Environmental Management, on behalf of the Cupertino Village, LP. The purpose of the project is to approve and continue operation of the existing Soil Vapor Extraction (SVE) pilot test system as the final response action to remediate tetrachloroethene (PCE) soil gas contamination detected above the site specific cleanup goal for the Site. The expected timeframe for the SVE system operation to remediate the Site is approximately twenty-four months.	NOE	
2014028220	San Jose Water Company, Gish Road Station Well 3 Public Health, Department of San Jose--Santa Clara The California Department of Public Health (Department) as the lead agency will be issuing a water supply permit. San Jose Water Company proposes to replace retired wells with a new well of equal capacity drawing from the same aquifer.	NOE	
2014028221	North Bay West, Paradise Cove, Rainbow Bay, and Emerald Bay East Maintenance Dredging Project Regional Water Quality Control Board, Region 6 (Lahontan), Victorville --San Bernardino The purpose of the Project is to perform maintenance dredging to restore portions of the inlets of North Bay West, Paradise Cove, Rainbow Bay, and Emerald Bay East to original topographic contours. A total of 4,000 cubic yards of sediment is proposed to be removed. The Project is necessary for navigational safety, protection of property, and invasive species and vector control.	NOE

2014021060	Marriott Residence Inn Paso Robles, City of Paso Robles--San Luis Obispo Four-Story, extended stay hotel project.	MND	03/26/2014
2014021062	DRC2012-00093; Variance San Luis Obispo County Morro Bay--San Luis Obispo A request by Chevron Environmental Management Company (CEMC) for a Variance / Coastal Development Permit to allow for the repair of three known active landslide areas, known as Slide Area 1, 2, (located within the coastal zone), and 4 (located outside the coastal zone). The project will result in the disturbance of approximately 0.25 acres (3,358 cubic yards of both cut and fill, with a maximum cut depth of 11 feet and maximum fill depth of 11 feet) on an approximately 2,200 acre parcel.	MND	03/26/2014
2014022054	Raley's Dock Replacement and Rice Mill Pier Rehabilitation West Sacramento, City of West Sacramento--Yolo The Raley's Dock facility was originally constructed by Tom Raley, founder of the Raley's supermarket chain, who installed steel pilings, a floating wood dock, and a gangway and timber walkway from the top of the levee to the floating dock. The dock was privately owned and used by the Raley's Corporation, and later became the boarding area for the Elizabeth Louise, a steam-powered paddlewheel, and for the River Otter Taxi service. As of 2011, the dock had been barricaded and unused as a boarding area for approximately five years and was in a state of despair.	MND	03/26/2014
2014022055	Rowland Bar Reclamation Plan Mendocino County --Mendocino Approval of a reclamation plan for an instream surface mining operation that has been recognized as a vested right, allowing for the extraction of up to 50,000 cubic yards of material per year. Project activities entail the reclamation of lands affected by the vested extraction operations. The project site is located at the confluence of the Mainstem and Middle Forks of the Eel River, approximately 0.25 mile south of Dos Rios, lying along the north side of State Highway 162, directly west of the State Highway Bridge over the Middle Fork Eel River (AP# 035-040-45).	MND	03/26/2014
2014022057	Bear Canyon Steam Pipeline Crosstie Lake County --Lake Geysers Power Company is proposing a new steam pipeline that will connect the Bear Canyon and Unit 16 power plants. The purpose of the pipeline is to facilitate steam transfer between the two power plants. The pipeline will be approximately 4,200 feet long and will be above ground. The pipeline will follow existing roads for 2,650 feet of the route. 1,350 feet of the route will be cross country, necessitating clearing of native vegetation. The route will cross over Bear Creek using a pipeline bridge. A 600 foot section of the pipeline will cross federally-owned land under the jurisdiction of the Bureau of Land Management (BLM). 2014021063	Zoning Ordinance Project Goleta, City of Goleta--Santa Barbara The City of Goleta will prepare a new Zoning Ordinance that will include regulations and development standards for each parcel of land in the City. It will be applied through a Zoning Map and through by-right and discretionary land use approvals.	NOP	03/26/2014
2014022058	Brentwood General Plan Update Brentwood, City of Brentwood--Contra Costa The proposed project is a comprehensive update to the City of Brentwood General Plan. The overall purpose of the Brentwood General Plan is to create a policy framework that articulates a vision for the city's long-term physical form and development, while preserving and enhancing the quality of life for Brentwood residents, and increasing opportunities for high-quality local job growth. The key components of the General Plan will include broad goals for the future of Brentwood, and specific policies and actions that will help implement the stated goals.	NOP	03/27/2014
2013121010	Conditional Use Permit Application No. C-13-157 Fresno, City of Fresno--Fresno Conditional Use Permit Application No. C-13-157 requests authorization to construct Water Well Pump Station No. 349 for the City of Fresno. The proposed facility will pump groundwater into the City's municipal water distribution system and has been configured to use water remediation tools such as an iron manganese filtration system, a Granular Activated Carbon treatment system and/or an air stripping tower. The facility will be constructed in three phases.	Neg	03/26/2014
2014022056	Remedial Action Plan for Site 6/Former Fire Training School at Treasure Island Toxic Substances Control, Department of San Francisco--San Francisco DTSC is proposing to approve a RAP pursuant to authority granted under Chapter 6.8, Division 20, CA Health & Safety Code (H&SC). The purpose of this RAP is to implement remedial activities at Site 6 that are protective of public health and safety and the environment. Chemicals of concern (COCs) in soil at Site 6 include benzene, dioxins, manganese and metachlorophnylpiperazine (MCP). COCs in groundwater include arsenic, benzene, ethylbenzene, manganese, MCP, naphthalene, xylenes, 1,1,2-trichloroethane and total petroleum hydrocarbons (TPH). The RAP proposed remedial alternatives for soil and groundwater that include the following activities: soil excavation to 5.5 feet below ground surface and backfill; off-site disposal of excavated soil; Institutional Controls (ICs); and long-term groundwater monitoring. Implementation of the proposed soil and groundwater remedial alternatives would: 1) ensure that the exposure pathways would be eliminated for future recreational users and occupational workers at Site 6; 2) prevent exposure to COCs in soil gas (that emanates from the groundwater) to future occupational workers; and 3) reduce the potential for COCs in soil to migrate to groundwater. 2003112039	Suisun Marsh Habitat Management, Preservation, and Restoration (SMP) Fish & Game #3 Suisun City, Fairfield--Solano, Contra Costa, San Joaquin The project is located in the Suisun Marsh. The Suisun Habitat management, Preservation, and Restoration Plan, is being pursued by the Suisun Principal Agencies, a group of agencies with primary responsibility for Suisun Marsh management, and is intended to balance the benefits of tidal wetland restoration with other habitat uses in the Marsh by evaluating alternatives that provide a politically acceptable change in Marshwide land uses. It relies on the incorporation of existing science and information developed through adaptive management.	NOD	
2008042116	Creekside Landing Project Fremont, City of Fremont--Alameda The proposed project consists of the development of 524,000 sf of commercial retail uses (Creekside Landing) and the extension of Fremont Boulevard and the San Francisco Bay Trail from Flood Channel B to Dixon Landing Road. The Creekside Landing retail center would feature two freestanding anchors and smaller inline and freestanding retail and restaurants. The retail center would include an internal roadway crossing of Scott Creek. The Fremont Boulevard extension would be four lanes and include two roadways crossing of waterways, one over Scott Creek and the other over Flood Channel B. The Bay Trail would be located on the west side of the roadway. The California State Lands Commission action is an issuance of a 20-year General Lease - Right of Way Use through February 20, 2034, for the installation, use, maintenance, and operation of a 12-inch sanitary sewer pipeline beneath the bed of Scott Creek.	NOD	
2012041030	Ocean Resources Enhancement and Hatchery Program (OREHP) Fish & Game Eastern Sierra-Inland Deserts Region -- The California Department of Fish and Wildlife administers the Ocean Resources Enhancement and Hatchery Program (OREHP), a program of basic and applied research into the artificial propagation, rearing, and stocking of important marine finfish species occurring in ocean waters off southern California. The OREHP currently focuses on White Sea bass rearing and release. Two grow out pens occupy sovereign land in Catalina Harbor, which is managed by the State Lands Commission, and therefore requires a lease. The State Lands Commission action is an amendment to the General Lease - Commercial Use to the Santa Catalina Island Company and the authorization of a sublease to the Hubbs Sea World Research Institute and Catalina Bass Fund for the grow out pens. The sublease term ends concurrently with the lease on December 21, 2021.	NOD	
2013101021	Alliance California Gateway South Building 3 San Bernardino, City of San Bernardino--San Bernardino The project consists of a Tentative Parcel Map (TPM 19487) (SUB13-07) and a Development Permit/Site Plan (DP-P13-09). TPM 19487 subdivides the 62.85-acre property into two (2) parcels and identifies the size and location water, sewer, drainage, and utility infrastructure improvements to serve the project. Parcel 1 of TPM 19487 comprises 13.20 acres, and will not be developed or physically disturbed by the project. Parcel 2 of TPM 19487 comprises 49.65 acres, and will be developed as an industrial warehouse project. Parcel 2 of TPM 19487.	NOD

2014028222	Residential Dock Replacement Newport Beach, City of Newport Beach--Orange The existing gangway and floating dock structure at 2782 Bayshore Drive have out-lived their useful life. The proposed gangway and dock system will require the replacement of five existing concrete piles (12"x12") with five new concrete piles (14"x14"). The dock covering material proposed for a significant area of the proposed dock surface is Global Grid Decking which allows light to penetrate the water surface and significantly reduce the effect of shading when compared to the existing dock and gangway system. The total coverage of the proposed floating dock and gangway, including the required piles, is 833.7 sq. ft. which is an approximate 8% increase over the existing gangway and dock structure, including piles. Previous surveys of the water area has revealed that there is no Eelgrass present on the site. No dredging is proposed at this time.	NOE	
2014028223	Aboveground Storage Tank Vapor Recovery System Retrofit Project at Robert B. Diemer Water Treatment Plant and Diamond Valley Lake Metropolitan Water District of Southern California Yorba Linda--Orange, Riverside Metropolitan proposes to retrofit two aboveground gasoline storage tanks (ASTs) at the Robert B. Diemer Water Treatment Plant (6,000-gallon tank) and Diamond Valley Lake (2,000-gallon tank) with an enhanced vapor recovery (EVR) system to comply with air quality regulations. The project involves installation of an emergency vent, spill container and drain valve, drop tube with overflow prevention, vapor adaptors and dust caps, product coupler, and port for tank gauging with drop tube and caps/adaptors on each AST.	NOE

2014028282	Pomponio Ranch Dam, No. 1601 Water Resources, Department of -- Raise of the dam crest by 1.2 feet to provide adequate residual freeboard during a 3,500-year storm.	NOE	
2014028283	Purchase and Sale Agreement for 185 Commerce Circle in Sacramento, California American River Flood Control District Sacramento--Sacramento ARFCD proposes to purchase the headquarters facility it has been leasing from Peter DeGregory and Jacqueline DeGregory since 1992. The facility consists of a single story building containing approximately 21,000 rentable square feet. ARFCD's current lease is scheduled to terminate on June 30, 2014.	NOE	
2014028284	Seal and Pave Roads and Parking Areas - 2014 - DWR Southern Field Division Water Resources, Department of Gorman, Palmdale, San Bernardino--Los Angeles, San Bernardino Repair and repave roads and parking lots by grinding and recycling existing worn pavement and/or repairing cracks, reapplying aggregate base and new asphalt chip seal coat, slurry seal coat or fog seal coat to primary and secondary roads along the California Aqueduct, including various parking areas and grounds around and near some pumping plants, power plants, and public use areas. This may include repainting traffic parking stripes. No currently undisturbed ground will be impacted and no sensitive species or their habitat will be affected. The repaved roads benefit DWR personnel and the people of California by providing safe, all-weather access for operations, maintenance, and public use of SWP facilities.	NOE	
2014028285	Emergency Permit for Treatment of Hazardous Waste, University of the Pacific Toxic Substances Control, Department of Stockton--San Joaquin The California DTSC has issued an emergency permit to University of the Pacific (UOP) to treat hazardous waste by chemical stabilization. It has been determined that the items are or may be highly reactive and must be stabilized prior to being transported offsite. The items are expired and current being stored inside a laboratory located on campus at UOP. The treatment of these items will be carried out by Clean Harbor Environmental Services and involves the addition of a solvent to the container to reduce the reactive characteristic of the chemicals. The treatment is scheduled to occur sometime between February 28th, and March 9th, 2014 in an exclusion zone set up near the location where the materials are stored. As UOP does not have a permit for treatment of hazardous waste, DTSC has determined that an emergency permit should be issued.	NOE

2014024001	Strawberry Creek Restoration National Park Service --Humboldt Note: Review per lead Restore 1600 feet of salmonid fish habitat through removal of invasive vegetation, excavation to create free-flowing stream channels and side channels, and placement of instream habitat structures; plant native vegetation to re-establish riparian canopy and stabilize stream banks; replace undersized culvert to improve fish passage; and remove unslope sediment sources to reduce erosion and sediment delivery into restored stream channel.	EA	03/28/2014
2014021064	Widening and Railing Replacements at Three Bridges Caltrans #6 Woodlake--Tulare Caltrans proposes to widen three existing bridges in rural Tulare County and replace their railings. Sand Creek Bridge (No. 46-0137) is on SR 201 (Avenue 400) at PM 12.48 at County Road 116, 1.8 miles southwest of the town of Cutler. The Friant-Kern Canal Bridge (No. 46-0065) is also located on SR 201 (Avenue 384) at PM 21.21, about 4 miles east of Seville. The Kaweah River Bridge (No. 46-0091) is located on SR 216 (Lomitas Drive) at PM 18.68, about half a mile northwest of Lemon Cove. The purpose of the project is to upgrade two bridges on SR 201 and one bridge on SR 216 to current Caltrans design standards for railings and lane and shoulder widths.	MND	03/27/2014
2014021065	Jean Drive Storm Drain Replacement San Diego, City of --San Diego The project involves the removal and abandonment of a failed 24-inch storm drain corrugated metal pipe (CMP), repair of extensive erosion around the failed pipe, and installation of a new 24-inch reinforced concrete pipe (RCP). Seventy-five feet of the failed 24-inch CMP would be slurry filled and abandoned, while 40 ft. of the CMP will be removed. The failed slope will be graded and filled using a combination of geogrid material (placed below the soil surface to provide structural integrity) and clean fill. The 200 ft. of new RCP would be installed approximately 100 to 150 ft. to the west and southwest of the failed CMP. The project also includes the removal of approximately 140 ft. of sidewalks and 25 ft. of curbs and gutters and the installation of 80 ft. of sidewalk and 45 ft. of curb and gutter. The new pipe would connect to the same inlet location as the failed CMP (at the north end of Miracle Drive), and then head west and discharge near the bottom of the canyon slope into an existing drainage channel. The new pipe would be placed below ground in an excavated trench, with cutoff walls spaced at approximately 15 foot intervals to stabilize the pipe within the hillside. A concrete energy dissipater structure and 9' x 8' of rip rap would be installed at the downstream end of the pipe to reduce discharge to non-erodible velocities. An approved erosion control revegetation plan addresses areas impacted by the project and the stabilization of the disturbed areas with native species appropriate to the surrounding areas. Staging for the project would be located within the street at the end of Miracle Drive. The project also includes a Traffic Control plan.	MND	03/27/2014

2014022059	Dredged Material Management Program - City of Alameda Alameda, City of Alameda--Alameda The primary objective of the project is to remove accumulated sediments from the lagoon system which has been causing the depth of surface water to decrease over the past few decades, potentially affecting the lagoon's water quality and wildlife habitats. The lagoon system is a component of a residential community and does not have a natural outflow. As a result, accumulating sediment and debris require removal through excavation and dredging. The City is now working with the Dredged Material Management Office (DMMO) to obtain the necessary approvals from state and federal agencies charged with ensuring water quality to begin dredging activities. Removal of these dredged materials and sediments will result in a positive impact to the water quality of the lagoons, as well as their habitat suitability for various wildlife species.	MND	03/27/2014
2014022060	Gwalani General Plan Amendment and Planned District Fremont, City of Fremont--Alameda The applicant is proposing to demolish an existing 1,850 sf single-family house and garage constructed in 1938, change the General Plan land use designation from Medium-Density Residential to General Commercial and change the zoning from Residential R-3-18 to a Preliminary and Precise Commercial Planned District for the purpose of developing a 5,200 sf one-story medical office building on a .46-acre lot. The subject property is located at the southwestern corner of the intersection of Mission Boulevard (CA-238) and Mowry Avenue (CA-84). Subsequent to property entitlement, a building permit would be required, and the applicant would be required to obtain encroachment permits from both the City of Fremont and the Caltrans for perimeter street improvements.	MND	03/27/2014
2014022064	UPE13-0082 Magic Mountain Mutual Water Company Sonoma County --Sonoma Request for a Use Permit for a new 140,000 gallon water storage tank for the Magic Mtn Property Owners Assoc on a 1.15 acre parcel. Project will include installation of new distribution pipes and fire hydrants.	MND	03/27/2014
2011031094	Fire Station 3 Site Acquisition and Construction Montecito Fire Protection District --Santa Barbara The proposed project would involve approval by the Montecito Fire Protection District Board of Directors of the acquisition of 2.56 acres and the construction of a new fire station and accessory structures totaling ~13,700 gross sf to improve emergency services to the Montecito area. Preliminary plans for the Station include construction of three buildings; a main station of 7,377 sf with apparatus bays, offices, and firefighter residential quarters; a support building of 3,445 sf with a hose drying tower of up to 35 feet in height, and an additional support building of 2,872 sf for carports and storage of reserve apparatus. Paved surfaces would occupy ~0.92 acres of the 2.56 acre site with landscaping covering ~1.3 acres, greater than half the site. Access would be available off East Valley Road via two driveways. 	Several buildings and structures are located in the southwest corner. These buildings make up a non-operational Pala Rey Youth camp and Retreat, which includes a kitchen/mess hall, chapel, swimming pool, and six dormitory cabins. The Pala Band's goals is to manage natural resources and to protect tribal sovereignty, self-determination, and to plan, implement and monitor viable ecosystem based on all tribal resources.		
2011031090	General Plan Update Industry, City of Industry--Los Angeles The proposed project is the update of the City's General Plan. The Industry General Plan Update would guide the growth and development (e.g., infill development, redevelopment, and revitalization/restoration) of the City 25 years or more into the future. The General Plan Update involves a revision to the current land use map and all elements except Housing. It would guide growth and development within the City by designating land uses in the proposed land use map and through implementation of the goals and policies of the General Plan Update. The General Plan Update consists of the following elements: Land Use, Circulation, Resource Management (previously Open Space, Historic and Cultural, City image, Scenic Highway, and Noise Elements), and Safety. Assuming a theoretical buildout (post 2035 scenario) of the land use plan, the City of Industry (including its Sphere of Influence) is projected to accommodate approximately 98,128,503 sf of employment uses, 11,877,163 sf of commercial uses, 238.9 acres dedicated to institutional purposes, 840.6 acres dedicated to recreation and open space, and 108,008 jobs.	EIR	04/14/2014
2012011001	Archer Forward: Campus Preservation and Improvement Plan Los Angeles, City of Los Angeles, City of--Los Angeles The Project consists of improvements to the existing Archer campus totaling 75,930 sf of net new floor area, including the replacement of the existing 30,071 sf North Wing of the Main Building with a 39,071 sf renovated North Wing, and the development of an approximately 41,400 sf Multipurpose Facility, a 22,600 sf Performing Arts Center, a 7,400 sf Visual Arts Center, and an Aquatics Center with a 2,300 sf support facility. The existing outdoor athletic fields would be improved and would include regulation-size soccer and softball fields. Parking would be provided in a new underground parking structure to accommodate approximately 212 cars. The two residences within the adjacent properties currently owned by Archer would be removed to accommodate the Project.	EIR	04/14/2014
2012082021	Commonwealth Corporate Center Project Menlo Park, City of Menlo Park--San Mateo The Sobrato Organization (Project Sponsor) would demolish the existing buildings, surface parking, and landscaping at the Project site. The Project would construct two four-story office buildings (approximately 129,960 sf each; 259,920 total) with surface parking and landscaping. The proposed buildings would provide flexible design for office, biotech, and/or research and development (R&D) uses with a capacity of approximately 1,300 employees. In order to develop the Project site to the desired height of 62 feet, the Project would require rezoning to the M-2(X) (Conditional Development Overlay) zoning district with corresponding Conditional Development Permit (CDP). 	be upsized to 8 inch pipes. After pipe replacement, existing laterals along the pipe alignment will be re-connected to the new pipe. Existing brike manholes will also be replaced with concrete manholes.		
2013012030	Pioneer Bluff Bridge West Sacramento, City of West Sacramento--Yolo Construction of a bridge connecting the existing two-lane South River Road on the north side of the barge canal to the South River Road on the south side of the barge canal. The project will provide a necessary alternative to north-south traffic and relieve congestion of Jefferson Boulevard. The bridge will include one 12-foot lane in each direction , one future 12-foot lane in each direction, a 2-foot raised median, shoulders, and two 6-foot walkways separated from traffic by a concrete barrier.	NOD	
	The Project will result in impacts to 0.01 acres of aquatic habitat. The project is expected to result in incidental take of longfin smelt (<i>Spirinchus Thaleichthys</i>), and Central Valley spring-run Chinook salmon (<i>Oncorhynchus tshawytscha</i>), which are designated as a threatened; as well as Delta smelt (<i>Hypomesus transpacificus</i>) and Sacramento River winter-run Chinook salmon (<i>Oncorhynchus tshawytscha</i>), which are designated as endangered under the California Endangered Species Act (CESA). The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.		
2013052051	King Road Safety Improvement Lane Widening Project Placer County --Placer To improve public safety by widening the existing road to provide standard lane widths and shoulders in each direction of travel. As part of the Project, the Applicant has requested to impact waters of the United States.	NOD	
2013121014	Groundwater Extraction Wells 94, 95 & 96 and Appurtenances Project Eastern Municipal Water District --Riverside EMWD intends to install up to seven ground water extraction wells in the Perris South, Perris North, and Lakeview/Hemet North Groundwater Management Zones, to generate additional potable water supplies, reduce brackish water migration and remove excess salts and nutrients from the basins.	NOD	
	Currently, Eastern proposes to install three ground water extraction Wells numbered 94, 95, and 96, associated appurtenances, and brackish water pipelines to connect each of the wells to existing brackish water pipelines.		
	Each extraction well would consist of 16 to 18-inch diameter well casing extending between 350 to 500-feet below ground surface. The wellhead facilities may include a well pump foundation, pump, and motor; a building housing electrical and chemical facilities, blowoff pond, discharge pipeline and appurtenances. The extraction well site perimeter would be secured by a chain link fence or a block wall as appropriate to the surrounding land use.

On February 11, 2014, the City Council introduced 1) Ordinance No. 2014-3 approving an amendment to the Zoning code expanding the boundaries of Planned Community District PC-9; and 2) Ordinance No. 2014-4 approving a Planned Community Development Plan establishing appropriate zoning regulations and development standards for the site. A Notice of Determination was filed on February 13, 2014, for the actions related to this project that were approved February 11, 2014. On February 25, 2014, the City Council adopted (1) Ordinance No. 2014-3 approving an amendment to the Zoning Code expanding the boundaries of Planned Community District PC-9; and 2) Ordinance No. 2014-4 approving a Planned Community Development Plan establishing appropriate zoning regulations and development standards for the site. Specific Project design and site development review approvals will be sought at a later time.</p>	NOD	
2013122035	<p>Auburn Municipal Airport Land Use Compatibility Plan (ALUCP) Placer County Auburn--Placer Note: Extended Review per lead</p> <p>The Auburn Municipal Airport Land Use Compatibility Plan (ALUCP) will replace the existing plan adopted in 2000. The proposed ALUCP is included as Appendix A to the IS. Preparation of compatibility plans for public-use airports is required by the State Aeronautics Act. The ALUCP is intended to promote compatibility between airport operations and surrounding land uses considering noise, safety, airspace protection and overflight effects. Neither the ALUCP nor the Airport Land Use Commission have authority over existing land uses or operation of airports; nor does the plan propose any future airport or land use development, or other physical changes to the environment. Based on the analysis performed, adoption and implementation of the ALUCP will not create a significant effect on the environment.</p>	NOD	
2013122036	<p>Blue Canyon Airport Land Use Compatibility Plan (ALUCP) Placer County Colfax--Placer Note: Extended Review</p> <p>The Blue Canyon Airport Land Use Compatibility Plan will replace the existing plan adopted in 2000. The proposed ALUCP is included as Appendix A to the IS. Preparation of compatibility plans for public-use airports is required by the State Aeronautics Act. The ALUCP is intended to promote compatibility between airport operations and surrounding land uses considering noise, safety, airspace protection and overflight effects. Neither the ALUCP nor the Airport Land Use Commission have authority over existing land uses or operation of airports; nor does the plan propose any future airport or land use development, or other physical changes to the environment. Based on the analysis performed, adoption and implementation of the ALUCP will not create a significant effect on the environment.</p>	NOD

2014011012	Housing Element 2013-2021 Hawthorne, City of Hawthorne--Los Angeles	NOD	02/05/2014
	<p>The 2013-2021 Housing Element identifies strategies and programs that focus on conserving and improving existing affordable housing; providing adequate sites for residential development; assisting in the provision of affordable housing; removing governmental and other constraints to housing development; and promoting equal housing opportunities in the City of Hawthorne.</p>		
2014011031	Sonshine Properties Proposition 84 Project Arvin Community Services District Arvin--Kern	NOD	
	<p>The project will involve a mainline extension from the existing ACSD system at Comanche Drive and Sunset Blvd to the Son Shine Properties Water System. This will be a 12-inch C900 PVC pipeline and be installed on the east side Comanche Drive for approximately 7,920 ft, then cross Comanche Drive westerly, and continue north on the west side of Comanche Drive for approximately 3,400 ft and include a cased road crossing at DiGiorgio Road. A 12-inch C900 PVC pipeline will branch to the west from this mainline extension and be installed along the northside of DiGiorgio Road to approximately 3,500 ft west of Comanche Road. This water system consolidation will include installation of new fire hydrants, gate valves, air release valves, and metered services along the PVC pipelines.</p>

2014028355	Laurel Canyon Canyon Boulevard Green Street Los Angeles, City of --Los Angeles The project consists of a number of landscapped infiltration swales (each of varying lengths, but with a total length of 850-feet) along the east side of Laurel Canyon Blvd., between Terra Bella St. and Kagel Canyon St. The landscapped infiltration swales will be constructed per the adopted City of Los Angeles Standard Plan #S-482-0 (Parkway Swales in Local/Collector Street). The Project will capture, treat, and infiltrate about 40 acre-feet of water per year (AFY), enough to serve 80 households annually. Area 2 - The project consist of the installation of a dry well located on Kagel Canyon St. adjacent to Interstate 5 (Golden State Freeway). The dry well is designed with dual chambers, one for stormwater capture and the other for stormwater infiltration.	NOE	
2014038015	Northstar Roundabout Modification Project Placer County --Placer The Northstar Drive Roundabout currently is located on Northstar Drive between State Route 267 and the Northstar Village. The Roundabout accommodates village traffic during winter ski season, as well as residential and commercial traffic accessing Big Springs Drive and Highlands View Road. Currently the Northstar Roundabout is unable to accommodate winter peak hour traffic due to high volumes. In addition, the roundabout cannot accommodate certain turning movements from the north leg entrance, and has points of conflict and path overlap, thus making proper movements within it problematic. The east leg approach has no deflection to slow entering traffic and direct it into the appropriate portion of the circulating lane. The Roundabout is therefore deficient in capacity and handling proper circulation. This will be accomplished by adding a second eastbound entry lane, eliminating a westbound entrance lane (2 to 1 lane) and adding a west to north bypass lane. The project will benefit winter peak ski traffic as well as residential and business traffic generated by area roadways, and is a project that has been requested to be completed by Northstar California, owned by Vail Resorts.	NOE
