

Jerry Brown, Governor

STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**
(Formerly SCH NEWSLETTER)

January 1 – 15, 2012

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **January 1 – 15, 2012**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Director

CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

USPS:

State Clearinghouse
P.O. Box 3044
Sacramento, CA 95812-3044

OR

USPS/Courier Service / Hand Deliveries:

State Clearinghouse
1400 Tenth Street, Room 1113
Sacramento, CA 95814

INFORMATION AVAILABLE ON-LINE

The 2011 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

Environmental Document Filings with the State Clearinghouse 1999-2011

All CEQA documents filed with the State Clearinghouse are available for viewing on the internet at www.ceqanet.ca.gov .

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<u>Documents Received on Tuesday, January 03, 2012</u>			
2012011002	Water Supply Project Lakeside Union School District Bakersfield--Kern The project consists of the construction of approximately 4-miles of 16-inch water pipeline along Old River Road from McCutchen Road to Shafter Road. Construction of the water pipeline will be kept within the designated right-of-way, which is developed with paved roads and graded shoulders. The water pipeline will connect to the City of Bakersfield's existing domestic water distribution network at Old River Road/McCutchen Road and will serve Lakeside School at Old River Road/Shafter Road.	MND	02/01/2012
2012011001	Archer Forward: Campus Preservation and Improvement Plan Los Angeles, City of Los Angeles, City of--Los Angeles The Project proposes the renovation, which may include some demolition, of office and classroom space in the existing North Wing of the Main Building. During this renovation, a Temporary Classroom village on the existing outdoor athletic fields would be installed. The Project also proposes to develop an approximately 41,400-square-foot Multipurpose Facility, an approximately 22,400-square-foot Performing Arts Center, an approximately 7,400-square-foot Visual Arts Center, and an approximately 2,300-square-foot Aquatics Center. The existing outdoor athletic fields would be improved and would include regulation-size soccer and softball fields. Parking is proposed in a new, approximately 96,000-square-foot underground parking structure to accommodate approximately 200 cars.	NOP	02/01/2012
2012012001	General Plan Amendment Implementing the Urban Design Plan Calistoga, City of Calistoga--Napa The City of Calistoga is proposing to amend the Land Use, Community identity and Circulation Elements of its 2003 General Plan to implement Chapter 2 (Character Areas) of the Calistoga Urban Design Plan. The UDP character areas will be incorporated into the Land Use Element of the General Plan as a new "overlay designation". The overlay designation would function as an intermediary land use control that supplements the underlying General Plan land use designation and furthers General Plan goals, objectives and policies. The proposed project does not involve any new construction and would not significantly alter the density or intensity of uses that are currently permitted under the City's General Plan and/or Zoning Ordinance.	Neg	02/01/2012
2002022027	South Stockton 6-Lane Caltrans #6 Stockton--San Joaquin The California Department of Fish and Game is executing Lake or Streambed Alteration Agreement number 1600-2011-0175-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, California Department of Transportation (Caltrans). 2012018004	Snipes Pershing Ravine Trail Project Fish & Game #2 --Sacramento The project is limited to the installation of a pedestrian foot bridge spanning an unnamed tributary flowing into Lake Natoma within the Folsom State Recreation Area.	NOE	
2012018005	SJSU Spartan Complex Seismic Upgrade Project California State University Trustees San Jose--Santa Clara The project consists of two new facilities on the SJSU campus. The first new facility is a proposed 200 seat lecture hall attached to the north side of the Uchida Annex building. This facility would consist of a 3,075 square foot lecture room area and 2,824 SF lobby and storage room. The second new facility is a proposed 760 SF lobby area that would create a new entrance at the south side of the SPX Central building.	NOE	
2012018006	Common Landowne Transfer of up to 4,000 a.f. of TLBWSD 2012 State Water Project Water to Westlands Water District Tulare Lake Basin Water Storage District Corcoran--Kings The Tulare Lake Basin Water Storage District will transfer up to 4,000 a.f. of its 2012 State Water Project water to Westlands Water District for Westlake Farms who farms in both districts. The transfer will be completed by December 31, 2012. This proposed transfer is designed to enable Westlake Farms to better manage their respective water supplies. No lands will be fallowed as a result of the transfer and no additional groundwater will be pumped. The lands have been actively farmed in the past.	NOE	
2012018007	Install Entrance Gates Parks and Recreation, Department of --Humboldt Install one double 20' metal gate at the Grizzly Creek Campground entrance and a single 20' metal gate at the Cheatham Grove Day Use Area in Grizzly Creek Redwoods State Park to close the parking areas for emergencies and to protect facilities and resources. Work will excavate six, 3' diameter 4' deep hole with an excavator to install 2.5" diameter and 4" diameter gate pipes. No work will occur between September 16th and January 31st if heavy equipment is used to dig the holes. No roots greater than 2 inches will be damaged or severed. Spoils from the gate installation earthwork will be located at least 50 feet from any watercourse, and spread and covered with native duff or similar native materials. A containment barrier will be in place if concrete is mixed within 50 feet of a watercourse.	NOE	
2012018008	Richardson Grove Lodge Restroom Removal Parks and Recreation, Department of --Humboldt Remove the Richardson Grove Lodge Restroom facility in Richardson Grove Redwoods State Park to enhance the integrity of the historic lodge. Work will use heavy equipment to break up and remove the concrete foundation, excavate approximately 12" deep by 20' wide and 30' long. Work will be conducted between September 16th and January 31st. Material produced from the removal will be temporarily stored on top of existing asphalt surfaces to prevent impact to native soils and vegetation. Final disposal of the demolished material will be at an approved site.	NOE

2012018009	Install Entrance Gates Parks and Recreation, Department of -- Install a 20' metal gate at Holbrook Grove and a 15' metal gate at the "Marshall Gate" area within John B. DeWitt State Natural Reserve to allow park staff to close the parking area for emergencies and to protect facilities and resources. Work will excavate three, 3' diameter by 4' deep holes with an excavator and two by hand to install 2.5" diameter and 4" diameter gate pipe; approximately ten, 18" x 18" x 3' holes 4' apart to install wood or concrete bollards at The Marshall Gate. All gate will be installed between July 11 and January 31st. No roots greater than 2 inches will be damaged or severed. Spoils from the gate installation earthwork will be located at least 50 feet from any watercourse, and spread and covered with native duff or similar native materials. A containment barrier will be in place if concrete is mixed within 50 feet of a watercourse.	NOE					
2012018011	Himalayan Blackberry Removal and Native Species Vegetation Parks and Recreation, Department of --Shasta Remove Himalayan Blackberry plants from approximately 1.25 acres of land and replace non-native invasive species with native species seedings of a local provenance near Lake Britton in McArthur Burney Falls Memorial State Park to regain the native habitat. Work will mechanically remove the Himalayan Blackberry Plants with an archeological monitor present. Work will excavate up to 10 inches deep to plant the seedings, the seedings will be planted with physical protection. Nonnative resprouts will be sprayed with glyphosate in September - December and a 1% glyphosate + .5% Triclopyr in January - August by a qualified applicator. All ground disturbing activities will be monitored by an archeologist.	NOE					
2012018012	Chiriaco Summit Water System Improvements Planning Project Chiriaco Summit County Water District --Riverside The Project consists of conducting a land survey, preliminary design of water system improvements, a biological resources assessment, California Environmental Quality Act and National Environmental Policy Act compliance (i.e. preparation of required documents, coordination with federal lead agency), final design of water system improvements (including preparation of final plans and specifications), and preparation of a Technical Managerial, and Financial (TMF) Assessment. 	<p>construction of a 7,200-square-foot meditation and community center. As proposed, the center will contain the following amenities: a meeting hall, a multipurpose room that will occasionally be used as a dormitory space, and four rooms for housing individual students for overnight stays for small meditation retreats. The center will include a kitchenette for tea and coffee service, and two large restrooms with showering facilities.</p>		
2012012003	<p>Parks and Trails Master Plan El Dorado County Placerville--El Dorado</p> <p>The EDC Parks and Trails Master Plan includes the entire west slope of El Dorado County outside the jurisdiction of other entities providing similar parks and trails resources. The Plan provides direction and implementation strategies to guide the acquisition, development, and operation of County-owned parks and trails in the Plan Area. Goals and policies are set forth as guidance toward how the overall system of parks and trails will be developed and managed to best reflect the priorities and needs of the current and future population of El Dorado County. This Master does not provide detailed planning or design for individual park or trail resources. That will occur on a site specific basis as projects come forward in the future.</p>	MND	02/02/2012
2012012004	<p>Roseville Road Bridge Replacement Project Sacramento, City of Sacramento--Sacramento</p> <p>The proposed project would replace the two-lane bridge on Roseville Road over Arcade Creek with a new bridge that meets current design standards and is compatible with future improvements. The project would also include the addition of shoulders and sidewalks to the new bridge to accommodate existing and future bicycle traffic, and improvements to the road approaches on both sides of the bridge.</p>	MND	02/03/2012
2012011004	<p>Removal Action Workplan, Los Alamitos Elementary School - Railroad Easement Toxic Substances Control, Department of Los Alamitos--Orange</p> <p>The Department of Toxic Substances Control (DTSC) is proposing to approve a Removal Action Workplan (RAW) for the Los Alamitos Elementary School - Railroad Easement site (Site) pursuant to authority granted under Chapter 6.8, Division 20, California Health & Safety Code. The objective of this Removal Action is to prevent potential exposure due to arsenic-impacted soil by removing arsenic-impacted soil located in a former railroad track easement. The Site was paved into its current condition as a parking lot for the Los Alamitos Elementary School; a small portion of the Site is unpaved but fenced and covered with plastic tarp and sandbags. The RAW focuses on the following activities: 1) excavate and transport approximately 3,832 cubic yards of arsenic-impacted soil to a licensed disposal facility via trucks; 2) import, place, and compact backfill materials; and 3) restore the project area a paved parking lot. A Draft RAW to address arsenic-impacted areas was approved for public review and comment on September 19, 2005; and, a Notice of Exemption (NOE) pursuant to the California Environmental Quality Act (CEQA) was prepared. However, the Draft RAW was not released for public review and comment, and the NOW was not filed. In 2007, DTSC was notified that Orange County Department of Education was terminating work on the project. In 2011, the Los Alamitos Unified School District was approved to use federal funds to implement the final RAW. To use such funds, DTSC determined that a more thorough analysis of potential environmental</p>	Neg	02/02/2012

	impacts due to this project is necessary via this Initial Study as an element of CEQA. RAW activities are anticipated to commence in Summer 2012 when the Los Alamitos Elementary School is not in session and be completed in approximately three weeks.		
2012012002	Minor Subdivision Application (Ruiz Homesite Parcel) San Joaquin County Ripon--San Joaquin Minor subdivision application to subdivide an existing 50.84 acre parcel into two parcels. Parcel one 2.98 acres (Homesite parcel) and a 47.85 designated remainder. The parcel is not under a Williamson act contract. The parcel is located ½ mile west of the intersection of Bird Road and Lehman Road, on the south side of Lehman Road. (Southeast of Tracy).	Neg	02/02/2012
2003091108	Non-Potable Water Distribution System Yucaipa Valley Water District Yucaipa, Calimesa--San Bernardino The Project will provide an estimated 3,311 acre-feet per year of Title 22 recycled water by the year 2020, and comply with the requirements of the Waste Discharge Requirements that include stringent water quality objectives for total dissolved solids and nitrogen. The Project will also help meet existing and planned water demands by maximizing recycled water use and reduce reliance on groundwater and State Water Project. The Project will involve: 1) constructing approximately 5,900 linear feet of 24-inch recycled water distribution pipeline and appurtenances, two one million gallon non-potable steel water reservoirs, and two booster pump stations; 2) installing a 2.5 million gallon per day reverse osmosis (RO) treatment system, an instrumentation and control system, and power supply and distribution facilities; 3) relocating or demolishing buildings, as needed, and 4) conducting site preparation, access and security improvements. The RO treatment system will be constructed in an enclosed building (80-feet by 225-feet), which will house the feeder pumps, cartridge filters, pressure vessels valves and instrumentation.	NOD	
2011101028	Scripps Institution of Oceanography (SIO) Research Support Facilities University of California, San Diego La Jolla--San Diego The proposed Scripps Institution of Oceanography (SIO) Research Support Facilities project would consist of construction of interior and exterior research support space, including three prefabricated metal buildings totaling approximately 24,500 gross square-feet (GSF) on a 5.7 acre site. The three prefabricated buildings include Building A (9,800 GSF), Building B (8,500 GSF), and Building C (6,200 GSF). These buildings would replace a number of existing dilapidated storage structures within Seaweed Canyon and provide additional upgraded research support space for the SIO campus. Three of the existing on-site buildings (Seaweed Canyon Warehouse, Building T-45 and Building T-46) would remain in place and in some cases undergo an interior remodel. The outdoor paved areas would function as storage space for equipment and exterior work areas, allowing loading and unloading of research equipment and allowing access for trucks, firefighting apparatus, and tractors/trailers. Existing utilities within the footprint of the project site would be realigned to better serve the layout of the new buildings.	NOD

2012018017 Amendment to extend the terms of Kern County Water Agency (KCWA) pumpin of non-project water into the Californi Aqueduct
Water Resources, Department of
--Kern
Amendment (SWPAO #07035-A) amends the Letter Agreeemnet executed on May 29, 2009, among the California State Department of Water Resources (DWR and KCWA (SWPAO #07035) to temporarily store water in San Luis in exchange for KCWA pumping in non-project water into the California Aqueduct from KCWA's turnouts. This Amendment extends the term of the agreement through December 21, 2015.

2012018018 DIGiorgio/Son Shine Water System Consolidation Project
Arvin Community Services District
Arvin--Kern
Nature: Test well construction and design of water system improvments for water well, storage tank, transmission and distribution system improvements.

Purpose: To provide adequate, clean water supply and meet Federal and State Safe Drinking Water Standards for the DIGiorgio area.

Beneficiaries: The DIGiorgio area residents and users will benefit from the Project and the design of new water supply and system to replace Nitrate & DBCP contaminated well, provide adequate clean water supply, storage and other water system improvements.

2005112051 Bay Area to Central Valley High-Speed Train Partially Revised Draft Program EIR
High Speed Rail Authority, California
--Merced, Santa Clara, San Francisco, San Mateo, Stanislaus, ...
The Authority is revising and recirculating portions of its 2010 Revised Final Program EIR to address the Atherton November 2011 court ruling described above. The requirement to revise and recirculate portions of the program EIR does not require the Authority to start the program EIR process anew. (Protect the Historic Amador Waterways v. Amador Water Agency [2004] 116 Cal.App.4th 1099, 1112.) Recirculation of the EIR "may be limited by the scope of the revisions required." (Vineyard Area Citizens for Responsible Growth v. City of Rancho Cordova [2007] 40 Cal.4th 412, 449.) Where the scope of revisions is limited to certain chapters or portions of the EIR, a lead agency need only recirculate the chapters or portions that have been modified. (Id.; citing CEQA Guidelines, S 15088.5, subd. (c).)

2009011058 Boat Central
Los Angeles County
Los Angeles, City of--Los Angeles
Note: 60 day Review

The proposed project involves the development of a dry stack boat storage facility on Parcels 52 and GG in Marina del Rey. The storage structure will accommodate a maximum of 345 boats and 28 boat trailers and an outdoor area for 30 mast-up

	sailboats. The project will also include a two-story office and customer lounge and a Sheriff's Boatwright office and repair facility, as well as a public promenade and view park. Due to the topography, the structure will range in height from 67 to 75 feet. The gantry crane and protective covering will range from 73.5 feet to 81.5 feet in height. The boat storage structure will extend over the water by approximately 45 feet on the eastern side and approximately 97 feet on the western side.		
2010012059	Candlestick Point State Recreation Area General Plan Parks and Recreation, Department of San Francisco--San Francisco Candlestick Point State Recreation Area (CPSRA, or the park) is located in the City and County of San Francisco along the southeastern waterfront, adjacent to San Francisco Bay. It occupies 151 acres within San Francisco's Bayview Hunters Point neighborhood, and is surrounded by industrial uses, residential uses, and Candlestick Park stadium. As CA's first urban state park, CPSRA provides access to open space, the Bay, and recreational opportunities in highly urbanized and industrial area of San Francisco.	EIR	02/21/2012
2012011005	Long Beach Police Department Tunnel Project Long Beach, City of Long Beach--Los Angeles The proposed Long Beach Police Department Tunnel project would provide an in-custody transfer tunnel capable of moving in-custody pedestrians between the existing Long Beach police Department (400 W. Broadway) and the new State Courthouse (George Deukmejian Courthouse, 505 W. Broadway) currently under construction. An existing in-custody pedestrian transfer tunnel connects the Police Department with the existing State Courthouse located south of the Police Department building. However, this existing tunnel connects the Police Department with the existing State Courthouse located south of the Police Department building. However, this existing tunnel will no longer be used when the State Courthouse changes locations in August of 2013 (the anticipated date that the new State Courthouse would be operational). The proposed tunnel would be constructed of materials similar to the existing tunnel with concrete painted walls, concrete floor, safety lighting and ventilation, and security call boxes and security doors at each end. The proposed tunnel connection between the new State Courthouse (located at the northwest corner of the magnolia Avenue/Broadway intersection) and the Long Beach Police Department (located at the southeast corner of the Magnolia Avenue/Broadway intersection) would be approximately 500 feet in length and would cross under portions of Magnolia Avenue and Broadway.	MND	02/08/2012
2012011006	Star Ranch Specific Plan San Diego County --San Diego The proposed project consists of 453 residential units and 9.9 acres of commercial space on an existing cattle ranch consisting of ~2,161 acres. The proposed commercial area would be located around an existing commercial area near Cameron Comers. The proposed project also includes the dedication of biological open space, recreational parks and multi-use trails. The proposed project would retain cattle ranching operations on portions of the project site. Water and wastewater service would be provided by on-site wells and an on-site wastewater treatment plant.	NOP	02/03/2012

2012011011	Villanueva Monterey County --Monterey Minor Subdivision tentative map to allow the division of a 160 acre parcel into four 40-acre parcels. The property is located at 50403 Martinez Road, Lockwood (APN: 423-041-018-000), South County Area Plan.	MND	02/07/2012
2012012014	Eagle Peak Rock & Paving Inv. / Kiewit Infrastructure West Co. Asphalt Batch Plant Public Health, Department of Edgewood--Siskiyou Request to construct and operate a permanent asphalt concrete batch plant to be located within an approximate 12.7 acre portion of a 16.85 acre parcel. The plant is proposed to be operational between the hours of 6 am and 8 pm, Monday through Friday and possible weekends from 8 am to 6 pm, typically from May 1st through November 1st. Night time operations would be limited to specific public works projects and emergency situations. It is anticipated that a yearly average of up to 50,000 tons of material would be produced. Production would be up to a maximum of 150,000 tons during a three-year period. The project site is located at 23026 Edgewood Road southeast of the Weed Airport, Edgewood, CA.	MND	02/07/2012
1991123081	WatsonvilleVISTA 2030 Supplemental EIR (General Plan Update) Watsonville, City of Watsonville--Santa Cruz The Revised WatsonvilleVISTA 2030 General Plan will replace the Watsonville 2005 General Plan. The original WatsonvilleVISTA 2030 General Plan was prepared to accommodate 5,700 new households and 7,500 new jobs for a total city population of 70,418 residents and 33,635 jobs by the end of the planning period (~2030). This growth would be accommodated through the strategy of infill development in existing urban areas and development on vacant land located within the urban limit line. The Revised WatsonvilleVISTA 2030 General plan will be modified to address the issues raised by the Court. These include, but are not limited to: 1) Modifying the Land Use Plan to reestablish and enhance safety zones around the Watsonville Airport, and integrating the elements of the Caltrans Airport Land Use Planning Handbook into the General Plan 2) Addressing regional transportation issues which will require coordination with other regional agencies, including analyzing cumulative impacts along Highway One 3) Incorporating goals and policies regarding greenhouse gas emissions (consistent with new CA State regulatory requirements). Repair of the roadway over the culverts will require 125 cubic yards of imported borrow material, with an additional 50 cubic yards of rock slope protection. The proposed project is within the Agriculture Land Use Category in the South County Inland planning area, Fourth Supervisorial district.	Neg	02/08/2012
2011121091	ZA-2011-2464-ZV, ENV-2008-2453-MND-REC1 Los Angeles, City of Los Angeles, City of--Los Angeles Note: Resubmitted Per Lead The construction, use and maintenance of a new six-story, 90-foot tall, approximately 146,112 s.f. mixed use building containing 131 apartment units over 12,148 s.f. of ground-level commercial (2,000 s.f. restaurant, 2,914 s.f. office, 7,234 s.f. retail) with ground-level and three levels of existing subterranean parking containing a minimum of 191 spaces, all on an approximately 39,103 s.f. lot. Vehicle ingress/egress is via a single new/relocated driveway accessing Dunn Drive. In consideration of reserving 11 units for very low-income tenants, a Density Bonus incentive to permit a 35 percent increase in the floor area ratio (FAR), 4.05:1 in lieu of 3.0:1, is requested. Also proposed are: a Zone Change from C2-1, CR-1, and R5P-1 to (T)(Q)RAS4-1; a Zone Variance from parking facility design standards to accommodate continued use of the existing subterranean parking levels; and Site Plan Review for the development of 131 new residential units.	Neg	02/07/2012
2012011013	DIR-2011-3197-SPR-DB, ENV-2011-2967-MND Los Angeles, City of --Los Angeles The construction of a new senior housing project on a 33,759 s.f. lot in the C2-1 Zone. The project will consist of a four-story (approximately 53 feet in height), 75,525 s.f., apartment building, with 81 senior affordable units located above one at-grade parking garage containing 43 parking spaces. The project is in request of the following entitlements: 1) Site Plan Review to promote the orderly development of the proposed 81 senior affordable units in the C2-1 Zone; and 2) A Density Bonus incentive to permit 75,525 s.f. of floor area, equally a Floor Area Ratio (FAR) of 2.24:1 in lieu of the 1.5:1 (FAR) permitted in the C2-1 Zone, where a 3:1 FAR is allowed for density bonus projects in Height District 1 when fronting on a major highway and when located within 1,500 feet of a transit stop. 2012012022	<p>Chili Bar Hydroelectric Project, FERC Project No. 2155 State Water Resources Control Board Placerville--El Dorado</p> <p>The proposed project is issuance of water quality certification for the Federal Energy Regulatory Commission (FERC) relicensing of the existing Chili Bar Hydroelectric Project (Project), which began operation in 1965 and has been operating since the pursuant to its existing project license. Chili Bar is located on the South Fork of the American River immediately downstream of the Sacramento Municipal Utility District's (SMUD's) Upper American River Project, near Placerville. The Chili Bar Project facilities consist of: (1) a concrete gravity dam that is 126 feet high and 380 feet long with a dam spillway that is 170 feet long with a crest elevation of 997.5 feet NGVD located 31 feet below the crest of the dam; (2) a reservoir with a surface area of 110 acres and a useable storage capacity of 1,339 acre-feet at a normal operating minimum elevation of 984 feet NGVD; and (3) a powerhouse that is 80 s.f. containing a single turbine unit with a normal maximum gross head of 60 feet, a maximum hydraulic capacity of 1,979 cubic feet per second, and an installed capacity of seven megawatts. There is no project transmission line because the 21-kilovolt switchyard connects directly to the local distribution grid.</p>	Neg	02/09/2012
2012012023	<p>Rebuilding the Crew Room Quarters Building at the Caltrans West Sacramento Maintenance Facility Caltrans #3 West Sacramento--Yolo</p> <p>Caltrans proposes to rebuild a new "crew room" building for maintenance crew personnel at the Caltrans West Sacramento Maintenance Facility. The project will construct a new crew building parallel and to the east of the existing equipment building in the maintenance yard, where a portable trailer structure currently exists. The Maintenance facility is located near the intersection of South River Road and Tower Street, underneath U.S. Highway 50 (U.S. 50). The current maintenance crew room building is a small, sparse portable building that lacks adequate space, as well as an adequate heating, ventilation, and cooling (HVAC) system for the maintenance employees. The purpose of the project is provide an adequate crew quarters building for the employees, and to build a structure that meets current building code standards.</p>	Neg	02/10/2012

2009021009	California Valley Solar Ranch & Twisselman Conditional Use Permits (DRC2008-00097, DRC2009-00004) San Luis Obispo County San Luis Obispo--San Luis Obispo The Project as approved by the Lead Agency will alter the existing topography during grading for aggregate extraction. Project components that will occur in the California Department of Fish and Game ("CDFG") jurisdictional area include filling 65.5 square feet (23 linear feet) of a streambed.	NOD	
2011081078	Kern River Mountain Pass Lateral Project San Bernardino County --San Bernardino CDFG is executing a Lake and Streambed Alteration Agreement (SAA # 1600-2011-0042-R6) pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Kern River Transmission Company, represented by Mr. Doug Gibbons, 2755 E Cottonwood Parkway, Salt Lake City, Utah, 84121. The Applicant is proposing to construct and operate a new lateral pipeline to supply natural gas for the Molycorp site. The Project includes approximately 8.60 miles of 8-inch-diameter pipeline, a new tap and pig launcher will be constructed within and immediately adjacent to Kern River's right-of-way (ROW), and a new meter station and pig receiver will be constructed within the Molycorp site. The project will impact 16.34 acres of desert wash.	NOD	
2012018056	Georgia - Pacific Chemicals (Project EG - 12- 001) Elk Grove, City of Elk Grove--Sacramento The project consists of a grading permit for the removal of approximately 1,740 cubic yards of contaminated soil and material from a 10-acre portion of the 22.5-acre site before the rainy season begins and the contamination has a pathway to migrate. The remedial goals of this action are to protect ground and surface water and human health. The contaminants of concern are lead, phenol, total petroleum hydrocarbons and volatile organic compounds. The action will include excavating the contaminated soil, stock piling and characterizing the soil and then trucking to an appropriate landfill. Project activities will commence on January 6, 2012 and are expected to take approximately five weeks.	NOE	
2012018057	Elk Grove Boulevard/SR 99 Interchange Variance and Minor Deviation - EG-11-048 Elk Grove, City of Elk Grove--Sacramento This Variance and Minor Deviation request is related to the upcoming Elk Grove Boulevard / State Route 99 off ramp reconfiguration project. The interchange modification would alter the existing geometry of the off ramp from Highway 99 onto East Stockton Boulevard, and it would add a northbound onramp to Highway 99 from East Stockton Boulevard. These changes require relocating the entrance of the driveway to the adjacent shopping center. The relocated entry at the shopping center consists of a result of this relocation and reconfiguration; the preliminary improvement plans identify a net loss of two parking spaces with a potential loss of five parking spaces. The ultimate improvement plan will precisely identify the number of parking spaces to be removed. According to staff, this number will not exceed five existing landscape planter adjacent to East Stockton Boulevard whose width is less than the City's standard of 25-feet. Accordingly, the applicant has requested a Minor Deviation to the parking standards and a Variance from the minimum landscape requirements. The Minor Deviation and	NOE

2010071064	Escondido General Plan Update, Downtown Specific Plan Update & Climate Action Plan Escondido, City of San Diego--San Diego The City of Escondido is the Lead Agency for the preparation of a Program EIR, as defined in Section 15168 of the CEQA Guidelines, addressing the Escondido General Plan Update, Downtown Specific Plan Update and Climate Action Plan. A summary of each of these project components is provided below.	EIR	02/27/2012
2010111062	Bergamot Transit Village Center Santa Monica, City of Santa Monica--Los Angeles The project would require the removal of the approximately 206,000 sf of vacant industrial and office buildings, surface parking areas, and limited vegetation currently located on the project site. The project would result in the construction of approximately 766,094 sf of building area within 5 mixed-used buildings that would include 494,927 sf of creative office, 30,395 sf of retail, 16,500 sf restaurant, and 325 residential dwelling units (224,272 sf). The project would also include approximately 1,800 parking spaces within 3 levels of subterranean parking and 83,978 sf (1.93 acres) of ground floor recreational open space. Additionally, two new north/south streets in the western and eastern portions of the project site and a new east/west extension of Nebraska Ave along the northern edge of the project site would be constructed.	EIR	02/27/2012
2010121032	Lakeview Substation Project Public Utilities Commission --Riverside Southern California Edison proposes to construct a new 115/12kV substation (Lakeview substation) and related facilities, including 2 new 115kV subtransmission source line segments to connect the proposed substation to the existing Valley-Moval 115kV subtransmission line; construction of 2 new underground 12 kV distribution getaways; installation of telecommunications facilities (i.e., telecommunication cable) to connect the proposed substation to SCE's telecommunications network, upgrades to the telecommunications equipment at various substations; and decommissioning of 2 existing substations: Nuevo and Model Pole Top.	EIR	02/27/2012
2008012067	Waste Discharge Requirements for the South Shore Fuel Reduction and Healthy Forest Restoration Project Regional Water Quality Control Board, Region 6 (Lahontan), South Lake Tahoe South Lake Tahoe--El Dorado The project will reduce the risk of high intensity wildfire & restoration of healthy forest conditions on National Forest Lands in the urban wildland intermix (WUI) in order to provide a defense zone between the Forest and urban and/or suburban development. The project area extends from the SE shore of Cascade Lake eastward to the States of California and Nevada border and extending from the south shore of Lake Tahoe southward to include the CA State Highway 89 corridor. Reduction of hazardous fuels will be accomplished by thinning to remove ladder fuels and reduce over-crowding, removal of excessive fuels on the ground, and prescribed burning. Restoration of healthy forest conditions will be accomplished by removal of conifer encroachment from meadows and aspen stands, retention of Jeffrey and Sugar Pine species, and thinning to improve resistance to crown fire, drought, insects, and disease. The facility is presently operated as recreational vehicle storage, agricultural vehicle storage, agricultural vehicle repair, mini sotrage and office buildings.	NOE	
2012018080	American River Commons Features WRDA 96 Remaining Sites, Site L5A Geotechnical Explorations Central Valley Flood Protection Board Sacramento--Sacramento The USACE will be conducting potholing to locate a cement pad that exists within the levee. Approximately 10-15 diameter potholes will be excavated to a depth of 12 feet using a vacuum truck. The excavations will be backfilled with a cement-sand slurry in compliance with Sacramento County Environmental Health Department guidelines. The site will be accessed from existing ramps and roads. The potholes will be excavated on the levee crown and waterside and landside of the levee. No in-water work will be required and all work will take place during daylight hours. Work will occur in January and February with all work being completed by February 15.	NOE	
2012018081	Minor Alterations - Construction of Guard Office Energy Commission Sacramento--Sacramento The project proposes to construct a secure hard walled office approximately 10' by 16' with a storefront style window, on the first floor of the Energy Commission Building.	NOE	
2012018082	Campsite Realignment and Utilities Upgrade Sites 131 - 152/206-222 (11/12-SD-21) Parks and Recreation, Department of --San Diego Realign campsites to create two new sites to be available for a trailer rental concession contract. Install peeler pole or temporary fencing. Upgrade the utilities including electric, water and sewer. Grade the park frontage road within the project area. Remove all non-native vegetation, lay irrigation line and plant native plants.	NOE

Bureau of Indian Affairs --Riverside In addition to utilizing the facilities that were present when the Tribe acquired the Subject Property, the land would be used for a gaming and hotel project, which would include a new casino facility, 300 room hotel, four restaurants, four retail establishments, events center, convention space, and spa and fitness center. The other proposed developments will not be attached to the hotel/casino facility and include a Tribal fire and police station, 12-pump gas station and convenience store, and 1.2+ million gallon wastewater treatment plant and supporting facilities. The remaining acreage would remain in its current state, which is an existing golf course (156.36 acres), new club house development, open space, and maintenance facility. Access to the proposed hotel/casino would be via Lake Park Drive and Soboba Road. The proposed hotel/casino complex would be generally located at the intersection of Soboba Road and Lake Park Drive and abut the existing golf course. Lake Park Drive may or may not be realigned as part of the proposed Action contingent upon ongoing geo-technical assessments and consultation with the City of San Jacinto. Not knowing what determinations will be arrived at, the Tribe is presently considering two conceptual site plans. The magnitude and composition of proposed facilities are very similar in each site plan with the greatest difference being the realignment of Lake Park Drive. Regardless of which scenario is pursued, the proposed gas station and Tribal fire station would be on the southern side of the present Lake Park Drive.</p>	BIA	02/13/2012

2012011060	Balboa Terrace Trunk Sewer San Diego, City of --San Diego Site Development Permit (SDP) to allow for the replacement and/or re-alignment of ~5,031 linear feet (LF) or (0.95 miles) of sewer main pipelines. Existing 8-inch to 18-inch vitrified clay sewer pipes would be replaced with 8-inch and 21-inch polyvinyl chloride (PVC) pipe and centrifugally cast-fiberglass reinforced-polymer mortar (CCFRPM) pipe. Approximately 4,431 LF of the sewer pipelines would be located in new trench alignment at ~7 to 51 feet deep and 600 LF of sewer pipe would be in the same trench at a shallower depth of 12 to 21 feet deep. Approximately 3,373 LF of pipe installation work would be performed by conventional excavation (open trench) method, and 1,662 LF of pipe installation would be performed by tunneling method.	MND	02/13/2012
2012012029	Westside Grapes, LLC (PLP10-0009) Sonoma County Healdsburg--Sonoma Request for a Use Permit to allow for the expansion of Hop Kiln Winery including an increase in production capacity from 20,800 to 60,000 cases per year with construction of new buildings, public tasting seven days a week, 61 special events, use of existing buildings for marketing accommodations and wine storage, and participation in industry-wide events.	MND	02/13/2012
2012012030	Tahoe Vista Recreation Area Accessory Parking North Tahoe Public Utility District --Placer The proposed project will construct a parking lot for boating vehicles, trailers and automobiles for visitors of the Tahoe Vista Recreation Area (TVRA). This project will include the addition of parking (24 vehicle with trailer pull through spaces and 41 vehicle spaces), parking management and fee collection facilities, paved walking/bike trails, a bus pullout and transportation shelter, landscaping, and storm water BMP's. The 3.5 acre site is currently a wooded vacant parcel owned by the NTPUD.	MND	02/13/2012
2012012031	Denman Reach Phase 3 Petaluma, City of Petaluma--Sonoma The project includes the acquisition of one to three parcels along the east bank of the Petaluma River within the lower Denman Reach. The proposed project will extend the existing terracing project upstream, northward, increase channel capacity by grading to lower the top-of-bank surface approximately 4 to 6 feet in a zone extending from approximately 75 to as much as 150 feet wide along the river. This project will continue to reconnect the river with its historic floodplain in this area. This will provide flood impact reduction, water quality improvements, and aquatic and terrestrial habitat benefits. Components of the flood terrace excavation will include creation and or restoration of riparian habitat buffer zones, seasonal wetlands, and shallow surface water filtering swales (biowales). In addition to floodplain restoration, the project will include public access.	MND	02/13/2012

2012018091	Adoption of Revisions to the Energy Efficiency and Conservation Block Grant Program Guidelines Energy Commission Sacramento--Sacramento The purpose of this activity is to revise guidelines previously adopted by the California Energy Commission to govern the administration of its Energy Efficiency and Conservation Block Grant Program (EECBG) pursuant to Public Resources Code Sections 25450 - 25450.5. The guidelines describe how the Energy Commission will implement its EECBG and identify available funding, eligibility criteria, the evaluation and award process, and other requirements to qualify for funding under the program. The guidelines were revised to clarify that remaining EECBG funds may be awarded through other grant programs, such as subsequent phases of the EECBG, and that a recipient's award under the EECBG will not affect its eligibility under any such grant programs.	NOE	
2012018092	B Street Pier Cruise Ship Terminal Electrical Upgrades San Diego Unified Port District San Diego--San Diego The project is upgrades to the existing electrical system at the B Street Cruise Ship Terminal. The project includes the following work: removal and replacement of existing lighting inside Sections A and C of the cruise ship terminal building; installation of new 208-volt, 1-phase panelboards; and installation of interior conduit and wiring to provide power for rollup doors.	NOE	
2012018093	B Street Pier Cruise Ship Terminal Replacement of Roll-up Doors and Security Grills San Diego Unified Port District San Diego--San Diego The B Street Cruise Ship Terminal is divided into three main compartments wherein various functions and activities currently occur; Compartment A (baggage inspection and screening); Compartment B (passenger check-in and Customs Border Protection area); and, Compartment C (baggage claim, baggage screening and cargo lay down). The project is the replacement of 10 existing manually-operated solid steel roll-up doors in Compartments A and C, with 10 new power-operated glazed sectional roll-up doors and 10 security grills. The new roll-up doors and security grills will operate independently. In addition, one new grill will be added to one of the roll-up doors. The original steel roll-up doors in Compartment B were replaced in 1986 in a previous public works project and are not included in this maintenance project. However, the project does include the addition of a new grill to one of the existing roll-up doors.	NOE	
2012018094	B Street Pier Cruise Ship Terminal Clean and Paint Interior Walls and Ceilings San Diego Unified Port District San Diego--San Diego The project is the cleaning and painting the existing interior walls and ceilings of the B Street Pier Cruise Ship Terminal. The interior perimeter walls and portions of the ceilings are dirty and soiled and require maintenance, cleaning and painting to brighten and improve the current appearance and bring the facility up to the industry customer service standards. Specifically, this project includes interior cleaning, preparation, spot priming and painting of certain ceilings, perimeter walls and exposed portions of various building systems within the terminal. Interior security and passenger processing equipment, and furnishings will either be protected-in-place during on-going work operations, or temporarily moved and relocated to their respective original location in each progressive area of work.	NOE
