**SUMMARY  
OF  
POSTINGS**  
(Formerly SCH NEWSLETTER)

**January 16 – 31, 2012**

# STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **January 16 – 31, 2012**.

## CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613  
Fax: (916) 323-3018  
e-mail: [state.clearinghouse@opr.ca.gov](mailto:state.clearinghouse@opr.ca.gov)  
website: [www.opr.ca.gov](http://www.opr.ca.gov)

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

**Scott Morgan**  
Director

## CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

<b>USPS:</b>		<b>USPS/Courier Service / Hand Deliveries:</b>
State Clearinghouse	<b>OR</b>	State Clearinghouse
P.O. Box 3044		1400 Tenth Street, Room 1113
Sacramento, CA 95812-3044		Sacramento, CA 95814

## INFORMATION AVAILABLE ON-LINE

The 2011 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

## Environmental Document Filings with the State Clearinghouse 1999-2011

All CEQA documents filed with the State Clearinghouse are available for viewing on the internet at [www.ceqanet.ca.gov](http://www.ceqanet.ca.gov).

<b><u>Documents Received on Tuesday, January 17, 2012</u></b>			
2009031043	Regional Connector Transit Corridor Los Angeles County Los Angeles, City of--Los Angeles NOTE: 2 CD  Proposed light rail transit project in the Regional Connector Transit Corridor in Los Angeles, CA. The document is a SEA/Recirculated Sections of the Draft EIR. This is an update to the Draft EIS/EIR released on September 3, 2010.	<b>FIN</b>	
2010032070	Orchard @ Penryn (PEIR 20070521) Placer County --Placer NOTE: 1 CD  This project proposes to construct 150 residential units and a recreation center on +/-15.1 acres in the community of Penryn. Implementation of the project would require remediation of contaminated soil onsite and construction of frontage improvements along Penryn Road.	<b>FIN</b>	
2010061088	General Plan Update Hemet, City of Hemet--Riverside NOTE: 1 CD  Comprehensive update of the City's General Plan.	<b>FIN</b>	
2010122030	Beltz Well No. 12 Project Santa Cruz, City of --Santa Cruz The Proposed Project (Beltz Well No. 12) would be installed on a vacant lot located at the intersection of Research Park Drive and Cory Street in Soquel, CA. The new well will be drilled to an approximate April 15 to November 15. Production from Beltz Well No. 12 would not increase the City's long term historic Purisima groundwater extraction, but would instead redistribute a portion of existing City production inland to protect the aquifer from seawater intrusion. The City's maximum future Purisima groundwater production with the addition of Beltz Well No. 12, will be up to 520 acre-ft/yr in non-critically dry years and up to 645 acre-ft/yr in critically dry years.	<b>FIN</b>	
2012011030	Proposed Citrus Community College Parking Lot Citrus Community College District Glendora--Los Angeles The project proposes a 177-space paved parking lot to be located at 1155 West Foothill Boulevard in the City of Glendora, across the street from Citrus College. The site is 1.66 acres. The project will also include demolition of existing structures and associated surface parking that exists on the property. Entry and exit from the new parking lot will be provided from West Foothill Boulevard. A second access may be added in the future when Citrus Avenue is extended north from the intersection with West Foothill Boulevard.	<b>MND</b>	02/15/2012

## CEQA Daily Log

<b><u>Documents Received on Tuesday, January 17, 2012</u></b>			
2012011031	<p>Turner Basin Project Inland Empire Utilities Agency Ontario--San Bernardino</p> <p>The proposed project includes the expansion of the existing recharge basins and the construction and improvements of inlet facilities to increase the maximum operations water depth in the basins. The purpose of the proposed basin modification is to increase the Inland Empire Utilities Agency's (IEUA or Agency) groundwater recharge capacity as part of the comprehensive effort to supplement local water supplies in the Chino Basin and to support the groundwater demands (potable water supply) of the population within the Agency's service area.</p>	<b>MND</b>	02/15/2012
2012011033	<p>Avenue 60 Domestic Water Transmission Main Coachella Valley Water District --Riverside</p> <p>The Avenue 60 Domestic Water Transmission Main project proposes the construction of approximately 10,000 feet of open trench and 1,350 feet of subsurface boring (using both directional boring and "jack and bore" methods) for a 24-inch domestic water pipeline along Avenue 60 between Polk Street and Pierce Street. Most of the pipeline will be constructed within the Avenue 60 right-of-way; subsurface boring will take place beneath the Coachella Valley Stormwater Channel (CVSC), Hwy 111, UPRR and 86S Expressway. The pipeline will connect the existing domestic water system downstream of the booster pumping station located on the Ion Exchange Treatment Plant No. 6806 (IXTP) site at the project's eastern terminus. A pressure reducing valve will be installed on the IXTP site where the pipeline connects to the existing domestic water system. The purpose of this project is to provide a more reliable domestic water service to existing and future CVWD customers in the Mecca, North Shore, and Area 23 pressure zones. This connection provides a redundant water supply to CVWD's eastern most customers and will reduce the demands on the IXTP for domestic water. In addition, the installation of the water transmission pipeline will allow CVWD to expand its domestic water service east of Polk Street and south of Airport Boulevard, providing existing and future domestic water customers with a reliable water source.</p>	<b>MND</b>	02/15/2012
2012011035	<p>Hollister Hill State Vehicular Recreation Area (SVRA) Non-Motorized Buffer Trails Project Parks and Recreation, Department of Hollister--San Benito</p> <p>The OHMVR Division proposes to construct hiking, mountain biking, and equestrian trails (48" wide), two staging areas, and a hike-in day use area in the non-motorized buffer areas of the Hudner and Renz properties within the Hollister Hills SVRA. The proposed new trails on both properties would be multi-use trails and would be constructed and maintained through training opportunities and volunteer efforts. Motorized recreation would not be allowed.</p>	<b>MND</b>	02/15/2012
2012011036	<p>Camarillo Special Education School Project Ventura County Board of Education Camarillo--Ventura</p> <p>The Ventura County Office of Education (VCOE) is proposing a new special education school on a parcel located on the south side of Adolfo Road between Camino Ruiz and Camino Carillo in the City of Camarillo. The project site is approximately two acres in size, is currently vacant, and has been previously rough graded. The proposed special education school would involve construction of a two-story, 32,464 s.f. building on the project site. The new facility would</p>	<b>MND</b>	02/15/2012

	house up to 180 special education students, and associated faculty and staff.		
2012012036	Pocket Canyon Creek Retaining Wall Caltrans #10 --Sonoma Caltrans proposes to reconstruct a failed retaining wall on SR 116 in Sonoma County. The project is located just east of Guerneville near Odd Fellows Parkway. The existing retaining wall at this location has failed due to storm damage and there is currently temporary slope stabilization in place. The project proposes to remove the existing failed retaining wall, remove the temporary slope stabilization and install a new retaining wall. Additional work would include improving drainage in immediate area.	<b>MND</b>	02/16/2012
2012012034	2012 Butte County Metropolitan Transportation Plan and Sustainable Communities Strategy EIR Butte County Association of Governments --Butte The proposed project is the adoption and implementation of the 2012 Butte County MTP and SCS. The MTP is a twenty year comprehensive transportation plan for all modes including: highways, local streets and roads, transit, bicycle, aviation, rail, and goods movement. The MTP is updated every four years. The SCS will be an additional element of the MTP that was not included in the previous update. The SCS is a mechanism to implement passenger vehicle greenhouse gas reductions outlined in Assembly Bill 32.	<b>NOP</b>	02/15/2012
2012011032	ZA-2011-2936-CUB, ENV-2011-2937-ND Los Angeles, City of --Los Angeles The project involves a Conditional Use request to allow the sale of beer and wine for off-site consumption with hours of operations and alcohol sales occurring between 8:00 a.m. and 10:00 p.m. daily, in conjunction with an existing 13,803 s.f. Walgreen's store in the [Q]C2-1VL, (T)[Q]C2-1VL, [Q]R3-1VL and R3P-1 Zones. The project does not involve the expansion of the building footprint.	<b>Neg</b>	02/15/2012
2012011034	ZA 2011-3031(ZAD) / ENV-2011-3033-MND Los Angeles, City of --Los Angeles Upgrading of an existing approximately 225,000 s.f. retail shopping center, to include implementation of a new leasing plan to backfill existing vacancy and replacing underperforming tenants with higher end retailers, upscale restaurants and smaller cafe restaurants; renovating the building facade and internal pedestrian circulation; replacing the existing LA Fitness health club and two restaurants with a new larger Equinox Health and Fitness Club; and upgrading the existing movie theatre to a state-of-the-art movie theatre with full dining service and a reduced number of seats. The applicant also seeks to terminate the existing covenant to provide 52 off-site parking spaces in conjunction with the shopping center as required pursuant to parking affidavit AFF-93-1703697 and eliminate some on-site parking spaces, to provide a total of 906 on-site parking spaces and 88 bicycle spaces, and implement a shared-parking program with an 8% reduction in required parking spaces. Requested entitlements include a Zoning Administrator's Determination to permit shared parking pursuant to Section 12.24-X,20 of the Municipal Code, and a Specific Plan Project Permit Compliance review pursuant to Section 11.5.7-C of the Municipal Code.	<b>Neg</b>	02/15/2012

2004092011	East Cypress Corridor Specific Plan Oakley, City of Oakley--Contra Costa Approval of amendments to the Development Agreement by and between the City of Oakley and the Leshner Trust relating to the project known as Leshner Trust Property, which was entered into in October of 2005. Amendments include extending the term of the agreement to 2025 and updating language to reflect that the property is within City limits and a part of the East Cypress Corridor Specific Plan.	<b>NOD</b>	
2004092011	East Cypress Corridor Specific Plan Oakley, City of Oakley--Contra Costa Approval of a Development Agreement by and between the City of Oakley and Pacific West Communities, Inc relating to the project known as "Planning Area 6-H" of the East Cypress Corridor Specific, APNs 032-082-010 and 032-082-011.	<b>NOD</b>	
2009022100	Kirkwood Meadows Power Line Reliability Project Kirkwood Meadows Public Utility District --Amador, Alpine, El Dorado Kirkwood Meadows Public Utility District (KMPUD) is proposing to construct, maintain and operate a 28-mile power line that would connect Kirkwood to the regional electric grid near Salt Springs Reservoir. The line would be owned and operated by KMPUD and dedicated to serve only the Kirkwood Community in order to provide a more reliable and cleaner source of electricity. The project is located within Amador, Alpine and El Dorado Counties. Approximately 3.1 miles would be built along an existing overhead line between Salt Springs Reservoir and Bear River Reservoir. The remaining ~25 miles would be buried within existing roadways and disturbance corridors to Kirkwood. The power line would be located predominately across Eldorado national forest and 15% of the line would cross private land.	<b>NOD</b>

	RMPs are to be used to help guide the overall planning, budgeting, and decision making processes for individual preserves and for District-wide programs.		
2011102024	Waterford Avenue Bridges and Multi-Use Path Project Mammoth Lakes, City of Mammoth Lakes--Mono A new segment of the Main Path envisioned in the Town's adopted Trails System Plan and General Bikeway Plan. The new trail segment would close an existing gap in the Main Path from Old Mammoth Road along Waterford Avenue to a segment of the existing Main Path north of Mammoth Creek near North Waterford Avenue. The new trail segment would require construction of two bridge crossings over Mammoth Creek at the northern terminus of Waterford Avenue. The proposed paved multi-use path would support pedestrian and bicycle use and could be groomed during winter conditions for cross-country skiing use.	<b>NOD</b>	
2011102028	General Plan 2012 IS/MND Woodside, City of Woodside--San Mateo General Plan 2012 would guide growth and development in Woodside through 2035. It outlines a vision for the future of Woodside and reinforces the community's passionate desire to maintain and preserve its distinctive rural character, scenic vistas, and natural landscapes. General Plan 2012 would retain existing land uses in the Town, with only minor changes, and allowable development would be largely limited to low-density residential uses. General Plan 212 also includes goals, policies, and strategies which seek to minimize risks from identified natural and man-made hazards; conserve, protect, and enhance the open space system and natural resources in Woodside and the surrounding area; and reduce or control consumption of renewable and non-renewable resources in Woodside.	<b>NOD</b>	
2011112056	Hanes Subdivision Humboldt County Eureka--Humboldt A final map subdivision of an approximately 2.5 acre parcel into 10 lots for single family residential development. Lot sizes range from 6,000 to 14,348 s.f. (net). The project proposes a detention basin to be located at the southeast corner of the site. A Special Permit is required to reduce the stream and wetland buffer and allow the implementation of a native planting plan within the stream and wetland areas. An exception to the solar access standards is requested for lots 3-7. The subdivision will be served by community water and sewer.	<b>NOD</b>	
2011121020	Installation of Full-Capture Connector Pipe Screens Alhambra, City of Alhambra--Los Angeles Purchase and installation of full-capture catch basin inserts to prevent trash/debris from entering the storm drain system. This will ensure full compliance with the National Pollutant Discharge Elimination System Trash Total Maximum Daily Load requirement. Inserts will be installed at approximately 475 locations through the City.	<b>NOD</b>

2012019008	Center at Secret Ravine Rocklin, City of Costa Mesa--Orange The application is a request for approval of a design review, oak tree preservation plan permit, tentative parcel map, conditional use permit, and general development plan entitlements to establish land use/development criteria, subdivide the property into four parcels and allow the construction and operation of a 23,600+/- sq.ft. commercial complex.	<b>NOD</b>	
2012018097	NG2011-29 NextG MacArthur Park Distributed Antenna System Project Public Utilities Commission Los Angeles, City of--Los Angeles Installation of fiber optic cable and a new pole to augment existing network.	<b>NOE</b>	
2012018098	Agreement 2011-0185-R4 - Old toll Road Culvert Repair Project Fish & Game #4 --Mariposa The Project consists of replacing an existing washed out culvert with a 40-foot long, 42-inch diameter corrugated metal pipe. Approximately 40-cubic yards of native soil and rock will be used as fill material so as to properly bed the culvert. The fill on the inlet side of the culvert will be armored with rock rip-rap. A minimum of 2 feet of fill will be placed on top of the culvert. The finished road grade over the culvert will be 10 or more feet wide and slightly dipped at the crossing. Water will not be present during the proposed work period; therefore, work will not occur in the wetted portion of the channel.	<b>NOE</b>	
2012018099	Agreement 2011-0051-R4 - County Sewer Facilities Maintenance and Repair Fish & Game #4 --Madera Maintenance and repairs will be made in areas where sewer pipelines and electrical equipment have been exposed due to wave-action erosion of the shoreline. Approximately 900 cubic yards of the lake bed will be dredged and sediment replaced onto the shoreline where sewer facilities have been exposed. An open trench will be excavated for installation of new electrical conduit. Cobble stone and concrete will be removed from on top of the sewer pipes for repairs. Existing sewer pipe sections will be raised where the weight of pured and un-permitted concrete placement has affected the pipes placement.	<b>NOE</b>	
2012018100	Agreement 2011-0177-R4 - Lodge Residence Boat Dock Replacement Project Fish & Game #4 --Madera An existing boat dock will be replaced. Nine (9) 4-inch aluminum pylons will be driven into the lake bed to support an aluminum 20-foot by 20-foot deck. Two (2) spud poles will be driven into the lake bed to support a 20-foot by 20-foot swim deck. Two (2) aluminum piers, one (1) 5-foot by 20-foot and one 5-foot by 40-foot, will be installed to connect to the decks to the shore and to each other, respectively. Native riparian shrubs, trees, and oak trees will not be removed.	<b>NOE</b>	
2012018101	Agreement No. 2011-0224-R4; Tranquility Irrigation District Fresno Slough Emergency Sediment Removal Project Fish & Game #4 Fresno--Fresno To reduce the risk of levee failure and flooding of adjacent agricultural areas and rural residents near the town of Tranquility, the Project will remove up to 20,000 cubic yards of sediment from the channel of Fresno Slough. Sediment will be	<b>NOE</b>

	removed to an average depth of 3 feet, with excavation limited to a depth of 4 feet. An area of approximately 4 acres will be disturbed. Sediment will only be removed from the dry non-vegetated areas of the channel. Sediment will be dozed into a pile loaded into a truck or relocated outside of the streambed for later removal. Work may take place at up to three (3) sites simultaneously. Work will occur when the channel is dry.		
2012018102	Invasive Plant Removal Parks and Recreation, Department of --Nevada Remove invasive plants at Malakoff Diggins State Park Historic Park to recover and strengthen the areas native plant communities. At Humbug Creek, Lake City, Backbone, Derbec Meadow and the North Bloomfield Townsite work will:  * Use mowers, weed whackers, and hand tools to cut down invasive plants at ground level. * Hand-pull annual weeds * Remove Scotch Broom ( <i>Cytisus scoparius</i> ) using a weed-wrench. * Remove Vinca ( <i>Vinca major</i> or "Periwinkle") by hand using spaded forks.	<b>NOE</b>	
2012018103	Install Closed Circuit Television Security Cameras Parks and Recreation, Department of --Monterey Install a closed circuit television security system at the William Penn Mott Jr. Training Center located within the Asilomar Conference Grounds to improve the existing security system. Work will install four internal cameras mounted to the ceiling and two external cameras mounted near the roofline to be minimally visually obtrusive.	<b>NOE</b>	
2012018104	New Nonhazardous Ash Solid Waste Facility Permit for the Searles Valley Mineral Augus Boiler Ash Landfill #1, Facility No. 36-AA-0343 Resources Recycling and Recovery, Department of --San Bernardino The issuance of a New Standardized Nonhazardous Ash Solid Waste Facility Permit.	<b>NOE</b>	
2012018105	Automatic Fire Sprinklers Fairview Development Center Developmental Services, Department of Costa Mesa--Orange In compliance with the Federal Regulations and fire life safety requirements, the Department of Developmental Services is proposing to install automatic fire sprinkler systems at the Fairview Developmental Center. The sprinkler systems will be installed in buildings housing nursing facilities and general acute care patients. Fairview buildings include Residence Buildings 11, 12, 13, 14, 15, 16, R & T Buildings and the Administration Building. The project also includes associated work such as, asbestos removal (as necessary), electrical and plumbing renovations and minor construction to accommodate the automatic fire sprinkler systems.	<b>NOE</b>

	will be installed in buildings housing nursing facilities and general acute care patients. Sonoma buildings include General Acute Care Building, Nelson, Johnson/Ordahl, Regamay/Emparan and Cromwell buildings. The project also includes associated work such as, asbestos removal (as necessary), electrical and plumbing renovations and minor construction to accommodate the automatic fire sprinkler systems.		
2012018107	Automatic Fire Sprinklers Porterville Development Center Developmental Services, Department of Porterville--Tulare In compliance with the Federal Regulations and fire life safety requirements, the Department of Developmental Services is proposing to install automatic fire sprinkler systems at the Porterville Developmental Center. The sprinkler systems will be installed in buildings housing nursing facilities and general acute care patients. Porterville buildings include the Administration/Hospital Building, Units 29, 30 and 32. The project also includes associated work such as, asbestos removal (as necessary), electrical and plumbing renovations and minor construction to accommodate the automatic fire sprinkler systems.	<b>NOE</b>	
2012018108	Picacho Mine Water Line Repair and Replacement Parks and Recreation, Department of --Imperial A waterline repair and/or replacement will occur in Little Picacho Wash on 1.1 miles of park property within park right of way. An excavator will dig a 14 - 20 inch wide trench, approximately three feet deep to lay new pipe in sections where the pipe has been damaged. The digging will begin approximately 1.1 miles from a well pump. In some locations, hand tools such as shovels and digging bars will be used to unearth the existing pipeline or clear trenching for the new pipeline. Excavated sands and soils will be used to backfill and compact the trench.  The project will repair and or replace the Picacho Mine water line which was damaged by flash flooding events in Little Picacho Wash in 2009 and 2010.	<b>NOE</b>	
2012018109	Establish Vallejo Ferry System Fares once the Vallejo Ferry Service is transferred to WETA Water Emergency Transportation Authority Vallejo, San Francisco--San Francisco, Solano In preparation for assuming ownership and operating responsibility for the Vallejo Ferry Service (which is currently owned by the City of Vallejo) pursuant to the San Francisco Bay Area Water Emergency Transportation Response and Disaster Recovery Act (Gov. C. Section 66540 et seq.) regarding consolidation of San Francisco regional ferry services, the San Francisco Bay Area Water Emergency Transportation Authority ("WETA") has established fares for the Vallejo Ferry Service (to be implemented once the service is transferred to WETA) at the same rate as is currently charged by the City of Vallejo.	<b>NOE</b>	
2012018110	Bridge Girder Replacement Project Caltrans #3 --Sacramento The project proposes to replace a damaged bridge girder on the Arno Road Overcrossing (BR# 24-0151).	<b>NOE</b>

2012018111	Tulare Lake Basin Water Storage District, 1001 Chase Avenue, Corcoran, CA 93212 Tulare Lake Basin Water Storage District Bakersfield--Kern The Tulare Lake Basin Water Storage District (Tulare Lake) will transfer up to 10,000 AF of its 2012 State Water Project Water to Kern County Water Agency for the JG Boswell Co. who farms in both districts. The transfer will be completed in 2012. This proposed transfer is designed to enable the JG Boswell Co. to better manage its respective water supplies. No lands will be fallowed as a result of the transfer and no additional groundwater will be pumped. The lands have been actively farmed in the past.	<b>NOE</b>	
2012018112	Main Canal Renovation Project West Stanislaus Irrigation District --Stanislaus The purpose of the project is to replace existing facilities constructed in circa 1928 with new modern facilities to deliver San Joaquin River water to the WSID service area. The new facilities will replace the existing facilities from the existing Pump Station 1 to a point to the existing Pool 4 of the Main Canal.	<b>NOE</b>	
2012018113	Sonoma County Water Agency Isolation Valve Seismic Hazard Mitigation Project Sonoma County Water Agency Healdsburg, Sebastopol, Santa Rosa, Cotati, Rohnert Park, ...--Sonoma The proposed project involves the placement of 20 intermediate isolation valves throughout the Sonoma County Water Agency's (Water Agency) 90 miles of transmission system pipeline. The installation of each isolation valve would require excavation of a pit with approximate dimensions of 10 feet long and 10 feet wide and 8 feet deep. Placement of isolation valves are located at fault crossings, stream crossings, areas of high ground water and areas where liquefaction during strong earth shaking is likely.	<b>NOE</b>	
2012018114	Storm Nasatir Halls Temporary Classroom Modulars at Comm Mesa, O and P Lot California State University, San Diego San Diego--San Diego Three sites will temporarily house ADA compliant structures to accommodate classroom relocations while the Storm Nasatir Hall Renovation project is underway. The Comm Mesa will house 2 portable units, O-Lot 8 units and P-Lot 3 units, accommodating total of 637 (13 units x 49 seats each) seats.	<b>NOE</b>	
2012018115	Don Powell Theater Access Improvements California State University, San Diego San Diego--San Diego This project addresses some ADA issues outlined in the campus ADA Transition plan: (i) addition of new exterior accessible ramp along west side of the building leading to (ii) new ADA compliant restrooms and (iii) two new accessible interior ramps along east and west entries leading into the existing auditorium.	<b>NOE</b>	
2012018116	Chalk Hills Slope Stabilization Project Mountains Recreation and Conservation Authority --Los Angeles Buttress fill of north-facing slope with key on MRCA property line. Involves 80,000 cubic yards of cut and recomposition.	<b>NOE</b>

<b><u>Documents Received on Thursday, January 19, 2012</u></b>			
2012011039	Adventure Trails Pilot Project Program Procedures Inyo County Bishop--Inyo Assembly Bill 628 authorizes the County of Inyo to establish a Pilot Project to designate combined-use highways on unincorporated county roads for no more than 10 miles. The combined-use highway can be used to link existing off-highway motor vehicle trails on federal BLM or U.S. Forest Service lands in order to provide a unified linkage of trails for off-highway motor vehicles. The provisions of AB 628 sunset January 1, 2017. This document covers implementation of the pilot project system-wide. The designation of each roadway segment will require action by the Inyo County Board of Supervisors at a public hearing. Notice of the action will be mailed to property owners adjacent to the proposed combined-use routes. If subsequent consideration reveals a potentially significant impact not address herein, a separate document will be required.	<b>MND</b>	02/17/2012
2012012041	Effluent Disposal Improvement Project Murphys Sanitary District Murphys--Calaveras District effluent is currently reclaimed via irrigation of the Hay Station Ranch Recycled Water Reuse Areas, which is operated by John Kautz Farms. The District's wastewater treatment facility and Hay Station Ranch Recycled Reuse Areas are regulated by Waste Discharge Orders No. 5-00-264 and No. 5-01-063, respectively. With ongoing changes in ranching practices, the District is seeking to supplement its current reclamation operation with some effluent disposal facilities to assure complete land containment of all effluent under all foreseeable climatic and ranch conditions. To meet this objective, the District is proposing to construct effluent disposal fields and ground water monitoring wells on 20 acres of District owned property. The effluent disposal project will serve to back up and offset the District's existing effluent reclamation activities at Hay Station Ranch.	<b>MND</b>	02/17/2012
2012012046	Mesa Outdoor Off Site Outdoor Advertising Sign Lake County Lakeport--Lake The applicant is proposing to construct a 360 ft 2 double sided off-site advertising sign adjacent to Hwy 29. The top of the proposed sign will be approximately 35 feet above grade and 18 feet above the surface of Highway 29. The ground surface where the billboard will be constructed is approximately 17 feet below the surface of Highway 29. The project is located within the North Lakeport Community Growth Boundary. The project parcel is developed with a residence, existing commercial buildings containing an automobile restoration business, paved parking areas and driveways. The off-site advertising sign is proposed to be placed within the northern portion of the parcel north of the existing on-site commercial development. The proposed off-site advertising sign will have indirect lighting illuminating downward from the top of the sign.	<b>MND</b>	02/21/2012

	<p>approximately 1,935 s.f. single family dwelling, an approximately 1,200 s.f. detached shed and an above-ground swimming pool. Proposed Parcel 2 would contain an existing approximately 770 s.f. mobile home and approximately 100 s.f. shed which are both proposed to be removed. The proposed project includes building exclusionary areas which would protect onsite Coast Live Oak Woodland and Central Coastal Scrub, and prohibit structural development in areas where slopes exceed 20 percent. Access to proposed Parcel 1 would continue to be provided by an existing private driveway of approximately 300 feet in length accessed via Stillwell Road. Access to proposed Parcel 2 would be provided via a proposed driveway off of the terminus of Hamilton Lane. Water services for proposed Parcel 1 would continue to be provided via an existing onsite private water well. The applicant has purchased 1.0 acre foot per year (AFY) of State Water Project (SWP) water from the Golden State Water Company to serve proposed Parcel 2. Sanitary services for proposed Parcel 1 would be provided by an existing septic system, and a new septic system would be installed for any future single family residence constructed on proposed Parcel 2. No grading, tree or vegetation removal is proposed as a part of this project.</p>		
2004101105	<p>Santa Ana College Facilities Master Plan Rancho Santiago Community College District Santa Ana--Orange</p> <p>Following certification of the EIR in September 2005, several changes to the proposed Facilities Master Plan (FMP) were proposed. Although the project remains substantially the same, an Addendum to the EIR was prepared to address the potential environmental impacts associated with the project changes and to complete the environmental analysis required under CEQA. Implementation of the FMP will include demolition of buildings, renovation/modernization of several structures, the construction of new structures and sports fields, and increased parking capacity through the provision of additional parking lots and a parking structure. Overall, the plan focuses on facilities that support campus activities and proposes construction of approximately 146,000 additional assignable square feet (a.s.f.) of building space on the campus for a total of approximately 543,000 a.s.f. on site. Based on the environmental analysis in the Addendum, preparation of a subsequent or supplemental EIR for the proposed project is not required.</p>	<b>NOD</b>

2011111023	<p>Otay Ranch Village 11 Elementary School Chula Vista School District Chula Vista--San Diego</p> <p>The Chula Vista Elementary School District proposes to construct the Otay Ranch Village 11 Elementary School Site Project on approximately 11.85 acres of District-owned real property located at 1650 Exploration Falls Drive in the City of Chula Vista, CA, as reflected in Figures 1-1 through 1-5 of the IS prepared for the Project. The Project Site is identified as San Diego County Assessor Parcel Nos. 643-610-43-00 and 643-610-44-00. The Project Site was acquired by the District in April 2008, and has been contemplated as an elementary school site since 1993 as part of the Otay Ranch Development.</p>	<b>NOD</b>	
2011111072	<p>UP 11-002/Vista Towers LLC Telecommunications Facility Mono County --Mono</p> <p>Use Permit Application 11-002/Vista Towers LLC would allow for the development, operation, and maintenance of a wireless telecommunications facility on the parcel. The site would provide cell phone coverage to the communities along Crowley Lake Drive and north and south along US 395. The wireless facility would be located on a 2400 s.f. leased area located in the southern portion of the parcel. The lease area would be surrounded by a 6-foot tall, 8-inch thick solid wall, with a 12-foot wide solid metal gate. The 40' x 60' lease area would include one multi-carrier 60-foot wireless communications monopole or monopine designed as a collocation facility, engineered to hold up to three carriers' antenna arrays. The property is owned by Los Angeles Department of Water and Power, and the land use designation is Open Space.</p>	<b>NOD</b>	
2011112050	<p>Pumping Plant No. 1B Emergency Diesel Generator Reclamation District No. 1000 Sacramento--Sacramento</p> <p>The proposed project includes the construction of a concrete masonry block building addition to the existing Plant 1B electrical building to house an emergency diesel generator. The new building would abut and be located along the northeast wall of the existing electrical building. It would be approximately 16 feet wide by 28 feet long by 20 feet tall. Air intake louvers would be located on the north side of the structure, while the exhaust louvers would be located on the east side of the building, facing away from the existing residences. A 2,500 kilowatt diesel generator would be installed within the new building. The generator will be mounted on vibration dampers to lessen any potential for excessive vibrations or increase ambient noise levels. Likewise, critical grade silencers will be installed on the generator to attenuate the noise of the generator.</p>	<b>NOD</b>	
2012019009	<p>Lake or Streambed Alteration Agreement No. 1600-2011-0102-R1 for Timber Harvesting Plan (THP) 1-11-029 MEN, "McGuire Yellow THP". Forestry and Fire Protection, Department of Fort Bragg--Mendocino</p> <p>The project includes two watercourse encroachments in separate Class II (non fish bearing) watercourses to replace existing culverts in logging roads associated with THP No. 1-11-029 MEN.</p>	<b>NOD</b>

	reinforced concrete tank with a diameter of 130 feet. Approximately 17,000 cubic yards of soil material excavated for the tank site will be transported approximately two mile to TCWD owned property at its Well 141 site (APN: 966-080-001). The soils would be placed and compacted at this site.		
2012011042	Indio Water Authority's Posse Park Surface Water Treatment Project Indio Water Authority Indio--Riverside This project consists of the construction and installation of a SWTP and water conveyance facilities to treat Colorado River Water (CRW) and use the treated water for direct potable uses or recharge of the groundwater basin, which appears to be in overdraft. The water may also be used to directly or indirectly supply neighboring and/or cooperating agencies through various water resource agreements as part of an overall plan for long-term management of water resources in the area. The IWA intends to build up to a 14 million gallons per day (MGD) water treatment facility to treat CRW conveyed in the Coachella Canal. The proposed project also includes the installation of associated facilities to convey treated water to the existing water distribution system and facilities to blend the treated water with the IWA groundwater supplies prior to distribution to the potable water system.	<b>MND</b>	02/21/2012
2012011044	Downs Substation Expansion Project Public Utilities Commission Ridgecrest--Kern, San Bernardino Southern CA Edison proposes to upgrade and expand the existing Downs 33/12-kV Substation to a 115/12-kV substation containing a 115-kV switchrack; Route an existing 115-kV subtransmission line into and out of the proposed substation; and install a fiber optic telecommunication system (58 miles) to provide communication circuits for the protection, monitoring, and control of subtransmission and substation equipment. As part of the installation of the fiber optic telecommunication system, SCE would need to replace approximately six existing 115-kV subtransmission line wood poles to support the new fiber optic telecommunications facilities where the existing wood poles do not meet CPUC General Order 95 wind loading requirements and/or SCE design standards.	<b>MND</b>	02/21/2012
2012012042	Point Reyes Well No. 3 Replacement Project North Marin Water District --Marin The North Marin Water District (NMWD) proposes to replace a failing water well (Well No. 3) at its Point Reyes Well Site. The project includes drilling a new well adjacent to the existing Well No. 3.	<b>MND</b>	02/21/2012
2012012043	Gravity Sewers and Reclamation Project Lincoln, City of Lincoln--Placer The City of Lincoln Gravity Sewers and Reclamation Project, located in the City of Lincoln, Placer County, CA entails: (1) the conversion of a portion of the old Wastewater Treatment Plant (WWTP) sewer force main to a gravity sewer line; (2) the extension of the Nicolaus Road pump station force main; (3) the elimination of the old WWTP, Third Street, and Moore Road pump stations; (4) the Reclamation Project (see section 1), and (5) start-up and operation.	<b>MND</b>	02/21/2012

2010101098	Pepper Avenue Extension Project Rialto, City of Rialto--San Bernardino The project involves the 2,900-foot extension of Pepper Avenue from its current northern terminus located south of Lytie Creek Wash, north to the California Department of Transportation right-of-way at Highway 210, northeast of the City of Rialto. The total road width from curb to curb will be 72 feet, with an ultimate right-of-way of 100 feet.	<b>NOD</b>	
2011052076	Fourth Street Outfall and Storm Drain Replacement Santa Rosa, City of Santa Rosa--Sonoma The project is to abandon and replace approximately 780 linear feet of an existing 24 inch clay storm drain pipe currently running from the intersection of 4th Street and Wilson Street in Railroad Square (Santa Rosa, CA) west to a new outfall to Santa Rosa Creek. 550 linear feet of the existing storm drain is severely deteriorated and is proposed to be slurry filled/or capped and abandoned in place in conformance with the City of Santa Rosa abandonment standards. The remaining 230 linear feet are proposed to be removed and replaced in the existing storm drain location. The existing outfall is proposed to be abandoned in compliance with the Sonoma County Water Agency standards and a new outfall is proposed to be constructed at a new location. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement Number 1600-2010-0002-R3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Steve Dittmer, City of San Rosa.	<b>NOD</b>	
2010028038	Ducor Safe Drinking Water Project Ducor Community Services District --Tulare The Californai Department of Public Health (CDPH) is a responsible agency for this project. The Ducor CSD project includes: * Completion of a field survey including a tipographic survey of the prject limits. * Plotting of field work and creation of a plan and profile of the project area. * Performing geotechnical work to establish pipline design. Bore hole drilling is expected to be performed. * Performing system analysis through an engineering survey of the south tank controls and booster pump station.	<b>NOE</b>	
2012018149	Water Meters for Severely Disadvantaged Community Service Areas Shafter, City of Shafter--Kern The City of Shafter will retrofit and update approximately 600 water meters using Prop 84 Implementation Grant Funding. A number of meters will be retrofitted and updated in unincorporated areas where the property owners have abandoned their community water wells and systems and connected with the City's water distribution system. The Shafter area communities that will benefit from the program include the Mexican Colony, Cherokee Strip, Smith's Corner, North Shafter, North Park, North Shafter Farm Labor Camp, Thomas Lane, former Burbank Water System, etc.	<b>NOE</b>

Francisco Refinery (SFR) submitted by Conoco Phillips. The PSB is subject to post-closure care because DTSC required clean-up standards for groundwater contamination that could not be met during closure activities. Within twelve (12) months of issuance of this approval, ConocoPhillips and DTSC shall sign and record a Land Use Covenant to restrict the land use of the PSB to industrial activities.

2012018160	Humboldt Bay Dredged Material Beneficial Reuse Feasibility Study California State Coastal Conservancy --Humboldt	<b>NOE</b>	
------------	--	------------	--

Preparation of a feasibility study for reuse of Humboldt bay dredged materials for tidal marsh restoration and climate change adaptation projects. The study would examine the feasibility of utilizing dredged materials to restore tidal marsh in a number of specific locations. For these locations, the study would include an estimate of the amount of sediment needed to restore the area to salt marsh, an analysis of the suitability of available dredged materials for the restoration, and a cost estimate for transferring dredged materials to this site. In addition, the study would evaluate the potential to utilize dredged materials for climate change adaptation projects to reduce the vulnerability of at-risk resources to sea level rise. Such projects could include the creation of marshes on the Bay side of levees, or the creation of brackish marshes and set-back levees on the landward-side of levees.

2012018161	Industrial Waste Line for the R.O. Facility Brine Discharge California State University, Pomona --Los Angeles	<b>NOE</b>	
------------	---	------------	--

This project proposes to provide and install approximately 9,250 feet of 4" PVC sewer pipeline from the new CPP R.O. Treatment Plant to the County Sanitation Districts of Los Angeles's District 21 Interceptor Line located in the campus Spadra Farm land area, including all connections and lift stations as may be required to make the connection as required by the San District.

------------	---	------------	------------

Implement the Balboa Park Plaza de Panama Project. Project goals include rehabilitation of the Plaza de Panama consistent with the original vision of a ceremonial plaza and gathering space by eliminating vehicle traffic from Plaza de California, El Prado, Plaza de Panama, and the Esplanade. Project elements include:

1. Plaza de Panama
2. El Prado and Plaza de California
3. Bypass Road and Bridge
4. Alcazar Parking Lot and Walkway
5. Esplanade & Pan American Road
6. Parking Structure and Roof-top Park

2012012051	Change of Zone 2009-0004 Yuba County --Yuba The project site is located in the community of West Linda, southwest of the City of Marysville. The project site is located on a 13.6 acre (APN: 020-133-012) parcel adjacent to Alicia Avenue near its intersection with Feather River Boulevard.  The proposed project consists of phased Change of Zone from "R-1" Single-Family Residential (up to 4 dwelling units/acre) to "R-2" Medium Density Residential (up to 17 dwelling units/acre) in order to accommodate an affordable housing apartment complex. The proposed apartment complex would be consistent with the "R-2" Medium-Density Residential zoning and the Change of Zone would be consistent with the Valley Neighborhood General Plan Use Designation.	<b>MND</b>	02/22/2012
2012012052	Arsenic Treatment Project Rio Vista, City of Rio Vista--Solano The City of Rio Vista Arsenic Treatment project involves the following installations at the Well 10 and the Trilogy Site: the installation of a new chemical storage/electrical and controls structure that will house two double-walled chemical storage tanks - one each for ferric chloride (1,000 gallons), sodium hypochlorite (6,650 gallons), and a potassium permanganate saturator (55 gallons); the installation of a new 42,000 gallon backwash reclaim tank for the Well 10 site, and a 63,000 gallon backwash reclaim tank for the Trilogy site; and all associated water, sewer and storm drain pipeline installations and/or relocations.	<b>MND</b>	02/22/2012
2012011048	Franklin Ridge Road Extension San Diego, City of San Diego--San Diego Community Plan Amendment and Site Development Permit to amend the Serra Mesa Community Plan to provide a roadway connection from Phyllis Place (in Serra Mesa) called Franklin Ridge Road southward to the boundary between Serra Mesa and Mission Valley. This amendment would include map and text changes to the Serra Mesa Community Plan to increase connectivity and extend Franklin Ridge Road south of Phyllis Place to the southern boundary as a four lane major street with bicycle and pedestrian facilities. It would revise the Street Classification and the Bikeways and Pedestrian Walkway figures in the current adopted Serra Mesa Community Plan. It would also revise the land use designation from residential to parks/open space for the area south of Phyllis Place to the boundary of Mission Valley. The construction of the roadway connection between Phyllis Place and Via Alta would be constructed after Via Alta is completed in the Quarry Falls Specific Plan located in the community of Mission Valley.	<b>NOP</b>	02/22/2012
2012011052	Tiered Equine Ordinance San Diego County --San Diego The project proposes amendments to the County of San Diego Zoning Ordinance for equine uses. The amendments consist of clarifications, deletions, and revisions to provide an updated set of definitions, procedures and standards for review and permitting of equine uses, specifically for commercial horse stables.	<b>NOP</b>	02/22/2012

	The amendments will implement a new tiered system of permitting for a horse stable with both ministerial and discretionary tiers of permitting.		
2012011051	Bonsall Union School District Unification State Board of Education, California --San Diego The Bonsall Union School District is proposing a change of local government structure from separate elementary and high school districts to one unified district (i.e., the formation of the Bonsall Union Unified School District to serve grades K-12). The CA State Board of Education will decide whether to adopt a resolution approving the petition to form the Bonsall Union School District through the unification of the existing district with the corresponding portion of Fallbrook Union High School within its boundaries. Additional facilities that may be constructed will include the remodeling of a fire station building to accommodate a Continuation School and the construction of a new parking lot (approximately 100 spaces) at Sullivan Middle School.	<b>Neg</b>	02/22/2012
2012012050	Alameda County Bicycle and Pedestrian Master Plan for Unincorporated Areas Alameda County Unincorporated--Alameda The Alameda County Bicycle and Pedestrian Master Plan identifies policies to promote bicycle and pedestrian safety and access throughout Alameda County Unincorporated Areas. It designates bicycle and pedestrian activity corridors that connect major employment centers, transit centers, schools, parks, neighborhoods, and commercial districts throughout Alameda County Unincorporated Areas. The designation of bicycle and pedestrian activity corridor are a planning tool for understanding where physical improvements are most needed and where those improvements would have the most positive impact. The plan also recommends pedestrian design elements to encourage higher standards for pedestrian safety and access in the future County projects.	<b>Neg</b>	02/22/2012
2003121068	Hemet/San Jacinto Integrated Recharge and Recovery Program Eastern Municipal Water District Hemet, San Jacinto--Riverside NOTE: 2nd Addendum to FEIR.  The Addendums were previously adopted by the Eastern Municipal Water District, the CEQA lead agency for the Hemet/San Jacinto Integrated Recharge and Recovery Program, and make minor changes to the size and location of recharge basins necessary for the implementation of the Program. The minor changes in the size and location of the recharge basin are being undertaken at the direction of the U.S. Fish and Wildlife Service pursuant to a Biological Opinion, which eliminates potential impacts to the San Bernardino kangaroo rat.	<b>NOD</b>	
2006121080	San Marcos Creek Specific Plan and Creek Improvement Project San Marcos, City of San Marcos--San Diego The Department of Fish and Game is issuing a Streambed Alteration Agreement (1600-2007-0494-R5) to the City of San Marcos (City) for the San Marcos Creek Specific Plan (Project). The Project refers to a community planning effort designed to provide the necessary framework to grant mixed-use/smart-growth zoning, flood control to surrounding properties and facilitate urban infill by reevaluating land	<b>NOD</b>

(Revision 2), dated July 28, 2008 by CH2MHill, and (c) a Soil Vapor and Groundwater Investigation Assessment Report, dated January 27, 2011. The Constituents of Concern (COCs) in soil gas were identified as tetrachloroethene (PCE), trichloroethene (TCE), Cis-and trans-1, 2-dichloroethene (DCE), vinylchloride (VC), and benzene. The SVE system is expected to reduce VOC source material in the vadose zone soil and soil gas; reduce VOC mass from vadose zone soil gas that pose a potential threat to the underlying groundwater. The total detected VOC's are as high as 28,000 micrograms per liter, above the California Human Health Screening Levels (CHSSLs) acceptable industrial levels. During the soil vapor removal action, groundwater will be monitored to assess the effects of the removal action on groundwater quality at the site. A Land Use Covenants (LUC) will be implemented and recorded with the County Recorder office to prohibit residential use or construction below utility infrastructure.

2012018192	<p>Bridge Approach Road Repair Parks and Recreation, Department of --Santa Cruz</p> <p>Repair the roadway approach to the entryway bridge to Henry Cowell Redwoods State Park for public safety. Work will remove the damaged portion of the roadway, backfill a scour hole under the bridge abutment with compacted base rock to stabilize, re-pave a 10 ft. by 30 ft. section of roadway and re-attach drain pipes. Vegetation around the roadway will be trimmed to allow work crews access to the site.</p>	NOE	
2012018193	<p>Mt Pueblo Building Facade Modification Tracy, City of Tracy--San Joaquin</p> <p>The project consists of a facade modification to an existing building located on a commercial retail site. There is no proposed change to the building size or land use. The facade will be modified to reflect the tenant's corporate theme, consisting of new paint colors and a higher parapet with a Spanish-influenced silhouette.</p>	NOE

2010022066	Draft Amendments to Rule 2301 (Emission Reduction Credit Banking) San Joaquin Valley Air Pollution Control District --San Joaquin, Stanislaus, Merced, Madera, Fresno, ... The purpose of this rule project is to amend Rule 2301 (Emission Reduction Credit Banking). The goals of the draft amendments to Rule 2301 are to provide a mechanism to preserve voluntary high quality greenhouse gas emission reductions. Unlike most District rules, the draft amendments to Rule 2301 do not create any new requirements for regulated sources - they are voluntary in nature. The draft amendments are designed to assist Valley residents and businesses who choose, or are required by some third party of regulatory requirement, to mitigate GHG emissions. The draft amendments would allow facilities to preserve GHG emission reductions and allow for the trading and retirement of such emission reductions. The draft amendments do not require that facilities bank GHG emission reductions, nor do they require that such reductions be used in any way, such as to mitigate emissions increases.	<b>NOD</b>	
2011022040	The 34th America's Cup and James R. Herman Cruise Terminal and Northeast Wharf Plaza San Francisco, City and County of San Francisco--San Francisco The proposed project involves demolition of the existing Pier 29 shed and a portion of the Pier 29 shed and construction of a new cruise terminal at Pier 27, ground transportation area, and Northeast Wharf Plaza. The new cruise terminal would service between 40 and 80 calls per year, and the terminal and ground transportation area would be used for up to 100 additional special events per year when not in use as a cruise terminal.	<b>NOD</b>	
2011092026	AOC2 Interim Measures Toxic Substances Control, Department of Pittsburg--Contra Costa DTSC is proposing to approve a draft Interim Measure for a Intermin Removal Action Workplan (IRAW), pursuant to authority granted under Chapter 6.5, Division 20, CA Health and Safety Code, for Area of Concern 2 at the General Chemical West LLC Bay Point Works facility located in Pittsburg, CA. If approved, it would allow for the removal of approximately 4,000 cubic yards of contaminated sediments and soils from AOC2, that will be transported to an approved off-site landfill. After removal activities have been completed, the resulting excavated area will be lined with a geotextile fabric linear and backfilled with approximately 36,200 yd <sup>3</sup> of clean soil, 3,800 yd <sup>3</sup> of gravel, 90 yd <sup>3</sup> of rock, and 2,800 yd <sup>3</sup> of clay (a total of approximately 2,760 truckloads of imported materials). Project activities are expected to be completed in approximately 12 weeks.	<b>NOD</b>	
2011122022	Coronado/Stege Elementary School Temporary Relocation Project West Contra Costa Unified School District Richmond--Contra Costa The proposed project would provide students at Coronado and Stege Elementary Schools a temporary campus location during the construction of the new Coronado and Stege Elementary Schools. The project consists of the temporary installation and use of approximately 33 relocatable buildings on a portion of the existing Kennedy High School campus for the purpose of temporarily housing approximately 452 Coronado Elementary students for two years, followed by 338 Stege Elementary students for two years. Also proposed on the project site are two playground, and twenty-two parking spaces. The temporary elementary school facilities would be located on what is currently a softball field on the	<b>NOD</b>

	Kennedy High School campus. The field would be lightly graded and paved to accommodate the temporary school buildings and facilities. During the life of the project, the District would create a softball field in outfield of the adjoining baseball diamond at the high school site. Following the return of students to their regular campuses, the relocatable buildings would be removed, and the site would be restored to pre-project use as a recreational field.		
2012019012	Lake or Streambed Alteration Agreement (Agreement) No. R1-08-0005 for Timber Harvesting Plan (THP) 1-07-172 "Table Mountain 10" Forestry and Fire Protection, Department of --Mendocino The DFG is issuing an agreement for three encroachments: one temporary culvert installation and two permanent culvert replacement at proposed drafting locations.	<b>NOD</b>	
2012018194	Emerald Necklace - Mountain View High School Greening Resources Agency, The El Monte--Los Angeles Enhance the campus landscape at Mountain View High School with native trees and shrubs and outdoor environmental education interpretive signage.	<b>NOE</b>	
2012018195	Emerald Necklace - SW Corner of Ramona Blvd and San Gabriel River Landscape Improvements Resources Agency, The El Monte--Los Angeles Enhance/improve existing park landscape at existing site with native and low water use trees and shrubs. Utilize best management practices, storm water management and bioswales as appropriate. Enhance irrigation and drainage. Create/enhance outdoor cultural and interpretive signage. Enhance/improve existing amenities, hardscape and trails as appropriate.	<b>NOE</b>	
2012018196	Emerald Necklace - Durfee Thompson Outdoor Educational Trail Resources Agency, The El Monte--Los Angeles Enhance the existing playground at Durfee Elementary school as an outdoor education area. The site is located in the SE corner of an existing turf sports field and consists of approximately 71,894 square feet (1.65 acres). The project will be developed in two phases, with approximately 34,603 square feet in the first phase and 37,291 square feet in the second phase. The outdoor education area will include a gathering space with benches for seating surrounded by mounded and depressed landscape areas and display different ecological resources of the region including oak woodland, sage scrub and riparian habitat. Trees and shrubs will be part of the display for interpretation by the teachers.	<b>NOE</b>	
2012018197	Emerald Necklace/San Gabriel River Trail Project Resources Agency, The El Monte--Los Angeles Enhance existing trails and recreation areas along 15 acres of river channel edge extending approximately 5 miles between Lower Azusa Road and Peck Road South. The project will include landscaping, tree and shrub planting, viewing areas, educational and way-finding signage, and trail amenities.	<b>NOE</b>

2012018198	<p>Permitting and Operation of Well 211 and On-site Chlorination System Public Health, Department of Temecula--Riverside</p> <p>The California Department of Public Health is a responsible agency for this project. The Rancho California Water District (District) has proposed to change the status of Well 211 from standby to active. Well 211 was put into standby status by the District approximately five years ago. The well has recently been cleaned, the pump repaired, and an on-site chlorine generator system installed. The installation of the on-site sodium hypochlorite generation system allowed the removal of the existing gas disinfection system.</p>	<b>NOE</b>	
2012018199	<p>Sale of a 3+/- Acre Portion of the Washington Avenue School Site McKinleyville Union School District --Humboldt</p> <p>Sale to the McKinleyville Community Services District of a 3+/-acre portion of a 10+/-acre parcel declared by the district's governing board to be surplus real property. The proceeds of the sale will be used for purposes identified in Education Code Section 17462 and the sale will benefit both the students and residents of the district.</p>	<b>NOE</b>	
2012018200	<p>Agreement 2011-0194-R4 - Merced River Riparian Habitat Restoration Project Fish &amp; Game #4 Livingston--Merced</p> <p>The Project consists of implementation of bank stabilization and restoration of riparian habitat. Approximately 1,300 linear feet of Arundo donax will be removed and approximately 4,500 cubic yards of substrate will be excavated in order to create 2:1 bank slope. Approximately 490-linear feet by 10 feet wide of angular rock will be installed on the lower portion of the bank. Riparian vegetation will be planted in order to prevent further erosion and provide wildlife habitat. Ground cover species will be planted using a broadcast seeder and scarified using a sprint tooth rake attached to a All Terrain Vehicle (ATV). Water will be present during the proposed work period; however, work will not occur in the wetted portion of the channel.</p>	<b>NOE</b>	
2012018201	<p>Agreement 2011-0179-R4 - Rabobank #2819 Culvert Repair Project Fish &amp; Game #4 Modesto--Stanislaus</p> <p>The Project consists of repairing two (2) existing culverts within approximately 20-linear feet. Existing concrete will be demolished and removed. Base materials will be removed and hauled off. The tree root that has caused damage to the culverts will be removed. New 30-inch culverts will be installed along with 3/4-inch crushed rock as needed. Form will be constructed and concrete will be poured. Approximately 5-cubic yards of rock and Portland concrete will be used. Water will not be present during the proposed work period; therefore, work will not occur in the wetted portion of the channel.</p>	<b>NOE</b>	
2012018202	<p>Streambed Alteration Agreement No. 1600-2011-0013-R4 for Outlet Canal Pipeline Relocation (Project) Fish &amp; Game #4 --Kern</p> <p>The Project includes the removal of pipe from the existing pipe bridge that presently spans across the Outlet Canal. The pipe will be relocated to cross the Outlet Canal via trench. The trench will measure approximately 140 feet by 5 feet by 5 feet and will be excavated when the Outlet Canal is dry using an excavator,</p>	<b>NOE</b>

	which will be stationed at the top of the banks of the canals. Pipe will be laid and trench will be backfilled with the same soil and surface contoured to grade upon completion.		
2012018203	Hendy Avenue Complete Street Improvements Sunnyvale, City of Sunnyvale--Santa Clara The Hendy Avenue Complete Street Improvement Project is a streetscape project that will widen sidewalks, install street trees, street lighting, and street furniture, provide bicycle lanes and bicycle parking, install new curbs and gutters, ADA curb ramps, make minor drainage modifications, removal and replacement of the existing pavement section, and signing and striping along the roadway segments. Also included in the project is relocation of the existing utility poles by the utility companies.	<b>NOE</b>	
2012018204	Archaeological Pre-Testing for Site Stabilization Parks and Recreation, Department of --San Diego The project shall remove data from archaeological site CA-SDI-9588B that is being damaged by erosion. Consultation with a geologic engineer shall take place to ensure appropriate methods are used for excavation and stabilization of the site.	<b>NOE</b>	
2012018205	Ramona West End Extension Fuel Reduction Forestry and Fire Protection, Board of --San Bernardino This project proposes to reduce the fuel loading adjacent to the existing private road by removing shrubs for a distance 10' on both sides of the road for a linear distance of 3350'. Additionally, shrubs will be thinned to 50% crown closure from beyond the 10' to a total distance of 30' on both sides of the road. All work will be performed by CAL FIRE hand crews using hand tools, chain saws and diesel powered chipper. Total project treatment area is 4.5 acres. Shrubs will be cut above ground level with root structures left in place. Mature trees will be left in place and trimmed to a height of 13.5' where they overhang roadway.	<b>NOE</b>	
2012018206	2012 Boat Launch Ramp Maintenance Dredging San Mateo County Harbor District --San Mateo The San Mateo County Harbor District (District) proposes to perform maintenance dredging at, and in the vicinity of, the existing public boat launch area at Pillar Point Harbor. Heavy shoaling has rendered the easternmost public boat launch ramps unusable, hindering public access. The removal of approximately 5,000 CY of shoaled material is required to re-establish public access at these boat launch ramps. The proposed dredge material site, located at Perched Beach, is an approved dredge material disposal site for the District, and has been used for prior Pillar Point Harbor dredging activities - most recently in 1998 and 2008. The maintenance dredging is expected to occur in the spring of 2012.	<b>NOE</b>	
2012018207	Embankment Repair Project Caltrans #3 --Nevada The scope of work includes: Reconstructing the highway embankment by placing wood debris into the void of the embankment. Additional work will include the placement of a large root ball which will then be surrounded by rock slope protection.	<b>NOE</b>

	distribution of single-use carryout paper and plastic bags at the point of sale (i.e., check-out) for all commercial retail businesses in Ukiah, on a phased timetable depending on the type of retail establishment (see detailed project description in DEIR).		
2011012006	Use Permit Application No. 2010-03 - Fink Road Solar Farm Stanislaus County Newman--Stanislaus Request to establish a photovoltaic (PV) solar energy farm creating an aggregate peak power capacity of 80-100 megawatts (MW) of electricity on ~800 acres of a ~1,687 acre site. The construction will be in multiple phases with each phases with each phase being 20 MW consisting of approximately 1,400 trackers with 84,000 PV panels arranged in sub-arrays set on steel posts and aligned in rows utilizing single and dual axis trackers and all required devices. Additional site improvements include: all weather fire access roads; maintenance building; security fencing; construction staging area; and a transmission interconnect to an existing transmission line to PG&E's Solano substation.	<b>MND</b>	02/24/2012
2012011054	Joint Effort Regional Water Supply Project Rowland Water District La Habra Heights--Los Angeles The proposed project involves the construction of an interconnection for water transmission between the CA Domestic Water Company (CDWC) and Rowland Water District. This Project will allow RWD to purchase water from CDWC. CDWC will transmit water to RWD via a series of existing booster pump stations and transmission pipelines. In addition, this interconnection will represent a diversification of the water supply portfolio at RWD's disposal which will increase supply reliability and availability for RWD's customers.	<b>MND</b>	02/24/2012
2012011056	Zebra Mussel Eradication Project: San Justo Reservoir, Hollister Conduit, & SBCWD Subsystems San Benito County Water District Hollister--San Benito The eradication of zebra mussels in San Justo Reservoir and pipeline infrastructure in San Benito County is two-fold and involves: 1) the treatment of San Justo Reservoir using muriate of potash (potash or potassium chloride); and 2) the treatment of the Hollister Conduit in combination with District-owned water delivery conveyances (pipeline system) using potash. It is important that this two-fold eradication be implemented concurrently, as eradication zebra mussels in the reservoir without eradicating them in the pipeline, and vice versa, would allow re-infestation of both appurtenant infrastructures.	<b>MND</b>	02/24/2012
2012011057	Allow a Small Winery Facility Fresno County Fresno--Fresno Allow a small winery facility on a 20-acre parcel in the AE-20 (Exclusive Agricultural, 20-acre minimum parcel size) Zone District. The project site is located on the southeast corner of E. Muscat and S. Locan Avenues, approximately two miles southeast of the nearest city limits of the City of Fresno (7527 E. Muscat Avenue) (Sup.Dist.: 4) (APN: 331-040-18).	<b>MND</b>	02/24/2012

2011042024	Lost Coast Brewery Proposed General Plan and Zoning Amendments, Conditional Use Permit, and Lot Line Adjustment Eureka, City of Eureka--Humboldt The Lost Coast Brewery is proposing a General Plan Amendment, Zone Reclassification, Text Amendment, CUP, and Lot-Line Adjustment for a new craft brewery facility in Eureka. This would allow the Lost Coast Brewery to relocate and expand its existing brewery operations currently located on West Third Street, while retaining the existing Lost Coast Brewery and Cafe located on Fourth Street in downtown Eureka.  The Eureka City Council accepted the Lost Coast Brewery's General Plan and Zone Reclassification, Petition request on May 4, 2010, thereby authorizing the applicant to submit an application to amend the City's General Plan and zoning designation to commercial use at the project site. APN 019-341-002 has a current General Plan designation of Public-Quasi Public (PQP) and is zoned Public (P), while APN 019-211-001 currently has a General Plan designation of PQP and is zoned Service Commercial. The proposed General Plan amendment would re-classify both parcels in the project site to General Service Commercial, and the proposed zoning amendment would reclassify LLA Parcel 1 to CS, consistent with the zoning on APN 019-211-001.	<b>MND</b>	02/27/2012
2012011062	Redlands Distribution Center Redlands, City of Redlands--San Bernardino The project is located on the north side of Palmetto Avenue, the west side of Nevada Street and the east side of CA Street within the EV/OS (Open Space) District of the East Valley Corridor Specific Plan with a General Plan land use designation of Agricultural/City Grove. The project site is approximately 37.4 acres and includes Assessor's Parcel No.s 0292-044-09, 10, 11, and 12. The property is generally flat and contains a citrus grove.	<b>MND</b>	02/27/2012

2010042043	Napa Downtwon Specific Plan Napa, City of Napa--Napa The Downtown Napa Specific Plan would guide all new development in the Planning Area through detailed policies, design guidelines and development standards and financing mechanisms. New development projects would be required to follow the policies, programs and guidelines set forth in the specific plan. Existing developments would not be directly affected unless the occupants or owners choose to expand or change their structures, grounds or uses.	<b>NOP</b>	02/27/2012
2012012057	Two Year Water Purchase Agreeemtn for San Joaquin River Flow Merced Irrigation District --Merced, Mariposa The Board is currently undertaking a review of the San Joaquin River flow objectives originally adopted in the 1995 Bay-Delta Plan. It is considering making significant changes to both the flow objectives and the program of implementation of those objectives. The Board expects to have a new plan for the San Joaquin River flow objectives available for public review by approximately September 2012. Following adoption of a new Water Quality Control Plan for the San Francisco Bay/Sacramento-San Joaquin Delta Estuary, the Board will then begin its process for implementing the flow objectives.  The purpose of the proposed action is for Reclamation and MID to enter into a two year agreement with each other, establishing a mechanism to assist Reclamation in implementing the Board's D-1641 flow targets following expiration of the SJRA, and before the Board adopts a new implementation plan for San Joaquin River Basin flow objectives. It would be a "stop gap" measure which provides for spring pulse flows in the San Joaquin River at Vernalis despite the expiration of the SJRA.	<b>Neg</b>	02/27/2012
2008051022	Tierra Luna Specific Plan EIR Downey, City of Downey--Los Angeles A specific plan amendment to modify the provision regulating the central 77 acres of the Downey Landing Specific Plan to allow for the development of the 1,516,000 sq ft Tierra Luna Marketplace, a mixed-use project consisting of 1,100,000 sq ft of retail floor space, 300,000 sq ft of office floor area and a 116,000 sq ft, 150-room hotel. Three other applications filed in connection with the development include Tentative Parcel Map No. 71543, a request to divide the easterly 20 acres into four parcels, Tentative Tract Map No. 71544, a request to re-subdivide the westerly 57 acres into 16 lots, and a development agreement between the City and the applicant.	<b>NOD</b>	
2011111048	Aromas Water District Sphere of Influence Amendment & Annexation of Oak Ridge & Via Del Sol Subdivision Aromas Water District --Monterey The proposed project consists of the following element: 1) Sphere of Influence amendment to add approximately 1,720 acres within the AWD's SOI boundary within Monterey County; 2) Annexation of two existing subdivisions to the Aromas Water District and provision of domestic water service to approximately 72 existing homes in order to provide potable water supplies to existing residences that are experiencing water supply problems (the annexation areas are within the proposed SOI amendment area); 3) Creation of an assessment district to finance	<b>NOD</b>

	improvements for the proposed annexation areas; AND 4) Construction of water system improvements to serve the proposed annexation areas, which includes extension of water lines and construction of a pump station and new water storage tank.		
2011121040	Poppy Holdings Inc Monterey County Carmel-by-the-Sea, Pacific Grove--Monterey Combined Development Permit consisting of: 1) a Coastal Development Permit to allow the renovation of the Poppy Hills Golf Course to include: removal of the existing irrigation system and installation of a new irrigation system including new irrigation lines, new programming/timing devices and new controllers with current technology in conjunction with sand-capping the existing golf course, driving range and practice putting green to improve water conservation and drainage; and changes to the alignment of specific holes to reduce irrigation and improve play. The project will include approximately 61,000 cubic yards of grading which will be balanced on site and the import of approximately 55,000 cubic yards of sand for the sand-capping component; 2) a Coastal Administrative Permit to allow the demolition of the existing snack bar and construction of a new 336 square foot snack bar and 1,000 s.f. dining patio; 3) a Coastal Development Permit for development within 100 feet of environmentally sensitive habitat; 4) a Coastal Development Permit to allow the removal of 533 trees; 5) Design Approval; and 6) a General Development Plan. The property is located at 3200 Lopez Road, Pebble Beach (Assessor's Parcel Numbers 008-031-016-000 & 008-032-003-000), Del Monte Forest Land Use Plan, Coastal Zone.	<b>NOD</b>	
2011121059	Templeton Road Widening Project; 300386 San Luis Obispo County --San Luis Obispo Construct improvements to Templeton Road between South El Pomar Road and Bluebird Hill Lane including: widen Templeton Road to two 12-foot travel lanes with 4-foot paved shoulders, and improve drainage. The Project also includes realigning a jurisdictional roadside drainage ditch. The Project's goal is to improve safety by allowing for more recovery room for vehicles along Templeton Road. Most of the work will be conducted within the County right of way; however, 8 adjacent parcels will be subject to disturbance. The Project is anticipated to result in approximately 3.9 acres of total disturbance.	<b>NOD</b>	
2011122048	Delta Fish Survival Improvements Program Skinner Fish Science Building Water Resources, Department of Byron--Contra Costa The project will include the construction of a fish aquaculture building, storage building, a covered outdoor work area, an uncovered equipment pad, an access platform to pumps that will withdraw water from the intake canal, a parking area for personnel, and separate concrete pads for a transformer and a back-up generator. Once these buildings are completed they will allow DWR to perform the types of fish research required by the Operations, Criteria and Plan Biological Opinion's issued by USFWS and NMFS for the State Water Project. The work will occur between October 2012 and August 2013.	<b>NOD</b>

2012018218	School of Business Unit 2 University of California, Irvine Irvine--Orange The project would construct an approximately 78,250 gross s.f. building for the UCI Paul Merage School of Business (SB). The proposed four to six floor Business Unit 2 (SB2) building is anticipated to consist of academic/support staff offices, an auditorium, food service facilities, and computing/ classroom support, instructional, and research /scholarly activity spaces. The SB2 will serve existing SB programs by addressing current space shortages, providing improved space to meet program and technical requirements for state-of-the art business education, and centralizing them within adjacent buildings, as well as accommodating anticipated program growth.	<b>NOE</b>	
2012018219	New Residences at 1031 Meadowbrook Road Project Fish & Game #6 --San Bernardino The Applicant impacted streambed and associated riparian vegetation at the above mentioned location. The Applicant impacted streambeds and associated riparian vegetation at the above mentioned location. The Applicant installed a minimum of 200 feet of 30-inch corrugated metal pipe and a concrete headwall within one ephemeral drainage, disturbed the bed and bank and placed rock riprap within a second ephemeral drainage, removed vegetation and stockpiled sediment and vegetative debris within a third ephemeral drainage, diverted and undergrounded approximately 100 feet of flow from a natural spring, and removed a minimum of 0.3 acres of Salix spp. dominated riparian habitat across the project site. Total impacts are estimated to include approximately 0.5 acres of jurisdictional areas, consisting entirely of ephemeral streambed habitat. The Agreement authorizes the Applicant to install Best Management Practices (BMPs) across the project site and to remove approximately 10 cubic yards of sediment and vegetative debris that was stockpiled in the ephemeral drainage at the southeastern corner of the property, adjacent to the "driveway" (depicted on plans provided to the Department during a site visit on January 20, 2012). Stockpiled material shall be placed in the "overflow parking" area, and BMPs shall be installed to prevent runoff.	<b>NOE</b>	
2012018220	Small Management Yards for the Psychiatric Services Unit at CA State Prison - Sacramento, Folsom, CA Corrections and Rehabilitation, Department of Sacramento--Sacramento The project consists of the construction of Small Management Yards (SMY) adjacent to the Psychiatric Services Unit (PSU) at CA State Prison, Sacramento. The purpose of the project is to comply with the CA Code of Regulations, Title 15, Section 3343(h), which requires that inmates in special purpose housing units have access to out-of-cell exercise time. CDCR has determined that the construction of individual SMY is the safest to provide exercise to inmates, because it eliminates the need for armed supervision of group yards, and simultaneously eliminates the possibility of inmate-on-inmate violence.  The proposed project would consist of the construction of 11 SMY in a previously-developed area adjacent to the PSU. Each SMY is a square enclosure constructed of steel mesh on a concrete pad, and measures approximately 12' by 12', with a total area of approximately 150 s.f.	<b>NOE</b>

<b><u>Documents Received on Monday, January 30, 2012</u></b>			
2004101032	<p>Master Storm Water System Maintenance Program San Diego, City of San Diego--San Diego</p> <p>Master Site Development (SDP) and Coastal Development Permit (CDP) for the long-term maintenance of storm water facilities maintained by the Storm Water Division (SWD) of the City of San Diego's Transportation and Storm Water Department (T&amp;SWD). The storm water facilities include a series of natural and/or constructed drainage channels. The Master Program identifies the maintenance activities anticipated to be carried out for each storm water facility. The Master Program also establishes a series of protocols to be carried out during maintenance activities that are intended to minimize impacts related to soil and erosion, water quality, and wildlife disruption.</p>	<b>NOD</b>	
2006082150	<p>Upper Truckee River Restoration and Golf Course Relocation Project Parks and Recreation, Department of South Lake Tahoe--El Dorado</p> <p>The primary purpose of the project is to restore natural geomorphic and ecological processes along the reach of the Upper Truckee River within Washoe Meadows State Park and Lake Valley State Recreation Area and to reduce the river's suspended sediment discharge to Lake Tahoe. The project includes reconfiguration of the Lake Tahoe Golf Course to allow for restoration of the river and to reduce the area of Stream Environment Zone occupied by the golf course. The project includes adjustment of the boundaries between the two park units.</p>	<b>NOD</b>	
2007091072	<p>CIP 8164/8168: Gravity Main Ductile Iron Pipe Rehabilitation Vista, City of Vista--San Diego</p> <p>The Project will provide greater collection system reliability, and decrease infiltration and inflow and sanitary sewer overflows. The Project involves rehabilitating approximately 10,800 feet of the existing 36-inch ductile iron pipe using the cured-in-place pipe rehabilitation methods. The Project also involves rehabilitating 25 manholes along the pipeline route using either spray-on epoxy or a polyurethane liner.</p>	<b>NOD</b>	
2009101036	<p>St. Paul's Cathedral and Residences San Diego, City of --San Diego</p> <p>The project consists of 110 dwelling units in two mixed-use residential buildings, both with underground parking: one with 65 dwelling units, 924 s.f. of commercial/retail, and 14,209 s.f. of offices; and the other with 45 dwelling units, 5,185 s.f. of commercial/retail, and 5,818 s.f. of offices. Eleven of the dwelling units would be reserved as affordable units for occupancy by income-qualified households. The project would also include improvements for additional religious use facilities at St. Paul's Cathedral.</p>	<b>NOD</b>	
2009102020	<p>Patterson Plaza Project Patterson, City of Patterson--Stanislaus</p> <p>Amendment of Mitigation Measure: TRANS-1b in the Mitigation Monitoring and Reporting Program incorporated into Council Resolution #2010-77 (certifying the Final EIR for the Patterson Plaza Project - Walmart) to require the applicant to install the roadway improvements identified in Measure TRANS-1b in lieu of a traffic signal at the Sperry Avenue/SR 33 intersection and ratification of the 12/23/11 deletion of Condition of Approval No. 48 also requiring the applicant to</p>	<b>NOD</b>

	install a traffic signal and undertake related work required to obtain the necessary encroachment permit for work in the State right of way and the unavailability of traffic impact fee funding to reimburse the applicant as was required by Measure TRANS-1b and Condition of Approval No. 48.		
2010091052	Newport Beach Country Club Newport Beach, City of Newport Beach--Orange The applicant is proposing the demolition of the existing tennis and golf clubhouses and the construction of a new tennis clubhouse (3,735sf) golf Clubhouse (35,000sf) and ancillary facilities (i.e., cart barn). The applicant is also proposing to construct 27 short-term visitor-serving units ("Bungalows") and Bugalows spa/fitness area and concierge and guest meeting facilities; and five single-family residential dwelling units ("Villas") on the subject property. Project implementation will necessitate the approval of the following discretionary actions: (1) Vesting Tentative Tract Map; (2) Development Agreement; (3) Approval in Concept for a Coastal Development Permit; (4) Transfer of Development Rights; and (5) Planned Community Text adoption.	<b>NOD</b>	
2011081008	Poway Road Bike Path San Diego, City of --San Diego Site Development Permit to allow for the construction of a 10-foot wide Class I Bike Path to replace an existing five-foot wide sidewalk along an approximately 1,875 linear-foot portion of Poway Road totaling 1.06 acres (see Figure 2, Site Plan). Two feet of horizontal clearance would be provided along each side of the bike path. The existing five-foot wide Class II Bike Lane would be converted into a traffic shoulder; the guard rail would be relocated and replaced, as needed; and the chain-link fence would be relocated and replaced with a four-foot tall, black, vinyl-coated, chain-link fence along the southern edge of the bike path. The existing widths of the eastbound traffic lanes along Poway Road would remain unchanged.	<b>NOD</b>	
2011081045	Mecca Senoir Center Riverside County --Riverside The proposed project consists of construction and operation of a senior/community center approximately 17,000 square feet in size on 1.9 property.	<b>NOD</b>	
2011091091	Location and Development Plan 11-04, CUP 11-05 Adelanto, City of Adelanto--San Bernardino The proposed project is for a four megawatt solar power generating facility on approximately 35 acres of land in the Manufacturing/Industrial (MI) Zone.	<b>NOD</b>	
2011111036	Formerly Used Defense Site Camp San Luis Obispo Remedial Investigation/Feasibility Study (RI/FS) Toxic Substances Control, Department of San Luis Obispo--San Luis Obispo In accordance with California Health and Safety Code, Chapter 6.8, Section 25300 et seq.. the project is the approval by DTSC of a Remedial Investigation/Feasibility Study (RI/FS) for Camp San Luis Obispo (CSLO) (June 2011) to investigate Munitions Response Site (MRS)-01, MRS-05, CSLO. Under the project, the United States Army Corps of Engineers proposes to execute the RI/FS to define target areas at MRS01, MRS-02, and MRS-05, found that are unsafe to move and need	<b>NOD</b>

2000112054	Temporary Barriers Project, 2001-2007 Water Resources, Department of Lathrop, Tracy--San Joaquin The Temporary Barriers Project proposes to seasonally install up to three rock flow control structures and one fish control structure in south Delta channels at various times during a five-year period (2012-2016), or until permanent structures (or their functional equivalent) are constructed. Addendum is to adjust project details and work season.	<b>NOD</b>	
2011061060	Reservoir No. 1 Reconstruction Project Burbank, City of Burbank--Los Angeles Reservoir No. 1 will be demolished and two not-in-jurisdiction reinforced concrete tanks will be constructed.	<b>NOD</b>	
2011091034	Andree Clark Bird Refuge Vegetation Maintenance and Habitat Restoration Project Santa Barbara, City of Santa Barbara--Santa Barbara The Permittee proposes to restore water circulation, reduce flooding and control mosquitoes at the lake. Maintenance includes opening a culvert along Old Coast Highway located at 1414 Park Place; removing bulrush, tules and cattails; and restoring native vegetation along the lake. Maintenance will occur in four areas.	<b>NOD</b>	
2011111068	Upper Narrows Pipeline Replacement Project Victor Valley Wastewater Reclamation Authority Victorville--San Bernardino VWVRA is a regional provider of wastewater collection, treatment and reclamation services with a service area encompassing approximately 211 square miles and treating up to approximately 14 million gallons per day (MGD). VWVRA currently serves a population of approximately 350,000 people. Existing temporary sewage conveyance facilities installed since the storms of December 2010 and January 2011 are inadequate for permanent use. Therefore, action is needed to restore permanent regional wastewater conveyance facilities to replace those that were damaged during the disaster. In addition, the objective of the proposed Project is to provide greater public health safety for residents who are serviced by this sewer line, while protecting the waters of the Mojave River, community water supply, and the ecosystem from pollution caused by potential sewer ruptures during future major flooding events.	<b>NOD</b>	
2012018252	AMOT Controls Site, Response Plan Toxic Substances Control, Department of Richmond--Contra Costa Th project serves to remediate soil and groundwater contamination caused by industrial activities at the location of the former AMOT Controls Corporation in Richmond (Site). The 0.7-acre Site is located in an area with a mixture of residential, commercial, and industrial uses. The Site is bordered on the north by storage yards, on the east by First Street, on the south by Nevin Avenue, and on the west by A Street. AMOT Controls, which manufactured metal components for industrial control devices, operated at the Site from about 1947 to 2005. Halogenated volatile organic compounds (HVOCs) were used for cleaning metal parts.	<b>NOE</b>
