

Arnold Schwarzenegger, Governor

STATE CLEARINGHOUSE

NEWSLETTER

July 1-15, 2008

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **July 1-15, 2008**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov/clearinghouse/clearinghouse.shtml

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Senior Planner

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 212) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 2001 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

MEMORANDUM

DATE: February 13, 2007
TO: State Agency CEQA and Intergovernmental Review Coordinators
FROM: Scott Morgan, Senior Planner
SUBJECT: Distribution of Environmental Documents in CD-ROM Format

The State Clearinghouse has received an increasing number of requests from local and state lead agencies to distribute CEQA documents to state reviewing agencies in an electronic format, typically CD-ROM. The most common reason for these requests is to reduce cost. CD-ROMs are cheaper for the lead agency to reproduce and mail, and cheaper for the State Clearinghouse to distribute, especially in the case of multi-volume documents.

The State Clearinghouse has distributed EIR's and EIS's in CD-ROM format for state agency review and comment since August 1, 2003. Based on our experience with those documents, a survey conducted of state reviewing agencies and the potential cost savings to local and state agencies, we are extending this policy to other environmental documents including Negative Declarations, Mitigated Negative Declarations and Environmental Assessments. The State Clearinghouse will accept environmental documents under the following terms:

- CEQA Lead agencies may provide copies of draft environmental documents to the State Clearinghouse for state agency review in an electronic format. The document must be on a CD-ROM in a common file format such as Word or Acrobat.
- Lead agencies must provide fifteen (15) copies of the CD-ROM to the State Clearinghouse. In addition, each CD-ROM must be accompanied by 15 printed copies of the DEIR summary (as described in CEQA Guidelines §15123), executive summary, or introduction section of a Negative Declaration or Mitigated Negative Declaration. The printed summary allows both the State Clearinghouse and agency CEQA coordinators to distribute the documents quickly without the use of a computer.
- Final environmental documents may be provided in CD-ROM format without a printed summary. Distribution of the final documents is optional under CEQA.
- Federal lead agencies may send electronic copies of environmental documents to the State Clearinghouse in the same manner described for CEQA lead agencies. Distribution of NEPA documents to state agencies through the State Clearinghouse is encouraged pursuant to Presidential Executive Order 12372 and NEPA §102 (42 USC §4332)
- All notices of preparation must continue to be provided in printed format.
- Please provide one Notice of Completion Form with all submittals.

If your agency has difficulty downloading and reviewing any environmental documents please contact:

Scott Morgan, Senior Planner
916-445-0613
scott.morgan@opr.ca.gov

Thank you for your cooperation in the CEQA review process.

**ENVIRONMENTAL DOCUMENT FILINGS WITH THE STATE CLEARINGHOUSE
1999 through 2007**

All CEQA documents filed with the State Clearinghouse are available for viewing on the Internet at <http://www.ceqanet.ca.gov/>

2008011013	<p>WCCUSD Charter Schools Construction & Modernization & City of Richmond MLK Community Center & Park West Contra Costa Unified School District Richmond--Contra Costa</p> <p>The primary purpose and objective of the Project Site A and Project Site B portion of the proposed project is to provide students with modern school facilities that would adequately accommodate student and faculty needs. The proposed project would fulfill the District's obligations to provide equivalent facilities to the RCP and LPS charter schools. At project completion at Project Site A, the existing facilities would have been demolished and new facilities would have been constructed. At project completion at Project Site B, the existing 1-story facilities would have been demolished, modernization of both wings of the existing Nystrom Elementary School building would have been completed, and a new temporary modular unit campus, new multi-use facility, and new play areas would have been constructed. Additionally, South 11th Street would transition to a pedestrian area and a new driveway would have been constructed between South Harbour Way and South 12th Street.</p> <p>The primary purpose and objective for the Project Site C portion of the proposed project is to address the existing maintenance needs at the MLK Community Center and Park such that the area is more usable and accessible to the wider community and to renovate the site design for the entire MLK Community Center and park to integrate it with the improvements for Nystrom Elementary School campus (Project Site B). At project completion at Project Site C, some of the existing facilities and outdoor recreation space would have been renovated.</p>	EIR	08/14/2008

	round-trips on Saturdays and Sundays.		
2004111112	Santa Margarita Ranch Ag Cluster Subdivision San Luis Obispo County --San Luis Obispo Subdivision of a 6,050-acre site into 111 clustered lots (1.0-2.5 acres each), 3,633 open space easement, a 2,417-acre remainder, two wineries, and two ranch headquarters.	FIN	
2007052144	Walgreens Drug Store (PCPM T20080188) Placer County Auburn--Placer NOTE: Subsequent Mitigated Negative Declaration Project proposes to construct a 15,000 square feet commercial/retail drug store with drive-up window and 6,070 square feet of office/commercial stores with associated improvements.	MND	07/30/2008
2008071001	Santa Ana Regional Interceptor Pipeline Reach IV-B Santa Ana Watershed Project Authority Corona--Riverside The proposed project consists of repairs to the existing pipeline and does not include any new structures or additional pipeline construction. The work efforts associated with the repairs of the pipeline system includes chemical grout repair of interior joints (the pipeline will require at least three repairs), clear and grub work to re-establish the 10-foot wide access road, clear and grub work to provide a 50-foot diameter turn around at manholes, and incidental related work. Localized excavation work around the manholes will be required to expose the manholes and to add riser pieces to the manholes. The manhole risers will be backfilled once the work is complete. No grading or excavation is required for the pipeline.	MND	07/30/2008
2008071002	5418HN-2-07; Tentative Parcel Map 11543; Samson and Xena, LLC Kern County McFarland--Kern Tentative Parcel Map 11543. Proposing to divide a 618 acre site into 30 parcels ranging in size from 20 acres to 25.8 acres for agricultural estate ranch use; two limited design variations; development variations to the Land Division Ordinance to allow a 30-foot wide private access easement where a 60-foot wide public access easement is required and to allow the deletion of turnarounds at 1,320 foot intervals along access easements. Domestic and fire suppression water for the site will be provided by individual wells and sewer service will be provided by individual septic systems. Access is proposed from Famosa Road via a network of private internal streets.	MND	07/30/2008
2008071006	T-6-05, D-10-05, C-25-05 Guajome Crest Homes Oceanside, City of Oceanside--San Diego Consideration of a Tentative Subdivision Map (T-6-05), Development Plan (D-10-05), and Conditional Use Permit (C-25-05) to subdivide an existing 16.84-acre parcel and create 33 residential lots with three lots having panhandle access and all lots sharing the use of an equestrian facility. The project site is situated within the RS-SP-EQ Districts and the Guajome Neighborhood.	MND	07/30/2008

	Trailhead. Because the original trail is currently a mountain biking route, the trail conversion would be designed for mountain biking and hiking.		
2008072003	Pulgas Discharge Channel Modifications Project San Francisco, City and County of Belmont--San Mateo The proposed project includes repairs of and modifications to an existing water facility (owned by the SFPUC in unincorporated San Mateo County) to improve water delivery reliability. The project would increase the height of the Pulgas Discharge Channel walls, repair cracks and corroded reinforcing steel (rebar) in the discharge channel walls and stab, and replace a broken subdrain pipe.	MND	07/30/2008
2008031082	Parklands Specific Plan and Tentative Map San Buenaventura, City of Ventura--Ventura The proposed project involves a Specific Plan and subdivision for the future development of a 66.7-acre eight-parcel area in the City of Ventura, Wells Community area. The proposal would involve annexation of three parcels currently under agricultural production from the County to the City. The proposal involves a General Plan Amendment changing Figure 4.3 Roadway Classification Plan of the 2005 General Plan Telegraph Road and Carlos Street from secondary arterial with four travel lanes to collector with two travel lanes. A zone change from AE-40 (County-Agricultural Exclusive) and R-1-7 (City-Residential Single-Family) to T-4 Corridor, T-3.1 Neighborhood Edge and to T-3.2 Neighborhood General. The remaining five parcels are currently located in the city limits. The 66.7-acre specific plan area is located at the southwest corner of the intersection of Telegraph Road on the north, Wells Road on the east, Blackburn Road and State Route 126 (SR-126) on the south, and single-family homes and a mobile home park on the east.	NOP	07/30/2008
2008071003	Sunset Time Project West Hollywood, City of West Hollywood--Los Angeles The proposed project involves the redevelopment of four contiguous parcels totaling approximately 2.0 acres with 149 hotel rooms, 40 residential condominium units, 5 low-income affordable housing units, commercial and entertainment space, and parking. The proposed uses would be located within four buildings: Sunset Hotel and Residences; Olive Hotel and Residences; Olive Residences; and De Longpre Residences.	NOP	07/30/2008
2008071004	Europa Village Riverside County Temecula--Riverside The proposed Europa Village project includes the construction of three separate wineries representing three different regions from counties in Europe on approximately forty (40) gross acres. Plot Plan No. 23319, C'est la Vie Winery, proposes a 33,349 square foot French-style country estate winery consisting of a tasting room, a restaurant, a fermentation room, a barrel storage room, a retail area, and automobile collection display area, a bed and breakfast with ten (10) rooms, administrative offices, and a basement with a wine library on ten (10) gross acres. Plot Plan No. 23320, Bolero Cellars, proposes a 24,518 square foot Spanish-style winery consisting of a tasting room, a restaurant, a retail area, a fermentation room, a barrel storage room, administrative office, and a bed and breakfast with 10 rooms on ten (10) gross acres. 2008072004	Jennings Estates Sacramento, City of Sacramento--Sacramento The proposed project requests to subdivide approximately 5.23 acres into 15 lots, including twelve (12) detached single-family residential lots, two (2) halfplex lots, and (1) open space remainder lot in the Standard Single-Family (R-1) Zone.	Neg	07/30/2008
1983051706	Devil's Slide Improvement Project Caltrans, Planning Pacifica, Half Moon Bay--San Mateo The project is an amendment to Streambed Alteration Agreement #1600-2004-0136-3 for the Devil's Slide Bypass Project. This amendment allows for the installation of a flex pipe that will convey overflow water from the top of the south pond dam down to a concrete junction box for a length of approximately 200 feet. This flex pipe installation was designed in coordination with the U.S. Fish and Wildlife Service and Department of Fish and Game to address an ongoing erosion problem, thereby conserving the south pond as habitat mitigation for the California red-legged frog in perpetuity. The existing vegetation will be monitored for a period of five years to ensure survival. If after five years of monitoring a net loss in riparian vegetation is observed, Caltrans will submit a riparian planting mitigation and monitoring plan for approval by the Department of Fish and Game by December 30, 2012.	NOD	
	The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2004-0136-3 pursuant to Section 1602 of the Fish and Game Code to the project applicant, Mr. Jeffrey Jensen, California Department of Transportation.

1999082041	<p>Modesto Urban Area General Plan Amendment-Housing Element Update Modesto, City of Modesto--Stanislaus</p> <p>A Conditional Use Permit to allow the establishment of a three-story, 121-unit assisted-living and memory-care facility for senior residents on 2.28 acres within the Baseline Urbanized Area.</p>	NOD	
1999102056	<p>Guadalupe River Project Santa Clara Valley Water District San Jose--Santa Clara</p> <p>As part of the greater flood control project, this portion consists of the construction of a 12-foot wide lower west bank riverwalk/maintenance road beneath Coleman Avenue Bridge, construction of a 12-foot wide east bank maintenance access ramp at Coleman Avenue Bridge, and modifications to the existing Coleman Avenue Bridge abutments. The project is located on the Guadalupe River beneath Coleman Avenue in San Jose. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2008-0187-3 pursuant to Section 1602 of the Fish and Game Code to the project applicant, Ryan Heacock, Santa Clara Valley Water District.</p>	NOD	
2000041024	<p>State Route 134/San Fernando Road Access and Safety Improvements Program Caltrans #7 Glendale, Los Angeles, City of--Los Angeles</p> <p>The project proposes to alter the streambed by improving and extending an existing street (Fairmont Avenue), from its current terminus at San Fernando Road to Flower Street. This extension includes elevating Fairmont Avenue, via a grade-separation viaduct, over San Fernando Road, over the Southern California Regional Rail Authority (SCRRA) railroad tracks and finally over the Verdugo Wash before coming back down to grade north of the Verdugo Wash. The improvements will provide congestion relief for regional and local traffic and improve safety along the affected roadways. There will be no traditional dredging activities associated with this project. The project will result in less than or equal to 0.01 acre of permanent impacts to streambed, bank, and channel. There will be roughly 0.93 acre of temporary impacts from placement of temporary flow diversion facilities (cofferdams, sandbags or similar material) and mobilization of construction staff and equipment.</p>	NOD	
2002041055	<p>Reconstruction and Widening of Road 200 between Spring Valley School and Leprechaun Lane Madera County --Madera</p> <p>The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code to the project applicant, Madera County Resource Management - Roads Department, 201 W. Almond Avenue, Madera, California 93687. The project consists of reconstruction and widening of Road 200 within an 80 foot right-of-way, which will include multiple culvert extensions, replacements, and the installation of three new culverts. During construction, hay bale check dams or other erosion control devices incorporating Best Management Practices will be installed below graded areas to intercept sediments, and following construction, rock slope protections will be installed at inlets and/or outlets. Disturbed riparian areas will be regraded and revegetated with native riparian species following construction.</p>	NOD

2008021111	2008 Plan Amendment to the Merged Central Business District and West End Redevelopment Project Area Azusa, City of Azusa--Los Angeles The 2008 Plan Amendment proposes to: (1) add 15.1 acres of developed land to the existing Merged Project Area, which together is known as the Project Area; (2) increase the tax increment limit of the existing Merged Central Business District and West End Redevelopment Project Area; and (3) reinstate the Agency's eminent domain authority on two commercial properties. The purpose of the 2008 Plan Amendment is to eliminate the conditions of physical and economic blight that exist in the Project Area through rehabilitation, revitalization and reuse of existing properties. This involves the creation of programs to eliminate physical and economic blight, fund infrastructure improvements, and provide incentives that will stimulate economic revitalization of the Project Area. The actions are all being taken in accordance with the provisions of the California Community Redevelopment Law, Health and Safety Code Section 33000, et seq.	NOD	
2008032082	Project # 07-093 (State Route 70 Upgrade Borrow and Aquaculture Sites) Sutter County Yuba City--Sutter A Surface Mining Permit and Reclamation Plan to mine fill material to support the California Department of Transportation (Caltrans) State Route 70 Upgrade Project. A total of 1.5 million cubic yards of fill material will be removed from an area totaling 85 acres on portions of three parcels to a depth of 13-14 feet below ground surface (bgs) or 20.15, 19.39, and 16.82 feet mean sea level (msl). The reclamation plan proposes to return the borrow sites to an agricultural use of aquaculture. The project is anticipated to last approximately five years.	NOD	
2008041066	Inclusionary Housing Zoning Ordinance Amendment (ZOA) Agoura Hills, City of Agoura Hills--Los Angeles Zoning Ordinance Amendment to revise the City's Municipal Code pertaining to inclusionary residential units.	NOD	
2008042122	Coragliotti Minor Subdivision Humboldt County --Humboldt Minor Subdivision of an approximately 21.8 acre parcel into two parcels. Density averaging will allow for the creation of one parcel of approximately 4.3 acres and one parcel of approximately 17.5 acres in size. Proposed Parcel 1 (4.3 acres) is currently developed with a wine processing building of approximately 2,125 square feet in size with an on-site sewage disposal system. Proposed Parcel 2 (17.5 acres) is currently developed with a single family residence, a mobile home and on-site sewage disposal systems. Water is or will be served by the Orleans Community Services District.	NOD

2008078015	Sacramento Pedestrian Signal and Sidewalk Caltrans, Planning Galt--Sacramento Caltrans proposes pedestrian access improvements on State Route 104 overcrossing (Twin Cities Road), Bridge #24-144 over State Route 99 in Galt. The project will widen the existing north sidewalk, install curb ramps, install one or more new signal poles, and construct new metal beam guardrail. The project will bring the pedestrian bridge up to ADA standards.	NOE	
2008078016	Carmelo Meadow and Granite Point Trails Accessibility Improvements Parks and Recreation, Department of --Monterey Perform upgrades to Carmelo Meadow Trail and Granite Point Trail at Point Lobos State Natural Reserve to meet standards of the Americans with Disabilities Act (ADA) and to repair deficiencies associated with normal wear and initial design and layout. Upgrade trail surface to a firm and stable surface by installing compacted aggregate base along the entire length of Carmelo Meadow Trail (1,553') and Granite Point Trail (1,780'). Use existing native soil to supplement aggregate base where possible and to blend trail into the surrounding natural setting. Widen trail to a maximum width of 4 feet where needed. Decompile and re-vegetate existing eroded areas, areas of ground disturbance associated with this project, and abandoned trail section along Granite Point Trail. Install new small trail signs on 4"x" redwood posts at beginning and end points of each trail. Additional work on each trail includes the following: Carmelo Meadow Trail: Reconstruct trail surface as necessary to eliminate obstructions greater than 2" in height, establish a consistent 5% cross-slope (or 2" crown in flat areas), and remove any down slope berms that have been built over time. Granite Point Trail: Reconstruct trail surface as necessary to eliminate entrenchment, improve sheet drainage, and eliminate vertical obstructions.	NOE

2008078025	<p>Reconstructing and Resurfacing of Lerdo Highway between SR 99 and Driver Road- Federal Project ID #KER 060407 Shafter, City of Shafter--Kern</p> <p>Reconstructing and resurfacing of Lerdo Highway between State Route 99 and approximately 850 feet east of the east boundary of Driver Road. The resurfacing and reconstructing of existing traffic lanes located wholly within the City street right-of-way. No work will occur within the State right-of-way. Planned work includes milling up to four inches of pavement and repaving the roadway at various locations on Lerdo Highway. Work between the east boundary of the project and Gate 3 of Shafter-Minter Field Airport (approximately 250 feet west of the midsection line of Section 17, T28S, R26E, MDB&M) may include complete removal and reconstruction of the roadbed in both the eastbound and westbound lanes. Reconstruction work, where needed, will include recompaction of the subgrade, installation of aggregate base, and asphalt paving. No portion of the reconstruction work will occur outside the City right-of-way. Collected grindings will be used toward road shoulder stabilization within eight feet of the existing edge of pavement. Any excess grindings will become the property of the contractor and will be properly disposed of or recycled. Work will not be performed in the following locations: within the west-bound left-turn lane from Lerdo Highway onto Zerker Road, within the Zerker Road/Lerdo Highway intersection, between Carver Street and Carsen Way south of the 24-foot east-bound travel lanes, and at the realigned entrance to Shafter-Minter Field Airport at the Carver Street/North American Street intersection with Lerdo Highway. Equipment will be staged on APN's 091-171-30 and -31, located on the south side of Lerdo Highway, approximately 300 feet west of Zerker Road. The equipment staging area is completely enclosed by an existing fence and no portion of the fencing will be removed or relocated as a result of the project.</p>	NOE	
2008078026	<p>Maintenance/Realignment of the Oroville Brad B. Freeman Bike Trail Water Resources, Department of --</p> <p>The California Department of Water Resources (DWR) is proposing to maintain/realign a 3, 300-foot-long portion of the 41-mile-long Brad B. Freeman Bike Trail. The Brad B. Freeman Trail loop provides scenic off-road recreation, originally constructed primarily for all-terrain bikes. The trail follows shoreline portions of the Thermalito Forebay, Thermalito Afterbay, and the Diversion Pool, and crosses the Oroville Wildlife Area, as well as the crest of Oroville Dam. The portion of the trail is used by hikers, bikers, and equestrians.</p> <p>The project area includes the current trail crossing of the Union Pacific railroad tracks as they approach the southern shoreline of the Diversion Pool near the Lakeland Boulevard trailhead. The project involves trail relocation to pass under the railroad bridge rather than allowing trail users to hazardously cross the tracks at grade (Figure 1). Approximately 3,300 feet of trail would be relocated and 400 feet of fencing would be installed to prevent access to the railroad right of way and tracks. The relocated trail would maintain the same design standards as other portions of the trail including widths of 4 to 6 feet. A few small segments of the relocated trail will be surfaced with a clean road-base material. No mature trees would be removed.</p> <p>The proposed project involves trail relocation and barrier fencing.</p>	NOE

	riprap and soil (mixture of sand and silt suitable for plant growth) on upper banks and tops of the lower bank riprap to create riparian benches above the mean summer water elevation, covering a total area of 10.63 acres; and (3) planting the benches and upper banks with vegetation to provide bank stabilization and riparian habitat. In-stream woody material would also be placed along the sites to provide bank protection and aquatic habitat.		
2008071014	Proposed Amended Rule 1146.1-Emissions of Oxides of Nitrogen from Small Industrial, Institutional, and Commercial Boilers, Steam Generators, and Process Heaters South Coast Air Quality Management District -- NOTE: Joint Document consists of Neg. Dec. & EA.	JD	07/31/2008
	The objective of PAR 1146.1 is to further reduce oxides of nitrogen (NOx) emission limits for boilers, steam generators and process heaters with maximum rated heat input capacities greater than two million BTU per hour (mmBTU/hr) and less than five mmBTU/hr to nine parts per million (ppm) or 0.011 pounds per mmBTU for any units fired on natural gas, except atmospheric units. The proposed NOx limit for atmospheric units would be 12 ppm or 0.015 pounds per mmBTU. PAR 1146.1 will also propose NOx compliance limits for units burning landfill or digester gases at 25 ppm and 15 ppm, respectively. Other changes are proposed that include: 1) establishing a weighted average formula for dual fueled co-fired units; 2) allowing existing units to be de-rated to no less than two million BTU per hour per unit; 3) making the frequency of compliance testing compatible with RECLAIM sources for the same equipment size range; 4) monitoring NOx and CO emissions with a portable analyzer; 5) for low-fuel usage units, requiring compliance with a 30 ppm NOx limit by January 1, 2015 or burner replacement, whichever occurs later; 6) allowing thermal fluid heaters to continue compliance with the 30 ppm NOx limits; and, 7) allowing a later compliance date for health facilities complying with seismic safety requirements. Other minor changes are proposed for clarity and consistency throughout the rule. PAR 1146.1 is estimated to reduce NOx emissions by 0.28 ton per day. The environmental analysis in the Draft EA concluded that PAR 1146.1 would not generate any significant adverse environmental impacts.		
2008071013	Antelope Valley-East Kern Water Agency WSSP-2 Groundwater Recharge Project Antelope Valley-East Kern Water Agency Lancaster--Kern, Los Angeles Utilize up to 1500 acres of agricultural land for groundwater recharge (maintain normal crop rotation). Install wells to extract recharged water, construct and operate buried pipelines to deliver water to AVEK distribution system, and construct small in-line water treatment facilities.	MND	07/31/2008
2008071015	Century High School Alhambra Unified School District Alhambra--Los Angeles The proposed project consists of the removal or demolition of all structures currently on the Century High School campus (eastern section) and AUSD Transportation Facility (western section) located at 20 and 24 South Marengo in the City of Alhambra. The proposed project includes the building of a new Century High School campus (northern section) consisting of three (3) new two-story buildings to house nine (9) classrooms, an administration building, and a food service building; a courtyard, a sculpture yard, a basketball court, and a parking lot	MND	07/31/2008

	with 26 parking spaces for school staff members. Total square footage for all new buildings will be approximately 13,000 square feet. The new site will remove approximately 0.28 acres from the existing campus, and add approximately 0.58 acres from the Transportation Facility portion of the site, for a total of 1.1 acres. The southern section of the project site will be sold to residential developers. The parking area for the AUSD school bus fleet will be relocated from the Transportation Facility to an existing parking lot at San Gabriel High School, located at 801 South Ramona Street in the City of San Gabriel. Maintenance of the AUSD school buses will take place at the AUSD District Offices at 1515 West Mission Road in Alhambra; the proposed project also includes the installation of a water clarifier at the District Offices site. Fueling of the school buses will take place at gasoline stations proximate to San Gabriel High School or the District Offices.		
2008072005	Natomas Interstate 80 (I-80) Bicycle and Pedestrian Overcrossing Project (CIP# HC21) Sacramento, City of Sacramento--Sacramento The City of Sacramento proposed to construct a pedestrian/bicycle overcrossing (POC) over Interstate 80 adjacent to the Natomas Main Drainage Canal where the Natomas West and Natomas East Drainage canals merge. The City also proposes to construct an at-grade level bridge (Canal Bridge) across the West Drainage Canal to link the north end of the POC with the existing trail. The project will also consist of all railings and fencing, grading, paving and slope protection, signage, and lighting associated with the POC. The POC will consist of a cast-in-place box girder section, supported by two east-in-place concrete abutments and five cast-in-place concrete columns on driven piles. The Canal Bridge will include a pre-manufactured steel truss "flat slab" structure this unit will consist of weathering steel, concrete deck, and smooth steel handrails; it will be designed to be removable as needed by the Reclamation District 1000 for maintenance of the Canal. Concrete will also line the canal bottom under the bridge and 10 feet beyond in both directions.	MND	07/31/2008
2008072006	Alco Iron and Metal Company Vallejo, City of Vallejo--Solano AALCO Iron and Metal, Inc., a recycler of ferrous and non-ferrous metals and retailer of new metal materials, is proposing to construct a metal shredder and associated facilities in their existing scrap storage yard, located in the northwest corner of Mare Island. This includes a heavy duty metal shredder system capable of shredding automobiles and auto parts, light and cast iron, appliances, miscellaneous steel scrap, thin structural steel and plates, and pressed or sheared material. The shredder equipment will be contained on three sides with noise panels to control sound. The applicant proposes to operate the shredder up to six hours per day, five days per week, and provide two hours of nightly maintenance.	MND	08/01/2008
2008071016	School Busing Program Reduction Based on the Equity Busing Plan Capistrano Unified School District --Orange Due to budgetary constraints, the Capistrano Unified School District ("CUSD" or "District") is proposing to implement the Equity Busing Plan adopted by the CUSD School Board on May 12, 2008. The Equity Busing Plan would reduce the existing number of school bus routes provided for the CUSD to 18 routes from 62 bus routes and retain busing at Viejo Elementary School, Newhart Middle School, and	Neg	07/31/2008

2005122101	Recirculation of Tidewater Crossing Master Development Plan Project Stockton, City of Stockton--San Joaquin Development of an industrial/residential project on lands south of and contiguous to the Stockton Metropolitan Airport. The proposed project includes a General Plan Amendment, Master Development Plan (MDP), Rezoning, Tentative Tract Map, Sphere of Influence amendment for a portion of the project site. Annexation and Development Agreement for approximately 909.0 acres predominately in farmland and rural residential uses. The MDP includes 224 acres of Industrial, 94 acres of Medium Density Residential, 10 acres of High Density Residential, 265 acres of Low Density Residential, 17 acres of Retail/Commercial, 35 acres of Parks/Buffers/Open Space, 62 acres of sloughs and easements, 19 acres of Elementary School, 8 acres of railroad corridor and 95 acre flood control/detention basin is planned within the southern portion of the planned industrial area to manage peak storm flows. The project is generally bounded by the Stockton Metropolitan Airport to the north, Highway 99 to the east. Union Pacific Railroad to the west and East French Camp Road to the south. On March 6, 2008, the City of Stockton circulated the March 2008 Draft EIR document for public review initiating a 45 day public review period that ended on April 21, 2008. Several comments received by the City involved greenhouse gas (GHG) emissions generated by the project and the potential effects expected on global warming. The City of Stockton has re-examined the project's effects on global warming due to the contribution of GHG and determined to prepare the supplemental information and analyses presented in this revised Air Quality and Global Climate Change sections for recirculation.	EIR	08/18/2008
2007071011	Tulare Motor Sports Complex Tulare, City of Tulare--Tulare NOTE: Partial Recirculation This EIR considers the environmental effects of the motor sports complex and commercial project proposed by Tulare Motor Sports Complex, L.P. (applicant). The applicant proposes to develop a 711.09-acre site with uses including a 1 mile D-shaped oval super speedway racetrack and drag strip. The potential seating capacity is 52,800 spectators for the super speedway track and 39,800 spectators for the drag strip including grandstands and sky boxes. The track and drag strip are expected to host a wide variety of national, regional, and local racing events.	EIR	08/18/2008

	Wrightwood and a portion of unincorporated San Bernardino County.		
2007082128	EcoCenter/Sea Scout Base Palo Alto, City of Palo Alto--Santa Clara The proposed project involves the relocation, rehabilitation and reuse of a vacant Category I historic building, the former Sea Scout Base. The building would be moved approximately 4 feet northwesterly of the existing location, away from the bay, in order to place the building on a new foundation, raising the building 3.5 feet and clearing the 100 year base flood elevation. This building is currently in an area subject to flooding due to high tides and has deteriorated significantly as a result. As part of the improvements to the existing 2,600 square foot building, an addition of approximately 261 square feet will be added onto the second floor mezzanine. The project also includes construction of a 3-stall parking lot with areas for a trash and mechanical enclosures, removal of portions of an existing sandbag "seawall," removal of a berm between the building and the road, rerouting of an existing trail, and landscape improvements.	MND	08/01/2008
2008071019	Interstate 10/Monterey Avenue Interchange Improvement Project Caltrans #8 Rancho Mirage--Riverside The City of Palm Desert (City), in cooperation with the California Department of Transportation (Department), proposes to construct improvements to part of the existing Interstate 10 (I-10) at Monterey Avenue Interchange. The proposed project would construct a new westbound on-ramp and realign/relocate the existing westbound off-ramp to connect with Varner Road. As a result of these improvements, the existing intersection of the westbound on- and off-ramps would be removed on Monterey Avenue, thereby increasing the intersection spacing between the eastbound ramps and Varner Road along Monterey Avenue. The proposed improvements to this interchange are intended to address northbound traffic on Monterey and improve the westbound ramps to I-10 to level of service (LOS) A during the a.m. and p.m. peak hour. Proposed improvements consist of the following: Construction of a new loop entrance ramp from northbound Monterey Avenue to westbound I-10, elimination of the existing intersection of the westbound on- and off-ramps on Monterey Avenue, and realignment of the westbound exit ramp to provide a hook configuration off-ramp approximately 160 m (525 ft) east of Monterey Avenue along Varner Road. In addition, the left turn lanes on southbound Monterey Avenue to eastbound I-10 will be lengthened to provide sufficient stacking for future traffic volumes. There would be no improvements to the existing Monterey Avenue overcrossing, however, a tieback retaining wall would be constructed in the vicinity of the northerly abutment to provide clearance for the proposed westbound loop on-ramp. Additionally, ramp metering would be installed on the proposed westbound loop on-ramp and existing westbound on-ramp. The project would be constructed in two phases. Realignment of the westbound off-ramp would be constructed in the first phase while maintaining the existing westbound off-ramp open. Once the realigned westbound off-ramp is constructed, the existing westbound off-ramp would be removed and the new westbound on-ramp would be constructed in phase two.	MND	08/01/2008

<u>Documents Received on Thursday, July 03, 2008</u>			
	October 26, 2004. The proposed Housing Element Update would guide the County's housing efforts through June 30, 2014.		
	The proposed Housing Element Update would satisfy State requirements that cities and counties fairly accommodate their share of California's projected housing needs. The Association of Bay Area Governments (ABAG) has allocated a total of 651 housing units to Napa County for the 2007 to 2014 period. Napa County entered into an agreement with the City of Napa to transfer 82 of those units to the City (Napa County Agreement No. 6903, approved 10-9-07). Assuming that the ABAG approves this transfer, the net share of housing that Napa County needs to accommodate are as follows: * Above-Moderate: 224 units * Moderate: 130 units * Low-Income: 116 units * Very Low-Income: 181 units.		
1996082016	Tuolumne County General Plan Update Tuolumne County Ordinance for Zone Change RZ05-097 to rezone a 155.7 +/- acre parcel from AE-37:PD (Exclusive Agricultural, Thirty-seven Minimum:Planned Unit Development Combining), A-20:PD (General Agricultural, Twenty-Acre Minimum:Planned Unit Development Combining), and A-10 (General Agricultural, Ten-Acre Minimum) as follows: 99.6 +/- acres to AE-37:PD, 25.1 +/- acres to RE-10:PD (Residential Estate, Ten-Acre Minimum:Planned Unit Development Combining), 3.6 +/- acres to O (Open Space), and 27.4 +/- acres to O-1 (Open Space-1). A Coastal Plan Map Amendment would also be required for those portions of the site located within the Coastal Zone. The Zoning designation for APNs 047-010-011, 047-010-016, 047-0061-026, and the 4.41-acre portion of APN 047-010-053 would be SP-9/S-D-3 [Specific Plan #9/Coastal Overlay Zone (for the portion within the Coastal Zone)]. The purpose of Specific Plan #9 is to establish a single-family zone district where development is clustered, a semi-rural setting is maintained, and the natural environment is protected. Under Specific Plan #9, approximately 35.7 acres of the site would be dedicated open space and 14.8 acres could be developed for residential uses, roadways, and public passive recreation and open space.</p>	NOD	
2005072125	<p>Tivoli Specific Plan Project Modesto, City of Modesto--Stanislaus</p> <p>The Tivoli Specific Plan is a project proposing the development of about 454 acres with residential and commercial uses. Pursuant to the requirements of the adopted Tivoli Specific Plan, the applicant has prepared the Facilities Master Plan (FMP) and Infrastructure Financing Plan (IFP) for the Tivoli Specific Plan. The FMP provides a detailed analysis and description of the main infrastructure required to serve the Specific Plan area. The IFP identifies cost and funding mechanisms to construct the main infrastructure identified in the Facilities Master Plan. The FMP and IFP are explicitly contemplated in the Tivoli Specific Plan Program EIR. The proposed FMP and IFP for the Tivoli Specific Plan are planning documents that will guide future infrastructure development. Future development projects proposed within the project area will require further environmental review. The FMP and IFP intend to implement the applicable mitigation measures identified in the Program EIR.</p>	NOD	
2005121094	<p>Interstate 10 at Ramon Road/Bob Hope Drive Interchange Caltrans #8 Unincorporated--Riverside</p> <p>The project involves the construction of the Ramon Road/Bob Hope Drive Interchange, and widening five arterial street projects associated with the Ramon Road/Bob Hope Drive Interchange as described in detail in CESA Incidental Take Permit 2081-2003-010-06. The project would be implemented within the project area as defined in the "Project Location" section of the CESA Incidental Take Permit and take place for a period of two years. The Department of Fish and Game, as responsible agency, is issuing an Incidental Take Permit for Coachella Valley Fringe-toed Lizard (<i>Uma inornata</i>), which is listed as an endangered species under the California Endangered Species Act (Fish and Game Code Section 2050 et seq.) and which could be taken as a result of the project. The Permittee has also addressed the project's impacts on Flat-tailed Horned Lizard (<i>Phrynosoma mcallii</i>), Palm Springs Round-tailed Ground Squirrel (<i>Spermophilus</i></p>	NOD

2007052146	Water Recycling Expansion Program Petaluma, City of Petaluma--Sonoma The WREP consists of approximately 1,025 to 1,070 MG per year of recycled water use for agricultural and urban uses within the Urban Growth Boundary of the City of Petaluma and unincorporated areas of Sonoma County south and east of the City. The WREP requires conveyance facilities, including distribution pipelines, a 2.2-MG storage tank for tertiary treated recycled water, a 0.5- to 1.0-MG open reservoir for secondary treated recycled water, one new pump station, and associated connecting pipelines and other appurtenances. The project would occur in phases starting in 2009 and continue through 2025.	EIR	08/20/2008
2008041030	City of Calabasas 2030 General Plan Calabasas, City of Calabasas--Los Angeles The proposed project involves the update of the 1995 General Plan, which currently serves as the blueprint for the development of the City. Each of the General Plan elements will be updated with goals, objectives and policies that reflect the current needs and preferences of the community. The land use map will also be updated. For the most part, the goals, objectives and policies of the updated General Plan are similar to those of the 1995 General Plan, with only minor revisions to reflect current conditions in and around Calabasas. No land use designation changes that would facilitate development within areas currently designated as open space are proposed.	EIR	08/20/2008
2006041101	Main Street and Freeway Corridors Specific Plan Hesperia, City of Hesperia--San Bernardino NOTE: Final EIR Response to Comments The City of Hesperia proposes to revitalize and develop the 10,640-acre Main Street and I-15 Freeway corridors pursuant to the proposed Specific Plan with a range of uses including industrial, commercial, civic, institutional, residential, mixed-use, and parks/open space. The Specific Plan establishes a development framework for the Main Street and Freeway corridors and provides for development and improvements along these two corridors to help realize the community's vision for the area to the year 2030 planning horizon. 	rezoning program. The proposal includes implementing an Amnesty Program for specific residential building activity that has taken place without obtaining the proper Building and/or Planning permits.		
2008072020	Branscomb-Kelley Residence Half Moon Bay, City of Half Moon Bay--San Mateo The City of Half Moon Bay received an application (PDP-031-07) to construct a new single-family residence, detached garage, and detached studio on a 50.5 acre within an Urban Reserve (U-R) zoning designation located at 800 Frenchman's Creek Road (APN 048-310-110). The Project requires City approval of a Coastal Development Permit and Use Permit to allow the residential use and structures on this site. In addition to residential structures, a new driveway turnaround, wharf-type fire hydrant, rural fire water supply tanks, water service, and septic system with leach field will be needed to support the proposed use and structures.	MND	08/05/2008
2008072022	Sherman and Twitchell Islands Fish Screen Project Water Resources, Department of Isleton--Sacramento DWR intends to install fish screens at the terminus of 10 DWR-owned agricultural intake siphons on Sherman and Twitchell Islands. Work will involve pile driving, digging at one site on Sherman Island, and some increased traffic. No significant environmental effects are expected from this project since a mitigation and monitoring plan will be in effect. Project work will begin on August 1, 2009 and end on November 30, 2009.	MND	08/06/2008
2008071021	March Lifecare Campus Specific Plan March Joint Powers Authority Riverside, Moreno Valley--Riverside Development of a 3,555,000 square feet medical campus, allowing the following land use designations: (1) General Medical Office; (2) Medical Related Retail; (3) Research and Education; (4) Residential Care Facilities; (5) Wellness; and (6) Mixed Use.	NOP	08/05/2008
2008071022	Plant 1 100-Year Flood Protection Project Jurupa Community Services District --Riverside The purpose of the proposed project is to upgrade the protection along the river bank to provide the JSCD Plant 1 facility with 100-year flood protection. In January of 2005, high rain fall in Southern California caused flooding of the Santa Ana River. During this event, JCSD's Wastewater Regional Plant 1 Facility was at risk of being flooded as the Santa Ana River migrated approximately 200 feet towards JCSD's storage ponds and regional lift station. JCSD stabilized the slope by placing riprap along the north bank of the Santa Ana River to protect JCSD's Plant 1 from flood damage. The existing riprap spans a portion of the project area's southern border along the Santa Ana River. The riprap protected Plant 1 from being flooded in 2005 but the existing proximity of the river channel now to the Plant 1 facility has left the site at risk of flooding in future events. The River continues to erode the bank along JCSD's property. If the slopes are not stabilized, erosion could result in the introduction of wastewater into the Santa Ana River system, thereby potentially polluting downstream water sources. The project will include placement of launchable windrow revetment 1/4 ton riprap, herein after referred to as launchable riprap, along the southern property line of the Plant 1	Neg	08/05/2008

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<u>Documents Received on Monday, July 07, 2008</u>			
2007091006	<p>This project involves channel maintenance in the Middle Creek Channel from its confluence with Scott Creek north approximately 1.9 miles. Maintenance will consist of the selective removal of vegetation such as young willow, immature cottonwoods, and blackberry vines in the bottom of the channel to the toe roads of both levees. No trees over 4 inches DBH will be removed. Debris piles in the channel will also be removed. GDF crews will be utilized for this process. GDF crews will cut and drag vegetation up the bank in designated low line areas. Vegetation will be chipped and the chips placed on uplands areas. The stumps of the willows and/or cottonwood trees will be trees treated or sprayed with Rodeo or Aqua Master to prevent re-growth.</p> <p>State Route 216/Houston Avenue 4-Lane Widening Caltrans #6 Visalia--Tulare The California Department of Transportation (Caltrans) proposes to widen State Route 216 from Lovers Lane to McAuliff Road in the City of Visalia, Tulare County (post miles 1.9 to 2.9). The proposed project would convert the existing highway from a two-lane to a four-lane conventional highway with a median strip. The intersection at Lovers Lane and McAuliff Road would be upgraded with dedicated right-turn lanes and additional left-turn lanes.</p>	NOD	
2007101015	<p>The El Colegio Road Improvement Project Santa Barbara County --Santa Barbara The UC Santa Barbara Campus, in conjunction with the County of Santa Barbara, intends to widen El Colegio Road, the primary western entrance road to UC Santa Barbara, from two lanes to four with turn pockets, traffic signals, and a landscaped median. The project would improve circulation and accommodate traffic generated by the San Clemente Graduate Student Housing Project, as well as traffic that would result from future development of the UC Santa Barbara Campus, Isla Vista, and Goleta areas.</p>	NOD	
2007121123	<p>San Juan Capistrano Ortega Highway Pipeline Project San Juan Capistrano, City of San Juan Capistrano--Orange The proposed project consists of the construction of approximately 5,287 linear feet of 12-inch diameter potable water main pipeline within the Ortega Highway right-of-way. The pipeline would be installed during the proposed widening of the Ortega Highway, currently under consideration by the California Department of Transportation (Caltrans). By installing the pipeline during Caltrans' construction period, the City would minimize direct impacts of the project and avoid the need to disrupt the street in the future. The project would increase the reliability and quality of service within the existing water distribution system to adequately serve existing users, and to meet increasing fire safety demands. The pipeline would be constructed within the paved roadway at depths ranging from approximately 4 to 5 feet below the existing surface. The project is anticipated to include trenching excavation, pipeline installation, backfilling, compacting, and soil replacement all within the construction zone of the Caltrans road widening project.</p>	NOD

2008032105	Best Slough Preserve Yuba County Wheatland--Yuba The project sponsor proposes to grade approximately 90 acres of a 217 acre parcel to construct a vernal pool complex in an existing agricultural setting.	NOD	
2008042058	Oakwood Estates (PMLD T20070721) Placer County Loomis--Placer Project proposes approval of a rezone to allow a 9.95 acre parcel to be divided into two parcels consisting of 5.10 and 4.85 acres.	NOD	
2008052096	L.L. Anderson Dam Spillway Modification Project Placer County Water Agency --Placer The presently proposed project involves widening the existing spillway at L.L. Anderson Dam and replacing and raising the dam crest parapet wall to pass the PMF. The spillway crest would need to be widened 32 feet to maintain the peak reservoir stage at El. 5,273 feet during the general-storm PMF. The spillway widening would be achieved by rock excavation with blasting and machinery, construction of new spillway structure, seepage cutoff through grouting of new spillway structure rock foundation, rock bolting and shotcrete, re-establishing automatic control system to the existing power adjacent to the new spillway structure, demolition of the existing spillway structure, and placement of excavated rock spoil against downstream face of the dam. The existing spillway structure would also serve as a temporary (seasonal) cofferdam in the spillway during construction before it is demolished. Parapet wall replacement would be achieved by closing a portion of one lane on the dam crest, demolishing the existing parapet wall, excavating into the dam crest, forming, reinforcing, and installing a new reinforced concrete wall. In addition, due to a camber in the crest height across the dam profile, approximately 1,000 feet of the dam crest pavement will be removed and raised with aggregate base and new pavement to achieve a uniform road elevation of 5,273 feet or greater.	NOD	
2008052111	PG&E Fuel Oil Pipeline Removal Project Humboldt Bay Harbor --Humboldt Removal of approximately 4,200 feet of retired 14-inch fuel oil pipeline from Humboldt Bay.	NOD

<u>Documents Received on Monday, July 07, 2008</u>			
2008078090	8000 Crowder Lane (PCEL 20080250) Placer County Roseville--Placer The applicant proposes to collocate four microwave dish on an existing cellular communications tower involving no height increase of the tower.	NOE	
2008078091	Modify base of slope Caltrans #2 --Shasta Caltrans proposes to modify the base of slope, remove loose rock material, and provide rock fall fencing along SR299 in Shasta County near Burney, at one mile west of Sawmill Road. Installation of approximately 635 feet of new fence will prevent rocks from rolling on to the traveled way and, thus, increase roadway safety. The project meets clear recovery zone requirements and accommodates maintenance operations, such as snow removal. All work will be performed within the State's right of way. No permits will be required. No work shall occur within the ordinary high water mark of the two channels that exist to the east of the project area.	NOE	
2008078092	Fountain Curve Caltrans #2 --Shasta This is a slide repair project located at the old "Fountain Curve" section of SR 299 in Shasta County. In Fall 2007 Caltrans completed 02-3705U-a realignment and profile correction project along this same section of SR 299. After realignment, a landslide occurred that caused major damage to the roadway and partially closed the highway. The hillside above the roadway continues to slide, with cracks up to 6 feet in height. To protect the hillside and roadway access, Caltrans proposes to build three retaining walls, install a drainage system, and reconstruct the roadway. All work will occur within disturbed soils in previously excavated cut slopes, and staging and parking of equipment will occur in a previously established pullout along the southern edge of the traveled way. Construction easements will be needed to build the retaining walls. Caltrans initiated 106 consultation following provisions of the January 2004 Programmatic Agreement. In a letter dated 5-15-08, SHPO concurred with a Finding of No Adverse Effect with standard conditions. The portion of the site within the area of direct impact does not contribute to the eligibility of the historic property in question. Caltrans will establish an Environmentally Sensitive Area to protect the remaining portion of the site from inadvertent damage during construction. An archaeologist and Native American monitor will monitor all ground disturbing activities. No soil will be placed behind the souldier pile wall adjacent to the private driveway on the west end of the tieback wall, and no compaction will occur behind this wall. Only hand-held mechanized equipment shall operate behind the tieback retaining wall. No permits will be needed. Equipment shall not operate with in the ordinary high water mark of any jurisdictional waters. If construction equipment must span drainage or other waterway, measures shall be put into place to ensure compliance. The project meets all air quality conformity requirements; transportation conformity does not apply to this project.	NOE

2008078099	Issuance of Streambed Alteration Agreement No. R1-08-0064, Unnamed tributary, tributary to Boulder Creek, Shasta County Fish & Game #1 Redding--Shasta Realign portion of lower channel 15 feet to south and place river rock and cobble in bed of intermittent drainage ditch.	NOE					
2008078101	Whites Gulch Dam Removal Project Fish & Game #1 --Siskiyou OSHA certified blasters from the California Department of Fish and Game (DFG) will use explosives to demolish a diversion dam (upper dam) on Whites Gulch which will allow fish access to approximately 1.5 miles of stream. The dam is a 2 ft. thick, 41 ft. wide, and 7 ft. tall concrete structure. The site will be dewatered by constructing a coffer dam upstream of the site using native streambed material and Visqueen and routing the water around dam via an existing pipe. DFG biologists will remove fish and amphibians and release them to a safe section of stream. The dam would then be drilled, explosive charges set, blasted, and debris removed from channel. All work will take place using hand labor and small gas, electric, or pneumatic powered hand tools. No heavy equipment will be used. Currently there are two downstream barriers (culvert and diversion dam) which are scheduled to be removed after the upper dam is removed. These structures preclude the possibility that coho salmon may exist in the project area. The project is scheduled to be implemented in August, 2009.	NOE					
2008078102	San Antonio Creek Bridge Replacement Fish & Game #5 --Ventura The Applicant proposes to alter the streambed by replacing the existing bridge with a new safe structure, with wider lanes and shoulders in order to comply with the current highway standards. The new bridge will have two 12 foot lanes and 8 foot wide shoulders at each side. The length will increase from 120 feet to 180 feet. This design required ungrouted rock rip-rap on the banks and fewer abutments. The existing bridge contains 9 abutments and the new bridge has 2 abutments and wingwalls. There will be a temporary culvert and crossing placed just downstream of the existing bridge to allow for vehicle traffic. The culvert will be a large concrete box, pre-cast, and sunk into the substrate to prevent scour and to allow for fish passage.	NOE

	freeway signs, and provisions to allow drifting as a specifically permitted form of motorsports. The proposed project would also clarify and define certain aspects of the 1996 Conditional Use Permit under which the motorsports facility currently operates, including allowable facility events, event scheduling, and event parking. No new buildings or racing venues on or off the property are proposed as part of the project.		
2008011069	The Ripcurl Project Huntington Beach, City of Huntington Beach--Orange The proposed project is a mixed-use residential and commercial development that would consist of 440 residential units and approximately 10,000 square feet of street level commercial uses. The 10,000 square feet of commercial uses would be divided between approximately 3,000 square feet of restaurant uses and 7,000 square feet of retail uses. The 440 residential units would be distributed amongst four levels, located over the retail component, which would be located on the ground level. A mezzanine level would also be located on the roof. The total project floor area, excluding parking and basement area would be approximately 382,700 square feet. Off-street parking would be provided; one level of parking would be below-grade and two levels of parking would be above-grade.	EIR	08/21/2008
1999084008	Yucca Mountain Geologic Repository U.S. Department of Energy --Inyo DOE's proposed action is to construct, operate, and monitor, and eventually close a geologic repository at Yucca Mountain for the disposal of spent nuclear fuel and high-level radioactive waste. Under the proposed action, spent nuclear fuel and high-level radioactive waste in storage or projected to be generated at 72 commercial and 4 DOE sites would be shipped to the repository by rail (train), although some shipments would arrive at the repository by truck.	FIN	
2007062078	Golden Gate Bridge Physical Suicide Deterrent System Golden Gate Bridge Highway and Transportation District San Francisco--San Francisco NOTE: Joint Document consists of Draft EIR & EA The Golden Gate Bridge (Bridge) is owned and operated by the Golden Gate Bridge, Highway and Transportation District. It is located within the San Francisco Bay Area. The proposed project is located in the City and County of San Francisco and Marin County. The project proposes to construct a physical suicide deterrent system along both sides of the Golden Gate Bridge (Bridge). The project limits are from the San Francisco Abutment to the Marin Abutment of the Bridge.	JD	08/21/2008
2004061075	ENV-2004-2068-MND-REC Los Angeles, City of Brentwood, Los Angeles, City of--Los Angeles Construction of a 7,520 square-foot single-family home on a 23,000 square-foot hillside site, zoned RE 15-1-H requires a Zoning Administrator Determination for an over height retaining wall, a Zoning Administrators Adjustment for an over height house, and a Coastal Development Permit for construction within the Coastal Zone. A Haul Route for the export of approximately 4,500 cubic yards of dirt from the project site is also considered.	MND	08/06/2008

2008071026	ENV-2006-2372-MND-REC2 Los Angeles, City of Los Angeles, City of--Los Angeles Zone Change from RA-1 to RD 1.5-1 to permit a small lot subdivision of three lots for the construction of 25 single-family dwellings each with a two-car garage on a 44,561 square-foot lot with the removal of two single-family dwellings, existing 25-foot building line, and two trees.	MND	08/06/2008
2008071029	Kitching Street Improvements Project Moreno Valley, City of Moreno Valley--Riverside The proposed project consists of the ultimate width street improvements of approximately 7,970 linear feet along Kitching Street to four lanes from Gentian Avenue to Alessandro Boulevard, related storm drain facilities, widening of bridges at Alessandro Boulevard and John F. Kennedy Drive, upgrade of two existing traffic signals at John F. Kennedy Drive and Alessandro Boulevard and a new traffic signal at Cactus Avenue. Kitching Street has been designated as a four lane minor arterial roadway having a width of 64 foot curb to curb and 88 foot right-of-way (per City Standard 105A). The proposed project would construct street improvements including curbs, gutters, sidewalks, pavement, street lights, drainage facilities, traffic signals, etc. within the existing and acquired right-of-way along Kitching Street from Gentian Avenue to Alessandro Boulevard. The utility poles would be relocated and/or modified as necessary to accommodate the grading required for the roadway.	MND	08/06/2008
2008071030	Jon Pharris - Phelan Development San Bernardino County San Bernardino--San Bernardino The proposed project is a conditional use permit to establish a maximum 315,000 square foot "high cube" warehouse with 8,000 square feet of office, a maximum 22,000 square foot multi-tenant retail/office building, a 60' high sign with telecommunications capabilities, and three 90' high monopalm cell towers on 22.4 acres. 	remainder parcel. Also, to rezone from Rural to Rural PUD.		
2008071035	Minor Subdivision 1214-07 San Benito County --San Benito The proposed project is a court ordered subdivision. The order requires the subdivision of a 53.64 acre parcel into two parcels containing 22.50 acres and 31.14 acres respectively.	MND	08/06/2008
2008071036	Budlong Plant - Replacement Reservoirs and Demolition of Existing Reservoirs Health Services, Department of Unincorporated--Los Angeles Construction of two replacement reservoirs, a replacement booster station, and a new chemical building. Two old reservoirs will be destroyed.	MND	08/06/2008
2008071037	Potable Water Storage Tank (Reservoir) Adelanto, City of Victorville--San Bernardino The City of Adelanto is located in the high desert region of San Bernardino County. The City is on the southwest end of the Mojave Desert on the eastern side of the San Gabriel Mountains, approximately 36 miles north of the City of San Bernardino. The City is bisected by U.S. Highway 395, which runs north/south through Adelanto, providing access to the regional highway network, including Interstate 15, Highway 18, and State Route 58. Other desert cities in the vicinity include Victorville to the east and south, Hesperia to the southeast, Apple Valley to the east, and Barstow to the northeast. The former George Air Force Base is located immediately adjacent to the City of Adelanto and forms the eastern edge of the community. To ensure that its growing population has adequate emergency and operational water storage, the City of Adelanto is proposing a 5 million gallon (MG) reservoir. The proposed reservoir would be approximately 170 feet in diameter.	MND	07/28/2008
2008072021	Unimin Pond J Dam Reconstruction/Relocation Project Amador County lone--Amador Pond "J" project at the Unimin site in lone. Pond J is located approximately one mile southwest of the mine's main processing plant. An existing dam, about 80 feet high and 1,000 feet in crest length is located at the site. The proposed dam would be located approximately 1,000 feet to the existing dam's southwest. Most of the area between the existing and proposed dam has been stripped and graded as part of the past mining and dam construction activities. Proposed are two segments to the new dam: Section 1 would be located at Pond J's southwest side and will be approximately 800 feet long and 35 feet high; Section 2 would be located along Pond J's south and southeast sides and will be approximately 1,450 feet long and up to 30 feet high. Once the dam is completed, Pond J would be able to hold approximately 1,544 acre feet of water and cover a surface area of approximately 68.4 acres. This area would eventually be filled with mine tailings (e.g. sand). Approximately 110,000 cubic yards of fill material would be used for the dam and approximately 10,000 cubic yards would be associated with the excavation and backfill for the dam.	MND	08/06/2008

	wastewater treatment plants (RM 1 and RM II) would be combined and the treatment facilities upgraded to accommodate the combined flow and to meet regulatory wastewater treatment requirements. Most of the work would be within the existing boundaries of the RM I and RM II wastewater treatment facilities (ponds with aerators and various piping and pumps). The initial phase of the project also includes the installation of pipelines and facilities that would allow for the use of recycled water from RM I.		
2008071032	Jones Ranch Specific Plan Oxnard, City of Oxnard--Ventura The Jones Ranch specific Plan (Plan) proposes to develop residential, parks, elementary school, mixed-use neighborhood retail/residential adjacent to the northern edge of the City of Oxnard, between Vineyard Avenue and Rose Avenue. All residential units would be income restricted in compliance with the 2006-2014 Regional Housing Needs Assessment (RHNA). The Plan will provide the framework, guidelines, standards, and regulations for orderly annexation and phased development over a number of years, maintaining consistency with the City of Oxnard 2020 General Plan in terms of land use, utilities, and transit and circulation.	NOP	08/06/2008
2008071027	Remedial Action Plan, Proposed South Region Elementary School #6, Site 15 Toxic Substances Control, Department of Los Angeles, City of--Los Angeles The project involves approval of a Remedial Action Plan (RAP) by the Department of Toxic Substances Control (DTSC) for the proposed South Region Elementary School Site #6, Site 15 (site) pursuant to Health and Safety Code chapter 6.8. The RAP focuses on (1) excavation and off-site disposal of approximately 2,233 cubic yards (CY) of onsite soils impacted with lead, arsenic, organochlorine pesticides (OCPs), petroleum related compounds, volatile organic compounds (VOCs), polynuclear aromatic hydrocarbons (PAHs), and total petroleum hydrocarbons (TPH); and (2) installation and operation of a soil vapor extraction (SVE) system for residual VOCs in soil vapor onsite. After completion of the planned excavations, cleanup confirmation sampling and Site restoration will be conducted. If necessary, additional soil volume will be excavated to ensure all onsite impacted soils containing the identified chemical of concerns (COCs) at concentrations of the corresponding cleanup levels or above have been properly removed. If cleanup goals are not achieved with the SVE technology, potentially up to an additional 10,368 cubic yards may be disposed of offsite. An approved Operations, Monitoring, and Maintenance Plan (OMMP) will be conducted after the site is backfilled and restored pending the offsite source (abandoned petroleum pipeline) is still present. The OMMP will consist of a row soil gas monitoring wells spaced 25 to 30 feet apart located within 2 feet of the shoring at the border of the site and an additional row (approximately two soil gas monitoring wells) located half the distance between the shoring at the eastern border and the closest structure. 	of approximately 218 acres, including about 124 acres for residential uses and approximately 93 acres for non-residential uses. The project area encompasses the western portion of Neighborhood D, which is part of Specific Plan II that was approved in February 2005. The eastern portion of Neighborhood D is part of Specific Plan III and is not included in the boundaries of the proposed project. The area of the project was previously annexed into both the Mountain House Community Services District and Byron Bethany Irrigation District jurisdictions.		
2007072072	Kuhn Family Residence (PEAQ T20070237) Placer County --Placer This project includes grading of 2.5 acres for the construction of a single family residential home, a secondary dwelling, detached garage, recreation room and tennis court. The project includes disturbance to 6,880 cubic yards of material with cuts up to nine feet and fills up to five feet. The grading will result in the removal of seven native trees totaling 72 inches. The trees to be removed include five cottonwood trees and two oak trees. The majority of the subject parcel is encumbered by a pond and riparian vegetation associated with Strap Ravine. The proposed grading will not impact riparian areas, nor will grading work be done within the required setback of riparian areas or water bodies.	NOD	
2007082032	Etter-Schmidt Parcel Map Subdivision/Lot Line Adjustment Humboldt County --Humboldt The Project proposes to install a permanent 89 foot long by 9 foot wide bridge, place 975 tons of rip rap, water draft for cement mixing, and wet ford the river approximately ten time on the Upper Northe Fork Mattole River, Humboldt County.	NOD	
2007101084	Ronald Reagan Sports Desiltation Basin Long-term Maintenance Project Temecula, City of Temecula--Riverside The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2007-0216-R6 pursuant to Section 1602 of the Fish and Game Code to the project applicant, City of Temecula. The applicant is proposing to remove approximately 13,700 cubic yards of silt and debris from the Ronald Reagan Sports Park Desiltation Basin as part of a routine maintenance project for the basin area. The silt that is removed from the basin area will be temporarily spread in an area adjacent to Rancho Vista Road, allowed to dry out, and then will be transported offsite to a landfill. The basin areas containing riparian vegetation impacted by maintenance activities will be allowed to reestablish between desiltation maintenance cycles.	NOD	
2008049037	Central Coast Water Supply Reliability Program San Luis Obispo County --San Luis Obispo, Santa Barbara The project is the emergency short-term transfer of a portion of San Luis Obispo County's excess SWP Table A Water allocation to Santa Barbara County, for 2008 and possibly for 2009 if conditions remain dry, subject to DWR approval. It is anticipated that 5,200 acre-feet would be transferred in 2008 and, if necessary, no more than 8,750 acre-feet (depending on availability) would be transferred in 2009. This is a short-term water transfer agreement. Accordingly, any water transferred under the proposed project would not represent a dependable long-term increase in supply.	NOD

2008071039	General Plan Amendment 08-01 Adoption of the 2005-2010 Housing Element Update and General Plan Amendment 08-02 Related Amendment to the Land Use Element of the Poway, City of Poway--San Diego State law requires that every City prepare and adopt a Housing Element to be included as part of the City's General Plan. Additionally, the Government Code requires that every City periodically amend their Housing Element. The project consists of adoption of the 2005-2010 Housing Element update in compliance with the State of California Government Code Sections 65580-65589.8. The project also includes related amendments to the text of the Land Use Element of the General Plan necessary to implement the programs contained in the updated Housing Element. The Housing Element includes four major components: (1) an assessment of the community's housing needs; (2) an inventory of resources and constraints relevant to meeting the community's housing needs; (3) a statement of goals, policies, and quantified objectives that will guide the implementation of specific programs; and (4) a housing program to be implemented over a specific period that describes the implementation actions to be taken by the City to meet the needs. The project also consists of the following changes to the Land Use Element to be consistent with the 2005-2010 Housing Element update: (1) inclusion of a reference to the 2005-2010 Regional Housing Needs Allocation; (2) modification to the Affordable Housing Overlay designator to include two designators: Affordable Housing Overlay for Lower Income Households (AH-L) and Affordable Housing Overlay for Moderate Income Households (AH-M); (3) allowing densities up to 30 dwelling units per acre rather than up to 25 dwelling units per acre for properties with an AH-L or AH-M designator; (4) elimination of the requirement of a Specific Plan for properties with the AH-L designator; and (5) allow three-story buildings within the 35 foot height limit rather than two stories within the 35 foot height limit on properties with the AH-M or AH-L designation in order to achieve a density of 30 dwelling units per acre.	Neg	08/07/2008
2007112052	Moghadam Vineyard - Vineyard Conversion #P05-0128-ECPA Napa County St. Helena--Napa NOTE: Document is a Response to Comments The project includes earthmoving activities and installation and maintenance of erosion control measures associated with development of 11.64 acres of new vineyard (8.94 net vine acres), on a parcel totaling 16.77 acres. The site plan designates six vineyard blocks on topography that ranges from gentle to steeply sloping lands (typical slopes from 5% to 30%), at elevations between approximately 400 and 520 feet above mean sea level. 	off-ramp.		
2008079029	Amendments to the Water Quality Control Plan for the Sacramento River and San Joaquin River Basins (Basin Plan) to Modify Beneficial Uses of and Establish Water Regional Water Quality Control Board, Region 5 (Central Valley), Sacramento --Colusa The project consists of amendments to the Basin Plan to remove beneficial uses from Sulphur Creek and set site-specific water quality objectives for mercury to protect the remaining beneficial uses of the creek.	NOD	
2008079030	Mitchell Mill Timber Harvesting Plan Forestry and Fire Protection, Department of --Calaveras 1600 agreement for a culvert replacement on a stream and re-aligning a timber hauling road to prevent erosion and head cutting of an intermittent stream.	NOD	
2008079031	Noah Estates Lots Solano County --Solano The project proposes to subdivide a 4.7 acre property into eight residential parcels ranging in size from 23,600 to 27,500 square feet. The residential lots will be built around a new cul-de-sac which will extend off of Lewis Avenue in Vallejo. Other improvements will include retaining walls, landscaping, driveways, and drainage improvements. Grading is expected to consist of cuts and fills up to 18 vertical feet to create near-level building pads. An unnamed intermittent stream flows through the mid-section of the property from east to west. The stream flows off-site, across the adjoining parcel, and then passes above ground and below ground in a series of culverts. The project would result in a direct and permanent impact to 0.03-acre of the stream channel including the 0.005-acre emergent wetland. Approximately 290 lineal feet of channel will be filled. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2008-0219-3 pursuant to Section 1602 of the Fish and Game Code to the project applicant, Enayat Haidari.	NOD	
2008079032	Phoenix Canyon Road Bridge Replacement Project Agreement No. 2008-0039-R4 San Luis Obispo County Arroyo Grande--San Luis Obispo The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code to the project applicant, Thomas Conway and Rancho Arroyo Grande, LLC. The applicant proposes to replace an existing bridge structure on Phoenix Canyon Road over Arroyo Grande Creek and install a new "at-grade" crossing over an unnamed tributary to Phoenix Creek.	NOD	
2008078124	Fountain Valley Unified School District Network Public Utilities Commission Fountain Valley--Orange Sunesys installs/operates fiber optic ethernet networks on behalf of school districts, universities, and library systems. The Fountain Valley project will involve the installation of 2.41 miles of underground fiber (trenching) and 9.85 miles of aerial fiber in existing structures.	NOE

	area where the wind fencing is installed is on the sandy beach and is open to driving year round. The area is void of native vegetation.		
2008078138	<p>Improvements to Existing Facilities at O.H. Close Youth Correctional Facility (YCF) Corrections and Rehabilitation, Department of Stockton--San Joaquin</p> <p>The project includes interior improvements to the existing Inyo building and an addition to the existing Humboldt Annex. Both projects are in compliance with the Prison Law Office (PLO) Consent Decree, resulting from the Farrell v. Hickman litigation, requiring CDCR to improve its mental health delivery system. These projects will enable CDCR to provide effective rehabilitative treatment to ensure successful rehabilitation and re-entry of youthful offenders in their communities. Improvements to the Inyo building will reconfigure the existing day room to accommodate two new education/treatment rooms, modify one existing education/treatment room and one existing office for use by the new Behavioral Treatment Program (BTP). There is no existing space in the facility that is configured and sized to house the staffing and program requirements of the BTP. The addition to the Humboldt Annex will house the Specialized Counseling Program (SCP) consisting of five offices for enhanced clinical staff, a group counseling room, along with ward and staff toilet rooms. Currently, there is insufficient space at the existing YCF to accommodate the program and space requirements of the PLO lawsuit. The expansion is within the secure perimeter of the YCF, on disturbed ground.</p>	NOE	
2008078139	<p>Counseling Buildings at N.A. Chaderjian Youth Correctional Facility (YCF) Corrections and Rehabilitation, Department of Stockton--San Joaquin</p> <p>CDCR will construct two new free-standing buildings for the Sexual Behavior Treatment Program (SBTP) that will include counseling and treatment space for youthful offenders and office space for the resident psychologist and staff. The buildings will also provide file and storage areas and restrooms. Currently, there is no unused program space to accommodate the program support spaces needed to implement the SBTP. The project is in compliance with the Farrell lawsuit, Prison Law Office Consent Decree and consistent with the CDCR Remedial Plan requiring the implementation of a sexual behavior treatment delivery system. The project is critical to provide an effective rehabilitative treatment facility to ensure successful rehabilitation and re-entry of youthful offenders into their communities. The facilities will accommodate existing program staff. The one-story structures will be located within the secure perimeter of Chaderjian YCF, on disturbed ground between existing structures.</p>	NOE	
2008078148	<p>Salem Property Culvert Replacement Fish & Game #3 --Solano</p> <p>From a directive given by the Department of Fish and Game, the project Applicant proposes to replace and properly install bottomless, arch culverts on each of three unnamed tributaries to Jameson Canyon Creek on the Applicant's property at 1646 Jameson Canyon Road, in the City of American Canyon, Solano County. Culvert #1 (closest to Salem residence) will be 18-inch in diameter by approximately 40-feet in length, culvert #2 will be 15-inch in diameter by approximately 20 feet in length, and culvert #3 will be 18-inch in diameter by approximately 40 feet in length. Culverts shall be installed at ground level to allow passage of fish and amphibians, and will not overhang the edge of the drainage. Native tree species will be planted along each of the three drainages to enhance</p>	NOE

2008071041	94/Engineer Springs Wireless Telecommunications Facility San Diego County --San Diego The project is a Major Use Permit to construct and operate an unmanned wireless telecommunication facility.	MND	08/08/2008
2008071042	Del Dios Highway ROW Wireless Telecommunications Facility San Diego County Escondido--San Diego The project is a Major Use Permit to construct and operate an unmanned wireless telecommunications facility.	MND	08/08/2008
2008071043	Brooks Street Stair Replacement and Sewer Lift Station Modification Laguna Beach, City of Laguna Beach--Orange The existing beach access stairs would be removed from the Brooks Street cul-de-sac to their terminus on the existing beach. In its place, the City would construct new access stairs from the Brooks Street cul-de-sac, beginning at approximately the 29 foot elevation to approximately the 12 foot elevation above MSL. A new over-look and bench area would be located at the top of the expanded lift station and new stairs. The stairs would be widened from the lift station to approximately 20 feet north in a stadium-type style. Another widened platform and overlook area with new landscaping would create new access to the pump station at approximately the 21-foot level above MSL. From this new platform area, the access stairs would continue westerly to approximately the 12-foot level above MSL. The lift station would be expanded below ground to the east.	MND	08/08/2008
2008071046	Ainsworth Tentative Parcel Map Santa Barbara County --Santa Barbara The proposed project entails: Dave Cross of Fletcher, Cross, and Associates, agent for Jim Ainsworth, owner, proposes to divide 9.65 gross acres into two lots of 3.46 gross acres (proposed parcel 1), and 6.19 gross acres (proposed parcel 2). Proposed lot 1 would contain an existing approximately 2,600 square foot single family dwelling and proposed lot 2 would contain an approximately 16,891 square foot development envelope which would contain all future development. Proposed lot 2 would also contain an existing approximately 1,330 square foot barn and carport/shed which are proposed to be removed. Access to proposed lot 1 would be provided by an existing private driveway of approximately 400 feet in length accessed from an existing private road. The development envelope on proposed lot 2 would be accessed via a proposed new driveway of approximately 60 feet in length accessed from an existing private road. Water services would be provided by the Golden State Water Company, and sanitary services would be provided by an existing septic system currently serving the existing single family dwelling residence located on proposed lot 1, and a proposed septic system in conformance with Environmental Health Services requirements to be located within the designated building envelope on proposed lot 2. No grading, tree or vegetation removal is proposed as a part of this project.	MND	08/08/2008

2008071040	<p>Medical Marijuana Dispensary Ord. - Conditionally Allowed Use Malibu, City of Malibu--Los Angeles</p> <p>The proposed project consists of an amendment to the Malibu Municipal Code to conditionally permit medical marijuana dispensaries in all commercial zones within the City of Malibu subject to development and performance standards. The California Compassionate Use Act of 1996, which is codified in Health and Safety Code Section 11362.5, and the Medical Marijuana Program found in Health and Safety Code Section 11362.7, together authorize the personal use of marijuana for medicinal purposes. While neither the Act nor the Medical Program specifically authorizes the establishment of medical marijuana dispensaries, there has been a proliferation of such establishments in cities throughout the region. Cities with such establishments have seen an increase in loitering around the dispensaries, burglaries, parking and traffic violations and increased noise and pedestrian traffic complaints from surrounding neighbors. Currently, there is no requirement for a conditional use permit and no regulations are in place within the Malibu Zoning Ordinance to ensure their safe and legitimate operation. To protect the health, safety, and general welfare of Malibu residents, the City of Malibu is proposing to adopt an ordinance conditionally permitting medical marijuana dispensaries subject to development and performance standards, or in the alternative, to prohibit such uses in the City.</p>	Neg	08/08/2008
2008071045	<p>Division Well No. 8 Project Big Bear Lake, City of Big Bear Lake--San Bernardino</p> <p>The proposed project is the drilling of a new production well just north of Big Bear Boulevard located on the south side of Bear Valley. The objective of the proposed well is to increase water production to meet peak day demand requirements of existing development and future connections. The proposed Division Well No. 8 would allow increased well pump cycling so that existing DWP wells could be turned off more frequently, thereby reducing localized water table drawdown associated with pumping. The proposed production well would also serve to replace production lost because existing wells have been removed from production for maintenance, water quality, and other reasons.</p>	Neg	08/08/2008
2008071048	<p>South Fairview Commercial Center Project Goleta, City of Goleta--Santa Barbara</p> <p>The project site is located within Old Town Goleta and zoned C-2. It is designated as Old Town Commercial under the City's General Plan. The application includes a Final Development Plan for construction of a 16,885 square foot, two-story, mixed use structure, including 9,250 square feet of retail space on the first floor, 6,110 square feet of office space, and two one-bedroom apartments (709 square feet and 816 square feet, respectively) on the second floor. The application also includes a request for approval of a Condition Use Permit for the two proposed residential units as part of the mixed-use project. In addition, the applicant is requesting approval of a Lot Line Adjustment to adjust the property boundary along South Fairview Avenue to reflect the existing alignment and improvements to the roadway previously constructed by the County of Santa Barbara.</p>	Neg	08/08/2008

2008072025	2006-022 TPM Strange Calaveras County Murphys--Calaveras The applicant is requesting approval of a Tentative Parcel Map to divide 3.95 +/- acres into two parcels of approximately 2 acres in size.	Neg	08/08/2008
2008072026	Zone 12, Line P (San Leandro Creek) Desilting Project, City of Oakland Alameda County Oakland--Alameda The Alameda County Flood Control and Water Conservation District (District) proposes to remove approximately 5,000 cubic yards of deposited silt along approximately 2,500 linear feet in an earthen flood control channel (designated Line P in the District's Zone No. 12-San Leandro Creek) from approximately 110 feet upstream of the 98th Avenue bridge to 130 feet downstream of the Hegenberger Road bridge. Desilting the existing flood control channel will increase capacity to the original design configuration. The project consists of the placement of inflatable dams at the upstream and downstream limits of the project and placement of a pipe to route water around the construction area, the removal of silt using a long reach excavator stationed on the banks along the existing access roads on both sides of the channel, and the removal of the silt offsite to a landfill.	Neg	08/08/2008
2008072027	Panko Subdivision San Mateo County Burlingame--San Mateo The project involves a minor subdivision of a 29,624 square foot parcel to create two residential parcels of 14,074 square feet (Lot 1) and 15,549 square feet (Lot 2). There is an existing house on the project site, which will be removed prior to development of the proposed subdivision at a later date. The lot is accessed from Glen Aulin Lane, and both proposed parcels will retain access to Glen Aulin Lane. Water is provided Hillsborough Municipal Water Department and sewer service by Burlingame Hills Sewer Maintenance District via existing infrastructure serving the lot. The location of the project is on topography that exceeds a 20% slope.	Neg	08/08/2008
2006091107	General Plan Update 2006-2026 Dinuba, City of Dinuba--Tulare NOTE: Revisions to Section 3.14 of the Draft EIR. The Plan Update will provide direction for development in the City of Dinuba over the next 20 years. The proposed project is located in northwestern Tulare County. The geographic area covered by the project includes the City limits of Dinuba which is generally bounded by Avenue 406 to the south, Avenue 426 to the north, Road 92 to the east and, Road 60 to the west; and the Urban Development Boundary, the 20-year development boundary which is generally bounded by Avenue 396 on the south, Road 60 to the west, Road 96 to the east, and Avenue 430 to the north. The project proposes a mix of residential, commercial and industrial land uses.	RIR	08/25/2008

	would range from a minimum of 7,000 square feet to a maximum of five acres. The project would include ancillary infrastructure improvements such as access roadways, internal circulation roadways, and utilities, among others. This Supplemental EIR analyzes revisions to a previous project description that was included in an EIR circulated for public review in 2005. The revised project description for the Sierra Meadows Estates Subdivision Project is generally consistent with the previous version. The project location, proposed residential land use, residential unit count, and anticipated permits and approvals remain the same. However, several substantial changes to the project description have occurred in response to agency and public input, in an effort to minimize the potential environmental impacts of the project.		
2006091071	Sunrise Powerlink Project Public Utilities Commission El Centro, San Diego--San Diego, Imperial SDG&E proposes to construct a new 91-mile, 500 kilovolt (kV) electric transmission line from Imperial Valley Substation (in Imperial Valley, near the City of El Centro) to a new Central East Substation (in central San Diego County, southwest of the intersection of County Highways S22 and S2) and a new 59-mile 230 kV transmission line that includes both overhead and underground segments from the new Central East Substation to SDG&E's existing Penasquitos Substation (in the city of San Diego). 	corporation and JTS Communities, Inc., pursuant to the authority of sections 65884 et seq. of the Government Code of the State of California, which authorizes the City to enter into an agreement with any person(s) having a legal or equitable interest in real property providing for the development of such property providing for the development of such property and establishing certain development rights. The First Amendment to Development Agreement implements condition of approval No. 34 for the Traditions subdivision.		
2008078161	Accinelli Variance lone, City of lone--Amador The applicant is requesting a variance from the required setbacks and parking to construct a new, two-story, single family home in the C-1 zone. The reduction in setbacks call for a decrease in the side property setback from six feet to five feet and a reduction in the rear setback from 15 feet to five feet. The parking reduction will provide for both two garage spaces and one exterior, off-street space (City standards require two garage spaces and two exterior, off-street spaces).	NOE	
2008078162	Lease of Previously Occupied Office Space to the California Military Department Military Department - Office of the Adjutant General Sacramento--Sacramento Project involves the relocation of 30 employees from the California Military Department's Joint Forces Headquarters to newly leased office space. The building leased has previously been occupied, and the relocation of employees into these buildings will cause negligible or no expansion of the current use of the building.	NOE	
2008078163	Sycamore Creek Bank Stabilization Project Resource Conservation District, Santa Cruz County Morgan Hill--Santa Clara The RCD and the Natural Resource Conservation Service (NRCS) propose to stabilize the channel, bank, and improve riparian habitat along a portion of Sycamore Creek in Santa Clara County, California. Sycamore Creek is a tributary to Uvas Creek, which is designated critical habitat for the South-Central California Coast (S-CCC) steelhead (<i>Oncorhynchus mykiss</i>) Distinct Population Segment (DPS). Streambank erosion along lower Sycamore Creek delivers fine sediment to Uvas Creek, which degrades salmonid spawning habitat. The proposed Sycamore Creek Bank Stabilization Project (Project) would stabilize and revegetate the channel and over-steepened banks along Sycamore Creek to reduce erosion, control the release of sediment and improve habitat for various species that may utilize the riparian corridor. The proposed Project would stabilize the streambanks by grading them to a slope of 2h:1v. Numerous large pieces of concrete riprap and other debris would be removed from the bed and banks. At the downstream end of the Project, about 50 feet upstream of an existing concrete weir, a sub-grade sheetpile wall and boulder weirs would be installed to prevent further incision of the channel. The sheetpile would be located downstream of the boulder weirs and would not be visible at the surface or active unless the existing concrete weir were to fail. A series (5) of rock vortex weirs would be constructed in the channel immediately upstream of the sheetpile wall. The rock weirs would act as local grade control features and create a series of step-pools. A 12-inch layer of native stream substrate (gravel/cobble) would be placed in the channel bed throughout the Project reach. The entire riparian area would be revegetated with the application of native seed and installation of woody shrub cuttings and container plants.	NOE

	Construction of the Project is anticipated to take 45 calendar days. All Project activities, except for revegetation, would occur between August 1 and October 15 to avoid the nesting season of bird species. Revegetation activities would be completed by November 15. The Project is scheduled to be constructed in 2008.		
2008078164	Cover crops for winter erosion control Resource Conservation District, Santa Cruz County --Santa Cruz, San Benito, Santa Clara This project provides financial incentives and technical assistance to growers to plant winter cover crops for erosion control. These cover crops are anticipated to provide sediment load reductions to tributaries of the Pajaro River that we will quantify using the RUSLEII computer model. This project reminds growers of the benefits of cover cropping for both local waterways and grower's soil health. It also opens dialog and fosters relationships between conservation staff and growers to advance the implementation other farm water quality protection practices.	NOE

2004071063	Tentative Tract Map 239 / Walters Inyo County --Inyo This is a Recirculated EIR for Tentative Tract Map #239/Walters, consisting of the portion of the original EIR that deals with the analysis of the feasibility of a project alternative of a land exchange with the Bureau of Land Management (BLM).	EIR	08/29/2008
2006092051	2005-2025 City of Riverbank General Plan Update Riverbank, City of Riverbank--Stanislaus NOTE: Document is a Recirculated Draft Program EIR. Due to a high level of public interest, the City elected to recirculate certain chapters of the General Plan Update Draft EIR (GPU DEIR). The GPU is the comprehensive policy document that will direct development and conservation in Riverbank over the next 20 years. This GPU could accommodate up to 10,700 new dwelling units; 3.3 million square feet of new commercial, office, and industrial building spaces; as well as schools, parks, and other uses. The GPU describes the transportation network that will serve new neighborhoods and the existing City, in addition to the full range of other infrastructure and public services that will be required. The City has drafted a comprehensive array of policies to minimize environmental impacts associated with implementation of the GPU.	EIR	08/25/2008
2008021024	Academy of Our Lady of Peace San Diego, City of San Diego--San Diego A CUP amendment to allow a maximum annual enrollment of 750 students, construction of a 21,059-square-foot, 2-story classroom building and construction of a 94 parking space, 2-story parking structure and the demolition of 3 existing single family homes. 2008021131	Pacific Trade Center El Monte, City of El Monte--Los Angeles The Pacific Trade Center is a proposed 27-acre commercial and industrial development. The project would require the subdivision of the site into parcels. Three parcels would be utilized for commercial/industrial development, while one parcel would be utilized as a roadway providing access to the site. Two of the commercial/industrial parcels (totaling approximately nine acres) would occupy the western portion of the site, fronting North Arden Drive. The remaining commercial/industrial parcel (approximately 18 acres in size) would occupy the eastern portion of the site. The remaining parcel (roadway) would follow the eastern boundary of the project site, providing site access from Valley Boulevard.	EIR	08/25/2008
2008031066	The Village at Bella Terra Huntington Beach, City of Huntington Beach--Orange Implementation of the proposed project would result in a GPA to allow horizontally integrated mixed-use development in addition to the currently allowed vertical mixed-use development, to increase the total mixed use building FAR from 1.5 to 1.75, allowing an additional 172,606 square feet beyond the 1,035,639 square feet that is currently allowed. Within this total building square footage limitation, the maximum residential density would increase from 25 dwelling units per acre (du/ac) to 45 du/ac. This increase would allow for a maximum of 317 additional units on the site, beyond the 396 units that are currently allowed.	EIR	08/25/2008
2008041027	Central Region MacArthur Park Elementary School Addition Los Angeles Unified School District Los Angeles, City of--Los Angeles LAUSD is proposing to construct an addition to the existing MacArthur Park Primary Center. The existing campus currently provides 300 seats in 12 classrooms. The existing building encompasses approximately 15,000 square feet. The proposed project would provide 350 new seats for a total of 650 seats. The proposed project would add 14 new classrooms for a total of 26 classrooms. Approximately 35,000 square feet of new space would be added to the existing 15,000 square feet of the MacArthur Park Primary Center campus, for a total of approximately 50,000 square feet.	EIR	08/25/2008
2008071051	Hernandez Tentative Tract Map/Development Plan/Coastal Development Permit San Luis Obispo County Nipomo--San Luis Obispo Cluster subdivision of existing 18.3-acre parcel into six residential parcels of approximately 1.0 to 1.18 acres each, one buildable open space parcel of 9.98 acres with a 6,000-square foot building envelope, and 2.13 acres of on-site roads, for the purpose of sale and/or development. The project includes off-site road improvements, two drainage basins of 1.8 and 0.90 acre-feet each, an easement for an equestrian/pedestrian path, temporary fruit stand, landscaping, and revegetation of portions of the open space parcel. 2008071054	Duncan/Wilson Ranch Road Improvement Project San Bernardino County --San Bernardino Grading, paving, installation of traffic signals and striping, and utility construction for Duncan and Wilson Ranch Road between Johnson and Wilson Ranch Road and Duncan Road and Goss Road.	MND	08/11/2008
2008071055	T-7-05, D-12-05, C-28-05, V-7-05, V-2-07 Clublife Senior Living Center Project Oceanside, City of Oceanside--San Diego A Tentative Parcel Map (T-7-05), Development Plan (D-12-05), Conditional Use Permit (C-28-05) and Variances (V-7-05 and V-2-07) to allow a two lot subdivision and 192 residential condominiums; the construction of five buildings totaling 208,761 square feet and allow land use 440.S General Residential Care; and to allow building and retaining wall heights that vary from district regulations on a 6.71 acre site located at the western terminus of The Depot Road (APN 157-411-19). The project site is zoned CN-SP-EQ Districts and RM-B-SP-EQ Districts, and is situated within the Guajome Neighborhood.	MND	08/11/2008
2008071056	Duncan Road Improvement Project San Bernardino County --San Bernardino The San Bernardino County Department of Public Works proposes to construct eight segments of Duncan Road and one segment of Wilson Ranch Road as outlined in the High Desert Transportation Facilities Plan. This segment of Duncan Road, between Oasis Road and Buckwheat Road, is an existing public dirt road approximately two miles in length. Duncan Road is listed as a priority project for the High Desert Transportation Facilities Plan and reflects a cooperative effort among the County Fire Department, the County Department of Public Works, and the Phelan and Pinon Hills Municipal Advisory Councils to construct a backbone of roads that will improve access and safety.	MND	08/11/2008
2008071057	Lantern Crest Senior Congregate Care Facility Santee, City of Santee--San Diego The proposed project is a General Plan Amendment, Rezone, and Conditional Use Permit for a 360-unit senior congregate care facility and buildings up to four stories and a maximum 55 feet in height on a 26.69-acre site located east of the Prospect Avenue and Graves Avenue intersection. The congregate care facility would provide a range of housing options and services for elderly persons, including independent living, assisted living, and dementia care. The anticipated age range of future residents would be from approximately 75 years to approximately 95 years. Most residents of congregate care facilities no longer drive and need some assistance with the activities of daily living. The facility is designed to be self-contained and would provide on-site security, non-medical care providers, meal service, and transportation services. The applicant anticipates that the project would be managed by Integral Senior Living (ISL), a company that specializes in management of senior congregate care facilities.	MND	08/11/2008

2008072031	<p>Buchanan Field Airport Master Plan Update and General Plan Amendment Contra Costa County Concord, Martinez--Contra Costa</p> <p>The proposed project involves an update of the existing 1990 Master Plan for the Buchanan Field Airport, consistent with Federal Aviation Administration (FAA) requirements, and a related amendment to the Land Use and Transportation/Circulation Elements of the Contra Costa County General Plan (2005-2020) in support of the Airport Master Plan update (collectively referred to as the "proposed project").</p>	MND	08/11/2008
2008072032	<p>Zone Amendment 08-002 & Parcel Map 07-038 (Lynn) Shasta County Redding--Shasta</p> <p>The project is a Zone Amendment from the Unclassified (U) zone district to the Rural Residential (R-R) zone district in conjunction with a four-parcel residential land division. Improvements would include the surfacing of existing un-surfaced road accesses, provision of water service connections, installation of fire hydrants as necessary to meet fire safety standards, and the implementation of a wildland fire and vegetation management plan.</p>	MND	08/14/2008
2008072034	<p>Black Butte Drive/Shastina Drive Realignment Project Weed, City of Weed--Siskiyou</p> <p>The City of Weed is proposing to utilize State Transportation Improvement Program (STIP) funding to realign portions of Black Butte Drive and Shastina Drive. These improvements are proposed in order to improve circulation in the South Weed area. In order to accomplish this, Black Butte Drive would be realigned so that it, rather than Shastina Drive, provides for continuous vehicle movement en route to South Weed Boulevard to the north. Shastina Drive would similarly be realigned so that it terminates in a "T" intersection with Black Butte Drive approximately 40 feet north of the current Shastina Drive/Black Butte Drive intersection. In essence, the functional orientation of these two roadways would be reversed.</p> <p>In conjunction with the proposed realignment of Black Butte Drive, the segment of Black Butte Drive between Vista Drive and Shastina Drive would be widened to accommodate the resulting increase in traffic. Lastly, the Black Butte Drive/Vista Drive intersection would eventually be signalized and existing depressions at the intersection filled.</p>	MND	08/11/2008
2005071080	<p>The Shores Los Angeles County --Los Angeles</p> <p>On April 28, 2008, the Los Angeles Superior Court ruled that The Shores Project Environmental Impact Report (EIR) did not comply with the California Environmental Quality Act (CEQA) with regard to environmental analysis associated with exporting approximately 25,940 cubic yards of soil from the site in preparation for construction of the Project. The Court upheld all other analyses in the EIR.</p> <p>The subject property, which comprises two County of Los Angeles-owned parcels known as Marina del Rey Parcels 100 and 101, is located at 4201 Via Marina within the unincorporated community of Marina del Rey. 	<p>improvements which include 202 apartment dwelling units in 34 two-story structures, related surface parking and landscaping and hardscape facilities, and (2) the construction of 544 apartment units in a series of 12 five-story structures. each building would consist of a five-story concrete structure over two levels of subterranean and above-grade parking. The proposed project also includes substantial landscaping and hardscape facilities such as sidewalks, paved paths and outdoor recreational amenities for the residents of the apartments.</p> <p>Parking would occur in garages built beneath five levels of apartments. The proposed project will provide a total 1,114 parking spaces on site. This number exceeds code parking requirements. County of Los Angeles Zoning Code requires 1,088 parking spaces (952 for residents of the project and 136 spaces for their guests).</p> <p>In association with the development of this project and in accordance with the court order referenced above, an additional analysis will be prepared to evaluate the potential environmental impacts associated with exporting approximately 25,950 cubic yards of earth material from the project site to the Puente Hills Landfill. This NOP is being distributed to determine what, if any, technical information should be included in the subject additional analysis.</p>		
2008071058	<p>Villas de Carmelo Monterey County Carmel-by-the-Sea--Monterey</p> <p>The project consists of the redevelopment of the former Carmel Convalescent Hospital site, which is located on the west side of the Highway 1 in the unincorporated Coastal Zone of Monterey County, between Highway 1 and Valley Way in Carmel, California. The project proposes the rehabilitation and adaptive reuse of the existing 11,500 square-foot hospital structure on-site and demolition of two existing ancillary structures. The proposal also involves a subdivision, rezoning and coastal development permit to all the development of a residential village on the 3.68 acre site. The total number of residences will be forty-six with a mix of market rate and affordable residences. The plan calls for the existing hospital structure to be the focal point with new structures of two and three-stories also on the site. The three-story structures are placed in locations where they can take advantage of the sloping topography to minimize building height. The existing entrance from Highway 1 is proposed to be abandoned. The existing entrance on Valley Way will be relocated further to the south. It is expected that improvement to Valley Way, as well as safety improvements at the intersection of Highway 1 and Valley Way, will be required.</p>	NOP	08/11/2008

Treatment will be limited to the specific technologies proposed in the regulations.	NOD	
2008042074	Sis-Q Select, LLC. Use Permit (UP-08-04) and Reclamation Plan (RP-08-01) Siskiyou County --Siskiyou Use Permit and Reclamation Plan approval to establish a new surface mining operation, which would consist of extracting, processing, stockpiling and exporting approximately 60,000 tons of sand and gravel from historic tailing stockpiles.	NOD	
2008052010	Pickrel Floodplain Restoration Solano County Water Agency Winters--Solano The applicant proposes to restore functional floodplain elevation to the north bank of Putah Creek for 800 feet downstream of the Putah Diversion Dam. Sediment would be removed from the floodplain and used to fill the edge of the north bank on existing high ground that is out of the active channel. The project features a rock weir above an island in the channel that will serve as a gravel retaining structure for salmon spawning habitat. One hundred cubic yards of 3-inch minus gravel will be placed upstream of the rock weir. The weir and gravel bed will serve as a crossing during construction and afterward as a low flow crossing for maintenance of the north bank. In the winter months, the gravel bed will enhance salmon spawning habitat. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2008-0205-3 pursuant to Section 1602 of the Fish and Game Code to the project applicant, Chris Lee, Solano County Water Agency.	NOD	
2008052026	2008 Fisheries Restoration Grant Program Project Fish & Game #2 --Humboldt The project proposes to reduce impacts to and restore Salmonid habitat through implementation of site specific and prioritized road decommissioning, erosion control and erosion prevention work on Rocky Gulch, in Humboldt County.	NOD

2008079034	Streambed Alteration Agreement 1600-2008-0050-3/ THP 1-06NTMP-015 SON Forestry and Fire Protection, Department of --Sonoma The applicant proposes the installation of six permanent rock ford crossings on Class II watercourses, one temporary ford crossing on a Class II watercourse, and one permanent rock ford crossing on a Class III watercourse. Also included in this agreement is the proposed replacement of a culvert crossing on a Class II watercourse, and the installation of energy dissipation on existing culvert and rock ford crossings on Class II watercourses. The projects are associated with Non-Industrial Timber Management Plan (NTMP) 1-06NTMP-015 SON. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2008-0050-3 pursuant to Section 1602 of the Fish and Game Code to the project applicant, Merlo Family Limited Partnership.	NOD	
2008078146	Richmond-San Rafael Bridge Seismic Retrofit Project (Amended Incidental Take Permit No. 2081-2007-023-03) Fish & Game #2 San Rafael, Richmond--Marin, Contra Costa The project involves construction of a seismic upgrade to the 5.5 mile-long Richmond-San Rafael Bridge that spans the upper arm of the San Francisco Bay. The project includes upgraded piers, foundations, and columns and the replacement of the west concrete trestle. Some grading and dredging is also involved. Construction activities include driving approximately 212 piles into the floor of the Bay. The purpose of the project is to make the Richmond-San Rafael Bridge comply with seismic safety standards for the benefit of those using it.	NOE	
2008078147	Leasing of New Office Space Consumer Affairs, Department of Sacramento--Sacramento Department of Consumer Affairs, proposes to lease approximately 35,417 square feet of office space. The office will have approximately 0 employees performing general office duties.	NOE	
2008078149	Lime Saddle Boat Launching Facility Ramp Widening Boating and Waterways, Department of --Butte This is an amendment to the original notice of exemption received June 5, 2007. The original project has been reduced in scope. The updated project will widen the existing boat ramp to facilitate safe convenient launching and retrieval of boats. A 20 foot wide and approximately 350 foot long addition will be constructed to widen the existing ramp. Work is scheduled to coincide with low water conditions however, if the level does not recede sufficiently a turbidity screen will be installed.	NOE

Scope of work includes plans and specifications preparation, materials for pipe fabrication procurement, entry permits procurement, shutdown coordination, and all activities in advance of award the construction contract.	NOE	
2008078152	Patzau Residence Fish & Game #3 Cotati--Sonoma The proposed project is a replacement or reconstruction of an existing bridge, over an ephemeral stream, where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the structure replaced. Issuance of a Streambed Alteration Agreement Number 1600-2008-0160-03 pursuant to Fish and Game Code Section 1602.	NOE	
2008078153	Wallis/Harley Pier reconstruction (1600-2008-0065-R2) Fish & Game #2 --Placer Construction of a new multi-use residential pier with two boat lifts. The pier will be supported by 10 individual cylindrical steel pilings driven into the substrate of the shore and lake bottom by means of an amphibious vehicle. Ten additional pilings will be driven into the substrate to support the pier head. The pier will have steel cross beams attached to the pilings. The cross beams will be covered with a decking of Trex or a similar material. The twin boat lifts will be located on opposite sides of the pierhead and will be individually supported by single pilings driven into the lake bottom. In addition to the construction of a new pier, the existing pier will be removed by amphibious vehicle. The existing steel pilings will be removed from the substrate and the bottom substrate restored to resemble surrounding benthic strata.	NOE	
2008078154	662 Peninsula Drive rip rap (1600-2008-0114-R2) Fish & Game #2 --Plumas Placement of large rip rap rocks along 70 feet of lake front to reduce erosion associated with wave action from the lake.	NOE	
2008078155	Ross Valley Sanitary District (RVSD) Sewer line Replacement Project Fish & Game #3 Larkspur--Marin Ross Valley Sanitary District (RVSD) is proposing a project to replace an existing 10-inch sewer line under Larkspur Creek with a new 18-inch sewer line. The project involves installation of the new pipe via open-cut trench methods, installation of coffer dams both upstream and downstream the site and reinstallation of the new 18-inch pipe approximately 3 feet below the streambed of Larkspur Creek. The project also involves removal of existing concrete pillows from within the stream channel in order to eliminate obstruction(s) to flow and potential fish passage concerns. RVSD has proposed to back fill the trench with low density concrete to one foot above the pipe and backfill the remaining two feet with native materials. The contractor will be required to replant disturbed stream bank areas with native vegetation as part of the proposed project. The California	NOE

	Department of Fish and Game is issuing Streambed Alteration Agreement Number 1600-2008-0235-3 pursuant to Fish and Game Code Section 1602, to the Applicant, Mr. Eric Stassevitch, Ross Valley Sanitary District.		
2008078156	Conn Creek Stabilization Plan Fish & Game #3 St. Helena--Napa The proposed project will involve stream bank restoration at the Conn Dam facility at 1000 Sage Canyon Creek (Hwy 128) on Conn Creek, tributary to the Napa River in Napa, California (APN# 030-130-004, Napa 7.5 minute U.S. Geological Survey quadrangle). The project will repair bank erosion caused by the 2005/06 New Year's flood event. The bank has eroded in several places along the Conn Dam pipeline making equipment access difficult. The Department of Fish and Game is issuing a Streambed Alteration Agreement Number 1600-2007-0225-3 pursuant to Fish and Game Code Section 1602.	NOE	
2008078157	Ross Valley Sanitary District (RVSD) Sewer line Removal Project Fish & Game #3 Ross--Marin Ross Valley Sanitary District (RVSD) is proposing a project to remove an existing sewer trestle comprised of several steel pipes and couplings that span Ross Creek and install large woody debris (LWD) material (logs) at the base of a newly constructed concrete footing. Additional elements of the project include installation of a versa-lock block wall outside of the stream area in order to stabilize earthen areas adjacent to, but not within, the stream zone and riparian area of Ross Creek. Details of the LWD installation include fastening 3-4 pieces of LWD (minimum of 8-foot long 18-inch diameter with complete root wads) to the concrete footing in a manner that will provide in-stream pool habitat. The California Department of Fish and Game is issuing Streambed Alteration Agreement Number 1600-2008-0265-3 pursuant to Fish and Game Code Section 1602, to the Applicant, Mr. Eric Stassevitch, Ross Valley Sanitary District.	NOE	
2008078158	Estero Americano Sediment Reduction Project Fish & Game #3 Petaluma--Sonoma This project consists of the stabilization of two gullies on an agricultural property in western Sonoma County. A system consisting of rock drops in series is proposed to stabilize the gullies. Nineteen rock drops on the western gully and eight rock drops on the eastern gully will be installed at varying intervals reducing the slope of the vegetated grassed waterway in between the rock drops at 2%. The channel will be re-graded to a vegetated grassed waterway with compact fill, armored with erosion control blanket and planted with a native grass erosion control seed mix. Approximately 3,400 feet of fencing will be installed to exclude livestock from the restoration site. Issuance of a Streambed Alteration Agreement Number 1600-2008-0084-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2008078159	Issuance of Streambed Alteration Agreement No. R1-08-0098 Fish & Game #1 Red Bluff--Tehama The project proposes the replacement of a multiple-pipe culvert crossing with a single pipe culvert crossing using one bottomless arch culvert.	NOE

2008071068	Proposed Amended (PAR) 1156 - Further Reduction of Particulate Emissions from Cement Manufacturing Facilities South Coast Air Quality Management District -- NOTE: Document is a Notice to Rely on a Previously Prepared Final EA. The objective of PAR 1156 is to further reduce particulate matter (PM) emissions from cement manufacturing facilities. A Final EA (2005 Final EA, SCAQMD No. 050307JK, dated October 13, 2005 and certified on November 4, 2005) for the current rule, was previously prepared pursuant to CEQA, which identified "air quality" as the only environmental topic that might be adversely affected by the current rule. PAR 1156 would require the enclosure of clinker storage, which was evaluated in the 2005 Final EA as a possible control option. Since impacts from the currently proposed project are essentially the same as those analyzed in the previous 2005 Final EA that was circulated for public review and comment, and subsequently certified, and no other significant adverse impacts were identified. SCAQMD will rely on that previously certified 2005 Final EA pursuant to CEQA Guidelines §15153, because the circumstances of the projects are essentially the same. No additional reasonable alternatives or mitigations were identified or are required.	Oth	08/27/2008
2004121066	Meadowpass Road Extension Walnut, City of Walnut--Los Angeles Meadowpass Road is identified in the Walnut General Plan as a Secondary Street, and two segments between Amar Road and Pierre Road have not been constructed. The proposed project involves the acquisition of right-of-way (80 feet wide and approximately 1,775 linear feet) and the construction of the two roadway segments (recommended by the City Council for two lanes), including sidewalks, equestrian/hiking trails, utilities and drainage facilities. The improvements would align with the completed improvements on both ends of the existing roadway.	NOD

2008052071	<p>2008-020 CEQA Review of Grading Plan for SR 4 Bypass Overburden Disposal Site for Teichert Construction Calaveras County Angels Camp--Calaveras</p> <p>The applicant is requesting approval by Public Works of a Grading Plan for the disposal of approximately 270,000 cubic yards of excess material to be produced from the construction of the SR 4 Bypass. The SR 4 Bypass Project was the subject of a previous and separate CEQA review conducted by Caltrans. The action to be taken by the Planning Commission is the possible adoption of a CEQA Mitigated Negative Declaration for the Grading Plan for the overburden disposal site on private lands under the jurisdiction of the County. The overburden disposal pile will achieve a height that varies locally from 0 feet to 52 feet above original ground surface and will be constructed at a 2:1 maximum slope at finished grade. Where existing natural slopes are steeper 5:1, "keyways" shall be excavated into the natural ground surface prior to placement of fill materials. Fill areas will be seeded, fertilized and mulched between September 15 and October 15. Best Management Practices will be implemented to control erosion. The project will file a Notice of Intent to comply with the NPDES Stormwater Discharge Permit for Construction Activities and provide a Storm Water Pollution Prevention Plan. Preconstruction surveys will be conducted for nesting raptors, passerines, and non-passerine land birds for any work commencing between February 1 and August 31. The property is located on the north slope of Bald Hill, about 0.6 mile northeasterly of the intersection of SR 49 and Murphys Grade Road north of the City of Angels Camp and within the City of Angels Camp sphere of influence.</p>	NOD

	two sides of the building below the eaves and gable of the 14' x 18' building; install six temporary concrete footers approximately 4' from the building (12" x 12" x 18" deep); and attach six wooden braces between the collar and the concrete footings. All proposed work is temporary and reversible. Documentation will occur during all phases of the project by DPR Cultural staff.		
2008078168	Little Basin Acquisition Parks and Recreation, Department of --Santa Cruz Acquire approximately 535 acres of land known as the Little Basin property, located south of State Highway 236 in northern Santa Cruz County for inclusion into Big Basin Redwoods State Park to administer, protect, provide for recreational opportunity, and develop the State Park System. Jointly owned by the Sempervirens Fund and the Peninsula Open Space Trust (POST), this former Hewlett-Packard employee retreat comes complete with cabins, clubhouse, caretaker's residence, maintenance shop, and other recreational structures. Any future projects or development of the Little Basin property will require a full environmental compliance review.	NOE	
2008078169	Removal Action Workplan, Proposed South Region Span K-8 #1 (Site 15) Toxic Substances Control, Department of --Los Angeles The project involves approval of a Removal Action Workplan (RAW) by the Department of Toxic Substances Control (DTSC) pursuant to Health and Safety Code, chapter 6.8, as submitted on February 25, 2008 by the Los Angeles Unified School District (LAUSD). The RAW focuses on excavation and removal of soils impacted with elevated levels of arsenic, lead, chlordanes, 4,4-DDD, 4,4-DDE, 4,4-DDT, dieldrin, toxaphene and total petroleum hydrocarbons (TPHs) onsite. The purpose of the project is to mitigate impacted soils that exceed the project-specific human health risk criteria to minimize human exposure to the identified chemicals of concern (COCs). The estimated volume of impacted soils is 104 cubic yards or approximately 10 truckloads. The cleanup levels for these COCs are: DTSC soil screening level of 255 milligrams per kilogram (mg/kg) for lead at school sites, DTSC risk management level of 12 mg/kg for 4,4-DDD, 1.60 mg/kg for 4,4-DDE and 4,4-DDT, 0.035 mg/kg for dieldrin, 0.46 mg/kg for toxaphene, respectively in residential soils.	NOE	
2008078170	Closure Certification for the Central Storage Facility at Mather (formerly Mather Air Force Base) and Addendum to Closure Plan Toxic Substances Control, Department of --Sacramento In accordance with State and Federal regulations, the owner/operator of a RCRA permitted facility, must certify compliance with the Closure Plan and provide documentation of its completion. The certification and documentation are submitted in the Closure Certification Report. The project is the Department of Toxic Substances Control's (DTSC's) Closure Certification for the Central Storage Facility (CSF). Closure Certification consists of approval of the March 1996 Closure Certification Report and April 2007 Addendum to Closure Plan. The Report and Addendum provide all the documentation required for closure. Background: DTSC issued a Hazardous Waste Facility Permit for the CSF in December 1990. Air Force flight operations ceased at Mather AFB in early 1993, and the base became permanently deactivated in September 1993. As such, hazardous waste generation has ceased since this time. A Draft Closure Plan was submitted in March 1994. DTSC approved the finalized Closure Plan in May 1995.	NOE

<u>Documents Received on Monday, July 14, 2008</u>			
	<p>Closure activities were conducted between July and October 1995. The Closure Certification Report (Report) was submitted to DTSC in March 1996. In a letter dated June 29, 2001, DTSC denied Closure Certification due to deficiencies identified during review of the Report. A February 21, 2002 DTSC letter outlined the requirements and provided technical guidance to complete closure of the CSF. On September 23, 2003, DTSC issued a letter to renew its request for an amendment to the Closure Plan as outlined in the February 21 letter. In response, the Air Force issued an Addendum to the Closure Plan on April 20, 2007.</p>		
2008078171	<p>Completion of Removal Action for Clay Pigeons and Lead Shot in the Northern Drainage Shooting Range Area of the Santa Susana Field Laboratory (SSFL) Toxic Substances Control, Department of --Ventura</p> <p>Along the Northern Drainage and within its banks, the clay target debris deposits will be flagged and removed with a vacuum truck and hand tools. The vacuum truck's suction hose is partially supported by a boom, and, with extensions, can reach approximately 250 feet from the truck. The estimated volume of clay target debris and incidental soil likely to be generated in the Northern Drainage is approximately 4,250 cubic yards.</p> <p>At the former Shooting Range, non sensitive vegetation will be removed prior to debris removal. The clay target deposits outside the drainage will be flagged in the field and scraped away in layers using a backhoe or front-end loader. After initial debris removal in each area, visual inspections will be conducted and any remaining debris will be collected using hand tools. At the Sage Ranch trail, lead shot particles exposed on the surface soils will be removed with hand tools and a vacuum truck. The estimated volume of clay target debris and incidental soil likely to be generated in the former Shooting Range is approximately 4,000 cubic yards. All debris will be contained in bins that will be stored on the Boeing property and later disposed off-site. All materials will be removed from the SSFL by companies that are qualified, fully licensed, and insured to transport the materials to a licensed disposal facility. Procedures and protective measures designed to minimize transportation-related impacts and the location of the proposed final disposal facilities are identified in the final Transportation Plan approved by DTSC.</p>	NOE

2008078175	Two Vehicle Bridges over Foss Creek Fish & Game #3 Healdsburg--Sonoma The project would replace an existing bridge with two pre-fabricated bridges over Foss Creek in Healdsburg, California. The new bridges will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the existing bridge. Issuance of a Streambed Alteration Agreement Number 1600-2008-0203-03 pursuant to Fish and Game Code Section 1602.	NOE	
2008078176	Well No.18X-14 (030-36852) Conservation, Department of --Kern Drill a development well within the administrative boundaries of an oil and gas Field. The well will be compatible with existing land use.	NOE	
2008078177	Well No. 77X-3 (030-36851) Conservation, Department of --Kern Drill a development well within the administrative boundaries of an oil and gas Field. The well will be compatible with existing land use.	NOE	
2008078178	Miles Jones, Staircase and Temporary Floating Dock Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa --Sonoma The proposed project includes the replacement of an existing river access stairway with a new removable stairway and removable floating dock and the stabilization of an eroding reach of riverbank utilizing a willow sprig bioengineering approach. The stairway consists of two sections of removable steps, each 15 feet long and 3 feet wide, which attach to three small permanent landings. The stairway will be installed on a denuded bank and no excavation or fill will be required. All work will be done above the low flow water level. The proposed willow planting will restore and stabilize approximately 350 feet of river bank, and will be mitigation for impacts of the stairway replacement project. Willow sprigs collected from Yellow Willow or Red Willows will be planted approximately 2 feet-on-center to produce a dense thicket. Arroyo Willow will not be used. Two areas of Arundo donax on the property will be removed using hand tools. Cut Arundo donax stalks will be painted with Habitat (a herbicide registered for aquatic applications). Native riparian tree species will be planted at top of bank and in areas of Arundo donax removal to provide shade and further stabilize the bank.	NOE	
2008078179	Whispering Sands Mobile Home Park Domestic Water Service Project Mission Springs Water District Desert Hot Springs--Riverside Supply of domestic water service to the owners and tenants of the Whispering Sands Mobile Home Park. The current water supply is from a domestic well that does not meet Health Department Standards.	NOE

2008078180	Replacement of fencing at Reedley Airport Reedley, City of Reedley--Fresno Replacement of 3,000 feet of hog fence (3 foot tall wire fence with two strains of barbed wire) with a 6 foot chain link fence with barbed wire. The work will start on the northeast corner of the property (by the orchard) and then go west and then north to American (around the airport side of the orchard). Then replace 200 feet along the west side of the property starting at the northwest corner of the airport. Will also be repairing and replacing the fence surrounding the BMX track on the south end of the airport.	NOE	
2008078181	Installation of Weather Observation System Reedley, City of Reedley--Fresno The project is the installation of a weather observation system at the City of Reedley Municipal Airport. The system includes an open tower and sensors to accommodate weather detecting devices including but not limited to a barometer, thermometer, ceilometer, visibility and lightning/thunderstorm detectors. The information obtained from the exterior equipment will be displayed on a terminal located within the existing airport buildings. All equipment will be illuminated in accordance with FAA rules and regulations.	NOE	
2008078182	Lake Tahoe Airport Runway Rehabilitation Project Regional Water Quality Control Board, Region 6 (Lahontan), South Lake Tahoe South Lake Tahoe--El Dorado The project will reconstruct the existing airport runway, reduce the runway width from 150 feet to 100 feet, replace the runway lighting system, and rehabilitate approximately five acres of stream environment zone.	NOE	
2008078183	Communications-Storke Road Pull Box ST-08 Tie In Project University of California, Santa Barbara Santa Barbara--Santa Barbara The University of California, Santa Barbara proposes to expose two existing communication pull boxes and tie in conduits and cable between the two boxes to upgrade the communications system for the West Campus Married Student Housing area. The project involves clearing four-hundred and sixty (460') square feet of non-native vegetation. Six branches, approximately 2-inches thick, of the nearby willow trees would be trimmed to provide access. Two (2) existing five-inch (5.0") ducts on the west side of a concrete pull box will be exposed. The ducts are located at a depth of approximately fifty-five inches (12") wide trenching between the two existing pull boxes. Two five-inch (5.0") PVC ducts would be placed in the trench. The trench would then be filled in and compacted to conform to the surrounding soil.	NOE	
2008078184	Foundation Replacement @ 41 Oakvale Ave Berkeley, City of Berkeley--Alameda Replace failing rock creek-bank walls located under an existing single family home with reinforced concrete walls. Partial replacement of existing foundation. The bottom of the channel is natural (not hardened) material, and will not be modified. There is no proposed expansion of the existing structure.	NOE

2006021010	<p>Palm Springs MDP Line 41, Stage 3 Riverside County Flood Control and Water Conservation Palm Springs--Riverside NOTE: Document is a Subsequent Mitigated Negative Declaration.</p> <p>The proposed Palm Springs Master Drainage Plan (MDP) Line 41, Stage 3 project will consist of the construction and maintenance of an underground storm drain in Golf Club Drive, an earthen 6.7 acre detention basin and approximately 6,000 linear feet of an underground reinforced concrete pipe storm drain system ranging from 66 to 96 inches in diameter. The proposed storm drain facility will begin at the terminus of the existing Palm Springs MDP Line 41, Stage 2 inlet and generally extend in a westerly direction along East Palm Canyon Drive, Gene Autry Trail, Matthew Drive, Cherokee Way, and Santa Monica Drive. The proposed storm drain will extend westerly, for approximately 100 feet, past the intersection of Carmel Drive and Santa Monica Drive and terminate with a concrete lined inlet structure. The proposed project also includes the construction of lateral storm drains along Linden Drive and along the southerly extension of the unimproved Cherokee Way. These laterals will total approximately 1,000 feet in length and range in size from 36 to 48 inches in diameter. Additional capacity will also be provided at Golf Club Drive by increasing the size of the existing storm drain under Golf Club Drive and reconstructing the concrete lined inlet structure just to the north of East Palm Canyon Drive. The project will be designed to convey the estimated 100-year flow rate. The proposed project was initially approved in April 2006. However, this Subsequent MND was prepared in response to new information regarding potential impacts to biological resources (i.e., Casey's June beetle). The original MND adequately addressed all impacts except the Casey's June beetle. Therefore, this Subsequent MND only addresses potential impacts to the Casey's June beetle.</p>	MND	08/13/2008

	feet in size, and a caretakers office (2,900 square feet) will be constructed on the west side County Road 117 (APN: 057-210-18).		
2008071071	Robertson's Ready Mix Plant Relocation and Absolute Self-storage (Case Numbers PA06-0179/0180 & P08-047) Moreno Valley, City of Moreno Valley--Riverside The proposed project involves two components. The first is a batch plant for manufacture of ready mix concrete. The batch plant is a replacement for the existing Robertson's batch plant on Day Street in the City of Moreno Valley and proposes both central mixer (wet) and traditional transit-mix (dry) plants. Proposed batch plant site improvements include silos, a central mixer, aggregate bins, conveyors, a two-story office building, an underground diesel storage tank, on-site circulation and parking, and a detention/infiltration basin. A three-sided concrete tilt-up structure resembling nearby warehouse buildings will contain on-site aggregate and sand storage. The self-storage facility proposes approximately 690 units in seven, one and two story buildings (approximately 99,000 square feet total building area) with an office and caretaker's residence. This aspect of the proposed project is designed as an integral aspect of the overall site design, and is intended to screen the batch plant.	MND	08/13/2008
2008071072	Fire Station 71 Los Angeles County Malibu--Los Angeles The proposed project is the remodel of the County of Los Angeles Fire Department Fire Station 71 located in the City of Malibu. The existing fire station was constructed in 1939 and is approximately 2,257 square feet. The County of Los Angeles Department of Public Works proposes to expand the existing fire station to encompass a total of 5,350 square feet.	MND	08/13/2008
2008071073	ENV-2007-5841-MND Los Angeles, City of Los Angeles, City of--Los Angeles Conditional Use to permit the sale and dispensing of alcoholic beverages for off-site consumption, in conjunction with a proposed approximately 13,500 square-foot market having hours of operation from 9:00 am to 9:00 pm daily, located within a larger, multi-story, multi-tenant commercial corner development, on an approximately 89,000 square foot lot, in the [Q]C2-2D zone.	MND	08/13/2008
2008072042	Davis Park Master Plan San Pablo, City of San Pablo--Contra Costa Davis Park is an existing approximately 12-acre park located in the west side of San Pablo. Davis Park is the City's largest park and is currently used primarily for outdoor seasonal sports activities and some summer programs. The City of San Pablo proposes to adopt and implement the Davis Park Master Plan which includes a series of improvements at Davis Park that would enhance existing facilities and construct new facilities to meet various needs, including community gatherings, family recreation and civic activities. The overall goal for the proposed project is to increase the use of the park by enhancing recreational features and providing improved functional indoor space.	MND	08/13/2008

2008071069	<p>General Plan Update Merced, City of Merced--Merced</p> <p>The Plan update will provide direction for development in the City of Merced over the next 20 years. The proposed project is located in central Merced County, California. The geographic area covered by the project includes the City limits of Merced, which is generally bounded by Mission Avenue to the south, Bellevue Road to the north, Lake Road to the east and Highway 59/Thornton Road to the west, and the Specific Urban Development Boundary, the 20-year development boundary which is generally bounded by Miles Creek on the south, Thornton Road/Franklin Road to the west, Lake Road, the Fairfield Canal and Kibby Road to the east, and a Section line to the north. The project proposes a mix of residential, commercial and land uses.</p>	NOP	08/13/2008
2008071075	<p>State Route 91 Corridor Improvement Project Caltrans #8 Anaheim, Corona, Riverside--Riverside, Orange</p> <p>The project is proposed within the project segments of the SR-91 (between the State Route 241 [SR 241] interchange and Pierce Street) and the I-5 (between Cajalco Road and Hidden Valley Parkway). The proposed EIR/EIS will evaluate the following alternatives:</p> <p>Alternative 1: High Occupancy Vehicle (HOV) Lanes: Alternative 1 would include the addition of one general purpose lane in each direction from SR-241 in Orange County to Pierce Street in the City of Riverside (approximately 12 miles) and an auxiliary lane, as needed, and maintain the existing HOV lanes, as well as realigning and reconstructing existing interchange exit and entrance ramps within the project limits. This alternative would also upgrade standards.</p> <p>Alternative 2: High Occupancy Toll (HOT) Lanes: Alternative 2 is a constrained alternative, which would add one general-purpose lane and two HOT lanes in each direction on SR-91 from SR-241 in Orange County to Pierce Street in the City of Riverside (approximately 12 miles) and includes widening of existing structures, as well as realigning and reconstructing existing interchange exit and entrance ramps and an auxiliary lane, as needed within the project limits. The highway will also be upgraded to current standards. This alternative will also provide direct connectors to link in the new toll lanes with I-15.</p>	NOP	08/13/2008
2008072044	<p>Liberty Union High School District Fourth Campus Liberty Union High School District --Contra Costa</p> <p>The LUHSD proposes to develop its Fourth High School campus to serve the projected education demands of the City of Brentwood, the City of Oakley, and nearby communities. The proposed Fourth High School would be built at an approximately 76-acre site located southwest of the Delta Road and Sellers Avenue intersection, in Contra Costa County. The maximum student capacity of the proposed Fourth High School campus will be 2,200 students, which is expected to be reached by 2017. The design of the proposed Fourth High School includes up to 15 main buildings, including classroom, an auditorium, a library, gymnasium and athletic facilities, an administration building, and other academic facilities. In addition, the proposed Fourth High School would include a storm water management system consisting of multi-use basins, bio-swales, and a new outfall to Marsh Creek. Nearby roads may be improved to support anticipated</p>	NOP	08/13/2008

	transportation needs.		
2008071070	Bandini Landscape Bark Storage/Transfer Facility - Mojave Air and Space Port East Kern Airport District Mojave--Kern Construction and operation of a wholesale landscape bark storage and transfer facility within Sector A of the approved Master Precise Development (PD) Plan for the Mojave Air and Space Port. The project includes the lease agreement and the project PD Plan.	Neg	08/13/2008
2008071074	801-833 Embarcadero Grill Outrigger Morro Bay, City of Morro Bay--San Luis Obispo The applicant is proposing to demolish portions of two detached buildings on separate lease sites and remodel the structures while adding to construct a 5,785 square foot conference center, 7,803 square foot commercial retail, 2,188 square foot restaurant, add 17 new boat slips, laterla access, and view decks, and create two public plazas (one on the north side of Outrigger and one on south side using dead end street of Morro Bay Boulevard) by requesting abandonment and creation of new lease space. The project is anticipating only partial removal of the existing buildings. The total building area is approximately 19,311 square feet with a footprint of 11,090 square feet or 65% lot coverage, which includes the street end. The applicant will also construct the required lateral access way along the bay frontage. The applicants are requesting the project be considered a remodel in order to retain the historic parking credits. The previous uses required 31 parking spaces for Outrigger building and 79 parking spaces for Embarcadero Grill. The new uses parking demand are 197 parking spaces and various parking management strategies are proposed to offset the projects deficit parking demand count.	Neg	08/13/2008
2008072041	Verizon Wireless Use Permit CUP2008-19 Modoc County Alturas--Modoc Applicant wishes to construct a telecommunications facility, including a 195 foot lattice tower, 60 kW diesel generator, and 210 gallon fuel tank on a 50 feet by 60 feet concrete pad. Facility will be surrounded by a 6 foot wire fence. Temporary wireless communications facility (trailer with antennae) is proposed for use during permanent facility construction.	Neg	08/13/2008
2008072043	Crimson Biodiesel Manufacturing Facility Stockton, Port of Stockton--San Joaquin Construction and operation of a 60 million gallon per year biodiesel manufacturing facility at the Port of Stockton, California.	Neg	08/13/2008
2008072045	West Biofuels, LLC (Woodland Biomass Research Center) Yolo County Woodland--Yolo The applicant proposes to convert a 16-acre portion of the agricultural production site, which includes an existing 57,000 square-foot agricultural commodity storage and transfer facility into a research and development facility (Woodland Biomass Research Center). The research and development program would develop technologies to convert waste biomass (agricultural residues, shredded wood, and urban green waste) into renewable energy products (biodiesel). 2008021091	Rimrock Ranch Specific Plan Amendment - June 2008 Barstow, City of Barstow--San Bernardino NOTE: Reference SCH# 2001041118 The approved Rimrock Ranch Specific Plan (RRSP) is the phased development of 573.31 acres constituting the major portion of Section 13 of Township 9 North, Range 2 West in the City of Barstow under a Specific Plan. The proposed development is to be completed in phases. The project, as modified by the subject 2006 amendment, includes the construction of a total of up to 1,800 dwelling units in several neighborhoods of differing densities, representing an increase of 330 dwelling units above the currently approved RRSP.	SIR	08/28/2008
2000034007	Salinas Valley Water Project Monterey County Salinas--Monterey, San Luis Obispo Component 2 will involve constructing the SRDF on the Salinas River to temporarily store and divert water during dry periods and modifying the existing Nacimiento Dam to handle a maximum probable flood event. The SRDF will involve constructing an inflatable diversion dam, fish way facilities (intake screen, bypass and fish ladder), river intake and pump station, transmission pipeline, control facilities and potential water treatment facilities. Modifying the Nacimiento Dam will involve enlarging the spillway by lowering the spillway crest, installing an inflatable rubber dam and raising downstream spillway chute sidewalls. Component 2 is part of the larger SVIRWM Project that was awarded funds by the State Water Resources Control Board (State Water Board) as part of the IRWM Grant Program. Component 2 was approved for \$5,593,750 of the 12.5 Million that was awarded to the SVIRWM project on March 20, 2007. This is to advise that the State Water Board adopted a Statement of Overriding Considerations and approved Component 2 on July 15, 2008.	NOD	
2007062020	901 Sherman Avenue Renovation Project Novato, City of Novato--Marin The proposed project consists of renovating the building located at 901 Sherman Avenue, the former offices of the Novato Community Development Department, for use as a city council chamber and community event venue. Key project elements include: lifting and moving the building at 901 Sherman Avenue up to twelve feet north of its current location; interior and exterior renovation and rehabilitation of the building; demolishing the adjacent buildings at 905 and 911 Sherman Avenue; constructing a public plaza and green space; and closing the left turn lanes at De Long Avenue and Sherman Avenue.	NOD	
2007062072	Thunder Valley Casino Expansion Project United Auburn Indian Community Lincoln--Placer The UAIC proposes to expand the Thunder Valley Casino and construct a hotel and parking structure adjacent to the existing facility. Approximately 475,000 square feet would be added to the existing building, plus a hotel, performing arts center, parking structure, and expanded central plant.	NOD

2007082169	Laguna Ridge Town Center Elk Grove, City of Elk Grove--Sacramento The project proposes a General Plan Amendment, Specific Plan Amendment, and Rezone to enlarge the Town Center commercial area in the Laguna Ridge Specific Plan area. These actions would allow for an additional 23.2 acres of commercial lands for a total of 79.7-acre project site. This change would result in a rezone of 11.8 acres of Single-Family/10 dwelling units per acre and 12.5 acres of Medium Residential/15.1-20 dwelling units per acre. Additionally, Multi-Family Residential/20-25 dwelling units per acre zoning will be increased by 1.1 acres.	NOD	
2008051081	Colorado River Bridge Replacement Caltrans #8 --San Bernardino NOTE: Joint Document comprised of Mitigated Negative Declaration and Environmental Assessment. The California Department of Transportation (Department), in conjunction with the Arizona Department of Transportation (ADOT) and the Federal Highway Administration (FHWA), proposes a bridge replacement project located on State Route 62 in San Bernardino County, California and in Arizona on State Route 95 Spur in La Paz County. The proposal consists of constructing a non-increasing capacity project to replace or widen/rehabilitate the existing Colorado River Bridge (#54-1000) on the existing or slightly modified alignment.	NOD	
2008052047	Headwall/Gold Coast Ski Improvements (PEAQ T20070572) Placer County Olympic Valley--Placer The California Department of Fish and Game is executing Lake or Streambed Alteration Agreement number 1600-2008-0030-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, Squaw Valley Ski Corporation. Restoration of a portion of Squaw Creek and two unnamed tributaries to Squaw Creek. 30 feet of drainage culvert will be removed to restore natural flows to a 50 feet reach of the original channel. Repairs to a flood scrap created as a result of extreme high flows in 1997 will be repaired and additional riparian vegetation will be established.	NOD
