STATE CLEARINGHOUSE

---

**SUMMARY  
OF  
POSTINGS**

**July 16 – 31, 2013**

# STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **July 16 – 31, 2013**.

## CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613  
Fax: (916) 323-3018  
e-mail: [state.clearinghouse@opr.ca.gov](mailto:state.clearinghouse@opr.ca.gov)  
website: [www.opr.ca.gov](http://www.opr.ca.gov)

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

**Scott Morgan**  
Director

## CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

### USPS:

State Clearinghouse  
P.O. Box 3044  
Sacramento, CA 95812-3044

OR

### USPS/Courier Service / Hand Deliveries:

State Clearinghouse  
1400 Tenth Street, Room 113  
Sacramento, CA 95814

## INFORMATION AVAILABLE ON-LINE

The CEQA Statute and Guidelines are available through the Natural Resources Agency's website at:

<http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

## Environmental Document Filings with the State Clearinghouse 1999-2012

All CEQA documents filed with the State Clearinghouse are available for viewing on the internet at [www.ceqanet.ca.gov](http://www.ceqanet.ca.gov) .

2013-06	Smith River Rancheria - APNs: 101-110-27 (previously 101-110-02 & 101-110-03); 101-110-09, 06 Bureau of Indian Affairs --Del Norte Note: Reference SCH# 2004-19 & 2006-10.	<b>BIA</b>	08/14/2013
	<p>Due to the lapse of time, the lead agency is reissuing the notice of the "Haswell" and "Bartley" properties to again seek comments regarding the within-subject application submitted by the Smith River Rancheria, CA. The previous notices were dated August 4, 2004 and August 4, 2006. Additionally, the Lead Agency is combining an additional property otherwise known as the "Bridge" property to this notice as the three property are contiguous to each other.</p> <p>Haswell - (13.18 acres) The property proposed for acquisition consists of two parcels, one containing +\-3.5 acres and the other containing -\+9.03 acres, for a total of 12.53 acres. The parcels are adjacent to each other and located less than one-mile north of the exterior boundaries of the Smith River Rancheria.</p> <p>Bartley - (6 acres) Bridge - (3.41 acres) The Tribe seeks to transfer 22.6 acres of land into federal trust and then construct 26 single-family residences on 19.1 acres and 15,000 sf of community-serving commercial/retail space on 1.7 acres of the project site. The proposed action would advance the Tribe's objectives of providing housing for tribal members, diversified economic activities, and reclamation of their land base.</p>		
2013031020	Pelican 33-Acre Industrial Project Perris, City of Perris--Riverside The proposed project involves the construction and operation of up to 600,000 gsf of light industrial warehouse uses. Two industrial buildings approximately 44 feet high are proposed. Building 1 would be approximately 480,000 gsf and Building 2 would be approximately 120,000 gsf. The proposed project has been designed in compliance with the Standards and Guidelines outlined in the PVCC Specific Plan. Roadways and infrastructure to serve the project would be installed and landscaping would be provided.	<b>EIR</b>	08/29/2013
2013071051	Vintner Solar LLC Minor Use Permit San Luis Obispo County --San Luis Obispo Request by Vintner Solar LLC for to develop a 1.5 megawatt (MW) solar generating facility on an approximately 14.8 acre portion of a 97.21 acre parcel. The project includes: Application to rescind an existing Land Conservation Contract on a 97.21 acre parcel and replace it with a new Solar-Use Easement for a twenty year minimum pursuant to Government Code sections 51190 et seq. on an approximately 14.8 acre portion of the property and a replacement Land Conservation Contract on the remaining approximately 82.41 acre portion of the property & A Minor Use Permit to authorize construction of the solar generating	<b>MND</b>	08/14/2013

	facility including 7,350 photovoltaic (PV) modules, pad-mounted inverters and a pad-mounted transformers, approximately 100 feet of underground conduit from the convert.		
2013072034	Highway 160 Levee Seepage Repair Project Reclamation District 341 Antioch--Sacramento The purpose of this project is to repair segments on the landside of the Sherman Island Levee system where seepage from the Sacramento River is evident between approximate levee stations 870+00 to 940+00 on the north side of Sherman Island. Levee failure in the project area would be catastrophic as the levee section in question supports a portion of Highway 160. The proposed project will involve relocation of PG&E power poles, excavation of landside levee toe, import of drain rock and embankment material, and installation of a drainage system designed to move standing water resulting from seepage off the landside levee toe.	<b>MND</b>	08/14/2013
2013072035	Update of the Yolo county Housing Element Yolo County --Yolo State Housing Element Law (Government Code Section 65580 et seq.) mandates that local governments must adequately plan to meet the existing and projected housing needs of all economic segments of the community. Yolo County last updated its Housing Element in 2009, as part of the updated 2030 Yolo Countywide General Plan. The current Housing Element covered a five-year planning period from June 30, 2008, to June 30, 2013. The 2013 Housing Element is a comprehensive review and update of the 2009 Housing Element background information and goals, policies, and programs. The new Housing Element covers an eight-year planning period from October 31, 2013, to October 31, 2021.	<b>Neg</b>	08/15/2013
2010041060	South Bay Bus Rapid Transit San Diego Association of Governments Chula Vista, National City, San Diego--San Diego Note: Response to Comments: Refer to Lead Agency's website - <a href="http://www.sandag.org/sbbtr">www.sandag.org/sbbtr</a>  From south to north, the South Bay BRT would originate at the proposed ITC, which is located immediately southwest of the Siempre Viva Road/SR 905 interchange. The ITC would be constructed as part of the proposed Project. From the ITC, BRT vehicles would travel north via SR-905 to the La Media Road interchange, north on La Media Road, and then east on Otay Mesa Road to SR-125 in mixed-flow conditions. BRT vehicles would then continue traveling north on SR-125 in mixed-flow conditions to the SR-125/Birch Road interchange.	<b>Oth</b>	
2006011080	Crafton Hills College Master Plan Update San Bernardino Community College District Redlands, Yucaipa, Highland--San Bernardino The CHC Master Plan Update (March 2013) describes the future development of the CHC in two horizons, keeping with the planning strategies and framework of the 2005 Master Plan. Horizon 1 includes the Measure 'M' priority projects as identified by the Master Plan Steering Committee. Horizon 2 is the potential full build-out of the campus in the future. The SEIR only analyzes Horizon 1, because not enough detail is known about future projects. Separate CEQA documentation	<b>NOD</b>

	will be prepared for Horizon 2 as projects become defined and funding sources become available.		
2008052110	Infrastructure Improvements, Phase 2 University of California, Santa Cruz Santa Cruz--Santa Cruz The proposed project consists of implementation of storm water control improvements at about 33 locations in the Jordan Gulch and Moore Creek Drainages on the UCSC main campus. These natural drainages on the campus, used to convey both natural storm water runoff and runoff from development, are experiencing progressive erosion, and sinkholes within the drainages have become clogged with silt and debris. This has reduced the ability of drainages to infiltrate water. The project would install check dams and step pools, reinforce banks, and implement other measures to restore natural infiltration, reduce siltation and halt progressive erosion. The project is not designed to address any increases in runoff or increase the capacity of existing campus utilities; nor would it increase campus population; it simply would restore the ability of natural drainages to handle existing storm water flows. The project was analyzed in the UC Santa Cruz Infrastructure Improvements Project, Phase 2 Initial Study/Mitigation Negative Declaration, which was certified by the Chancellor of UC Santa Cruz on July 8, 2008.	<b>NOD</b>	
2009041098	San Bernardino Valley College Master Plan-Stadium Expansion San Bernardino Community College District San Bernardino--San Bernardino The SBVC Stadium and Fields Project (Proposed Project) would replace the existing home and bleacher facilities and improve stadium lighting, accessibility, and educational/athletic program functions. The Proposed Project would include a 4,000-seat steel and aluminum bleacher system with approximately 3,000 seats on the home (west) end of the stadium as well as 1,000 seats on the visitor (east) side of the stadium (Figure 1). The stadium would only be able to be used at full capacity on the weekend without additional parking designated. Concessions, restroom facilities, and team rooms would surround the facility at the north and south ends of the stadium bleachers. A press box would be added above the home bleachers along the architectural features lining the walkway between the stadium and the future gymnasium building. The stadium lights would be moved to the exterior of the facility and the existing rubberized track and synthetic fields would remain.	<b>NOD</b>	
2011022041	Shasta River Tailwater Reduction Project Shasta Valley Resource Conservation District Montague--Siskiyou The purpose of this component of the project is to utilize tailwater that currently returns to the Shasta River for irrigating pastures on the ranch. This project is intended to reduce the amount of warm tailwater being returned to the river and reduce the amount of cold water diverted from the river for irrigation purposes.	<b>NOD</b>	
2011071051	JRK 01-11 Alta East Wind Energy Project by Alta WindPower, LLC. Kern County Tehachapi--Kern The Project involves the construction and installation of wind turbine generators and supporting infrastructure to operate them as a wind power generation facility. The ITP and Minor Amendment No. 1 authorize take of Bakersfield cactus and desert tortoise, species designated as endangered and threatened, respectively,	<b>NOD</b>

	Hospital would include 321 beds, an outdoor service yard, and a 1,359-stall parking structure in addition to 100 surface parking spaces. Phase II (buildout) would include expansion of the Hospital by an addition 7-story, 155,000 sf building to accommodate 129 beds (for a total of 450 beds), a additional 105,000 sf HSB, and a 1,134 stall parking structure (for a total of 2,593 parking spaces). The CUP would allow for hospital use within the zone, and a PDP would enable the project to exceed the maximum .50 Floor Area Ratio (FAR) allowed within the community plan (up to 1.00 FAR) and to exceed the allowable retaining wall height (along Claremont Mesa Boulevard). A Site Development Permit (SDP) would allow for development of the site, which contains environmentally sensitive lands along the slopes, on- and off-site, adjacent to Claremont Mesa Boulevard.		
2012122009	Fire Mountain Lodge Hydroelectric Project Relicensing and Dam Safety Repairs State Water Resources Control Board --Tehama Note: Shorten Review	<b>MND</b>	08/08/2013
	The Fire Mountain Lodge Hydroelectric Relicensing and Dam Safety Repairs (Project) involves the continued operation of a small existing hydroelectric facility, dam repairs, and installation of a spillway. The dam is earth and concrete filled, and dam safety repairs include the concrete resurfacing of the dam face and outfall and installation of a concrete lined open channel spillway. Conditions of the water quality certification for the Project include stabilization of the adjacent unpaved Project road to reduce erosion, installation of flow measurements devices, and minimum stream flow requirements. The Fire Mountain Hydroelectric Project is regulated by the Federal Energy Regulatory Commission (Minor License No. 1992). The power generated by the Project is used for commercial and residential purposes, solely for the owners of the Fire Mountain Lodge.		
2013071052	T&R Mini Storage Major Use Permit, Boundary Adjustment with Certificate of Compliance and Draft Habitat Loss Permit San Diego County Escondido--San Diego The project is a Major Use Permit, Boundary Adjustment with Certificate of Compliance and draft Habitat Loss Permit for a lot line adjustment and to construct a storage facility pursuant to Zoning Ordinance Section 2185 and 6909. The project consists of the 119,929 sf of total building area comprised of storage facilities, office and a single living quarters.	<b>MND</b>	08/15/2013

	back the original geometry of the vegetated slope and to stabilize those portions of the bank that are susceptible to future erosion through the use of bio-engineered techniques (such as the installation of native vegetation and vegetative riprap).		
2013072036	Half Moon Bay Circulation Element Update Half Moon Bay, City of Half Moon Bay--San Mateo The project consists of an Update to the Circulation Element of the City of Half Moon Bay's General Plan. The project updates the Circulation Element of the General Plan to address key new goals, supporting policies, and implementation actions for complete streets in the City of Half Moon Bay. The Policies and Implementing Actions identified in the Draft Circulation Element Update aim to provide for an enhanced circulation infrastructure that is safe for all modes of travel and the community's general welfare and overall convenience including safety and interconnectedness as a whole. The project identifies and incorporates near-term and potential long-term improvements for implementation and additional conceptual recommendations for future improvements pending further feasibility studies to address the City's future circulation needs.	<b>MND</b>	08/15/2013
2013072037	Municipal Services Source Water Well No. 7 Discovery Bay Community Services District --Contra Costa The Town of Discovery Bay Community Services District (CSD) is proposing within its service area the construction and operation of a new municipal water supply Well number 7 (Well 7). The purpose of the Well 7 Project is to provide water supply reliability to the CSD in accordance with the CDPH Waterworks Standards. The new well is anticipated to have a pumping capacity of approximately 2,000 gallons per minute. The facility constructed under the proposed project directly serves to maintain the surety of the District's water supply in the event of a water supply emergency.	<b>MND</b>	08/15/2013
2013072038	Patterson Pass Road Safety Improvement Project Alameda County Livermore--Alameda The Patterson Pass Road Safety Improvement Project is intended to improve roadway safety along an approx. 1300 foot section of that road, approx. 7 miles east of Livermore. It would reconstruct both lanes and widen the roadway and shoulder adjacent to the eastbound lane approximately 8 feet. The project would include the following components: (1) removing and relocating an existing barbed wire fence approximately 20 feet to the south; (2) placing and compacting soil fill with a 2:1 slope leading from the new gravel shoulder; (3) excavating and reconstructing the road shoulder; (4) placing and compacting aggregate base for the new road section; (5) placing and compacting new asphalt concrete surfacing, (6) placing an aggregate base layer along the road shoulder; and (7) installing a 400 foot long metal guard rail between MP 6.50 and MP 6.58.	<b>MND</b>	08/15/2013
2013072039	Replacement of Drainage Inlet Structures on Foothill and Mines Road Alameda County Pleasanton, Livermore--Alameda The proposed project includes improvements at 26 locations along Foothill Road and 24 locations along Mines Road in unincorporated Alameda County, CA. The project involves the removal and reconstruction of concrete splash walls and drainage inlets adjacent to the travel lanes at various locations along Foothill Road (from miles post 5.20 to 8.03) and along Mines Road (from mile post 5.24 to 9.70).	<b>MND</b>	08/15/2013

## CEQA Daily Log

Documents Received during the Period: 07/16/2013 - 07/31/2013

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<b><u>Documents Received on Wednesday, July 17, 2013</u></b>			
	The 50 drainage inlet structure locations are identified by mile-post markers along Foothill and Mines Roads. Seven of the sites include work on drainage inlet structures on both sides of the roadway (MP 5.83, MP 6.11, MP 6.17, MP 6.58, MP 6.79, MP 6.87 and MP 7.86). The new structures would not protrude above the earthen or paved surface, thus eliminating the safety hazard caused by the existing structures.		
2013072040	Pre-zone & Annexation 13-01 Anderson, City of Anderson--Shasta Located along the southeast side of The City of Anderson. The properties are situated east of the I-5 freeway. The two arterial streets, Deschutes and Locust Road go through the area. The proposed project is an annexation and zone amendment of approximately 385 acres into the City of Anderson. The area is either existing residential or industrial development with the exception of 60 acres that is designated commercial property between the City limit line and the industrial area.	<b>MND</b>	08/15/2013
2013071054	2014-2021 Housing Element, General Plan Amendment, and Required Code Amendments Bellflower, City of Bellflower--Los Angeles The updated Housing Element is prepared in accordance with the requirements contained in CGC Section 65588 and the CA State Housing Element Law (CGC Article 10.6). The General Plan Amendment will replace the existing Housing Element with the updated Housing Element. The City received a Pre-Certification Letter, dated June 27, 2013, from HCD. The Code Amendments are prepared in accordance with relevant State laws and are related to approval of the Housing Element.	<b>Neg</b>	08/15/2013
1999081121	Inland Rail Trail Bikeway San Marcos, City of -- Note: Response to comment 1 CD  The proposed project would typically consist of two 5-foot paved bicycle lanes and two 2-foot unpaved shoulders, for a total width of 14 feet. In some areas the proposed project would be up to 18-feet-wide, with two 5-foot paved lanes, two 2-foot paved shoulders, and a 1-foot-wide wall and 3-foot-wide brow ditch along one side. Total width would be reduced in small sections where necessary to avoid or minimize adverse environmental effects or property constraints. The minimum bikeway section would feature two 4-foot paved bicycle lanes and two 2-foot shoulders for a total of 12 feet (for the minimum section shoulders may be paved or unpaved).	<b>Oth</b>	
2010041060	South Bay Bus Rapid Transit San Diego Association of Governments Chula Vista, National City, San Diego--San Diego Note: Response to Comments: 1 CD; Refer to Lead Agency's website - <a href="http://www.sandag.org/sbbtr">www.sandag.org/sbbtr</a>  From south to north, the South Bay BRT would originate at the proposed ITC, which is located immediately southwest of the Siempre Viva Road/SR 905 interchange. The ITC would be constructed as part of the proposed Project. From	<b>Oth</b>

	the ITC, BRT vehicles would travel north via SR-905 to the La Media Road interchange, north on La Media Road, and then east on Otay Mesa Road to SR-125 in mixed-flow conditions. BRT vehicles would then continue traveling north on SR-125 in mixed-flow conditions to the SR-125/Birch Road interchange.		
2002071004	Weemes ES Playground Expansion Los Angeles Unified School District Los Angeles, City of--Los Angeles The project is an Administrative Permit and update to an existing Habitat Loss permit for an open space encroachment. The applicant proposes to remove undocumented fill from within an open space easement that was placed next to Harmony Grove Road during reclamation of an adjacent rock quarry. This area was identified as a safety concern during grading operations under L15661 and L15656. The subject area will be recompacted, certified by a soils engineer, and revegetated.	<b>NOD</b>	
2009111098	Shipyard Sediment Remediation Project San Diego Bay Regional Water Quality Control Board, Region 9 (San Diego), San Diego San Diego--San Diego The Project includes the dredging of, or application of a clean sand over, contaminated sediment; transporting, dewatering, stockpiling, and testing of dredge materials and effluent at a landslide stockpiling location; treatment (if needed) and discharge of the effluent; truck transport of dredge materials to appropriate landfill disposals facilities; and demolition of an existing pier. The amount of sediment to be removed will total approximately 90,800 cubic yards (cy), and an estimated 4,600 cy of debris will also be removed during dredging in this area.	<b>NOD</b>	
2009111098	Shipyard Sediment Remediation Project San Diego Bay Regional Water Quality Control Board, Region 9 (San Diego), San Diego San Diego--San Diego The Project includes the dredging of, or application of a clean sand over, contaminated sediment; transporting, dewatering, stockpiling, and testing of dredge materials and effluent at a landslide stockpiling location; treatment (if needed) and discharge of the effluent; truck transport of dredge materials to appropriate landfill disposals facilities; and demolition of an existing pier. The amount of sediment to be removed will total approximately 52,600 cubic yards (cy), and an estimated 2,600 cy of debris will also be removed during dredging in this area.	<b>NOD</b>	
2012042029	Alderpoint County Water District Water Improvement Project Alderpoint County Water District --Humboldt The California Department of Public Health (Department) is a responsible agency for this project. The Department's Safe Drinking Water Proposition 50 Program is providing state funds for the project. The Alderpoint County Water Agency proposes to replace existing intake pumps adjacent to the Eel River, remove and replace a treatment building, install a new filtration system and clearwell, and install a new transmission water pipe along existing rights of way and easements to storage site. The existing storage tank will be replaced with two new tanks.	<b>NOD</b>

<b><u>Documents Received on Wednesday, July 17, 2013</u></b>			
2012102010	Telecommunications Infrastructure Improvements Phase A University of California, Santa Cruz Santa Cruz--Santa Cruz The Telecommunication Infrastructure Phase A project consists of upgrades to the interior telecommunications infrastructure in 28 existing buildings on the UC Santa Cruz main campus, installation of new telecommunication conduit, fiber, and vaults between various locations on the campus, and construction of a new South Core Building in the Campus Facilities area near the end of the campus.	<b>NOD</b>	
2012122027	Administration Drive Sewer Improvements Santa Rosa, City of Santa Rosa--Sonoma The project will abandon in place an approximately 1500-foot long, 15-inch diameter sewer main spanning approximately 925 linear feet of Paulin Creek. Most work will be completed within the County road right of way but the abandonment process will impact the riparian zone of Paulin Creek. As part of the sewer line abandonment process, the City will need to abandon six manholes located above the ordinary high water mark but within the riparian zone. The abandonment process will require excavation of 8-foot diameter pits approximately 4.5-foot deep at each of the manholes using a mini-excavator or similar equipment. This amount to approximately 300 square feet of temporary disturbance to the riparian area. All disturbed areas will be refilled with soil, compacted, and revegetated. The abandoned pipe will be filled with sand slurry.	<b>NOD</b>	
2013021047	East County Detention Center Riverside County Indio--Riverside The County of Riverside proposes a 1,626-bed replacement of the existing 353-bed detention center in Indio, California to accommodate immediate jail capacity needs for the County. The replacement will result in a greater number of detention beds adjacent to a court. The project also includes the construction of a three-level parking structure across Oasis Street and south of the existing jail site. The project will include demolition of the existing structures on-site.	<b>NOD</b>	
2013042063	San Jose Water Company Regnart Heights Station Water Tank Replacement Project Public Health, Department of Cupertino--Santa Clara The San Jose Water Company (SJWC) is proposing the replacement of the existing Regnart Heights water storage tank, which is aged and in poor condition. The bolted steel tank is currently over 46 years of age. The existing 140,000 gallon tank will be replaced with two new steel water tanks with a combined storage capacity of about 199,000 gallons. The larger tank is approximately 147,000 gallons and the second smaller tank is 52,000 gallons. The smaller tank will be installed while the existing tank is still in service. Once the smaller tank is completed and in service, and the existing tank will be demolished and the larger tank will be built. CDPH will be issuing an amended water supply permit once the new tanks are constructed and operational.	<b>NOD</b>	
2013062022	Emeryville Center of Community Life Emery Unified School District Emeryville--Alameda The proposed project includes demolition of the majority of buildings located on the existing site (Emery Secondary School) and construction of the new Emeryville	<b>NOD</b>

2013078177	San Onofre to Pulgas Double Track Project (12/13-OC-09) Parks and Recreation, Department of --San Diego San Diego Association of Governments ("SANDAG") request a Right-of-Entry ("ROE") permit in order to complete the San Onofre to Pulgas Double Track Project located south of Basilone Road/Interstate 5 interchange, adjacent to the portion of San Onofre State Beach known as "Trails", in un-incorporated San Diego County. All work will take place in SANDAG's Right-of-Way.	<b>NOE</b>	
2013078178	Issuance of Streambed Alteration Agreement No. 1600-2013-0116-R1, Salt and Coal Creek Crossings Repair Project Fish & Wildlife #1 Redding--Shasta The project is limited to the reconstruction and modification of seven (7) culverted crossings to rocked ford crossings, the placement of boulders on the downslope of ephemeral drainages between crossings 1 and 7, and routine maintenance of the crossings referenced in this Agreement.	<b>NOE</b>	
2013078179	Site 32 Cluster (32C) Proposed Plan for Groundwater Treatment, Vandenberg Air Force Base (VAFB) Toxic Substances Control, Department of --Santa Barbara Proposed Plan (PP) for Remediation at the Vandenberg Air Force Base (VAFB) Installation Restoration Program (IRP) Site 32 Cluster that was submitted on March 4, 2013. It will continue to treat and monitor the two existing in situ bioremediation (ISB) barriers that are addressing the soil and groundwater contamination from trichloroethene (TCE), dichloroethene, vinyl chloride; polychlorinated biphenyla (PCBs), and metals.	<b>NOE</b>	
2013078180	Windy Gap Vineyards Fish & Wildlife #3 Healdsburg--Sonoma The project is limited to the installation of three culverts to facilitate a stream crossing along a newly constructed road. The purpose of the proposed roadway is to provide access to a future vineyard development. A portion of the proposed roadway crosses a stream and necessitates a culvert crossing. A total of three 24-inch CPP culverts, each 26-foot long, will be installed parallel to steam channel. Three live oak trees are proposed to be removed as part of the culvert installation. The tree diameters are 12-, 18- and 28-inches DBH, respectively. SAA#1600-2012-0443-R3	<b>NOE</b>	
2013078181	Camozzi Bridge Fish & Wildlife #3 Petaluma--Sonoma The project is limited to the installation of new bridge abutments and a bridge over an unnamed tributary to the Petulama River. The bidge is bein installed as part of a new driveway to create safer inress and egress to Adobe Road. The abutments will be located approximately 3 feet from the top of bank, excavated to a depth of at least 4-feet deep and be made from cast in place concrete. A retaining wall will be built on the east side of the creek adjacent to the abutments in order to contain the fill slope necessary to contruct the new driveway.	<b>NOE</b>

2013078182	SAPCO Erosion Repair Project Fish & Wildlife #4 --Fresno, Monterey The Project is issuance of a Lake or Streambed Alteration Agreement. The applicant proposes the amoring of four (4) locations of an exposed pipeline within stream channels. Amoring will include installation of articulated concrete mats, and channel stabilization structures in the form of cross vanes, and J-hook vanes. All work will be done in absence of surface flow either during naturally dry conditions or with the use of a diversion structure to de-water the Project areas, and no trees will be removed.	<b>NOE</b>	
2013078183	Luevanos Crossing Fish & Wildlife #4 Coalinga--Fresno The Project includes abandonment of oil well "JUTBU 27" (API No. 019-05144). The abandonment will be limited to excavation of the well casing to a depth of approximately 10 feet; the casing will be cut at a depth of 8 feet below the channel bed elevation and capped with a steel plate, welded to the top of the casing. The steel plate will be at least as thick as the outer well casing and will have the last five digits of the API number. The excavated area will be backfilled and recontoured to original slopes.	<b>NOE</b>	
2013078184	DeLaveaga Park Homes Fish & Wildlife #3 Santa Cruz--Santa Cruz The Project is limited to the construction of a soldier beam retaining wall with pier, one pier and grade beam retaining wall adjacent to the sidewalk on DeLaveaga Park Drive and a Christy U21 catch basin with orifice plate to control release of stormwater run-off that will connect to an approximately 20-foot long 8-inch HDPE pipe with flared end section with 10-18-inch angular stone riprap outfall. Stormwater run-off to the creek will be regulated to mimic predevelopment rates. The purpose of the Project is to install bank stabilization structures and a stormwater runoff structure associated with a 13 single family home development on a 1.79-acre parcel adjacent to Arana Gulch Creek 5c.	<b>NOE</b>	
2013078185	Silver Gate Yacht Club Pool and Spa San Diego Unified Port District San Diego--San Diego The proposed project involves the construction of a pool and spa as well as landscape and hardscape improvements at the Silver Gate Yacht Club (SGYC). The proposed project will construct a 32-foot-long by 16-foot-wide swimming pool and a 10-foot-long by 10-foot-wide spa, both of which will include disabled access lifts. Concrete decking and landscaping will be installed around the pool/spa area and throughout the SGYC leasehold. The pool/spa area will be fenced and gated with 5-foot-tall ornamental iron fence on the west end, wood fencing on the south and east ends, and a 6-foot-tall glass windscreen along the north end. Portable gas grills will be installed in the pool/spa deck area, and existing gas, water and electrical lines will be extended to the new grilling area.	<b>NOE</b>

Project approvals include without limitation: Major Conditional Use Permits to exceed the maximum allowable density, to reduce the parking requirement, and to provide ground-level parking and loading; Minor Variances to exceed the general height limit and the height limit adjacent to the R-50 Medium Density Residential Zone; and Design Review.	<b>NOD</b>	
2011079009	Operation of Replacement Water Storage Tanks - Carr and Rea Aromas Water District Monterey--Monterey The Carr tank will replace the existing 100,000 gallon redwood tank and 15,000 gallon steel tank with a new 214,000 gallon steel bolted tank and associated plumbing. The 183,000 gallon Rea tank will replace the existing tank and will be located west of the original tank site located within an existing easement.	<b>NOD</b>	
2011121092	Construction of Bowman Road - Realignment to US 395 to 1.3 Miles East Kern County Ridgecrest--Kern The proposed project involves the construction of a 24-foot-wide asphalt concrete roadbed with 6-foot-wide paved shoulders and 2 feet of shoulder-backing, 100 feet north of the current location. The Project would also include installation of three culverts, a non-skewed intersection at State Route 395, and demolition and removal of the original asphalt road upon completion of the new roadway. The project will result in impacts to 10.5 acres of Mohave ground squirrel and desert tortoise habitat including temporary impacts to 6.48 acres; the Project will permanently remove 4.02 acres of Mohave ground squirrel and desert tortoise habitat. The	<b>NOD</b>	
2012082072	McIntosh Farm Labor Housing and Barns San Mateo County --San Mateo The Project includes the replacement of an existing culvert with a 3-foot diameter 16-foot long concrete culvert to provide access to the property. Concrete wing walls, sized so that fill slopes are no greater than 2:1 (H: V) from the road edge to the wing wall, will be constructed on the upstream and downstream ends of the culvert. Ten cubic yards of soil material will be removed around the existing culvert and 18 cubic yards of fill will be used to replace the cut. The backfill will be compacted at least 95% of relative density and the upper 12 inches of new road surfaces will consist of Class 2 base rock. All project construction work will be completed during the summer months when the stream channel is dry. CDFW is executing a Lake and Streambed Alteration Agreement, Number 1600-2013-0096-R3, pursuant to Section 1602 of the Fish and Game Code to the project Permittee, Burke Land Use.	<b>NOD</b>

2012121050	Road 148 Outside Creek Bridge Tulare County Visalia--Tulare Replacement of existing paved two-lane bridge located on Road 148, crossing Outside Creek (Bridge No. 46C-0186). The bridge replacement will require removing the existing structure of ~40 feet in length and 20.5 feet in width. The project will also include new roadway construction on either side of the bridge for ~500 feet to 1000 feet from each bridge abutment, removing existing pavement, constructing concrete channel lining, and placing rock slope protection. Road 148 will be closed and temporary detour will be provided during the construction of this structure.	<b>NOD</b>	
2013031016	Lyons Corridor Plan Santa Clarita, City of Santa Clarita--Los Angeles The City of Santa Clara is updating its zoning regulations within the Unified Development Code (UDC) to be consistent with the General Plan adopted in June 2011. As part of this effort, corridor plans are being developed to focus on the unique character of each community corridor. The first corridor plan focus on Lyons Avenue, east of Interstate 5 and west of Newhall Avenue. The Lyons Corridor Plan, as proposed, takes on a "form-based" code type approach which addresses the relationship between the buildings themselves and public spaces. The result is a plant that ensures that all future development is pedestrian friendly, aesthetically compatible with the character of the Lyons Corridor, and ensures compatible uses that serve the community. More specifically, the Lyons Corridor Plan will create four new distinct zones, will create street and streetscape standards that identify street and streetscape types allowed with the planning area, will provide architectural standards for all future development, and will create development standards for all new development and property modifications within the planning area.	<b>NOD</b>	
2013051007	Bull Creek Road Retaining Wall Caltrans #6 --Mariposa Caltrans has proposed to restore the footing of a retaining wall that supports a section of SR 140 at post mile 33.8. The footing of the wall has been scoured by an adjacent creek to a depth of up to seven feet and for a length of approximately 250 feet. The gap would be filled with concrete followed by the placement of rock protection to prevent future scour.	<b>NOD</b>	
2013079011	Lake or Streambed Alteration Agreement No. 1600-2013-0088-R2 Coyote THP Forestry and Fire Protection, Department of --Butte, Plumas The project is limited to the installation of three temporary crossings at R3, R26, and R45 and creating six in channel water drafting site at R8, R17, R24, R33, R34, and R42. The temporary crossings consist of installing a 24" CMP in a Class II watercourse, installing a 24" CMP in a Class III watercourse, and replacing a non-functioning vented ford with a standard rock ford. Further information can be found in the THP 2-12-080-PLU.	<b>NOD</b>

2008062056	California Health Care Facility Stockton California Prison Health Care Receivership Stockton--San Joaquin The California Department of Corrections and Rehabilitation, in cooperation with California Prison Health Care Receivership, and federal Receiver, and PG&E, have prepared an addendum to the 2009 EIR to address the proposed relocation of the site of a previously approved and evaluated substation to a different location within the CHCF Stockton Project site and construction of a 2.9-mile, 115-kilovolt (kV) power line that extends from PG&E existing Stockton A-Lockeford-Bellota line to the proposed substation.	<b>NOD</b>	
2008071075	State Route 91 Corridor Improvement Project Caltrans #8 Anaheim, Corona, Riverside--Riverside, Orange CDFW is executing a Lake or Streambed Alteration Agreement (SAA# 1600-2011-0098-R6[Revision 2]) pursuant to Section 1602 of the Fish and Game Code to the project Applicant: Riverside County Transportation Commission, represented by Anne Meyer, 4080 Lemon Street, 3rd Floor, Riverside, CA 92502, Phone (951)787-7141. The SR-91 CIP Project is limited to improvements on SR-91 from approximately the Orange/Riverside County line to the I-15 interchange and single-lane direct connectors to and from I-15 south, extending from SR-91 to the Ontario Avenue interchange. The project will require construction of additional lanes, bridge work involving 34 structures, modification of some existing road interchanges, improvements to cross-drainages, utility relocations, installation of sound and retaining walls, and landscaping.	<b>NOD</b>	
2009101061	Water Recycling Demonstration Project Anaheim, City of Anaheim, Fullerton--Orange The Metropolitan Water District of Southern California has authorized a Local Resources Program agreement with the City of Anaheim to provide financial incentives for the proposed project. Pursuant to the provisions of CEQA and the State CEQA Guidelines, the City of Anaheim, acting as the Lead Agency, adopted a Mitigated Negative Declaration on January 26, 2010 for the Anaheim Water Recycling Demonstration Project. This project consists of installing a water recycling facility, associated appurtenant structures, and a recycled water distribution system, and would provide up to 110 acre-feet per year of recycled water for toilet flushing at Anaheim's Civic Center West Tower and landscape irrigation with Anaheim's service area.	<b>NOD</b>	
2009111098	Shipyards Sediment Remediation Project San Diego Bay Regional Water Quality Control Board, Region 9 (San Diego), San Diego San Diego--San Diego Modification of the Shipyards Sediment Remediation Project to approve a 15,000 cubic yard increase in the dredge volume and the use of a different sediment management area for dewatering and stockpiling of dredged sediment at the S-Lane parcel within the NASSCO shipyard leasehold. The previously certified Final Program Environmental Impact Report evaluated Project details and activities including sediment dredging in identified dredge areas adjacent to NASSCO and BAE Systems shipyards in San Diego Bay; the dewatering and solidification of dredged material; the potential treatment of decanted water and transport of the removed sediment to an appropriate landfill for disposal.	<b>NOD</b>

The water line work was described in the County's Negative Declaration.	<b>NOD</b>	
2011071020	Whitewood (Meadowlark) Road between Baxter Road to Keller Road Project Murrieta, City of Menifee--Riverside The proposed Project is the acquisition of right-of-way and construction of approximately 5,800 linear feet of Whitewood Road (formerly Meadowlark Road) to its "ultimate width" between Baxter Road and Keller Road. Whitewood Road is shown in the General Plan Circulation Element as four-lane "Major" roadway and is part of the City's Capital Improvement Plan. In addition to the roadway, the initial phase of the Project also including grading and excavation, storm drains, storm water treatment facilities, wildlife under-crossings, street lights at intersections, curb cuts and wheel chair ramps at intersections, and signing and striping. Traffic signals and signal interconnect conduits will be installed at the intersections of Whitewood Road/Baxter Road and Whitewood Road/Keller Road. Parkway and median landscape improvements will include a completely automated irrigation system and planting materials will be selected from the City's landscape palette to promote water efficiency and infiltration, will be constructed at a later date.	<b>NOD</b>	
2011072037	Bella Diddy Roadway Rehabilitation Project Caltrans #2 Redding--Shasta To widen the existing Salt Creek Bridge to provide 10-foot wide left and right shoulders.	<b>NOD</b>	
2012011035	Hollister Hill State Vehicular Recreation Area (SVRA) Non-Motorized Buffer Trails Project Parks and Recreation, Department of Hollister--San Benito The OHMVR Division proposes to construct hiking, mountain biking, and equestrian trails (48" wide), two staging areas, and a hike-in day use area in the non-motorized buffer areas of the Hudner and Renz properties within the Hollister Hills SVRA. The proposed new trails on both properties would be multi-use trails and would be constructed and maintained through training opportunities and volunteer efforts. Motorized recreation would not be allowed.	<b>NOD</b>	
2013012017	Dwight Road Extension and New Warehouse Sacramento Regional Sanitation District Elk Grove--Sacramento To construct a secondary service road entrance to the wastewater treatment plant crossing the District's ring levee. The project will include the construction of a service road, levee access gates and barbed wire fences.	<b>NOD</b>

<b><u>Documents Received on Tuesday, July 23, 2013</u></b>			
	21-feet wide. It will be a single-span precast, prestressed, concrete girder bridge with reinforced concrete wall abutments. The excavation for the new abutments will be performed with an excavator or backhoe. Each of the abutments has wing walls. The majority of the excavated material from the original bridge deconstruction will be used as the fill for the new abutments. Abutment 1 may need to include 30-40 foot piles at the foundation.		
2012112008	Spanish Creek in Meadow Valley Stream Rehabilitation Project Plumas County --Plumas This proposed project involves restoration of Spanish Creek in Meadow Valley within four separate reaches covering about 72 acres along 2.6 miles. Project features include construction of floodplain and creation of gravel skimming areas, channel realignment, whole tree jams, boulder vane weirs and bank sloping. The area has been heavily impacted by debris from hydraulic mining.	<b>NOD</b>	
2013079015	River Bluff Regional Park Outfall Repair Project Ceres, City of Ceres--Stanislaus Repair of drainage outlet works at River Bluff Regional Park, at the south bank of the Tuolumne River. A high water event in the Tuolumne River resulted in the failure of a drainage outlet structure. The proposed project will repair the outlet structure to ensure the stability of the channel in this location and restore the water quality benefits of the facility.	<b>NOD</b>	
2013078268	Gold Hill-Eight Mile 230 kV Transmission Line Vegetation Removal Project - Unndamed Tributary to Bear Slough Fish & Wildlife #2 Galt--Sacramento The project is limited to the removal of trees and brush within a riparian area on the north side of an unnamed tributary to Bear Slough. Vegetation maintenance is required to maintain a safe clearance between the high voltage transmission line and cause power outages or fires. The trees have been determined to be potentially dangerous to the power line this summer, therefore PG&E is required to clear vegetation within the utility right-of-way that has grown into the clearance zone and poses a risk to the transmission line.	<b>NOE</b>	
2013078269	Morin Driveway Bridge Fish & Wildlife #2 Auburn--Placer SAA #1600-2016-0072-R2 - The project is limited to construction of a new residential driveway bridge, Specific project activities proposed within CDFW jurisdictional features include: trenching, form construction, installation of rebar, pouring, and finishing of concrete associated with the construction of bridge footings; installation of steel H beam girders on the concrete bridge footings; installation of metal pan backing on the H beam girders; forming and installation of rebar on the 8 inch curb along both sides; protection of creek banks underneath the bridge deck over an area approximately 20 feet long by 6 feet high; and installation of water and electrical utilities.	<b>NOE</b>	

## CEQA Daily Log

<b><u>Documents Received on Tuesday, July 23, 2013</u></b>			
2013078270	Hadley Specific and Culvert; SAA #1600-2013-0149-R2 Fish & Wildlife #2 Grass Valley--Nevada The septic line will be installed across the unnamed tributary to Rattlesnake Creek parallel to the existing driveway. A trench, approximately 30-feet long, will be dug using a backhoe to place a 2-inch diameter double incased PVC pipe underneath the creek to serve as the septic line. A 12-inch diameter plastic culvert will be installed over the septic line and under the existing driveway. A backhoe and hand tools will be used to excavate under the existing driveway for the installation of the culvert.	<b>NOE</b>	
2013078271	Waddle Bridge Project; SAA #1600-2013-0139-R2 Fish & Wildlife #2 Auburn--Nevada The project is limited to the replacement of two partially collapsed 36-inch diameter culverts and the replacement of an existing concrete crossing.  Work will be completed when flows within Magnolia Creek are minimal. Water will be diverted into existing bypass channel while culverts are replaced. Sand bags will be placed in front of the culvert inlets and outlets, diverting water into the bypass channel which flows back into the creek approximately 250-feet downstream. The creek bed will be allowed to dry before the start of work.	<b>NOE</b>	
2013078272	Spenceville Wildlife Area Low Water Crossing; SAA #1600-2013-0119-R2 Fish & Wildlife #2 --Yuba The project is limited to maintaining emergency fire access to an existing approach to create a gradual slope to the ordinary high water mark. A dozer will remove the overgrown vegetation, mainly Himalayan blackberry ( <i>Rubus armeniacus</i> ), starting at the ordinary high water mark and moving away from the creek to prevent any sediment or debris from entering the creek. Hand tools will be used to remove two willows (4 to 6-inches diameter at breast height). The approach to the low water crossing will be between 20 and 16-feet-wide.	<b>NOE</b>	
2013078273	Water Quality Boat Dock Removal - Lake Skinner Metropolitan Water District of Southern California --Riverside Remove and dispose of dilapidated water quality dock that is no longer useable. Using 30 ton crane C&D employees will rig existing dock, lift from water and set down onshore where it can be cut up and thrown away. Metropolitan will replace the boat dock with a new boat dock in the same vicinity.	<b>NOE</b>	
2013078274	Donner Summit PUD (formerly Big Bend MWC) Water Source Study Donner Summit Public Utility District --Placer The drilling of a test well on USFS land. Purpose is to prospect for water that meets the Safe Drinking Water Standards and is of enough quantity to serve the small community of Big Bend. The beneficiaries of the project will be the small community of Big Bend water users who have been on a Boil Water Notice for over 10 years.	<b>NOE</b>

2013071079	Chevron Service Station Drainage Improvements Encinitas, City of Encinitas--San Diego Note: Review per lead  The project proposes drainage system improvements and slope repair on a 1.3-acre property containing an existing gas service station.	<b>MND</b>	08/26/2013
2013071080	Reservoir 4701-2 Coachella Valley Water District Indio--Riverside The Coachella Valley Water District proposes to construct a 100,000 gallon, domestic water storage reservoir immediately adjacent to existing Reservoir 4701. The proposed steel-tank reservoir will measure 41 feet in diameter and 15 feet in height, and will occupy a one-half acre site immediately south of existing Reservoir 4701, a 21,000 gallon steel tank. Fencing and landscaping will be installed along the perimeter of the project site. Reservoir 4701-2 will replace the two existing 10,000-gallon, temporary, plastic tanks currently located and in use at the Reservoir 4701 site; Reservoir 4701 will remain. The purpose of this project is to support domestic water service demands in the Sky Valley and Indio Hills service areas.	<b>MND</b>	08/22/2013
2013072054	STPUD Angora Creek Sewer Relocation Project South Tahoe Public Utility District --El Dorado The Project proposes to replace and realign the 8-inch sewer line crossing Angora Creek that is at significant risk of structural failure. The project installs a gravity flow sanitary sewer realignment that will be constructed from a manhole on the corner of Mountain Trout Drive and Clear View Drive, spanning to a downstream manhole located on the north side of Angora Creek, approximately 330 feet south of the southwest terminus of Mountain Trout Drive. A total of approximately 638 linear feet of 8-inch piping and two new manholes will be installed. Construction of the new gravity sewer collection main will allow for elimination of the exposed 8-inch sewer line crossing Angora Creek. The existing line that crosses Angora Creek will be abandoned in-place without disturbance to the creek channel and SEZ.	<b>MND</b>	08/23/2013
2013072052	General Waste Discharge Requirements for Composting Operations State Water Resources Control Board -- The project is the adoption of the General Waste Discharge Requirements for Composting Operations (Order). This Statewide Order is applicable to any person responsible for discharging, or proposing to discharge waste at composting operations; or any person who owns and/or operates composting operations; or any person responsible for ensuring compliance with the maintenance and monitoring requirements at composting operations. After adoption by the State Water Resources Control Board, the Regional Water Quality Control Boards may use this Order to permit composting operations within their jurisdictions that meet the criteria in this Order. The proposed Order provides regulatory requirements for the protection of water quality.	<b>NOP</b>	08/22/2013

	<p>the City and County of San Francisco "Successor Agency" and 706 Mission Street Co LLC, with The Mexican Museum as a third party beneficiary, for the disposition of the following property from the Successor Agency to 706 Mission Street Co LLC.</p> <p>Approval of the Purchase and Sale Agreement fulfills an enforceable obligation of the Successor Agency. Upon the conveyance of the Agency Property pursuant to the terms of the Purchase and Sale Agreement for Real Property, 706 Mission Street Co LLC would construct a mixed-use project that includes: (1) a new 43-story tower (with up to 190 residential units) connected to existing historically significant Aronson Building, (2) new cultural space for the Mexican Museum, (3) approximately 4,800 gross square feet of ground-floor space for the Mexican Museum, (3) approximately 4,800 gross square feet of ground-floor retail-restaurant space, and (4) use of Jessie Square Garage for private and public uses.</p>		
2011052030	<p>Rincon del Rio Continuing Care Retirement Community Project Nevada County --Nevada</p> <p>Amendment of the sphere of influence of the County Sanitation District, Zone 2 (Lake of the Pines), and annexation thereto of approx. 215ac, comprised of APN 57-240-17, 18, 19, and 57-130-13, in order to secure District wastewater services to support the development known as Rincon del Rio Continuing Care Retirement Community (CCRC) a 345 unit housing development of 40 acres. Remainder of property to be reserved an open space and for agricultural uses.</p>	<b>NOD</b>	
2012062060	<p>Altamont Winds Inc. Conditional Use Permit Modification Alameda County Livermore--Alameda</p> <p>The proposed project consists of operational and decommissioning schedule modifications of 16 CUPs applicable to the Applicant's wind power operation and maintenance activities within the 14,436-acre Alameda County portion of the APWRA. The project facilities consist of approximately 828 existing, operable wind turbines, with a nameplate capacity of 85.8 MW, plus existing support facilities, with a total footprint of approximately 233 acres. The Applicant is requesting a modification to its CUPs that would accomplish the following: 1) Remove the requirement for phased decommissioning; 2) Remove the seasonal shutdown requirements; 3) Provide for 100% of AWI's turbines to be shut down by the end of 2015 and decommissioned in one to two years thereafter; and 4) Evaluate shut down in 2018.</p>	<b>NOD</b>	
2013031066	<p>Chatsworth Park South Remedial Action Plan Los Angeles, City of Los Angeles, City of--Los Angeles</p> <p>The proposed project includes DTSC's approval of a Remedial Action Plan (RAP) project (Project) under Chapter 6.8 of the Health and Safety Code. The RAP proposal will cap in-place the soil impacted principally by lead and polycyclic aromatic hydrocarbons discovered in the park from the former "Small Arms Firing Range". The surface cap would provide a permanent solution that reduces the accessibility and mobility of the impacted soils, and the threat to human health and the environment. The surface cap would be installed over remediation areas. The Project includes the following activities associated with removal of approximately 12,900 cubic yards (cu.yd) of contaminated soils and disposal of these soils in appropriate landfills, import of approximately 27,800 cu.yd. Of clean soil</p>	<b>NOD</b>	

## CEQA Daily Log

<b><u>Documents Received on Wednesday, July 24, 2013</u></b>			
2013032064	<p>approximately 16,750 cu.yd. of aggregate base to be used for the capping process, installation of drainage system, removal of approximately 166 non-Heritage, non-protected trees, replacement of these trees with at least an equal number of native trees, installation of an irrigation system for the new trees, and installation of fencing around trees and areas where capping will not be implemented. The proposed Project also includes rough grading the top 18 inches of soil to destroy the existing burrowing animal network and to prevent future settlement of animals by installing a layer of steel hardware cloth beneath the capping base. Portions of the Project site with steep terrain will not be remediated and will be fenced off to restrict public access. An operations and Maintenance Plan is also included to maintain the cap and a land Use Covenant will be required to prevent unauthorized uses of the Site and to prevent disruption of the cap. The proposed Project includes paving of an expanded parking lot adjacent to the existing parking lot. The proposed Project does not include demolition or modification of existing Project site structures or construction of new facilities (other than the additional parking lot) at the Project site.</p> <p>Fortuna Dump Remediation Project Resources Recycling and Recovery, Department of Fortuna--Humboldt</p> <p>The project site is approximately 9-acres with the inactive burn dump area covering 5.6 acres. The project proposes re-grading the 5.6-acre burn dump area and increasing the size of the burn dump area to a total of six acres. The project impact area would be capped with up to two-feet of soil or approximately 11,000 CY of imported soil. Debris that is located adjacent to Mill Creek would be relocated within the project impact area and a 30-foot buffer created between the edge of the cap and Mill Creek. Gabions and soil berms would be constructed to reduce the potential for soil cap erosion and possible contamination to the creek. A new drainage pattern would be created diverting the flow of water to the perimeter of the soil cap. A vegetative cover of native grasses and small shrubs would be established to help limit erosion. No operational uses are proposed.</p>	<b>NOD</b>	
2013042064	<p>Three Rivers Bouldin-Tyler Island Gas Pipeline Project California State Lands Commission Isleton--Sacramento, San Joaquin</p> <p>The project is limited to horizontal directional drilling under the Mokelumne River for the purpose of installing a 2,292 foot welded steel 4.5 inch diameter natural gas pipeline 50 feet under the Mokelumne River. The entry point for the Mokelumne River section would be located at least 380 feet north of the levee in an agricultural field where it would tie in to an existing natural gas facility. The exit point would be located at least 400 feet south of the levee in an agricultural field. Bore entry and exit points would be located within an approximately 100 foot by 100 foot area for each site. Clearing of ruderal and agricultural vegetation would be required at the bore entry and exit locations.</p>	<b>NOD</b>	
2013068279	<p>ED Micro-Place Microsurfacing on Existing Pavement Caltrans #3 --El Dorado</p> <p>The project is to place a microsurfacing seal coat layer from the Edge of Pavement (EP) to EP. An under drain will also be added under the road to help relieve water that pushes up under the pavement during the winter which will deteriorate/compromise the roadway surface if not addressed.</p>	<b>NOE</b>

	be separated from the adjacent parking area east of the building by a six foot wall. Landscaping will be provided adjacent to Marguerite Parkway, the slope along the east project boundary, and along all sides of the hotel. The project will provide 102 parking spaces, including handicap.		
2013071086	Orangefair Multi-Family Development Project # PRJ13-0001 Fullerton, City of Fullerton--Orange The proposed project consists of removing approximately 9,420 sf of an existing restaurant, approximately 9,900 sf (gross) of existing retail space, existing park area, and landscape islands in order to construct two-four-story wood framed residential apartment buildings (west building and east building) on a 5.7 -acre site. The residential apartment buildings will house 323 units with associated parking (739 total stalls) within the existing 30-acre Orangefair Shopping Center. The project also includes street, driveway and landscape improvements. There will be two parking garages containing 717 stalls (250 stalls at the west building garage and 467 stalls at the east building garage) within the development and an additional 22 parking spaces at grade level along South Lemon Street.	<b>MND</b>	08/26/2013
2013071087	Potrero Boulevard / 4th Street (east) Street Improvement Project Beaumont, City of Beaumont--Riverside The project consists of extending 4th Street in a westerly direction approximately 0.5 miles (2,790 lineal feet) where it will intersect with the planned Potrero Blvd. roadway. From this point, the project will continue north of 0.12 miles (650 lineal feet) on the Potrero Blvd. alignment where it will connect to the planned SR 60/Potrero Blvd Interchange. Both the Potrero Blvd and 4th Street segments will be improved with a minimum 39 foot wide paved section designed for two lane travel with a 7 to 11 foot dirt shoulder area on both sides of the pavement and associated drainage facilities.	<b>MND</b>	08/26/2013
2013071088	Adelanto Wastewater Treatment Plant 2013 Upgrades Adelanto, City of Adelanto--San Bernardino The proposed project is located within the existing Adelanto Wastewater Treatment Plant, between Jonathan and Concord Streets, south of La Paz Street and north of Auburn Avenue. The existing wastewater treatment plant consists of approximately 35.8 acres. Access onto the site is obtained from Jonathan Street.	<b>MND</b>	08/26/2013
2013071089	State Route 168 Sidewalks Caltrans #9 Bishop--Inyo Caltrans proposes to construct curb, gutter, and sidewalks within the highway right-of-way of SR 168 (West Line Street) within the unincorporated area of Inyo County, CA, between the PM 16.79 to 17.54. The sidewalk will be constructed along the north side of the highway from Barlow Lane (PM 16.79) to 0.2 mile east of See Vee Lane near the Bishop Care Center and the boundary of the City of Bishop (PM 17.54). The project proposes to construct a 6 foot wide sidewalk with curb from Barlow Lane to 0.1 mile west of Pioneer Lane. Paved shoulder width would be 8 feet wide for approximately 0.6 mile, from Barlow Lane to 0.1 mile east of See Vee Lane, and 13 feet wide for the remaining 0.1 mile to the end of the project.	<b>MND</b>	08/26/2013

2013072058	Children's Hospital and Research Center Oakland Master Plan Project Oakland, City of Oakland--Alameda The main purpose of the proposed project is to create new seismically compliant acute care facilities that meet the seismic safety requirements of SB 1953. The project would be constructed in two phases, and a completion would add ~327,017 sf of use, 40 hospital beds, 158 parking spaces, and a helistop. As a result, there would be an increase of ~71 patients, 157 visitor and 205 employees each day.	<b>NOP</b>	08/26/2013
2010072012	City of Dublin Climate Action Plan (CAP) Update Dublin, City of --Alameda The proposed project is the adoption of the Climate Action Plan (CAP) Update, a document that provides policies and measures aimed at reducing greenhouse gas emissions within the City of Dublin. The City adopted the original CAP in 2010. The goal of the CAP Update is to reduce Dublin's community-wide GHGE by 15% below 2010 levels by 2020. The CAP Update identifies a variety of measures to achieve the City's GHG reduction target. The CAP Update describes baseline GHGE produced in Dublin and projects GHGE that could be expected if the CAP Update is not implemented. The City expects the reductions to be achieved by a combination of the reduction measures in the CAP Update and State initiatives aimed at reducing GHGE, such as Renewable Portfolio Standards, Title 24 and Assembly Bill 1493 (Pavley).	<b>Neg</b>	08/26/2013
2013072059	Gutierrez Vineyard Conversion #P13-00403-ECPA Napa County Napa--Napa The project includes earthmoving activities and installation and maintenance of erosion control measures associated with development of an approximately 1.14-acres of new vineyard (approximately 0.88 net vine acre). The site plan designates development on topography that ranges from moderately to steeply sloping lands (typical slopes from 20% to 35%), at elevations between approximately 160 and 200 feet above mean sea level.	<b>Neg</b>	08/26/2013
2013072061	PA-1300114 (UP) San Joaquin County Stockton--San Joaquin A Use Permit application to expand an existing religious assembly in two phases over six years. Phase 1, to be completed in eighteen months, includes the construction of a new 6,000 sf, 90 foot tall, tower structure. Phase 2, to be completed in 6 years, includes the construction of a 4,600 sf temple.	<b>Neg</b>	08/26/2013

2013051079	Miramonte Ranch Major Grading Permit San Luis Obispo County San Luis Obispo--San Luis Obispo Request by SK Miramonte Ranch, LLC, for a major grading permit to allow for as-built engineered grading and restoration of a site previously disturbed by unauthorized grading in 2007. The proposal includes grading for a primary access road to a ranch as well as an access road to a proposed mobile home site to meet Cal Fire standards (Roads "A" and "D" on the project plans). Two additional roads, (Roads "B" and "C" on the project plans), will be re-graded and restored to residential road standards. Road "A" will involve both on and off site improvements (the off-site improvements cross the 242 acre Johnson Ranch Open Space Area that is owned by the City of San Luis Obispo on APN 076-114-012 and 076-121-019 via an existing access easement). The total amount of site disturbance is approximately 9.1 acres, and will result in 29,470 cubic yards of cut and fill. The project is located on the northwest side of Ontario Road, approximately 1 mile northwest of the South Higuera Street-Highway 101 interchange, approximately 2.70 miles south of the City of San Luis Obispo, in the San Luis Bay Inland planning area.	<b>NOD</b>	
2013052047	Squaw Valley Preparatory - Creekside Charter, K through 12, Temporary Facility Plan (PDSB 20130141) Placer County Truckee--Placer The project proposes a Design/Site Review to develop a temporary facility of a single "Sprung" structure of 80 feet by 230 feet for a joint campus at Squaw Valley Resort.	<b>NOD</b>	
2013062038	Self Parcel Map #2 (PMLD 20110155) Placer County Roseville--Placer The project proposes a Minor Land Division to allow for a three-lot split of a 3.76 acre property. Approval of the Minor Land Division will result in the creation of two separately saleable, buildable residential lots, consisting of a 43,326 square-foot parcel and a 41,295 square-foot parcel. The portion that is currently developed with a single-family residence, consisting of 78,872 square feet, will be recognized on the parcel map as a remainder parcel.	<b>NOD</b>	
2013062039	Self Parcel Map #1 (PMLD 20110142) Placer County Roseville--Placer The project proposes a Minor Land Division to allow for a three-lot split of a 4.24-acre property. Approval of the Minor Land Division will result in the creation of two separately saleable, buildable residential lots, consisting of a 48,706 sf parcel and a 45,681 square-foot parcel. The portion that is currently developed with a single-family residence, consisting of 90,153 square feet, will be recognized on the parcel map as a remainder parcel.	<b>NOD</b>	
2013062044	Harston Gully Sediment Control Project Gold Ridge Resource Conservation District (GRRCD) Sebastopol--Sonoma The project is designed to stabilize a large rangeland gully to keep sediment from entering Ebabias Creek. A 20' high earthen grade control structure will stabilize the lowest 400' of active gully erosion. Gully flow will be diverted into a new channel on the adjacent terrace and into a sediment retention basin with 1,700 cubic yards	<b>NOD</b>

	capacity. Once the sediment has settled, flow will exit the basin to return to the gully. The new channel will be seeded with native grass, covered with erosion control blanket, and revegetated with native plants.		
2013079018	Lake or Streambed Alteration Agreement No. 1600-2013-0142-R2 "Blueberry" THP Forestry and Fire Protection, Department of --Calaveras The project entails the removal of two 18 inch CMPs at a road crossing over an unnamed Class II watercourse and installation of a single 32 inch CMP (Project P4); and the removal of a 24 inch CMP over an unnamed class II watercourse and replacing it with a 30 inch CMP (Project P9). Further information can be found in the THP 4-11-008-CAL.	<b>NOD</b>	
2013078302	SR 162 Culvert Replacement Project Fish & Wildlife #2 --Glenn The California Department of Transportation (Caltrans) is proposing the following maintenance actions for existing corrugated culverts along SR 162 near Williams, in Glenn County, California. The proposed project includes the following maintenance actions * Existing culvert will be lined * Flared End Section (FES) will be replaced as needed * Rock Slope Protection (RSP) will be placed as needed * Water Pollution Control Best Management Practices (BMPs) implemented * Traffic Control will be necessary to complete work There will be no changes to the existing drainage profile within the project limits. All construction activities will take place from the existing highway right-of-way.	<b>NOE</b>	
2013078303	Devil's Gulch Repair Regional Water Quality Control Board, Region 2 (San Francisco Bay), Oakland Unincorporated--Marin The Project seeks to stabilize the bank of Devil's Gulch to reduce sediment input to the creek and restore a failed wet crossing on a secondary dirt road to provide access for fire protection and a private ranch.	<b>NOE</b>	
2013078304	Concrete Median Barrier Caltrans #4 San Jose--Santa Clara Caltrans proposes to replace existing temporary K rail with Type 60 C median barrier on State Route 87 in Santa Clara County. No excavation will be required for this project. All staging and work will be conducted along the shoulder and median. The project will not require new right-of-way or permits.	<b>NOE</b>	
2013078305	Vault-20 Energy Storage System Fish & Wildlife #4 --Merced The Project to relocate a seasonal stream is located within a working almond orchard. The Project includes the relocation of approximately 225 feet of the stream, 10 to 15 feet east of its current alignment. Approximately 17 orchard almond trees will be removed to accommodate relocation of the stream to the east. The new alignment of the stream will be excavated and transitioned into the north and south ends of the existing stream and the old alignment will be backfilled and compacted. Approximately 200 cubic yards of native material will be moved. The new stream is anticipated to exceed capacity of the current stream alignment.	<b>NOE</b>

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<b><u>Documents Received on Monday, July 29, 2013</u></b>			
2012052019	Permit Coordination Program Mendocino County --Mendocino The Department of Fish and Wildlife (Department) is issuing an Agreement pertaining to 22 encroachments: road-related upgrades including bridge installation, culvert upgrade/installation, rock armored fill crossing installation rock armoring at culvert inlets/outlets and other miscellaneous road drainage related improvements.	<b>NOD</b>	
2013042039	Development Review and Minor Use Applications 13PLN-04 Grass Valley, City of Grass Valley--Nevada The Project is located on a vacant parcel at 11844 Old Tunnel Road in Grass Valley, county of Nevada. The Project consists of construction of a medical services building and 96 parking spaces on an approximately 3-acre project site. The proposed Project will permanently impact seasonal wetlands and a seasonal drainage channel.	<b>NOD</b>	
2013062003	Alderpoint Road Tank Replacement Project - Garberville Sanitary District Garberville Sanitary District --Humboldt Replacement of an existing 30,000 gallon water tank with a new 200,000 gallon water tank in the same location. The new tank will require the excavated in the existing concrete pad and replacing it with a new 40 foot by 40 foot concrete pad. The tank will be made of coated, painted street.	<b>NOD</b>	
2013062021	Lindsey Slough Tidal Marsh Wetland Enhancement Project Fish & Wildlife #3 Rio Vista--Solano The proposed Lindsey Slough Tidal Marsh Wetland Enhancement Project is to reestablish tidal connection to the historic marsh and channel system and to enhance existing marsh habitat. The project elements include: excavation and debris removal to enlarge the existing north embankment breach; excavation to breach the south embankment of Calhoun Cut; excavation of a starter channel; lowering of an existing earthen causeway; upland fill placement of material excavated from the breaches; and beneficial use of sediment excavated from the starter channel to create low habitat berms within the marsh and raise the remnant marsh plain to a more mature marsh plain form.	<b>NOD</b>	
2013079019	Use Permit 710-96B Enza Zaden Research San Benito County --Monterey The California Department of Public Health (Department), as the Responsible Agency, will be issuing a water supply permit to the proposed project includes the construction of an 8,845 square feet building for office space (to accommodate a team of scientist and field technicians), a laboratory (to execute plant pathology tests and to perform basic pathology research) and seed storage vault (for storage of seed samples of all the breeding lines for different research programs in lettuce, pepper and onions). The building will be LEED certified. The project also includes a 27-space parking lot with two handicapped space. The project will be supplied with water for domestic use from an existing well that will be upgraded and become a new water system.	<b>NOD</b>

2013068222	Well Relocation and Storage Upgrade Planning Project Leggett Valley School District --Mendocino The California Department of Public Health (CDPH) is a responsible agency for this project. The Department's Safe Drinking Water State Revolving Fund Program is providing state funds for the project. The Leggett Valley School District proposes to replace an existing drinking water well with a well of substantially the same capacity. The project will include test borings, water quality testing, treatment system design, and producing project construction specifications.	<b>NOE</b>	
2013078325	Rancho Hills Fuels Reduction Project Forestry and Fire Protection, Board of Yreka--Siskiyou The project shall consist of two treatment areas (6 acres and 8 acres) approximately 0.5 miles apart. The treatment areas are characterized by dense stands of western juniper 20 to 60 years of age with sparse occurrences of rabbitbrush and grass species in the understory. The areas contain several large volcanic rock outcrops and an abundance of large boulders throughout. The elevation ranges from 2400 - 2700 feet, slopes range from 5% to 40%. There are no watercourses within either of the treatment areas, but the largest of the two treatment areas is located directly adjacent to Lake Shastina. Treatment will not be conducted within 150 feet of the high water mark of Lake Shastina.	<b>NOE</b>	
2013078326	Carmel Highlands Western WUI Grant Project Forestry and Fire Protection, Board of --Monterey This project will reduce fuel loading on 121 acres along the roads below the locked gates in the community of Carmel Highlands. The project will reduce woody vegetation less than 12" DBH by approximately 60% within 100 feet of a road. Dead, diseased, and dying trees that may impact a road or structure will be removed. All remaining trees near a road will be pruned up to 16 feet or 50% of the live crown (whichever is less) within up to 100 feet of a road, but staying on the roadside of the fences.	<b>NOE</b>

<b><u>Documents Received on Monday, July 29, 2013</u></b>			
2013078327	San Gabriel Mountains Regional Conservancy Los Angeles County Unincorporated--Los Angeles The project is designed to reduce the fire hazard adjacent to the Communities of Glendora. The work will be conducted by the County of Los Angeles Fire Department and the California Conservation Corps. The project will help protect the area's natural and cultural resources from wildland.	<b>NOE</b>	
2013078328	Meadows Fire Safe Council Arroyo Foothills Conservancy Los Angeles County Unincorporated--Los Angeles The project is designed to reduce the fire hazard adjacent to the Communities of The Meadows, La Vina and Chaney Millard. The work will be conducted by the County of Los Angeles Fire Department and the California Conservation Corps. The project will help protect the area's natural and cultural resource from wildland.	<b>NOE</b>	
2013078329	DOGGR - Bakersfield Conservation, Department of Bakersfield--Kern Suite 417 is a lease renewal Suite 100 is for additional space with MSF throughout the space project.	<b>NOE</b>	
2013078330	Marin Country Club Irrigation Pond Silt Removal Fish & Wildlife #3 Novato--Marin The project involve silt removal from the bottom of irrigation Pond #1 at the Marin Country Club. Silt removal will occur at the bottom of the approximately 960 linear foot, 3 acre pond. U.S. Aqua Vac will use a suction dredge technique to remove an estimated 8,000 cubic yards of silt from the pond bottom. SAA #1600-2013-0193-R3.	<b>NOE</b>	
2013078331	120 Sienna Court Residence Fish & Wildlife #3 Healdsburg--Sonoma The project is limited to the installation of a culvert across a small unnamed tributary to Foss Creek as part of a new residential driveway. The culvert will be 33-foot long with an elliptical shape of 24-inch tall by 38-inch wide. Rock rip rap will be placed at the culvert inlet and outlet to serve as an energy dissipater to reduce erosion. A single 16-inch DBH black oak will be removed to make room for the culvert. SAA #1600-2013-0163-3.	<b>NOE</b>	
2013078332	Maintenance of East H Street Detention Basin San Diego Association of Governments Chula Vista--San Diego The East H Street basin is one of several stormwater basins designed to control and treat runoff from the South Bay Expressway (also known as State Route 125 South). Currently, it is estimated that approximately 1,000 cubic feet of silt has accumulated within the East H Street basin and its functionally has been diminished. A one-time maintenance event is necessary to remove the sediment and vegetation and restore the basin to its original capacity and enable maintenance responsibility to transition to the City of Chula Vista. The activity would remove vegetation and sediment from a 0.6 acre area. Vegetation would be trimmed with small weed removal equipment and hand tools. A skip loader tractor would remove the debris. The sediment would be removed using an excavator	<b>NOE</b>

	and hauled off-site for disposal. A grading tractor would be used to final grade site back to baseline conditions.		
2013078333	CP7249 Reservoir 3A Wethead Treatment Facility Cucamonga Valley Water District Rancho Cucamonga--San Bernardino Cucamonga Valley Water District has three production wells that jump from the Cucamonga Basin Aquifer into Reservoir 3A located at the southeast corner of 19th Street and Sapphire Avenue. These wells have a high concentration of nitrates and dibromochloropropane (DBCP) as a result of decades of agricultural usage in the area. These levels do not meet current public health standards are limiting water production for the District. The installation of a package granular activated carbon (GAC) system would filter the water removing DBCP bringing the water back to within public health standard limits. This package treatment system could enable the District to increase water production by 2,600 AF. The process is commonly used throughout the industry and is an accepted practice approved by the State Department of Public Health.	<b>NOE</b>	
2013078334	Mill Valley Storm Damage Project Caltrans #6 Mill Valley--Marin The project would stabilize a storm-damaged slope, 50 feet long by 8 feet wide by constructing a soil nail wall (ground anchor wall). A guard rail would be installed, and the paved shoulder would be widened by 4 feet. The Rock Slope Protection (RSP) previously planned for this location will not be built.	<b>NOE</b>	
2013078335	Wire Theft Prevention Caltrans #6 --Fresno, Madera The project involves repairing damaged electrical system due to wire theft, vandalism, and hardware failure. Construction would replace system components related to Traffic Operations System, highway signals/lighting, pumping pants, traffic monitoring cameras, and highway irrigation systems. No new right of way is required.	<b>NOE</b>	
2013078336	Wire Theft Prevention Caltrans #6 --Fresno The project involves repairing damaged electrical system due to wire theft, vandalism, and hardware failure. Construction would replace system components related to Traffic Operations System, highway signals/lighting, pumping pants, traffic monitoring cameras, and highway irrigation systems. No new right of way is required.	<b>NOE</b>	
2013078337	Fullfrog Survey Tahoe Conservancy --El Dorado, Placer Execution of license agreement with U.S. Forest Service - Lake Tahoe Basin Management Unit for the purpose of performing an amphibious survey related to the Sierra Nevada yellow-legged frog Restoration Project in the Lake Tahoe Basin.	<b>NOE</b>

	levels of nitrates being discharged on-site.		
2013078344	Stabilize Roadway and Improve Drainage Facilities Caltrans #2 --Humboldt The California Department of Transportation, proposes to stabilize the roadway and improve drainage facilities on 96, between 8.5 and 8.7 in Humboldt County. The purpose of this project is to restore the roadway to pre-storm damage conditions. This project is needed due to slip-out during the declared storm event that damaged the segment of roadway on 96, between 8.5 and 8.7 in Humboldt County.	<b>NOE</b>	
2013078345	Upgrade Exterior Lighting - Shingletown Safety Roadside Rest Area Caltrans #2 --Shasta The California Department of Transportation, proposes a State funded project to upgrade exterior safety lighting at the Shingletown Safety Roadside Rest Area, on 44, east of the community of Shingletown. The existing lighting system lacks adequate coverage along sidewalks and within the parking area. The purpose of the project is to improve safety and reduce maintenance and energy costs. The project entails replacing existing light fixtures and adding several lights. Expansion of the lighting system will require installation of new underground electrical conduit, which will require trenching and/or boring.	<b>NOE</b>	
2013078346	Coyote Gulch Restoration Parks and Recreation, Department of --Sacramento This project will restore the active Coyote Gulch hillclimb facility. This hillclimb will be restored and reopened on a rotational basis. Project objectives will focus on improving stormwater quality and protecting the existing oak trees. Native soil will be replaced on the hill and held in place by straw wattles, a native seed blend will be planted. This project will be less than 1 acre in size and is consistent with the Park's Master Plan objectives, as well as the 2008 Soil Conservation Standard and Guidelines.	<b>NOE</b>	
2013078347	San Buenaventura State Beach Irrigation Replacement Parks and Recreation, Department of --Ventura This project is to replace the deteriorated components of the existing lawn irrigation system in the day use area of San Buenaventura State Beach. Improvements will be made by replacing the irrigation valves, lines and controllers.	<b>NOE</b>	
2013078348	Rosamond Community Services District Regional Arsenic Compliance Feasibility Project Public Health, Department of --Kern The California Department of Public Health (Department) is the responsible agency. The Department's Safe Drinking Water State Revolving Fund Program is providing state funds for the project. The Rosamond Community Services District proposes to complete a regional consolidation feasibility project to address arsenic compliance. The planning scope includes environmental documentation, LAFCO compliance, engineering design and construction drawings, and consolidation agreement preparation.	<b>NOE</b>

	proposed use; and the possible approval of a right-of-way grant to Palen Solar Holdings, LLC for construction, operation and decommissioning of a solar thermal electricity generating facility. The Draft PA/SEIS supplements the Palen Solar Power Project PA/FEIS (2011), identifying impacts of the modified proposed action and alternatives, including impacts related to biological resources, cultural resources, land use, visual resources, hydrology, water quality, and water use.		
2013071095	Chiquita Water Reclamation Plant Expansion Santa Margarita Water District Unincorporated--Orange The proposed Project would involve the upgrade and expansion of the CWRP to provide preliminary, primary, secondary, and tertiary wastewater treatment for flows up to 10.5 MGD. The secondary treatment system capacity would be expanded from 9.0 MGD up to 10.5 MGD. The tertiary treatment capacity to produce Title 22 reclaimed water would be expanded from 5.0 MGD up to 10.5 MGD. The solids handling systems, biogas handling systems, odor control, and other ancillary mechanical, electrical, and instrumentation systems would also be upgraded and expanded to serve the projected future flows and loadings at the CWRP. Additionally, the project would include construction of a biosolids reduction system.	<b>MND</b>	08/28/2013
2013071098	Grading Permit in the Scenic Resources Protection Overlay Zone (PL12-0144) Ventura County --Ventura The proposed project will involve the removal of 1,250 cubic yards of dirt material to reshape a portion of the Carlisle Inlet peninsula (approximately .5 acres), and re-vegetate the graded area with native vegetation. The purpose of the project is to lower a soil berm (bridge abutments) to give the parcel a more natural lakeshore appearance as required per Policy 2.5.2-12 of the LSHVAP.  Grading will not encroach into the canopies or root zones of the three coast live oaks and one California sycamore, and landscape irrigation water will be provided by the Lake Sherwood Community Services District.	<b>MND</b>	08/28/2013
2013072069	Corona and Twin Peaks Mine Drainage Treatment Plant Regional Water Quality Control Board, Region 5 (Central Valley), Sacramento Calistoga--Napa Note: Reference SCH# 2013012006  In a Remediation Plan, Tuleyome, Inc. (a California environmental nonprofit) proposes to conduct subsurface chemical treatment of a drain tunnel discharge, consolidate historic mine waste piles, improve runoff controls, enhance revegetation of waste rock and tailings, and improve existing infiltration trenches, all in an effort to improve water quality at historic mine sites that are currently causing water pollution issues. The Central valley Water Board's approval of the Remediation Plan will provide "good Samaritan" protection to Tuleyome pursuant to Chapter 5.7 of Division 7 of the Water Code.	<b>MND</b>	08/28/2013
2013072072	California Water Tank and Pump Station Project Redwood City Redwood City--San Mateo The City of Redwood City proposes to construct a new 750,000 gallon water tank with associated water pipeline and pump station facilities on City-owned property at the intersection of Tum Suden Way and California Way in the City of Redwood	<b>MND</b>	08/28/2013

	City. The new water tank is being proposed mainly for the California Pressure Zone of the Emerald Lake Hills area of the City to provide required water storage capacity for daily use and firefighting and to provide redundancy within the water supply system. The new water tank would also provide additional storage capacity for normal operations and emergency situations for the CA, Easter Bowl, Wilmington North and Easter Cross Pressure Zones/service areas.		
2013071096	Atlas Copco Mafi-Trench Santa Maria, City of Santa Maria--Santa Barbara Review of a General plan amendment/zone change and a Planned Development Permit to allow a 260,000 square foot facility for engineering, testing, assembling and manufacturing of hydrocarbon expander-compressors, turbines and cryogenic pumps. The project would be constructed in 3 phases and would also include an electric substation, electrical control house, test stand, aerial flare, railroad spur, contaminant structure, septic holding tank, two paint booths, one sandblast booth and various above ground water and gas storage tanks. Assessor's Parcel No.117-820-002 (portion).	<b>NOP</b>	08/28/2013
2013071097	Riverbend Sand and Gravel Project Fresno County Sanger--Fresno CUP application to mine construction grade aggregate (sand and gravel). The Project is located approximately 1.5 miles southeast of the City of Sanger and includes approximately 619 acres of an 833 acre site that is owned by Riverbend Sand and Gravel, LLC. The remaining 214 acres of the property, including the entire existing riparian habitat along the Kings River, are excluded from the Project. The Project Site is currently occupied by walnut and olive orchards and grape vineyards with several farm residences nearby. Reclamation of the Project Site will create approximately 268 acres of reclaimed farmland and approximately 351 acres of open space, riparian and open water wildlife habitat. Anticipated annual processing would be 1.6 million tons/year with annual sales at approx. 1.25 million tons/year.	<b>NOP</b>	08/28/2013
2013072070	Tourist Core Area Plan South Lake Tahoe, City of South Lake Tahoe--El Dorado The proposed project is an Area Plan for the Stateline/Ski Run area. The Tourist Core Area Plan would establish goals, policies and implementation strategies for providing specific land use guidance within the Area Plan boundary. The Tourist Core Area Plan would establish land use, zoning and design standards to replace the existing Stateline/Ski Run Community Plan. The new plan will serve as a mutual plan for the City and TRPA by providing direction for how the area should be regulated to achieve regional environmental and land use objectives.	<b>Neg</b>	08/28/2013
2013072071	PA-1300119 (TA) San Joaquin County --San Joaquin A development title text amendment application to amend three sections of the development title to clarify the intent and definition of the medical marijuana dispensary ordinance. The three sections to be amended include the definitions section 9-110, and sections 9-125.1 and 9-125.2 of the medical marijuana dispensary regulations.	<b>Neg</b>	08/28/2013

2013078353	<p>Temporary Emergency Permit for Treatment by Burning, California Department of Forestry and Fire Protection (CDFFP) Toxic Substances Control, Department of --San Bernardino</p> <p>DTSC has issued an emergency permit to California Department of Forestry and Fire Protection (CDFFP) to treat hazardous waste by burning. The hazardous waste to be treated consists of up to 251,000 pounds of illegal fireworks (Department of Transportation Hazard Class 1.4) in the current inventory plus illegal fireworks that may be seized during the effective period of the emergency permit. The items are seized by the CDFFP during multiple seizure actions and are illegal for sale in California. The emergency permit is effective from August 5 through November 2, 2013. Treatment will be scheduled depending on weather, logistics, and availability of personnel.</p>	<b>NOE</b>	
2013078354	<p>Streambed Alteration Agreement #1600-2013-0053-R2 Portola-McCleers Road (A-15) Safety Improvement Project, Location C Fish &amp; Wildlife #2 --Plumas</p> <p>The project for the purpose of this Agreement is limited to the extension of the inlet and outlet of an existing 40-year old 48" corrugated metal pipe culvert, to accommodate construction of 4-wide aggregate shoulders, and the installation of concrete headwalls and associated metal beam guardrail. The inlet shall be extended about 6 1/2 feet, and the outlet shall be extended about 11 feet. Rock slope protection shall be installed to replace existing sacked concrete which shall be removed during construction and disposed of in a suitable off-site location.</p>	<b>NOE</b>	
2013078355	<p>Butte Slough Outfall Gates in-water Geotechnical Drilling Streambed Alteration Agreement No. 1600-2013-0125-R2 Fish &amp; Wildlife #2 Colusa--Sutter, Colusa</p> <p>The Department of Water Resources will conduct two in-water geotechnical borings in the Sacramento River cove and three in-water geotechnical borings in the Butte Slough in the summer of 2013 to determine underwater soils along the proposed sheet pile alignment for the future Butte Slough Outfall Gates Rehabilitation project. Each boring is expected to take approximately 12 to 16 hours to complete with the overall effort expected to be completed in 20 days. This project will not impact riparian habitat since construction equipment, associated vehicles, and supplies will be using existing roads and paths and no vegetation will need to be removed for access and storage.</p>	<b>NOE</b>	
2013078356	<p>Roadside Sign Installation - San Diego Archaeological Center (12/13-SD-45) Parks and Recreation, Department of --San Diego</p> <p>The San Diego Archaeological Center (Center) is located within San Pasqual Battlefield State Historic Park. The Center will install a wooden road-side sign to identify their location and improve visitor services. The Center will replace the non-native plants with natives around the sign.</p>	<b>NOE</b>	
2013078357	<p>Rubberized Hot Mix Asphalt Overlay, EA 05-1A380_ ;P10500000318 Caltrans #5 Watsonville--Santa Cruz</p> <p>The project consists of placing 0.10-foot rubberized hot mixed asphalt over the existing pavement. The project will extend the useful life of the roadway and maintain a safe travelway for the public.</p>	<b>NOE</b>

2012062001	<p>CHP Communication Facilities Replacement Project, Truckee Area Office California Highway Patrol Truckee--Nevada</p> <p>CHP, with the assistance of the Department of General Services, is proposing to replace and upgrade the Truckee CHP telecommunications facility to meet the CHP's Enhanced Radio System requirements. The new facility would also be designed to meet CA Building Code (CBC) Title 24 Standards including Essential Services requirements. The proposed project includes acquisition of a 0.09-acre site adjacent to the CHP Truckee Area Office, construction of a new self-supporting, four-leg, 120-foot-tall tower and an equipment vault, underground utility line installation. Upon completion of construction, two existing towers at the CHP Area Office would be removed; these towers are approximately 55 feet and 92 feet in height.</p>	<b>EIR</b>	09/13/2013
2012122022	<p>75 Howard Street Project Case No. 2011.1122E San Francisco, City and County of San Francisco--San Francisco</p> <p>PPF Paramount Group, 75 Howard Garage, LLP proposes demolition of the existing 75 Howard Garage and construction, in its place, of an ~31-story, 350 foot tall, 432,253 gross sf (gsf) residential, high-rise tower containing 186 market rate units and ~5,658 gross sf of retail use. The ground and second floors of the proposed new building would include a restaurant, a café, the residential lobby, and services and amenities for the residents. The proposed project would contain 175 accessory off-street parking spaces for residential units in a 26,701 gsf parking garage located on two below-grade levels accessed from Howard Street. The proposed project also includes landscaping and paving improvements, resulting in a new 4,780 sf landscaped, publicly accessible open space at Block 3742/Lot 12 and a portion of the Steuart Street right of way south of Howard Street. On-street parking along the segment to Steuart Street south of Howard Street would be eliminated. This segment of Steuart Street would be narrowed, and the turnaround bulb at the southern terminus of Steuart Street would be eliminated.</p>	<b>EIR</b>	09/13/2013
2013071100	<p>General Plan Amendment/Zone Change No. 13-0125 Bakersfield, City of Bakersfield--Kern</p> <p>This project includes a General Plan Amendment to change the land use from OC to HR on approximately 5.89 acres and zone change from C-O (Professional and Administrative Office) to R-3 (Multiple Family Dwelling) on the same 5.89 acres. The project proposes construction of approximately 167 multi-family dwelling units. The project will include the construction of rights-of-way along Taft Highway, which would bring the buildable net acreage to 4.8.</p>	<b>MND</b>	08/29/2013

	Department with an enhanced capacity to serve the eastern portion of the City, since the existing East Division Substation is undersized and has been identified as inadequate to serve the current needs of the City.		
2013072074	Lucky Road General Plan, SOI, USA Amendment, Pre Zoning And Annexation Monte Sereno, City of Monte Sereno--Santa Clara The proposed project is an amendment to the Monte Sereno General Plan, Sphere of Influence, Urban Service Area, adoption of a pre zoning ordinance and annexation of 16290 Lucky Road (APN's 510-31-065, 510-31-066, 510-31-023. The Sphere of Influence and Urban Service Area of the City of Monte Sereno is proposed to be expanded to include the subject properties. The subject properties are proposed to be pre-zoned with the City of Monte Sereno's existing R-1-44 designation. If the proposed SOI, USA and pre zoning are approved by the City of Monte Sereno and LAFCO then the proposed annexation would be categorically exempt from CEQA as a class 19 exemption.	<b>MND</b>	08/29/2013
2013072075	1951 Colony Street Mountain View, City of Mountain View--Santa Clara The project includes a request for a General Plan Amendment from General Industrial to Medium Density Residential (13 to 25 units per acre), a Rezone from the General Industrial (MM-40) district to the Multiple-Family Residential (R3-2) district, and a Planned Unit Development Permit, Development Review Permit, and Heritage Tree Removal Permit to allow the construction of 33 rowhomes and the removal of 17 Heritage trees on a 1.82 acre site.	<b>MND</b>	08/29/2013
2013071099	Cottonwood Creek Integrated Regional Water Management Plan Tulare County Visalia--Tulare This Programmatic EIR concerns three areas of study that are connected geographically in that they are associated with the flood control projects and other public works projects that impact this area of Cottonwood Creek near the towns of Yettam and Seville in Tulare County. They are also a logical part in the chain of projects related to the timing and physical changes required in order to serve the multiple purposes of this Integrated Regional Water Management Plan. The activities that will be carried out within the creeks and ditches are generally controlled by the Alta Irrigation District and Stone Corral Irrigation District. Tulare County (Flood Control District/Board of Supervisors) will serve as the Lead Agency.	<b>NOP</b>	08/29/2013
2013071102	Riverside Community Hospital Expansion Project Riverside, City of Riverside--Riverside RCH is proposing a new Specific Plan to guide future expansion plans on the RCH campus and clearly define the extent and location of future development on the RCH campus. A site master plan has been developed and includes both short-term and long-range planning goals that cover construction on the RCH campus over a 30-year period. The primary focus of Phase I of the proposed project is to construct a new hospital bed tower to alleviate seismic concerns associated with existing buildings and to meet seismic retrofit requirements as required by State Bill 1953. Phase II of the proposed project also addresses seismic concerns and includes future and possible long-range development.	<b>NOP</b>	08/29/2013
