STATE CLEARINGHOUSE

NEWSLETTER

June 16-30, 2010

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **June 16-30, 2010**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Acting Director

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 212) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 2009 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

MEMORANDUM

DATE: February 13, 2007
TO: State Agency CEQA and Intergovernmental Review Coordinators
FROM: Scott Morgan, Senior Planner
SUBJECT: Distribution of Environmental Documents in CD-ROM Format

The State Clearinghouse has received an increasing number of requests from local and state lead agencies to distribute CEQA documents to state reviewing agencies in an electronic format, typically CD-ROM. The most common reason for these requests is to reduce cost. CD-ROMs are cheaper for the lead agency to reproduce and mail, and cheaper for the State Clearinghouse to distribute, especially in the case of multi-volume documents.

The State Clearinghouse has distributed EIR's and EIS's in CD-ROM format for state agency review and comment since August 1, 2003. Based on our experience with those documents, a survey conducted of state reviewing agencies and the potential cost savings to local and state agencies, we are extending this policy to other environmental documents including Negative Declarations, Mitigated Negative Declarations and Environmental Assessments. The State Clearinghouse will accept environmental documents under the following terms:

- CEQA Lead agencies may provide copies of draft environmental documents to the State Clearinghouse for state agency review in an electronic format. The document must be on a CD-ROM in a common file format such as Word or Acrobat.
- Lead agencies must provide fifteen (15) copies of the CD-ROM to the State Clearinghouse. In addition, each CD-ROM must be accompanied by 15 printed copies of the DEIR summary (as described in CEQA Guidelines §15123), executive summary, or introduction section of a Negative Declaration or Mitigated Negative Declaration. The printed summary allows both the State Clearinghouse and agency CEQA coordinators to distribute the documents quickly without the use of a computer.
- Final environmental documents may be provided in CD-ROM format without a printed summary. Distribution of the final documents is optional under CEQA.
- Federal lead agencies may send electronic copies of environmental documents to the State Clearinghouse in the same manner described for CEQA lead agencies. Distribution of NEPA documents to state agencies through the State Clearinghouse is encouraged pursuant to Presidential Executive Order 12372 and NEPA §102 (42 USC §4332)
- All notices of preparation must continue to be provided in printed format.
- Please provide one Notice of Completion Form with all submittals.

If your agency has difficulty downloading and reviewing any environmental documents please contact:

Scott Morgan, Senior Planner
916-445-0613
scott.morgan@opr.ca.gov .

Thank you for your cooperation in the CEQA review process.

**ENVIRONMENTAL DOCUMENT FILINGS WITH THE STATE CLEARINGHOUSE
1999 through 2009**

All CEQA documents filed with the State Clearinghouse are available for viewing on the Internet at <http://www.ceqanet.ca.gov/>

<u>Documents Received on Wednesday, June 16, 2010</u>			
2001042086	Bohemia Retail Project Placer County Auburn--Placer The proposed project would be constructed as a single-phase retail development consisting of an approximately 155,000 square-foot building on 18.62 acres. The project could include an outdoor garden center and fueling area depending on the end user(s). The improvements would include new underground utilities, paving, parking, lighting, and landscaping. The proposed parking design requirements, circulation and landscaping would conform to Placer County standards as contained in the Placer County Design Guidelines Manual and the Auburn/Bowman Community Plan. The proposed parking lot would include 717 standard parking stalls, 17 Handicap (HC) accessible spaces, and two van accessible stalls. Cart corrals would be used in the parking lot. For public safety purposes, the project includes installation of perimeter fencing. In addition, portions of the site adjacent to the existing railroad, canals, and the PG&E corporation yard, will be either walled or fenced. A wood fence would be constructed along the northern property line, adjacent to existing residences, and a solid masonry wall would be constructed along the eastern boundary of the sites, adjacent to Canal Street. An underground detention pond is proposed in the northwestern portion of the site.	FIN	
2008062026	BART to Livermore Extension Draft Program EIR Bay Area Rapid Transit District Pleasanton, Dublin, Livermore--Alameda The San Francisco Bay Area Transit District is proposing an extension to the existing transit system for enhanced rail service to eastern Alameda County. Service would follow an alignment originating in the median of I-580 at the Dublin/Pleasanton BART Station and extend eastward to Pleasanton and Livermore. Nine different alignments with varying combinations of station and maintenance facilities have been identified. All alignments are either completely contained within the I-580 median or diverge from I-580 and pass southeasterly through portions of the City of Livermore to the existing Union Pacific Railroad corridor or the former Southern Pacific Railroad corridor.	FIN	
2010061048	City of Big Bear Lake Public Works Facility Yard Expansion, Conditional Use Permit 2010-040 Big Bear Lake, City of Big Bear Lake--San Bernardino The City of Big Bear Public Works Department proposes to develop a two story office facility, totaling approximately 6,350 sf and a 520 sf material storage area for cinders, parking for 39 staff vehicles and an emergency back-up generator within the existing Public Works Facility Yard. The expansion portion of the project will be located within the northern portion of the existing Public Works Facility Yard and will be approximately one acre in size, including an approximately 5,920 warm storage building and 52 dedicated parking stalls for large equipment storage/parking area. Further, the project will integrate a roof mounted solar photovoltaic system over parking building with associated support system that will sustain a 50 kilowatt (kw) solar photovoltaic system. 2010062048	<p>Corporation Yard Facilities Master Plan and Transit Yard Facilities Master Plan Project Elk Grove, City of Elk Grove--Sacramento</p> <p>The proposed project consists of the adoption and approval of the Corporation Yard Facilities Master Plan and the Transit Yard Facilities Master Plan. The Master Plans anticipate the redevelopment of the City's existing Corporation Yard as well as the acquisition and development of additional land to accommodate transit operations and the operation of various City Departments at future buildout of the City.</p>	MND	07/15/2010
2010061047	<p>Westlands Water District and San Luis Water District Transfers and Related Exchanges Westlands Water District --Fresno, Kings, Merced, Santa Clara, Tulare NOTE: Review per Lead</p> <p>The project proposes the transfers of Friant Division Central Valley Project water to the District and to San Luis Water District. Since there are no direct conveyance mechanisms in place by which to accomplish direct transfers, each of these transfers would be facilitated by the exchange of water through the Kern County Water Agency and/or the Santa Clara Valley Water District, or by exchanges of water that has been recirculated and recaptured in San Luis Reservoir as a result of San Joaquin River Restoration flows.</p>	Neg	07/16/2010
1998052052	<p>Pacific Herring Commercial Fishing Regulations Fish & Game Commission --</p> <p>The regulations are considered for inclusion in the California Code of Regulations (CCR) to implement the State's policies for managing the commercial use of herring (Sections 163, 163.1, 163.5, and 164, Title 14, CCR). The proposed project and alternatives addressed in this Draft Supplemental Environmental Document (DSED) take the form of recommendations for amendment or change to the existing body of regulations. The recommendations and alternatives are based on biological assessments of existing stock conditions and comments received from interested individuals, commercial fisherman, and from the Director's Herring Advisory Committee (DHAC). The Commission has legislatively delegated authority to act on these recommendations.</p>	SIR	07/30/2010
2010041043	<p>Montecito Growth Management Ordinance Extension 09ORD-00000-00014 Santa Barbara County --Santa Barbara</p> <p>The proposed project is the extension and amendments of the Montecito Growth Management Ordinance (MGMO) (Ordinance No. 3916 as amended) which would extend the ordinance beyond the December 2010 expiration. The project also updates the various administrative provisions of the ordinance as well as criteria and findings. Potential for new residential units evaluated under the Montecito Community Plan Environmental Impact Report (92-EIR-3) would be facilitated by the proposed ordinance extension. The ordinance amendments and extension do not change the basic structure of the MGMO, its growth rate, or the intent to allow more than 19 new market rate units per calendar year (1/2% growth rate), nor does it include changes to existing land use and primary zoning designations in Montecito.</p>	SIR	07/30/2010

2002012078	<p>City of St. Helena Comprehensive Flood Protection Project St. Helena, City of St. Helena--Napa</p> <p>The Project will result in the temporary removal of 530 linear feet of habitat for California freshwater shrimp (<i>syncaris pacifica</i>), a state-listed endangered species, along the west bank of the Napa River. Bank work will require heavy equipment operations within the low flow channel of the Napa River. A cofferdam will be placed within the channel and dewatered. The 530 feet of shoreline will be replaced with bioengineered shoreline log structures and vegetated coir pillows to recreate habitat features. Up to 300 feet on constructed shrimp structures will also be placed near the confluence of Sulphur Creek with the Napa River. The project will include dewatering of Napa River, relocation of shrimp, and measures to minimize effects to the shrimp; however, incidental take is expected to occur. The ITP referenced above as issued by DFG authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.</p>	NOD	
2003102128	<p>Madera Quarry (CUP #2002-20) Madera County Madera--Madera</p> <p>The project consists of a Rezone (CZ #2006-003) from ARE-40 (Agricultural, Rural, Exclusive 40-Acre District) to QMD (Quarry, Mining, and Drilling District), Mining Permit (CUP # 2002-020) to allow a 900,000 ton annual hard rock quarry, and a Conditional Use Permit (CUP #2006-001) to allow a hot mix asphalt batch plant.</p>	NOD	
2004092135	<p>State Route 4 (East) Widening Project: Loveridge Road to State Route 160 Caltrans #4 Pittsburg, Antioch--Contra Costa</p> <p>The Contra Costa Transportation Authority (CCTA) in cooperation with the California Department of Transportation (Caltrans) proposes to widen State Route 4 (SR 4), and its interchanges and local roadways from just west of the Contra Loma Boulevard-L Street Interchange to just east of the G Street Overcrossing. The project is a phased component of the widening of SR 4 from just west of Loveridge Road to SR 160.</p> <p>The work will be conducted in 2 phases. The first phase of work requires the rerouting of a new 24-inch PG&E natural gas pipeline across a channelized section of West Antioch Creek, approximately 720 feet northwest of the existing Contra Loma 24' high pressure main from the south side of West Antioch creek to the north side of the creek. The gas main will cross the creek channel and flood plain through a section of a creek that is approximately 100' wide from top of bank to top of bank.</p> <p>The California Department of Fish and Game is executing a lake and Streambed Alteration Agreement Number 1600-2010-0097-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant Susan Miller/Contra Costa Transportation Authority.</p>	NOD

	and 2. Increase diversion of recyclable materials to achieve state-mandated recycling goals.		
2005072119	Upgrades to Outdoor Sports Facilities at Rio Americano High School San Juan Unified School District Sacramento--Sacramento The SJUSD proposes to construct a series of upgrades to sports facilities at Rio Americano High School, including bleachers on the football fields; improvements to the track, softball, baseball, and soccer fields; construction of restrooms, a snack bar, locker rooms, and a weight room; and installation of a public address system.	NOD	
2007082014	Sunol Valley Water Treatment Plant (SVWTP) Expansion and Treated Water Reservoir San Francisco, City and County of San Francisco--San Francisco The Operator proposes to expand the existing Sunol Valley Water Treatment Plant (SVWTP) located at 8653 Calaveras Road, in Sunol California 94586 by constructing and operating a new 17.5 million-gallon (MG) treated water reservoir, 3.5 MG chlorine contact tank, flocculation and sedimentation basin, construction of new effluent pipelines within the SVWTP, and a new 78-inch pipeline connecting the new treated water reservoir to the existing 78-inch discharge pipeline. The proposed project will improve treatment reliability by increasing the plant's sustainable capacity to 160 million gallons per day and bring part of the Water System Improvement Program (WSIP). The California Department of Fish and Game (DFG) is executing a Lake and Streambed Alteration Agreement Number 1600-2009-0263-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Ravi Krishnaiah/San Francisco Public Utilities Commission.	NOD	
2008072060	Natomas Levee Improvement Program, Phase 3 Landslide Improvements Project Sacramento Area Flood Control Agency Sacramento--Sacramento, Sutter The project comprises construction of Phase 3 of the 4-phased Natomas Levee Improvement Program, including levee improvements along 4.5 miles of the Sacramento River east levee from the southern limits of the Phase 2 improvements to just south of Interstate 5 (Reaches 5A-9B), the construction of a new canal between Elkhorn Reservoir and the West Drainage Canal designed to provide drainage, irrigation, and associated giant garter snake habitat, relocating the portion of the west drainage canal north of Interstate 5, relocating the Elkhorn Canal downstream of the Elkhorn Reservoir, removal of the western segment of the Central main Flume, modification of the existing Reclamation District (RD) 1000 Pumping Plants No. 2 and 4, as well as the Elkhorn and Prichard pump plants, infrastructure, and adjacent land. The project is expected to result in permanent impacts to 22.73 acres of Swainson's hawk nesting habitat, 45.23 acres of rice crop that may be utilized by giant garter snake, 13.16 acres of giant garter snake aquatic habitat, and 5.93 acres of giant garter snake upland habitat. In addition, the project is expected to result in temporary impacts to giant garter snake upland and aquatic habitat, and temporary impacts to Swainson's hawk nesting and foraging habitat. Project-related impacts are expected to result in the take of Swainson's hawk (<i>Buteo swainsoni</i>) and giant garter snake (<i>Thamnophis couchi gigas</i>), species protected by the California Endangered Species Act (CESA). DFG is issuing the CESA incidental take permit referenced above as a responsible agency under the California Environmental Quality Act (CEQA).	NOD

2010064002	Highway 94 Dulzura Checkpoint Improvements, US CBP and USBP San Diego County, CA U.S. Customs and Border Protection --San Diego NOTE: Review Per Lead.	EA	07/13/2010
------------	---	-----------	------------

USBP proposes to expand the existing checkpoint on Highway 94 near Dulzura to provide additional parking, and to improve some of the existing facilities within the checkpoint compound. Approximately 1.5 acres will be cleared and covered with an aggregate to accommodate parking--this action was part of the original plan when the checkpoint was established in 1997, but was never completed. Other improvements include lights around the parking lot, modular buildings for offices, and self contained wash bay.

2009041054	City of Riverside's Integrated Master Plan for Wastewater Collection and Treatment Facilities Riverside, City of Riverside--Riverside The City of Riverside's Sewage System Division is responsible for collection and treatment of wastewater flows generated within the City of Riverside and the adjacent communities of Jurupa, Rubidoux, Edgemont, and Highgrove. The City of Riverside's RWQCP provides primary through tertiary treatment at a rated capacity of 40 mpg and based on the master plan flow projections, it is anticipated that the available capacity of the existing Plant 1 would be exceeded by 2012. The City of Riverside proposes to upgrade its Regional Water Quality Control Plant (RWQCP) from a current capacity of 40 million gallons per day (mgd) to approximately 52.2 mgd by year 2025 to accommodate the forecasted growth projections for the City of Riverside. The main components of the proposed project would be constructed within the plant's existing footprint and would be upgraded to accommodate the future wastewater demands. The proposed components for upgrades and/or expansion include treatment facilities, new head works facility, new chlorine contact basin, new waste activated sludge thickening facility, new plant utilities and support facilities, rehabilitation and expansion of the City's existing collection system and other related projects that serve to support the ongoing operation of the RWQCP. 	North Fork and portions of proposed Parcel 3 lie in the State Reclamation Floodway. A Botanical Survey was conducted and identified three elderberry shrubs on the site. Mitigation Measures include proposing the floodway is proposed as a no-disturbance buffer to provide species protection and compliance with US Fish and Wildlife Service's Conservation Guidelines for the Valley Elderberry Longhorn Beetle.		
2010061052	Zone Change 09-01 (SR Solis Firebaugh, LLC) Firebaugh, City of Firebaugh--Fresno The project consists of the construction and operation of a 5-megawatt solar electricity generating facility on a portion of the City of Firebaugh's Wastewater Treatment Plant, and also construction of a 2+- mile transmission line to deliver power generated at the site to a nearby PG&E substation.	MND	07/16/2010
2010061053	Clear Ridge Mutual Water Association State Water Resources Control Board --Monterey Clear Ridge Mutual Water Association, Inc. (Association) serves 42 properties located on Pfeiffer Ridge and Clear Ridge in the Big Sur area of Monterey County. The Association's source of water is a 36-foot deep well situated approximately 35 feet from the southwest bank and 80 feet from the center line of the Big Sur River in Monterey County. From the time the well was originally developed in 1972, the Association's right to divert water was based on the theory that the water appropriated was percolating groundwater such that, under California law, a water right permit was not required. On March 9, 1999, the (State Water Resources Control Board (State Water Board)) determined that the Association's well was extracting underflow of the Big Sur River and that a water right permit was in fact required. As a consequence, on July 5, 1999, the Association filed water right Application 30946 with the Division. The Application, as amended, requests the right to appropriate up to a total of 42 acre feet per annum (afa) at a rate not to exceed 0.058 cubic feet per second (cfs), during the season from January 1 through December 31, from Big Sur Underflow, tributary to the Pacific Ocean. Prior to amendment, the Application has requested a total of 140 afa. The proposed purposes of use are domestic and fire protection.	MND	07/16/2010
2010061059	ENV-2008-3062-MND- 310 North Bellino Drive Los Angeles, City of Brentwood--Los Angeles Conditional Use and Coastal Development Permits for the conversion of an existing one-story, approximately 2,500sf accessory building to a single-family dwelling into a preschool, serving a maximum of 70 students, ages 2 to 5 years, and four staff, with hours of operation from 8:30am to 3:00pm Monday through Friday, on an approximately 1.68-acre property in the RE40-1-H Zone. As proposed, all vehicular access for the use will be taken from Los Liones Drive; no additional parking spaces beyond the two existing on-site spaces are proposed.	MND	07/20/2010

2009032093	Northgate High School Stadium Lighting Project Mount Diablo Unified School District Walnut Creek--Contra Costa Mt. Diablo Unified School District is proposing numerous improvements to the football stadium. These include: stadium lighting, permanent bleachers, additional speakers and a press box. Four light poles, each containing twelve, 1500 watt halide lamps, are proposed. Preliminary plans call for the poles to be 80 ft tall and mounted on a 2 ft high concrete base. They would be made of galvanized steel and the 12 lamps made of anodized aluminum. The lamps would be equipped with glare control louvers and shields with a black finish. In addition to stadium lights, the District is also planning on replacing the existing temporary bleachers and installing permanent bleachers that will seat up to 1,500 persons. The bleachers would be located on the east and west side of the field. The "home" side bleachers, located on the east side of the field, would seat 1,000 persons and the visiting side bleachers, located on the west side, would seat 500 persons. Improvements also include upgrading the public address system by adding 2 additional speakers for a total of 4. The speakers would be located on each of the light poles to create a distributed sound system.	NOD

2007102107	Patterson Ranch Planned District Fremont, City of Fremont--Alameda The project would provide for future development on approximately 111 acres of the 428-acre project area, and the donation of 316 acres to public agencies. The project considers the development of two scenarios: Scenario 1 would allow up to 500 single-family homes and Scenario 2 would allow up to 448 single-family homes and 72 apartments (total of 520 residential units).	EIR	08/04/2010
2008011027	Chandler Ranch/Rolling Hills Country Club Project Rolling Hills Estates, City of Rolling Hills Estates, Torrance--Los Angeles In brief summary, the proposed project consists of redeveloping/reusing the existing Chandler's facility and the adjacent Rolling Hills Country Club with the following: 114 single family homes (33.77 acres of residential lots), 113 of which would be within a new residential community; A reconfigured/relocated 18 hole golf course (151.86 acres); A new clubhouse complex (10.16 acres) that includes a 61,411 sf structure; and 3.9 acres set aside as natural open space. In addition to these uses, the proposed project includes: pocket parks and overlook lots within the residential community (1.39 acres); an internal network of residential streets (10.42 acres); maintained slopes (16.45 acres); and internal infrastructure improvements. For stability purposes, the proposed homes would be built on existing golf course land and the displaced portions of the golf course would be relocated atop the reclaimed Chandler's facility. 2009061051	Crane Valley Dam Seismic Upgrade Project Water Resources, Department of --Madera The project purpose is to increase dam safety to meet current standards for withstanding a Maximum Credible Earthquake (MCE) and passing the Probable Maximum Flood (PMF). The alternatives addressed in this EIR include Dam Strengthening with Rock Buttresses, Dam Strengthening with Cement Deep Soil Mixing, Dam Strengthening with Off-site Quarries, and No Project.	EIR	08/04/2010
2007041043	General Plan Amendment/Zone Change 06-1877: Bakersfield Commons Bakersfield, City of Bakersfield--Kern Final EIR The proposed Project includes an amendment to the Metropolitan Bakersfield General Plan Land Use Element and a concurrent zone change covering ~255 gross acres. The mixed-use Project would allow for ~1,400,000 sf of retail commercial, 600,000 sf of office commercial, 345 multi family dwelling units, and 80 single family homes. The project consists of an amendment to the Land Use Element of the Metropolitan Bakersfield General Plan and concurrent Zone Change covering ~255 gross acres. The central design feature is an upscale lifestyle retail center, restaurants, entertainment, and major tenants, in a walkable, highly-amenitized setting. The Project would also provide a network of landscaped bike trails and pedestrian walkways, creating ready access for vehicles, bicycles, and pedestrians. Preserving a predominantly pedestrian, outdoor-oriented sense of urban place that is linked to adjoining neighborhoods.	FIN	
2008121034	Taylor/Oak Trail Subdivision Monterey County --Monterey NOTE: Extended review to end on 8/5/10 The project consists of a vesting tentative subdivision map to subdivide 32.43 acres into 16 lots. The 16 lots are proposed to range in size from 1.0 to 4.36 acres. Pursuant to the development standards of the LDR/2.5 zoning district, site development shall not exceed a maximum gross density of 2.5 acres/units. The proposed 5 affordable units, qualifies the project for a density bonus, which would allow the development of 18 residential units on-site. Primary access would be provided via an existing connection to North Prunedale Road, i.e. Oak Trail Road, which will serve 13-market rate, lots. Oak Court will serve an ingress and egress for the five affordable units on lots 14 and 16. An emergency access road connects Oak Trail to Oak Court via a gate to provide access through the Prunedale Christian Academy/Calvary Community Church to North Prunedale Road.	MND	08/05/2010
2010061055	Clark Minor Subdivision at 8145 Messick Road, Salinas, California Monterey County --Monterey NOTE: Review per Lead The proposed project consists of an application for a minor subdivision of a 12.7 acre parcel into two, five-acre parcels (Parcels 1 and 2) and one 2.7 acre remainder lot at 8145 Messick Road, in the Prunedale area north of Salinas. Existing on the site is single-family residence and shed and residential build out is	MND	07/21/2010

	<p>expected on Parcels 1 and 2. The subdivision could result in the development of two single-family dwellings on new Parcels 1 and 2. No grading or development is proposed as part of the subdivision. Building and septic envelopes are shown on the tentative parcel map to delineate developable area, avoiding areas of sensitive environmental resources such as vegetation and slopes over 30%.</p> <p>Access to the site is from Messick Road, east of State Highway 101 Road, eight miles north of Salinas. A 30-foot wide road easement is proposed for access to the two new parcels. Water will be provided by private well with a small water system. Wastewater will be provided by a septic system on each parcel.</p>		
2010061057	<p>Skyline Minor Subdivision (4 Lots & Rem); Tentative Parcel Map, Administrative Permit and Boundary Adjustment with Certificate of Compliance San Diego County --San Diego</p> <p>The project is a minor subdivision to subdivide a 105.5 gross acre parcel into 4 lots plus a Remainder Parcel. The project site is located on Skyline Truck Trail in the Jamul-Dulzura Sub-regional Plan area within unincorporated San Diego County. The site is currently vacant. Access would be provided by a private road connecting to Skyline Truck Trail. The project would be served by on-site septic systems and groundwater. No extension of sewer or water utilities will be required by the project.</p>	MND	07/20/2010
2010061058	<p>Lewis Variance and Minor Use Permit San Luis Obispo County --San Luis Obispo NOTE: Review per Lead</p>	MND	07/21/2010
	<p>Request by Marshall Lewis for a Variance and Minor Use Permit to allow for the demolition of an existing single family residence, the relocation of an historic water tank, and construction of a new 5,300 sf two story residence with underground 2,812 sf garage. The project will result in the disturbance of approximately 3,500 sf of a 24,480 sf parcel. The applicant is requesting a Variance to allow the residence to be located within the front yard setback and to allow the driveway to be located within the bluff setback. The project is located at 709 Lucerne in Cayucos at the corner of Ocean Avenue, in the community of Cayucos, in the Estero planning area.</p>		
2010062058	<p>Red Sea Group Data Center Project 5101 Lafayette Street Santa Clara, City of San Jose--Santa Clara</p> <p>Architectural Review of the Renovation of an existing 27,165sf vacant building into a 27,021sf data center on a 1.4 acre developed property zoned for light industrial activities.</p>	MND	07/20/2010
2010061062	<p>Salton Sea Species Conservation Habitat (SCH) Project Resources Agency, The Calipatria--Imperial, Riverside</p> <p>The SCH Project would construct habitat configured in a series of interconnected shallow ponds at either the north or south ends of the Salton Sea, or in both areas. The Project size at total build-out is currently expected to be approximately 2,400 acres, which may be constructed over a period of several years. The actual total Project size may vary, and SCH ponds would vary in size. The Project's ponds would be created by constructing dikes below the elevation of -228' msl using material excavated from the Sea bed. Rivers would provide the primary source of</p>	NOP	07/20/2010

	water for the ponds. The SCH would be designed to manage salinity at varying ranges to maximize biological productivity and minimize adverse effects from water quality.		
2010062060	Klamath Hydroelectric Settlement Agreement & Klamath Basin Restoration Agreement Environmental Analysis Fish & Game #1 Yreka--Siskiyou, Humboldt, Del Norte The Klamath Hydroelectric Settlement Agreement (KHSA) lays out the process for additional studies, environmental review, and a decision by the Secretary of the Interior regarding whether removal of four dams owned by PacifiCorp: 1) will advance restoration of salmonid fisheries of the Klamath Basin; and 2) is in the public interest, which includes but is not limited to consideration of potential impacts on affected local communities and tribes. The four dams are Iron Gate, J.C. Boyle, Copco 1, and Copco 2 dams on the Klamath River. The KHSA includes provisions for the interim operation of the dams and the process to transfer, decommission, and remove the dams.	NOP	07/20/2010
2010032066	Napa 34 Holdings Commerce Center Use Permit and Variation to Development Standards Application No P09-00329-UP and TPM and LLA Application No P09-00330-TPM Napa County Napa--Napa NOTE:Recirculation Approval of a Use Permit to allow the construction and operation of an industrial park totaling ~490,500 sf of new development in 8 buildings, including: 1) two +/- 41,700 sf two story office buildings; 2) two +/- 7,600 sf single story office buildings with ancillary warehouse spaces; 3) one +/- 8,800 sf single story office building with ancillary warehouse space; and 4) +/- 152,600 sf, +/- 148,800 sf, and +/- 81,600 sf single story warehouse/distribution buildings with ancillary office space. Approximately 73% (or +/- 356,000 sf) of the total development floor area would be dedicated to warehousing uses, while the remaining 27% (or +/- 134,500 sf) would be utilized as office space. Access would be provided from three new driveways located off of an extension of Devlin Road, located south of the existing Devlin Road/Airport Boulevard intersection, and a single right-in right-out driveway off of Airport Boulevard. Roadway improvements, including road construction at Devlin Road and road widening at Airport Boulevard are also proposed. Parking for 740 vehicles is to be provided on-site, along with 6 loading docks. Approximately 3 acres of existing wetlands will be preserved and enhanced, partially as a component of proposed stormwater improvements. The project would connect to the City of American Canyon municipal water system and sewer service would be provided by the Napa Sanitation District, subsequent to annexation into the District.	Neg	07/20/2010

	sf chapel and an outdoor amphitheater area.		
2010061061	Conditional Use Permit No. LU10-0032 Ventura County Fillmore--Ventura CUP for temporary outdoor events in the form of 5 extreme cowboy races and 2 horse riding clinics. Seven events are proposed annually (14 days) on Saturday and Sunday during daylight hours.	Neg	07/20/2010
2010062057	U.P. #10-07, Royale Energy (Viola L. Jensen, Surface Owner) Tehama County --Tehama To establish a natural gas well, Ashbury, for production purposes in an EA-AP; Exclusive Agricultural-Agricultural Preserve Zoning District.	Neg	07/20/2010
2010062059	Second Street Berm Project, northern terminus of Second Street, Berkeley Berkeley, City of Berkeley--Alameda The City will install a temporary berm/levee along the south side of the high terrace adjacent to Codornices Creek from the eastern side of the terminus of Second Street to an existing high point approximately 255 to the west. The 175' of this structure will be an earthen, while 80' will be standard K-rails placed where space between the riparian corridor and the street is limited. The earthen berm will typically be 1' wide at the top and have 2:1 bank slopes throughout. The maximum elevation of the top of the earthen berm will be 11' (using NGVD datum) to match the general height of the upper terrace on the northern side of the creek. The berm will be constructed of approximately 115 cubic yards of clean soils on top of the existing valley-flat. The berm alignment will typically range from 5-20' from the existing riparian corridor and will allow for the existing footpath to remain usable to pedestrians in the area.	Neg	07/20/2010
1985022011	Camarillo Airport Master Plan Update Ventura County Camarillo--Ventura The 2009 Camarillo Airport Master Plan is an update to the 1996 Camarillo Airport Master Plan and proposes a number of potential physical improvements that will be undertaken as aviation demand warrants. The purpose of this updated plan is to establish an internal land use plan to support the development of general aviation uses at the airport.	NOD	
2003031024	Los Angeles Southwest College Facilities Master Plan Update Los Angeles Community College District --Los Angeles The Master Plan Update construct 6 new facilities, modernize 4 existing buildings and upgrade existing infrastructure. Infrastructure improvements include increasing electrical power, improving data lines and other infrastructure needed for the campus. Additional improvements would be made to signage, lighting, fire safety and security. The proposed project would also include the acquisition or lease of the Caltrans Site #16 for use as a renewable energy production site and as an additional campus entrance.	NOD

2010068200	Addition to existing water treatment plant Santa Barbara, City of Santa Barbara--Santa Barbara Addition of three new water treatment structures (total of 7,999sf of new enclosed structures) and the relocation of twelve parking spaces at the existing Cater Water Treatment Plant. The project will assist South Coast water agencies, including the City of Santa Barbara and the Montecito and Carpinteria Valley Water Districts, comply with more stringent US Environmental Protection Agencies regulations for potable water.	NOE	
2010068201	Multi Purpose Trail Santa Barbara, City of Santa Barbara--Santa Barbara The project would construct an eight to ten foot wide 690 foot long off-street multipurpose trail from the entry bridge to St. Vincent's on Calle Real to the existing trail at the intersection of Calle Real and Highway 154. The existing trail (approximately 1060 feet long) would be repaved and widened to 10 feet from the intersection of Calle Real and Highway 154 to the intersection of Verano Drive and La Colina Street. The total trail length of both segments would be approximately 1750 feet.	NOE	
2010068202	Launch Ramp Replacement Santa Barbara, City of Santa Barbara--Santa Barbara Proposal to replace approximately 10,000sf of existing concrete and install a new 800sf floating dock at the Santa Barbara Harbor launch ramp. The California Coastal Commission is the governing body for the Coastal Development Permit (CDP) for the project. The project requires a recommendation from the Community Development Director to the California Coastal Commission for the CDP.	NOE	
2010068203	Pavement Rehabilitation Project Caltrans #3 --Sacramento The scope of work includes: Grinding of existing pavement and replacing it with new pavement.	NOE	
2010068204	Woodbine Pedestrian Bridge Fish & Game #3 Danville--Contra Costa SAA # 1600-2010-0110-3 Replacement of an existing bridge over Green Valley Creek to address bank erosion. The project involves construction of a new 110-foot-long by 8-foot-wide pre-manufactured bridge for loads no heavier than a typical maintenance vehicle. The bridge will be fabricated off-site and placed onto new cast-in-place concrete abutments, placed above the top-of-bank to avoid future erosion. The new bridge will be constructed 100 feet east of the existing bridge to allow the existing bride to remain in operation during construction.	NOE

2010068206	Issuance of Lake or Streambed Alteration Agreement No. 1600-2010-0004+R1, Ridgetop Wall Van Duzen River Watershed Fish & Game #1 --Humboldt Excavate and install rock check dams and re-vegetate a drainage ditch on an unnamed tributary tot he Van Duzen River.	NOE	
2010068207	Bridge Deck Rehabilitation Project Caltrans #3 --Colusa, Glenn Project work includes: Place polyester concrete overlay on deck and approach/departure slabs (if any), construct AC pavement transition tapers adjacent to bridge decks (as concrete/slurry from bridge decks.	NOE	
2010068208	Pavement Rehabilitation Caltrans #3 --Sacramento The California Department of Transportation is proposing to conduct a pavement rehabilitation project. After the recent winter, the levee side slopes have continued to settle. This in turn has allowed the existing asphalt concrete (AC) on the highway travel way to drop. The project will result in a full lane width AC replacement that will grind down 0.25' of the damaged AC and replace it with new hot mix asphalt (HMA).	NOE	
2010068209	Chip Seal Overlay Project Caltrans #3 --El Dorado The scope of work includes: Apply seal coat (hot applied), 1/2 inch (chip seal); Apply flush coat over chip seal (fog seal); Repair localized asphalt concrete (AC) pavement failures (digouts); Apply fog seal on AC dikes and AC gutters; Remove and replace white pavement markups; Replace all delineations in kind.	NOE	
2010068210	Pavement Rehabilitation Project Caltrans #3 --El Dorado The Director's Order will result in a full lane width replacement asphalt concrete (AC) strategy that will grind down 0.25' of damaged AC and replace it with new hot mix asphalt (HMA). This strategy will provide a better riding surface for the public and reduce further damage to the existing road structural section.	NOE	
2010068211	Hot Mix Ashalt Overlay Project Caltrans #3 Chico--Butte The scope of work includes: A full lane width replacement asphalt concrete (AC) strategy that will grind down 0.15' of damaged AC and replace it with new hot mix asphalt. Existign road surface from edge of travel way (ETW) to ETW will be cold planed to a depth of approximately 0.15'. Striping and markers will be replaced, as needed.	NOE

2010068212	CEQA Notice of Exemption - Sutter Bypass DWR Pumping Plants Fish Screening Investigation Water Resources, Department of --Sutter Professional divers will install the velocity meters in the wet (culvert fully submerged). Velocity meters approximately 10 inches high, 4 inches wide, and 2.5 inches deep, will be installed anywhere from 10 to 20 feet inside the culverts. The meters will be fastened to the concrete culvert with either an environmentally safe epoxy called Splash Zone or by drilling threaded stainless steel bolts into the concrete to fasten the meter. Two-inch PVC pipe will be used to enclose the cables in the water to help guard against rodents. The PVC pipe will be fastened to the concrete culvert with the same method as the meters. The PVC pipe will lead out of the culvert and terminate into an existing 2-inch PVC pipe which is buried approximately 2 feet into the levee side slopes. Cables will then be pulled through the existing PVC pipe and terminate in the existing housing area located at the top of the levee. Minimal ground disturbance is expected.	NOE	
2010068213	Well #3 Juniper Riviera County Water District Apple Valley--San Bernardino Newly constructed - Well #3: To provide additional water production / fireflow protection to residents within the Juniper Riviera County Water District boundaries.	NOE

	actions necessary to complete a comprehensive bicycle and pedestrian network and encourage bicycling and walking region-wide. The BPP also lists potential bicycle and pedestrian projects, which are conceptual only, and will undergo their own environmental analysis prior to construction. The BPP meets state and federal requirements for bicycle and pedestrian planning.		
2010062064	Cypress Lawn Hillside Cemetery Expansion Colma, City of Colma--San Mateo NOTE: Shortened Review per Lead	MND	07/12/2010
	The project is a proposed 6.8 acre expansion of an existing cemetery to provide additional gravesites and formal gardens. It is currently a portion of the Cypress Golf Course, but has recently been purchased by Cypress Lawn Cemetery from Cypress Abbey Company. An asphalt-paved internal road, which starts at the terminus of Serramonte Boulevard, provides access for the existing cemetery's Hillside Campus and is proposed to continue as access into the proposed cemetery expansion. There would also be extensions and improvements to the existing storm drainage system as well as the removal and abandonment of some existing electrical, water, and storm water drainage systems. Electrical service will be extended into the proposed cemetery expansion for the operation of the irrigation system. The project does not include any buildings or structures that would be connected to the sanitary sewer; however, the project does include the extension of a sanitary sewer line, along with the internal roadway and other utilities, into the proposed expansion area. Underground waterproof concrete vaults, each large enough to accommodate a casket, will be installed for each burial plot. An existing asphalt path, which was part of the golf course improvements will be removed. Proposed site improvements include tree planting, lawn burials and formal estate gardens. The grading for the project includes 6,567 cubic yards of cut, and 19,509 cubic yards of fill which would require 14,893 cubic yards of fill imported to the site. The Project also includes the removal of 45 trees, 39 of which require a Town of Colma tree removal permit because of their size.		
2007031019	2002 21st Street Condominiums Project Santa Monica, City of Santa Monica--Los Angeles The proposed project involves demolition of all existing structures on the site and construction of a new two-story 21 unit condominium complex. Parking would be provided in a subterranean structure containing 21 private two car garages (42 parking stalls) and one handicap stall for residents.	NOP	07/21/2010
2010061063	TTM 17325/Coto de Caza Esatates Orange County --Orange The project applicant is proposing seven (7) single-family residential lots on the 127-acre "Hunt Club" property located within the Coto de Caza Specific Plan. In addition to the 7 single-family residential lots and extension of the access road and utilities, the applicant is also proposing a project design feature that includes the restoration of coastal sage habitat on-site and in nearby areas as compensation for the areas impacted by the grading necessary to extend the access road and to prepare the building pads for the proposed single-family residential development. Project implementation will require the approval of a Specific Plan Amendment and approval of a tentative tract map.	NOP	07/21/2010

The project includes off-site road improvements totaling .38 acres of site disturbance. Additional on-site improvements will result in the disturbance of approximately 10 acres of the 199 acre project area due to grading and construction for residential lots, road improvements, utility, water, and drainage improvements, and onsite wastewater management and water storage.	NOP	07/21/2010
2010061066	Haster Basin and Recreational Field Project Orange County Flood Control District Garden Grove--Orange The project consists of Basin storage enhancement to provide increased flood protection to surrounding neighborhoods and downstream areas by preventing the overtopping of the Basin during storm events. A new 460 cubic feet per second pump station would be located adjacent to the southwest corner of the Basin. Approximately 2.5 acres of the northeast portion of the Basin would be filled with excavated material. This fill would be covered with 24 inches of clean fill/topsoil and landscaped with grass to provide an active sports recreational area. The existing 44-space parking lot would be reconfigured and expanded to provide a total of approximately 80 spaces.	NOP	07/21/2010
2010061069	Hollister Urban Area Water and Wastewater Master Plan and Coordinated Water Supply and Treatment Plan San Benito County Water District --San Benito The comprehensive Program developed by the MOU Parties is intended to meet the existing and future water supply, domestic water treatment, wastewater treatment, and recycled water needs of the HUA through 2023. The HUA has a diverse and complex water supply system that includes groundwater, local rivers and creeks, imported surface water, and opportunities for recycled water use. The comprehensive Program includes water and wastewater treatment facility improvements, groundwater management and treatment projects, and water management actions. Facilities and actions associated with the Program may include new and upgraded water treatment facilities, new groundwater wells, demineralization of existing groundwater wells, groundwater banking, new water storage facilities, improvements to wastewater treatment and collection, and additional recycled water facilities. 	<p>some changes or additions are necessary to the previously certified Final Environmental Impact Report (Final EIR) to describe changes to the Discovery Center. The Final EIR for the Discovery Center was certified on January 20, 2010 (SCH 2006081154). The project as evaluated in the Final EIR and approved by the Authority included a lease and sublease of the approximately 11.21 acre project site from the County of Los Angeles to the Authority as part of the project. As described in the Final EIR, primary project features, including a 14,000sf interpretive center, parking lot, maintenance building, open air classroom, constructed riparian/wetland area, covered outdoor classroom, and connecting pathways, would be constructed on approximately 5 acres of the project site (construction impact area) within the 11.21 acre lease boundary. The balance of the site would be set aside for habitat preservation and restoration.</p> <p>This reconfiguration of the project site moves the maintenance building from its current location within Significant Ecological Area No. 42 and the Natural Area section of Whittier Narrows Recreation Area. The maintenance area will be relocated adjacent to and integrated with the main building at its eastern edge. The proposed relocation site is currently developed as the existing driveway for the Whittier Narrows Nature Center. The relocated maintenance building would be reduced in size and structurally integrated with the 14,000sf main building on the County-owned parcel on Durfee Avenue.</p>

The project primarily involves periodic excavation, land clearing, repair and maintenance of existing culvert structures and appurtenances, fire hazard clearing, and vegetation removal to restore the basins to their original flood design capacity. Continued maintenance and excavation is needed at these facilities for the protection of the public and prevention of property damage and loss of life due to flooding. SAA #1600-2009-0098-R5</p>	NOE	
2010068226	<p>Issue Right of Entry Permit to Sacramento County for Weed Treatment Parks and Recreation, Department of --Sacramento</p> <p>Issue a temporary right of entry permit to Sacramento County Regional Parks to allow the County to perform herbicide treatment on four invasive exotic plant species through June 20, 2011 at Folsom Lake State Recreation Area (SRA) to preserve native vegetation within the park. The County will apply herbicide using backpack sprayers and work under the direction of the State Parks District Environmental Scientist.</p>	NOE	
2010068227	<p>Rocky Point - Smithport Slip Lining Project No. 048 Lake Arrowhead Community Services District --San Bernardino</p> <p>The project under consideration is the rehabilitation of existing aging wastewater collection system pipeline in an existing sewer easement on the south and north shore of Lake Arrowhead. The project would rehabilitate by slip lining approximately 13,400 linear feet of pipeline which is more than 50 years old to help reduce infiltration and inflow to the District's sewer system. The proposed project will increase reliability of sewer collection system.</p>	NOE	
2010068228	<p>Removal Action Workplan, Myrtle Street High School Campus, Sequoia Union High School District Toxic Substances Control, Department of --San Mateo</p> <p>Approval of a Removal Action Workplan (RAW) by the Department of Toxic Substances Control (DTSC) pursuant to Health & Safety Code, chapter 6.8 as submitted on May 11, 2010 by Cornerstone Earth Group. The RAW prepared in accordance with Health & Safety Code 25323.1 and 25356.1(h), focuses on excavation and removal to mitigate soils impacted with excessive levels of organochlorine pesticides (OCPs-mainly dichlorodiphenyltrichloroethane (DDT), dieldrin and chlordane) and lead onsite. The minimize human exposure to the identified chemicals of concern (COCs). The estimated volume of impacted soils is 1,600 cubic yards or approximately 200 truckloads. The cleanup levels for these COCs are 0.035 parts per million (ppm) for dieldrin, 0.43 ppm for chlordane and 80 ppm for lead based on the California Human Health Screening Level (CHHSL) for residential soil value established by the Office of Environmental Health Hazard Assessment; and, 1.0 ppm which is the Total Threshold Limit Concentration (TTLC) value for total DDT under California Code of Regulations, Title 22, section 66261.24(a)(2)(A).</p> <p>Project activities will commence in late June 2010 and are expected to take approximately four weeks to complete. Field work may be conducted intermittently throughout this period. Soil may be left on site for a short period of time until approval from the landfill is received, but not over 90 days.</p>	NOE

2010064004	Conversion of Existing Aero Club Runway to Emergency Helipad, Travis AFB U.S. Air Force Fairfield--Solano NOTE: Review Per Lead Construct an emergency helicopter landing pad on an existing Aero Club runway with a lighting system and pavement markings.	EA	07/16/2010
2007122033	Diamond Springs Parkway Project El Dorado County Diamond Springs--El Dorado El Dorado County's Department of Transportation (DOT) is proposing the construction of the Diamond Springs Parkway (Parkway or Project) to improve traffic circulation along Pleasant Valley Road and Missouri Flat Road, north of the Town of Diamond Springs. The Project is identified in the County General Plan (2004) and Circulation Map as a planned four-lane divided road and is part of DOT's 5-year Capital Improvement Plan (CIP). DOT currently anticipates phasing construction of the Parkway in two major phases. Under the first phase, the Parkway would be constructed as a 2-lane arterial. The second phase would require widening the Parkway to a four-lane, divided arterial with an ultimate ROW of 100 feet. The Parkway would also require improvements to Diamond Road (SR-49), from just north of the Parkway, south to Pleasant Valley Road.	EIR	08/06/2010
2008101091	EIR 06-07 JLB. Liberty Energy Center Biofuels Gasification Project by Liberty Composting, Inc. (PP07211) Kern County --Kern The proposed project would allow for the development and operation of a gasification project as part of the existing Liberty composting operation (conditional use permit (CUP) 5, Map 28). The proposed project will add a gasification facility that could gasify 657,000 tons of feedstock in three bubbling fluidized bed reactors fitted with heat recovery boilers producing steam used to drive three steam turbine generators, each producing 6.5 megawatts (MW) gross of electricity, for a total of ~19.5 MW gross of renewable electricity. Approval of a Tentative Parcel Map 11974 would in the future, divide the property into two separate parcels. In addition to the Parcel Map, the requested entitlements include a modification of Liberty's current CUP 5, Map 28 and a revision to Liberty's existing Solid Waste Facility Permit #15-AA-0287 for the LCI composting	EIR	08/06/2010

	operation to include the proposed project as a Large Volume Transfer/Processing Facility. An amendment to the Kern County Nondisposal Facility Element will also be needed to include this gasification project along with the existing composting facility.		
2009112054	Moraga Canyon Sports Fields Piedmont, City of Piedmont--Alameda Review per Lead	EIR	08/09/2010
	The project entails modification at the Coaches Field and Blair Park sites, located on opposite sides of Moraga Avenue at Red Rock Road. The City proposes to install lighting and artificial turf at the existing 1.9-acre Coaches Field site. The approximately 5.6-acre Blair Park site, located across the street from Coaches Field on the south side of Moraga Avenue, would be developed with two new youth sports fields, one approximately 150 feet by 300 feet and the other 75 feet by 150 feet. Blair park improvements would include ancillary structures (e.g., spectator bleachers and concession and restroom facilities), landscaping, 4 driveways for vehicle ingress and egress, and 40 parking spaces to accommodate the new facilities. A pedestrian bridge spanning Moraga Avenue would be constructed to connect the two sites.		
2009051050	Monarch Santa Monica and La Brea Project West Hollywood, City of West Hollywood--Los Angeles	FIN	
	The proposed project is a mixed-use residential and commercial development that would contain 184 residential rental units, approximately 13,350 square feet of commercial space, at-grade parking, a 2 level subterranean parking garage, and recreation and open space amenities. The 6 story building would have a maximum height of 70 ft from adjacent grade to the roof structure, not including the additional height due to architectural features and projections. The proposed project includes several outdoor and indoor recreation amenities and open space areas for the exclusive use of project residents. Included in the proposed project's open space is an 8,360 sf private courtyard on the second floor with a 15 ft x 30 ft pool surrounded by decking, cabanas, lawn and heavily landscaped areas; a 4,140 sf clubhouse on the 4th level; and a 4,400 sf rooftop garden which would provide an outdoor lounge area. Additional recreational amenities include a 3,875 sf clubhouse and a 2,778 sf exercise room and media room. Combined, the project proposes a total of 16,448 sf of common space for the use of residents. Additionally, the project proposes a total of 7,440 sf of private outdoor open space (i.e., balconies).		
2009051051	Monarch Fountain and La Brea Project West Hollywood, City of West Hollywood--Los Angeles	FIN	
	The proposed project is a mixed-use residential and commercial development that would contain 187 residential rental units, approximately 19,559 square feet of commercial space, at-grade parking, a 2 level subterranean parking garage, and recreation and open space amenities. The 6 story building would have a maximum height of 70 ft from adjacent grade to the roof structure, not including the additional height due to architectural features and projections. The proposed project would include several outdoor pedestrian plaza for visitors of the retail and restaurant uses. Three private courtyards would be provided by the project consisting of one 5,083 sf courtyard on the second/third floor, one 8,012 sf

	concrete slab bridge. The new bridge will span approximately 40 ft across Handy Creek; the bridge depth will be approximately 9.5 ft. The channel invert will be widened to a width of 18 ft. (for a total proposed width of 30 ft.) under the new bridge and also 20 ft upstream and downstream of the new bridge. The proposed invert excavation depth is 1ft. This portion of the widened invert will be lined with a new concrete invert slab. Riprap will be placed within the channel invert to a depth of 3ft for 30ft upstream and downstream of the new concrete invert slab. Project activities will result in excavation of approximately 1,704 cy of material and import of approximately 333 cy of new rip rap material.		
2010061075	Lower Valley Irrigation System Expansion Project Coachella Valley Water District --Riverside The Lower Coachella Valley Irrigation System Extension Project entails the ~2.9 mile extension of an irrigation pipeline, Lateral 97.0-4.3, from its current terminus near Avenue 65, south to Avenue 68 along Buchanan Street, and then easterly along Avenue 68 for ~4,000 lineal ft. The project involves the installation of 8,600 lineal ft of 30 inch pipe, 1,560 lineal ft of 24 inch pipe, 2,700 lineal ft of 18 inch pipe, and 2,670 lineal ft of 12 inch pipe, to serve Coachella Canal water (Colorado River water) to 4 landowners representing 753 acres of land within Improvement District No. 1 who are currently pumping groundwater. The project involves 56 lineal ft of a 48 inch bore under Avenue 66 (State Highway 195), and 263 lineal ft of 48 inch bore under State Highway 86S. All of the pipeline proposed will be made of polyvinyl chloride (PVC).	MND	07/22/2010
2010061076	Sanitary Sewer Outfall Main Pipeline Replacement Project Holtville, City of Holtville--Imperial The City of Holtville owns and operates its Wastewater Treatment Plant and provides wastewater collection and treatment services to its residents and the immediate areas outside the incorporated boundaries. The proposed action is to replace the existing Sanitary Sewer Outfall Main Pipeline, a raw wastewater pipeline that transports wastewater to the City's WWTP. The pipeline stretches ~3.2 miles between the City of Holtville Wastewater Treatment Plant and the Holtville City Limits.	MND	07/22/2010
2008051112	21000 and 21100 Seaboard Road Malibu, City of Malibu--Los Angeles The proposed project includes a lot line adjustment to reconfigure the property lines of four existing legal lots. The existing lot areas are 4.08 acres (Lot 1), 1.03 acres (Lot 2), 4.22 acres (Lot 3) and 22.81 acres (Lot 4). The lot areas as a result of the lot line adjustment will be 7.6 acres (Lot A), 1.3 acres (Lot B), 20.0 acres (Lot C), and 2.6 acres (Lot D).	NOP	07/22/2010

2010064005	Tule River Rancheria, Fee-to-Trust, Porterville Airpark Bureau of Indian Affairs Porterville--Tulare NOTE: Review Per Lead Trust Conveyance and continued development of property for light industrial purposes.	EA	07/23/2010
2008032037	800 Presidio Avenue Mixed-Use Project San Francisco, City and County of San Francisco--San Francisco The project sponsors, Booker T. Washington Community Services Center in association with the San Francisco Mayor's Office of Housing, propose to demolish the existing 12,600 sf Booker T. Washington Community Center building at 800 Presidio Avenue (Assessor's Block 1073, Lot 13), and construct a mixed-use structure which would replace and enlarge the community/recreation center and include new residential units. The project would encompass ~70,000 sf of space on 6 levels, 5 above grade and one below at a height of 55 ft along Presidio Avenue. The roughly 19,000 sf community center space would accommodate the center's current and future programs and would also include a gymnasium, meeting space, and several classrooms. The project would include 47 residential units in a mix of unit sizes, half of which would be designated below market rate (BMR) rental housing for emancipated foster youth and the other half BMR units available to both individuals and families. The project proposes 22 parking spaces in a basement garage accessible from a proposed curb cut on Sutter Street. The subject property is within an RM-1 Zoning District and a 40-X Height and Bulk District. The sponsor seeks to amend the Planning Code by establishing a "Presidio-Sutter Special Use District" (SUD) to modify building height and bulk, density, off-street parking, rear yard configuration, and open space requirements. The proposed SUD would necessitate text and map amendments (rezoning), which would require approval by the Board of Supervisors.	EIR	08/09/2010
2001042086	Bohemia Retail Project Placer County Auburn--Placer NOTE: Erratum to the Final EIR The proposed project would be constructed as a single-phase retail development consisting of an approximately 155,000 square-foot building on 18.62 acres. The project could include an outdoor garden center and fueling area depending on the end user(s). The improvements would include new underground utilities, paving, parking, lighting, and landscaping. The proposed parking design requirements, circulation and landscaping would conform to Placer County standards as contained in the Placer County Design Guidelines Manual and the Auburn/Bowman Community Plan. The proposed parking lot would include 717 standard parking stalls, 17 Handicap (HC) accessible spaces, and two van accessible stalls. Cart corrals would be used in the parking lot. For public safety purposes, the project includes installation of perimeter fencing. In addition, portions of the site adjacent to the existing railroad, canals, and the PG&E corporation yard, will be either walled or fenced. A wood fence would be constructed along the northern property line, adjacent to existing residences, and a solid masonry wall would be constructed along the eastern boundary of the sites,	FIN

	adjacent to Canal Street. An underground detention pond is proposed in the northwestern portion of the site.		
2008074004	North Area Right-of-Way Maintenance Project U.S. Department of Energy -- Western is proposing various operation and maintenance procedures for its existing North Area electrical transmission line infrastructure, rights-of-way, communication facilities, and access roads. The project area extends from just north of the Oregon-California border, south to San Joaquin County, California and traverses 15 counties between. Proposed operation and maintenance activities include, but are not limited to, facility inspection/repair, vegetation management, and equipment upgrades.	FIN	
2009041096	City of Yucaipa Housing Element Implementation Program Yucaipa, City of Yucaipa--San Bernardino The proposed project will identify and rezone a minimum of 19 acres of land (one or more of Sites 1-3) for multifamily development "as-of-right." This component also includes the creation of a new land use district (RM-24 - Multiple Residential, 24 units per acre maximum) in the Development Code with corresponding development standards. Additionally, the project includes amendments to the Development Code to: add density bonus provisions to the Development Code to comply with the current provisions of State law; revise the Development Code to establish appropriate locations and development standards for Single-Room Occupancies (SROs); adopt a Reasonable Accommodation Ordinance which would require the City to remove constraints and make reasonable accommodation for housing occupied by persons with disabilities; and to establish the Service Commercial (CS) land use district as the location for emergency shelter development "as-of-right". The project also includes amendments to the Development Code that incorporate regulations for inclusionary housing (mandating that at least 15% of new housing constructed in redevelopment project area be affordable to low-income and moderate-income households).	FIN	
2010061077	Golden State Water Company - Ojai San Antonio 0.5 MG Reservoir Project Public Health, Department of Ojai--Ventura The Golden State Water Company-Ojai proposes to remove the existing 50,000 gallon forebay at the San Antonio Treatment Plant. A new 0.5 million gallon reservoir will be built at the same location, to provide adequate storage for peak day demand and fire flow. Once the project is approved, the California Department of Public Health will issue a permit to operate the new storage facility.	MND	07/23/2010
2010061078	Grover Beach Bicycle Master Plan Grover Beach, City of --San Luis Obispo The Bicycle Master Plan will facilitate implementation of the city bikeway network. The plan inventories existing facility, sets of goals & policies, identifies bikeway improvement projects, priorities & cost.	MND	07/23/2010

2010061079	Lekai Vesting Parcel Map and Conditional Use Permit / SUB2008-00046 San Luis Obispo County --San Luis Obispo Request by Lekai Properties for a Conditional Use Permit and concurrent Vesting Tentative Parcel Map to: 1) subdivide an existing 2.85 acre parcel into 6 parcels ranging in size from 9.021 sf up to 19,475 sf for development of a retail center; and 2) construction on the resulting parcels of 5 buildings of ~3,065 sf, 3,128 sf, 4,576 sf, 4,964 sf, and 5,145 sf, parking for 99 vehicles, grading, and landscaping. The remainder of the property would remain as private open space. The project will result in the disturbance of ~2.3 acres on a 2.85 acre parcel. The project includes abandonment of Ag Hill Road that terminates at the Cal Trans Right-of-Way along Highway 101.	MND	07/23/2010
2010061080	Morris Dam and Reservoir Post Fire Sediment Removal Project Los Angeles County Flood Control District Azusa--Los Angeles NOTE: Review Per Lead The proposed project is to remove 836,000 cy of post-fire debris from Morris Reservoir. The project will remove sediment deposited during the 2009-2010 winter storms. The sediment removal would be accomplished by dewatering the reservoir and then mechanically agitating the sediment into a low flow, sluicing channel. The sediment will be flushed from the Morris Dam through the San Gabriel River to Santa Fe Dam. The proposed cleanout will remove one Design Debris Event, which will keep the reservoir in compliance with capacity standards required for both flood protection and water conservation needs of the communities below.	MND	07/26/2010
2010061082	Dunlap Channel Improvement Project Yucaipa, City of Yucaipa--San Bernardino Installation of an underground storm drain within Yucaipa Blvd right-of-way and connection of the storm drain to the Dunlap Channel, an existing earthen channel that is located 300 ft west of 14th St. The storage capacity of 2 existing footprints, and the existing Dunlap Channel will be graded to accommodate a series of flow-through and flow-by detention basins along the entire reach of the channel. Existing low water crossings on the Dunlap Channel will be improved to accommodate the additional basins. A total of 57,500 cy of soil would be exported to several fill sites located in the City of Yucaipa.	MND	07/23/2010
2010062070	O'Hara Avenue Widening CIP Project # 96 Oakley, City of Oakley--Contra Costa The project consists of the widening of O'Hara Avenue to a 4 lane divided roadway with a median, from Laurel Road to Covered Wagon Drive. In addition to road widening, the project includes traffic signal modifications, relocation of utilities, drainage systems, and a landscaped median.	MND	07/23/2010
2010061081	Santa Paula Rock, Gravel, and Sand LLC Conditional Use Permit (10-CUP-01) Santa Paula, City of Santa Paula--Ventura The proposed project involves the stockpiling, crushing, washing, recycling, sorting, processing, and selling of rock, gravel, and sand and recyclable building materials including masonry products, base, asphalt, and concrete on a vacant	NOP	07/23/2010

2007011136	<p>Palomar Community College - North Education Center, Facilities Master Plan Palomar Community College District Fallbrook--San Diego</p> <p>The California Department of Fish and Game is issuing an Agreement regarding the Stream Alteration to the project applicant, Palomar Community College District. The applicant will develop areas on- and off-site. Actions proposed on-site include the development of classrooms, administrative buildings, parking lots, other facilities and outdoor recreational space and athletic fields. Off-site actions proposed include a borrow pit for soil extraction, extending water and sewer lines, road construction at the Old Highway 395/Stewart Canyon Road and Canonito Drive intersection, and the creation of Horse Ranch Creek Road. Future construction of physical structures on the Project site would be constructed in two phases. Initial development, Phase 1, would consist of approximately 75,000 to 150,000sf of development and related parking, and would include initial Project opening (approximately 40 percent of Project buildout or 3,400 enrolled students). The second phase, Phase II, would include to Project buildout, with a maximum student population of 8,500 students. Development of the Project site would be phased over several decades, with an estimated total building square footage of approximately 380,000sf. Project buildout is anticipated to occur around the year 2030.</p>	NOD

2010062072	Downriver Public Safety Facility Trinity County --Trinity This will be a 2,880sf metal building to house the Downriver Volunteer Fire Company vehicles and equipment as well as kitchen and bath facilities. A well and septic in addition to minor trenching for power hookups to poll adjacent to property are included in the project. It will be built on 1.0 acre of donated land.	EA	07/26/2010
2006041150	Downtown Addition Specific Plan King City King City--Monterey The Downtown Addition Specific Plan ("DASP"), including associated entitlements, authorizing the phased construction, use, occupancy and habitation of: (1) up to 650 dwelling units in various configurations of attached and detached forms; (2) up to 190,060sf of commercial space; and (3) 23.99 acres of open space and parks; and (4) associated public improvements and infrastructure.	EIR	08/09/2010
2009091124	City of West Hollywood General Plan Update West Hollywood, City of West Hollywood--Los Angeles The proposed project analyzed in the EIR is the adoption and implementation of the West Hollywood General Plan and associated Climate Action Plan. The West Hollywood General Plan serves as a blueprint/policy guide for determining the appropriate physical development and character of the City and establishes an overall development capacity. As an implementation action to the goals and policies within the General Plan, the Climate Action Plan (CAP) includes measures intended to reduce greenhouse gas emissions within City operations and the community at-large.	EIR	08/09/2010
2007031146	Granite Mine Expansion Project Twentynine Palms, City of Twentynine Palms--San Bernardino The proposed project would expand the Twentynin Palms Sand and Gravel Surface Mining Facility from 113.5 acres to 469.5 acres. The proposed project affects 356 acres and includes a request for a General Plan Amendment and rezoning of 320 acres from RL 2.5, Rural Living, to CI, Community Industrial. Approximately 1/2 of the project site (178 acres) would be actively mined incrementally in planned phases, while the other half would be set aside for permanent wildlife habitat conservation. Mining currently takes place at the existing facility at an estimated annual rate of 330,000 tons per year and would increase to 450,000 tons per year by mining the additional 178 acres. Reclamation would be unirrigated open space, retention basin for flood control and habitat. The project requires a Statutory Development Agreement, Conditional Use Permit, and Reclamation Plan.	FIN

<u>Documents Received on Friday, June 25, 2010</u>			
2010061083	Eurus Energy Borrego Land LLC San Diego County --San Diego The project is two Major Use Permits to authorize a Major Impact Utility Pursuant to Section 1350 of the Zoning Ordinance. The project consists of two Unmanned Photovoltaic Solar Frams (35-40 MW total), two-69Kv transmission line alternatives, and improvements to the Borrego Springs 69kV Substation, which is owned and operated by SDG&E.	MND	07/26/2010
2010061085	San Bernardino Supply Line Replacement Riverside, City of Colton, Grand Terrace--San Bernardino NOTE: Shortened review ending on July 14, 2010. The project is the replacement of an existing, failing 42-inch underground potable water pipeline with a new 48-inch pipeline in an adjacent, disturbed alignment. The existing and proposed pipelines are City of Riverside Public Utilities infrastructure. The project alignment would pass through the cities of Colton and Grand Terrace, in the County of San Bernardino. Total length of the proposed alignment would be approximately 6,600 feet or 1.25 miles. The existing pipeline, which was built in 1926, requires immediate replacement due to several recent leaks, likely caused by seismic activity in the region, and age of the infrastructure. The proposed pipeline would be constructed via trench and jack and bore construction methods along existing paved public rights-of-way and an existing Riverside Public Utilities easement.	MND	07/14/2010
2010062071	Ash Creek Wildlife Area Restoration Fish & Game #1 --Lassen, Modoc The Ash Creek Wildlife Area (ACWA) provides important habitat for a variety of biological species and is one of the major nesting areas for the State threatened greater sandhill crane. Existing habitat and natural resources along Ash Creek and its associated floodplain are degraded and continue to degrade due to a variety of past management practices which occurred prior to the State's purchase of the property. A proven restoration method, known as the "pong-and-plug" technique, is proposed to restore approximately 3,500 acres on the ACWA by allowing flood flows access to the floodplain.	MND	07/26/2010
2010062073	Three Trails Project Gilroy, City of Gilroy--Santa Clara The project is the construction and use of three segments of bicycle/pedestrian trails (referred to as the "Uvas Creek Trail", the "Lions Creek Parkway Trail", and the "Wren to Kern Trail") within the City of Gilroy. The Uvas Creek Trail would extend approximately 5,280 feet adjacent to and south of Uvas Creek east of Santa Teresa and north of Grenache Way. The Wren to Kern Trail would extend approximately 1,650 feet from Wren Avenue to Kern Avenue, crossing under kern Avenue. The Wren to Kern trail would connect (at its eastern end) to the western end of the Lions Creek Parkway Trail which would extend the trail east along Lions Creek, crossing one of the creeks/channels and then would turn north along the east side of the Llagas Creek to Farrell Avenue. 2010062074	Seepage Repair at Reclamation District 404, San Joaquin River, River Mile 42.1 to 42.3 Right Bank Water Resources, Department of Stockton--San Joaquin DWR is proposing to remediate seepage by constructing a cement-bentonite slurry wall through the existing levee that protects an urban residential area and State Highway 4 near the Garwood Bridge where it crosses the San Joaquin River. This proposed construction completes the repair of a critical erosion site at RM 43.2R. Waterside erosion was repaired in 2008. The levee crown would be temporarily degraded down 3 feet to provide a more stable platform for slurry wall construction. A 2-foot-wide cement-bentonite slurry wall would be constructed at the levee crown midline to an average depth of 40 feet. The crown would be then rebuilt and the crown road resurfaced. No excavation would occur in the channel and construction would occur only from the landside.	MND	07/26/2010
1999072038	2010 Nevada County Regional Transportation Plan Nevada County Transportation Commission Nevada City--Nevada NOTE: Supplemental The RTP proposes actions to increase the efficiency and effectiveness of the transportation system in addition to recommending selected capacity and operational improvements on state highways and other regional roadways. It also includes the provision of transit, rail, aviation, goods movement, bicycle and pedestrian facilities, transportation systems management, transportation safety and security, and intelligent transportation systems, and other improvements and measures to create a diversified and balanced transportation system, as well as, provide facility improvements that would improve traffic levels on streets and roads. The RTP aims to provide measures for accessibility and affordability to Nevada County's multi-modal transportation system with the most efficient use of transportation revenues possible. The RTP must include three elements: Policy Element, Action Element, and Financial Element.	NOP	07/26/2010
2010061084	Victor Valley Enterprise Zone Apple Valley, City of Adelanto, Victorville, Apple Valley--San Bernardino The project is a package of State and local incentives meant to stimulate business growth. The Enterprise Zone program seeks to support in general the development of industry and business in a manner only supported by existing City and County regulations and policies by stimulating business growth through the offering of tax incentives. The program does not target any specific type of commercial or industrial development, nor does it target any specific development project.	Neg	07/26/2010
2010061086	Farb Middle School Modernization Project San Diego Unified School District --San Diego The proposed project includes the modernization of the Farb Middle School campus in the City of San Diego. On November 4, 2008, the voters of San Diego passed Proposition S (Prop S), the San Diego School Repair and Safety Measure, a \$2.1 billion general obligation bond measure proposed to improve existing school facilities throughout San Diego. The bond program was developed to provide resource to repair, renovate, and revitalize deteriorating facilities at 181 existing neighborhood schools within the San Diego Unified School District (SDUSD). 	Middle School was built in 1979 and many of its facilities were identified through a comprehensive planning process as needing renovations, repairs, and/or upgrades as part of Prop S.		
2004061013	2010 Monterey Bay Area Metropolitan Transportation Association of Monterey Bay Area Governments --Santa Cruz, Monterey, San Benito The 2010 MTP is a multi-modal, financially constrained tri-regional transportation plan which expresses the current state of system planning for the Monterey Bay region. The 2010 MTP contains the programmed project lists and associated policies of the 2010 San Benito County RTP. The Council of San Benito County Governments adopted the 2010 San Benito County RTP on June 17, 2010.	NOD	
2004071097	F.E. Weymouth Filtration Plan Ozonation Facilities and Site Improvements Program Metropolitan Water District of Southern California La Verne--Los Angeles The project consists of modifications and upgrades to the existing Weymouth treatment plant 66-kV substation and associated electrical lines: 1) decrease in size the electrical substation facility; 2) increase the sub-transmission line route (an increase of approximately 500 linear feet over the previously stated 3,700 feet); 3) underground 400 feet of overhead distribution line and associated facilities; 4) install a new 80 foot tubular steel riser pole and two new 55 foot wooden poles, and replace an existing wooden pole with an 80 foot tubular steel riser pole and two new 55 foot wooden poles, and replace an existing wooden pole with an 80 foot steel rise pole; 5) install three new telecommunication lines to provide relay protection to the Weymouth substation.	NOD	
2005031158	San Jacinto Valley Regional Water Reclamation Facility Title 22 Tertiary Treatment Upgrade Eastern Municipal Water District San Jacinto--Riverside The SJVRWRF has a capacity of treat 11 million gallons per day (mgd) of municipal wastewater. The increasing influent strength experienced in recent years and the operations (Title 22) requirement to provide redundant capacity limits the effective overall reliable treatment to 7.5 mgd. The Project will improve and expand the SJVRWRF treatment capacity from 11 mgd to 14 mgd of tertiary effluent that meets future demands in compliance with regulatory requirements, water quality standards and accommodates current and projected future demand for wastewater treatment in the District's service area. The Project will include the following: 1) constructing new electrical and maintenance buildings, 2) improving an influent pump station, and 3) improving the head-works, primary treatment facilities, secondary treatment facilities, tertiary pump station, solids treatment system, power supply, and distribution facilities. All water discharged from the SJVRWRF will be delivered to the District's water recycling system for subsequent use.	NOD

	and construction of a noise abatement wall.		
2009102086	Approval of Sherwin-Williams Site Draft Remedial Action Plan Toxic Substances Control, Department of Emeryville--Alameda DTSC proposes to approve the Draft Remedial Action Plan (RAP) for the former Sherwin-Williams Company (S-W) Site located at 1450 Sherwin Avenue in Emeryville, CA. The Draft RAP proposes a cleanup plan for soil and groundwater containing chemicals in concentrations above Preliminary Remediation Goals (PRGs). The proposed cleanup activities include a combination of: excavation of unsaturated-zone soil; excavation of source area soil within the shallow groundwater; monitored natural attenuation of arsenic and volatile organic compounds (VOCs) within the shallow groundwater; groundwater monitoring; and Land Use Controls (LUCs).	NOD	
2009111038	State Route 91 Westbound Widening Project Caltrans #12 Anaheim, Fullerton--Orange Caltrans in cooperation with the Orange County Transportation Authority, proposes to widen westbound State Route 91 from State Route 57 to I-5 in the Cities of Anaheim and Fullerton, Orange County, CA. The project would add a fourth continuous general purpose lane within westbound SR-91 by connecting existing auxiliary lanes through interchanges, thus forming a continuous fourth lane from SR-57 (post mile [PM] 5.4) to I-5 (PM 0.9)	NOD	
2010022017	Hunters Point Power Plant Remediation Project Toxic Substances Control, Department of San Francisco--San Francisco Excavation and Offsite Disposal of Contaminated Soils and Backfilling Areas with Clean Fills--Soils onsite and divided into two categories: (a) soils contaminated by former power plant activities ("contaminated soil"); and (b) historic fill that was not contaminated by power plant activities, but that contains NOA and naturally occurring metals from local serpentinite deposits and other sources ("historic fill"). For contaminated soil, the Project would involve excavation and offsite disposal followed by backfilling with clean fill (comprised of uncontaminated excavation overburden or benching soils from onsite historic fill and/or serpentinite-free clean soil imported from offsite). Where benching will not be possible, excavations will be shored.	NOD	
2010031119	2008-2014 Housing Element Update (Case No. GPE P-2010038) Culver City Culver City--Los Angeles California State Government Code Section 65302(c) mandates that each city shall include a Housing Element in its General Plan and that the Housing Element be updated periodically to reflect current conditions and legal requirements as reflected in State and/or Federal housing laws. The California State Department of Housing and Community Development (HCD) is required to review the Housing Element Update for conformance with housing laws. The project referenced herein addresses this State mandate. The Housing Element is one of nine elements comprising the City of Culver City's General Plan, which is a comprehensive, long-term plan for the physical development of the City. The Housing Element specifically addresses the City's vision as it relates to housing. The 2008-2014 Housing Element is the City's guiding document in addressing new housing, rehabilitation of current housing, and preservation of existing affordable housing.	NOD

	time. The creek bank will be revegetated with local, native plant species. The Project will not affect any other live, native, mature trees or shrubs.		
2010068271	Stream Alteration Agreement No. 2009-0218-R4 Kern River Powerhouse Project on Kern River Fish & Game #4 Bakersfield--Kern Removal of one (1) native sycamore tree. Another sycamore tree will be trimmed. No additional riparian vegetation will be impacted. Removal of the "Old Stable" structure (i.e., wooden garage) adjacent to the lower access road (south entrance). Install a Hilfiker Welded Wire (gabion) retaining wall in the area where the sycamore tree and Old Stable will be removed. Existing rock rip rap will be removed to make room for the Hilfiker retaining wall.	NOE	
2010068272	Spanish Broom Removal Inland Empire Utilities Agency --San Bernardino In conjunction with the United States Forest Service (USFS), the Inland Empire Resource Conservation District (IERCD) is planning to remove Spanish Broom (Spartium junceum) on private and non-USFS lands.	NOE	
2010068273	2010 Pismo Beach Tree Contract Parks and Recreation, Department of Grover Beach--San Luis Obispo A general maintenance tree survey was performed at Oceano Dunes District - Pismo Beach State Parks: Oceano and North Beach Campgrounds; Monarch Grove; and OSSCRA Maintenance Yard. There are a total of two hundred fifty two trees that require: trimming, felling or evaluation (most likely removal). Of the total trees listed; one hundred eighty nine trees need trimming (disease, directional, dead or damaged limbs), and the remaining sixty three trees require felling (dead or dying). A licensed arborist will be contracted to perform the three work and all debris will be removed from the job site. Chips will be hauled to the Interpretive Trail chip pile. Heavy equipment may be necessary; chipper, hydraulic boom, etc. There are no significant impacts in any of the areas where the tree work will be done. Areas shall be secured as standard safety procedure during the duration of work.	NOE	
2010068274	Hazardous Tree Removal - 2010 Parks and Recreation, Department of Grover Beach--San Luis Obispo A general maintenance tree survey was performed at Oceano Dunes District- Pismo Beach State Parks. During the survey a total of seven trees were deemed Hazardous; as specified in the Department's-Tree Hazard Manual. Oceano Campgrounds: Five dead Monterey Pines will need to be Felled and only four of those to be Stump Ground; in North Beach Compground: Two Monterey Cypress' requires Trimming. A licensed Arborist will be contracted to perform all the tree work and remove all debris from the job site. Heavy equipment may be necessary; chipper, hydraulic boom, etc.; with proper accommodations (i.e. laying out plywood for soil protection) and proper use of equipment for the protection of natural, cultural and aesthetic resources and property will be in place prior to beginning work. Also, a resource staff will survey the work site (arch site, bird nest, legless lizards, etc.) prior to starting each days work and remain on site during the work day.	NOE

	inundation and road damage; 3) the installation of two new low water crossings within Mitchell Ravine and repair of one low water crossing at the confluence of Mitchell Ravine and Corral Hollow Creek to provide long-term access across these stream courses, and 4) the stabilization of a historic stockpile of waste rock that was deposited when the Hetch Hetchy pipeline shaft was dug, including restoration of the adjacent stream course, as feasible.		
2010062077	Las Tres Marles Estates 2004-138 Calaveras County --Calaveras A General Plan Amendment to change the land use designation of 103.66 acres from Agriculture Preserve (AP) to Future Single Family Residential (FSFR) and 5.10 acres from Agriculture Preserve (AP) to Residential Center (RC). A Zoning Amendment to change the zoning designation of 103.66 acres (APN 048-017-098, 048-017-103 & a portion of 048-017-112) from General Agriculture (A-1) to Residential Agriculture (RA). A 15 lot subdivision, with a minimum 5 acre parcel size. Thirteen of the lots would be between 5.0 and 5.5 acres, one lot would be 9.0 acres, and the largest and most northerly lot would encompass 26.57 acres, including an existing pond that would be preserved. The subdivision has been designed to preserve open space corridors that may serve as overland migration routes for the federally threatened California tiger salamander (CTS) (<i>Ambystoma californiense</i>). The development of each parcel by individual owners will be allowed only within the proposed building envelope created for each parcel. A Low-Effect Habitat Conservation Plan for CTS was prepared in consultation with the U.S. Fish and Wildlife Service and is currently under review by the Sacramento Fish and Wildlife Office.	MND	07/27/2010
2010062078	East Palo Alto Phoenix Academy San Mateo County East Palo Alto--San Mateo NOTE: Review Per Lead The proposed project is a charter school that would accommodate a maximum of 411 students from the 6th to 12th grade. The project would be constructed on two parcels in East Palo Alto, which are located at 1039 Garden Street and 1063 Garden Street. The project site is located in a residential area. The proposed project would involve ~37,353 sf of new building construction. Construction would include 4 two story buildings that would accommodate classrooms, science labs, specialty rooms and administrative space. The project also proposes a multipurpose building/gymnasium. Proposed site improvements also would include two parking areas, access and a drop-off lane, a quad area, and street frontage improvements.	MND	07/29/2010
2010062079	SMUD Nature Preserve Mitigation Bank Sacramento Municipal Utility District --Sacramento SMUD proposes to establish the SMUD Nature Preserve Mitigation Bank on ~1,132 acres of SMUD owned property located in southeastern Sacramento County (APN 140-0050-011, 013, 024, & -00060-011, 013). The Proposed Project will create a multispecies/multihabitat mitigation bank that provides for long term protection of special-status species and habitats found within SMUD's service territory (majority of Sacramento County and a portion of Placer County). Bank credits would be used to offset future unavoidable impacts to special-status species and their habitats, wetlands, and oak trees that could result from future	MND	07/27/2010

	agency-0approved projects. Elements of the Proposed Project will preserve, enhance, restore, and create wetlands and special-status wildlife and plant habitats and extinguish an existing onsite oil and gas lease.		
2010062080	Lime Ridge Landscape Repair Project Concord, City of Concord--Contra Costa The City of Concord is proposing to conduct slope stabilization on a hillside above Ygnacio Valley Road, within Lime Ridge Open Space. The primary project action includes re-grading 0.54 acres of hillside that has a high slide risk to encourage positive drainage and reduce the potential for future sliding. In addition, the City will replace a 6 inch plastic storm culvert and remove all plastic monofilament erosion control rolls and matting placed during previous slide repairs. The currently proposed project covered by this IS/MND is necessary to complete slide repairs in the area. The total project area, including an access road, stockpile area, and drainage repair, encompasses 1.41 acres.	MND	07/27/2010
2010062081	Brooks Mill Agriculture Timberland Conversion Forestry and Fire Protection, Department of --Modoc This project will convert 259 acres of timberland to grazing within an existing ranching operation and requires the approval of a Timber Conversion Permit and Timber Harvesting Plan by the lead agency, exempting the landowner from the stocking requirements of the Forest Practices Rules following timber harvesting.	MND	07/27/2010
2010062092	Berriman Ranch Project Grass Valley, City of Grass Valley--Nevada NOTE: Review per lead The project includes the following applications: 1) an annexation of 121 acres; 2) a rezoning of the 121 acres to RE; 3) a Planned Development for the design and site plan review; and, 4) a subdivision map to create 30 residential lots. No development is proposed on the remaining 111 acres.	MND	07/28/2010
2010061088	City of Hemet General Plan Update Hemet, City of Hemet--Riverside Comprehensive update of the City's General Plan. The Draft General Plan will consist of nine elements, or chapters, that together meet State Requirements for a general plan. These elements are: - Land Use - Community Design (optional element) - Community Mobility - Community Facilities and Services - Open Space and Conservation - Historic Resources (optional element) - Art, Culture and Recreation (optional element) - Public Safety (includes State required Noise Element) - Housing - The Draft General Plan will also include an Introduction chapter. The Draft General Plan represents the City's policy for determining the appropriate	NOP	07/27/2010

	physical development and character of the Hemet planning area, and establishes an overall future development capacity. The environmental impact analysis in the Program EIR will be based on the change between existing conditions and those associated with likely development in accordance with the 2030 General Plan horizon year, as well as at theoretical build out conditions.		
2010062082	Dry Creek Habitat Enhancement Demonstration Project Sonoma County Water Agency Healdsburg--Sonoma The Dry Creek Habitat Enhancement Demonstration Project would implement habitat enhancement projects at two to three areas within a one-mile section of Dry Creek near Lambert Bridge. The purpose of the project is to demonstrate to regulators, landowners, and local decision makers the feasibility of Dry Creek habitat enhancements on a smaller scale. The project is likely to include combinations of pool and riffle enhancements, off-channel backwater and alcove enhancements and/or creation, side-channel enhancements and stabilization of streambanks.	NOP	07/27/2010
2010062083	Milpitas Signs Milpitas, City of Milpitas--Santa Clara In coordination with the City of Milpitas Economic Development Department, the applicant is proposing to install up to three new or replacement signs along the I-880 freeway corridor in Milpitas. The three new signs are proposed to include electronic digital reader board of components. The signs are proposed to be similar in size to existing digital reader board signs located along other stretches of I-880 in the subregion. Top-of-sign heights of up to 70 ft, and maximum sign areas of 20 by 60 ft, are proposed.	NOP	
2010061089	Chino-Villa Park 22-kV and CEP "O" 115-kV Transmission Lines Tower Removal, Chino Hills State Park Parks and Recreation, Department of Chino Hills, Yorba Linda--San Bernardino, Orange This project will remove vacant transmission towers and conductor lines from Chino Hills State Park (CHSP) and one connecting portion in the Southern California Edison (SCE) Right of Way (ROW) within the City of Chino Hills, CA. The towers and lines to be removed are portions of the 115-kV "O" Line and Chino-Villa Park 220-kV line. A total of 40 transmission towers, portions of their foundations and vacant conductor lines are located in CHSP and two of these towers and associated foundations and vacant conductor lines are located in the SCE ROW outside of CHSP. 2010032031	805 Los Trancos Palo Alto, City of Palo Alto--Santa Clara Request by Mark Conroe on behalf of Langenskiold Family Trust for Site and Design Review of an 11,184sf single family home at 805 Los Trancos Road. Environmental Assessment: An Initial Study has been completed and a Draft Mitigated Negative Declaration has been prepared in accordance with California Environmental Quality Act (CEQA) requirements. Zone District: Open Space (OS).	NOD	
2010041037	Brookhurst Street Improvement Project Anaheim, City of Anaheim--Orange The project proposes to widen Brookhurst Street from a four-lane facility to a six-lane facility, including three northbound through lanes and two southbound through lanes transitioning to three southbound through lanes midway between Chanticleer Road and Cerritos Avenue. In order to accommodate the additional lanes in the northbound and southbound directions as well as the proposed bikeways, sidewalks, and landscaped areas, the project proposes to shift the roadway centerline between 4 and 20 feet to the east and widen the roadway right-of-way from 100 to 142 feet at its widest point. The project would require 23 full and 2 partial property acquisition totaling 179,145sf along the eastern side of the street within the City of Anaheim jurisdiction and 10 partial property acquisitions along the western side of Brookhurst Street, within the County of Orange and totaling 10,873sf.	NOD	
2010041098	Merced River Ranch Floodplain Restoration Project Fish & Game #4 --Merced The objectives of this restoration project are to rehabilitate and enhance channel, floodplain, and riparian ecosystem processes and critical habitats for juvenile and adult Chinook salmon and steelhead. The project consists of re-grading and rehabilitating ~6 acres of dredger tailings on the historic floodplain and ~5.5 acres of salmonid spawning habitat. Over a 5-year period, the floodplain will be graded and material from the floodplain will be screened to appropriate size classes and approximately 56,000 yd ³ of this material will be placed within the spawning channel.	NOD	
2010069022	Hillcrest Park Creek Repair Concord, City of Concord--Contra Costa The proposed Hillcrest Park Bank Stabilization Project would repair damage incurred during a December 2005, greater than 20-yr run-off event at Hillcrest Community Park in Concord, CA. The proposed project will demolish and repair a severely damaged bridge abutment, stabilize failed channel banks and in doing so protect a bicycle/pedestrian bridge, adjacent park trails, and water and electric utilities lines located at the site. Biotechnical bank stabilization methods such as native willow planted rock slopes and large woody debris (LWN) deflectors will be installed along channel banks to stabilize erosion areas and provide additional habitat complexity for aquatic species. The proposed actions will ensure continued public access and utilization of an important community park transportation corridor, and protect channel banks from further erosion.	NOD

2010068277	Line B - MTD 1548 Debris Basin Fish & Game #5 Santa Clarita--Los Angeles Alter a total of 2.10 acres within the four (4) basins covered by this Agreement to conduct routine on-going maintenance activities by mowing the vegetation to ensure the facilities function properly during the storm season and to comply with vector control requirements. The balance of the acreage to be mowed is ruderal vegetation. The typical maintenance regimen will be to mow in the late summer/fall to allow interim habitat value annually in the spring.	NOE	
2010068278	Hopper Creek Sediment Removal Project Fish & Game #5 --Ventura Caltrans intends to alter the streambed by conducting sediment and debris removal activities within Hopper Creek channel at the SR-126 Bridge Number 52-36 at Postmile 26.40. Removal will occur under the bridge and up to 100 feet above and below the bridge area. Excavation will be a depth of 10 feet and width of 90-120 feet. Excavations will occur outside the bird nesting season and when there is no water present. If excavations will occur when water is present, then a water diversion plan shall be implemented, which will include the relocation of any aquatic wildlife impacted by this activity and the implementation of sediment control devices. SAA #1600-2006-0228-R5.	NOE	
2010068279	Treatment of an Infestation of European Grapevine Moth (EGVM) in Fresno County Food and Agriculture, Department of Fresno--Fresno A biological control technique, called mating disruption, will be used to eradicate the EGVM in Fresno CA. The technique requires the deployment of pheromone-infused "twist tie dispensers" by ground. The dispensers are placed on shrubs, trees and objects such as fence posts in infested areas. The dispensers contain an odorless, synthetic pheromone (sexual attracting) that confuses the male moths, impairing their ability to find mates.	NOE	
2010068280	Lower De Laveaga Service Road Crossings 1 and 3 Santa Cruz County Resource Conservation District Capitola--Santa Cruz The purpose of this project is to improve water quality by reducing erosion and sediment loads from ephemeral streams which drain to the West Branch Arana Gulch. For crossings 1 and 3, project activities include stabilizing the outfalls and constructing a low maintenance conveyance system at the intersection of the road and the tributary channel. This will be accomplished by replacement of the existing culverts with an open channel design. Outfall stabilization at the crossing will be accomplished by creating boulder cascades which will transmit runoff from the road crossings down to a pool located at the terminus of the cascade.	NOE

2010062085	Gibson Canyon Road Improvement Project Solano County Vacaville--Solano The 1.27 mile-long road improvement project from 0.40 mile north of Pamela Lane to Cantelow Road consists, in general, of extending the existing pavement section from approximately 20-21 foot widths to a 24-foot pavement width to meet current County standards, constructing 4-foot earth shoulders, and overlaying the existing roadway. To enhance safety, a 0.30 mile section of Gibson Canyon Road from approximately 0.53 miles north of Pamela Lane to 0.30 miles north will be reconstructed to improve a substandard curve on the road. Other improvements include roadside drainage improvements, signing, striping, and erosion control. Utility poles will be relocated by the utility owners.	Neg	07/28/2010
2003071157	Harper Canyon / Encina Hills Subdivision RDEIR Monterey County Salinas, Monterey--Monterey The project applicant, Harper Canyon Realty, LLC has submitted to the Co. of Monterey Resource Management Agency - Planning Department an application for a Combined Development Permit (PLN000696) for a Vesting Tentative Map in order to subdivide land pursuant to the Subdivision Map Act and the Monterey Co. Subdivision Ordinance (Title 19). The proposed project includes the subdivision of 344 acres into 17 lots on 164 acres with one 180 acre remainder parcel. The residential lots would have an average density of one dwelling unit per 9.64 acres within the subdivided area, as lots would range in size from 5.13 acres to 23.42 acres. Improved lots would be sold individually for the construction of homes. The proposed project also includes Use Permits for grading on slopes greater than 30 percent and for the removal of 79 Coast Live Oak trees. The project site includes a 180 acre remainder parcel. The project applicant has committed to donating approx. 154 acres of the remainder parcel by deeding the property to the Monterey Co. Parks Department as an expansion of the adjacent Toro Park pursuant to Section 66458(a)(2) of the Subdivision Map Act. No development is proposed on the remaining 26 acres of the remainder parcel at this time.	Oth

NOE	
2010078002	Wickes Forest Industries Toxic Substances Control, Department of --Solano This project is the approval of a Removal Action Work Plan (RAW) by the Department of Toxic Substances Control (DTSC), prepared by URS Corporation for the Department. The selected alternative in the RAW proposes contaminated soil excavation, characterization, disposal, confirmation sampling, backfill, and long-term monitoring of groundwater to assess remedy performance. The selected remedial alternative proposes removal of the soil contaminated with arsenic and hexavalent chromium at levels that pose a significant threat to human health and the environment. The RAW identifies an arsenic cleanup standard in soil of 13mg/kg, to comply with future intended unrestricted land use scenario and for consistency with background concentrations. Groundwater goals in the RAW specify 10mg/L for both arsenic and hexavalent chromium, and 50 mg/L for total chromium based upon drinking water standards.	NOE
