STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**
(Formerly SCH NEWSLETTER)

June 16 – 30, 2012

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **June 16 – 30, 2012**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Director

CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

USPS:

State Clearinghouse
P.O. Box 3044
Sacramento, CA 95812-3044

OR

USPS/Courier Service / Hand Deliveries:

State Clearinghouse
1400 Tenth Street, Room 113
Sacramento, CA 95814

INFORMATION AVAILABLE ON-LINE

The 2011 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

Environmental Document Filings with the State Clearinghouse 1999-2011

All CEQA documents filed with the State Clearinghouse are available for viewing on the internet at www.ceqanet.ca.gov .

<u>Documents Received on Monday, June 18, 2012</u>			
2001112104	Big Basin Redwoods State Park General Plan Parks and Recreation, Department of --Santa Cruz The project is the General Plan for Big Basin Redwoods State Park that provides long-term guidelines for future proposed facilities, land use, resource management, operation, interpretation, and concession operations at the park. The General Plan and Draft EIR is the first tier of environmental analysis. Future implementation of general plan proposals may occur in phases as funding becomes available, and these proposals will be subject to additional project-specific environmental review.	EIR	08/01/2012
2010021041	GPA 00835, SP 00366, Change of Zone No. 07446, EIR No. 00523 and TPM No. 35872 Riverside County --Riverside The MR-628 LLC (project proponent) is proposing to implement a mixed use development on the Motte Lakeview Ranch, an approximate 639-acre site located within the community of Lakeview, an unincorporated area in western Riverside County. As presently proposed, the project proponent has prepared a draft Specific plan, the Motte Lakeview Ranch Specific Plan No. 366, that would allow conversion of the property to a mixed use development with residential, commercial, institution/education, park, and open space uses. To accomplish this, the project proponent has submitted applications seeking approval from the County for a General Plan Amendment, the SP 366 Specific Plan, a Change of Zone, a master Tentative Parcel Map and possibly a Community Facilities District to fund the required utility infrastructure systems for the project area. The existing General Plan Land Use designation within the Lakeview/Nuevo Area Plan of the Riverside County General Plan is identified as AG. The existing zoning designations are "Heavy Agricultural (A-2-10)" and "Light Agriculture (A-1-10)." These are proposed to be modified through a proposed General Plan Amendment and proposed Change of Zone.	EIR	08/01/2012
2012061065	Lloyd W. Michael Water Treatment Plant Regulatory Compliance Upgrade Project Cucamonga Valley Water District Rancho Cucamonga--San Bernardino The proposed project is the Cucamonga Valley Water District (District or CVWD) Lloyd W. Michael Water Treatment Plant (LWMWTP) regulatory compliance upgrade. CVWD provides water and sewer within its 47 square mile service area that includes the City of Rancho Cucamonga, portions of the cities of Upland, Ontario and Fontana, and some unincorporated areas of San Bernardino County. CVWD serves a population of over 186,000 customers with approximately 45,000 water connections and 35,000 sewer connections. The District's average daily water demand is approximately 50 million gallons per day.	MND	07/17/2012
2012062060	Altamont Winds Inc. Conditional Use Permit Modification Alameda County Livermore--Alameda The proposed project consists of operational modifications to 16 existing CUP for wind power operation and maintenance activities within the Alameda County portion of the APWRA. The project facilities consist of approximately 883 existing, operational wind turbines, with a nameplate capacity of 85.8 MW operating within	NOP	07/18/2012

	a 14,436.45-acre area, also including existing support facilities on approximately 155 acres. The Applicant is requesting modifications to the CUPs approved in 2005 that would accomplish the following: (1) Remove the requirement for phased decommissioning; (2) Remove the seasonal shutdown requirements; and (3) Provide for 100% of AWI's turbines be decommissioned by the end of 2015.		
2012062058	City-wide Zoning Code Revisions Colfax, City of Colfax--Placer The project proposes to amend the Colfax Zoning Code (Colfax Municipal Code Title 17) to correct inconsistencies in various sections of the Zoning Code, to streamline administrative review of certain applications of on-going uses, and to update procedures for various uses within the City. No zoning changes to properties within the City are included in these revisions.	Neg	07/17/2012
2012062059	General Plan Amendments to the East County Area Plan and Castro Valley General Plan Regarding Allowable Floor Area Ratios for Equine Breeding and Training Fac. Alameda County Dublin, Hayward, Livermore, Pleasanton--Alameda Amend two area plans, the East County Area Plan (ECAP) and the Castro Valley General Plan (CVGP), with regard to policies on allowable floor area ratios (FARs) for commercial equine breeding and training facilities. The proposed General Plan Amendments represent limited modifications that are deemed necessary for internal consistency within these Plans. State planning law requires city and county general plans to be internally consistent, and also allows each local agency to amend its general plan up to four times per year. The ECAP was adopted in 1994, amended by the County Board of Supervisors in 1996 and 1998, and again by the voter Initiative Ordinance Measure D in November of 2000. Measure D also amended the Castro Valley Plan, which was adopted in 1978, updated in 1985 and again in 2012 as the Castro Valley Plan.	Neg	07/17/2012
2002071070	Sakioka Farms Specific Plan Oxnard, City of Oxnard--Ventura 430-acre specific plan for up to 8.5 million square feet of commercial, business research, and light industrial uses within several planning areas between Rice Avenue, the 101 Freeway, and Del Norte Boulevard within the City of Oxnard: includes 1.5 acres for new fire station and approximately 42 acre for public streets: establishes architecture, landscape, and use guidelines and regulations; and adaptive management mitigation program incorporated in the plan allows for flexibility for best practices in storm water treatment and management, use of recycled water, and related mitigation actions. Agricultural uses may continue during phase development.	NOD	
2005081011	High School #5 Construction Salinas Union High School District Salinas--Monterey Construction of a new 1,500-student high school located on 38 acres owned by the Salinas Union High School District.	NOD

<u>Documents Received on Monday, June 18, 2012</u>			
2006081138	Atwater-Merced Expressway Merced County Association of Governments Atwater, Merced--Merced Construction and operation of an approximately 7-mile long, 4-lane expressway between the cities of Atwater and Merced in Merced County, California with new interchanges at Santa Fe Road and SR 99.	NOD	
2010072047	Lakeport Pacific Associates Lakeport, City of Lakeport--Lake The California Department of Fish and Game is executing Lake or Streambed Alteration Agreement number 1600-2012-0041-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, Pacific West Communities, Inc.	NOD	
2011091045	Citywide Pipeline Projects 2011 San Diego, City of San Diego--San Diego The California Department of Public Health (Department) is a responsible agency for this project. The Department's Safe Drinking Water State Revolving Fund Program is providing state funds for the project. The City of San Diego proposes to replace 3.9 miles of 16 inch cast iron pipeline, half-a-mile of an asbestos cement pipe that compromises of the Harbor Drive 1st and 2nd pipeline and two pressure reducing stations.	NOD	
2011121060	Durable Properties, Inc. Warehouse Building - DPA 870 & TPM 71454 Santa Fe Springs, City of Whittier--Los Angeles The proposed site measures approx. 3.87 acres and is located at the northwest corner of Greenleaf Avenue and los Nietos Road. USA Consolidators, Inc, is proposing to excavate the existing clay cup and oilfield waste material from the project site described above, subdivide the site into two separate parcels measuring 76,044sq ft (Parcel 1) and 92,682 sq ft (Parcel 2), respectively, and construct a 37,982 square foot concrete tilt-up warehouse building on Parcel A with Parcel b left in reserve for a future building once existing environmental conditions have been properly mitigated.	NOD	
2012041026	Wolcott Variance/Minor Use Permit / Coastal Development Permit San Luis Obispo County Cambria--San Luis Obispo Request by Michael & Lynne Wolcott for a Variance, Minor Use Permit and Coastal Development Permit to allow development on slopes in excess of 30%, including construction of a new 1,195 s.f. two story single family residence with attached garage and elevated driveway for cars to enter straight into the proposed garage off of Madison Street. The project will result in the disturbance of approximately 1,320 s.f. of a 2,997 s.f. parcel. The project also includes retaining walls which will stabilize the property along the north-eastern lot line (formerly Madison St. right of way).	NOD	
2012041035	595 Munras Monterey, City of Monterey--Monterey The project site is 17,950 s.f. in area and is located at the intersection of Munras Avenue and Webster Street. A 25' x 95' public utility easement exists along the property's northeastern edge. The easement area contains a walkway to the historic Robert Louis Stevenson house, various public utilities and vegetation.	NOD

<u>Documents Received on Monday, June 18, 2012</u>			
2012042040	I-680 at Sabereat Road Sewer Replacement Project Union Sanitary District Fremont--Alameda The Project is the installation of a new 990-foot-long sewer within a 48-inch diameter steel casing using the pipe jacking construction technique. The existing sewer line beneath I-680 has been affected by its crossing with the Hayward Fault.	NOD	
2009051003	Madison Water Well and Tank/Kaiser Water Well and Tank Greenfield County Water District Bakersfield--Kern The California Department of Public Health (CDPH) is a responsible agency for this project. The Department's, Safe Drinking Water State Revolving Fund Program is providing state funds for the project. The Greenfield County Water District proposes to evaluate the following alternative in the study: no action blending groundwater from existing wells District proposes to evaluate the following alternative in the study: no action blending groundwater from existing wells together to decrease arsenic levels; test the existing wells to see what portion of the aquifer is producing the pollutions; if good water quality is found, the water system would zone block off the areas of the quifer containing an arsenic contamination; drill, log, sample, and zone test wells to try to locate groundwater that is low in arrsenic and meets the state's MCL for arsenic; a new well will be drilled if acceptable water quality is found, pilot test water quality is found, pilot test water to determine what treatment process would be best suited to address and remedy the arsenic contamination problem.	NOE	
2012068243	Agreement 2012-0069-R4 - L38-205 Lerdo Highway Pressure Betterment, Shafter Fish & Game #4 Shafter--Kern A horizontal directional drill (HDD) under Calloway Canal will be implemented as part of a natural gas pressure betterment Project consisting of 11,000 feet of 8-inch high pressure underground gas line. An approximately 200-foot section of pipeline will be installed via horizontal directional drilling 5 feet below Calloway Canal. An entry pit and exit pit (5 feet by 5 feet by 5 feet each) will be dug on each side of Calloway Canal.	NOE	
2012068244	Issuance of NPDES General Permit for Drydock Operators Regional Water Quality Control Board, Region 2 (San Francisco Bay), Oakland --Alameda, Contra Costa, Marin, Napa, San Francisco, ... Issuance of NPDES general permit.	NOE	
2012068245	Agreement No. 2011-0214-R4; SAPCO Pipeline Repairs Project, Monterey County Fish & Game #4 --Monterey The Project will maintain an existing, 16-inch natural gas pipeline that traverses beneath two (2) unnamed, seasonal creeks, and one (1) under Wayland Creek, a perennial stream. Activities will consist of excavating an open trench to allow for inspection of the pipeline and conduct any necessary repairs to eliminate current or future leaks. Each site will be accessed using existing, dirt roads and the shortest possible route from the road to the work area.	NOE

2012068246	Tomales Bay Watershed Enhancement Program 2012 Marin Resource Conservation District --Marin Approval of projects for inclusion in the Marin Coastal Watersheds Permit Coordination Program. Proposed work includes improved animal trails, grade stabilization, removal of nonnatives and revegetation with native species, streambank protection, fencing, spring development, water troughs and tanks, access road repair, water control structures, grassed waterways, and channel stabilization.	NOE	
2012068247	06-0P6401 Culvert Reline Caltrans #6 --Madera Reline Culverts at 27 locations on State Route 145 by using the cure-in-place method.	NOE	
2012068248	Hesperia High School Restroom Buildings Hesperia Unified School District Hesperia--San Bernardino Add two (2) new restroom buildings to the existing football stadium at Hesperia High School. The new restrooms will better serve the students by replacing portable toilets and provide more permanent restroom facilities.	NOE	
2012068249	Mission Crest Elementary Portables 2012 Hesperia Unified School District Hesperia--San Bernardino Add two (2) portable classrooms at Mission Crest Elementary to relieve classroom size, providing students with a more conducive learning environment.	NOE	
2012068250	Reed Ranch Livestock Pond Restoration Alameda County Resource Conservation District --Alameda Work will consist of de-sedimentation, dam repair, and spillway repair of an existing livestock pond. The project designs will follow the Alameda County Conservation Partnership's wildlife-friendly pond specifications for improving habitat for the California red-legged frog (CRLF). Sediment will be removed using an excavator to scoop and move the material. The excavator will place the sediment into a dumptruck to be hauled to the spoil placement site. All removed sediment will be placed in an appropriate location so it will not re-enter the pond or waterways, as identified by a qualified biologist.	NOE	
2012068251	Exploratory Studies of Potential Environmental Issues with Alternative Energy Futures for California Energy Commission -- On December 21, 2011, staff, presented this project at the Lead Commissioner briefing and requested permission to have CIEE release the solicitation limited on University of California and California State University researchers. Staff promised at the briefing to inform the Commissioner of the solicitation results. At that time, funding for this proposed interagency agreement was approximately \$800,000. Because additional fiscal year 2010-2011 money was available, this amount has been increased to \$1,250,854.	NOE

<u>Documents Received on Monday, June 18, 2012</u>			
2012068252	Algae-based Treatment of Dairy Wastewater and Generation of Renewable Energy Energy Commission --San Diego The proposed project seeks to replace the traditional lagoon approach to waste treatment, and to employ an algae-based approach that will improve water quality as well as reliability, while generating a valuable biomass-based co-product. For the first stage of treatment, raw wastewater is transferred to an anaerobic pond system with a retention time of 7-14 days, depending on the waste strength. Biogas generated in the anaerobic pond will be piped through the algae ponds, cleaning the gas as the algae consume the carbon dioxide to enhance their growth. Biogas is then collected and stored in a floating gas storage tank for analysis and used to generate electricity. The effluent from the digester is then transferred to a raceway pond to begin the second treatment stage. The nutrient rich effluent provides an ideal medium for growing algae. During the day the algae present in the pond releases high levels of oxygen into the water through photosynthesis. The high level of oxygen transferred into the water allows aerobic bacteria to further breakdown the organic waste present in the water, while the robust growth of the algae depletes the water of pollution nutrients such as ammonia and phosphorus.	NOE	
2012068253	Replacement Well for Well #10 Needles, City of Needles--San Bernardino Remove Well No. 10 and Replace with Well No. 15; beneficiaries are customers of City of Needles water services.	NOE	
2012068254	SFE Mutual Water Company: New Well Project 2012 Tulare County --Tulare The SFE Mutual Water Company is meeting this obligation by developing a third well to provide a new source of water or to supplement or replace existing wells. Minor trenching on an existing easement and/or County right of way for electrical conduit and water pipe will occur. An initial 80 square foot pad will be cleared to accommodate well drilling equipment, then if the site is developed with a well, an additional 720 foot pad to accommodate four service vehicles will be constructed.	NOE	
2012068255	Schools Reconfiguration Program Waterford School District --Stanislaus Reconfiguration of student grade level distribution at the existing Richard M. Moon Primary School, Lucille Whitehead Intermediate School and Waterford Middle School sites. Students who would currently attend grade 3 at Lucille Whitehead Intermediate School will attend Richard M. Moon Primary School; students who would currently attend grade 6 at Waterford Middle School will attend Lucille Whitehead Intermediate School.	NOE	
2012068256	Fuel Cell Project California State University, San Marcos San Marcos--San Diego Install an 800kw Fuel Cell to augment the Central Plant facility.	NOE

2012041055	ENV-2011-2695-MND - 2-6 East Rose Avenue Los Angeles, City of --Los Angeles Republication due to change in project description. Mitigation measures are still the same.	MND	07/18/2012
2012062062	Kaiser Fish Screen Project Alameda County Water District Fremont--Alameda The Alameda County Water District proposes to implement the proposed project involves construction of a new diversion pipeline and cylindrical fish screen in order to abandon the existing unscreened pipeline. The replacement facility will be constructed about 530 feet downstream of the existing diversion pipe and 2,400 feet upstream of ACWD's Rubber Dam 1 where the UPRR and Bay Area Rapid Transit Bridges cross over Alameda Creek. The purpose of this action is to prevent fish in the vicinity of this diversion from being entrained into ACWD's groundwater recharge basins.	MND	07/18/2012
2012061066	Affordable Housing Land Use and Zoning Designation Project Diamond Bar, City of Diamond Bar--Los Angeles In 2011, the Diamond Bar City Council adopted its 2008-2014 Housing Element update, which was subsequently accepted by the California Department of Housing and Community Development (HCD). Implementation of the approved Housing Element requires that the City take several actions to bring its General Plan and Development Code in compliance with state laws addressing affordable housing. Specifically, the "Project" would involve amending the City's General Plan (including its Land Use Plan Map) and Development Code (Title 22 and including its associated Zoning Map) to establish a new multi-family residential development commensurate with the City's required housing obligation (per state law), including that area needed to accommodate provisions for lower-income housing. 2009082031	<p>Western SoMa Community Plan, Rezoning of Adjacent Parcels, and 350 Eighth Street Project San Francisco, City and County of San Francisco--San Francisco</p> <p>The EIR analyzes potential environmental effects associated with the implementation of the Proposed Project, which consists of the following three components: (1) adoption of the Western SoMa Community Plan (Draft Plan), a plan developed through a collaborative partnership among the Board of Supervisors- appointed Western SoMa Citizens Planning Task Force, consultants, the San Francisco Planning Department and the public and proposed as an element of the San Francisco General Plan; (2) the rezoning of 46 parcels proximate to the Draft Plan Area boundary in order to reconcile their use districts with those of the neighboring properties (Rezoning of Adjacent Parcels); and (3) development of a privately funded mixed-use project proposed at 350 Eighth Street (Block 3756, Lots 3 and 15) within the Western SoMa Community Plan Area (Draft Plan Area), consisting of approximately 444 dwelling units, approximately 33,650 sf of commercial space, approximately 8,150 sf of light industrial/artist space, and approximately 1,350 sf of community space. These three elements, in combination, make up the Proposed Project.</p>	EIR	08/03/2012
2012061072	<p>Climate Action Plan Santa Barbara, City of Santa Barbara--Santa Barbara Note: Ref SCH # 2009011031</p> <p>The Santa Barbara Climate Action Plan, June 2012 Draft, addresses climate change issues for the City of Santa Barbara in the period to the year 2030, per directives of the Santa Barbara General Plan, AB 32, and SB 375. The CAP provides an updated community greenhouse gas inventory and forecasts (refined from the initial work provided in the General Plan Program EIR), which demonstrate how the City will meet State AB 32 and SB 375 greenhouse gas emissions target for 2020 and 2035. The CAP identifies strategies for City government and communitywide greenhouse gas emissions reductions in the areas of energy efficiency, renewable energy, travel and land use, vegetation, waste reduction, and water conservation. Potential climate changes are identified (increased heat, reduced rainfall, sea level rise, etc.) and strategies identified to plan for adaptation to climate change in the areas of emergency preparedness and public health; wildfire, flooding; and water quality; coastal vulnerability; public services; biological resources; and local economies. The majority of strategies are from the General Plan update adopted December 2011.</p> <p>The Addendum to the Program EIR (SCH 2009011031 for General Plan update) documents reduced climate change effects based on refined analysis in the CAP. The Addendum together with the Program EIR constitute CEQA compliance for the Climate Action Plan.</p>	EIR	08/03/2012

	northwards towards Derby Lane to make the needed room. In doing so it will extend drainage culverts to the edge of the new pavement. Drainage ditches that the project will fill will be replaced with new ditches and culverts.		
2012042014	Carr Mine Mining Permit, Use Permit and Reclamation Plan (Project No. MIN11-0001) Butte County --Butte Phased mining and reclamation of a 39-acre site within three parcels totaling approximately 200 acres, located in a remote, mountainous region. Excavation of about 19 acres of undisturbed land will follow the subsurface extent of a paleochannel (the active mining area); phased reclamation is proposed for both the 19-acre active mining area and some 15 acres of existing surface disturbance resulting from past mining. All mining and reclamation activities will be complete within 15 years.	MND	07/20/2012
2012061071	Reclamation Plan #09-0002 Imperial County Holtville--Imperial The proposed "Project" includes a mining permit to extract sand and gravel and reclamation plan for restoration of the mining site back to its original condition of open space and/or recreation. The mining permit (BLM Plan for Operations) has been environmentally assessed per NEPA (EA#DOI-BLM-CA-D070-2011-0063-EA). Per CEQA, as lead Agency for State Mine and Reclamation Act (SMARA), we must analyze the entire project, which includes the mining operation as well as the reclamation of the site even though we do not issue the mining permit on federally owned land. Based on a Memorandum of Understanding (MOU dated October 1992) between Bureau of Land Management (BLM) and the State of CA, the "Plan of Operations" can be utilized as the mining permit as required by SMARA. The "Operator" Superior Ready Mix has completed the required federal approvals, which include "Plan of Operations" and the "Decision Record". The proposed sand and gravel operation consists of 43.8 acres of a 240 acre site. The Operator intends to extract 850,000 tons of material; for 10 years within seven phases. The Oat Pit (AKA East Highline) area has been mined for approximately 50 years by Imperial County Public Works Department and Caltrans, under the authority of a "Free Use Permit" issued by BLM. The proposed site is located approximately 8 miles from the City of Holtville.	MND	07/19/2012
2012062064	Transfer Station and Recycling Facility Master Plan Redding, City of Redding--Shasta The City of Redding is considering adoption of a new Facility Master Plan prepared by J.R. Miller and Associates for the Redding Transfer Facility and Recycling Station (RTRS). RTRS is managed by the City of Redding Solid Waste Utility (Utility), which provides comprehensive solid waste and recycling services to residences and business within the City. This includes full-collection services, operation of RTRS, and operation of the Shasta County-owned West Central Landfill located near Igo, CA. The Master Plan provides a comprehensive analysis and strategy for improving RTRS infrastructure needed to maintain cost-efficient solid waste services for the residences and business of the City over the next 20 years. The Master Plan considers current operations, the layout of the RTRS, and the availability of the	MND	07/20/2012

<u>Documents Received on Wednesday, June 20, 2012</u>			
2012061068	<p>undeveloped City-owned properties nearby for Facility improvement. The Master Plan also take into consideration trends and state legislation that affect the management of solid waste. A secondary benefit of the Master Plan is to help extend the lifespan of the West Central Landfill by decreasing the volume of waste the City disposes there.</p> <p>Silverado Power West Los Angeles County Los Angeles County Lancaster--Los Angeles Silverado Power, LLC (Silverado Power) is a utility scale solar photovoltaic (PV) developer proposing the development of six solar PV sites (referred to as the Overall Development) addressed in this EIR. The Overall Development is located in an area of the western Antelope Valley that was historically used for agricultural activities. Production and economic constraints led to the cessation of agricultural activities in the area, resulting in disturbed and vacant land. Silverado Power has located six SGFs on disturbed and vacant land throughout the western Antelope Valley.</p> <p>The Overall Development proposes to increase electricity generated from renewable technology by generating 172 MW of electrical energy from the sun. Recent legislation enacted in CA encourages the development of renewable energy resources to reduce reliance on fossil fuels, diversify energy portfolios, reduce greenhouse gas emissions, and assist creation of "green" jobs within the state of CA.</p> <p>The Overall Development proposes to assist CA in meeting the newly established Renewable Energy Portfolio Standards (RPS). Senate Bill 14 established RPS targets for CA, stating, "all retail sellers of electricity shall serve 33 percent of their load with renewable energy by 2020." State government agencies have been directed to take all appropriate actions to implement this target in all regulatory proceedings, including siting, permitting, and procurement for renewable energy power plants and transmission lines. The six sites qualify as an eligible renewable energy resource as defined by the CA Public Resources Code.</p>	NOP	07/19/2012
2012061069	<p>General Plan and Development Code Update Clovis, City of Clovis--Fresno</p> <p>The proposed project is an update to the City of Clovis General Plan and Development Code. The Clovis General Plan Update is intended to guide development within the Plan Area through 2035 and beyond, while the update to the Development Code is intended to consolidate and compile amendments adopted since the 1970s into a reorganized and reformatted document that also reflects changes to the General Plan. The General Plan Update involves a revision to the land use map and all elements except Housing, and adds a new Economic Development Element. The General Plan Update would consist of the following elements: Land Use, Circulation, Community Facilities (previously Public Facilities), Open Space/Conservation, Safety. Noise, Air Quality, and Economic Development. The Development Code Update would reflect the changes to the General Plan and the revised land use and zoning designations. The update would also compile existing information and past code amendments in an easy-to-reference manner; provide a procedures guide; update land uses to contemporary standards; and propose limited land use and development standard policy modifications.</p>	NOP	07/19/2012

2009042002	Electric Street 5MG Water Storage Tank and Pipeline Project Placer County Water Agency Auburn--Placer The California Department of Public Health (Department) is a responsible agency for this project. The Department's Safe Drinking Water State Revolving Fund Program is providing state funds for the project. The Placer County Water agency proposes to construct a new 5 MG water storage tank to replace two in-ground reservoirs at PCWA's Electric Street site and the replacement of a transmission pipeline which delivers treated water from the Auburn Water Treatment Plant and other water system appurtenances (including permanent access road, SCADA facilities pipelines and appurtenances).	NOD	
2010062054	Yuba County 2030 General Plan Update Yuba County --Yuba The South Yuba Drainage Master Plan, originally adopted in 1981, is an engineering study outlining a basis for the required drainage improvements needed in south Yuba County areas of Linda and Olivehurst to adequately address internal drainage. The South Yuba Drainage Master Plan serves to implement Policy CD12.3 and Action CD15.2 of the 2030 Yuba County General Plan for which an EIR was certified and adopted on June 7, 2011. The South Yuba Drainage Master Plan is an engineering study outlining required drainage improvements to address existing and future development consistent with the 2030 General Plan. The Plan does not raise any new or different environmental impacts than those addressed in the General Plan EIR. Therefore, pursuant to Government Code Sections 15162 and 15168(c) no further environmental review is required and the 2030 Yuba County General Plan EIR will serve as the environmental document for the SYDMP. The Fish & Game fee was paid at the time of the certification of the 2030 General Plan EIR in June 2011 (2011FG-00018).	NOD

2007011141	655-683 Deep Valley Drive and 924-950 Indian Peak Road Mixed Use Residential Project Rolling Hills Estates, City of Rolling Hills Estates--Los Angeles The proposed project would demolish the existing office buildings at 655 Deep Valley Drive, 944 and 950 Indian Peak Road, surface parking lots, and landscaping. Construction of the proposed project would stabilize the existing landslide and include 148 residential units, approximately 14,200 sf of commercial area fronting Deep Valley Drive, and associated parking on the 8.05 ac property. Included within the project site is the Brick Walk development (2.37 ac) consisting of an existing 23,187 sf of retail, commercial/office and restaurant space, and 78 existing parking spaces. The project would remove 2,013 sf of commercial space and add 63 off-street surface parking spaces, for a total of 137 parking spaces, which would be shared for all uses. Additionally, the Brick Walk commercial buildings would be enhanced through exterior facade improvements.	EIR	08/06/2012

2012061074	Rancho Grande Division of Oil, Gas, and Geothermal Resources --Kern Sojitz Energy Venture, Inc (Sojitz) is proposing the Rancho Grande Project, a project to drill eight exploratory oil wells, over a three year period. The surface locations for the proposed wells would be on land owned by the Tejon Ranch Corporation, located 28 miles south of Bakersfield in Kern County, CA. NAD 83: 34 58.209/-118 52.977, 34 58.138/ -118 51.893, 34 57.524/-118 52.916, 34 57.268/-118 52.960, 34 58.36860/-118 54.5730, 34 57.62160/-118 55.06440, 34 57.22140/-118 55.04640, 34 56.20260/-118 53.74380	MND	07/23/2012
2012062065	Saint Helena Creek Bridge at Hilderbrand Drive Replacement Project Lake County --Lake The project consists of the replacement of the existing St. Helena Creek Bridge on Hilderbrand Drive. The existing structure is an 80-foot long steel truss Bailey bridge with timber deck boards on steel floor beams set on concrete abutments. The net width of the Bailey bridge is 13 feet. The proposed permanent replacement bridge is a 100-foot long, 23-foot wide single-span precast pre-stressed concrete girder bridge with reinforced concrete wall abutments that would not require intermediate piers. The superstructure of the bridge will be positioned to allow flood flows to pass without overtopping the new bridge. The two existing piers will be removed. The existing east and west roadway approaches will be raised to meet the new bridge elevation.	MND	07/20/2012
2012061073	San Luis Rey Wastewater Treatment Plant Solar Project Oceanside, City of Oceanside--San Diego The City of Oceanside Water Utilities Department proposes the development of a small solar facility on currently vacant land located immediately south of the San Luis Rey Wastewater Treatment Plant. The proposed project would include a solar array field containing 3,168 high efficiency (327 Watt) solar panel modules, five drive motors, and a 35'x10' equipment pad. The project will connect to the existing San Diego Gas and Electric tie-in located on the San Luis Rey Wastewater Treatment Plant site by constructing an underground utility line within the existing paved driveway of the Treatment Plant. The proposed project development will be set back from the east and south of the project site boundary so that no project components are located immediately adjacent to residential uses to the east and the San Luis Rey River to the south. 2012068288	<p>Monument Hill Stairway Project, Oroville, CA Water Resources, Department of Oroville--Butte DWR will remove the current loose large rock and slope the hillside to make room for the walkway and stairs using a backhoe. Concrete will be poured for the sidewalk, stairway abutments will be constructed and put in place, and prefabricated stairs will be put into location. The walkway/stairwell will be approximately 6 ft wide by 40 ft long. Work will be conducted during dry conditions. The proposed project is estimated to take 7 days and will be completed in 2012/13.</p>	NOE	
2012068289	<p>Rollins Lake Road Safety Improvement Project Placer County Colfax--Placer Micro-surface existing road, cut back the hill at the intersection of Norton Grade Road and Rollins Lake Road, install new guardrail, replace and upgrade existing guardrail, install speed and warning signs.</p>	NOE	
2012068290	<p>Mount Shasta Forest Fire Station Fuels Reduction Forestry and Fire Protection, Department of --Siskiyou The subject property is the future location of the Mount Shasta Forest Volunteer Fire Station located at the intersection of Wynton Way and Timberline Court in the Mount Shasta Forest subdivision just northeast of McCloud. The purpose of the project is to "fire safe" the 2.5 acre lot prior to breaking ground for the new volunteer fire station. This project will involve cutting and chipping vegetation by Deadwood Conservation Camp fire crews. Brush and sapling size trees will be cut at ground level and larger trees will be limbed to approximately 12 feet. No "healthy, mature, scenic trees" will be cut. Cut material will be chipped onsite and the resulting chip piles will be spread by hand. The subject parcel and surrounding area is forested with a mixed conifer stand dominated by ponderosa pine and white fir. Other species present in lesser amounts include incense cedar and black oak. Tree diameters range from saplings to approximately 36 inches. The topography of the parcel is generally flat on the eastern portion of the parcel where the fire station will be built. The western portion of the parcel has gentle slopes ranging from 5 to 15%.</p>	NOE

	original location, and relocate the emergency vehicle access, to avoid and preserve an existing on-site wetlands on 7.61 acres. All other aspects of the project, including wine production, building size, and tasting room size and hours are the same as the Approval Project. The previously-approved land use and zoning designation changes that were adopted as part of the Approved Project are not part of the Modified Project. The Approved Project changed the land use and zoning designation to Diverse Agriculture, 10 acres per dwelling unit and Diverse Agriculture B6 10 acre density, SR, respectively, and approved a Use Permit for a winery with a maximum annual production capacity of 26,500 cases.		
2012061076	Chula Vista Energy Park, IS-09-014 Chula Vista, City of Chula Vista--San Diego The project proposes approval of a Tentative Parcel Map to subdivide the existing 13.61 acre parcel into 2 lots of 5.84 and 3.76 acres, including a 20-foot landscape buffer easement adjacent to Main Street, and the existing dedicated public street right-of-way for Main Street. Access to the site would be provided by a private driveway connection to Nirvana Avenue to the west of the site. The project also proposes approval of a grading permit to create two building pads for future industrial development. Grading would consist of balanced excavation and fill of approximately 63,000 cubic yards of earth, to create level building pads for the future development area. Construction of structures is not proposed at this time.	MND	07/23/2012
2012061077	LU11-0136 Ventura County Santa Paula--Ventura Construction and operation of an unmanned radio communications facility. The facility will consist of a 105 foot tall lattice tower and a 400 sf equipment shelter. The tower will have four antenna arrays and a total height, with the topmost antenna, of 109 feet 5 inches. The equipment shelter will be 20 feet by 20 feet and will be located at the base of the tower. A diesel generator with a fuel tank for emergency power will be located adjacent to the shelter. The facility will be enclosed by a chainlink fence. Access to the site will be from the existing Anlauf Canyon Road.	MND	07/23/2012
2012061078	Conditional Use Permit (CUP) 08-08 Time Extension (TE) Palmdale, City of Palmdale--Los Angeles CUP 08-08 Time Extension; A two-year discretionary time extension to previously approved CUP 08-08 to establish a new sand and gravel surface mining operation on 27.5 acres. The proposed use will include the following items: a) hours of operation up to 24 hours per day, Monday through Saturday; b) annual production of 240,000 cubic yards of material, c) processing and crushing of recycled concrete and asphalt, and d) on-going processing and crushing of recycled concrete and asphalt upon completion of mining activities and any required reclamation.	MND	07/23/2012
2012062066	Water Right Application 30745 - Peter Michael State Water Resources Control Board Calistoga--Sonoma Peter Michael is developing a vineyard in Sonoma County. The project includes development of a water supply within the Maacama Creek Watershed. As Lead Agency, the State Water Board is considering a water right application. The	MND	07/23/2012

2012062069	Western Grove Obstruction Removal Project for the Nut Tree Airport Solano County Vacaville--Solano Based on the results of an aeronautical study and a safety inspection performed by the Caltrans Division of Aeronautics, several trees on and adjacent to the Nut Tree Airport were identified as obstructions to navigable airspace. Other trees were identified that would soon become obstructions. To comply with direction from the Division of Aeronautics, Solano County proposes to remove mature trees on approximately 7 acres on and adjacent to the western Airport boundary to improve safety at the airport. The trees to be removed include a eucalyptus grove and cypress windrows. Off-site mitigation will be provided in accordance the requirements set forth by the CDFG.	MND	07/24/2012
2012061040	Goleta Beach County Park Managed Beach Retreat Project 2.0 Santa Barbara County Goleta--Santa Barbara Note: Revised In October 2011, the County Community Services Department submitted applications to the County Planning and Development Department (P&D) for a Development Plan (11DVP-00000-00016) and Coastal Development Permit (11CDP-00000-00069) for a managed beach retreat project. The managed beach retreat project is intended to restore a deep beach and reduce the risk of damage to existing park facilities and utilities without the need for pile groins, rock revetments, or other significant beach stabilization structures.	NOP	07/23/2012
2012061075	Bike Master Plan San Diego, City of --San Diego The proposed project consists of an update to the 2002 City of San Diego (City) Bicycle Master Plan (BMP). The purpose of the BMP Update is to serve as a policy document to guide the development and maintenance of the City's bicycle network. The BMP Update builds on the City's 2002 BMP, presenting a renewed vision that is closely aligned with the City's 2008 General Plan. The BMP Update provides direction for expanding the existing bikeway network, connecting gaps, providing for improved local and regional connectivity, and encouraging bicycling as a transportation mode. The BMP Update includes a bicycle network with related bicycle projects, policies, and programs.	NOP	07/23/2012
2012062067	Kenzo Estate Inc Vineyard Conversion Napa County Napa--Napa The applicant proposes to convert 14.0 acres to vineyards on a 156-acre parcel. The Erosion Control Plan Application includes construction plans, specifications and erosion and sediment mitigation measures for the vineyards. The site plan designates 7 vineyard blocks, on topography that ranges from gently to moderately sloping lands, at elevations between approximately 1380 and 1440 feet above mean sea level. The APN for the site is 033-190-016.	Neg	07/23/2012

2012062068	Cogeneration Project Union Sanitary District Union City--Alameda The project consists of two phases. Phase 1 is the demolition of selected structures at the Alvarado WWTP to make room for the new cogeneration building and biogas conditioning system which is Phase 2. The two new cogeneration engines will be fueled with biogas from the WWTP's existing digesters to produce supplemental electrical power and hot water production.	Neg	07/23/2012
2003071160	Lower Santa Ynez River Fish Management Plan and Cachuma Project Biological Opinion Cachuma Operation and Maintenance Board Solvang, Lompoc--Santa Barbara The project involves implementation of alternatives for various management actions and projects to improve habitat for the endangered southern steelhead and other aquatic species on the Santa Ynez River and its tributaries below Bradbury Dam. Specifically the project approved by the Wildlife Conservation Board will replace a low-water Arizona crossing with an arched culvert at Refugio Road crossing #7 of Quiota Creek.	NOD	
2004114003	South Bay Salt Ponds Restoration Project Fish & Game #3 San Jose, Fremont, Sunnyvale, Union City, Menlo Park, ...--Alameda, Santa Clara, San Mateo The project will enhance approximately 230 acres of coastal wetlands (managed ponds E12 and E13) on the Department of Fish and Game's Eden Landing Ecological Reserve. It is part of a larger restoration project to restore and/or enhance 15,100 acres of former salt ponds and adjacent habitats in South San Francisco acquired by the Department of Fish and Game and the U.S. Fish and Wildlife Service in 2003.	NOD	
2005122137	State Route 132 Interchange Improvements at Bird Road Caltrans #6 Tracy--San Joaquin The State Route 132 and Bird Road Interchange Project consists of constructing of an overcrossing structure over State Route 132 along with on-ramps and off-ramps, and widening State Route 132 within the existing and proposed right-of-way and adjacent properties. Interchange improvements are necessary to improve traffic congestion on State Route 132 by eliminating existing vehicle conflicts caused by the at-grade intersection.	NOD	
2006102050	San Francisco State University Campus Master Plan California State University Trustees San Francisco--San Francisco The proposed project is the demolition of the School of the Arts Building on the San Francisco State University campus at the intersection of Font Boulevard with Tapia Drive and Arballo Drive. The building was built in 1956 and is in disrepair and constitutes a hazard. No building construction on the side is currently being contemplated; however, interi uses including pathways, an informal playfield with lighting, security lighting, and benches will be installed. A bathroom is also being considered.	NOD

2007122027	8 Washington/Seawall Lot 351 Project San Francisco, City and County of San Francisco--San Francisco On the north side of Washington Street, between the Embarcadero and Drumm Street, the project proposes to demolish the existing surface parking lot and Golden Gateway Tennis and Swim Club, and construct a new health club totaling approximately 16,350 square feet with adjacent outdoor aquatic and recreation use, residential buildings ranging from four to twelve stories in height containing 134 dwelling units, ground-floor retail uses totaling approximately 20,000 square feet, and approximately 327 off-street underground parking spaces. The project would also construct new public open space.	NOD	
2010041053	Modifications to the North Basin Groundwater Protection Project Orange County Water District Fullerton, Anaheim--Orange OCWD previously analyzed and approved the North Basin Groundwater Protection Project on November 16, 2005 including a mitigated negative declaration, Geologist's/Engineer's Report, and project budget. The proposed modifications to the North Basin Groundwater Project within City of Fullerton include, (1) construction and operation of a new extraction well within Woodcrest Park and an appurtenant pipeline extending west from Highland Avenue to the extraction well along Orangethrope Avenue, (2) rerouting of previously approved pipelines planned within Lemon Street and East Valencia Drive to North Highland Avenue, East Truslow Avenue and North Harbor Boulevard. The proposed modifications to the North Basin Groundwater Protection within City of Anaheim include, (1) revisions to the design of the previously approved water treatment plant located east of State College Boulevard and north of Carbon Creek and (2) the development of twelve injection wells and pipeline located within an Orange County Transportation Authority Bus Base on the west side of Stage College Boulevard and south of Carbon Creek instead of a previously approved recharge facility and an appurtenant pipeline under the Placentia Flood Control Basin	NOD	
2011122056	Alhambra Valley Road Safety Improvements Project Contra Costa County Martinez--Contra Costa This proposed project involves safety improvements to an existing roadway that will include tree and vegetation removal, excavation of a hillside, grubbing and grading, road construction, and other activities within a 6.5-acre footprint. The project will realign the road to reduce the number of curves, widen the existing travel lanes to 12 feet each, and add up to 5-foot wide paved shoulders. The project will require cutting into the existing hillside slope along the north side of the road to accommodate the road realignment. The hillside will be cut at a 2:1 slope which requires cutting into the base of the slope and removing between 1,500 and 4,000 cubic yards of soil from the face of the hillside.	NOD	
2012032013	121 Fox Hollow Road - Existing Unpermitted Improvements within the Stream Corridor of Bear Gulch Creek Woodside, City of Woodside--San Mateo The project is a CUP to legalize unpermitted improvements (erosion control, bank stabilization and patios) along a portion (~400 linear feet) of Bear Gulch Creek at the subject property. 	access drive; 14.) demolition of the existing Hardman Creek bridge and construction of a new 20 foot wide bridge in roughly the same location; 15.) construction of a 4 to 7 foot tall stone wall and entry structure, partially within the Silverado Trail right-of-way; 16.) installation of a southbound Silverado Trail center left-turn lane at the proposed winery driveway; and 17.) a landscape and Hardman Creek stream restoration plan. Conservation Regulations exception to allow encroachment within required setbacks from Hardman Creek (85 feet required, 38 feet proposed).		
2012052020	Cairdean Winery Napa County St. Helena--Napa A Use Permit to establish a new 50,000 gallon per year winery/cave. Two Variance Requests to allow the construction of a new winery 259 feet from the centerline of SR 29/128 (St. Helena Hwy) road setback where 600 feet is required for a setback and 100 feet from the centerline of a private road (used by the public) where 300 feet is required for a setback.	NOD	
2012052043	Unionhouse Creek Channel Improvements Project Sacramento Area Flood Control Agency Sacramento--Sacramento The proposed project consists of modifying the channel of Unionhouse Creek for approximately 1.6 miles, from immediately downstream (west) of Bruceville Road to upstream (east) of Franklin Boulevard in the City of Sacramento, CA. The actions include flood risk-reduction measure in two segments of the creek: relining the channel bottom and side slopes with concrete from Bruceville Rd. to Center Parkway, and widening the channel by and additional 8 feet, to a total width of 20 feet, from Center Parkway downstream to Franklin Blvd. The primary purpose of this effort is to increase the creek channel's capacity to contain 100 year storm flows within its banks.	NOD	
2012068302	Lease for New Office Space Real Estate, Department of Sacramento--Sacramento This project is to lease office space in the City of Sacramento that will accommodate the Department of Real Estate headquarters office.	NOE	
2012068303	Human Health Risk Assessment/Feasibility Study/Removal Action Workplan for the former Lodi Manufactured Gas Plant Toxic Substances Control, Department of Lodi--San Joaquin Approval of a Human Health Risk Assessment/Feasibility Study/Removal Action Workplan (document) by the Department of Toxic Substances Control (DTSC) pursuant to Health & Safety Code, chapter 6.8 as submitted on April 19, 2011 by Stantec. The document focuses on excavation and removal of contaminated soils to mitigate soil impacted with excessive levels of polycyclic aromatic hydrocarbons, metals (primarily lead that is co-mingled with other contaminants at the site) and volatile organic compounds. The purpose of the project is to mitigate impacted soils that exceed the project-specific human health risk criteria to minimize human exposure to the identified chemicals of concern (COCs). The estimated volume of impacted soils is ~5,800 cubic yards (8,800 tons).	NOE

2012068304	Interim Measures Workplan for Soils and Soil Vapor at Plant I of the Northrop East Complex Facility Toxic Substances Control, Department of Hawthorne--Los Angeles Interim Measures Workplan for Soils and Soil Vapor at Plant I of the Northrop East Complex Facility This project is for the Department of Toxic Substances Control's (DTSC) approval of an Interim Measure (IM) to address soil and groundwater impacted by chlorinated volatile organic compounds (VOCs) at Plant I of the Northrop East Complex Facility (Facility). Soil Vapor Extraction (SVE) was selected as a preferred presumptive remediation measure based on evaluation of soil properties and physical characteristics of the chemicals of potential concern at the Facility. The SVE system will decrease the VOC concentration in the vadose zone, and consequently reduce the threat of continuing migration of contamination from the vadose zone into the ground water. SVE has proven to be effective in remediating other areas at the Facility which were given an interim measure completeness determination by DTSC in June 2011. Quarterly and Semi-Annual groundwater monitoring will continue and will allow evaluation of the effects of the on-going cleanup on ground water. Plant I is generally surrounded by asphalt-paved parking area, a concrete-lined Dominguez Channel, railroad tracks, and commercial, industrial, and residential developments.	NOE	
2012068305	Mountain House Conservation Bank Fish & Game, Wildlife Conservation Board --Alameda Acquisition of 147 acres of land as conservation bank for project impacts to wildlife habitat.	NOE

2012032056	381 Pennsylvania Avenue Los Gatos, City of Los Gatos--Santa Clara The proposed project consists of a minor land division. The existing lot size for the property is 24,422; the proposed lot sizes are 13,081 s.f. (Parcel 1) and 11,352 s.f. (Parcel 2). An existing single-family residence will be retained on Parcel 1. Proposed Parcel 2 is located to the rear of the existing house, and currently includes a swimming pool, pool house and barn structure, all of which likely would be removed to accommodate construction of a new single-family home in the future. No plans for a second home have been developed or submitted to the Town at this time.	EIR	08/08/2012
2012061080	Nordstrom Pond Improvement Project Fresno Irrigation District --Fresno The primary purposes of the project are water storage and regulation, groundwater recharge and water conservation. The project consists of the enlargement/reconfiguration of an existing regulatory pond, construction of water control structures and installation of a pipeline to connect the existing American Colony mainline canal and the enlarged/reconfigured basin. The improvements will be developed, owned and operated by the Fresno Irrigation District. In addition to increasing the FID's overall water supplies, other project goals and objectives include sustaining more uniform water delivery flow rates to constituents; maintaining the high quality water supply of FID; sustaining the visibility of agriculture within FID; and reducing overdraft by dedicating water to groundwater recharge.	MND	07/24/2012
2012061081	John Smith Road Landfill Expansion Project San Benito County Hollister--San Benito The proposed project involves the vertical expansion of approximately 65 feet (at its highest extent) over existing permitted Modules 1 through 6. The lateral expansion would include development of an additional 13.6 acres of lined area in five additional more expansion modules (the actual number of expansion modules may change during actual construction). In addition, the project includes a General Plan Amendment to change the land use designation from Agricultural Rangeland to Public/Quasi-Public, to be consistent with the existing landfill's land use designation. The project includes the potential acceptance of up to 500 tons per day of out-of-County waste.	MND	07/24/2012

2012012038	Homewood Water Quality Improvement Project Phase 1 and Phase 1A Placer County --Placer Phase 1A of the Homewood Water Quality Improvement Project involves the granting of site improvement funds for the installation and improvement of water treatment infrastructure, paving unpaved roads, and regarding and repaving streets to more effectively convey storm water to treatment facilities.	NOD	
2012021037	Little Lake MNP Line B, Stages 1 and 2 Riverside County Flood Control and Water Conservation Hemet--Riverside The Riverside County Flood Control and Water Conservation District proposes to construct, operate, and maintain an underground storm drain (Project). The Project is comprised of a 10' x 8' reinforced concrete box, reinforced concrete pipes, re-construction of approximately 200 feet of the existing concrete line Meridian Street Channel and minor appurtenances (i.e., connector pipes and catch basin). The facility was identified in the Little Lake Master Drainage Plan (MDP) revised in 1991, and will provide flood protection for the local area.	NOD	
2012022034	Reeves Canyon Road Bridge on Mill Creek Mendocino County --Mendocino The Project proposes: 1) replacement of a year-round wet crossing through Mill Creek that experiences moderate traffic from local residents with a railcar bridge, 2) replacement of an existing failed culvert under Reeves Canyon Road with a new culvert and 3) use of a low water crossing at Forsythe Creek to provide equipment access during bridge construction.	NOD	
2012041040	Biodiesel Feedstock Production Facility Eastern Municipal Water District Perris--Riverside Eastern Municipal Water District intends to construct and operate a Biodiesel Feedstock Production Facility within its Perris Valley Regional Water Reclamation Facility (PVRWRF). The BFPF would process restaurant waste collected from within EMWD's service area. The facility would recover brown grease and produce a brown grease waste product that would be suitable to serve as a feedstock for biodiesel production. The brown grease waste product would be transported to an existing regional biodiesel production plant to be refined and then brought back to EMWD facilities where it would be used to supply EMWD diesel-powered vehicles and stationary engines. Upon completion, the BFPF will keep approximately 5,000,000 to 10,000,000 gallons per year of waste out of landfills and produce diesel fuel that would be utilized in EMWD diesel-powered vehicles and stationary engines.	NOD	
2012041078	Sohi Conditional Certificates of Compliance SUB2010-00006/C 10-0078 San Luis Obispo County Arroyo Grande--San Luis Obispo Request by Harmohan Sohi for a Conditional Certificate of Compliance to legalize two parcels of 0.5 and 2.1 acres each. The proposed project is within the Rural Lands land use category.	NOD

1990011055	Warner Center Specific Plan Update Los Angeles, City of Los Angeles, City of--Los Angeles Note: 1 Hard Copy Final.	FIN	
	<p>The proposed WCRCCSP update is being developed to address: 1) previously identified concerns, 2) the environmental analysis required by the 1993 Specific Plan, and 3) new planning and regulatory requirements associated with sustainability and reducing regional greenhouse gas emissions. The proposed SCRCCSP would provide for sustainable development where people could live, work and play and where day-to-day needs could be met by walking, bicycling and local transit. Under the proposed WCRCCSP, Warner Center would have a mix of uses designed to promote a jobs/housing balance. These uses would have access to local and regional transit, aggregated, publicly accessible open space, local services, neighborhood serving retail and other land uses promoting walkability and transit use in compliance with SB 375 and AB 32.</p>		
2012061086	Site & Architectural Review No. 2012-8 Pacific West: The Gardens at San Juan Hollister, City of Hollister--San Benito The applicant is requesting approval of Site and Architectural Application No. 2012-8 for the construction of 56 units, plus manger's unit that will be a 100% workforce housing development for families. It will target families with incomes ranging between 30% and 60% of the AMI. The development would consist of five separate residential buildings that are two and three story, plus a two story clubhouse/office. The site is located in the West Gateway Zoning District.	MND	07/25/2012
2012062073	Alpha Building Remodel Project Nevada City Nevada City--Nevada Architctural Review Application to remodel the existing building, known as the Alpha Building, located at 210 Broad Street in downtown Nevada City. The Alpha Building footprint contains 8,160 sf, built in 1917. The main component of the project is to add three windows and a new doorway/entrance on the eastern elevation (Union Street) and onto Calanan Park, a City-owned park. The application also proposes replacement of all existing windows and doorways on all elevations of the building with matching materials (wood windows on Broad Street, aluminum windows on Union and Commercial Streets). Two existing storefront doors will also be replaced.	MND	07/25/2012
2012062077	Fairway Oaks Subdivision Project Galt, City of Galt--Sacramento The proposed project would consist of 100 single-family lots, ranging from 8,000 sf to 18,291 sf. In addition, a 10.7-acre Open Space area that includes a neighborhood park with an oak tree preserve and a Class I bike trail that travels along Dry Creek would be located on the project site. A 30-foot-wide pedestrian and bicycle connection from Chase Drive to Glendale Avenue is also proposed. The project would incorporated fully paved roads conforming to 50-foot and	MND	07/26/2012

2012068340	Meadow Lane Dam, Pond D, No. 1050-3 Water Resources, Department of --Sonoma The proposed work will be phased to first construct a cutoff wall and upstream liner along the southern embankment of Pond D. Phase 2 will consist of the same for the eastern embankment of Pond C.	NOE	
2012068341	Stillwater to "Cedro" Caltrans #2 --Shasta Using both State and Federal funds, this project will place a 0.10' thin blanket overlay with dig outs on (SR) 44 from (PM) R4.3 to R7.4. All work will be done within the existing roadbed hinge points. The shoulders will be backed to standard and existing guardrail will be adjusted/upgraded to meet current standards as needed. Cold planing of the asphalt will be required to match existing roadway features.	NOE	
2012068342	Upper Butte Basin Wildlife Area, Little Dry Creek Unit (UBBWA LDC) - Hoodoo Island Bridge Construction and Habitat Restoration, Glenn County. Fish & Game #2 --Glenn The Hoodoo Island portion of UBBWA LDC is bordered on the west by Howard Slough and high-quality wetlands on the privately-owned Bird Haven Ranch and on the east by Butte Creek and high-quality wetlands on the privately-owned Bird Haven Ranch and on the east by Butte Creek and high-quality wetlands on other portions of UBBWA LDC. It has no developed access for California Department of Fish and Game (DFG) staff or the public.	NOE	
2012068343	Northrop Grumman Redondo Beach - Corrective Action Complete Determination Toxic Substances Control, Department of Los Angeles, City of--Los Angeles The investigation of SWMUs at the Redondo Beach Site involved various activities including gathering historical records and collecting soil and soil gas samples. The results of the investigation of SWMUs were presented in phased RCRA Facility Investigation (RFI) reports. The final RFI report, dated October 22, 2009, was approved by DTSC on December 29, 2009. Two SWMUs at the site, SWMUs Nos. 16 and 19, were subject to a more detailed investigation which included preparation of a Human Health Risk Assessment Report date January 12, 2012.	NOE	
2012068345	Fiscal Year 2013-17 Capitol Improvement Program for the Elk Grove Water District - Consistency with the City of Elk Grove General Plan Elk Grove, City of Elk Grove-- The Elk Grove District has prepared a draft Fiscal Year 2013-17 Capital Improvement Program (the CIP) that includes facility improvements to the Elk Grove Water District's (the District) capital facilities to support delivery to potable water to Elk Grove residents within their service territory. This project involves the review of this CIP for consistency with the City of Elk Grove General Plan as required by Section 65401 of the California Government Code.	NOE

2006042175	Davis Woodland Water Supply Project (DWWSP) Alternative Intake/Diversion and Water Pipeline SEIR Davis, City of Davis, Woodland--Yolo Note: FYI Addendum No. 2 Since the certification of the DWWSP EIR in 2007, the Cities of Woodland and Davis have formed the WDCWA, a joint powers authority, to implement the DWWSP. WDCWA has proceeded with implementation of the DWWSP, including additional project planning in preparation of the engineering design and project construction phases, financial planning, and acquisition of project permits and approvals. To further project planning efforts, the WDCWA is now interested in evaluating a separate, stand-alone intake and diversion facility and associated raw water pipeline that would serve the DWWSP solely, as an alternative to the proposed intake and diversion facility that would be jointly owned and operated with Reclamation District 2035, in the event that the WDCWA and Reclamation District 2035 are unable to construct the joint intake and diversion facility.	ADM	
2008081042	Interstate 710 Improvement Project Ocean Boulevard to State Route 60 Caltrans #7 Long Beach, Commerce, Paramount--Los Angeles Improve I-710 in Los Angeles County between Ocean Blvd. and SR-60. Major features include widening I-710 up to ten general purpose lanes (five lanes in each direction), modernize and reconfigure the I-405, SR-91 and a portion of the I-5 interchanges with I-710, modernize and reconfigure most local arterial interchanges along I-710, and provision of a separated four-lane freight corridor to be used by conventional or zero-emission trucks.	EIR	08/10/2012
2010051046	March Inland Port Airport General Aviation Facilities Development March Joint Powers Authority Moreno Valley--Riverside Note: Shortened Review Recirculated The March Joint Powers Authority (March JPA) has proposed the development of facilities intended to accommodate the operation of general aviation aircraft at March Inland Port (MIP), located in Riverside County, CA. The March JPA operates within the March Air Reserve Base (March ARB), a joint-use facility that is utilized for both military and civilian purposes. Per the 1997 Joint Use Agreement between the March JPA and the Department of Defense (DOD), March JPA is allowed to accommodate civilian aircraft operations; however, these operations are prohibited from exceeding a maximum of 21,000 per year. 2011042035	706 Mission Street - The Mexican Museum and Residential Tower Project San Francisco, City and County of San Francisco--San Francisco The proposed project, on the northwest corner of Third and Mission Streets in San Francisco's Financial District neighborhood, is the construction of a 47-story, 550 foot-tall tower. The proposed tower would be connected to the adjacent existing Aronson Building, which would be restored and rehabilitated. The Aronson Building currently contains a retail space on the ground floor and office use on the second through tenth floors. As part of the proposed, the Aronson Building would be restored and rehabilitated. The overall project would contain up to between 175 and 215 residential units, space for The Mexican Museum, a ground-floor retail/restaurant use, and associated building services. In the new tower, there would be 44 floors of residential space, including mechanical areas, and three floors of museum space. In the adjoining Aronson Building, there would be residential lobby space and a retail/restaurant space on the ground floor. No museum space would be located on the ground floor. The project sponsor would purchase the adjacent Jessie Square Garage from the San Francisco Redevelopment Agency and convert it from a publicly owned garage to a privately owned garage. The project sponsor would also provide an endowment for The Mexican Museum.	EIR	08/10/2012
2011031092	Cedar and Kettner Property Development Project San Diego County San Diego--San Diego NOTE: 1 CD The proposed Cedar and Kettner Development Project involves the relocation of existing surface parking from the County Administration Center (CAC) at 1600 Pacific Coast Highway to a proposed new parking structure at an alternate location in downtown San Diego, allowing for the development of the proposed County Waterfront Park at CAC as set forth in the Waterfront Park Master Plan (2008; amended 2011). In addition, the construction and operation of a mid- to high-rise tower for office, commercial, or residential use, or a mixed-use development.	FIN	
2012061087	Lundquist Monterey County --Monterey Note: Ref. SCH # 1990030879 Combined Development Permit consisting of a: 1) Coastal Administrative Permit to allow the construction of a detached 1,070 sf four-car garage with planted roof (green roof), a new permeable cobblestone driveway, the replacement of an existing wood fence with a new stone wall with six 12.5 foot sections of antique bronze open-design fencing and antique bronze fencing with stone pillars at the new driveway entrance, restoration of existing paths and driveway to native Monterey cypress habitat, grading of approximately 550 cubic yards of cut and 200 cubic yards of fill and; 2) a Coastal Development Permit for the removal of one 7" Monterey cypress and; 3) a Coastal Development Permit for the development within 100 feet of Environmentally Sensitive Habitat Area and; 4) a Coastal Development Permit for development within 750 feet of a known archaeological resource and; 5) a Coastal Development Permit for development on slopes greater than 30%; and 6) Design Approval. The property is located at 3224 17 Mile Drive, Pebble Beach (APN 008-472-006-000), Del Monte Forest area, Coastal Zone.	MND	07/26/2012

2012031092	<p>El Prado Road Street Improvement Project Inland Empire Utilities Agency Chino--San Bernardino</p> <p>The proposed project consists of the improvements to the existing El Prado Road, in the City of Chino, from the intersection of El Prado Road at Kimball Avenue to approximately 2,300 feet south of Kimball Avenue. The Project is expected to begin construction in 2012 and take approximately 3 to 4 months to complete. The first phase of construction is expected to be site preparation, which includes staging, surveying, staking and field coordination. Construction staging is anticipated to be located adjacent to the roadway on existing disturbed areas. The next phase will consist of removal of items specified, which will include removal of existing asphalt and facilities and cold planning. Any site grading will occur at this time. Installation of the storm drain improvements are anticipated to be commenced in this phase of development. Installation of site paving, landscaping and hardscape, as well as signing and striping will occur during the final phase of the construction process. Mitigation measures that will be implemented for this project are listed in the project Mitigation Monitoring and Reporting Program.</p>	NOD

FIN					
2008071091	Santa Ynez Airport Improvements Santa Barbara County --Santa Barbara The project includes permitting of existing development and limited additional proposed development. A proposed modification to the Airport Layout Plan (ALP) has been developed by the Authority and has been submitted to General Services for County review and approval prior to submittal to the FAA for approval/revalidation. It was determined that environmental review is necessary prior to a determination of consistency (Gov't Code Section 65402) by the Planning Commission and review and approval by the Board of Supervisors. This proposed modification to the ALP is substantially reduced in scope from the current ALP. The proposed modifications to the ALP consist of two engineering sheets. Sheet 1 depicts the layout of all current and future facilities and improvements, and sheet 2 depicts all existing and future property boundaries. The proposed sheets 1 & 2 will replace the existing sheets 1 & 2. There are no proposed modifications to the existing ALP Narrative Report.	MND	07/27/2012				
2012061089	Conditional Use Permit Application No. C-12-113 Fresno, City of Fresno--Fresno CUP Application No. C-12-113 was filed by Raul Gonzalez, City of Fresno Department of Public Utilities/Wastewater Management Division, and the project pertains to 5.28 acres of property at the Fresno Clovis Regional Wastewater Treatment and Reclamation Facility located on the south side of West Jensen Avenue, west of South Cornelia Avenue. The applicant proposes the construction of a tertiary treatment and disinfection facility (capacity up to 30 mgd) at the wastewater treatment plant. When completed, the project will provide high quality recycled water for landscape irrigation and various other commercial and industrial purposes. The property is planned for public facility and is zoned AE-5/UGM	MND	07/27/2012

2012061090	Stone Corral Solar Project Tulare County --Tulare The enXco Development Corporation is proposing to construct, own and operate a renewable, carbon free energy project providing electricity using clean photovoltaic (PV) solar technology. The proposed Project will be located on approximately 60 acres of two parcels totaling 141-acres, APN 053-020-013 and a portion of APN 053-020-14. The Stone Corral Solar Generating Facility will consist of a collection of solar panels and equipment required for generation of up to seven megawatts of alternating current (MW-ac). The proposed Project will include 7-MW-ac of solar PC panels and generation equipment, utilizing either fixed tilt or single axis horizontal tracker technology. The power generated will be conveyed to the Stone Corral Substation via PG&E's distribution power lines adjacent to the proposed Project site. The proposed Project will use commercially available thin film PV modules or a similar module. The proposed Project facilities would include a series of individual PV panels, sunlight trackers with small electric motors, support beams, module rail assemblies, inverters, transformers, buried electrical cables, circuit breakers, a substation, and distribution lines to the PG&E interconnection.	NOP	07/30/2012
2012061092	2012 Bicycle Plan's First Year of the First Five-Year Implementation Strategy and Figueroa Streetscape Project Los Angeles, City of Los Angeles, City of--Los Angeles The proposed projects consist of the Bicycle Plan First Year of the First Five-Year Implementation Strategy and the Figueroa Corridor Streetscape Project. This proposed project would include the implementation of approximately 43 miles of projects (see Table 1, below). The proposed project consists of new bicycle lanes that would be striped along existing City of Los Angeles streets within existing rights-of-way as identified in Figure 1. Installation of the bicycle lanes is anticipated to take less than 12 months and would begin sometime in 2013.	NOP	07/27/2012
2012061093	2012 Air Quality Management Plan (AQMP) South Coast Air Quality Management District --Orange, Los Angeles, Riverside, San Bernardino The 2012 AQMP identifies control measures to be implemented by state, federal and local agencies to demonstrate that the region will attain the federal standard for particulate matter less than 2.5 microns in diameter (PM2.5) by the applicable target dates and provides Clean Air Act S182(e)(5) proposed implementation measures to assist in achieving the 8-hour ozone standard. The AQMP also includes the most current air quality setting, updated emissions inventories of stationary and mobile sources, updated growth projections, new modeling techniques, rate of progress demonstration for NOx and VOC emissions compliance with contingency requirements, and an implementation schedule for adoption of the proposed control measures.	NOP	07/27/2012
2005111092	Gillespie Field 70-Acre Redevelopment Project San Diego County El Cajon--San Diego The project proposes to redevelop a vacant 70-acre site located in the southeastern corner of Gillespie Field with aviation uses consistent with Federal Aviation Administration instruction, federal grant assurances, and Airport planning documents. Within the 70-acre site, the County would construct approximately 15 acres of public infrastructure improvements (i.e. new taxiways, apron area, drainage, and utility facilities) and provide approximately 55 acres for private	NOD

2008082086	Napa River Rutherford Reach Restoration Project Napa County Napa--Napa The Reach 8 project is component of the larger Napa River Rutherford Reach Restoration Project which is intended to enhance or restore aquatic and riparian habitats along 4.5 miles of the Napa River between Zinfandel Lane and the Oakville Cross Road. Reach 8 of the project extends approximately 4,085 feet along the river, between the Rutherford River, crossings to the north and the Oakville Road crossing to the south. This portion of the Project includes inset floodplain benching, sediment removal, bank stabilization, invasive species control, and placement of in-channel grade control and habitat enhancement structures. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement Number 1600-2012-0074-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Richard Thomasser, Napa County Department of Public Works. 2012011028	10 HOV - Add one HOV Lane in the Median in Each Direction from Puente Avenue to SR 57 Caltrans #7 Baldwin Park, West Covina, Pomona--Los Angeles Project proposes to add one high Occupancy vehicle lane in the east and west bound directions in the center median of I-10 from Puente Avenue to SR 57.	NOD	
2012042041	West County Detention Center Solar Array Installation and Restoration Project Contra Costa County Richmond--Contra Costa Contra Costa County intends to install photovoltaic equipment at the West County Detention Center. The photovoltaic equipment will be installed within the existing detention center parking lot which is approximately 2.8 acres. The equipment will consist of solar panels, brackets, wiring, electric meters and other associated equipment required to provide solar-electric energy to the facility. The equipment will be installed in six solar panel arrays of approximately 3,263 modules. The arrays are typical carport style, 9 feet high and will not require the removal of any parking stalls and will provide a shaded parking area. Limited removal of native and non-native landscaping trees and shrubs may be necessary to ensure the arrays are not shaded by vegetation. Landscaping will be installed around the perimeter of the parking lot farther from the proposed arrays to provide screening of the detention center without shading the arrays.	NOD

2012068369	Native Plant Harvest and Propagation Program Tahoe Conservancy --Placer A native plant harvest and propagation program would be developed to provide planting material and rooted stock for various restoration, erosion control, and habitat enhancement project activities. Willow, cottonwood, and other native species would be harvested from State lands, in the locations described above, and transported directly to project sites or propagated and grown for use on future projects. Harvesting techniques follow best management practices and recognize sustainable harvests of less than 25% from healthy, vigorous plants during the appropriate season. Harvest techniques in meadow environments would be restricted to the use of low impact methods and hand crews. No significant resources such as eligible cultural finds or protected biological species are known to be present in the harvest areas.	NOE	
2012068370	Boulder Salvage from Conservancy Property Tahoe Conservancy --Placer Boulders would be removed from a Conservancy-owned urban lot for use on various habitat restoration and land management projects. Salvaging activities would include the use of low-impact equipment for moving the boulders and placing them in a truck for transportation. Best management practices such as wattles and steel plates would be used to reduce any potential impacts to water quality or vegetation, and any minor soil disturbance caused by the salvage effort would be restored immediately following the activities. The boulders reside within a recent project area that has received a full CEQA analysis, and no biologically or culturally significant resources have been identified within the boulder area.	NOE	
2012068371	Hospital Data Closet Upgrades University of California, Davis Sacramento--Sacramento The Hospital Data Closet Upgrades project will install cooling systems, additional electrical power, and equipment racks in several existing data closets in the Main Hospital building at UC Davis Medical Center on Stockton Blvd in Sacramento.	NOE	
2012068372	University Tower ICU 5th Floor Remodel University of California, Davis Sacramento--Sacramento The University Tower ICU 5th Floor Remodel project will remodel an existing Intensive Care Unit in the Main Hospital of the UC Davis Medical Center on Stockton Boulevard in Sacramento. Remodel work floor will continue to house intensive care beds, with no increase in the numbers of beds beyond that existing.	NOE	
2012068373	Radiation Oncology Remodel University of California, Davis Sacramento--Sacramento The Radiation Oncology Remodel project will remodel portions of the existing Cancer Center at the UC Davis Medical Center on Stockton Boulevard in Sacramento. Remodel work will include modifications to the building in order to replace existing oncology equipment with new equipment, with no increase in use beyond that existing.	NOE

2012062080	Ordinance Amendment Application No. 2012-01 - Historical Site District Stanislaus County --Stanislaus Request to amend the Stanislaus County Zoning Ordinance, Chapter 21.44 - Historical Site District (H-S), by modifying the division of land standards and clarifying the number of permitted single-family dwelling units per parcel. Specific amendments to the H-S zoning district are proposed within sections 21.44.020 and 21.44.080.	CON	07/16/2012
2006111123	Tesoro Viejo Specific Plan (and Development Pursuant Thereto) Madera County --Madera The project proposes a mixed-use development consisting of up to 5,190 dwelling units (du), about 3 million square feet of commercial, retail, office, public institutional, and light industrial uses, and about 217.9 acres of mapped dedicated open space and recreational areas, not including an additional permanent 128.2 acres of mapped open space and additional unmapped parks and recreational areas associated with boulevards, trails, and neighborhood parks that would be incorporated in the developed areas.	EIR	08/13/2012
2011052005	Reid Hillview Airport 2006 Master Plan Santa Clara County San Jose--Santa Clara The proposed 2006 Reid-Hillview Airport Master Plan will allow for the Airport operations and growth through 2022. The 179-acre Reid-Hillview Airport is located in an area of the City of San Jose commonly referred to as the Evergreen area. The proposed Plan would supersede the 1982 Santa Clara County Airports Master Plan, which currently guides the growth and development of Reid-Hillview Airport. Proposed airport improvements include realignment of the existing runways to meet FAA requirements, addition of a new taxiway and improvements to existing exit taxiways, formalization of existing helicopter landing pads, and construction of an above-ground fuel storage area. The Plan would also allow for the development of 11.08 acres for non-aviation commercial retail uses to increase Airport financial self-sufficiency and allow for the installation of 6.4 acres of photovoltaic solar arrays to serve the Airport.	EIR	08/13/2012
2011071051	JRK 01-11 Alta East Wind Energy Project by Alta WindPower, LLC. Kern County Tehachapi--Kern Kern County and the Bureau of Land Management have jointly prepared a DEIS/EIR for general plan amendments, zone changes, and a CUP to allow for the construction of up to 106 wind turbines which would generate a maximum of 318 megawatts of energy. The project consists of 2,592 acres, of which 2,024-acres are located on federally-owned BLM land, with the remaining 568-acres being located on privately-owned land. Request includes the construction of ancillary facilities and supporting infrastructure and the concrete batch plants are necessary to provide concrete and materials for turbine, system block, substation, and building foundations. The application also proposes to incorporate flood hazard zoning for areas subject to flooding. Access to the project is provided by SR 58.	EIR	08/13/2012

	The project will also include the construction of 14 miles of 230-kV overhead transmission corridor, which would ultimately connect to the SCE Windhub Substation.		
2012032045	Santa Clara University Art/Art History Building Project Santa Clara, City of San Jose--Santa Clara Rezone from downtown commercial (CD). Public (B) and Public/Historic combining (B/HT) to planned development (PD) to construct a three-story 44,111 sf art and art history building and four-level parking garage containing 383 parking spaces as part of the expansion of the Santa Clara University Campus; in conjunction with the demolition of 11 existing buildings, including up to four historic structures.	EIR	08/13/2012
2010112070	Watt Avenue Walmart Sacramento County --Sacramento Demolish the existing warehouse store and second building and redevelop the site with a Walmart, refurbished driveways, and reconstructed parking lot.	FIN	
2011122028	State Route 58 (Rosedale Highway) Widening Project Bakersfield, City of Bakersfield--Kern FYI: Final The project proposes improvements to SR 58 (known locally as Rosedale Highway) from west of Allen Road to SR 99. The project is located within the City of Bakersfield and in portions of unincorporated Kern County. The project proposes to build two additional lanes (one in each direction) on SR 58 between Allen Road and SR 99. Other improvements include minor changes, such as restriping approach lanes to provide an additional turn lane on the side street approaches to SR 58. With the proposed improvements, SR 58 would increase from a four-lane roadway to a six-lane roadway from Allen Road to SR 99. In addition, a grade-separated rail crossing would ultimately be built where SR 58 crosses the San Joaquin Valley Railroad rail line between Mohawk Street and Landco Drive.	FIN	
2012061095	POM Wonderful, LLC Whole Fruit and Juice Extraction Plant Expansion Regional Water Quality Control Board, Region 5 (Central Valley) --Fresno POM Wonderful, LLC proposes to expand its whole fruit and juice extraction activities at its plant located at 5286 South Del Rey Avenue in Del Rey, Fresno County. Expansion will include an increase in pomegranate fruit production resulting in an increase of wastewater, construction of up to two wastewater storage ponds (total of 18 acres in size), planting up to 291 acres with alfalfa to receive wastewater for irrigation, and constructing a new building (37,180 sf) for existing arils processing (recovery of pomegranate seeds for retail instead of sending to waste streams).	MND	07/30/2012
2012061097	Geotechnical Investigations on the Santa Clara River near Saticoy, CA United Water Conservation District Oxnard--Ventura United is proposing to conduct geotechnical testing in order to properly design the foundation for a hardened ramp at the Freeman Diversion Dam. This ramp has been identified as a means to improve passage conditions for steelhead and the Pacific lamprey compared to passage conditions afforded by the current fish	MND	07/30/2012

2012062079	<p>ladder. The testing would take place adjacent to the upstream side of the dam and involves construction of a temporary pad (80ft x 350ft), using adjacent river sediments, to support testing equipment. The pad would be removed immediately after testing is complete. Equipment includes a bulldozer, 2 excavators, 2 loaders, a drill rig, and a backhoe. The project would take approximately 21 working days and is scheduled for November 2012. The work area would be dewatered to the extent feasible by management of United's facility operations. Access is from the north via the top of the dam. Best management practices will be used during all work to minimize or prevent effects on water and sediment quality. A maximum of 2.1 acres of river bed would be temporarily disturbed, and noise from equipment would be above 69 decibels within 500 feet of the work site.</p> <p>Upper Grape Creek Flow Restoration and Offstream Storage Project Sotoyome Resource Conservation District Healdsburg--Sonoma</p> <p>The purpose of this project is to increase the amount of instream flow during critical dry periods, while providing a reliable water source to meet existing vineyard water needs. This project consists of an off-stream water storage pond that will be used as a non-potable water supply for vineyard irrigation and frost protection. This does not represent any new or increased use of water on the property, but rather an alternative source of water to replace a flashboard dam and direct diversion that are currently being used. The pond will be constructed using soil from on-site, and will be lined using a polyethylene liner. The pond embankments will be stabilized using engineered geotechnical methods, as well as native plants that will enhance the riparian corridor. The pond will be filled with water from a new groundwater well that is not hydrologically connected to the stream, and that will be drilled as part of this project. In order to comply with required setbacks, this project will also include the relocation of the septic system.</p>	MND	07/30/2012
2012062082	<p>Expert Tree Service Contra Costa County Orinda--Contra Costa</p> <p>The applicant seeks approval of land use permit to legalize the existing Expert Tree Services green waste recycling facility. The application includes several variances as follows:</p> <ul style="list-style-type: none"> - 3.41-acres proposed, 5-acre required minimum for a lot line adjustment (to be processed administratively), - dirt/gravel parking lot proposed, paved parking lot required, - no parking space markings provided, strips required, - no wheel stops provided, wheel stops required, - 4-foot side yard proposed, 20-foot side yard required minimum for an existing water tank <p>The project does not include any new buildings, grading or tree removal. The site does host several wireless telecommunication facilities on the northwestern portion of the property which are not affected by this application. The business office for the Expert Tree Services company is located off-site within the Orinda area.</p>	MND	07/30/2012

Access to the proposed telecommunications facility will be through an approximately 400-foot-long access road on-site which connects with Fisher Lane, a private road, located along the eastern property line.	Neg	07/30/2012
2012062085	Asta Construction - U-94-13-MR3 and RP-94-01-MR3 Solano County Suisun City--Solano The application proposes to remove 100,000 cubic yards of clay soils for levee repair from a 6.7 acre portion of a 250 acre parcel.	Neg	07/30/2012
2010022015	Kiefer Landfill Special Planning Area (SPA) Sacramento County Rancho Cordova--Sacramento This EIR on the proposed GreenCycle project is being circulated as a Draft Supplemental EIR. The GreenCycle project was most recently under consideration paired with the Kiefer Landfill Special Planning Area/GreenCycle Draft EIR (2009-PWE-00173), released in February 2012. However, the GreenCycle component of that 2012 Draft EIR draws much of its analysis from the previous stand-alone GreenCycle FEIR, certified in March 2010 (2005-0161). That 2010 FEIR analyzed a site directly across Kiefer Boulevard from the two sites analyzed in the 2012 DEIR. The proximity of the site analyzed in 2010 FEIR to the two proposed sites analyzed in the 2012 DEIR, allowed much of that previous	SIR	08/13/2012

	analysis, such as traffic, air quality, noise and odors, to apply to the current analysis. The GreenCycle project consists of the construction and operation of a solid waste facility that will accept and process a maximum of 600 tons per day or an average of 450 tons per day of green waste. The facility will recycle green waste into usable compost. The project will operate under the terms and conditions of a Solid Waste Facilities Permit using an aerated static pile (ASP) methodology for composting green waste.		
2002102092	2003 Long Range Development Plan University of California Davis--Yolo The proposed project will serve as a support facility to the Teaching and Research Winery and the August a Busch II Brewery and Food Science Laboratory. The project will house equipment and processes to enable research as well as advance the adjacent facilities toward complete energy self-sufficiency.	NOD	
2008021126	Public Safety Enterprise Communications (PSEC) Project, Green River Communication Site U.S. Army Corps of Engineers --Riverside, San Bernardino, San Diego Construction of one new communication site that will consist of an emergency services communication tower and equipment shelter within a fenced compound. The site will carry a 25 year lease with an option of an additional 25 years, with the Santa Rosa Band of Cahuila Indians, a federally recognized Indian Tribe.	NOD	
2009102098	Park Plaza 08PLN-00000295 and 10PLN-00000-00344 Palo Alto, City of Palo Alto--Santa Clara Request by Hohbach Realty Company Limited Partnership for Architectural Review (AR) of a three story building on a 2.41-acre (net) site for ground floor research and development uses (50,467 sq. ft.) and 84 residential units (106,920 sq. ft.) on a single parcel zoned General Manufacturing (GM). Director's AR approval on July 12, 2011 was appealed to Council prior to the effective date of the approval.	NOD	
2010022009	Brewer Road Bridge at Branch of Curry Creek Bridge Replacement Placer County --Placer The California Department of Fish and Game is executing Lake or Streambed Alteration Agreement number 1600-2011-0225-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, City of Roseville. The Placer County Department of Public Works intends to replace the existing Brewer Road Bridge at the Branch of Curry Creek with a wider, reinforced bridge to improve roadway safety and to comply with American Association of State Highway and Transportation Officials (AASHTO) standards.	NOD	
2010122012	300 Airport Boulevard Burlingame, City of Burlingame--San Mateo The Project Site is located to the north of US 101, immediately adjacent to the San Francisco Bay to the north and east and Sanchez Channel to the west. The applicant proposes to develop a new office/life science campus, consisting of two 5-story buildings, one 7-story building and one 8-story building totaling 730,000 square feet, a two-story amenities building (37,000 SF), a 5.5 level parking	NOD

	structure, realignment of Airport Boulevard, and Bay Trail improvements and connections on 18.13 acres. Applications include amendments to the Bayfront Specific Plan to increase the allowable floor area ratio (FAR) from 0.6 FAR to 1.0 FAR, rezoning of a small portion of the site from APS to APN, amendments to the APN zoning district regulations and sign code, vesting tentative parcel map, development agreement, conditional use permit for day care use and commercial design review. The changes to the Bayfront Specific Plan and the Anza Point North (APN) zoning district regulations would apply to entirety of the APN subarea and zoning district, which includes the 300 Airport Boulevard Site and an adjacent undeveloped 8.58-acre area, the 350 Airport Boulevard Site. The 350 Airport Boulevard Site is under separate ownership and no development application has been submitted for this site. This EIR analyzes the development of the 300 Airport Boulevard Site on a project-specific basis, and analyzes the potential effects of proposed planning and zoning changes on the 350 Airport Boulevard Site on a programmatic basis.		
2011052046	Alexander Crossing Apartments Project Napa, City of Napa--Napa The subject of this Notice of Determination is the General Plan Amendment associated with the development application for the Alexander Crossings Apartment Project, approved by the City of Napa City Council on June 26, 2012. The Alexander Crossing Apartments Project would construct a 134-unit apartment complex on a 6.39-acre site at 190 and 200 Silverado Trail.	NOD	
2011121083	French Valley Creek Slope Protection at Skyview Road and Water Supply Crossing Riverside County Flood Control and Water Conservation --Riverside Installation of slope protection measures along both sides of French Valley Creek required as a condition of approval of the Bella Sol and Capistrano developments (Tracts 32049 and 29114) and installation of a redundant waterline across French Valley Creek (to be used in emergencies should the main water supply be disrupted) required by the Eastern Municipal Water District. 	activities have greatly altered the fire regime and increased fuel loading in Tahoe basin forests. Much of basin was cut over during a short period of time with near clear cut logging prior to 1900. This logging resulted in a wide divergence from historic forest conditions and what we see today is an even-aged forest dominated by white fir which is still in the process of intense competition and self-thinning. The critical objective of this project is to continue the implementation of a long-term fire and fuels management program on areas that have been previously treated, which includes re-burn of previously treated and previously burned sites.

2012068394	TCU Blanchard Fire Station Acquisition Forestry and Fire Protection, Board of --Tuolumne The proposed project is to acquire the existing Blanchard Fire Station property which is currently leased by the State of California since 1944. The lease expires in December of 2012. Efforts by Cal Fire's staff to secure a lease renewal were unsuccessful since the owner does not want to encumber the real property with a leasehold. Funds were identified in the 2011-2021 budget year to acquire the site, after the landowner listed the station and surrounding +/-110 acres for sale, identified as Assessor Parcel Number 071-190-35 and 071-190-33. The fate of the station is unknown if the Lessor sells the site to a third party. To ensure continued fire protection from this existing station, the State asked the landowner to sell a portion of real property to the State.	NOE	
2012068395	Ben Lomond Camp Landscape Construction Project Forestry and Fire Protection, Board of --Santa Cruz The project will create decorative landscape features directly adjacent to the main office of the Ben Lomond Conservation Camp. The finished features will consist of a koi pond, a replica (non-functioning) 1800' era water tower and water wheel, and a combination split rail fence and three foot high rock wall surrounding the site.	NOE	
2012068396	1270 and 1276 West Lake Boulevard Shoreline Restoration, No. 1600-2011-0213-R2 Fish & Game #2 --Placer The project is limited to pulling back of steep and eroded, unstable bank on lake shore. Installation of full height rock boulder slope armor with graded rock revetment in front of eroded undercut trees on bank. Installation of rock revetments for protection of toe of slopes on remaining property to a height of at least 4 feet above the high water mark. Additional protection/stabilization will include installation of permanent soil erosion control mats and drip irrigation systems to support ground cover vegetation to control further erosion along slopes and over installed low rock revetments.	NOE	
2012068397	1310 West Lake Boulevard, Shoreline Stabilization Fish & Game #2 --Placer The project proposes to install structural and vegetative measures to stabilize general bank erosion that includes slope raveling and undercutting of trees. The project area is along the easterly 140 lineal feet of the shorezone bank and along 15 feet near the westerly property line. Structural measures include installation of rock revetments with intermixed plantings along shoreline and a 4 foot high concrete retaining wall to correct undercut banks and eroding slopes in front of the beach house and pier.	NOE	
2012068398	Chowchilla Bypass Control Gates Retrofit Water Resources, Department of Firebaugh--Madera In early 2010, seals were installed on the gates to prevent nuisance flows down the bypass when gates are closed. In order to accommodate the increased forces acting on the gates from the new seals, 2-inch square tube struts, and a 3/8" thick banding plate need to be added (weilded to existing structures) to stiffen	NOE
