STATE CLEARINGHOUSE

NEWSLETTER

June 16-30, 2007

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **June 16-30, 2007**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov/clearinghouse/clearinghouse.shtml

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Senior Planner

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 212) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 2001 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

MEMORANDUM

DATE: February 13, 2007
TO: State Agency CEQA and Intergovernmental Review Coordinators
FROM: Scott Morgan, Senior Planner
SUBJECT: Distribution of Environmental Documents in CD-ROM Format

The State Clearinghouse has received an increasing number of requests from local and state lead agencies to distribute CEQA documents to state reviewing agencies in an electronic format, typically CD-ROM. The most common reason for these requests is to reduce cost. CD-ROMs are cheaper for the lead agency to reproduce and mail, and cheaper for the State Clearinghouse to distribute, especially in the case of multi-volume documents.

The State Clearinghouse has distributed EIR's and EIS's in CD-ROM format for state agency review and comment since August 1, 2003. Based on our experience with those documents, a survey conducted of state reviewing agencies and the potential cost savings to local and state agencies, we are extending this policy to other environmental documents including Negative Declarations, Mitigated Negative Declarations and Environmental Assessments. The State Clearinghouse will accept environmental documents under the following terms:

- CEQA Lead agencies may provide copies of draft environmental documents to the State Clearinghouse for state agency review in an electronic format. The document must be on a CD-ROM in a common file format such as Word or Acrobat.
- Lead agencies must provide fifteen (15) copies of the CD-ROM to the State Clearinghouse. In addition, each CD-ROM must be accompanied by 15 printed copies of the DEIR summary (as described in CEQA Guidelines §15123), executive summary, or introduction section of a Negative Declaration or Mitigated Negative Declaration. The printed summary allows both the State Clearinghouse and agency CEQA coordinators to distribute the documents quickly without the use of a computer.
- Final environmental documents may be provided in CD-ROM format without a printed summary. Distribution of the final documents is optional under CEQA.
- Federal lead agencies may send electronic copies of environmental documents to the State Clearinghouse in the same manner described for CEQA lead agencies. Distribution of NEPA documents to state agencies through the State Clearinghouse is encouraged pursuant to Presidential Executive Order 12372 and NEPA §102 (42 USC §4332)
- All notices of preparation must continue to be provided in printed format.
- Please provide one Notice of Completion Form with all submittals.

If your agency has difficulty downloading and reviewing any environmental documents please contact:

Scott Morgan, Senior Planner
916-445-0613
scott.morgan@opr.ca.gov

Thank you for your cooperation in the CEQA review process.

**ENVIRONMENTAL DOCUMENT FILINGS WITH THE STATE CLEARINGHOUSE
1999 through 2006**

All CEQA documents filed with the State Clearinghouse are available for viewing on the Internet at <http://www.ceqanet.ca.gov/>

- EA Environmental Assessment (federal)
- EIS Draft Environmental Impact Statement (federal)
- OTHER Other types of documents, including Final EIRs, Early Consultation notices, plans, etc.

CEQA Documents

Key for abbreviations of Document Type:

CON	Early Consultation Notice
EIR	Draft Environmental Impact Report
SIR	Supplemental EIR
SBE	Subsequent EIR
EIS	Draft Environmental Impact Statement
EA	Draft Environmental Assessment
JD	Joint Document (CEQA/NEPA)
FONSI	Finding of No Significant Impact
Neg Dec	Negative Declaration/Mitigated Negative Declaration
NOE	Notice of Exemption
NOD	Notice of Determination
NOP	Notice of Preparation (of an EIR)
Oth	Other type (none of the above)

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<u>Documents Received on Monday, June 18, 2007</u>			
2006102011	City Center Lofts Woodland, City of Woodland--Yolo The City Center Lofts project includes the construction of two buildings and 307 parking spaces. The buildings would include commercial, live work, and residential loft areas. Total residential units for the proposed project would be 161, including the live-work units, a total of 41,864 sq. ft. of commercial space and 2,626 sq. ft. of non-commercial land uses.	EIR	08/01/2007
2006121045	Ocean Park Village Specific Plan Hawthorne, City of Hawthorne--Los Angeles The project involves the reuse of the 25 acre site of the former Hawthorne Mall with a mixed use center. The new development will include approx. 450 residential units, 229,300 sq. ft. of retail/restaurant space, 590,000 sq. ft. of office space, and 4,284 parking spaces in revitalized and new structures.	EIR	08/01/2007
2005121076	Venice Pumping Plant Sluice Gate Replacement Project (W.O. SZC11536) Los Angeles, City of --Los Angeles The Department of Public Works proposes to replace an aging, damaged sluice gate that would threaten the efficient and safe conveyance of sanitary sewer flows if not implemented. Although not an emergency, the project is preventative in nature; its implementation would reduce the likelihood of system malfunction in the near future. The existing sluice gate is located within the Venice (Sewage) Pumping Plant (VPP) and has been in place since the plant's construction in 1959. The gate is used to control the flow of wastewater through the plant, an effectively functioning gate allows plant operators to manage the volume and speed of wastewater through the system. The existing gate is badly corroded and is incapable of being operated effectively. A new gate is intended to enhance the efficiency and safe operation of the plant- this is particularly important given the plant's currently taxed capacity and the likelihood that it will continue to receive an increasingly greater volume of sewage flow in the future. In order to replace the gate, the sewage flow, which currently goes through the VPP, must be redirected to temporarily bypass the plant. Sewage flow bypass or diversion would be implemented by installation of pumping equipment on the bank of the Grand Canal at two existing maintenance hole locations, and by conveyance of the diverted flow via a temporary bypass pipeline also placed above-ground along the canal (Esplanade), from Driftwood Street to Hurricane Street. The pump sets and bypass pipeline would be in place for approx. four months, and in operation for approx. one month. During the four month period, the Driftwood Street/ Strongs Drive intersection will be temporarily closed to through traffic.	MND	07/17/2007
2007061080	General Plan Amendment No. 2007-005, Zone Change No. 2007-003, and Specific Plan No. 2007-002 Apple Valley, City of Apple Valley--San Bernardino The HCD Group, LLC has initiated General Plan Amendment No. 2007-007, Zone Change No. 2007-003, and Specific Plan No. 2007-002. The request is to consider a change to the General Plan amending the General Plan Land Use Designation from Residential Low Density (R-LD, 1 dwelling unit per 2.5 to 5 acres) to Specific	MND	07/17/2007

	<p>Plan (SP) for the subject area, a Zone Change to consider changing the zoning designation from Residential Agriculture (R-A, 1 dwelling unit per 2.5 to 5 acres) to Specific Plan (SP) for the subject area. The Specific Plan "The Mansion at Apple Valley" entails the adoption of the Specific Plan, which shall facilitate the development of a senior congregate living facility with a maximum of 340 residential units. The senior housing facility shall include 240 independent residential units, 56 villas, 37 assisted living units, and 16 skilled nursing bed units. The Specific Plan site shall also include: a two story main building that serves as the administration, entry, and dining hall facility; gardens and courtyards; a service and maintenance building, and a maximum of 574 parking spaces. The project includes landscaping, lighting, and perimeter fencing, and security gated entrances.</p>		
2007061082	<p>City of Carlsbad North Agua Hedionda Interceptor (NAHI) Western Segment Realignment Project (EIA 07-01) Carlsbad, City of Carlsbad--San Diego</p> <p>The project involves relocating an existing sewer line, located along the north shore of the Agua Hedionda Lagoon, further inland. The new sewer line will be installed by utilizing 1,821 linear feet of micro-tunneling techniques and approx. 436 linear feet of conventional open trench construction with eleven new access holes and rehabilitation of four existing access holes.</p>	MND	07/17/2007
2006061124	<p>Wasco Industrial Park Project Wasco, City of Wasco--Kern</p> <p>The City of Wasco is facilitating the master planning of an industrial park east of the City's existing city limits and south of Highway 46. The industrial park area at build out will be 1,640 more or less acres. The project includes General Plan Amendments, Sphere of Influence Amendment, Annexation, Precise Development Plans, and Cancellation of Williamson Act Contracts. The project will include new rail service by Burlington Northern Santa Fe (BNSF) company, new internal rail spurs, roads, and connection to Highway 46.</p>	NOP	07/17/2007
2007061076	<p>San Diego Creek Channel (Upper Newport Bay to Interstate 405) Programmatic Operations and Maintenance Project Orange County Santa Ana--Orange</p> <p>The proposed project is an adoption and implementation of an O & M Manual intended to serve as a comprehensive guide for maintenance and operation of the San Diego Creek Channel, Orange County Flood Control District Facility No. F05. OCFCD activities under the O & M Manual would be a continuation of past routine and emergency channel maintenance activities in most of the same areas and using many of the same techniques. The O & M Manual contains a series of guidelines for the recommended inspection activities and schedules, notifications, reporting, and the routine maintenance activities and their related frequencies for the project area. The O & M Manual also includes procedures to notify regulatory agencies and monitoring plans to evaluate biological impacts and water quality during scheduled maintenance activities.</p>	NOP	07/17/2007

2005102010	Issuance of Standardized Hazardous Waste Facility Permit for Clean Harbors San Jose, LLC, Rail SPUR Transfer Facility Toxic Substances Control, Department of San Jose, Milpitas--Santa Clara The project consists of issuance of Series "A" Standardized Hazardous Waste Facility Permit (Standardized Permit) for Clean Harbors San Jose, LLC, Rail Spur Transfer Facility (Lenfest Rail Facility), San Jose, California. In accordance with California Health and Safety Code (H&SC), section 25201.6, the Department of Toxic Substances Control (DTSC) is proposing to issue a Standardized Permit to Clean Harbors Lenfest Rail Facility for the operation of a non-Resource Conservation and Recovery Act (RCRA) hazardous waste rail transfer facility located at 660 Lenfest Road, San Jose, California. The Standardized Permit is based on the Standardized Permit Application (Permit Application) submitted by Clean Harbors, dated September 15, 2004, with the following revisions dated March 18, 2005, September 23, 2005, and February 2007. The Permit Application identifies all possible waste codes and waste types, the estimated annual generation rate, and the number of storage units. A detailed description of Clean Harbors Lenfest Facility's waste characterization procedures and operations are provided in the Permit Application. The Standardized Permit identifies the transfer area and their associated capacities.	Neg	07/17/2007

2007062085	SR 87 Sanitary Sewer Detour, Phase 2 Microtunneling Boring Machine Recovery Operations San Jose, City of San Jose--Santa Clara The project is the recovery of a microtunneling boring machine (MTBM) from under the east bank of the Guadalupe River. The recovery operation involves the temporary installation of a "recovery pit" around the tunneling machine so that it can be retrieved at its current location, The project will require temporarily diverting the Guadalupe River around its current location of the MTBM and installing the recovery pit. Construction required for the recovery of the machine includes temporary placement of a cofferdam in the river, clearing of a material and equipment staging area, creating a pad for machinery to operate from, the temporary placement of sheet piles around the perimeter of the pit and the excavation of approx. 200 cubic yards of soil from within the pit area to allow hoisting of the MTBM from its current location. Upon recovery of the machine, the pit will be backfilled, the sheet piles, work pad and cofferdam removed, and the riverbed and staging area restored to their original condition. Approx. 1,740 sq. ft. of riparian woodland will be planted to restore the area affected by the project.	Neg	07/17/2007

2007069035	Alcosta Shell Service Station Expansion/Remodel Dublin, City of Dublin--Alameda Request for Rezoning, Conditional Use Permit and Site Development Review approval to demolish the existing car wash, cashier kiosk, fuel dispensers and canopy cover and construct a new 2,162 square foot convenience store, a 1,264 square foot automated car wash, new fuel dispensers and a new canopy cover at 8999 San Ramon Road.	NOD	
2007069036	Dublin Gateway Medical Center Hospital and Garage Dublin, City of --Alameda Request for Planned Development Rezone and Stage 1 and 2 Development Plan, Conditional Use Permit and Site Development Review approval to construct a 6-story, 100 bed hospital building and 5-level parking garage.	NOD	
2007069037	DBP 06-002; Log No. 05-14-029; Simmoncrest Apartments San Diego County Department of Planning and Land Use --San Diego This Density Bonus Project proposes to develop nine residential apartments on a 0.512-acre lot. The apartments will be three stories and the height of the buildings will be less than the maximum 35 foot limit. Three floor plans are proposed, two with three bedrooms, 2 baths, and one with 2 bedroom and two baths.	NOD	
2007068180	Lake Britton Bridge Caltrans #2 --Shasta Amend 9-12-06 CE/PCE for the Lake Britton Bridge Replacement project to conduct additional subsurface geotechnical drilling at site 4, north of the lake. Funded under A&E contract #49434. Helicopter will be used to transport drill rig, accessory equipment, and water tanks from off-site staging area, which is approved at post mile (PM) 25.5. While traveling over the lake between staging area and drill site, the helicopter will fly at least 1,000 feet above the slopes to avoid nesting osprey. No water will be pumped from the lake. No grading, road building, or timber falling will occur. Activities will be subject to Site Specific Spill Prevention and Countermeasure Plan (SSSPCP) Drilling to be performed in mid to late June 2007. No permits will be required.	NOE	
2007068181	Cottonwood Truck Inspection Facility Caltrans #2 --Tehama Existing concrete pavement is failing at the I-5 NB Cottonwood Truck Inspection Facility (built under EA 02-28740). This condition has caused the failure of the Weigh in Motion (WIM) system. Caltrans proposes to replace three WIM scales and the concrete pavement before and after each scale. All work will occur within the pavement area, including staging. An approved off-site is available for excess material. No permits will be needed.	NOE	
2007068182	Rehabilitate Distressed Pavement Caltrans #2 --Siskiyou The California Department of Transportation and the Federal Highway Administration will rehabilitate distressed pavement on State Route 97 in Siskiyou County over the full width of the existing highway, including paved shoulders. Two paving strategies will be used. Over all but a half mile of the project the paving	NOE

2007068189	Lights Creek Storm Damage Repair SAA #1600-2007-0140-R2 Fish & Game #2 --Plumas The project proposes to repair five washout locations along Diamond Mountain Road and to repair an eroded site next to a concrete bridge. The project includes the cleaning out of culverts, placement of a new culvert and repair of embankments.	NOE	
2007068190	Warner Valley Road Storm Damage Repair SAA #1600-2007-0139-R2 Fish & Game #2 --Plumas The project will re-establish the channel configuration altered by high winter flows. Plant resources and gravel from the existing bar will be pushed into the eroded area on the south side of stream up stream from the bridge structure.	NOE	
2007068191	Kings Creek Storm Damage Repair SAA #1600-2007-0136-R2 Fish & Game #2 --Plumas Existing bridge abutment will be lifted and stabilized. The grave bar upstream, downstream, and beneath the bridge will be removed.	NOE	
2007068192	South Weed Infrastructure - Mary's Drive Roadway Improvements Project Weed, City of Weed--Siskiyou The project consists of widening Black Butte Drive, Kellogg Drive, and Mary's Drive including construction of curb and gutter, and asphalt overlay to provide improved infrastructure and public safety for current and planned commercial development. The roadway improvements will not increase roadway capacity as no new lanes will be constructed. The widening will add between 10 and 20 feet to the existing right-of-way and up to 20 feet of paving in some areas. The road is adjacent to wetlands at the intersection of Mary's Drive and Kellogg Drive. The project will fill a total of 0.093 acre of riparian wetlands. The impact to wetlands will be mitigated for on-site. The total project area is approximately 8.25 acres. The project also entails reconstruction of an existing roadside ditch that drains into Black Butte Creek (aka: Black Butte Springs Drainage Ditch). The existing roadside ditch is used to accommodate the overflow that comes from a settling pond southwest of the Crystal Geyser Plant. The overflow drainage ditch will be temporarily diverted while the roadside ditch is reconstructed with rock armor. No work will be done in the Black Butte Creek Drainage. Final erosion control measures will consist of seed, straw, rock check dams, and silt fences to protect the stream. Flows in the Black Butte Creek drainage are currently being conveyed under Mary's Drive via a 24" culvert. The 24" culvert and Black Butte Creek will not be disturbed. In addition, three culverts on Mary's Drive will require modifications. None of these culverts are connected to the Black Butte Creek drainage. All three culverts convey low volumes of water and remain dry throughout much of the year. Modifications to these culverts will be made during the dry season when there is	NOE

	no flow.		
2007068193	Barrelli Creek Pump Maintenance Fish & Game #3 --Sonoma Applicant, Gallo Vineyards, Incorporated proposes to divert water from the Russian River for vineyard irrigation. Water is diverted under riparian water rights via a 1,000 gallon per minute pump and distributed to 600 acres of vineyard on the Barrelli Ranch. Diverted water is either applied directly to the crops, or may be stored in one of the reservoirs on the property for a period of less than 30 days. The pump is located on the west bank of the river just south of Asti with an intake located in a side channel which connects to the main channel of the river during periods of high flow, but becomes isolated from the main channel during low flow periods. Beginning sometime in April, Gallo will access the point of diversion with equipment via an established path to clear flood debris from the diversion point and from the side channel that connects to the main channel. If necessary, the side channel will be excavated to approximately 8 feet wide by 4 feet deep to allow water to flow to the pump intake. The excavation of the channel begins at the pump intake and proceeds toward the low flow channel of the river and so that any silt generated by opening the side channel remains in the side channel, or is pulled into the pump. The pump intake is fitted with a screen with design specifications that meet Department of Fish and Game screening criteria. Issuance of Streambed Alteration Agreement Number 1600-2006-0785-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2007068194	Union Bank Tentative Parcel Map Sacramento County Dept. of Environmental Review --Sacramento The proposed project consists of a Tentative Parcel Map to divide 1.7 +/- acres into two lots on property zoned SC.	NOE

2007064003	Patrol Boat Pier and Floating Dock, USCG Sector San Diego Harbor Drive Facility U.S. Coast Guard San Diego--San Diego Under the Proposed Action, the USCG would construct a 242 foot long pier and floating dock to the east of the existing pier and floating dock for use by patrol boats. The floating dock would consist of three main components: pile supported grated fixed pier, grated gangway, and concrete floating dock. The pile supported grated fixed pier would be supported by two steel H-piles and the fixed pier itself would be 5 feet wide by 46 feet long. It would be at a fixed elevation and would lead from the shore to the grated gangway. The grated gangway would be hinged on one end and would be 5 feet wide by 36 feet long. It would join the pile supported grated fixed pier to the floating dock. The dock would be 10 feet wide by 160 feet long and made of concrete. It would float with the changing tidal elevation. The pier/floating dock would be constructed perpendicular to shore and be located between existing adjacent pier/floating dock (to the west) and the sea plane ramp (to the east). The fixed pier and gangway would extend far enough from shore to span the Eelgrass (<i>Zostera marina</i>) bed that runs parallel to the southern shoreline of the Facility. Utilities including sewage, potable water, electricity, and telecommunications would run through the floating dock. The proposed pier/floating dock would be of similar size and scale as the existing pier/floating dock to the west.	EA	07/18/2007

2005062027	River Park General Plan Amendment and Rezoning West Sacramento, City of West Sacramento--Yolo The project would modify the planned development of the Southeast Village. The area is currently planned for residential development ranging from low to high densities, neighborhood commercial, WRC, elementary school, open space, and parkland uses. The project would amend the current land use designations, increasing the residential units by approx. 900. The project also includes changes to the General Plan and Zoning Map (West Sacramento Municipal Code, Title 17) to generally increase residential densities and add recreational opportunities. A large lot tentative map and planned development standards are also proposed.	EIR	08/03/2007
2006101028	University House Meeting Center and Chancellor Residence University of California, San Diego La Jolla--San Diego The University of California proposes to replace the existing University House facility at UC San Diego. University House serves as the designated residence of the UCSD Chancellor and provides an important venue for academic, social and community outreach events and meetings in support of the campus mission and to strengthen the University's relationships with the Greater San Diego community.	EIR	08/02/2007
2006111135	Sunset and Gordon Project Los Angeles Community Development Agency Los Angeles, City of--Los Angeles The proposed project involves the demolition of the existing uses on site and the construction of a 324,513 square-foot, mixed-use project including 311 dwelling units, 40,000 square feet of creative office space and 13,500 square feet of ground floor retail (including 8,500 square feet of restaurant space). The project will also include the development of a 21,571 square-foot public park. The project will provide 508 on-site parking spaces in three subterranean levels and three above grade levels. The proposed project will be approximately 23 stories with a residential amenity deck on the third floor. The proposed project will retain and incorporate portions of the structural/architectural components of the existing Old Spaghetti Factory Building. A signage plan for onsite and off-site advertising will also be included.	EIR	08/03/2007
2005062057	Gladding Parkway and Nicolaus Road Overhead Lincoln, City of Lincoln--Placer The proposed project would construct an alternate route around the eastern portion of the downtown Lincoln area in order to (1) relieve areas of congestion within the City and (2) accommodate increasing traffic as the City grows to buildout of the General Plan. The project would include reconstruction of existing travel lanes and installing a median along East Avenue from SR 193 to Ninth Street. At Ninth Street, a new roadway would be constructed and curve west and northwest towards Gladding Road, continuing southwest towards SR 65 where a new overhead (bridge) over SR 65 and UPRR tracks would be constructed. The overhead would connect to Nicolaus Road near the intersection with K Street. The overhead between the eastern and western portions of the City would help reduce the hazards associated with vehicles, emergency vehicles, school buses, and pedestrians crossing State Route 65 and the Union Pacific Railroad tracks. The project would also include underground utility line installation and landscaping.	FIN

	fish habitat structures, removal of non-native invasive plants from the riparian zone, and replanting native vegetation.		
2007062092	PA-0600359 San Joaquin County Community Development Department Lathrop--San Joaquin This project is a truck stop and an automobile gas station that includes a 10,300 sq. ft. building for a convenience store and fast food restaurants, and a diesel fuel island and a gasoline fuel island.	Neg	07/18/2007
2007062093	Gibson Vine Estates Subdivision Vacaville, City of Vacaville--Solano This project is a proposal to subdivide a nine acre parcel located at the south east corner of Gibson Canyon Road and Vine Street into eight single family custom home lots. The property has a General Plan designation of Estate Residential (.5-3 units/acre) and is currently zoned RE-1, Residential Estate, one lot/acre minimum. This project will use a shared private driveway for seven of the eight lots. The application includes a request for a Tentative Parcel Map to create the new lots, a rezoning of the property to RE-10, and a request for a Planned Development to address development and design standards for custom homes on these lots.	Neg	07/19/2007
2007062094	Canyon View Subdivision Vacaville, City of Vacaville--Solano The project is a proposal to subdivide an existing 14.08 acre parcel of vacant residentially zoned property on the eastern side of Gibson Canyon Road to create a 15 lot custom single family residential development. The property is bounded by Gibson Canyon Road on the west, a hillside residential property on the north and south, and the Bascherini/ Solano Irrigation District Reservoir, undeveloped land, and an existing residence to the east. The site is dominated by steep rounded hills with many areas of slope greater than 25%. The subdivision layout will consist of a main cul-de-sac that will run from Gibson Canyon Road east towards the Bascherini Reservoir and will have three private driveways that provide access for the future custom homes to the cul-de-sac.	Neg	07/19/2007
1999041035	Draft SEIR 597, Second Amendment to the 2001 Prima Deshecha General Development Plan Orange County San Juan Capistrano--Orange The proposed project includes: 1) A change in the limits of temporary disturbance for Zones 1 and 4 from 800 acres to 1078 acres; 2) Re-design of the PDL desilting basin for Zone 4; 3) implementation of features to supplement water supply in Prima Deshecha Canada stream channel; 4) Presentation of excavation phasing limits for Zone 4 and update of fill and excavation phasing limits for Zone 1; 5) Development of a pre-mitigation plan to offset impacts to biological resources through project build-out; and 6) Development of a plan identifying regional environmental enhancement opportunities on site. 2007068215	Spring Creek Emergency Watershed Protection Project Sotoyome Resource Conservation District Santa Rosa--Sonoma Project is being implemented on behalf of Mr. David Parker. Mr. Parker contacted the Natural Resource Conservation Service (NRCS) following damage to his property during the flood of January 2006. Upon investigation of damage on Mr. Parkers' property, NRCS determined that soil erosion, watershed impairment, and threat to life and property were the result of this natural disaster (flood). Emergency activities proposed include installation of rock riprap keyed into the toe of the bank, bank sloping to a 1.5:1 slope, and native plant species installed where appropriate. Implementation of these proposed measures serves to prevent further soil erosion, restore watershed impairment, and address the immediate threat to life and property.	NOE

2007068223	Lower Bucks Lake Dam Outlet Valve Retrofit Project State Water Resources Control Board, Division of Water Rights --Plumas Pacific Gas and Electric Company (PG&E) proposes to retrofit the outlet valve on Lower Bucks Lake Dam to facilitate compliance with streamflow release increases required by the Federal Energy Regulatory Commission (FERC) Order issued January 11, 2006, amending the Bucks Creek Project license (FERC No. 619). The project is located on lands within the Plumas National Forest, where PG&E owns and operates the hydroelectric project under special use permit from the U.S. Forest Service. Project retrofit work will include modifications to the outlet valve at Lower Bucks Lake Dam to increase capacity, allowing for flow release equal to or greater than 8 cubic feet per second (cfs) as seasonally required. Work consists of closing an upstream gate on the low level outlet to allow replacement of the existing downstream valve with a pressure reducing valve and hood assembly. Additionally, the existing in-line flow meter will be replaced, requiring new conduits for power and signal wiring and access improvements are proposed in the immediate area of the dam face. Streamflow improvements are proposed in the immediate area of the dam face. Streamflow releases will be maintained throughout the work phase, and the affected area will be restored after completion of construction activities.	NOE

	would be constructed within the floodplain of Coon Creek to passively capture a portion of the overbank 100-year storm event flood flow from the creek.		
2006081147	Proposed Elementary School Site Located at Mesa Drive and Eleanor Avenue, Riverbank, Stanislaus County, California Riverbank Unified School District Riverbank--Stanislaus The Riverbank Unified School District (RUSD) has an immediate need to construct a new elementary school (preK-5) to accommodate population growth in the region. The site is located southeast of the intersection of Eleanor Avenue and Mesa Drive. Currently the subject property is composed of 9.18 acres of vacant land. It is anticipated that the proposed school would likely have an eventual student enrollment of about 600 students. This student population will be derived from the influx of homebuyers moving into the RUSD area. Typical school buildings and uses will include classrooms, administrative offices, playgrounds, library, parking (for teachers and staff, visitors), internal circulation roads, and landscaping. The buildings will be one-story, wood and concrete framed buildings.	NOD	
2006092038	2007 Amendment to the Redevelopment Plan for the Hughson Redevelopment Project Hughson Redevelopment Agency Hughson--Stanislaus The 2007 Amendment proposes to add territory ("Added Territory") to the area included within the Hughson Redevelopment Project ("Original Project Area"). The 2007 Amendment will provide for a variety of possible redevelopment activities pursuant to the California Community Redevelopment Law (CCRL; Health and Safety Code Section 33000 et seq.), within the Added Territory, and will help further similar redevelopment activities within the Original Project Area. Such activities are designed to help remedy deficient physical and economic conditions in the Added Territory and the Original Project Area. Redevelopment activities may include, but may not necessarily be limited to: provision of affordable housing, construction and/or rehabilitation of structures; infrastructure upgrades for wastewater, drainage, water and circulation systems, community facilities improvements, economic development, and other projects and programs as may be appropriate and necessary in compliance with the CCRL and Community needs. While not proposed as specific projects at this time, these actions are possible activities that may be undertaken within the Added Territory over the 30-year effective life of the Redevelopment Plan, as proposed to be amended by the 2007 Amendment. 2005111024	San Timoteo Creek Habitat Enhancement Project Loma Linda, City of Loma Linda, Redlands--San Bernardino The proposed project is a habitat enhancement and vegetation restoration plan on an approximately 30-foot wide corridor along the San Timoteo Creek Channel for approximately 10 miles. Areas along the creek would be re-established as a wild life corridor with native vegetation.	FON	
2007061091	General Plan Amendment No. 842, Change of Zone No. 7342, and Conditional Use Permit No. 3518 Riverside County Planning Department --Riverside General Plan Amendment No. 842 proposes to increase the Floor Area Ration (FAR) cap prescribed in the Commercial Retail land use designation from (0.20-0.35 Floor Area Ratio) to (0.20-1.0 Floor Area Ratio). Change of Zone No. 7342 proposes to amend the current zoning classification of the subject property from Scenic Commercial Highway (C-P-S) to General Commercial (C-1/C-P) to allow self storage and RV parking facilities. Conditional Use Permit No. 3518 proposes a 114,765 sq. ft. self storage facility on a Floor Area Ratio of 0.939 on 2.87 acres with a 48.63% lot coverage. The self storage facility consists of: a 360 sq. ft. postal annex/ copy service, a 2,300 sq. ft. leasing office, 4 buildings- building A with 11,377 sq. ft., building B with 14,297 sq. ft., building C with 4,179 sq. ft., building D with 84,912 sq. ft. (3 stories)- first, second, and third level (28,304 sq. ft. each), nine RV parking spaces, seven loading spaces, eight standard parking spaces, two ADA parking spaces, and 6.59% of landscaping.	MND	07/20/2007
2007061095	City College Facilities Master Plan San Diego Community College District San Diego--San Diego Facilities Master Plan to accommodate up to a maximum of 25,000 students, including projects to be funded by Propositions S and N as well as the future replacement and addition of other buildings and facilities of 43.4 acres.	MND	07/20/2007
2007061101	Proposed Tentative PLN07-00054 Victorville, City of Victorville--San Bernardino To allow for the development of a 62 lot single-family residential subdivision.	MND	07/23/2007
2007062098	Proctor Heights Path Project Santa Rosa, City of Santa Rosa--Sonoma The project consists of constructing a 5 foot wide path from Alice Street to Del Rosa Avenue. The path would connect an existing residential neighborhood with the shopping area at the foot of the hill. The path would comply with the Americans with Disabilities Act (ADA) and require almost no tree removal.	MND	07/20/2007
2007062099	East Elk Grove Industrial Park (EG-06-1004) Elk Grove, City of Elk Grove--Sacramento The proposed project is a Design Review and Tentative Subdivision Map for a light industrial park comprised of six buildings with twelve tenant spaces, totaling approx. 96,550 sq. ft. The buildings range in size from 12,650 sq. ft. to 19,800 sq. ft. Approx. 80% of each building will be built out for warehouse space, the remainder will be used for office space. The site is approx. 7.25 acres in size located in an urbanized area of Elk Grove. The project also includes two variances	MND	07/20/2007

	to reduce the required landscaping on the north and south sides of the project. On the north side, the landscaping would be reduced from the required 25 feet to 10 feet, and on the south side the required six foot landscape area would be excluded, both to provide for required parking and drive aisle area.		
2007062103	Highway 49 Widening at La Barr Meadows Caltrans #3 Grass Valley--Nevada The California Department of Transportation (Caltrans) and the Federal Highway Administration (FHWA) propose to upgrade a portion of the interregional transportation facility (State Route 49) in Nevada County from Ponderosa Way to north of Lode Line Way near Grass Valley to accomplish the following objectives: 1) Improve safety by restricting access to State Route (SR) 49 through the elimination of driveways, 2) Correct roadway deficiencies within the project limits by bringing SR-49 up to current design standards, and 3) Accommodate existing and projected future traffic volumes at a level of service (LOS) D or better through the year 2025. Construction activities will consist of widening the existing roadway from two lanes to four lanes with a continuous median/ left turn lane, realign the horizontal alignment, removal of at-grade intersections, construction of a frontage road system to funnel traffic from existing at-grade intersections and private driveways to new signalized intersection (La Barr Meadows and SR-49), and concrete barriers between the SR-49 and the new frontage road system.	MND	07/23/2007
1997061005	Section 14 Master Development Plan Palm Springs, City of Palm Springs--Riverside The City of Palm Springs has determined that a Supplemental EIR (SEIR) that "supplements" and bolsters the 2004 Final EIR/EIS's analysis of water resources impacts is the appropriate mechanism to address and resolve any lingering uncertainty surrounding the ability of the local water purveyor to serve future development projects within Section 14.	NOP	07/20/2007
2007061092	Campus Master Plan California State University, Long Beach Long Beach--Los Angeles Due to area-wide and regional growth in student population, new academic, support, and other campus facilities are needed to accommodate a gradual growth in enrollment up to 31,000 FTE (full time equivalent) students by the 2015/2016 academic year. A Campus Master Plan is being prepared that provides for required instructional, research, faculty office, and administrative space, student services areas, student housing, sports and recreation, parking, and support facilities.	NOP	07/20/2007
2007061093	Santa Anita Sediment Removal Project Los Angeles County Department of Public Works Arcadia--Los Angeles The proposed project consists of draining the Santa Anita Reservoir, removing sediment and debris from the reservoir by dry excavation, transporting the sediment from the reservoir (via conveyor belt and truck), and placing it in an existing sediment placement site. The sediment transport route extends approximately 1.5 miles from the reservoir on the north to the sediment placement site on the south. The proposed project also includes improvements to the Santa Anita Dam, which would involve modifications to the dam's inlet/outlet works, including the construction of a new riser. Sediment removal activities are	NOP	07/20/2007

	<p>geotechnical studies. Studies for the proposed future project will be undertaken, determinations made, and the conclusions circulated at a later date. An environmental review was conducted to determine if drilling would result in an adverse effect upon the environment. The review consisted of ground surveys, database inquiries for sensitive biological and archaeological resources. Based on these studies, it was determined that the geotechnical drilling would not result in a potentially significant adverse effect upon the environment.</p>		
2007068233	<p>Neilsen Road Illegal Disposal Site Remediation California Integrated Waste Management Board --El Dorado</p> <p>The primary illegal disposal area is located on a steep slope below Neilson Road and contains an estimated 65,000 cubic yards of solid waste. The waste consists of illegally disposed wood waste and tree trimmings, construction and demolition debris, and inert debris (primarily concrete and asphalt from road demolition). Several hundred cubic yards of miscellaneous metals and household wastes are scattered elsewhere on the property.</p> <p>The California Integrated Waste Management Board (CIWMB) will clean up the site using an Environmental Services Contractor hired specifically for landfill and disposal site remediation. The Board contractor will remove and transport non-recyclable solid waste to an approved disposal facility. Metals and other recyclable materials will be transported to appropriate facilities. Recyclable wood waste will be segregated, ground on site, and transported to a local co-generation plant for use as fuel. Non-recyclable wood waste and trimmings will be segregated and burned on site using approved air curtain burners. Concrete and asphalt will be segregated, ground on site, and used to supplement erosion control and site roads. Drainage structures and erosion control devices will be constructed and all disturbed areas graded and revegetated.</p>	NOE

2007068237	Installation of Meteorological Towers at Iron Mountain and Gene Pumping Plants Metropolitan Water District of Southern California Unincorporated--San Bernardino The Metropolitan Water District of Southern California proposes to install meteorological wind towers and wind data acquisition equipment at the Iron Mountain and Gene pumping plants in order to collect data for future analysis of a potential wind power project for the Colorado River Aqueduct.	NOE	
2007068238	Central Region Elementary School #14, Site 9A Toxic Substances Control, Department of Los Angeles, City of--Los Angeles This project involves Department of Toxic Substances Control's (DTSC) approval of a Removal Action Workplan (RAW) which will be carried out at the Proposed Central Region Elementary School #14, Site 9A (Site) for excavation and off-site disposal of soils contaminated with lead.	NOE	
2007068239	PG&E 8490 Occidental Road HPR Box Replacement Project Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa Sebastopol--Sonoma The project involves removing an existing 17" by 30" HPR box from a drainage ditch (wetlands). This box will be replaced with a new 17" by 30" box placed to the north of the current site in developed ruderal vegetation in a residential yard. The existing gas line will be trenched (12" wide) to check the condition of the connecting pipe and the gas main; the connecting pipe will have to be extended approximately 10 to 12 feet northward to attach the new HPR box. The excavation area will be refilled and excavated areas to be re-contoured to pre-project contours. The site will be re-vegetated with locally collected seed, existing rhizomatous vegetation and local materials if necessary. Vegetation will be inspected the following spring for adequate cover and additional planting will be done if necessary. The proposed action should have a minimal to negligible affect on the watershed of Atascadero Creek. The affected wetlands are located in a roadside drainage ditch on the northern side of Occidental Road.	NOE	
2007068240	Maintenance Dredging at the ConocoPhillips Refinery Marine Terminal Regional Water Quality Control Board, Region 2 (San Francisco Bay), Oakland --Contra Costa Maintenance dredging of approximately 39,000 cubic yards of sediment, to a maximum project depth of -40 feet mean lower low water, with a two-foot overdredge allowance, with disposal of the dredged sediments at the Carquinez Strait Disposal Site (SF-9) in San Francisco Bay.	NOE	
2007068241	Emergency Water Supply Well -- Central Heating and Cooling Plant General Services, Department of Sacramento--Sacramento The Department of General Services has approved the installation of a water supply well to serve the department's Central Heating and Cooling Plant in downtown Sacramento. The new well will be installed on the southwest corner of the Central Plant site and housed in an underground vault. The well will be designed to pump approximately 3,000 gallons per minute from deep aquifers under the property. The project will not result in an overall net increase in groundwater pumping from that which has historically occurred to serve the Plant.	NOE

2007042094	Water Supply Reliability Project Westport County Water District --Mendocino The Westport County Water District proposes to construct a new 100,000-gallon to 150,000-gallon water storage tank and a new water supply test well at the site of the District's existing 100,000-gallon water tank and supply well in Westport, California, located on the Mendocino County coast. The existing pad will be enlarged to accommodate the addition of a new tank and test well at that location. The site is accessed by an existing graveled road that will continue to service the site in its present configuration during construction and operation of the proposed new tank and test well. The project includes surveying, geotechnical evaluation, site preparation, foundation construction, installation of the new tank and test well, and connecting the new tank to the existing system. The objectives of the proposed project are to increase the reliability of the District's water supply in the face of state-mandated bypass flows, late-onset seasonal rains, and the need for additional water storage for fire protection.	NOD	
2007051060	Emblem Elementary School Two-Story Classroom Addition Saugus Union School District Santa Clarita--Los Angeles The project, as proposed, will involve the construction of a two-story addition to the school, whereby 15 relocatable classrooms will be replaced with 16 new classrooms. Construction if this site will require the grading of approx. 1 acre. The project will increase student capacity, as compared to that remaining after the above referenced modernization and construction, to 811 students. The project will also involve minor improvements to the school playground, including improvements on the irrigation and field turf and the installation of a backstop, as well as the addition of approx. 800 sq. ft. outdoor stage outside the multi-purpose room and a covered entry to the administrative buildings. The project will also include low level walkway lighting in the vicinity of the newly constructed two story classroom structure.	NOD	
2007052030	Woodridge Estates Phase III Subdivision (PSUB T20060705) Placer County Planning Department --Placer Proposed to create six separate 40,000 sq. ft. minimum single-family lots with a private road and a gated entry-exit.	NOD	
2007052032	Delta Interpretive Facilities, Flood Protection Project East Bay Regional Parks District Oakley--Contra Costa The East Bay Regional Park District proposes to raise the elevation of building sites to reduce flood risks on the 40-acre Lauritzen site within the 1,656-acre Big Break Regional Shoreline parkland. The Lauritzen site is located on the shore of Big Break Estuary and is the main public entrance to Big Break Regional Shoreline. The elevation of the Lauritzen site is close to sea level and prone to floods, with most of the site within a 5- or 100- year flood level.	NOD	
2007068243	70 and 71 Ardilla Road Slide Repair Fish & Game #3 Orinda--Contra Costa The project includes repair of a landslide to prevent sediment from entering the creek and to protect property. Issuance of a Streambed Alteration Agreement Number 1600-2006-0758-3 is pursuant to Fish and Game Section 1602.	NOE

	roads are worn out and need repair. The new paved roads will benefit the SWP personnel by providing safe, all-weather roads for access to SWP facilities.		
2007068251	Seal and Pave Roads and Parking Areas - 2007, Oroville, Delta, San Luis, and Southern Field Divisions Water Resources, Department of --Alameda, Butte, Fresno, Los Angeles, Contra Costa, ... Repair existing worn pavement by grinding of existing asphalt-concrete pavement for recycling, applying and grading the base material, applying new asphalt-concrete, and paving and sealing of primary and secondary roads along the California Aqueduct, including various parking areas and grounds around and near some of the pumping plants and public use areas. No currently, undisturbed ground will be impacted and no sensitive species or their habitat will be affected. The repaved roads benefit DWR personnel and the people of California by providing safe, all-weather access for operations, maintenance, and public use of SWP facilities.	NOE	
2007068252	Interim Measures Workplan for Former Trident Plating Facility Toxic Substances Control, Department of Commerce--Los Angeles The project is an Interim Measure (IM) for the excavation of metals and chlorinated solvent contaminated soil that resulted from past plating operations at the facility. Based on the sampling reports, the contaminant levels in the soils contain ranges up to 155 ppm total lead, 16.4 ppm hexavalent chromium, 20 ppm arsenic, and 180 ppm tetrachloroethene. The proposed excavation will be to a depth of 4.5 feet in most areas except an area in the southwest corner of the property where the depth will be up to 7.5 feet. The target Interim cleanup levels for the metal contaminated soil is 50 ppm total lead, 13 ppm arsenic, 12 ppm hexavalent chromium, and 1.3 ppm tetrachloroethene based on Preliminary Endangerment Assessment risk/hazard calculation for soil. Confirmation soil matrix sampling will be conducted after excavation to ensure that the cleanup levels have been achieved. The confirmation sampling data along with the soil and soil vapor sampling data collected during the excavation will be used to perform a health risk assessment for the site.	NOE	
2007068253	Closure Plan Amendment for Gallade Chemical Incorporated's Hazardous Waste Drum Storage Area Toxic Substances Control, Department of Santa Ana--Orange DTSC is amending the Gallade Chemical, Incorporated's Closure Plan (CP) that DTSC approved on October 1995 to close the hazardous waste drum storage area (HWDSA) with on-going remediation and to require post-closure care, including deed notification and Land-use Covenant. Post-closure care shall include continuation of the groundwater pump-and-treat and dual phase soil vapor extraction (SVE) to clean up the affected environmental media until the closure performance standard can be met. 	support, and technology transfer.		
2007068255	Demonstration of a Dual-Function Thermodynamic Cycle for Increasing Turbine Efficiency Energy Commission Avenal--Kings Demonstrate a newly developed dual-function cooling cycle technology that captures the relatively low-grade heat output of the turbine and converts it into low temperature combustion air for inlet-cooling. This technology will increase the turbine output by 15% without increasing the natural gas use or emissions. The research site is state owned prison facility in California. The turbine is currently restricted from operating for a longer duration due to limits on NOx emission. The power output is further reduced during summer due to higher ambient temperatures and reduced moisture. The prison buys additional power from the local utility and pays high demand charges. The proposed project will validate the ability of the dual-cycle thermodynamic cycle to improve turbine efficiency and economics without additional emissions.	NOE	
2007068256	Vanadium Redox Battery Demonstration for Industrial Load Management Energy Commission Sacramento--Sacramento This proposed advanced energy storage project, located at an industrial site in the Sacramento Municipal Utility District (SMUD) territory, will demonstrate the end-user and grid benefits of a new distributed energy storage technology. SMUD, through a subcontract with the VRB vendor, will design the Vanadium Redox Battery system to meet the customer's needs, install the battery system, and collect and analyze technical performance and economic data on the customer-side of the meter. This project will utilize a 20-kW 9-hour (180-kWh) distributed energy storage system to provide load shifting from peak periods to off-peak periods, provide power quality and VAR support, and reduce demand spikes onto the distribution grid while significantly lessening peak demand on the grid.	NOE	
2007068257	Tehachapi Wind Resource Area Expansion Study Energy Commission Bakersfield--Kern Transmission planning, wind resource integration and environmental issues are the next items on the critical path for developing the expanded Tehachapi-Mojave Area. Significant technological progress has been made since the first wind turbines were installed in California; and sensitivity to community, environmental and land-use issues has increased. To support development of an area-wide process, proposed research activities entail using the state-of-the-art monitoring technologies and standardized protocols to collect information essential for planning, analysis and continued tracking of the wind development in the area. This research concentrates on two areas: characterizing and forecasting wind resources in the newly defined wind resource area utilizing state-of-the-art modeling and forecasting techniques coupled with on-site monitoring of data; and testing protocols related to the newly developed avian siting guidelines.	NOE

	<p>within the City of Los Angeles. Implementing the LARRMP recommendations over the near-term planning period (5 to 20 years) and the long-term planning period (20 to 50 years) constitutes the proposed action evaluated in the PEIR/PEIS. The general project area includes approximately one-half mile on each side of the 32-mile River corridor that begins near Owensmouth Avenue in Canoga and continues downstream to Washington Boulevard, near the northern boundary of the city of Vernon. The Plan intends to revitalize the general environment of the Los Angeles River by providing improved natural habitat, economic values, and water quality, as well as recreation, and open space amenities. The Plan area includes several locations where the potential exists for restoring a more natural riverine environment along the River, while maintaining and improving levels of flood protection. Creation of treatment wetlands in and around the River, to treat storm flows and to restore missing linkages of fragmented habitat, would also be pursued through LARRMP projects. LARRMP purposes include the provision of improved public access in the River to the River and reinvestment in the urban system that results in economic growth.</p>		
2007061105	<p>TR53159/RENV200400074 Los Angeles County Department of Regional Planning --Los Angeles</p> <p>The proposed project is a request for a Tract Map to re-subdivide parcel 5 of tract 43171 into ten (10) single-family lots (ranging in size from 11,196 sq. ft. to 25,271 sq. ft.) and one (1) 749,823 sq. ft. open space lot. 83,000 cubic yards of grading is proposed and will be balanced on the site. The three existing structures located on the site will be demolished. Ingress and egress access will be provided by proposed Street A which intersects Lowridge Place.</p>	MND	07/24/2007

	spread of Arundo down the Sacramento River. The proposed project is located in Shasta County northeast and east of Redding, California. The SCWMA is an organization of Federal, state, and local agencies and organizations committed to the eradication of invasive and noxious plants in Shasta County.		
2007062112	Sutter Lakeside Hospital Wellness Campus Lake County Community Development Department Lakeport--Lake The proposal is to develop 126,000 sq. ft. of new medical offices, laboratories, clinics, training, education, and medical support, with 504 parking spaces and landscaped open space. An oak woodland mitigation plan is proposed as 69 oak trees are to be removed.	Neg	07/24/2007
2007062114	City of Ceres Housing Element Update Ceres, City of Ceres--Stanislaus State Housing Law (Government Code Section 65580) requires an assessment of housing needs and an inventory of resources and constraints relevant to meeting housing needs. This report is an update of the Housing Element previously adopted on August 24, 1992. The 2007 Housing Element Update is a comprehensive statement by the City of Ceres of its current and future housing needs and proposed actions to facilitate the provision of housing to meet those needs at all income levels. The purpose of the Housing Element is to identify current and projected housing needs and set forth goals, policies, and programs that address those needs. The Housing Element has been prepared to meet the requirements of State law and local housing objectives.	Neg	07/24/2007
2007062118	U.P #07-12, Lario Oil and Gas Company (Nicholas Paul Remlinger, Surface Owner) Tehama County Planning Department Corning--Tehama To establish a natural gas well, Slow Hand East, for production purposes in an ES; Exclusive Agricultural Zoning District. The well site is located east of Corning, on the west side of Gaylord Ave., at a point approx. 2,519' north and 2,411' east of the southwest corner of section 29.	Neg	07/25/2007
2007062119	Leroy Blodgett - Minor Subdivision and Boundary Adjustment - MS0717C /AB0715C Del Norte County Planning Department --Del Norte The applicant proposes a boundary adjustment involving three contiguous parcels. the result size of the subject parcel allows for the creation of four parcels and a remainder, each approximately two acres in size. The parcel is located on a hillside and is subject to the County's hillside development criteria. A biological assessment and archaeology report was also prepared to address potential impacts to the project area. Each parcel will be served with an onsite sewage disposal system and public water connections.	Neg	07/25/2007
2007062120	Eddie and Diana Mendes - Minor Subdivision - MS0718 Del Norte County Planning Department --Del Norte Minor subdivision of a two parcels into 4 parcels and a remainder. The parcels will have engineered onsite septic systems. And will be served by a community water system.	Neg	07/25/2007

<u>Documents Received on Monday, June 25, 2007</u>			
2006051049	High School No. 9 Antelope Valley Union High School District Palmdale, Unincorporated--Los Angeles The District proposes to construct a new comprehensive high school on a 73-acre site. The high school campus will be developed in a "four-step" manner, with each terrace stepping down so that each successive cluster lies lower than the previous one, with classrooms located on the top terrace and athletic fields on the lowest terrace. The school campus is designed to serve 2,500 students in the near term, and master-planned to serve up to 3,000 students over the long term.	NOD	
2006052115	Breckenridge Lane Water Project Anderson, City of Anderson--Shasta The project proponent will install 6,900 feet of new sewer line in order to expand water service. Construction will be accomplished almost entirely with open trench techniques; with the exception of using "jack and bore" techniques under the railroad tracks and under Highway 273.	NOD	
2006091039	Ontario Gateway Specific Plan Ontario, City of Ontario--San Bernardino The proposed project is a development of a mixed-use master plan on ~41 acres of land. The subject property consists of two parcels of land. The project site would be transformed from an industrial distribution use to a vibrant, visitor, customer, and patient-serving area. The proposed project includes the extension of East Guasti Road ~1400 feet east from its present termination, ~220 feet east of Haven Ave. to connect sometime in the future to the existing East Guasti Road that terminates at the eastern boundary of the project site.	NOD	
2006101135	Long Term Water Agreement Amendment ("Hanby Parcel") Inyo County Planning Department Bishop--Inyo Amending one "exhibit Map" (Exhibit B) of the Long Term Water Agreement (LTWA) to include a 16.7-acre parcel of land (APN 008-010-31 adjacent to the City of Bishop ("Hanby Parcel") so that the parcel will be eligible to be included among parcels to be auctioned/released by LADWP.	NOD	
2006102081	Brooktrails Rubber Spillway Dam Project Brooktrails Community Service District --Mendocino The proposed project involves installation of an inflatable gateway and dam reinforcement at the spillway of an existing dam at Lake Emily on Dutch Henry Creek and Willits Creek, tributary to Mill Creek, tributary to Outlet Creek, tributary to the Eel River in Mendocino County. Installation of the inflatable spillway will increase the maximum water level of Lake Emily by three feet to accommodate original volumes. Water supplies water to the Brooktrails Township Community Services District (BTCSD) via a water treatment facility at Lake Ada Rose. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2006-0822-3 pursuant to Section 1602 of the Fish and Game Code to the project applicant, Mr. Mike Chapman, BTCSD. 2006111116	NorthGate Crossing Specific Plan Indio, City of Indio--Riverside The Northgate project is 88 acres to be developed as a mixed use project including commercial, retail and office uses with 398 residential units with open space and parkland. It includes a General Plan Amendment, Change of Zone, Conceptual Specific Plan/Project Master Plan, Development Agreement, Conditional Use Permits, and Tentative Parcel Map 32910.	NOD	
2007022120	Conditional Use Permit #2006-007, Weststeyn Dairy Glenn County Public Works and Development Services Agency Willows--Glenn Construct and operate a dairy, consisting of 4,957 cows.	NOD	
2007031143	Coachella Valley Composting Facility (CVCF) Riverside County Waste Management Department Coachella--Riverside The proposed project is to re-permit the existing Coachella Valley Composting Facility and to implement changes in operations.	NOD	
2007031155	Moreno Valley Regional Water Reclamation Facility Expansion to 18 MGD Eastern Municipal Water District Moreno Valley--Riverside The Eastern Municipal Water District (EMWD) Moreno Valley Regional Water Reclamation Facility (MVRWRF) collects and treats municipal sewage and produces recycled water for reuse. This facility currently has a nominal treatment capacity of about 16 million gallons per day (MGD). The MVRWRF service area is experiencing a high growth rate and based on current sewage flow projections, the MVRWRF's treatment capacity must be increased. To accomodate projected sewer flow increases in the service area, EMWD is proposing to expand the MVRWRF's raw sewage capacity to 18 MGD. EMWD will construct new facilities and modify existing facilities at the MVRWRF. Upon completion, the proposed plant expansion will provide greater treatment capacity as well as more effective and efficient operation of the treatment facilities.	NOD	
2007032052	Sanders Minor Subdivision Humboldt County Community Development Services --Humboldt A Parcel Map Subdivision of an approximately 11 acre parcel into two parcels of +/- 5.5 acres each. Parcel 2 is currently developed with a residence, garage, and on-site water and sewage disposal systems. Parcel 1 is vacant and proposes to obtain water from the well on Parcel 2 via easement. Appropriate testing results for water and sewage disposal for both parcels has been provided for Environmental Health's review and approval. Both parcels will be accessed by Salmon Creek Road, a County road which meets the requirements of both the Subdivision and Firesafe Regulations. The subject parcel is adjacent to the southbound lanes of Highway 101. No exceptions are requested at this time.	NOD	
2007041031	Giffen, TPM 20826RPL^2; ER 04-09-008 San Diego County Department of Planning and Land Use --San Diego The project is a tentative parcel map to subdivide a 5.17 acre parcel into two residential lots. The site contains an existing house, accessory structures, and an existing well on Parcel 1 that will remain. The project will be served by on-site septic systems and imported water from the Ramona Municipal Water District.	NOD

Weissenberger Minor Subdivision, Coastal Development and Special Permit Humboldt County Community Development Services --Humboldt A merger of APNs 400-031-09 and -10 and resubdivision to result in four parcels. The Parcel Map subdivision will create four parcels of approximately 6,658 sf, 5,034 sf, 5,434 sf, and 26,531 sf. A Coastal Development Permit is required for the subdivision and the subsequent construction of a single family residence with attached garage on Parcels 1 and 2. The residences will be two-story (maximum height of 30 feet) and have a maximum size of 800 square feet with an attached two car garage of approximately 800 square feet below and approximately 200 square feet of decking. The finished floors of the residences will be at or above the 30 foot elevation above mean sea level. A Special Permit is requested to allow a secondary dwelling unit to remain on proposed Parcel 3 and to allow the shop to remain on proposed Parcel 3 prior to the construction of a primary residence. Minimal grading will be required and up to ten eucalyptus trees may be removed to accommodate subdivision improvements. The parcels will be served by the Manila Community Services District.	MND	07/25/2007
2007061112	Zone Change 181 and Part B of General Plan Amendment 07-01 California City California City--Kern The project involves two sets of contiguous Single Family Residential R1 lots and re-zoning the four lots to Neighborhood Commercial C1. This action would make the lots consistent and compatible with the other three corners of California City Boulevard and Neuralia Road to stimulate improvements to the properties which will beautify and enhance this important intersection. All four property owners have required the re-zoning. This is Part B of General Plan Amendment 07-01.	Neg	07/25/2007

	inaccessible until a specific use is specified. Street edge improvements would be constructed, but no other offsite improvements are required. Temporary fencing has been installed to secure the site and will remain during construction.		
2007061120	Domestic Water Treatment System Modifications Tranquility Irrigation District --Fresno Domestic Water System Treatment Modifications are proposed for Tranquillity Irrigation District in order to meet new arsenic drinking water standards. Project components include treatment and/or blending of groundwater from existing wells, backwash tanks and containment area, and pipelines from existing wells.	Neg	07/26/2007
2007061121	Tentative Tract Map 18336 Adelanto, City of Adelanto--San Bernardino A request by the applicant, Noris Karney III, to subdivide four parcels, totaling 27.64 acres, into 96 single family residential lots within the Medium Density Residential (R3-8) zoning district, located on the southwest corner of Holly Road and Jonathan Street.	Neg	07/26/2007
2007061123	Westar Plaza, LLC & Tentative Tract 17500 San Bernardino County Land Use Services Department Apple Valley--San Bernardino The proposed project is a General Plan Land Use District Amendment from Rural Living (RL) to Planned Development (PD) on 98 acres. The project includes a Preliminary Development Plan for 97 residential lots and two lettered lots for open space. Also filed concurrently is Tentative Tract 17500 which creates 97 numbered lots and two lettered lots in five phases, all on 98 acres. The parcel sizes vary between 3 acres and 18,000 sq. ft. Most of the proposed parcels will be approx. 0.5 acres on the average. The project is located on the west side of Kiowa Road, approx. 200 feet north of Mountain View Road in the unincorporated portion of San Bernardino County. Located within the Town of Apple Valley's sphere of influence, the project site is only a couple of blocks from the Town's city limits. Rock Springs Road bisects the project site. Equestrian trails will be provided along Kiowa Road as well as landscaping and split-rail fencing to maintain the rural look. There is some existing RS-1 zoning directly adjacent to the project site on the east side. The projects' overall density is consistent with this 1 dwelling per acre density requirement.	Neg	07/26/2007

2005032048	Eastern Neighborhoods Rezoning and Community Plans San Francisco Planning Department San Francisco--San Francisco To encourage new housing while preserving sufficient lands for necessary production distribution and repair (PDR) (generally, light industrial) businesses and activities, the San Francisco Planning Department proposes changes in the Planning Code (zoning) controls, as well as amendments to the General Plan, for an approx. 2,200 acre area on the eastern side of San Francisco. The proposal would cover all or part of three "Eastern Neighborhoods" included in the Department's February 2003 draft Rezoning Options Workbook: the eastern portion of the South of Market ("East SoMa"), the Mission, and Showplace Square/Potrero Hill. It would also include the Central Waterfront, which was the subject of the draft Central Waterfront Neighborhood Plan, published in December 2002 as part of the Better Neighborhoods planning process, because the Central Waterfront is adjacent to the Eastern Neighborhoods planning area and shares similar land use issues.	EIR	08/31/2007
2005092026	Water System Improvement Program San Francisco, City and County Planning Dept. --Tuolumne, Stanislaus, San Joaquin, Alameda, Santa Clara, ... The San Francisco Public Utilities Commission (SFPUC) proposes to adopt and implement the Water System Improvement Program (WSIP) to increase the reliability of the regional water system, which provides drinking water to 2.4 million people in San Francisco, San Mateo, Santa Clara, Alameda, and Tuolumne Counties. The WSIP is a program to implement the service goals and system performance objectives established by the SFPUC for the regional water system in the areas of water quality, seismic reliability, delivery reliability, and water supply through the year 2030. These goals and objectives provide the basis for a proposed water supply option to serve increased water demand, proposed system operations during drought and non-drought periods, and a series of facility	EIR	08/13/2007

	improvement projects to be constructed and implemented under the WSIP.		
2005101047	Pipeline Maintenance Program EIR Santa Clara Valley Water District San Jose, Santa Clara, Morgan Hill, Hollister--Santa Clara, San Benito The Santa Clara Valley Water District conducts routine maintenance on a variety of water conveyance systems. The maintenance activities have in the past been conducted on a case-by-case basis. This Pipeline Maintenance Program (PMP) defines and provides a guide for implementation a program for conducting conveyance system inspection, repair, and preventative maintenance activities in a consistent and environmentally sensitive manner. This document is designed to identify and guide the maintenance procedures for the conveyance systems, including the Bureau of Reclamation (BOR) owned Santa Clara pipelines. The PMP identifies the routine maintenance process, the activities, and defines Best Management Practice (BMPs) to protect the environment. The environmental effects of the PMP will be analyzed in a Program EIR/EA. The Program EIR/EA will describe the PMP, the environment that may be affected by the maintenance activities, the potential impact of the activities, and the BMP's that will be implemented to avoid or reduce environmental effects.	EIR	08/13/2007
1992032043	Cinnabar Meadows Subdivision Merced County The proposed project includes changes to the County General Plan and Santa Nella Community Plan to reduce residential density on the 77-acre project site.	FIN	
2004122039	Redwood Maintenance Facility Relocation Parks and Recreation, Department of Crescent City--Del Norte Redwood National and State Parks proposes to develop a maintenance facility in a 10 acre field (the "Midway" site) in the middle of the Aubell Ranch property near Crescent City, California. The new facility is needed to combine the maintenance operations of state and national parks into a single facility located closer to reliable transportation and supply networks for increased efficiency and long term cost effectiveness. It would replace a CDPR maintenance complex formerly located at Jedediah Smith Redwoods State Park that was destroyed by fire, and would also replace an aging NPS maintenance facility at the Requa area, in a geologically unstable area. The new maintenance facility would be sited outside of a 125 foot setback from an unmanned intermittent tributary of Elk Creek. The land occupied by the proposed facility and the rights-of-way for the utility systems, including a leach field, are currently owned by CDPR. As part of the project, the National Park Service boundary will be adjusted to include the entire 69.9 acre Aubell property. In addition, the State will transfer ownership of about 17 acres of the land included in the boundary adjustment to NPS for a 75 year period, after which the agreement can be renegotiated.	MND	07/30/2007
2007061134	Tecolote Creek Bridge Project Embarcadero Municipal Improvement District Goleta--Santa Barbara The Embarcadero Municipal Improvement District (EMID) proposes to install a pre-engineered single-span metal bridge across Tecolote Creek, creating a passage way between the Vereda Leyenda and Vereda del Ciervo streets within the Rancho Embarcadero neighborhood located in the western Goleta Valley. The bridge would be utilized primarily for equestrian/ pedestrian/ cycling uses, but would be constructed to withstand occasional vehicular use for emergency access	MND	07/30/2007

	only.		
2007061137	MediaFlo Facility at Dolcini Ranch Santa Barbara County Guadalupe--Santa Barbara MediaFlo proposes to construct and operate an unmanned telecommunications facility on the Dolcini Ranch. The proposed telecommunications facility would be contained in a 340 sq. ft. lease area consisting of a 50' monopole with one panel antenna, an equipment shelter with a GPS antenna, a backup diesel generator for emergency use and three microwave dishes mounted on the concrete pad.	MND	07/30/2007
2007062131	Hansen Rezone and Tentative Parcel Map P-07-24 Trinity County Planning Department --Trinity Rezone from Unclassified to Rural Residential 5 acre minimum, or more restrictive zoning; and a tentative parcel map to create 2 parcels from 10.96 acres.	MND	07/30/2007
2007062133	Stanfield Zone Change 05RZ-220 and Tentative Parcel Map 05T-106(2) Tuolumne County Community Development Dept. Sonora--Tuolumne Ordinance for Zone Change 05RZ-220 to change the zoning of a 21.1 +/- acre parcel from A-20:MX (General Agriculture, Twenty Acre Minimum: Mobilehome Exclusion Combining) as follows: 13.9 +/- acres to RE-5:MX (Residential Estate, Five Acre Minimum: Mobilehome Exclusion Combining) and 7.2 +/- acres to O (Open Space). Tentative Parcel Map 05T-106(2) to divide the 21.1 +/- acre project site into three parcels of 5.0 +/-, 5.0 +/-, and 5.6 +/- acres and a remainder of 5.5 +/- acres.	MND	07/30/2007
2007061138	Ventanas Business Center San Juan Capistrano, City of San Juan Capistrano--Orange The project proposes to construct eleven (11), multi-tenant, office-industrial buildings with a total of approximately 243,505 gross square feet (GSF) of building area with an 0.275 gross floor area ratio (FAR), and 0.404 net floor area ratio. Associated site improvements include the following: project entrances along Calle Arroyo; approximately 660 parking spaces stormwater drainage and water quality management, landscaping, trash enclosure structures, flood protection, park/open space, and related improvements. The project also proposes to stabilize the San Juan Creek bank edge, which has been previously subject to extensive storm erosion, using a steel sheet piling system. The proposed sheet piling would allow stream bank stabilization without the need for grading or construction within the creek corridor. This sheet piling method is intended to preserve the current natural character of the riparian corridor. The project proposes to relocate the existing General Plan-bikeway to a new alignment on the south side of the site generally along the top of the bank of San Juan Creek. Project implementation will necessitate the vacation of the Paseo Tirador public right-of-way (about 1.15 acres), and provide a license agreement for ingress, egress and parking over the 0.92-acre City-owned water service site. The project proposes to relocate portions of the existing sanitary sewer line and easement that traverse the property. The applicant has also requested that the City Council form a community facilities district (CFD) for the project which would fund certain infrastructure and pay certain impact fees.	NOP	07/30/2007

2007062130	<p>Swanston Station Transit Village Project Sacramento, City of --Sacramento</p> <p>The Swanston Station Transit Village Specific Plan is intended to create a safe and comfortable transit village with a mix of uses, and a bicycle-and pedestrian-friendly environment. In keeping with the City and the Sacramento region's goals to promote public transit ridership, the plan proposes higher-intensity infill residential development, small neighborhood-serving retail, small-to medium-scale professional office uses, and public open space- all within convenient walking distances of the light rail station. In order to achieve the village plan, two new General Plan land use designations would be applied to the area. The proposed Mixed Use land designation would promote a mixture of office, commercial, open space, and medium and high-density residential uses; the proposed Residential Mixed Use land use designation would support a mixture of residential densities, as well as commercial and/or office use. The specific plan will not result in any demolition or displacement of existing residential or business. The intent of the plan is to direct and support future development and redevelopment in a manner that accomplishes the transit village vision. The specific plan will include new development regulations to create the desired urban design character and form, and to allow a mix of uses that are more difficult to accommodate with traditional single-use zoning districts. These development regulations, which will replace the existing zoning and development regulations, will be combined with recommendations for traffic and circulations improvements for automobiles, transit, bicyclists and pedestrians; infrastructure and utility improvements; and public/open space amenities, including parks, pocket and transit plazas. The plan will also include a strategy for funding the proposed plan improvements over several phases.</p>	NOP	07/30/2007
2007062132	<p>Matsuoka General Plan Amendment and Rezone, Vesting Subdivision Map, Special Development Permit, Affordable Housing Plan, and Amendment to General Plan Policies Sacramento County --Sacramento</p> <p>The project consists of the following entitlement requests from Sacramento County:</p> <ol style="list-style-type: none"> 1. A General Plan Amendment to change the land use designation for 387.4 gross acres from General Agriculture (20 acres) to Agricultural-Residential. 2. A rezone for the same from AG-80 to AR-5. 3. A vesting subdivision Map to create 77 lots and 3 open space lots on 387.4 gross acres. 4. A Special Development Permit to reduce the size of the lots from 5 acres to 2.4 to 3.5 acres and to reduce the 250-feet of public street frontage for 43 lots. 5. An affordable housing plan consisting of the payment of in-lieu and affordability fees. Note: the developer has chose to pay in-lieu and affordability fees to meet the affordable housing obligation instead of constructing affordable housing units at the site. 	NOP	07/30/2007

GPA 06-004, ANX 06-003, ZC 06-003, CUP 06-01, TTM 32985, Map 06-024 and Environmental Assessment No. 07-004 Hemet, City of Hemet--Riverside Pre-zoning and implementing entitlements consisting of General Plan Amendment from County of Riverside Medium Density Residential (2-5 DU/Ac) and High Density Residential (8-14 DU/Ac) designations and City of Hemet Commercial and Rural Residential (0.4 DU/Ac) designations to City of Hemet Medium Density Residential (17-25 DU/Ac) designation, a Zone Change from the County of Riverside W-2 Controlled Development zone to City of Hemet R-3 Multiple-Family Residential zone, a Tentative Tract Map to allow up to 330 residential condominium units on +/- 30.30 acre lot, Conditional Use Permit to approve and allow construction and usage of the aforementioned condominium project with appurtenant site and public street improvements, and Annexation of the site into the City of Hemet from the unincorporated portion of the County of Riverside, but within the Sphere of Influence of the City of Hemet.	Neg	07/30/2007
2007061136	Avenue 54 Sanitary Sewer Pipeline Project Coachella, City of Coachella--Riverside The planned sanitary sewer pipeline project will serve an area of approx. 7,500 acres, of which 3,000 acres are within the Coachella Sanitary District boundaries and 4,500 acres are in the City's Sphere of Influence (SOI) region. The proposed sanitary sewer pipeline would be extended as a 12 to 15 inch diameter line from Van Buren Street at Avenue 52 south to Avenue 54 and a 30 to 42 inch diameter line from the intersection of Van Buren Street and Avenue 54 extending east and connecting with the existing 54 inch line at Polk Street. Construction of the pipeline will occur entirely within the existing right-of-way (ROW) of the affected roadway alignments. It will occur along section lines in the center of the respective ROW's, with the exception of the area along Avenue 54 from Van Buren Street to Harrison Street. This segment will be placed six feet north of the section line to avoid Augustine tribal land. The sizing of these lines is based on "ultimate" flows which are beyond the City's Sewer Master Plan projections for 2015. Construction will consist on conventional trench excavation methods, with trench depths ranging from 10-14 feet in depth. The portion of the pipeline crossing under Highway 111 and the Union Pacific Railroad will be constructed using a jack and bore method as required by Caltrans and the railroad operator. The casing pipe for the undercrossing will be a 60 inch diameter steel pipe with a 42 inch diameter carrier pipe installed inside.	Neg	07/30/2007

2007061141	Hanford Water Well Rehabilitation and New Well Construction Hanford, City of Hanford--Kings The project involves changes to the wells used by the City of Hanford for its water supply. Six existing wells would be abandoned and replaced by two new wells. Three additional existing wells would be abandoned, and each replaced by a new well. Three other wells would be rehabilitated by installing liners. The City has the option to rehabilitate or abandon one other well, and to drill one new well to replace another existing well. The purpose of this project is to bring the City's water supply into compliance with new federal drinking water standards for arsenic. The project would not increase the amount of water extracted for domestic use.	Neg	07/31/2007
2007062128	City-wide Lighting Standards- Municipal Code Amendment South Lake Tahoe, City of South Lake Tahoe--El Dorado Currently, there are no policies or design standards for the illumination of pedestrian and commercial areas within the City of South Lake Tahoe. The absence of such a policy and a set of standards has created a disjointed approach to the realm of public lighting. More specifically, there is no standard style of streetlight assembly for both the pole and luminaire. Moreover, no party is designated as being financially responsible for the Maintenance and Operations (M/O) of street lights. The proposed project includes amendments to three separate sections of the City Code.	Neg	07/30/2007

	library, and kindergarten classrooms. Other facilities would include two surface parking lots with student loading zone and bus loading zone, a linear turf athletic field along the western boundary, hardcourt play area, kindergarten play area, and a lunch shelter. Vehicle access would be provided via a new street along the eastern site boundary.		
2006061005	Valley Region Elementary School No. 10 Los Angeles Unified School District --Los Angeles The project involves the construction of approximately 50,000 square feet of building space for 650 two-semester seats for students in grades kindergarten through five, with approximately 59 full- and part-time faculty and staff. The elementary school campus would include 26 classrooms, a multi-purpose room, kitchen, lunch shelter, library, and administration offices and a 69 space surface parking lot for faculty and staff. The proposed project would also include recreational space, separated from the existing middle school's recreational facilities, including a small turf area and hardcourts. A separate playground area within the proposed elementary school campus would be provided for the kindergarten students.	NOD

2007068322	Araujo Diversion Removal Project funded through Prop 50-IRWM funds (236-S1) Shasta Valley Resource Conservation District Yreka--Siskiyou This project intends to replace 95% of 9 miles of earthen irrigation ditches with pipelines in the Shasta Valley, California. Those ditches currently serve the farming and ranching irrigation needs of five different ranches. The ditches were originally constructed between approximately 1856 and about 1950 and have been actively maintained and kept in utilitarian form since. Water in the ditch network is pumped from the Shasta River into pipelines which flow to the north on each side of the river.	NOE
