STATE CLEARINGHOUSE

NEWSLETTER

March 16 through 31, 2002

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents, federal notices and federal grant applications received by the Clearinghouse during the period **March 16 through 31, 2002**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov/clearinghouse.html#clearinghouse

Questions regarding federal grant notices should be directed to Sheila Brown.

Questions regarding processing of environmental documents should be directed to:

Katie Shulte Joung and Karen Fowler (for projects in Northern California)
Scott Morgan and Brian Grattidge (for projects in Southern California)

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 222) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 2001 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

CEQA & Planning Case Law

Summary of Recent CEQA & Planning Case Law

The following are summaries of recent court cases relating to the California Environmental Quality Act and/or land use planning law.

Planning Cases

Case Name (No.):	<i>El Dorado Palm Springs v. City of Palm Springs</i> (E029198)
Court, Filing Date:	Cal. App. 4 th /2, 03/14/2002
Source:	2002 DJ D.A.R. 2937
Summary of Ruling:	City council lacked authority to impose conditions upon approval of subdivision application.

Please be advised, the information contained in these summaries does not constitute legal advice, nor should the summaries be relied upon as a matter of law. Refer to the full text of the cases cited for the complete ruling and case facts.

Federal Notices

Intergovernmental Review Notices (March 16th – 31st)

The following are notices received by the State Clearinghouse from federal agencies in compliance with Executive Order 12372. If you would like more information about the subject matter, please contact the agency representative listed below.

Agency: Surface Transportation Board

Contact: N/A

Telephone: N/A

E-mail: N/A

Address: Washington, D.C. 20423-0001

Description: Southern Pacific Transportation Company filed a petition for exemption under 49 U.S.C. 10505 from the prior approval requirements of 49 U.S.C. 10903-04 to abandon an 85.5-mile rail line between milepost 360.1, near Wendel and milepost 445.6, near Alturas, in Modoc and Lassen Counties, California. The decision by the board orders the negotiation period under the notice of interim trail or abandonment be extended to March 7, 2003.

2002031090	Kern-Tulare Rag Gulch Environmental Assessment Reclamation Board Bakersfield--Kern The United States Bureau of Reclamation (Reclamation) proposes to approve a temporary one-year Warren Act contract for conveyance of non-project water with the Kern-Tulare Water District and/or the Rag Gulch Water District (collectively the KTRGWD) for each of the next five water years. The term of the first Warren Act contract would be the 2002 water year, ending February 28, 2003. While this Environmental Assessment analyzes the effects of this project over multiple years, the actual process may, at the discretion of Reclamation, occur on an annual basis. The purpose of the contract is to allow KTRGWD to convey its non-project water through excess capacity of the Friant Division Project (Project) facilities.	EA	04/09/2002				
2002032101	Seismic Retrofit and Structural Repair Golden Gate National Recreation Area --San Francisco The project is for the seismic stabilization of Pier 2 at Lower Ft. Maston. 	Harney Road to Railroad Drive, where it would follow Railroad Drive south to Toyon Drive. The pipeline would extend west along Toyon Drive to the Trestle Glen Drive intersection, where it would turn left and extend south along a dirt access road to the location of the existing Sonoma Aqueduct. From this point, the pipeline would again parallel the existing Sonoma Aqueduct to Madrone Road, where it would connect to the Valley of the Moon Water District's existing water distribution system.		
2002031080	Alpaugh Water Project Tulare County --Tulare Alpaugh is a small, rural community located about five miles west of State Highway 43 near the southwestern border to Tulare County. The Tulare County Water Works District #1 supplies domestic water to 212 residences, 11 public facilities, 6 commercial establishments, and 3 churches. Much of the District's water distribution system was constructed over 70 years ago. The pipeline system consists of steel, transite, and plastic pipe varying in size from 2 to 8 inches in diameter. The community's water source consists of one well about a mile southeast of the community that is owned and operated by the Alpaugh Irrigation District. Water exceeds State and Federal Standards for color and odor and will not meet new arsenic standards effective in 2006. In the summer months, water pressure remains below 20 psi during the day failing State minimal pressure standards. The existing distribution system has suffered numerous breaks and line repairs must be done with caution due to septic tank effluent in proximity to portions of the pipeline. These frequent leaks, often in close proximity to septic tank systems with low-pressure conditions, create a potential health hazard to Alpaugh's water consumers.	Neg	04/16/2002

2002032100	Pahlmeyer Winery Napa County Napa--Napa The applicant is requesting a use permit to construct a new winery with a production capacity of 100,000 gallons per year. The proposed winery will be a full crushing, fermenting, bottling and aging facility. Facility floor area is proposed to be 40,378 sq.ft comprised of three major components: an approximately 14,000 sq.ft. underground barrel chai, a below grade fermentation and operations area of roughly 15,000 sq.ft. and a 5,000 sq.ft. administration and hospitality area located above the barrel chai on an open air plaza. In addition, there is 15,679 sq.ft. of outdoor covered area and a 47-foot (10'x 14') high tower proposed. Other support features include 27 parking spaces, two 1,500 gallon septic tanks with associated leach field plus reserve area and an on-site pond for winery wastewater with a capacity of 25 acre-feet. The project will also require grading and other improvements to the existing road and Waters Road and construction of a new entry gate structure. Acceleration/deceleration lanes are proposed to be constructed at the Waters Road and Monticello Road (SR 121) intersection.	Neg	04/16/2002

The new bridge will be at the same vertical and horizontal alignment, but will be approximately 5.5 feet wider. The approach roadway work will extend approximately 100 feet in each direction from the bridge and will be within the existing roadway prism.	NOD	
2001032141	2001 Regional Transportation Plan for San Francisco Bay Area Metropolitan Transportation Commission --Alameda, Contra Costa, Marin, Napa, San Francisco, ... The 2001 Regional Transportation Plan proposes a set of future transportation projects and programs that can be implemented with available funding as well as identifying projects that could be considered if new funding is obtained. The projects/programs included the 2001 RTP range from basic system maintenance, to programs to manage the system better and provide a more convenient system for the region's travelers, to initiatives to better integrate transportation and land use, to major expansion of transit and roads.	NOD	
2001042013	The 2001 Fishery Restoration Grant Program Fish & Game #1 --Siskiyou The California Department of Fish and Game is executing a lake and streambed alteration agreement pursuant to Section 1603 of the Fish and Game Code to the project applicant, [Ms. Jennifer Glorioso representing the Mattole Restoration Council]. The applicant proposes to do various fish habitat restoration projects on Mill Creek, a tributary of the Mattole River, Humboldt County. Project is to improve quality and quantity of summer and winter salmonid habitat along Mill Creek through the replacement of seven undersized culverts at stream crossings, and the elimination of seven existing crossing sites in connection with permanent closure of road segments. Project will also place rock armoring and repair bank failure along creek.	NOD	
2001091004	Redevelopment Plan Amendments - 2001 (City of Fullerton) Fullerton Redevelopment Agency Fullerton--Orange The project is to adopt and implement an amendment to the East Fullerton Redevelopment Plan (est. 1974). The Plan Amendment will not add any new territory to the Project Area. Rather, adoption and implementation of the Plan	NOD

Construct septic systems for new homes; land is classified as having regionally significant aggregate minerals.	Neg	04/17/2002
2002031101	Community Day School "South" in Palmdale, California Antelope Valley Union High School District Palmdale--Los Angeles The school is a needed facility to help accommodate educational needs of the rapidly growing population in the Palmdale area. The school will operate from 7:30 a.m. to 2:30 p.m., serving a maximum of 150 students. The site is bounded by Avenue Q to the north, single-family residences to the east, vacant land and the Christ the King Episcopal Church to the south, and vacant land and 22nd Street East to the west. North of Avenue Q is an auto shop, a masonic lodge, a self-storage facility and vacant land. Single-family homes are located west of 22nd Street East. The buildings, totaling approximately 10,000 square feet in size, surround a courtyard area with a lunch shelter. Pedestrian access into the campus is provided by one gate in the west front of the school adjacent to the administration building. The pedestrian and vehicle access points will be gated and closed during school hours. A total of 5 modular classrooms will be on the campus, with space for 2 future class rooms if needed. Associated school buildings include a library/media center, multi-purpose building, kitchen and storage areas, and restrooms. The administrative building has offices, a workroom, lounge, conference room, and nurses office.	Neg	04/17/2002
2002032106	Boggs Tract Area Sanitary Sewer System Project San Joaquin County Stockton--San Joaquin The County of San Joaquin is proposing to design and construct a new sanitary sewer system for the County of Boggs Tract area residents. The new sanitary sewer system would be designed to connect to the City of Stockton's existing sewer system within the Boggs Tract project area. The City's existing sewer system consists of a 27-inch and 36-inch trunk sewer line located in Scotts Avenue and Del Norte Avenue, respectively, and 6-to-8-inch main lines located in several roadways throughout the Boggs Tract project area. The project would construct approximately 14,500 linear feet of new sewer pipeline. Main lines (pipeline 8 inches in diameter) would be constructed within the roadways of the Boggs Tract project area. Service lines (pipeline 4 inches in diameter) would form a "T" connection to the main line and would be brought to the property boundary of each residence in the project area so that individual residences could connect to the system at a later date. The project is in the unincorporated area of Boggs Tract surrounded by the City of Stockton.	Neg	04/17/2002

2002032109	Beyzade Modification to Mason Parcel Map Subdivision Humboldt County --Humboldt A modification to the Development Plan for Parcel Map No. 3116 (PMS-07-94) to allow for the construction of a 3,782 square foot single family residence and attached 1,528 square foot garage. The applicant seeks a reduction of the approved wetland buffer from 25 feet at the southern most boundary of the wetland to 10 feet. The reduction in the wetland buffer is necessary for the applicant to take full advantage of the upland area of the parcel to develop a single family residence. A wetland mitigation and monitoring report has been prepared for the proposed project, and all recommendations are to be included as mitigation for the reduction of the buffer area.	Neg	04/19/2002
1992121068	CSU Fullerton, Auditorium/Fine Arts Facility California State University Trustees Fullerton--Orange The proposed project has been designed to support the campus instructional program in the performing arts. This building provides a 106,000 gross square foot addition to the campus' 500-seat theater. The proposed project includes a 700-seat concert hall, a 250-seat studio theater, a 100-seat black box theater, recording and dance studios, and rehearsal and other associated support space.	NOD	
2001041121	Faculty/Staff Housing - Site H8 California State Polytechnic University, San Luis Obispo San Luis Obispo--San Luis Obispo The proposed project involves construction of multi-family faculty/staff rental units on 5.2 acres of undeveloped land. The first phase of faculty and staff housing will consist of 72 rental units configured as 1-, 2- and 3-bedroom townhomes. The units will range in size from 700 gross square feet for a 1- bedroom up to 1,450 gsf for the largest 3-bedroom. The project incorporates stormwater conveyance and retention structures.	NOD	
2001081065	Tentative Tract Map Case No. 01-001 and Planned Unit Development Case No. 01-001 Arroyo Grande, City of Arroyo Grande--San Luis Obispo Development Code Amendment to change the Zoning Map from PF to RS for a 1.40-acre portion of Rancho Grande Park, Tentative Parcel Map to subdivide that property into three single-family residential lots, and Conditional Use Permit to develop the remaining 8.6 acres of the property as a community park.	NOD	
2001102093	Stockton Waterfront Promenade and Marina Redevelopment Project Stockton, City of Stockton--San Joaquin Resolution of Necessity - Authorization for the City Attorney to initiate eminent domain proceedings to acquire real property interests for the property located generally described as Assessor's Parcel Nos. 137-010-02 and 137-010-03 (portion of Stockton Channel - Weber Fee Title and Colberg Easement interest). 2002032110	<p>Teilh Road Maintenance Santa Cruz County --Santa Cruz</p> <p>This project will replace a failing wooden 3-foot box culvert with a 48-inch HDPE culvert and cement head and wing walls to convey an un-named drainage across Teilh Road, north of Boulder Creek off Highway 9. This project will include the placement of 43 cubic yards of fill. This project will require a Riparian Exception and preliminary grading approval. This project is located on Teilh Road, 1/4 mile west of Highway 9, in the Boulder Creek area.</p>	Neg	04/18/2002
2002032111	<p>Two Bar Road Maintenance Santa Cruz County --Santa Cruz</p> <p>This proposal is to repair two road embankment slip-outs and related road damage that occurred during the 1998 storm season. The project involves constructing two separate pile and timber lagging retaining wall structures and repaving the damaged road. Road drainage will be discharged via overside drain pipes staked to the hillside with "T" outlets (existing at P.M. 2.40, needs refurbishing) and energy dissipaters located just above the average high water level of Two Bar Creek. The project is located in the Boulder Creek area, at Post Miles (P.M.) 2.35 and 2.40. The project requires a Riparian Exception and a Preliminary Grading Approval.</p>	Neg	04/18/2002
2002032112	<p>Baylands Recovery Project San Francisco Planning Department Menlo Park--San Mateo</p> <p>The proposed project consists of excavating, treating, and removing approximately 50,000 cubic yards of lead-affected soil from 14.1 acres of SFPUC property and 14.6 acres of adjacent private property in the city of Menlo Park, San Mateo County, on the shore of San Francisco Bay, south of the western approach to the Dumbarton Bridge. A total of approximately 41 acres would be affected as part of the proposed project. Following remediation the site would be graded and restored.</p>	Neg	04/18/2002
2002032113	<p>Sourdough Hill Repeater Station Project Sacramento Municipal Utility District --El Dorado</p> <p>This proposed project involves the construction of radio communication repeaters on top of Sourdough Hill on National Forest System lands. The site will house the communication repeaters for SMUD Hydro Operations, U.S. Forest Service and the Placer County Sheriff's Department. The selected design solution will house all stations and associated interface devices in a common equipment enclosure on the southwest slope of the hilltop. All electronics will be powered from a photovoltaic array mounted above the enclosure. A shared transmit antenna and a shared receive antenna will be mounted in an existing tree on the hilltop. Antenna cables will be routed in underground conduits between the tree and the enclosure. Specific locations have been selected for the enclosure and antennas to minimize their visibility from common site access roads and trails. Construction is scheduled for two months during the summer of 2002.</p>	Neg	04/18/2002

2000021027	<p>Regional Solid Waste Facilities Project EIR Salinas Valley Solid Waste Authority Salinas, Jolon--Monterey, San Benito The proposed project consists of actions and activities necessary to provide for approximately 70 years of long-term solid waste disposal capacity for the Salinas Valley Solid Waste Authority (Authority) jurisdictional area. The proposed project includes modifying various elements of the existing solid waste management system under the jurisdiction of the Authority, including the Crazy Horse Sanitary Landfill, Johnson Canyon Road Landfill, Jolon Road Landfill, and an existing or proposed transfer station/materials recovery facility (TS/MRF) in the Salinas area. The project elements also include the development of a TS/MRF in the King City area. The project is described and analyzed in terms of four scenarios, with each scenario containing several elements of solid waste management activities to achieve the purpose and objectives of the project.</p>	EIR	05/06/2002
2000071014	<p>Pre-Annexation GPA & Zone Change for a Portion of Area 9 (To be renamed Planning Area 40) Irvine, City of Irvine--Orange Development of approximately 677 acres in Planning Area 9 (to be renamed Planning Area 40) as an extension of the existing Irvine Spectrum, located southeast of the project area, which supports a mix of companies, concentrating on technology research, development, and manufacturing.</p>	NOP	04/19/2002
2002031115	<p>UCLA 2002 Long Range Development Plan (LRDP) and Northwest Housing Infill Project University of California, Los Angeles Los Angeles, City of--Los Angeles The University of California, Los Angeles proposes to update the campus' Long Range Development Plan (LRDP), previously adopted by the Regents of the University of California in November 1990. The 2002 LRDP will be undertaken to address anticipated growth in enrollment of approximately 4,000 full-time-equivalent students by the year 2010. Planning efforts underway to update the LRDP have converged with planning to address the housing needs of existing and anticipated enrollment. UCLA now proposes to construct additional on-campus student housing in the Northwest Housing Infill Project (NW Hsg). The NW Hsg project would include up to 2,000 beds of undergraduate student housing in three or more buildings, a parking facility to provide approximately 299 spaces (approximately 233 replacement and 66 new); a recreation facility and</p>	NOP	04/19/2002

	<p>reconfiguration of the ground floors of three existing residence halls. The project would result in the construction of up to 550,000 gross square feet (gsf) of net new development. The 1990 LRDP FEIR previously analyzed the environmental consequences of 3.71 million gsf of new development between 1990 and 2005. The 2002 LRDP will evaluate the anticipated enrollment increase and the completion, by approximately 2010, of the previously analyzed development program, of which approximately 1.9 million gsf remains. In this regard, the LRDP will consider the potential environmental effects of the development of approximately 1.9 million gsf of space for academic, research, housing and other uses on campus. It is envisioned that the EIR will include a program level analysis for implementation of the 2002 LRDP; and a project level analysis for implementation of proposed NW Hsg Project element of the 2002 LRDP; and a project level analysis for implementation of the proposed NW Hsg Project element of the 2002 LRDP. Furthermore, the 2002 LRDP EIR will incorporate the 1990 LRDP mitigation measures as appropriate, including the limits on the campus overall parking inventory and vehicular trip generation. By so doing, the 2002 LRDP will extend 1990 LRDP from the original 2005 horizon year to 2010 by maintaining the overall development square footage, parking and trip generation limits of the plan while accommodating an increased level of enrollment and associated population growth.</p>		
2000032070	<p>Subsequent Initial Study for Permit Revision at Santa Cruz Resource Recovery Facility Santa Cruz, City of Santa Cruz--Santa Cruz The proposed project includes revisions to the 1997 Solid Waste Facilities permit issued by the California Integrated Waste Management Board for operation of the Santa Cruz Resource Recovery Facility (Class III landfill). The permit revisions include: a) permitting the landfill for a maximum disposal intake of 535 tons per day, b) incorporating the city/county household hazardous waste collection program, c) providing for the diversion of construction and demolition waste for reuse, and d) clarifying and updating the maximum number of disposal intake vehicles to 360 vehicles per day.</p>	Neg	04/22/2002

2001102024	Bannasch/Crouch Coastal Bluff Stabilization Solana Beach, City of Solana Beach--San Diego A request for a Use Permit to infill two sea caves and interconnecting "notches", and to provide rehabilitation/infill to six existing sea cave infills, located at the base of the coastal bluffs at 523 and 525 Pacific Avenue. The sea caves range in depth from 10+/- feet to 24+/- feet and the notches range in depth from 4 feet to 9 feet. The project covers 160+/- feet in width along the property frontage along the beach.	NOD	
2001121076	Proposed Reopening of Palos Verdes High School and Relocation of Existing District Programs Palos Verdes Unified School District Palos Verdes Estates--Los Angeles The proposed project is a relocation of students, faculty and administrative staff at four existing District facilities. The District proposes to incrementally open a 2,200 student capacity high school on the existing Palos Verdes Intermediate School site. The students attending the existing Palos Verdes Intermediate School would be relocated to the District's Valmonte Administrative Offices site. The existing Adult Education program at the Valmonte Administrative Offices would be relocated to the Rancho Del Mar Continuation High School Site.	NOD	
2002012076	Proposed East #1 Elementary School Site, City of Ceres, Stanislaus County, California Ceres Unified School District Ceres--Stanislaus The proposed new school will occupy a total of approximately 11 acres of the total 17.85 acres and will be an elementary school. The existing site is flat and presently in agricultural use but is designated for low-density residential use in the City's General Plan. The total school population is planned for approximately 500 students; typical school buildings and uses will include classrooms, administrative offices, playgrounds, library, multi-purpose rooms, cafeteria, parking (for teachers, staff and visitors), fire lanes, and landscaping. The buildings have not been designed or sited yet, but will be designed to comply with the California Department of Education's standards and all local zoning codes. In addition to the onsite school facilities, offsite road and sidewalk improvements will be developed, and water and sewer connections are planned. It should be noted that the Draft Initial Study reviewed two alternative sites (SW#1 and SW#2). On January 10, 2002, the School Board determined that site SW #1 was preferred and this Mitigated Negative Declaration is prepared for the SW#1 site.	NOD	
2002021020	Basin "S" Park Site Project Clovis, City of Clovis--Fresno This project consists of the development of a community park site at the Fresno Metropolitan Flood Control District's Basin "S". The park will feature landscaping, on-site parking, picnic facilities, a playground, walkways, and a running creek.	NOD

	<p>the Calle Cesar Chavez street frontage and a six-foot high black vinyl chain link fence separating the subject lot from the adjacent properties. Access to the lot would be provided via a sliding wrought iron gate on Quinientos Street. The project also include low-glare lighting consisting of light fixtures that would be shielded on the top and sides so that the light is directed toward the ground. The parking lot would be comprised of approximately 26,177 square feet of paving and 7,739 square feet of landscaping. Two structures, pavement, a chain link fence and portion of a retaining wall on the site have recently been demolished.</p> <p>The project also includes new sidewalks along Quinientos and Calle Cesar Chavez Streets, requiring removal of two of the existing four street trees along Quinientos Street. Four new street trees would be provided for a total of six street trees, in addition to twenty-one trees proposed for the interior of the lot. An approximately 10-foot wide planter situated along Quinientos Street and several approximately five-foot wide planters would surround the remainder of the property. Construction of the parking lot requires approximately 1,100 cubic yards of cut and 800 cubic yards of fill.</p>

2001111124	Issuance of a Hazardous Waste Facility Permit for General Atomics Toxic Substances Control, Department of La Jolla, Del Mar--San Diego The proposed hazardous waste facility permit would allow General Atomics (GA) to continue operating its existing treatment and storage units and to add two container rinsing units to manage mixed waste generated onsite. Mixed waste is defined as a hazardous waste which contains a radioactive component. GA was granted interim status on March 23, 1989 to treat and store mixed waste. The mixed waste is generated from on-site activities such as research and development (R&D) projects, and as the facility decommissions and decontaminates the R&D projects. No more than 5,060 gallons of liquid mixed waste and 32,500 cubic feet of solid mixed waste may be stored. Mixed waste storage is limited to one year. The storage of mixed waste is necessary to allow for the consolidation, profiling and the availability of off-site treatment and disposal facilities. Limited quantities of mixed waste may be treated on-site by physical means, chemical neutralization, and stabilization. The permit authorization requires GA to manage mixed waste in a manner that is protective of human health and the environment. The permit limits GA to store mixed waste in sealed containers, in secure, designated areas. All operations will occur in existing facilities. No other activities or changes to the facility or changes to the facility's operations are allowed.	NOD	
2001121052	Walnut Street Infill Development San Luis Obispo, City of San Luis Obispo--San Luis Obispo A condominium subdivision of an existing .95-acre site. The project includes 10 two-bedroom units and 7 three-bedroom units for a total of 17 dwellings. The homes would have a townhouse configuration with attached two-car garages. Including the garages, the homes have three levels and a maximum height of 35 feet. Private open space is provided primarily on decks and balconies, with some units having ground level yards. Recreation space is provided in the form of a barbecue area, turf area and a 1/2 court basketball area. The project site is presently developed with five dwellings. Project plans indicate that these and all accessory structures would be demolished.	NOD

1990010107	Amended Little Tokyo Redevelopment Plan Los Angeles, City of Los Angeles, City of--Los Angeles The amended plan (1) extends the boundaries of the existing plan east of Alameda Street to include portions of the Downtown Arts District, (2) will increase the anticipated development levels and affirm the project life extension under AB1290 for Little Tokyo and establish 30-year timeframe for the Arts District portion of the Amended Little Tokyo Redevelopment Plan, and (3) re-establish eminent domain authority.	EIR	05/13/2002
1999122078	Pacifica Bowl Development Pacifica, City of Pacifica--San Mateo The City of Pacifica has received an application for the development of approximately 4.2 acres of vacant land with 43 residential housing units, an interior driveway and road network and a private park/open space area. The project is a planned development cluster subdivision. The area proposed for the project is a relatively undisturbed, vegetated, bowl-shaped site on the eastern side of the 4000 block of Palmetto Avenue, just south of the Daly City boundary. The project site, commonly referred to as the "Fish and the Bowl," is bounded on the south by State Route 1, on the west by Palmetto Avenue and on the north and east by the Pacific Point housing development. The project will require a Use Permit, Site Development Permit, Coastal Development Permit, Tentative Subdivision, and a Variance for the rear yard setbacks. The Applicant intends to conduct the grading and construct the infrastructure for the project in a single phase. The duration of the clearing, grubbing and rough grading of the site will be approximately two months. Offsite	EIR	05/10/2002

	improvements such as roads, sewer, and storm drainage hookups will last in duration approximately four months. As part of the proposed project, the existing 18" culvert opening that drains to the ocean will be capped and buried with the proposed design and will not be incorporated into the new drainage system.		
2000112005	De Anza College Facilities Master Plan Foothill-De Anza Community College District Cupertino--Santa Clara The proposed Facilities Master Plan involves the expansion and renovation of campus facilities and modifications to campus access and circulation. The proposed projects would involve construction of new facilities (approximately 149,400 gross square feet) renovation of most existing facilities, probable revisions to existing campus entries, probable new campus entries/exits, construction of a parking deck, expansion of parking lots, probable realignment of the campus loop road, demolition of the Faculty House, and renovation of the campus landscaping (including upgrades to the irrigation system). All of the proposed facilities would be developed within the existing campus boundaries. The development proposed under the Facilities Master Plan is intended to meet the needs of the College for an anticipated enrollment of 30,850 (inclusive of on-site, distance learning, and off-campus growth) total students by the year 2010.	EIR	05/10/2002
2001101074	Francis Parker Lower School Phase 2 San Diego, City of San Diego--San Diego The Francis Parker project proposes to vacate Plumosa Way and expand and remodel the existing 16,791-square-foot elementary school on an existing 4.86-acre site. The project would require the demolition of the existing north wing of the school, one-and two-story classrooms, and an existing one-story residence. Proposed construction activities would consist of 18,027 square feet of new building space, 4,708 square feet of interior tenant improvements, and a new 33-space parking lot. Overall, the expansion and remodeling would provide for a library, a science and technology building, a cafeteria, and classrooms. There would be no increase in enrollment as a result of this project.	EIR	05/10/2002
2002032145	N. Main Street/Ygnacio Valley Road Specific Plan Walnut Creek, City of Walnut Creek--Contra Costa The Draft EIR was prepared to provide an assessment of the proposed N. Main Street/Ygnacio Valley Road Specific Plan - a proposed long-range plan for a 30-acre area in the downtown area of the City of Walnut Creek. The Specific Plan provides circulation system improvements, streetscape improvements, and development guidelines for properties within the Plan area. Four possible development scenarios could be pursued with approval of the Specific Plan, including the Transit Village scenario.	EIR	05/11/2002

2000079029	High Desert Power Project Energy Commission Victorville--San Bernardino The project is either a 678 megawatt (MW) or a 720 MW natural gas-fired, combined cycle power plant. Associated facilities include a new 230 kilovolt (kV) transmission intertie to the existing Victor Substation approximately 7.2 miles away; natural gas fuel supply pipelines and potable and raw water supply facilities. The project will result in impacts to desert tortoise and Mohave ground squirrel, which are protected under the California Endangered Species Act, requiring issuance of a California Incidental Take Permit ("Permit"). CDFG issued a Permit on October 16, 2002. Following issuance of the Permit, HDPP disclosed that an additional 7.3 acres was being used for the project. CEC, pursuant to its certified regulatory program, issued an approval subject to mitigation conditions on December 21, 2001. The additional 7.3 acres requires a minor amendment to HDPP's Permit from CDFG.	NOD

	center; and other related actions.		
2001051113	<p>La Canada Flintridge Sewer Collection System - Area 2 La Canada Flintridge, City of La Canada-Flintridge--Los Angeles</p> <p>The project consists of the financing and construction of a sewer collection system in the City of La Canada Flintridge to serve parcels within an area bounded by the Hoy Canyon Debris Basin, and the Lukens Rail Connection to the North, the east side of La Canada Boulevard to the west, the west side of Gould Avenue to the east and north side of Foothill Boulevard to the south.</p>	NOD	
2001051139	<p>New Lynwood High School Lynwood Unified School District Lynwood--Los Angeles</p> <p>The project proposes construction of a new high school on 14.8 acres that would accommodate approximately 1,600 students. The existing Lynwood High School was originally designed with a capacity for 3,472 students, but currently enrolls approximately 4,346 students (approximately 874 students over capacity). The proposed new high school would relieve overcrowding at the existing high school by providing capacity for approximately 800 currently enrolled high school students, and accommodate enrollment growth anticipated as existing middle and elementary students grow older. No overall increase in district enrollment is projected due to the proposed project. In order to provide a site of sufficient size to accommodate the school structures and associated recreational space, the District proposes to acquire John D. Ham Memorial Park and 27 residential parcels located immediately west of the park. Ham Memorial Park occupies 10.2 acres and accommodates a number of recreational programs. The Abbott Residence, located at the southeast corner of Martin Luther King, Jr. Blvd. and Wright Road, would be relocated as part of the proposed project. The project would include approximately 162,000 gross square feet of classrooms and academic uses, gymnasium and recreational facilities, and administrative and related support space, including a multi-purpose activity center. The proposed project would include all the necessary components for the new high school, including classrooms and other educational facilities, recreational facilities such as playing fields and a gymnasium, and administrative and related support space. Approximately 416 parking spaces would be provided on the site, in a surface lot and parking structure. Playing fields, landscaped open space, and other recreational amenities would be incorporated into the proposed project. Preliminary plans indicate that lighted ball fields would not remain at the project site if the City enters in a Joint Use Agreement, as proposed by the District. The recreational facilities in the park would be made available to area residents during non-school hours, weekends, and holidays.</p>	NOD	
2001101163	<p>Loews Coronado Bay Resort Expansion San Diego Unified Port District Coronado--San Diego</p> <p>The proposed project consists of the conversion of the existing 3,967-square foot fitness center to a new spa facility, which would increase the size of the existing 3,967-square-foot spa facility to 10,197 square feet of building area and an additional 2,450 square-foot outdoor patio for a total new spa square footage of 12,647 square feet. The existing pool deck will be expanded and serve as the roof</p>	NOD

2002038536	Clough Dam Siphon Installation Project Water Resources, Department of --Tehama The project involves replacement of an existing private irrigation diversion structure (Clough Dam) on Mill Creek in eastern Tehama County with an inverted siphon at the same location for the purpose and diversion capacity. The project purpose is to permanently remove a historic fish passage barrier while maintaining existing water rights, capacity and associated land uses to water users on the south side of Mill Creek. The project involves removal of the remains of a diversion structure including portions of an associated fish ladder and replacement with a cross channel inverted siphon. The siphon will be connected to the existing screened diversion ditch on the north side of the channel using a prefabricated junction box and the existing irrigation headworks structure on the south side of the channel. The siphon length is approximately 300-feet and will be installed 50-feet below the stream channel elevation using a large excavation. Other project associated activities include construction/installation of a water measurement Parshall flume in the existing screened diversion ditch on the north side of the channel and installation/replacement of two irrigation ditch bridges for site access.	NOE	
2002038537	Agreement R4-2001-0184; Ingram Creek Fish & Game #4 --Stanislaus The Project will repair scour damage at the bridge Abutment 1 and Pier 2. The Project will construct critical scour countermeasures, which include excavation of 10.5 cubic yards of material under the bridge, placement of 110 square yards of Rock Slope Protection (RSP) Fabric, and 55 cubic yards of #1 Backing RSP Rock between Abutment 1 and Pier 2. 2002038539	Hudson House Rehabilitation Parks and Recreation, Department of --Monterey Repair, rehabilitate, and preserve the Hudson House at Point Lobos State Reserve to maintain and preserve the integrity of the existing architecture, protect public health and safety, and support continued use and maintenance. Utilities, including plumbing, electrical, and HVAC, will be upgraded to meet current code requirements and safety standards.	NOE	
2002038543	Removal of Hazardous Diseased Trees Parks and Recreation, Department of Grass Valley--Nevada Remove approximately 35 merchantable and 40-45 non-merchantable bark beetle infested trees. These infested trees pose a threat to the forest health. The project calls for the removal of the trunk and burning all branch material. If the trunk is not removed, it should be cut into firewood size and covered with plastic for a year. Some of the trees will be sold to a logger. No heavy equipment will be operated off the fire roads. Merchantable trees that cannot be yarded to a road will be burned or covered with plastic.	NOE	
2002038544	Fairview Development Center - Chilled Water System Upgrade Project Developmental Services, Department of Costa Mesa--Orange The proposed project at the Fairview Developmental Center would replace the existing chiller system, which is outdated and in disrepair, with a more energy efficient system that will reduce costs. The project would replace three existing chillers, and furnish and install nine new chilled and condenser water pumps. This project will install an insulated 900,000 gallon chilled water tank system for thermal energy storage (TES) adjacent to the chilled water system. The TES will be located in the open area adjacent to the central plant. New seismic anchorage for all new equipment will be installed along with piping in accordance with code requirements. Installation of the new chillers will be placed on new concrete equipment pads and new water piping or reconfigure existing water piping as required to accommodate connection of new chillers and reconnection of existing equipment. This project will install new high efficiency lighting system in the central plant and lighting protection systems for the new TES tank. The project will replace existing transformer with a more efficient model and install new power connections to central plant equipment. This project would accommodate existing facility staff and patients, and would result in substantial reduction in maintenance costs for the Center.	NOE	
2002038545	Happy Canyon Road Bridge 51-C-189 Fish and Game Santa Barbara --Santa Barbara Repair storm damage to existing channel lining by placing and burying rock downstream of the bridge concrete apron, and along the slope. A path for fish passage will be left in the low flow channel.	NOE

<u>Documents Received on Thursday, March 28, 2002</u>			
2001082113	Arcadia Mixed Use Development Project Brentwood, City of Brentwood--Contra Costa Two alternate site plans have been developed for the project site. Plan A would concentrate on employment-type uses and divide the project site into 14 parcels. The commercial/retail component would occupy 12 of the parcels and provide 686,400 gross square feet of commercial and retail uses occupying 71.8 acres of the project site. The office component would occupy the other two parcels and provide for 24,850 gross square feet of office space on 3.4 acres. Plan B recognizes the General Plan's desire to provide complementary housing where it would support large employment centers. Under this scheme, the site would be divided into 12 parcels. Parcels 1 through 9 would occupy 51 acres and provide land for a mix of commercial and retail uses totaling 495,300 square feet. Parcel 10, consisting of 19 acres, would be developed with very high density residential uses at an average density of 25 dwelling units per acre, yielding about 474 units. Parcels 11 and 12 would constitute about 5 acres of office use, or about 34,600 square feet.	EIR	05/13/2002
2001101105	Pluto Development Warehouse Apple Valley, City of Apple Valley--San Bernardino Construction and operation of a 1,340,997 square foot distribution/warehouse facility on 240 acres of a 300-acre site.	EIR	05/13/2002
2002011128	Old Town Lompoc Redevelopment Project, Amendment No. 2 Lompoc Redevelopment Agency Lompoc--Santa Barbara An initial study that assessed the potential environmental impacts of the proposed Old Town Lompoc Redevelopment Project, Amendment No. 2 (the "Plan" or the "Project") was distributed for public review on January 30, 2002. This initial study is amended herein and will be recirculated to address the inclusion of a 9.57-acre parcel of land in the Amendment Area. This added parcel bisects the originally proposed Amendment Area and contains the abandoned Grefco processing plant.	NOP	04/26/2002
2002031141	San Marino Public Library San Marino, City of San Marino--Los Angeles The project consists of the replacement of an antiquated 16,000 square foot building with a modern 27,000 square foot library building on the same site. The existing building was built in 1952 for a maximum of 60,000 volumes. Based upon needs, a study of existing physical facilities, and community workshops, a new library is proposed that will be able to accommodate the 100,000 volumes currently housed in the library. In addition the proposed new library would meet ADA requirements and fire/life/safety/seismic requirements, which the current building does not. It would also include modern telecommunications and data facilities, which are almost impossible to install in the current library because walls and floors are constructed of concrete. The City of San Marino has developed a cooperative arrangement with the adjacent San Marino School District to provide a lifelong learning center in the new building. In addition the new facility would include a community meeting room and facility to store and present local historic materials. Adequate parking is available on and adjacent to the site, primarily	NOP

	off-street. The building would relate to the surrounding community in a manner similar to the existing building, with a two-story section focused on Huntington Drive, and a one-story portion along the more residential West Drive.		
2002031142	Dry Dock Depot - Proposed RV Storage Expansion Upland, City of Upland--San Bernardino The proposed project consists of a Conditional Use Permit for the expansion of the Dry Dock Depot RV and Boat Storage facility onto the eastern remainder of the closed Upland Landfill.	NOP	04/29/2002
2002031143	Frazier Park/Lebec Initial Study Kern County --Kern The proposed project is for the adoption of a Specific Plan for the Frazier Park and Lebec area. The Specific Plan contains goals, policies, and programs to guide development of the area's land in association with land use, circulation, open space and conservation, urban boundaries and growth management, housing, noise, community planning and design, community facilities, and safety. Adoption of the Specific Plan will include the adoption of the goals, policies, and programs included in each of these elements. This Initial Study includes an evaluation of the existing public utilities, amenities, and environmental conditions of the entire project area. Future projects proposed after the adoption of the Specific Plan will be evaluated based on their site-specific impacts to the environment prior to their approval and development.	NOP	04/26/2002
2002031140	Monterey Peninsula Country Club Shore Course Improvements and Habitat Restoration Monterey County --Monterey Combined Development Permit consisting of a Use Permit for grading of 38,000 cubic yards of cut and fill and a Use Permit for the removal of 18 Coast Live Oak trees to provide for improvements to the existing golf course and habitat restoration at the Monterey Penninsula Country Club.	Neg	04/29/2002
2002031144	Fairbanks Country Villas San Diego, City of San Diego--San Diego Easement Vacation/Rezone/Vesting Tentative Map/ Planned Residential Development Permit And Resource Proection Ordinance Permit (RZ, VTM, PRD and RPO Nos. 99-0329 to develop between 79 and 85 single-family residences on a 92.72-acre site. Two development options are proposed including: 16 affordable housing units provided on six lots with 79 single family residences; or 85 single-family residences on-site, with 16 affordable units provided off-site, within the Torrey Highlands Subarea IV. In addition, two parks, trails, utilities and street would be developed on 22.44 acres of the 92.72-acre site.	Neg	04/26/2002

	<p>emergency shoulder, and pedestrian and bicycle traffic. Prior to the work on the new or existing bridge an existing low-pressure sewer force main, which runs under the Napa River, will need to be relocated to accommodate the new bridge piers. The new force main will be relocated approximately 30-40 meters north of its existing location. The new 24" force main will be installed under the Napa River using either a microtunneling technique or horizontal directional drilling. The existing bridge will remain in operation until traffic is shifted onto the first of the twin bridges at which time it will be demolished by dismantling its steel segments with saws or cutting torches. The freed segments will be removed by a crane or lowered onto barges in the River and taken to salvage or disposal facilities. At this point the eastern embankment will be removed and the floodplain will be excavated. The second span will then be constructed, and the existing river piers and footings from the old bridge will be removed. The pilings that the old footings rest on will be cut off below the channel bottom. Work within the river on the new bridge will consist of the construction of new columns to support the bridge structure. The column foundations are anticipated to be constructed using sheet pile coffer dams.</p>		
2001101072	<p>Smith and Butler Minor Subdivision; TPM 20497RPL San Diego County Department of Planning and Land Use --San Diego The project is the subdivision of 2.0 acres into four parcels for single-family residential dwelling units. Access will be taken through the construction of a private road off of Gay Rio Drive; the private road will be named Gay Rio Lane as a part of this project. The project lies within the Metro-Lakeside-Jamul segment of the MSCP Subarea plan, one acre of non-native grassland will be purchased off-site to mitigate for impacts to the site.</p>	NOD	
2001121038	<p>Malaga County Water District Water Supply Well Improvements Well No. 3, 4 and 7 Malaga County Water District --Fresno Drill a new well as a source of water supply and add treatment to Well No. 4 to remove DBCP from the effluent.</p>	NOD

2002038548	Happy Canyon Road Bridge 51-C-189 Fish and Game Santa Barbara --Santa Barbara Repair storm damage to existing channel lining by placing and burying rock downstream of the bridge concrete apron, and along the slope. A path for fish passage will be left in the low flow channel.	NOE	
2002038549	Culvert Replacement Fish & Game #3 --Monterey The work involves the replacement of an existing corroded 900 mm culvert with a new 900 mm corrugated metal pipe along the same alignment in an unnamed drainage tributary to San Jose Creek. The project is in Monterey County along Highway 1 at PM 71.3, approximately 0.12 miles north of the San Jose Creek bridge. The construction will involve excavating the roadway and highway fill, removal of the existing culvert and replacement with a new culvert. A slurry cement backfill will be poured around the new culvert to bring the grade to approximately road level. The concrete will then be paved over to create the new roadway. The existing rock headwalls will remain in place.	NOE	
2002038550	Mitigation of Soil Erosion for 30 inch Diameter Force Main Fish & Game #3 Menlo Park--San Mateo Mitigation of soil erosion/bank stabilization of approximately 125 feet along 30" force main along the edge of the roadway at Bayfront Park. Issuance of a Streambed Alteration Agreement Number R3-2002-0070 pursuant to Fish and Game Code Section 1601.	NOE	
2002038551	Culvert Repair on Jumpoff and Colorado Creek Fish & Game #3 --Santa Clara The project consists of the repair of culverts in two locations where Jumpoff Creek passes under San Antonio Road north of Beauregard Road and where Colorado Creek crosses under Mines Road. The repair work will install concrete linings to old culvert pipes that have severe erosion at their bottoms. [Sediment and gravel on Jumpoff Creek will be moved to the banks Issuance of a Streambed Alteration Agreement Number R3-2001-0405 pursuant to Fish and Game Code Section 1601.	NOE	
2002038552	McMillen Driveway Fish & Game Eastern Sierra-Inland Deserts Region --San Bernardino The project proposes to construct a residential driveway crossing over a seasonal drainage swale, which is to be approximately three (3) feet wide at the crossing, which is dry except during seasonal storm runoff. The project area of impact is 0.05 acre of CDFG jurisdiction.	NOE

2002032162	Pacifica State Beach Master Plan for Public Improvements Pacifica, City of Pacifica--San Mateo City of Pacifica proposes to implement parking, circulation and restroom improvements, an ADA accessible coastal trail, restore the back beach and dunes, tidal riverine wetlands at the mouth of San Pedro Creek and constructed wetlands for storm water treatment and a vegetated filter strip/landscaping along Highway 1. The beach/dune restoration and creek mouth restoration will provide increased shoreline protection from wave runup and flood conveyance, respectively. Class 1 bike trails would extend southeast and south along San Pedro Terrace Road and to the ridge above Pedro Point.	Neg	05/01/2002
2002032164	Cal-Ore Telephone Company Fiber Optic Cable Project (SP-01-12) Siskiyou County --Siskiyou California-Oregon Telephone Company has applied for an encroachment permit to install a fiber-optic cable line in County road right-of-way. The entire length of the project is from Klamath Falls to Yreka involving approximately 62 miles of fiber optic cable installation. The California portion of the project would consist of burying approximately 41.25 miles of fiber optic cable adjacent to existing roads. Of this, approximately 40.65 miles would be installed from Macdoel south and west to Yreka. The remaining portion would be installed from Indian Tom Lake north to the California/Oregon border.	Neg	04/29/2002
2002032166	Proposed Expansion/Deepening of Surface Mining Permit(SM-33), Mission Valley Rock Company Quarry, Sunol Alameda County --Alameda Permittee proposes to modify the original quarry and reclamation plan by expanding the amount of volume of material that could be removed. This expansion would involve both deepening of the existing pit from 140 feet to as much as 200 feet, and to expand the footprint of the quarry by six acres toward the east, onto the lands of San Francisco Water Department and nearer to the streambed of Alameda Creek. The life of the quarry, currently ending by the year 2045, would not be extended. With the proposed expansion, the quarry pit would cover up to about 37 acres. A total of about 400,000 additional tons of marketable mineral commodities, over and above that already permitted, would be mined during the permit period, after which reclamation would occur. The ancillary use area would remain unchanged.	Neg	04/29/2002
2002041019	Live Oak Park Master Plan Temple City Temple City, Arcadia--Los Angeles Construction of a new community recreation building with approximately 12,050 square feet and various improvements of park facilities as part of the Adopted Live Oak Park Masterplan.	Neg	04/19/2002
