

Arnold Schwarzenegger, Governor

STATE CLEARINGHOUSE

NEWSLETTER

March 16-31, 2006

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **March 16-31, 2006**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov/clearinghouse/clearinghouse.shtml

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Senior Planner

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 212) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 2001 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

MEMORANDUM

Governor's Office of Planning and Research State Clearinghouse

Date: December 5, 2003

To: All CEQA Lead Agencies

From: Terry Roberts, Director, State Clearinghouse

Re: Submission of Electronic CEQA Documents to State Clearinghouse

In order to take advantage of the cost and time savings associated with electronic documents, the State Clearinghouse will accept electronic documents under the following conditions:

1. Electronic documents shall be on CD, and the file format shall be either Adobe PDF or Microsoft Word.
2. For EIRs, each CD must be accompanied by a printed copy of the Executive Summary. This allows the State Clearinghouse and the reviewing agencies to efficiently route the document to the proper persons.
3. Negative Declarations and Mitigated Negative Declarations will not be accepted on CD. However, any separately bound technical appendices to the document may be submitted on CD.
4. For certain projects, particularly large infrastructure projects such as airport expansions, the State Clearinghouse may request a certain number of hard copies. In addition, the lead agency shall honor a special request from a responsible or trustee agency which requires a hardcopy for purposes of review and comment.
5. This policy does not invalidate CEQA Guideline §15205, which requires a public agency submitting printed documents to the State Clearinghouse to send, in addition, an electronic copy of the document, *if available*.

If you have any questions regarding the submission and circulation of environmental documents, please contact the State Clearinghouse at (916) 445-0613 or state.clearinghouse@opr.ca.gov.

<u>Documents Received on Thursday, March 16, 2006</u>			
1992122069	City of Tracy General Plan Update Tracy, City of Tracy--San Joaquin The proposed project is a comprehensive update to the City of Tracy General Plan, which was last comprehensively updated in 1993. The project involves reorganization and revisions to existing elements of the existing General Plan, such as refining the City's land use designations descriptions and locations and including new goals, objectives, policies and actions. The project also includes new Elements to the General Plan. The Draft City of Tracy General Plan contains the following nine elements: Land Use, Community Character, Economic Development, Circulation, Open Space and Conservation, Public Facilities and Services, Safety, Noise and Air Quality.	EIR	05/01/2006
2004062054	Derry Lane Mixed Use Development Menlo Park, City of Menlo Park--San Mateo The proposed project is the redevelopment of an approximately 3.5-acre site in Menlo Park with 135 residential units, 17,000 square feet of commercial space, and public and private open space. The project also includes an amendment to the Menlo Park zoning ordinance and General Plan that would allow up to 40 residential units/acre to be constructed on sites with a minimum size of 2 acres for properties zoned Planned Development (PD), within the area bounded by El Camino Real, Ravenswood Avenue, the Caltrain right-of-way and Glenwood Avenue.	EIR	05/01/2006
2005031130	North Dunsmuir Water Storage Project Dunsmuir, City of Dunsmuir--Siskiyou Construction of a 650,000 gallon water storage reservoir, associated transmission pipeline, access road, and replacement of existing pump station.	FON	04/03/2006
2006031068	Andrews Parcel Map Reconsideration ED 05-215 San Luis Obispo County Arroyo Grande--San Luis Obispo Request by Frank Andrews for a Reconsideration of a Parcel Map to amend the map and allow secondary dwellings on the existing parcels. The project will result in the future disturbance of approximately 0.5 acres of three parcels totaling sixteen acres due to future construction of three secondary dwellings. The applicant is requesting a reconsideration of the parcel map to allow secondary residences on each existing parcel. The proposed project is within the Residential Rural land use category and is located at 2700 Branch Mill Road, on the southeast corner of the intersection with Cecchetti Road, approximately 2 miles northeast of the City of Arroyo Grande. The site is in the San Luis Bay (Inland) planning area.	Neg	04/14/2006
2006031069	Alta Vista Park Diversion and Re-use Project Redondo Beach, City of Redondo Beach--Los Angeles Construction of: diversion, structural BMPs (to remove pollutants), storage and pumping distribution system (for irrigation) facilities.	Neg	04/14/2006

2006031072	<p>2006 Subdivision Ordinance Update Morro Bay, City of Morro Bay--San Luis Obispo</p> <p>The project involves the repeal and replacement of the City of Morro Bay Municipal Code Chapter 16, the City's Subdivision Regulations and the repeal of Chapter 17.49 of the Municipal Code, Community Housing Project, for incorporation into the new Chapter 16. The new regulations are primarily guided by updates to the City's Subdivision Regulations for consistency with the 2005 Subdivision Map Act and for consistency with Department of Real Estate terminology. Updates to procedural handling of subdivisions have also been updated to reflect current processing demands. Updates to the code include modifications to the city's review procedures, updates to the application and map requirements, and the addition of regulations regarding compact in-fill developments, conservation subdivisions and common interest subdivisions. Adjustments to the City's minimum lot sizes and codes governing flag lots will also be incorporated. The City's streets standards will be removed and incorporated into a separate document known as the City's engineering standards. The new document will promote contemporary street and lot standards and interpretive definitions for ease of understanding.</p>	Neg	04/14/2006
2006032076	<p>Hinkle Creek Center Folsom, City of Folsom--Sacramento</p> <p>This project includes the renovation of a 2,000 sf decommissioned firehouse and operation of the remodeled facility for an historic and environmental education center with the following specific program elements; interpretive features, picnic tables, benches, 31 parking spaces, irrigated turf, hiking trail, and accessible trails.</p>	Neg	04/14/2006

2006032085	South Bonnyview Road Widening Project Redding, City of Redding--Shasta The purpose of the project is to widen South Bonnyview Road from the west side of the bridge at the Sacramento River, through the intersection of State Route (SR) 273 at the western boundary. South Bonnyview Road is generally a two-lane road through the study area, although it has four lanes between eastside road and Route 273. It also widens to a four-lane cross section east of Indianwood Drive, becoming four lanes across the river at the east end of the study area. The project will require modification to all four signalized intersections. Extra turn lanes will be included at intersections, and modifications of four signalized intersections will be required. Curbs, gutters, and sidewalks will be constructed on both the north and south sides of the project between East Bonnyview Road and SR 273, and raised, planted medians will be installed along portions of the roadway corridor.	Neg	04/14/2006
2006032086	Casper Solid Waste Treatment Plan Mendocino County --Mendocino The County of Mendocino is proposing to develop a transfer waste building, vehicle ramp, and gate house at the site. Further, it is proposed to enlarge the metals yard and construct a loading ramp, as well as install new landscaping and extend the hours of operation.	Neg	04/14/2006

2005031043	Seismic Retrofit of MSB Building Glendale, City of Glendale--Los Angeles The proposed project involves the seismic retrofit of the Municipal Services Building (MSB). The seismic retrofit will be conducted using the "base isolation" method. Structural separation of the elevator lobby and plaza is required as part of the project to separate the building from grade. Modifications would occur at the plaza level, lower portions of the piloti, exterior stairs and elevator lobby. In addition to building and plaza modifications, changes to the existing landscaping around the plaza are also proposed.	NOD	
2005051008	California State University, Northridge 2005 Master Plan California State University, Northridge --Los Angeles This project is based on the projected master plan enrollment of 35,000 FTE over the next 30 years. It will provide sites for 1.9 million GSF of future academic and support buildings in order to accommodate the proposed 35,000 FTE enrollment ceiling. Approximately 360,000 GSF of existing campus buildings will be replaced as those facilities exceed their useful service life, providing for more efficient use of campus land and allowing for sustainable growth. The first phase of the development is identified by the three near term projects that have been analyzed in the FEIR at a construction level: (1) Performing Arts Center, a 1630 GSF complex for the College of Arts, Media and Communication; (2) Parking Structure PS-G3, a 648,000 GSF facility providing 1,994 spaces; and (3) the Transit Center, a centrally located mass transit hub for students, faculty, staff and community members traveling to the campus.	NOD	
2005051008	California State University, Northridge 2005 Master Plan California State University, Northridge --Los Angeles This project is based on the projected master plan enrollment of 35,000 FTE over the next 30 years, which provides sites for future academic and support buildings in order to accommodate the proposed 35,000 FTE enrollment ceiling. The first phase of the development is identified by three near term projects that have been analyzed in the FEIR at a construction level. This specific approval action is for the Performing Arts Center, a 163,000 GSF complex for the College of Arts, Media and Communication.	NOD

	potential for 24 intensive care unit beds; three additional operating rooms; and appropriately sized radiology, laboratory, and other support services.		
2005121152	Office / Research Facility Within Innovation Village California State University, Pomona Pomona--Los Angeles This project will construct a 123,060 GSF office/research facility as the third phase of the development of Innovation Village. This project will impart academic benefits for both students and faculty. Innovation Village is a master planned community of technology-based enterprises that include academically driven functions where Cal Poly students and faculty may participate in work, study, and research partnerships with private entities. The first two phases at Innovation Village, the Center for Training and Technology project and the American Red Cross project, have been completed. The proposed three-story, tilt-up structure will have an outdoor plaza, articulated building facades, and varied rooflines. Site improvements include a new 45-foot wide road and bike path segment of Innovation Way, which will provide secondary internal access to the facility and surface parking to accommodate over 440 spaces. Utilities infrastructure, lighting and landscaping are additional planned site enhancements, which ownership of these infrastructure and common areas improvements will be transferred to the Cal Poly Pomona Foundation.	NOD	
2005122090	Stinson Beach Fire District Coastal Permit Marin County --Marin The proposed project is the construction of a 500 s.f. addition to an existing 1,140 s.f. fire station. The project would result in an additional bay to house a new fire truck within the existing station. Following completion of the project, the structure would contain a total area of 1,640 s.f.. No habitable space or bathroom facilities would be a part of the project. An accessible parking stall would also be installed along the adjacent street in order to make the structure accessible to the disabled. The additional garage bay would be constructed upo and existing paved area of the site. Additionally, the project would redirect drainage away from Easkoot Creek and towards Calle Del Arroyo via means of a new vegetated bioswale.	NOD	
2005122093	Hog Island Oyster Company Design Review / Use Permit / Tidelands Permit Marin County --Marin Proposal to legalize and improve the Hog Island Oyster Company facility in Marshall. The proposed project includes the continuation of the existing shellfish processing and sales use as well as new construction, legalization and rehabilitation of existing structures, and related site improvements. the existing "Depot" building would be restored and remodeled to house the Hog Island Oyster Company offices, including 675 square feet of office space and a 555 square foot workshop. The "Marshall Store" building would be restored and enlarged by approximately 400 square feet to accommodate shellfish processing tanks.	NOD	
2006011115	New Middle School #6 - Ninth Grade Campus Rialto Unified School District Rialto--San Bernardino The District proposes the acquisition of approximately 17 acres for the construction and operation of a 1,500-student middle school for grades 6 through 9. The school would entail development of 85,766 square feet of building space in one- and two-story buildings on a site located in a redevelopment area in the City of Rialto.	NOD

2006038389	Legacy Tire Removal 05-0822-1 Southern Sonoma County Resource Conservation District --Sonoma Project consists of replacing the legacy tires that are currently providing erosion control with structures that meet more current ideas for environmentally appropriate erosion control techniques. The tires are located in two sets of conjoining gullies. The tire removal has been ordered by the Integrated Waste management Board because they have determined that the tires may pose a fire hazard and for mosquito abatement. The tires will be removed by a licensed tire removal company to an approved disposal site.	NOE	
2006038394	Bailey Earthen Structure Protective Rood (05/06-CD-12) Parks and Recreation, Department of --San Diego The project is the construction of a stand-alone protective gabled roof structure over the Olin Bailey earthen house to prevent further erosion of the exposed earthen walls. The earthen house, constructed in 1906, is located within the recently acquired Vallecito Ranch property. The collapse of the house's existing roof requires this new roof structure to prevent further deterioration. The gabled roof structure will be 40' long x 32' wide x 20' high, and supported by six 8" x 8" posts set in concrete footings (36" in diameter). In addition, approximately 200 feet of old dirt road will be cleared of saltbush and mesquite to provide access to the site. Each of the six footing locations will be excavated by State Parks archeologists to assure appropriate recovery of any cultural artifacts. In addition, no work will be conducted on the project between March 15 and September 15 to avoid any potential impacts to the federally and State endangered least Bell's vireo on adjacent areas.	NOE	
2006038395	Lease of Existing Office Space Rehabilitation, Department of Ontario--San Bernardino The California Department of Rehabilitation proposes to lease approximately 4,000 square feet of existing office space. The space would house approximately 15 staff. Approximately 7 parking spaces would be used. Approximately 10 to 50 clients would be seen weekly. This office will be used as office space for the purpose of counseling disabled clients to retrain for work so they can re-enter the job market. Public transit is available within 1/4 mile of the site.	NOE	
2006038396	Lease of Existing Office Space Rehabilitation, Department of Los Angeles, City of--Los Angeles The California Department of Rehabilitation proposes to lease approximately 10,200 square feet of existing office space. The space would house approximately 55 staff. Approximately 18 parking spaces would be used. Approximately 50 to 100 clients would be seen weekly. This office will be used as office space for the purpose of counseling disabled clients to retrain for work so they can re-enter the job market. Public transit is available within 1/4 mile of the site.	NOE

	individual projects intended to be multidisciplinary, that is, they are intended to meet as many of the resource area goals and objectives as possible in order to provide benefits in a number of areas in addition to the primary purpose of flood protection. The SMMP identifies opportunities for other local agencies and Zone 7 to implement projects and activities that serve to meet the regional issues and needs of the Valley. In general, the SMMP would provide adequate flood protection in the channels in the project area through implementation of 45 projects providing regional storage, sediment removal, low-flow channel installation, wetland creation, and riparian corridor enhancement to provide bank stabilization. Zone 7 will conduct project level CEQA analysis as appropriate when individual projects are developed for implementation.		
2005012113	UC Santa Cruz 2005 Long Range Development Plan, Infrastructure Improvements Project, 2300 Delaware Av., Family Student Housing Redevelopment University of California, Santa Cruz Santa Cruz--Santa Cruz 2005 Long Range Development Plan (2005 LRDP) provides a building program and land use map that will guide capital construction, infrastructure development and land use on the campus. EIR also analyses three specific development projects: redevelopments of a family student housing facility; an infrastructure improvements project; and renovation for University use of a former semiconductor manufacturing facility. The Recirculated Draft EIR provides additional traffic analysis for SR1 and SR17 and potential air quality and noise impacts associated with additional traffic on these roadways.	EIR	05/01/2006

2006032090	Laytonville Curve Improvement Caltrans #1 --Mendocino For public safety purposes, Caltrans proposes to reduce the height of a vertical curve on the highway at the north end of Laytonville. In addition, traffic calming measures consisting of curbs, gutters, and sidewalks will be constructed, and lane widths will be narrowed slightly. All new facilities will be ADA-compliant. On-street parking will be eliminated as a final safety measure to create a pedestrian friendly facility through the downtown area.	Neg	04/17/2006
2006032092	North Biggs Estates Biggs, City of Biggs--Butte The project applicant proposes to subdivide the property for the future development of single-family detached residential units as well as high-density residential units. At buildout, the project would construct 58 single-family dwelling units and up to a maximum of 32 high-density residential units based on a maximum density of 20 units per acre. The average housing density for single-family units would be approximately 3.5 units per gross acre, which conforms to the maximum density standard of 6.0 units per acre for the R-1 designation under the Zoning Ordinance, and the density range of the Residential Medium-Density land use designation.	Neg	04/17/2006
2006032093	Police Vehicle Storage Facility Project Elk Grove, City of Elk Grove--Sacramento The proposed project site, comprised of 5.6-acres, would be graded and approximately 3-acres paved to provide parking facilities. One maintenance/storage building of approximately 10,000 sq. ft. would be constructed on the project site in addition to two 12,000-gallon aboveground fuel storage tanks and dispensers. Overhead power poles run northwest to southeast through the middle of the project site and may be relocated as part of the project. The project would also include the installation of lighting, a security fence with automatic gate, and landscaping along Iron Rock Way.	Neg	04/17/2006
2001051092	Seawater Desalination Project at Huntington Beach Huntington Beach, City of Huntington Beach--Orange Construction and operation of a 50 million gallons per day seawater desalination facility that would provide potable drinking water for use by residents and businesses of Orange County. The project includes a 10,120 sq. ft. administration building, a 38,090 sq. ft. reverse osmosis building, a 36,305 sq. ft. product water storage tank, and miscellaneous accessory structures on an 11 acre lease area. The proposed improvements include up to ten miles of water transmission lines, which are in Huntington Beach and Costa Mesa, and one mile of which will be within the Coastal Zone, to connect to an existing regional transmission system in Costa Mesa and two off-site pump stations, one in unincorporated Orange County and one in the City of Irvine. The project also includes site remediation, and perimeter landscaping and fencing along Newland Street and Edison Avenue. The desalination facility would withdraw source water from the existing permitted AES Huntington Beach Generating Station's (HBGS) discharge pipeline, purify it utilizing reverse osmosis technology, and discharge concentrated seawater back to the existing HBGS's outfall for dilution with the remaining screened condenser	NOD

2006032097	Ali and Mahlie Hooshnam- Minor Subdivision- MS0622C Del Norte County Planning Department Crescent City--Del Norte Minor subdivision of a 4934 acre parcel into 1.0 acre parcel and a 48+/- acre remainder. The parcel is developed with four structures that include three residences and a multt-commercial use. The project is served by public sewer and a private water source. Connection to public water would be required. The project area is assessed from State Street	Neg	04/18/2006
2006032098	Larry Hartwick- Minor Subdivision- MS0624C Del Norte County Planning Department Crescent City--Del Norte The 9.57-acre remainder parcel is proposed to be divided into three parcels approximately 3.0 acres and 3.67 acres each in size. Parcel 2 is developed with a single-family residence while parcels 1 and 3 are undeveloped. Wisconsin Mound Systems and private wells would serve the undeveloped parcels. Access to all parcels is from Paige Lane, off of Cunningham Lane.	Neg	04/18/2006
2006032099	A Special Permit to Legitimize an Existing Quasi-Public "Half-Way House" for Up to 25 People. Humboldt County Community Development Services --Humboldt A Special Permit to bring an existing land use violation into compliance. The applicants operate the Mountain of Mercy Mission Farm, a Division of Mission Teens, Inc., a "non-profit organization with Christ-centered residential, discipleship training programs..." to help people with life-controlling problems. This site houses adults (18+) for periods of 8 - 10 months for rehabilitation purposes. The center currently has 25 clients on-site along with several staff members. In 2003 the center processed 72 people. The buildings and uses were both established without the benefit of County Review. An SP is required because, although the use is non-profit and may be considered quasi-public under Section 314-85, HCC, the Director found that this particular use required notification of the immediate community, given the fact that the violation stemmed from community concerns. The subject parcel is 52 acres in size and all services are provided for on-site. The HCC Section 311-4 allows for review under the SP process where provisions of the zoning code are unclear.	Neg	04/18/2006
2006032100	TPM2005-0031 Yuba County Marysville--Yuba A request by Glen and Joan Frazier to divide an 59.5 acre property into two parcels of 35 acres and 24.5 acres for single-family residential development. The subject property is located at 8915 Big Oak Drive in the community of Smartville in the county of Yuba. The property is located within the River Highlands Community Plan's Planning Reserve designation and is zoned Rural Residential- 5-acre minimum (RR-5) and is currently improved with one residence on the site.	Neg	04/18/2006
2006032101	Vintner View, Subdivision 8836 Oakley, City of Oakley--Contra Costa The proposed project includes rezoning a 1.57 acre portion of the site from General Agriculture (A-2) to R-7 for residential development, which will allow the project to be subdivided consistently with the parameters of the Oakley General Plan SM district. The SM designation allows a density of 2.3 to 3.8 dwelling units per gross	Neg	04/18/2006

2003111002	Proposed Tentative Tract TT-03-046 Victorville, City of Victorville--San Bernardino This project is the development of 50 acres of undeveloped land into a residential subdivision. The project will result in impacts to Mohave ground squirrel (<i>Spermophilus mohavensis</i>), a species designated as threatened under the California Endangered Species Act (CESA).	NOD	
2003111070	Tentative Tract 16654 Adelanto, City of Adelanto--San Bernardino The project includes the subdivision and development of approximately 10 acres of undeveloped land into a 30-lot single-family residential community and creation of one commercial lot. The project will result in impacts to Mohave ground squirrel (<i>Spermophilus mohavensis</i>), a species designated as threatened under the California Endangered Species Act.	NOD	
2004121103	Dudley Ridge Water District Adoption and Implementation of the 2005 Water Management Plan Dudley Ridge Water District Kettleman--Kings The specific project being approved by DWR is an exchange of State Water Project water between Berrenda Mesa Water District (BMWD) and DRWD. Up to 12,000 acre-feet of DRWD's 2005 SWP Table A water would be delivered to BMWD, a Kern County Water Agency (KCWA) member unit, in exchange for future return of 66.7% of the water to DRWD within the succeeding 13 year period. There is no construction, land use change, or modification to existing facilities and no new lands will be brought into production as a result of the requested exchange.	NOD	
2005061166	Hahamongna Watershed Park West of the Devil's Gate Dam (Flint Wash Bridge Trail Crossing) Pasadena, City of Pasadena--Los Angeles Construction of a pedestrian/bicycle/equestrian bridge over Flint Wash within Hahamongna Watershed Park (Park) at the south end of the Devil's Gate Reservoir in the City of Pasadena.	NOD	
2005072054	Laurel Road Widening Oakley, City of Oakley--Contra Costa The proposed Laurel Road Widennig project is an improvement identified in the General Plan and the 2005/2006 through 2009/2010 Capital Improvement Program (CIP). The proposed project includes the widening of Laurel Road from two lanes to four lanes, between Empire Avenue and Woodhill Drive. Improvements to Laurel Road would include repaving the entire section of Laurel Road between Empire Avenue and Woodhill Drive, and the construction of new sidewalks, curbs, and driveways, as well as the installation of a landscaped median.	NOD	
2005081124	Mayflower Park Expansion Riverside County Regional Park and Open Space District Blythe--Riverside Upgrade existing park and expand park onto adjacent 62 acres. This will include additional camping sites, improve day use areas, dry storage, and putting park on a sewer system, eliminating the septic system.	NOD

<u>Documents Received on Wednesday, March 22, 2006</u>			
2005121029	Redlands Promenade Project Redlands, City of Redlands--San Bernardino The proposed project consists of the demolition of structures currently existing on-site and the construction of approximately 160,000 square feet of retail space on the 14.27-acre site. The proposed retail center includes two major tenant stores, two secondary major tenant stores, five shop buildings, a sit-down restaurant, and additional retail shop spaces.	EIR	05/05/2006
2004121065	Aquifer Storage and Recovery Project Monterey Peninsula Water Management District Carmel, Monterey, Seaside--Monterey The proposed Aquifer Storage and Recovery project involves the construction of a new well adjacent to the existing Santa Margarita test well (both located on Former Fort Ord) that would be used to inject water diverted from the Carmel River into the aquifer during times of high flows (December to March). This water would later be extracted for use during the dry season. The timing, not the total amount of water diverted from the Carmel River, would be changed by implementing the project.	JD	05/08/2006
2006031088	The City of Santee Multiple Species Conservation Plan - Subarea Plan Santee, City of Santee--San Diego The Multiple Species Conservation Plan (MSCP) - Subregional Plan proposes to conserve approximately 2,600 acres in natural open space in the City of Santee. It is a multi-jurisdictional plan that provides a regional conservation solution to species and habitat issues that have historically presented roadblocks to land and infrastructure development. The City of Santee Subarea Plan represents its contribution to the MSCP and to regional NCCP (California Natural Community Conservation Planning) conservation goals. Implementation fo the Subarea Plan will contribute to the recovery of listed species due in part to the coordination of key biological areas, including biological cores and habitat linkages and to the proactive habitat management actions. The Subarea Plan will address the need for broad based planning to accommodate the conflicting demands for wildlife conservation and urban development, while contributing to the recovery of a species and their habitat. Conserving roughly 39% of the City's land, the Subarea Plan will accommodate the need for open space and urban development.	NOP	04/20/2006
2006031091	New Thirty-Year Lease to Chevron Products Company (Chevron) for the Existing the Chevron El Segundo Marine Oil Terminal California State Lands Commission El Segundo--Los Angeles The proposed new 30-year lease of the Chevron El Segundo Marine Oil Terminal (Marine Terminal) located offshore of El Segundo on California sovereign lands would allow Chevron to continue transfers of crude oil and petroleum products between vessels and its upland El Segundo Refinery and associated facilities.	NOP	04/20/2006

<u>Documents Received on Wednesday, March 22, 2006</u>			
2006031087	Street and Water Line Improvements with the Civic Plaza Project Hesperia, City of Hesperia--San Bernardino The proposed roadway improvements encircle a portion of the developing Civic Plaza, upon which the 40,000 library and 45,000 square foot City Hall are currently being constructed. The project is bounded by Juniper Street, Smoketree Street, Eighth Avenue, and Seventh Avenue, an area totalling approximately 17 acres. The entire Civic Plaza project contains 24 acres. Roadway improvements are proposed within Juniper Street between Seventh and Eighth Avenue; in Eighth Avenue between Juniper and Smoketree Street; in Smoketree Street between Seventh and Eighth Avenue; and in Seventh Avenue between Juniper Street and Chestnut Street. The street and water line improvements are within existing dirt roadways and upon the vacant, disturbed portions of adjacent properties.	Neg	04/20/2006
2006031089	Ferguson/Shirk Elementary School Visalia Unified School District Visalia--Tulare The construction and operation of a new elementary school to include 25 classrooms and be located on a 11-acre site. School enrollment to be a maximum of 750 students with a staff of 40 persons.	Neg	04/20/2006
2006031090	Steinman RV Park Morro Bay, City of Morro Bay--San Luis Obispo Construction of a 19 space Recreational Vehicle (RV) Park Project on a 64,274 square foot (1.48 acre) site located at 210 Atascadero Road to be utilized by mid-range RV units, tent trailers, and tent campers. The existing commercial building, single-family residence, and garage with attached studio on the easter and southeaster portions of the site would remain. The only new permanent structures proposed as a component of the project are two amenity buildings, which would include a manager's office, laundry room, men's and women's restrooms and showers. Appurtenances such as fencing and lighting would be added to the site and each RV space would have full hook-ups (water, sewer, power, and cable television).	Neg	04/20/2006
2006031092	Coastal Meadows Lompoc, City of Lompoc--Santa Barbara The proposed residential density is consistent with the Medium-Density Residential designation within both the General Plan and Zoning Ordinance. The project as proposed would not develop the portion of the project site currently designated as Open Space after the boundaries of both designations are perfected. A General Plan Amendment is not required for the approval of the proposed project.	Neg	04/20/2006
2006031093	Coast Highway and State Route 1 Sidewalk between M Street and Hinkle Place Laguna Beach, City of Laguna Beach--Orange Construction of a 5' wide sidewalk along the east side of Coast Highway beginning at Hinkle Place and continuing southward approx. 60 lineal feet. The 5' wide sidewalk would begin again at Cardinal Avenue and continue southerly, along the eastern side of the street for approx. 540 lineal feet. A retaining wall approx. 8' in height would be required along the 540' of sidewalk. The project includes curb and gutter, an 8' wide bike lane and replacement of existing street lights after construction.	Neg	04/20/2006

<u>Documents Received on Wednesday, March 22, 2006</u>			
2006031094	Sheridan View Homes (Submittal No. 2005-0151) Selma, City of Selma--Fresno The project consists of the subdivision of approximately 12.0 acres of land into approximately 43 lots for single family residential purposes, with a minimum lot size of 7,000 square feet, and is under consideration for the incorporation of an open space area. The project site encroaches into area under the jurisdiction of the Consolidated Irrigation District and therefore includes the incorporation of an existing irrigation easement with related improvements such as landscape and irrigations districts and undergrounding of the canal (Centerville & Kingsburg Canal/Bratton Ditch). The project includes the widening and improvements to an existing street (Valley View Street).	Neg	04/20/2006
2006032108	La Goma Residential Project Mill Valley, City of Mill Valley--Marin Merger of three lots into one site, rezoning the site from CG (General Commercial Zoning District) to CG-PD (General Commercial Planned Development Zoning District), and construction of 18 single-family attached condominium units. The existing residential structures would be demolished. The existing commercial (retail) building that fronts on Miller would remain. The Project also involves some stabilization of an adjacent bank of Arroyo Corte Madera del Presidio Creek and planting of landscaping.	Neg	04/20/2006
2006032109	Olivera Poultry Farm San Joaquin County Lathrop--San Joaquin Site approval application for a poultry farm to be built in 6 years in 6 phases per year. Phase 1 includes a 5,200 square foot packing room and a 25,800 square lay house, phases 2, 4, 5, & 5 include a 25,800 square foot lay house per phase, phase 3 includes a 20,800 square foot egg processing plant/office and a 25,800 square foot lay house. A manure pond would also be constructed as part of the project. At the end of construction of phase 6, the facility would house a maximum of 1 million birds.	Neg	04/20/2006
2000022106	Amador Transmission Project Amador Water Agency Jackson--Amador The Amador Water Agency completed and re-certified the Revised Final EIR for the Amador Transmission Project on August 29, 2005, and filed a NOD on August 30, 2005. On March 17, 2006, the Agency approved a minor change to the alignment of the water transmission pipeline.	NOD

	patrons. Included in this project will be a bus shelter along Hwy. 28, a bike rack, and the relocation of the crosswalk to the west of the entrance to the parking area.		
2005121174	<p>Injection of Calcium Polysulfide to Remediate Hexavalent Chromium in Groundwater and Soil, Torrance Regional Water Quality Control Board, Region 4 (Los Angeles) Torrance--Los Angeles</p> <p>Exxon Mobil operates a refinery, including a tank farm and distribution facility, on 750 acres in the City of Torrance. Regular monitoring required under Cleanup and Abatement Orders (CAO) 85-17, 89-136 and 95-116, detected chromium VI in 2000. Characterization of the 350 x 150 foot area with 56 cores, penetrometer tests or wells found Chromium VI levels as high as 200 mg/L in the groundwater and 95.9 mg/kg in the soil.</p> <p>Exxon Mobil proposed remediation using injection of Calcium Polysulfide which reduces the chromium VI into the non-toxic chromium III in the soil and groundwater underlying at about 70 feet.</p>	NOD	
2006012062	<p>City of Fairfield East-West Water Transmission Pipeline Project Fairfield, City of Fairfield--Solano</p> <p>The City of Fairfield proposes to construct the East-West Water Transmission Pipeline project (also known as Crosstown), a 36-inch potable water transmission line to connect existing water mains at the Hale Ranch Road/Cordelia Road and Cement Hill Road/Clay Bank Road intersections. The purpose of the new transmission main is to pump water from the North Bay Regional Water Plant (NBR) to Cordelia providing a redundant system for the existing waterline. Several possible route alternatives were evaluated to identify the preferred alignment. The proposed route was determined based on factors such as length, avoiding utility conflicts, right-of-way acquisition, and minimizing traffic impacts. A third of the the route parallels the new Kinder Morgan 20-inch fuel line. The project would consists of 7.2 miles of 36-inch diameter concrete cylinder pipe or cement lined coated steel pipe. It would be constructed with bore and jack under-crossings at certain specified locations below railroads, streets, utilities, culverts, and creeks. A total of seventeen bore and jack crossings would be required. The project would utilize existing City of Fairfield right-of-way, where available, and as required, City of Suisun City, Solano County, and Caltrans right-of-way. The proposed route would require permanent and temporary construction easement acquisition on approximately a dozen properties. Due to the length of the proposed water line, construction would be phased over a number of years.</p>	NOD	
2006012136	<p>Cawelo Water District Water Transfer Zone 7 Water Agency Livermore--Alameda</p> <p>Zone 7 Water Agency proposes to acquire up to 10,000 acre-feet per annum (afa) of supplemental, dry year water supply by participating in a long-term, in-lieu water banking program managed by Cawelo Water District (CWD). CWD's banking program would allow Zone 7 to store its surplus State Water Project allocation in CWD's groundwater basin; in turn, a portion of the banked water would be recovered from CWD when needed (during drought periods), with Zone 7 taking delivery at Bethany Reservoir and the South Bay Aqueduct. This transfer would serve municipal, industrial, and agricultural uses within Zone 7's service area and be integrated with Zone 7's existing water supply sources.</p>	NOD

2005051026	Gualberto J. Valadez Middle School (formerly Southwest Middle School) Project Placentia-Yorba Linda Unified School District Placentia, Anaheim--Orange The proposed project would consist of the site acquisition, construction, and operation of a middle school on approximately 10 acres of land. The middle school would provide educational facilities for grades 6 through 8 and would serve approximately 850 students. Approximately 65 teachers, administrators, and other staff members would work at the school.	EIR	05/08/2006
2005102127	Kaiser South Sacramento Medical Center Expansion (P04-185) Sacramento, City of Sacramento--Sacramento The proposed project would add approximately 244,000 square feet to the existing Medical Center including: a Hospital Tower (approx. 158,000 sf); an Outpatient Surgery Center (approx. 57,000 sf); a five-story 882-space parking structure; an addition to the Central Utility Plant (approx. 6,000 sf); an expansion of the existing Emergency Department (approx. 10,000 sf); an addition to an existing medical office building (approx. 15,000 sf); and an emergency helicopter landing pad (Helipad) as part of the new Trauma Center.	EIR	05/08/2006
2006031098	Tentative Tract Map 17406 Twentynine Palms, City of Twentynine Palms--San Bernardino Subdivision of 80 acres into 32 lots, TTM 17406.	MND	04/24/2006
2006032116	Pilarcitos Quarry Minor Expansion San Mateo County Half Moon Bay--San Mateo The applicant is proposing to modify its existing permits to mine the area known as the Pilarcitos Quarry. The modification will allow expansion of mining operations onto a seven-acre area immediately adjacent to existing mining operations. Current quarry operations involve surface mining of weathered, fractured granite and the production of gravel and sand. No expansion of the processing area or additional equipment is proposed. The applicant is not requesting an increase in the number of truck trips currently allowed for under the existing permits. The applicant is proposing this expansion because the usable material within the existing area of operations is reaching the point of depletion.	MND	04/24/2006
2006032118	Fourteen-Mile Slough Pump Station Upgrades Project Stockton, City of Stockton--San Joaquin The proposed Fourteen-Mile Slough Pump Station Upgrade Project consists of the construction of a pump station capable of expansion to approximately 22.5 mgd to accommodate wastewater demands as projected in the 1990 General Plan. At maximum pump station capacity, the pump station would operate five duty pumps and retain one pump in stand-by for redundancy. The project site is adjacent to the Fourteen-Mile Slough levee and requires protection against flooding from this slough. A berm would be constructed and capped around the pump station site. This berm would tie into the Fourteen-Mile Slough levee.	MND	04/24/2006

2004051020	Fillmore Water Recycling Plant Fillmore, City of Fillmore--Ventura Minor modifications/changes to the proposed Water Recycling Plant (WRP) including construction of recycled water pipelines. Project would also include the construction of a Water Softening Plant and associated pipelines to treat the City of Fillmore's municipal water supply. Project is designed to meet Regional Water Quality Control Board- Los Angeles and California Department of Health Services requirements.	NOP	04/24/2006
2004102054	Syar Phase VI - Use Permit Amendment and ARM Plan Amendment - PLP03-0108 Sonoma County Permit and Resources Management Department Healdsburg--Sonoma The applicant has proposed a five-year extension of the time to mine the Phase VI terrace mining area. The five-year extension will allow Syar to provide high quality sand and gravel materials to the building industry from local source, while providing more time for the development of alternative sources of high-end aggregate. Syar estimates that approximately 1.5 million tons of material will remain in the Phase VI mining area at the April 15, 2006 expiration date identified in the current Phase VI terrace pit. The material to be mined will be extracted from the terrace pit using a dragline. Syar intends to remove an average of 300,000 to 500,000 tons per year. At this removal rate, Syar believes it will be able to better ensure that this aggregate material will be used only for higher end uses. The Conditions of Approval included in the approval for PLP03-0046 will continue to apply during the extended mining period. Other conditions of approval may be added as appropriate. Aggregate material removed from Phase VI terrace pit will be hauled to the processing area as approved for PLP03-0046. Given the limited amount of material to be produced annually, no stockpiling would occur on the west side of the Russian River during the proposed extension period.	NOP	04/24/2006
2006032117	Rubicon Trail Master Plan El Dorado County --El Dorado The project consists of the development and adoption of a Rubicon Trail Master Plan (RTMP) to guide El Dorado County's management of off-highway vehicle operations and other activities on the El Dorado County portion of the Rubicon Trail. 2006032122	Adkins (Lou Ann) Minor Subdivision & Coastal Development Permit Humboldt County Community Development Services Eureka--Humboldt The Minor Subdivision of a 4.23 acre parcel into three parcels ranging in size from +/- 8,400 sf to +/- 14,000 sf and a +/- 3.8 acre remainder. The site is considerably encumbered by wetlands and a PG&E easement. A wetland delineation (SHN, April 2004) resulted in much of the property being unbuildable. Sites suitable for residential development have been identified on each parcel outside the wetland buffer. The site is within the appeal jurisdiction of the coastal zone. New development will be served by community water and sewer.	MND	04/25/2006
2006032126	Richland Towers Mt. Allison Broadcast Facility Project Alameda County Fremont--Alameda The project proponent, Richland Towers LLC, holds an option to lease the project site from the landowner to construct and operate a communication broadcast facility. The facility would consist of one broadcast tower, associated piers and anchors, one equipment building, and various ancillary services and subsidiary structures. These facilities would cover approximately 4 acres.	MND	04/25/2006
2006031108	San Miguel Ranch General Plan Amendment and Vesting Tentative Tract Map (LR2004-00007) ED05-237 San Luis Obispo County --San Luis Obispo The proposed project consists of a request for approval of a General Plan Amendment and a Vesting tentative Tract map that would result in the rezoning and subdivision of approximately 550 acres in order to allow for a variety of residential, commercial, recreation, and open space land uses. The proposed general plan Amendment was authorized for processing by the County Board of Supervisors, June 2005. the proposal includes provision of services by the San Miguel Community Services District (SMCSD) which would require expansion of the San miguel Urban Reserve Line (URL) and the Urban services Line (USL). Expansion of the URL would require action by the Local Agency Formation Commission (LAFCo) to annex the property to the SMCSD.	NOP	04/25/2006
2006031112	North Apple Valley Specific Plan Apple Valley, City of Apple Valley--San Bernardino The Specific Plan will provide development standards and guidelines for the ultimate development of a 4937 acre industrial park, to include a range of permitted and conditionally permitted industrial uses, as well as commercial support services and retail facilities.	NOP	04/25/2006
2006032120	Moffett Towers Sunnyvale, City of Sunnyvale--Santa Clara The project proposes the construction of seven eight-story office buildings, three four-level parking structures, surface parking areas, and a two-story amenities building that would house food service, meeting rooms, and recreational uses. The project requires a General Plan Amendment for a portion of the site to change the Moffett Park Specific Plan subdistrict and Zoning from MP-I (General Industrial) to MP-TOD (Moffett Park Transit Oriented Development). The Project proposes to increase the maximum allowable floor area ratio to 70% FAR from the standard intensity of 50% FAR for 28 acres of the overall site area.	NOP	04/25/2006

In addition, 10 guest parking spaces will be provided for the proposed development. Access to the site will be off of Colima Road where a new driveway apron will be constructed. The existing 6 foot high concrete block walls on the south, east, and west property boundary will remain. Water and sewer services will be connected to public systems. Approximately 1,080 cy of grading will be required and approximately 441 cy of material will be imported to the site. All existing structures at the site will be demolished in order to accommodate the proposed development. Application also includes request for a zone change from A-1-6,000 to R-2-DP; a plan amendment from Urban 2 to Urban 3; and a CUP for review of Development Program requirements.	Neg	04/25/2006
2006031110	Athens Sheriff Station Project Los Angeles County Department of Public Works --Los Angeles The County of Los Angeles is proposing the construction of a permanent facility for the Athens Sheriff's Station, a new Probation Office/Building and Safety Office building, and a County administrative building in the unincorporated West Athens/Westmont area of Los Angeles County. The proposed project site is approximately 14.5 acres in size and located at the southeast corner of the Imperial Highway/Normandie Avenue intersection. The new Sheriff's Station facility would have approximately 34,000-square feet of floor area and a 5,000-square foot service building. Other uses associated with the Sheriff's Station would include a fueling island with above ground fuel storage tanks, an emergency generator with above ground fuel storage tanks, a 150-foot high communication tower, a helistop, an 800-square-foot car wash facility and parking areas for Sheriff's Department vehicles and staff. The project would also include a new 30,000-square-foot Probation Office building, which includes an approximately 5,000-square-foot Building and Safety Office, and associated visitor and staff parking and a two-story approximately 60,000-square-foot County Administrative building and associated parking. A total of 649 parking spaces would be provided on-site.	Neg	04/25/2006

<u>Documents Received on Monday, March 27, 2006</u>			
2006032127	Duarte Ranch, SD 9027 Oakley, City of Oakley--Contra Costa The proposed project site consists of two parcels totaling approximately 29.1 acres, south of Laurel Road and east of Rose Avenue. The General Plan land use designation allows 3.8 to 5.5 units per acre; the proposed project density is 3.98 units per acre. As part of this project, the applicant is requesting to rezone the property to Single Family Residential, 6,000 sq. ft. minimum lot size (R-6). Approval of the proposed subdivision would result in the creation of 116 single family lots and a 2.1-acre park. Entitlements requested as part of the project include a rezone, tentative map, design review and a tree permit to remove 2 protected trees.	Neg	04/25/2006
1989041009	Ontario International Center Update Ontario, City of ONTARIO--SAN BERNARDINO The Piemonte Project consists of approximately 1,292,068 square feet of mixed retail, commercial, office, and hotel uses; and up to 806 condominium/apartment units.	NOD	
1990020314	Croftwood Subdivision Rocklin, City of Rocklin--Placer The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2004-0150-R2 pursuant to Section 1602 of the Fish and Game Code to the project operator, Alleghany Properties, Inc. of Sacramento, CA: The project consists of installing of a stream crossing, bank excavation and riparian fill for construction of an 83.3 acre residential subdivision.	NOD	
2001061013	Laval Farms Water Management and Exchange, Including Water Right Applications, and Wheeler Ridge-Maricopa Water Storage District 850 Canal/Reservoir No.1 Pump.. Wheeler Ridge-Maricopa Water Storage District Maricopa--Kern The project contains two components: (a) water right applications 30325 - 30329 and 31043 - 31048, filed with the State Water Resources Control Board (State Water Board) in 1993 and 1999, and (b) WRMWSD's 850 Canal/Reservoir No. 1 Pump-back. TRC would construct ten new pipelines and nine new weirs to divert water from El Paso, Grapevine, Live Oak, Pastoria, Tecuya, Tejon, and Tunis Creeks as part of the project. TRC will divert a maximum of 15,000 acre-feet per annum (afa) of water by direct diversion and storage, to be used for the purposes of irrigating almonds, grain forage, grapes, olives, pistachios, row crops, and walnuts, mining, and stock watering on WRMWSD and TRC lands. WRMWSD proposes to construct a pump-back facility to pump water from the 850 Canal into Reservoir No. 1 during off-peak energy use hours. The pump-back facility would require the replacement and extension of an existing pipeline and the installation of a new pump station.	NOD

<u>Documents Received on Monday, March 27, 2006</u>			
2004012020	<p>Tower Bridge Pedestrian / Bicycle Improvements Project Caltrans #3 Sacramento--Sacramento, Yolo</p> <p>The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2006-0050-R2 pursuant to Section 1602 of the Fish and Game Code to the project applicant, City of Sacramento - Department of Transportation.</p> <p>Pedestrian/Bicycle Improvements Project on the Tower Bridge. The proposed project would widen the existing pedestrian walkway on each side of the bridge. The proposed project would result in the removal of up to 5 mature cottonwood trees.</p>	NOD	
2004049035	<p>IS No. 4375-R; Friant Road Improvement Project Fresno County Fresno--Fresno</p> <p>Reconstruct 7.9 miles of Friant Lane from a rural two-lane road to a four-lane road between Copper Avenue and Road 206.</p>	NOD	
2005051149	<p>Friant-Madera Canal Bridge Rail Upgrade Caltrans #6 Madera--Madera</p> <p>This project will upgrade existing wooden bridge rails with concrete rails, install approach railings, and realign the road for canal access.</p>	NOD	
2005061028	<p>Perris Valley Pipeline Project Western Municipal Water District Riverside, Moreno Valley--Riverside</p> <p>In a further refinement to the previously approved project, the District proposes to additionally install approximately 13,200 lineal feet of 48-inch diameter CML&C welded steel pipe, fittings, and appurtenances to its distribution system to provide a delivery route for water from the Cactus Avenue Pumping Plant proposed in the FEIR to the District's existing facilities at the intersection of Cactus Avenue and Heacock Street in the City of Moreno Valley.</p> <p>The Cactus Avenue Pipeline would be constructed of 48-inch diameter welded steel pipe designed and constructed to water industry standards. The pipeline would connect to Metropolitan's 96-inch diameter Perris Valley Pipeline that generally extends south-southwest from the Mills Treatment Plant westerly of the I-215 Freeway. The Cactus Avenue Pipeline would begin at the discharge side of the Cactus Pump Station which is located on Lot 68 of the Meridian Development that is approximately 800 feet west of the I-215 Freeway. The alignment would traverse east from the Cactus Pump Station crossing the I-215 Freeway about 800 feet north of the I-215 Freeway/Cactus Avenue Interchange. The alignment would extend across an undeveloped parcel to the existing East Frontage Road that parallels along the east side of the I-215 Freeway, where it would turn south. From this location the alignment would extend south along the west side of the East Frontage Road right-of-way to before reaching Cactus Avenue, and then extend eastward along the south side of Cactus Avenue to its terminus at Heacock Street. The proposed alignment would be approximately 2.5 miles in length.</p>	NOD

<u>Documents Received on Monday, March 27, 2006</u>			
2005072071	Hanna Drive Bridge over North Slough American Canyon, City of American Canyon--Napa The operator proposes to install a temporary freespan flatcar bridge over North Slough at the easterly extension of Hanna Drive, approximately 1/4 mile east of Commerce Boulevard in the City of American Canyon, Napa County. To accommodate the length and depth of the steel girders, a portion of the bank above the 100 year flood elevation will be pulled back. No equipment, construction activity, falsework, or shoring will be placed within the creekbed. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2005-0750-3 pursuant to Section 1602 of the Fish and Game Code to the project operator, Neil S. Thompson / Industrial and Commercial Contractors.	NOD	
2005072143	Biofiltration Wetland Project - Soquel Creek Lagoon (Application #05-031) Capitola, City of Capitola--Santa Cruz Biofiltration wetland system intended to assist with water quality improvements in the Soquel Creek Lagoon.	NOD	
2005111080	Northpointe Professional Office and Commercial Retail Project San Bernardino, City of --San Bernardino A request to create 9 parcels and construct a five-story, 284,000 square foot professional office building, two parking structures (each with one level above grade) and 64,300 square feet of commercial space, which includes 22,000 square feet of commercial retail in three buildings and 42,300 square feet of restaurant uses in six buildings.	NOD	
2005114006	Perris II Desalter U.S. Army Corps of Engineers Perris--Riverside Eastern Municipal Water District (EMWD) intends to construct a three million gallon a day desalter that encompasses the following components: 1) Reverse Osmosis (RO) building; 2) chemical storage and feed facilities; 3) chlorine contact tanks and finished water pump station; 4) a brine pump station and connection to Temescal Valley Regional Interceptor; 5) a field laboratory; and 6) a storage and maintenance facility. The construction of ancillary brine conveyance pipeline will be from the Perris II Desalter to the EMWD Menifee Desalter Plant located in Sun City, and would come off the Perris II Desalter and connect underground from Watson Road on the south side of the road, running approximately 1/2 mile west where it would tie into existing brine pipeline on the east side of Murrieta Road. Supporting facilities will include feed water pipelines and brackish water wells in the Perris South Sub Basin. Upon completion, the Perris II Desalter will supply needed water to the EMWD service region by producing potable water from an otherwise unusable groundwater resource, and will reduce future demands for imported water that would otherwise be purchased from the Metropolitan Water District of Southern California.	NOD	
2005121106	Mesa College East Entry and Parking Garage San Diego Community College District San Diego--San Diego Acquire 2.69 acres from the City of San Diego for the development of a parking garage and a new east entry as part of the implementation of the adopted Mesa	NOD

	College Facilities Master Plan.		
2005121175	Programmatic Mitigated Negative Declaration for the Integrated Water Resources Plan Stevinson Water District --Merced The proposed projects include conveyance system improvements through lateral piping, a drainage management through the expansion of wetlands, and a groundwater management program.	NOD	
2005122067	Duong Chung Tentative Subdivision Map/Rezone Elk Grove, City of Elk Grove--Sacramento Rezone 2.2 acres from AR-2 (Agricultural Residential, 2 acre minimum) to RD-5 (Residential, 5 units per acre) and a Tentative Subdivision Map to create 9 residential parcels.	NOD	
2006011092	Recycled Water Dechlorination Facilities Eastern Municipal Water District Lake Elsinore, Wildomar--Riverside Eastern Municipal Water District is currently operating temporary sodium bisulfite systems to dechlorinate recycled water prior to discharging into Temescal Wash/Alberhill Creek. These existing temporary facilities were installed on an as-needed basis and are in need of operational and safety improvements. Also, they are not sized to handle the increasing recycled water flows. In order to reduce health and safety risks to the operators, optimize the dechlorination system, provide protection to the aquatic species in Temescal Wash/Alberhill Creek, and standardize the design, construction, equipment selection, and operation and maintenance, EMWD proposes to install permanent facilities at three project sites that would be safer and easier to operate than the existing dechlorinating facilities. The proposed project would consist of the construction of permanent dechlorination facilities at the Palomar Recycled Water Pump Station, the Reach 4 Recycled Water Pump Station, and the Reach 4 Energy Dissipation Facility. The new systems to be installed at each site would include a number of features to limit risk including containment areas, double walled storage tanks, redundancy, and the use of sodium bisulfite (a low risk chemical), pumps, analyzers, an uninterruptible power supply, and control panels. The existing facilities would be removed at the Palomar and Reach 4 Recycled Water Pump Stations.	NOD	
2006011137	Cypress Avenue Overcrossing at Interstate 10 Fontana, City of Fontana--San Bernardino The project consists of a new four-lane grade separation on Cypress Avenue cross I-10. The new overcrossing would extend approximately 0.8 km (0.5 mi.) from Valley Boulevard on the north to Slover Avenue on the south. The primary purpose of the proposed project is to provide an additional access route across I-10 to relieve current and future traffic congestion on existing.	NOD	
2006039028	Lake or Streambed Alteration Agreement (Agreement) No. 05-0507 for Timber Harvesting Plan (THP) 1-05-218HUM Forestry and Fire Protection, Department of --Humboldt The Department of Fish and Game is issuing an agreement for the installation of four permanent culverts and one temporary culvert at five stream crossings. 2006038508	Widen for Two-Way Left-Turn Land between Hedge and mayhew Road on SAC 16 Caltrans #3 --Sacramento Widen State Route 16 for a two-way left-turn land between Hedge Avenue and Mayhew Drive, and to upgrade shoulders to 1.2 meters (3.9 feet) in same area. Propose paved access/driveways upgraded and paved to state right-of-way limits, modify existing drainage facilities to accommodate work, entire roadway overlaid with new asphalt concrete, and where needed, replace utilities. All work in state right-of-way.	NOE	
2006038509	Green Parcel Map - EG-05-882 Elk Grove, City of Elk Grove--Sacramento Tentative Parcel Map to divide 4.0 acres into two 2-acre lots and an Exception from the requirement for public water and public street frontage.	NOE	
2006038510	Maintenance Area 9 Bank Stabilization Fish & Game #2 --Sacramento The proposed project consists of resloping the levee and placing soil/rock mixture on eroded sites from the levee crown. A long-arm backhoe operating from the levee crown will be used to complete the placement of approximately 3,700 tons of soil rock mixture. The back hoe's bucket will be used to re-slope and blend earth embankment erosion areas before placing and pounding the riprap into the bank.	NOE	
2006038511	In-stream Collection Cistern at an Unnamed Stream at 55 Mission Trail Road Fish & Game #3 Woodside--San Mateo The project consists of an existing in-stream collection cistern (measuring approximately 1.37 meters in diameter), constructed in 1975, that pumps water to a concrete water storage tank at an estimated rate of 0.134 cfs. The cistern spans approximately 1/3 to 1/2 the width of the creek bed and collects water primarily during high flows. SAA # 1600-2005-0710-3.	NOE	
2006038512	West 7th Street Sidewalk Fish & Game #3 Benicia--Solano Repair the sidewalk along 1251 West 7th Street and an unnamed tributary to the Carquinez Strait. The repair will consists of installing 86 feet of sheetpiling at five locations along the back of the sidewalk. The areas under the sidewalk that have been undermined will be backfilled with imported material. The sidewalk and curb and gutter will be replaced as necessary. A pedestrian handrail will be installed at the top of the sheetpile wall. SAA #1600-2005-0683-3.	NOE	
2006038513	Countywide Fire Protection Service Review Final Report and Determinations Santa Clara County Local Agency Formation Commission --Santa Clara The Countywide Fire Protection Service Review Study is intended to serve as an information gathering tool to help LAFCO, the public, and other agencies better understand the fire protection service structure in Santa Clara County and to develop information to update the spheres of influence (SOI) of fire protection districts and cities in the county. The Countywide Fire Protection Service Review consists of the following items: - Summary profiles of all agencies providing fire protection services in Santa Clara	NOE

	County - Population projections for Santa Clara County - Definition of fire service goals - Financing mechanisms for fire services - Issues with current fire protection services and analysis of alternatives for addressing those issues - Service review determinations.		
2006038514	Agreement No. 2005-0074-R4; Kern River 1 and 3 Hydroelectric Projects - Routine Maintenance Agreement for Sediment Management Fish & Game #4 --Kern Sediment management and removal activities within the projects, which includes operational sluicing, annual pond draining, bypass of sediment during storm events, routine sandbox flushing, and mechanical dredging. Dredging will be completed with heavy equipment, using a temporary access ramp that will occur during low flows.	NOE	
2006038515	Anaheim Bay Bridge Rock Slope Protection Caltrans #12 Seal Beach--Orange The project proposes to protect Anaheim Bay Bridge by reconstructing the existing abutments and roadway embankments to a 1:1.55 slope, placing rock slope protection over the slope to join the existing eroded rocks up to an elevation of 4 m, and installing erosion control blanket from elevation of 4 m up to the top of the slope; replacing 2 metal beam guard rail ends; installing chain link fence; constructing a maintenance vehicle pullout; lining existing drainage pipes, constructing 4 new inlets and reconstructing 7 existing outlets. The project includes landscaping and restoration work. It includes grading of the north-east existing roadway embankment, adjacent to the rock slope protection, to a 1:2.5 slope and its re-vegetation. The CE/PCE issued on 3/1/06 supercedes the CE/PCE issued on March 28, 2005 and has been updated due to the change in the scope of work. The additional impacts are minimal, i.e., less than 35 sq. meters due to the additional local rock slope protection at the reconstructed 7 existing outlets. The project will impact 0.02 acres of wetlands and will create 0.08 acres of wetlands.	NOE	
2006038516	River Access and Landscaping Reclamation Board --Solano Construction of access to Miner Slough and landscaping. Beneficiaries are John & Kathy Brimmer.	NOE	
2006038518	Day-Use Roads and Culverts Repair Parks and Recreation, Department of --Napa Repair damage to roads and culverts caused b the winter 2005/06 storm events in Bothe Napa Valley State Park. Work will remove debris jams at culvert inlets, reinforce areas that experienced severe erosion with rip rap, repair road surface with road base. Reinforcing culvert inlets and outlets will include armoring with rip-rap, repair road surface with road base.	NOE

<u>Documents Received on Tuesday, March 28, 2006</u>			
2006032130	Linda County Water District Wastewater Treatment Plant and River Outfall Improvements Linda County Water District Marysville--Yuba The proposed project would upgrade and expand wastewater treatment capacity at the District's WWTP to 5.0 million gallons per day (MGD) from its current capacity of 1.8 MGD average dry weather flow (ADWF). The District has available approximately 22 acres at its WWTP site to accommodate the construction of proposed facilities. The District anticipates approximately 15 acres of the available space would be needed for the proposed facilities. All of the plant improvements would occur within the District's property adjacent to or on the existing WWTP site. In addition to the increase in treatment capacity, the proposed improvements would raise the level of treatment from "secondary" to "tertiary". The treatment process being considered is an activated sludge system with extended solids detention, followed by tertiary filtration and chlorine disinfection.	NOP	04/26/2006
2006032133	Jack London Square Residential Tower Oakland, City of Oakland--Alameda The proposed project would include demolition of the existing hotel and construction of a 26-story, approximately 310-foot tall residential building that would contain about 257 dwelling units and about 7,650 square feet of ground floor commercial space. The project would be constructed as two asymmetrical towers - one 17 stories tall and the other 20 stories - above a six story podium. The towers would be connected by a glass-covered element that would contain elevators and a corridor linking lobbies and vehicle entrances, building services, and parking spaces at the ground floor, with five levels devoted to parking above.	NOP	04/26/2006

2005051059	Carson Marketplace Carson, City of Carson--Los Angeles Development of a 168-acre site with some or all of the following uses: neighborhood commercial, regional commercial, commercial recreation/entertainment, restaurant, hotel, and residential: specifically, a total of 1,550 residential units (1,150 for-sale units and 400 rental residential units), and 1,995,125 square feet (sq. ft.) of commercial floor area, inclusive of a 300 room hotel. The project includes an Equivalency Program that would allow the composition of on-site development to be modified in a manner that does not increase the project's impacts on the environment. For example, office uses might be developed in place of a portion of the above proposed uses subject to the Equivalency limitations. Project development would be guided by a comprehensive set of development standards and regulations which are set forth in detail in the Carson Marketplace Specific Plan.	NOD	
2005082096	Kings Beach Mixed Use Village (Conditional Use Permit - PCPC 2005 0045) Placer County Planning Department --Placer Proposal to construct a new mixed-use village consisting of approximately 8,513 sf of new commercial development and 10 multiple family residential units consisting of 8 two-bedroom units and 2 one-bedroom units.	NOD	
2005082135	Housing Element Update of General Plan Portola, City of Portola--Plumas The Housing Element is a planning tool for use by citizens and public officials in understanding and meeting the housing needs in Portola. It addresses existing and future housing needs of all types for persons of all economic groups in the City and is one of the seven required elements in a General Plan. State law requires the Housing Element be updated every five years.	NOD	
2005092100	Vandenberghe/Keefer - 2005 Summer General Plan Amendment Plumas County Planning Department Quincy--Plumas Proposal to amend the general plan designation and zoning of 11.94 acres of a 14.92 acre parcel near Chester from Prime Recreation (Rec-1) within a Suburban Opportunity Area to Single Family Residential (7-R) within a Prime Opportunity Area.	NOD	
2005092145	Gabriel and Elizabeth Castrejon - 2005 Summer General Plan Amendment Plumas County Planning Department --Plumas Proposal to amend the general plan designation and zoning of 11.59 acres from Prime Industrial, Heavy Industrial (I-1) in a Secondary Suburban Opportunity Area to Secondary Suburban and Zone S-3 within a Secondary Suburban Opportunity Area.	NOD	
2005092146	William Byrd & Jeann Harrison - 2005 Summer General Plan Amendment Plumas County Planning Department --Plumas Proposal to amend the general plan designation and zoning of approximately 480 acres from Rural (R-10) within an Agricultural Buffer and Rural Opportunity Area to Agricultural Preserve (AP) while retaining the Flood Plain Combining Zone. 2005092147	Sim & Kate Sheppard - 2005 Summer General Plan Amendment Plumas County Planning Department --Plumas Proposal to amend the general plan designation and zoning of 45.12 acres from General Forest (GF) to Rural (R-10) within a Rural Opportunity Area while retaining the Mobile Home (MH) Combining Zone.	NOD	
2005101036	Monte Vista Storm Drain (Whitebrook Storm Channel) Project La Habra, City of La Habra--Orange The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2005-0688-R5 pursuant to Section 1602 of the Fish and Game Code to the project applicant, Ms. Kim Prijatel of The Olson Company. The operator proposes to alter the streambed and banks by the construction of a concrete trapezoidal channel extending from the South Pacific Railroad southern right-of-way line (52-feet south of railroad centerline) to approximately 800 linear feet south along the existing stream course. A transition of approximately 40 linear feet will taper from the existing flat bottom streambed to the proposed concrete channel to allow for the diffusion of waters into the proposed concrete channel; medium to heavy rip-rap concrete rock will be placed in this segment. The Operator shall not permanently impact more than 0.24 acre of stream consisting of disturbed riparian habitat. The Operator shall mitigate for impacts by providing adequate funding to the Santa Ana River Conservation Trust Fund, administered by SAWA for the purchase of 0.96 acre of credit to be applied towards the creation, restoration and/or enhancement of 0.96 acre of native riparian habitat. Proof of payment of fees shall be submitted to the Department prior to commencing project activities. SAWA should provide an annual report of the mitigation site to the Department of Jan. 1 for years 1 through 5. Photos from designated photo stations shall be included. Non-native species shall comprise less than 5% of the cover after 5 years. Invasive species shall comprise 0% of the cover at the end of the 5-year monitoring period.	NOD	
2005102023	Everett Property Mixed Use Development (PMPB 2005 0449) Placer County Planning Department --Placer Proposed to construct a two-story mixed-use residential and commercial project to include 5,560 sf of area devoted to commercial use with residential space occupying 1,460 sf.	NOD	
2005102024	West Valley Industrial Complex (PCPA 2005 0071) Placer County Planning Department Roseville, Rocklin--Placer Proposal to construct four, 5,000 +/- sf tilt-up industrial buildings with fenced yards.	NOD	
2005111102	Comprehensive Plan and Zoning Ordinance Amendments to Re-designate Consolidated Oil & Gas Production, Processing, and Pipeline Terminal Sites within the County' Santa Barbara County --Santa Barbara Update oil and gas consolidation policies to reflect current operations and future needs. Specific plan and ordinance amendments repeal descriptive text that is no longer accurate; repeal consolidated processing site designation at Gaviota; repeal tank farm siting criteria in coastal zone; establish consolidated pipeline terminal designation and apply to Gaviota site.	NOD

2005121125	Deep Rose Geothermal Exploration Project Division of Oil, Gas, and Geothermal Resources --Inyo Proposes activities necessary to drill and test up to 6 exploratory geothermal wells on one new location located on state lands.	NOD	
2005122047	Chlorine Conversion Project North Tahoe Public Utility District --Placer The North Tahoe Public Utility District intends to construct a 450 square foot building and related improvements to replace a chlorine gas sewage treatment facility with a sodium hypo choride system to meet Placer County Environmental Health requirements. Treated surface-water runoff from impervious surfaces associated with the new improvements will be diverted onto California Tahoe Conservancy property. The California Tahoe Conservancy has approved the assignment of up to 1,900 square feet of restoration credit needed for the Chlorine Conversion Project. The assignment of restoration credit enables the receiving landowner to carry out the project without any net increase in the amount of existing land coverage in the sensitive land-class area with the Tahoe Basin.	NOD	
2005122049	2005-117 Zoning Amendment for Terens and Christine Owens Calaveras County Planning Department --Calaveras The applicant is requesting a Zoning Amendment from U (Unclassified) to RR (Rural Residential) on 40.20 +/- acres. Currently a Boundary Line Adjustment No. 05-50 was conditionally approved, which required a zoning amendment. The northerly parcel will be about 76.47 +/- acres, while the southerly parcel, about 10.00 +/- acres. Both parcels will be zoned RR (Rural Residential).	NOD	
2006012054	Lighthouse Landing - Passport Homes Suisun, City of Suisun City, Fairfield--Solano Prezone, Annexation, Tentative Subdivision Map, and Planned Unit Development. Prezone east side of Blossom to RM for a 75 unit SF development on 9.5 acres with 1.3-acre park, and prezone the west side of Blossom to CS and RS. Homes will be detached units in a courtyard setting, with 4 or 5 units sharing a common driveway.	NOD	
2006012102	2005-11 General Plan Amendment and Zoning Amendment for Sandra A. Osborn and Shana R. Shawkey Calaveras County Planning Department Angels Camp--Calaveras The applicants are requesting a General Plan Amendment to the City of Angels, Sphere of Influence to change the land use designation from AG (Agriculture), RL (Residential Low Density) and SP (Special Planning) to RL (Residential Low Density) for 96.46 +/- acres and concurrently a Zoning Amendment from U (Unclassified) and A1 (General Agriculture) to RA (Residential Agriculture) to accommodate Boundary Line Adjustment 05-03.	NOD	
2006012122	Ward Creek Diverson Structure Removal Tahoe Conservancy --Placer The primary component of the project is the removal of a small concrete dam and associated structures in Ward Creek which previously diverted water into a private water system. The water system is no longer in operation and the dam is not	NOD

2006038533	<p>Pirates' Den Rain gutters and Downspouts Upgrade Parks and Recreation, Department of --Monterey</p> <p>The Pirates' Den building is an historic structure located at Asilomar State Beach and Conference Grounds. It is used for guest housing by the concessionaire, Delaware North Park Services. Currently rain that falls upon the roof is gathered from two roof faces and concentrated above each doorway. The resultant cascade of rainfall splashes on the ground below the roofline which then stains and damages the wood doors and wood shingle siding.</p>	NOE	
2006038534	<p>Hawver Cave/Cool Quarry Entrance Closure Project Parks and Recreation, Department of --El Dorado</p> <p>Close entrances to the Hawver Cave and mine complex at the Cool Limestone Quarry. This includes closing one portal entry and two air shafts. the Hawver Cave/Cool Limestone Quarry mine complex is located partially within Auburn State Recreation Area (SRA) and partially within the area leased by the U.S. Bureau of Reclamation to Teichert Aggregates. The underground complex is part natural cave and part excavated mine tunnels.</p>	NOE	
2006038535	<p>Iron Mountain, Eagle Mountain, and Hind Airfields Lighting and Reflectors Installation Project Metropolitan Water District of Southern California --Riverside, San Bernardino</p> <p>Metropolitan is proposing the installation of replacement reflectors and lighting for Iron Mountain, Eagle Mountain, and Hinds airfields for compliance with applicable safety standards.</p>	NOE	
2006038536	<p>Grant-Funded Water-Quality Improvements for Lake Perris Agreements Metropolitan Water District of Southern California Los Angeles, City of--Los Angeles</p> <p>Metropolitan needs to enter into two agreements for consulting services to improve water quality and ensure access to stored water at Lake Perris, a State Water Project surface water reservoir. Design services agreements are needed to design facilities to reduce taste and odor problems caused by low dissolved oxygen levels and to alleviate water quality concerns from body-contact recreation. Metropolitan was awarded two Proposition 13 grants to develop solutions to these problems. Initiation of preliminary design is needed now to make use of grant funds within the time allowed by the State Water Resources Control Board, the grant administrator. Failure to complete the work within the time allowed may require Metropolitan to return grant funds. The grant work at Lake Perris will consist of two parts. Part A consists of design and related services for an underwater oxygenation system at Lake Perris and Part B includes design and related services for facilities to reduce pathogen risks at Lake Perris.</p>	NOE	
2006038537	<p>Henry J. Mills Water Treatment Plant Chlorination Capacity Increase Project Metropolitan Water District of Southern California Riverside--Riverside</p> <p>The project will add new chlorine ejectors and piping, modifying existing diffusers, and upgrade the capacity of existing chlorinators.</p>	NOE

2006038538	Henry J. Mills Water Treatment Plant Industrial Wastewater Improvements Project Metropolitan Water District of Southern California Riverside--Riverside The project will add instrumentation to provide online monitoring of wastewater pH values, a third storage tank, valves, and piping to the solids retention basins.	NOE	
2006038539	Sprig Lake Watershed Culvert Replacement Santa Clara County Parks and Recreation Department Gilroy--Santa Clara Santa Clara County Parks will be replacing 16 culverts along the Blackhawk Canyon Trail (10 culverts), Merry-go-round Trail (4 culverts) and the Sprig Lake access road (2 culverts). Culvert replacements are along seasonal cross drainages, except one culvert which will be along an unnamed intermittent stream that runs parallel to Merry-go-round trail. All work will be performed when no water is present. Areas where exposed soil has been disturbed will be compacted and re-vegetated. Current culvert configuration and design are shallow and undersized with no outflow protection or headwalls. Replacements will have outflow protections, loose rock headwalls, appropriately-sized and with proper slope. In addition to culvert replacements, County Parks will be placing 600 square feet of rip-rap to reduce erosion and sedimentation due to water run-off from Hwy. 152. Culverts will be replaced to enhance steelhead habitat and reduce sediment loading in tributaries of Bodfish Creek. Project will benefit steelhead spawning habitat by reducing sedimentation related to poorly designed, undersized, degraded culverts, improve fish access in spawning stream by installing a flat bottom culvert, and reduce sedimentation loading through erosion from water run-off from Hwy. 152.	NOE	
2006038540	FY02 Paving Project Santa Clara County Parks and Recreation Department --Santa Clara The project involves the resurfacing and reconstructing of various trails, roads, and parking lots within various County Parks.	NOE

2003022091	McDaniel Slough Wetland Enhancement Project Arcata, City of Arcata--Humboldt The City of Arcata, the California Department of Fish and Game (CDFG), and the California Coastal Conservancy plan to restore tidal wetland functions to 205 acres of 240 acres of former tidal salt/brackish marsh and freshwater wetlands adjacent to Humboldt Bay in northern California. The remaining 35 acres will be managed as freshwater wetlands and brackish ponds. The project area is owned by the City (74 acres). The project site is located adjacent to the existing Arcata Marsh and Wildlife Sanctuary's (AMWS) northwest boundary. This 74 acre, City owned property	EIR	05/15/2006

	provides a critical link from the 154-acre AMWS to the CDFG Mad River Slough Wildlife Area (547 acres) located west of Janes Creek/McDaniel Slough. The project includes a trail system for public access. This project proposes to benefit the public trust resources.		
2004121055	Mercy Medical Center Merced, City of Merced--Merced Change General Plan designation and zoning to Commercial Office/Planned Development to construct 607,428 sf, 460-bed hospital in 3 phases, 200,000 sf of medical offices, a 17,074 sf power plant, a helipad, and 1,990 parking spaces.	EIR	05/12/2006
2005122044	Eureka High School Gymnasium Eureka Unified School District Eureka--Humboldt The purpose of the proposed project is to create a gymnasium that would meet the current and future needs of Eureka High students, athletes, and staff, primarily by providing adequate housing for Physical Education, Health Education, and Team Sports. The existing gymnasium facility is old and in need of extensive renovation. A new gymnasium is proposed for construction to the south of the existing Science Building, facing J Street. The proposed gym is approximately 40,000 square feet with a feature court, auxiliary gym, locker and shower rooms, classroom/team room, staff offices, wrestling/dance room, weight room, fitness room, storage rooms, restrooms, concessions, ticketing, and lobby.	EIR	05/12/2006
2006031118	P3E, LLC, A Delaware Limited Liability Co. Conditional Use Permit #06-0005 Imperial County Planning Department Calexico--Imperial Proposal to develop a 392 truck/trailer and 403 automobile space parking facility. In addition, to the semi-truck parking spaces there will be 12-employee/client parking spaces and two disabled-van-accessible parking spaces. Also, proposed on-site is attached guard booth, and a trash enclosure structure. The applicant proposes to hook up to the existing water, sewer, and fire protection system subject to County approval.	MND	04/27/2006
2006032135	Trousdale Pump Station and Transmission Main Project Burlingame, City of Burlingame--San Mateo The proposed project involves replacement of the existing Trousdale Pump Station, and installation of a water transmission main. The project components would provide a connection from San Francisco Public Utilities Commission (SFPUC) conduits at Trousdale Drive and Magnolia Avenue to the new, expanded Trousdale Pump Station, to the Mills Tank, located within Crystal Springs Watershed lands along I-280. Additionally, the existing Alcazar tanks and Donnelly tanks and pump station would be removed from service as part of the project; no further action upon removal of these facilities from service is proposed. The project components would transmit water supply from an elevation of approximately 29 feet above sea level to approximately 650 feet above sea level. The new pump station would have the capability to pump the maximum day flow combined with fire flow. The maximum capacity for the pump station and transmission main would thus be set at 5.42 million gallons per day (approximately 3,800 gallons per minute). Final pump station flow rates and pump and pipe size would be established during final design.	MND	04/27/2006

<u>Documents Received on Wednesday, March 29, 2006</u>			
2006032138	Oro Bay Specific Plan and Annexation Area Project Oroville, City of Oroville--Butte This project includes an application for the Oro Bay Specific Plan, allowing a mix of various residential densities and housing types combined with various public uses on the 421-acre Specific Plan Area. This project also includes annexation of the Specific Plan area and thirty-one parcels east and southeast of the Specific Plan area (779 acres), including a General Plan Amendment and Pre-zoning.	NOP	04/28/2006
2006031119	Gill Grading Permit San Luis Obispo County Paso Robles--San Luis Obispo Request by Michael Gill to improve an existing road for agricultural purpose including grading the existing road, and removal of an existing culvert, and installation of a new culvert across a blue line stream, which will result in the disturbance of approximately 10,000 square feet of a 20 acre parcel and 540 cubic yards of cut and 4,960 cubic yards of fill. The fill associated with the existing crossing will be removed, stockpiled and replaced when the new culvert is installed. The proposed project is within the Agriculture land use category and is located at 4100 Peachy Canyon Road, approximately 1 mile east of Killer Canyon Road and approximately 4 miles west of the City of Paso Robles. The site is in the Adelaida planning area.	Neg	04/27/2006
2006031120	Gene Autry Trail Bridge Widening Palm Springs, City of Cathedral City--Riverside The project consists of widening the existing Gene Autry Trail Bridge over the Union Pacific Railroad tracks from a two lane to six lane bridge.	Neg	04/27/2006
2006031121	EA SD 1-06; General Plan Amendment 11 / Zone Change 29 / Precise Development Plan 10, Map No. 103-34 Kern County Planning Department Bakersfield--Kern (a) An amendment to the Metropolitan Bakersfield General Plan from LMR (Low Medium Density - less than or equal to 10 du/ac) to HR (High Density - 29 du/ac) on 3.14 acres; (b) a zone change from R-1 (Low-Density Residential) to R-3 PD (High-Density Residential - Precise Development) on 3.14 acres; and (c) a Precise Development (PD) Plan to allow the development of a three-story, 81-unit apartment building on 3.14 acres. As proposed, water supply and sewage disposal for the development would be by California Water Service Company and the Kern Sanitation Authority, respectively. Access would be by Pioneer Drive which is identified as a local street alignment by the Circulation Element of Metropolitan Bakersfield General Plan.	Neg	04/27/2006
2006031122	Robert A. Nelson Transfer Station/Materials Recovery Facility (RAN TS/MRF) Riverside County Waste Management Department --Riverside The project is a proposal to revise the Solid Waste Facility Permit (SWFP) for the existing RAN TS/MRF, to increase daily capacity from 2,700 tons per day to 4,000 tons per day and to increase operations acreage from 12.5 to 22.03 to include adjacent organics processing facility in SWFP. <u>Documents Received on Wednesday, March 29, 2006</u>			
2006031123	<p>Gasper Grading Permit PMT2005-00399 San Luis Obispo County --San Luis Obispo Request by Gaspar Inc. to grade for a proposed single-family residence and associated improvements (including an approximately 260-foot long driveway extending from Forked Horn Place, a well and storage tank and garage) which will result in the disturbance of approximately 16,000 square feet of a 43,509 square foot (just under 1 acre) parcel and 1,000 cubic yards of cut and 1,000 cubic yards of fill. The proposed project is within the Agricultural land use category and is located directly south of and adjacent to the western end of Forked Horn Place, approximately 4,000 feet west of the Ground Squirrel Hollow. The site is in the El Pomar/Estrella planning area.</p>	Neg	04/27/2006
2005122039	<p>Angora 3 Erosion Control Project and Angora Creek Fisheries Enhancement Project El Dorado County South Lake Tahoe--El Dorado El Dorado County proposes to construct and maintain storm water facilities and implement erosion control practices in the Mountain View Estates subdivision, as identified in the Lake Tahoe Environmental Improvement Program. Also included in this project is a fisheries enhancement project in Angora Creek which will improve fish habitat and passage by removing and replacing degraded culverts under Lake Tahoe Boulevard.</p>	NOD	
2006012074	<p>Fremont Weir Sediment Removal Project Water Resources, Department of Woodland--Yolo, Sutter The Department of Water Resources has responsibility for maintaining the Yolo bypass, part of the Sacramento River Flood Control Project (SRFCP). Flood flows during the past several flood seasons have deposited sediment near the Fremont Weir at the northern end of the Yolo Bypass. These sediment deposits reduce the flow capacity of the Weir and the efficiency of the flood control system by blocking water from entering the Bypass and forcing flows to remain in the Sacramento River. Approximately 800,000 cubic yards of sediment need to be removed from in front of and downstream of the Weir; such action will resoter design grade of this portion of the flood control system. The sediment will be moved to a spoil site on privately owned agricultural land to the east of the Bypass. The project will take place between August 1 and November 15 of 2006.</p>	NOD	
2006031027	<p>Arsenic Removal Project Home Garden Community Services District Hanford--Kings The proposed project will install a factory built, in-line arsenic removal filtration system at an existing well facility corporation yard and a 4,000 foot pipeline to connect a second well to the treatment system. The treatment system footprint will fit within the existing corporation yard and the system will be consistent in appearance and function with the existing water supply equipment. The filtration system installation will consist of water line and electrical connections. Backwash water and waste produced by the system will be stockpiled on-site and transported to a landfill. The pipeline alignment will follow existing roads and not disrupt any "undisturbed" areas. No increase in supply or demand will be caused by this project.</p>	NOD

2006031125	Mohsin, Riehl, Samoske Combined Development Permit Monterey County Planning & Building Inspection Salinas--Monterey Consider a Combined Development Permit for Mohsin, Riehl, and Samoske consisting of a Toro Area Plan Amendment and Zoning Amendments for 70 acres changing farmlands and permanent grazing (40 acre minimum) to residential/5 acre minimum and to subdivide 55 acres (Mohsin) into 5 acre parcels for 11 lots with a remainder parcel of 186.7 acres created by a lot line adjustment (Mohsin/Riehl), and subdivision of 17 acres (Samoske) into three parcels of five acres (2) and seven acres (1); and Variance for relief from Section 21.66.030F2(A) (Agricultural Buffer Zone) APNs 167-061-029-000; 167-061-032-000; and 167-061-033, located at 844, 870, -874 River Road, Salinas Area (APNs 167-061-029 (Samoske), 167-061-032 (Riehl), 167-061-033 (Mohsin) approximately 0.5 mile northwest of the intersection of River Road and Chualar River Road, Toro area.	NOP	04/28/2006
2006032136	Proposed Delisting of the Siskiyou Mountains Salamander under the California Endangered Species Act Fish & Game #1 --Siskiyou The proposed project is delisting by the California Fish and Game Commission of the Siskiyou Mountains Salamander as a threatened species under the California Endangered Species Act.	NOP	04/28/2006
2006031127	South River Trail and North Valencia Trail Repairs Santa Clarita, City of Santa Clarita--Los Angeles Federal Emergency Management Agency (FEMA) funded projects to repair an approximately two segments of the public bike and horse trail which was washed-out during the 2004/2005 winter storms.	Neg	04/28/2006
2006031128	IS/ND for Sphere of Influence Updates for the Cities of Corona and Riverside Riverside County Local Agency Formation Commission Corona, Riverside--Riverside LAFCO has prepared SOI studies, including proposed SOI changes affecting the Cities of Corona and Riverside. A SOI represents an area adjacent to a jurisdiction for which the jurisdiction would provide services and where development may be reasonably expected to occur. The proposed SOI for the City of Corona would add 195 acres into the City's western SOI and remove 4,606 acres of land from the Prado Basin-West SOI area, resulting in an overall reduction of the Corona's SOI by 4,411 acres. The proposed SOI for the City of Riverside would increase the City's southern SOI area by 1.2 acres.	Neg	
2006032137	Park Corridor Project Groveland Community Services District --Tuolumne A one mile long interpretive trail linking two Community Parks in the town of Groveland.	Neg	04/28/2006
2006042004	Colusa Wastewater Treatment Plant Colusa, City of Williams--Colusa Proposed tertiary upgrade of the City's existing Wastewater Treatment Plant (WWTP) facilities. The project consists of two components: (1) an upgrade to the existing effluent treatment facilities and (2) construction of a pipeline to convey treated effluent to a designated outfall location south of the WWTP. 2005061157	Rosedale-Rio Bravo Water Storage District (RRBWS) Water Banking and Exchange Program Castaic Lake Water Agency San Joaquin, Bakersfield--Los Angeles, Ventura, Kern, San Joaquin The project is CLWA's participation in the RRBWS's Groundwater Storage, Banking, Exchange, Extraction & Conjunctive Use Program (RRBWS Program). CLWA proposes to take delivery of its total SWP Table A Amount allocation and any other SWP water supplies made available by the Department of Water Resources (DWR) to the SWP Contractors, and deliver to RRBWS the portion of that water that is not needed to meet its demands (typically in wetter years), up to 20,000 acre-feet per year (AFY) in the RRBWS Program. RRBWS would store a portion of CLWA's unused SWP deliveries for later withdrawal and delivery to the CLWA service area in a future year or years when demand in the CLWA service area is greater than supply (i.e., in drier years). CLWA's current SWP Table A Amount is 95,200 AFY. CLWA's current estimated Table A supply in average, single dry, and multiple dry years is 65,700 AF, 3,800 AF, and 30,500 AF, respectively, based on reliability results for historical periods included in DWR's "Excerpts from Working Draft 2005 SWP Delivery Reliability Report." 2005062171	Burgess Cellars Vineyard Timberland Conversion Forestry and Fire Protection, Department of --Napa Conversion to vineyard of approximately 7.6 (gross) acres of moderate to steeply sloping timberland and non-timberland, consisting primarily of montane hardwood conifer (slopes typically 10 to 25%, average 16%).	NOD	
2005111056	Lytle Creek Turnout Project West Valley Water District Rialto--San Bernardino The WVWD has identified the project as part of it's near-term capital improvement program. Segment No. 1 of the Lytle Creek Turnout is needed to provide an emergency outlet pipeline and a source of water for the CEMEX mining and material processing operation. Segment No. 2 is needed to provide additional water to the public that is served by the WVWD and FWC. The turnout/pressure reducing station is needed by Muni to extract water from the SGVMWD Devil Canyon-Asuza Pipeline.	NOD	
2005111116	TM 5194RPL^2, Log No. 00-09-008 San Diego County Department of Planning and Land Use --San Diego The project proposes to subdivide 287 acres into 36 residential lots ranging in size from 5.5 to 10 acres. Each lot will have subsurface septic systems and will be served by groundwater wells. The project site is currently an existing avocado grove with two large reservoirs, which will remain after development of the proposed project.	NOD	
2005112122	Unification of Etna Union High School (SD), Etna Union Elem., SD, Fort Jones Union SD and Quartz Valley SD State Board of Education, California Etna, Fort Jones--Siskiyou This project consists of the unification of the Etna Union High School District with three of its component elementary school districts (Etna Union Elementary School District, Fort Jones Union School District, Quartz Valley School District) in Siskiyou County. The Forks of Salmon School District (a fourth component elementary	NOD

	school district) is excluded from the unification.		
2006011023	Well Test and Development Program Project Idyllwild Water District --Riverside Recent drought conditions in the Idyllwild area have reduce the Idyllwild Water District's well production such that the District has determined it is necessary to located additional well sites to maintain adequate public water supplies. To identify locations for new wells that have the greatest potential to produce significant quantities of water without interfering with existing wells, the District evaluated geologic literature and the mapping of sedimentary materials in the area. The District also had an electro-seismic survey, or National Water Survey (NWS), conducted at each test well site. Based on the data obtained from the field NWS and the literature review, including geologic comparisons and the known yield of existing wells, two test well sites were selected. The proposed project is the drilling of two test wells, at two separate locations, in Idyllwild to evaluate the potential water production capacity at each site. The test well locations have been selected based upon water bearing potential and permission to drill on the property only. The results of the test wells will be used in the consideration of future water production wells that would be evaluated as a discrete or separate action under CEQA.	NOD	
2006021042	San Bernardino International Airport Authority Aircraft Fuel Farm Project San Bernardino International Airport Authority San Bernardino--San Bernardino San Bernardino International Airport Authority has determined that the existing 36,000 gallon fuel storage capacity is not adequate to meet the projected future demand for fuel at the Airport. SBIAA is, therefore, proposing to construct a fuel farm facility near the location of the original Air Force fuel tanks which have been removed. The site was selected because an existing fuel supply pipeline is available at the site. SBIAA anticipates that up to 500,000 gallons of fuel storage capacity will ultimately be needed at the airport. The demand for fuel will increase with growth of air operations, therefore, SBIAA is proposing to construct a fuel farm in increments. The first phase proposes a 150,000 gallong storage capacity with the ability to expand capacity on an as needed basis to about 500,000 gallons.	NOD	
2006022007	Live Oak Arsenic Treatment Facility Live Oak, City of Live Oak--Sutter The city proposes to achieve compliance with the Arsenic Rule by installing three new arsenic treatment systems at three of its existing facility sites: Well Nos. 1 and 2, No. 4, and No. 5. Satellite treatment facilities are preferable to well head treatment to centralize the treatment process, reduce O&M costs, enhance reliability, enable blending, and facilitate future expansion and upgrades. The drilling of additional wells will not be included in this project. The arsenic treatment system will be added to the existing treatment train.	NOD	
2006039033	Early Childhood Development Center / District Education Center; Temporary Relocation of District Offices, Maintenance and Operations Facility and Palm Academy Coronado Unified School District Coronado--San Diego The proposed project consists of the temporary relocation (while the construction of permanent facilities is completed), of the CUSD District Offices (approximately	NOD

	9,500 sq. ft.), Maintenance and Operations (M&O) facility (approximately 1,000 sq. ft.) and Palm Academy (continuation high school, approximately 1,000 sq. ft.) from their current location on D Street just north of 6th Street to other CUSD sites.		
2006039034	San Timoteo Sanitary Landfill Channel and Detention Basin Project San Bernardino County Redlands--San Bernardino The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2004-0163-R6 pursuant to Section 1602 of the Fish and Game Code to the project applicant, Mr. Peter H. Wulfman, County of San Bernardino Solid Waste Management Division. To develop the channel and detention basin, the applicant proposes to grade and fill the entire length (1,660 feet) of the unnamed drainage or 0.83 acres of streambed and sparse mulefat/willow scrub and coastal sage scrub habitat. The project will permanently impact 0.83 acres of jurisdictional waters identified on the site.	NOD
