# STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **May 16 – 31, 2011**.

## CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613  
Fax: (916) 323-3018  
e-mail: [state.clearinghouse@opr.ca.gov](mailto:state.clearinghouse@opr.ca.gov)  
website: [www.opr.ca.gov](http://www.opr.ca.gov)

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

**Scott Morgan**  
Director

## CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 212) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE  
P.O. BOX 3044  
SACRAMENTO, CA 95812-3044

## INFORMATION AVAILABLE ON-LINE

The 2010 CEQA Guidelines are available from the Resources Agency's website at

<http://ceres.ca.gov/ceqa/>.

2011 CEQA Guidelines will be available soon.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

Arnold Schwarzenegger  
Governor

STATE OF CALIFORNIA  
Governor's Office of Planning and Research  
State Clearinghouse and Planning Unit

Cathleen Cox  
Acting Director

## MEMORANDUM

DATE: July 1, 2010  
TO: State Agency CEQA and Intergovernmental Review Coordinators  
FROM: Scott Morgan, State Clearinghouse Director  
SUBJECT: Distribution of Environmental Documents in CD-ROM Format

The State Clearinghouse has distributed EIR's and EIS's in CD-ROM format for state agency review and comment since August 1, 2003. Based on our experience with those documents, a survey conducted of state reviewing agencies and the cost savings to local and state agencies, we extended this policy to other environmental documents including Negative Declarations, Mitigated Negative Declarations and Environmental Assessments. CD-ROMs are cheaper for the lead agency to reproduce and mail, and cheaper for the State Clearinghouse to distribute, especially in the case of multi-volume documents.

The State Clearinghouse will accept environmental documents on CD-ROM under the following terms:

- Lead agencies must provide fifteen (15) copies of the CD-ROM to the State Clearinghouse. In addition, each CD-ROM must be accompanied by 15 *printed* copies of the DEIR summary (as described in CEQA Guidelines §15123), executive summary, or introduction section of a Negative Declaration or Mitigated Negative Declaration. The State Clearinghouse has created a Summary for Electronic Submittal Form that may be used as a summary for any project submitted on CD-ROM. The Summary for Electronic Submittal Form is available at [www.opr.ca.gov](http://www.opr.ca.gov). A printed summary allows both the State Clearinghouse and agency CEQA coordinators to distribute the documents quickly without the use of a computer.
- The document must be on a CD-ROM in a common file format such as Microsoft Word or Acrobat PDF.
- Final environmental documents may be provided in CD-ROM format without a printed summary. Distribution of the final documents is optional under CEQA.
- Federal lead agencies may send electronic copies of environmental documents to the State Clearinghouse in the same manner described for CEQA lead agencies. Distribution of NEPA documents to state agencies through the State Clearinghouse is encouraged pursuant to Presidential Executive Order 12372 and NEPA §102 (42 USC §4332)
- All notices of preparation must continue to be provided in printed format.
- One Notice of Completion Form must be provided with all document submittals.

If your agency has difficulty downloading and reviewing any environmental documents please contact:

Scott Morgan, State Clearinghouse Director  
916-445-0613  
[scott.morgan@opr.ca.gov](mailto:scott.morgan@opr.ca.gov) .

Thank you for your cooperation in the CEQA review process.

2009101073	All Saints Church Master Development Plan Pasadena, City of Pasadena--Los Angeles Note: Recirculated EIR  All Saints Episcopal Church has applied for a Master Development Plan for expansion of the church facilities. The project consists of: Demolition of three buildings and a cupola/canopy between the existing parish hall and rectory building; Interior renovation of the rectory and parish hall including conversion of the subterranean level of the parish hall to a music room; Relocation of the "Maryland Hotel" wall approximately three feet forward toward the Euclid Avenue property line; Construction of a columbarium along the interior property line; and Construction of one of two scenarios for a multiple-story, four-building complex in two phases. The project consists of a total of 42,118 sq. ft. of net new church-support uses and 45 residential units (Scenario 1), or 55,118 sq. ft. of net new church-support uses (Scenario 2). Under Scenario 1, the "North Building" is an eight-story residential building for senior citizens. Under Scenario 2, the "North Building" is a two-story youth recreation building. Construction of a subterranean parking garage is also proposed with either 122 or 128 parking spaces and 12,500 sq. ft. of office, storage and mechanical equipment areas.	EIR	06/29/2011
2010084008	Reach 9, Phase 2A Embankment Project U.S. Army Corps of Engineers Corona--Riverside NOTE: Supplemental EA NOTE: Reference SCH# 1997071087  The Reach 9, Phase 2A Embankment Project is part of the Prado Basin Flood control improvements under the Santa Ana River Mainstem Project. The project was analyzed and approved in the 2001 Final Supplemental Environmental Impact Statement (EIS)/Environmental Impact Report (EIR). The Embankment Project would be constructed in the same fashion as the approved project; however, the design would be modified to include sheet pile installation with grouted stone in order to reduce impacts to riparian and coastal sage scrub vegetation. The main objective of this project would be the same as the approved embankment project, which is to provide flood protection for the Green River Housing Estates and the Upper Highway 91 embankment and to protect the lives and properties (homes) of individuals residing in the project area.	FIN	
2010122013	Hayward Maintenance Complex Project Bay Area Rapid Transit District Union City--Alameda NOTE: Extended Review per lead  The proposed Hayward Maintenance Complex project (proposed project) would consist of acquisition and improvements to three properties on the west side of the existing Hayward Yard and the construction of additional storage tracks for a maximum of 250 vehicles on undeveloped BART property on the east side of the Hayward Yard. The project site is zoned for industrial uses and the proposed activities would be consistent with this zoning designation.	FIN

2007082036	M&T Chico Ranch/Llano Seco Rancho Fish Screen Facility Short-term Protection Project U.S. Fish and Wildlife Service Chico--Butte, Glenn The Proposed Project involves implementation of an additional dredge operation on the Sacramento River at approximately River Mile 192.5, which is intended to maintain viability of the M&T Chico Ranch/Llano Seco Rancho pumping facility, including meeting existing fish screen criteria and water delivery obligations. The Subsequent IS/SMND has been prepared in consideration of changed conditions or new data/information that has been collected since the approval of a Final Environmental Assessment/Initial Study and MND in Oct. 2007 for the M&T Chico Ranch/Llano Seco Rancho Pumping Plant Maintenance of Channel Alignment Sacramento River Mile 192.5.	<b>MND</b>	06/14/2011
2011051040	Bicycle Master Plan, General Plan Amendment No. 2010-03 El Cajon, City of El Cajon--San Diego The City of El Cajon is proposing an update to the City's Bicycle Master Plan and a General Plan Amendment to update the Circulation Element. The Plan is an update to the 1981 Bicycle Master Plan and is the official policy document addressing the development of facilities and programs to enhance the role of bicycling as a viable mode of transportation in the City of El Cajon. It provides goals, policies and implementation guidance. The proposed facilities include 52 miles of Class 2 and Class 3 routes that would be located within existing right of ways and one new Class 1 project between Marshall Avenue and El Cajon Boulevard along an extension of Lexington Avenue that is proposed by the Downtown Specific Plan.	<b>MND</b>	06/14/2011
2011051041	Lockhart Substation Project Public Utilities Commission Barstow, Adelanto, Victorville--San Bernardino Southern CA Edison (SCE) has submitted an application for a Permit to Construct the Special Protection System (SPS) upgrades required to distribute solar power generated by the 250-megawatt Abengoa Mojave Solar Project (AMSP) to the electric grid. The proposed SPS facilities include a new substation (Lockhart Substation), interconnection to the adjacent transmission lines, distribution system to provide substation light and power, and fiber-optic telecommunication links to various substations in the region.	<b>MND</b>	06/14/2011
2011051042	Mission San Juan Capistrano Gate House Preservation, Entry and Gift Shop San Juan Capistrano, City of San Juan Capistrano--Orange A request for approval of alterations to Mission SJC entry area to remove an existing circa 1954-56 entry gate, arch and ticket area with circa 1998-2001 additions; construct new entry gate and arch to reference the circa 1920 arch appearance; and relocate existing gift shop use from 1650 SF historic Sala building into a new 15' high, 1750 SF single story building that encroaches into the required front setback, including a 370 SF interior storage mezzanine and a small section of roof that is 18'-0" high, with entrances fronting the street at 26801 Ortega Hwy. Includes repair/rehabilitation of historic circa 1916 gate house; removal of approximately 126 lineal feet of circa 1952/re-built 1997 perimeter wall sections; removal of 3 existing trees; addition of landscape planters, seat walls, benches and hardscape.	<b>MND</b>	06/14/2011

	<p>fiberglass floating platform held in place with two concrete piles driven into the bay floor. The dock would be accessible to the general public; however, the main purpose of the dock is to support educational programs offered at the aquatic center. Construction of the dock will allow the Crown Cove Aquatic Center to expand its curriculum and to provide instruction to a greater number of students.</p>		
2011011002	<p>Water Storage Reservoir Replacement Project Lake Arrowhead Community Services District --San Bernardino</p> <p>The 2008 Water Facilities Master Plan study determined that certain improvements were needed to components of the District's potable water infrastructure. Many water reservoirs in the District's water system were found to be in need of seismic retrofits due to concerns over structural integrity, particularly during a major regional seismic event. The study concluded that the Brentwood Reservoir, Mitlry Reservoirs, Shasta Reservoir and Beniff Reservoir, did not met modern earthquake standards.</p> <p>The District determined that the most economical way to ensure the reservoirs at the aforementioned sites have the structural integrity to withstand most strong earthquakes over the long term would be to replace the reservoirs with new reservoirs with new reservoirs that met all applicable standards. Recognizing the need for more storage to meet the needs of existing development and offering options in light of the area's water supply uncertainty, the District has concluded that, in additions to providing replacement with enhanced structural integrity, expanding the storage capacity of the replacement reservoir is.</p>	<b>NOD</b>	
2011032052	<p>STPUD Grizzly Mountain Booster Station South Tahoe Public Utility District --El Dorado</p> <p>The Grizzly Mountain Booster Station project consists of the construction of a new booster pump station to improve the primary water service to approximately 3,000 existing homes in the Flagpole and Twin Peaks water zones. The project is located in the vicinity of the Tahoe Paradise neighborhood located northwest of Meyers in unincorporated El Dorado County. The project increases water reliability to the Flagpole and Twin Peaks water zones by providing a second source of water to the area currently served by only one pipeline from the Arrowhead water zone (located in Meyers, CA).</p>	<b>NOD</b>	
2011041014	<p>Today's Fresh Start New Elementary Charter School Today's Fresh Start Charter School Inglewood--Los Angeles</p> <p>Today's Fresh Start Charter School (TFSCS) is proposing to acquire an approximate 2.5-acre property for an elementary charter school. There is a vacant 6-story office building (62,663 s.f.) and parking spaces on the site. The charter school proposes to add portable classrooms to the site (installed July 2009) as a temporary school until a new permanent school is constructed. The new school will have an enrollment of up to 425 students. Two 2-story modular classroom buildings will be installed onsite, consisting of 18 two-story classrooms, a library and counseling room. In addition, a separate building will be constructed for a multipurpose room, which would serve as a gym/lunchroom auditorium. Two options for location of the multipurpose room are being considered. The existing office building will be remodeled and used for the school administrative offices. A portion of the existing parking area will be used for a recreational/play and parking/internal road circulation will be provided.</p>	<b>NOD</b>

2011058147	Chavez High School Athletic Improvements - (Football, Track, & Softball) Stockton Unified School District Stockton--San Joaquin The project would involve the demolition and reconstruction of the existing football/track stadium at its current location. Improvements associated with the reconstruction of the stadium would include regrading of the site and the installation of new drainage, utilities and fencing. Existing soils would be stripped of turf and stockpiled for use in the reconstructed facility. Construction for proposed running track and related facilities would include approximately two acres of paving within the track surface as well as the installation of other track and field related improvements. The proposed football field would be constructed of synthetic turf and would be permanently striped. A nine- lane running track would be provided. New aluminum planking for 2250 home and relocated seating for 1300 visiting spectators will be provided. New aisles and handrails would be provided to meet current accessibility codes and restroom/concession buildings would be provided to accommodate both home and visiting spectators.	<b>NOE</b>	
2011058148	Mission Wells Tank Public Health, Department of San Fernando--Los Angeles The California Department of Public Health (CDPH), as the Responsible Agency, has issued a water supply permit amendment number 1910067PA-004 for the operation of the Mission Wells Storage Tank (Tank). The Tank is a replacement tank with the maximum storing capacity of approximately 110,000 gallons.	<b>NOE</b>	
2011058149	Closure of Aliso Elementary School Saddleback Valley Unified School District --Orange The Project includes the closure of Aliso Elementary School and Facilities. Current Aliso Elementary School students will be disbursed to the District's Santiago Elementary School, Olivewood Elementary School and Rancho Canada Elementary School sites. None of these schools will be adding any new capacity as a result of these movements.	<b>NOE</b>	
2011058153	Kaweah River Hydroelectric Intake 2 Modification Project Regional Water Quality Control Board, Region 5 (Central Valley) --Tulare The Project consists of turning the catch-grate at the gauging station along the edge of the Kaweah River to allow for more efficient catching capacity of debris and trash. The river will be diverted around the work area, and the work area will be dewatered.	<b>NOE</b>

2010032085	Piedmont Station LLP-408 Linda Avenue Townhouses Piedmont, City of Piedmont--Alameda Piedmont Station LLC proposes to develop an approximately 0.4-acre site within the City of Piedmont with seven three-story over basement townhouse structures. The property is currently developed with an approximately 5,700-sf, two story, concrete electrical utility substation that was vacated in 1991. The proposed project would involve: demolition and removal of the existing electrical substation building; removal of existing vegetation and excavation and placement of fill to create a level building area; construction of the seven new townhouse structures and associated development components; and landscaping and irrigation.	<b>EIR</b>	06/30/2011
2005072174	Murieta Gardens I and II Sacramento County Rancho Cordova--Sacramento Note: 1 CD  Two projects - one proposing commercial development and the other residential development on flat land adjacent to the Rancho Murieta Airport and Highway 16.	<b>FIN</b>	
2011051045	ENV-2010-2812-MND/1132 S. Abbot Kinney Boulevard Los Angeles, City of -- Alteration and change of use of an existing approx. 966 sq. ft. single-story, single-family dwelling to an approx. 1,220 sq. ft. commercial retail space and 2 covered (garage) parking spaces on the ground floor and an approx. 1,825 sq. ft. dwelling unit on the second and third floors in the C2-1-O-CA Zone. As proposed, the project will require granting of a Zoning Administrators Adjustment to permit a reduced clearance height within a new loading area of approx. 9-ft. in lieu of the minim 14-ft. required, reduced side yard setback of 0-ft. in lieu of the 4-ft. required, reduced passageway of approx. 4'-6" in lieu of the 10-ft. required, a Coastal Development Permit and a Project Permit Compliance within the Venice Coastal Zone Specific Plan Area.	<b>MND</b>	06/15/2011
2011052043	Calero High School Modernization East Side Union High School District San Jose--Santa Clara The project consists of the modernization of an existing public school campus. The East Side Union High School District will consolidate the alternative/continuation high school independent study and post-senior high school education programs at the new Calero High School campus. These programs are currently operated at several school sites throughout the District boundary. The construction/modernization projects include the expansion of two staff parking lots, a new student parking lot, reconfiguration of the bus loading/drop-off, extension of utilities and associated site work, new landscaping, fencing, signage, remodel of the school entry and administrative offices, and classroom modernization. No expansion of the existing building footprint is proposed.	<b>MND</b>	06/15/2011
2011052044	Montecito Marketplace Santa Rosa, City of Santa Rosa--Sonoma Design Review and Conditional Use Permit to allow development of a new 26,575 square foot shopping center comprised of a 6,133 square feet single-story multi-tenant retail building, new parking lot, outdoor seating area, and landscaping	<b>MND</b>	06/15/2011

	located at 6599 Montecito Boulevard and to allow extended hours retail and alcohol beverage sales for off-site consumption associated with a new 2,600 square foot retail store (7-11); City File No. MNP10-021.		
2011052045	Knights Landing Outfall Gates Rehabilitation Project Water Resources, Department of --Yolo The project will replace all gate flaps, seals, and assemblies. Each gate is flanked by concrete wing walls, which when blocked with stop-logs on either side of the structure, can be dewatered. The gate assembly on both sides of the structure will be removed and replaced while facilitating continuous operating of the outfall gates during construction. The project will also repair a crack in the concrete where the abutment and outfall structure meet at bay number 1 on the Sacramento River side of the structure. The crack repair will be contained within the cofferdam at bay number 1. The project will install wireless communication links that will allow transfer of data and alerts between the Sacramento Maintenance Yard and the Knights Landing Outfall Gates' motor controllers thus requiring minor construction at the Sacramento Maintenance Yard.	<b>MND</b>	06/16/2011
2011052046	Alexander Crossing Apartments Napa, City of Napa--Napa A development application to authorize the construction of a 134 unit apartment complex on a 6.44 acre site at 190 Silverado Trail. The development will consist of 11 residential buildings and a 3,860 sq. ft. community clubhouse. Four of the residential buildings will be three story walk ups with seven two story residential buildings. The apartments will be comprised of 40 one bedroom units, 74 two bedroom units and 20 three bedroom units served by a 264 on-site parking spaces. The proposed development will be providing a minimum of 20% affordable units and consistent with affordable housing provisions has requested approval of a concession to increase the maximum building height from 40 feet to 44' 6".	<b>MND</b>	06/16/2011

2010062051	Zoning Ordinance Amendment and South and West Branch Libraries Berkeley, City of Berkeley--Alameda The project is a Zoning Ordinance Amendment (ZOA) only and does not authorize any specific construction project. The ZOA would allow modification with a Use permit of any zoning requirement applicable to a change, expansion, or reconstruction of an existing public branch library being carried out pursuant to Measure FF, a local bond measure passed in 2008. The branch libraries subject to the ZOA are: north (1170 The Alameda), Claremont (2940 Benvenue Ave.), South (1901 Russell St.) and West (1125 University Ave.).	<b>NOD</b>	
2010091042	Kenyon 4 Lot Subdivision, 3200 20857 (TPM) & 3500 10-014 (STP), ER 04-15-002 San Diego County --San Diego The project proposes a minor subdivision of 21 acres into four parcels. Parcel 1 will measure approximately (+/-) 7.0 acres net, Parcel 2 will measure approximately (+/-) 4 acres net, and Parcel 3 will measure approximately (+/-) 8.9 acres. Parcel 3 has an existing single-family residence, stable, and a horse coral. The proposed project anticipates the construction of two single-family residences on parcels 1 and 2. The proposed project is not proposing any grading or construction with the proposed Tentative Parcel Map. The project is subject to the Regional Land Use Element 1.5 Country Towns (CT). The regional designation is (1) Residential. The current zone for the property is RS 4, which is Residential. The project site will be serviced by the Pine Valley Fire protection District.	<b>NOD</b>	
2010101087	Van Buren Widening from Jurupa Avenue to the Santa Ana River Bridge Riverside, City of Riverside--Riverside Environmental review of a proposal by the Public Works Department to widen approximately 0.30 mile of Van Buren Boulevard between Jurupa Avenue and the Santa Ana River Bridge. Proposed improvements include, but are not limited to, widening Van Buren Boulevard between Jurupa Avenue and the Santa Ana Bridge to accommodate the ultimate roadway configuration of three travel lanes in each direction with a raised center median, installation of concrete curb and sidewalk, drainage improvements, retaining walls, and reconstruction of portions of the existing bike path. Similar to road widening projects directly to north and south, Van Buren Boulevard will be striped for three lanes in each direction at Jurupa Avenue and transition to two lanes in each direction near the Santa Ana River Bridge. The improvements are proposed to reduce traffic congestion and accommodate future traffic growth. The widening will require right of way acquisition from one parcel.	<b>NOD</b>

2010112054	Oddstad Assisted Living Center Pacifica, City of Pacifica--San Mateo The proposed project consists of a 96-unit assisted living center, 42 units of which would be one bedroom and 54 of which would be studios. The one bedroom units could potentially house two residents, making the maximum possible occupancy of the complex 140 residents. The proposed project's four three-story buildings would reach a maximum height of 32'-11". The proposed project includes ~55,183 sf of development above ground and 17,325 sf below ground. Approximately 4,178 cubic yards of soil would be removed from the project site during project grading in part to accommodate a proposed subterranean garage.	<b>EIR</b>	07/01/2011
2010122021	McHenry Solar Farm Project Modesto Irrigation District Modesto--Stanislaus Solar Star California VIII, LLC (a wholly-owned subsidiary of the SunPower Corporation) proposes to construct, operate, and ultimately to decommission, a 25-megawatt alternating current (MW ac) photovoltaic (PV) electricity generating facility and associated infrastructure on a n approximately 157-acre site. The proposed project would generate and deliver solar-generated power to the Modesto Irrigation District (MID) subtransmission and distribution system. As part of the proposed project, MID is proposing to construct, own, and operate a switching station in a new switchyard to be located on the project site, as well as a new overhead 69-kilovolt (kV) subtransmission line and 12-kV distribution line that would interconnect the proposed solar facility to the existing MID electric system. The project would operate year-round, generating electricity during daylight hours.	<b>EIR</b>	07/01/2011
2011051047	San Antonio Apartments Project and C-N Zone District Amendment King City King City--Monterey A CUP for a new 57-unit affordable apartment complex located on a 4.3-acre vacant site owned by King City Development LP, and an amendment to the C-N zone district to allow mixed commercial and residential uses. The Proposed amendment to the C-N zone would allow commercial and residential uses, consistent with the City's general plan, in an area of the City where transportation, water, sewer and storm drainage infrastructure exists. The Project includes a CUP and architectural review permit for an affordable apartment complex, which would provide low-income housing for senior citizens and families. It provides 24 one-bedroom units for senior housing, and 16 two-bedroom units and 16 three-bedroom units for families.	<b>MND</b>	06/16/2011
2011051048	South Bakersfield 8 Lane Widening Caltrans #6 Bakersfield--Kern Caltrans proposes to widen SR 99 between the SR 119 and the Wilson Road overcrossing in Kern County, CA. The project would widen SR 99 from six to eight lanes by adding one lane in each direction. Concrete barriers would be built in the median. All work would take place within the existing state right-of-way.	<b>MND</b>	06/16/2011
2011051049	Alvarado Trunk Sewer San Diego, City of --San Diego Site Development Permit to allow for the installation of approximately 2,058 linear feet of new 8, 15 and 36-inch sewer pipe. The project would install 797 LF of	<b>MND</b>	06/16/2011

	sewer pipe through open trenching, 1,261 LF would be installed through tunneling, 239 LF of rehabilitation, and approximately 2,477 LF of existing trunk sewer would be abandoned. Five launch, receiver, and/or work pits ranging in size between 225 and 400 sq. ft. would be used for tunneling and/or manhole-related work. Off-street and on-street staging is being proposed. Existing access paths would primarily be used for the installation and abandonment. Eleven manholes would be removed in vegetated areas each resulting in an approximate 5-foot radius of temporary disturbance. Where additional access is needed, a 10-foot wide temporary access path is proposed and steel plates would be used if needed for construction equipment to cross the drainages. In addition, for more difficult access areas, a crane or hand carried equipment may be employed. The tunneling would occur in two separate locations, south of I-8 near SDSU and on the north side of I-8 next to Alvarado Creek and sensitive habitat.		
2011051050	Juan Street Concrete Replacement San Diego, City of San Diego--San Diego The replacement of street pavement of Juan Street from Taylor Street to Sunset Road. Also included in the project scope is the replacement of sidewalks on the east and west side of Juan Street, improvements to underground utilities, new street lights, installation of curb and gutters, curb ramps, and private driveways as needed. The street/sidewalk replacement would require excavation up to 13 inches below the existing grade. In addition, the project would make improvements to the storm drain system including a new storm drain and the installation of new drainage inlets. The storm drain installation would not exceed nine feet in depth. An existing 8 inch water main would be replaced in place with a new 12 inch water main and would include new fire hydrants, valves and laterals.	<b>MND</b>	06/16/2011
2011051051	Domestic Well #6 and Treatment Plant Riverdale Public Utility District --Fresno The improvements that would be made under this Project include, a pilot hole and production well, a well pump, pipes, valves, meters, chlorination equipment (storage and injection), electrical service, a transformer, a motor control cabinet; electrical controls, a backup generator, site grading, fencing, and off-site piping to connect to the existing community water distribution system.	<b>MND</b>	06/16/2011
2011052048	Sonoma Gardens Apts. (DRH11-0002) Sonoma County Santa Rosa--Sonoma Request for Major Design Review with Hearing of a 60-unit apartment complex consisting of six two-and-three-storied apartment buildings and a single-storied community building.	<b>MND</b>	06/16/2011
2011052050	1260 Westridge Drive Shorenstein Subdivision and Planned Unit Development Project Portola Valley, City of Portola Valley--San Mateo The project is a 3 lot subdivision of an 11.6 acre parcel at 1260 Westridge Drive in Portola Valley, San Mateo County, CA. The parcel currently contains an estate home. The applicant plans to sell the parcel, and the proposed subdivision is intended to provide a future owner with the option to subdivide the parcel and either sell the parcels or use the parcels to develop additional estate uses (guest house, stable, etc...). Per town regulation each lot is required to have some form	<b>MND</b>	06/16/2011

2000062052	Byron Highway Shoulder Widening Project (Byron Hot Springs Road to Alameda County Line) Contra Costa County Byron--Contra Costa CDFG is executing Streambed Alteration Agreement Number 1600-2011-0114-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Contra Costa County Public Works Department, for extension of an existing concrete box culvert on the shoulder of Byron Highway. The culvert will be extended approximately ten feet on the east side of the road and will require excavation with the culvert drainage to an average depth of five feet. Approximately 0.04 acres of rock slope protection will be placed adjacent to the culvert extension to protect the concrete culvert from erosion and to provide support for an adjacent agricultural channel.	<b>NOD</b>	
2003044003	Lower Santa Ana River (Reach 1 and 2) Maintenance Project, Staging Area Modification U.S. Army Corps of Engineers Huntington Beach--Orange Project will remove and maintain vegetation and debris within approximately 3.5 miles of the flood control channel within the Santa Ana River (Reaches 1 and 2). Maintenance includes excavation of sediment (to maintain design grade of the flood channel) with beach or near-shore disposal of suitable material at a frequency of approximately every 18 years. The actual frequency will vary depending on storm events and other factors that affect sediment deposition. Annual or routine maintenance includes temporary maintenance access, vegetation control (mower/dozer), inspections, and repair. Only native herbaceous wetland habitat (i.e., cattails and sedges) would be allowed to grow between annual maintenance periods.	<b>NOD</b>	
2007082125	Target Store EIR San Rafael, City of San Rafael--Marin General Plan Amendment, Zoning Amendment (to PD-1726 District), Use Permit, Environmental and Design Review Permit, and Vesting Tentative Parcel Map required for the approval of a 137,511 s.f. Target Store along with associated parking and landscaping on Lot 6 at the Shoreline Center, a 19+-acre parcel.	<b>NOD</b>	
2008081019	Cherry Avenue Four-Lane Project Caltrans #6 --Kern Caltrans proposes to widen SR 119 from two lanes to four lanes, starting 0.75 miles west of Cherry Avenue (post mile 5.5) and ending either at Elk Hills Road (post mile R10.4) or Tupman Road (post mile R13.3) in Kern County. Caltrans proposes three build alternatives, two of which would bypass the communities of Valley Acres and Dustin Acres to the south.	<b>NOD</b>

Residential development envelopes have been designated on each proposed lot (with the exception of proposed Lots 5 and 8 which are currently developed with residential structures). Development envelopes range from 1.00 acre to 6.19 acres in size. The envelopes consist entirely or almost entirely of slopes less than 20%. Some of the envelopes have oak trees but all of the Oaks can and shall be preserved and protected during future.	<b>Neg</b>	06/17/2011
2011051056	Manning Avenue Sidewalk Expansion Reedley, City of Reedley--Fresno The Project includes construction of new (or widening of existing) sidewalks along a portion of Manning Avenue, an arterial roadway running in an east-west direction through the downtown section of the City of Reedley, between Buttonwillow and Frankwood Avenues. The Project area includes a variety of land uses, including vacant lots, residential use, commercial and professional offices, and a private school. Current sidewalks range from three to nine and one-half feet in width, with some parcels having no existing sidewalk: the City's zoning ordinance requires a ten-foot wide sidewalk. Ramps to allow access by those with disabilities will also be installed at street corners in compliance with ADA requirements.	<b>Neg</b>	06/17/2011
2011051058	Crown Pointe Estates Subdivision and Zone Change Ventura County Malibu--Ventura The subject property was previously developed as the Camp Joan Mier recreational center/children's camp (medically supervised). Special Use permit 838 was granted by the Board of Supervisors on Jan. 6, 1959, construction of the camp structures began in 1964, and records indicate that the use permit (later modified to a Conditional Use Permit) expired on Sept 21, 1999. Currently there are four remaining camp-related buildings.	<b>Neg</b>	06/17/2011
2011052057	Davidowski Soda Canyon Vineyard #P10-00203-ECPA Napa County Yountville--Napa The project includes vegetation removal, earthmoving activities, and installation and maintenance of erosion control measures associated with development of +/- 20.9-acres of new vineyard (+/- 18.1 net vine acres). The site plan designates development on topography that ranges from gently to steeply sloping lands (slopes typically 5 to 29%), at elevations between approximately 820 and 1,195 feet above mean sea level.	<b>Neg</b>	06/17/2011
2003082131	UC Berkeley 2020 Long Range Development Plan and Tien Center for East Asian Studies University of California, Berkeley Berkeley--Alameda Electrical Switching Station 6 will provide full redundancy to campus electrical infrastructure and system capacity for dedicated power delivery to high-demand campus buildings including Stanley Hall, Sutardja Dai Hall, and CA Memorial Stadium. The Project includes construction of a 4,200 gsf facility (2,100 sf	<b>NOD</b>

	footprint) with one level above and one level below grade to accommodate electrical equipment. In addition to the facility, 2,500 linear feet of underground electrical conduit and cable (duct banks) will be installed from the facility to the CA Memorial Stadium and to the Hearst Mining Circle area.		
2003121049	Diamond Rock Sand and Gravel Mine and Processing Facility Santa Barbara County --Santa Barbara Troesh Ready-Mix, Inc. proposes a new sand and gravel mine and processing facility on a 133-acre site located in the Cuyama River channel and on the adjoining river terrace, respectively. The applicant seeks Conditional Use Permit and Reclamation Plan would ensure that the site is restored to agricultural use upon completion of mining activities. The project would extract sand and gravel aggregate from the Cuyama River over a 30-year period, and process the material on adjoining river terrace. The mine would produce a grand total of approximately 13,820,000 tons of material (+/- 9,210,000 yards) at an average annual production rate of 500,000 tons per year and a peak production rate of 750,000 tons per year. The material would be trucked to job sites based on demand. The project would also be a receiver site for recyclable concrete.	<b>NOD</b>	
2008082117	Timberline at Auburn (PEIR 'T20080139) Placer County Auburn--Placer The project proposes to construct a continuing care retirement community (CCRC) including up to 858 total residential units, a commercial center with 78 units of the 858 units located on second and third story lofts, and all associated improvements.	<b>NOD</b>	
2010062051	Zoning Ordinance Amendment and South and West Branch Libraries Berkeley, City of Berkeley--Alameda Demolition of existing West Branch Library and construction of a new branch library on same site, with floor area of 9,400 s.f. The project would not involve any substantial expansion of the book collection, existing services or programs, except that the new multi-purpose room could accommodate larger meetings than the existing meeting room.	<b>NOD</b>	
2010062051	Zoning Ordinance Amendment and South and West Branch Libraries Berkeley, City of Berkeley--Alameda Demolition of the existing South Branch Library and Tool Lending Library and construction of a new branch library (7,480 s.f.) and tool library (1,176 s.f.) at the same location. The new library would be a one-story building with a total area of 8,656 s.f. The project would not involve any substantial expansion of the book collection, existing services or programs.	<b>NOD</b>	
2010081020	Glen Mor 2 Student Apartments University of California, Regents of the Riverside--Riverside The Glen Mor 2 Student Apartments project entails construction and operation of a student housing community on approximately 21 acres of University-owned property in the northeastern portion of the UC Riverside campus. The housing community includes five residential buildings that are each five stories in height and will accommodate a total of 810 student beds, a food emporium, a resident services office, and a community building. Additional aspects of the project	<b>NOD</b>

<b><u>Documents Received on Thursday, May 19, 2011</u></b>			
2010111057	<p>include a parking structure for residents (approximately 600 parking spaces), circulation improvements, indoor and outdoor commons facilities, a small conference facility, and restoration of a 0.4 mile stretch of an arroyo that flows along the site's northern boundary. As part of the project the University also approved an amendment to the 2005 UC Riverside Long Range Development Plan (LRDP) to change the land use designation on approximately five acres of the project site from Athletics and Recreation to Family, Apartment Housing and Related Support.</p> <p>Proposed Redevelopment Plan for the Manteca Redevelopment Project No. 3 Manteca, City of Manteca--San Joaquin</p> <p>The Manteca redevelopment Agency has adopted the Plan for the Project to help revitalize neighborhoods, upgrade public facilities and infrastructure, promote and facilitate economic development and job growth, and provide additional affordable housing opportunities for qualifying persons/families in the Project Area. Working with the community to help achieve these objectives, Agency activities could include, but not necessarily be limited to the following: construction and/or rehabilitation of structures; infrastructure upgrades for wastewater, drainage, water and circulation systems; community facilities improvements; economic development; and affordable housing projects and programs. While not proposed as specific projects at this time, these actions are possible activities that may be undertaken within the Project Area over the 30-year effective life of the Plan.</p>	<b>NOD</b>	
2011021060	<p>Adoption of Airport Master Plan for Delano Municipal Airport, Solar Facility and Specific Plan Amendment Delano, City of Delano--Kern</p> <p>Adopt Master Plan of development through the Year 2030 for the Delano Municipal Airport, amend the Land Use Element of the Delano General Plan replacing the existing airport safety zone map and land use compatibility criteria in accordance with the Airport Master Plan, and amend the South Delano Industrial Specific Plan by adding a text description and Land Use Plan Map designation for a Community Facilities-Airport designation.</p>	<b>NOD</b>	
2011031082	<p>Watkins Gate Well and Pipeline Project Marina Coast Water District Marina--Monterey</p> <p>The proposed Watkins Gate Well Pipeline Project is comprised of a water supply well to provide water to the MCWD's existing water supply distribution system; a well house to enclose the well; an electrical building to enclose motor controls, mechanical, and electrical appurtenances; a backup emergency power generator; and an associated distribution pipeline. The location of the 16-inch, 400 or 900-foot deep (approximate, preliminary values) well is proposed adjacent to the intersection of Watkins Gate Road and Reservation Road. The determination of the final well depth will depend upon the geological findings of a previously drilled test hole. The well would connect to an existing 24-inch water line connection with the installation of 2,500 feet of a new water conveyance pipeline to be located within the paved roadway of Watkins Gate Road in the East Garrison area of MCWD's Ord Community service area. A test well would be installed and monitored prior to construction of the well. If the test well is determined operational, the well will be made permanent monitoring well.</p>	<b>NOD</b>

2011058200	<p>Mission Creek Fish Passage Improvement Project Fish &amp; Game #5 Santa Barbara--Santa Barbara</p> <p>This project is designed to facilitate upstream steelhead migration by modifying two sections of concrete lined channels in Mission Creek. The upper trapezoidal section is 0.3 miles long, and the lower section is 0.8 miles long and is located 0.4 miles downstream of the upper section. Phase one of this project will modify the upper channel and phase 2 will modify the lower channel. These two concrete reaches are barriers to steelhead due to water velocities at high flows and depth during low flows. Modification to both reaches will allow access to 3.9 miles of spawning and rearing habitat for steelhead in between flows of 2 to 100 cfs. A new 4-foot wide and 3.5-foot deep low flow concrete channel will be excavated along the southern bank and will contain side pockets, a new innovative design to allow resting areas along the reach.</p> <p>SAA #1600-2011-0067-R5</p>	<b>NOE</b>	
2011058201	<p>Henry J. Mills Water Treatment Plant Hazardous Water Staging and Handling Facility Improvements Project Metropolitan Water District of Southern California Riverside--Riverside</p> <p>Design and construct two projects at the Henry J. Mills Water Treatment Plant. These projects include (1) final design and construction of a hazardous waste staging and handling facility to enhance compliance with environmental and safety regulations and (2) replacement of turbidity meters and gas detectors inside the chemical piping galleries of Modules Nos. 3 and 4 to improve the reliability of water quality testing and enhance worker safety. The new hazardous waste facility will include a concrete slab with containment curbs and a sump to collect leaks and spillage, an overhead canopy, separation of incompatible hazardous wastes, a plumbed eyewash/shower station, and a leak/spill detection system. The turbidity meter and gas detector project will replace obsolete, unreliable equipment necessary for water quality monitoring and safety in the event of a chemical release.</p>	<b>NOE</b>	
2011058202	<p>Campground Iron Ranger Replacement Parks and Recreation, Department of --Tulare</p> <p>The project will remove the old, existing iron ranger and replace it with a new, improved iron ranger. The area is not in the core of the Historic District and is located in a previously disturbed area. It will be installed in the same location as the old iron ranger to a depth of no more than 3 feet. The project will improve the visual landscape of the area.</p>	<b>NOE</b>	
2011058203	<p>Split Rail Fence Installation Parks and Recreation, Department of --Kern</p> <p>The project includes the removal of the horizontal telephone poles along the service road and parking areas at Fort Tejon State Historic Park and the installation of a cedar split rail fence, which is currently used throughout the Park. The project will cover approximately 300 linear feet and will include up to 35 post holes, which will be dug to a maximum depth of 18". Post holes will be dug by hand and will be located within the disturbed soil along the edge of service roadway and parking areas.</p>	<b>NOE</b>

2011052060	Minor Subdivision For 170 Acre Parcel Into 4 Parcels and a Designated Remainder San Joaquin County Lodi--San Joaquin Minor subdivision application to subdivide an existing 170 acre parcel into 4 parcels and a designated remainder, parcel one a financial parcel to contain 2.0 acres. Parcel two and three to contain 40 acres. Parcel four to contain 48 acres and a designated remainder to contain 40 acres.	<b>Neg</b>	06/20/2011
1997062105	Almaden/Chynoweth Retail Center Planned Development Rezoning (File No. PDC10-006) San Jose, City of San Jose--Santa Clara Planned Development Rezoning to A (PD) Planned Development Zoning District to allow the development up to a maximum of 400,000 sf of commercial development on an ~ 43 gross acre site, with construction of Chynoweth Avenue through the site to connect with Sanchez Drive to the south.	<b>SBE</b>	07/05/2011
1993011028	Emergency Storage Project Lake Hodges Pump Station San Diego County Water Authority California Department of Public Health (CDPH) is issuing an operational permit for a 21,000 horsepower pump station, a 3.3 million gallon tank, and an 11-mile 102-inch tunneled pipeline for emergency water storage and usage.	<b>NOD</b>	
1993072024	Semitropic Groundwater Banking Project Semitropic Water Storage District WASCO--KERN The Project is a water distribution system to allow for increases in groundwater storage and the rate of recovery of banked water for the Stored Water Recovery Unit (SWRU) of the Semitropic Groundwater Banking Project (SGBP). Constructed elements consist of the North-South Conveyance System and the three geographically distinct Irrigation Distribution Systems, referred to as "X," "Y," and "Z." Each system is designed to deliver surface water (when available) to lands otherwise reliant on pumped groundwater for irrigation. The North-South Conveyance System provides for the delivery of water to and from the California Aqueduct and ILSA. For the purposes of DFG's ITP issued for the Project, only the (1) North-South Conveyance System; (2) Irrigation Distribution Systems; and 3) Operation and Maintenance (O&M) activities of the ILSA facilities were addressed, as the other constructed elements will occur on lands without Covered Species habitat (in irrigated agriculture).	<b>NOD</b>	
2002032132	Freeport Regional Water Project Freeport Regional Water Authority Sacramento--Sacramento, San Joaquin This minor amendment to the previously issued ITP accounts for a change in the location where required mitigation will occur. The ITP requires the permittee to mitigate impacts to winter and spring-run Chinook salmon and delta smelt associated with the loss of shaded riverine aquatic (SRA) habitat by restoring 0.6 acres of SRA habitat within the project area. Because of U.S. Army Corps of Engineers' restrictions on vegetating levees in the project area, the minor amendment authorizes the permittee to fulfill its mitigation requirement to authorize the permittee to purchase 1.2 acres of SRA habitat credits from a mitigation bank pre-approved by DFG. The ITP and minor amendment referenced above as issued by DFG authorized incidental take of species listed under CESA	<b>NOD</b>

<b><u>Documents Received on Friday, May 20, 2011</u></b>			
2011058208	Grant Award # ARV-10-043 to Agricultural Waste Solutions, Inc. (Recipient) Energy Commission Moreno Valley, San Jacinto--Riverside The project will fund the installation of a skid-mounted, modular, pilot demonstrate plant on an existing dairy farm that will convert dairy waste to renewable diesel for use by onsite vehicles. The project includes pouring a 25'x50' site pad with canopy for housing the pilot plant, extending a gas utility from an onsite source to power the facility, and storing the diesel in existing tanks. The project is associated with minor air emissions and water discharges that would be an improvement on the emissions currently associated with the dairy. The project benefits the Scotts Brothers Dairy Farm and the public by demonstrating the cost-effectiveness and feasibility of alternative and renewable vehicle technology, thereby reducing reliance on petroleum fuels and reducing greenhouse gas emissions, including those from dairy waste.	<b>NOE</b>	
2011058209	Grant Award # ARV-10-040 to Northstate Rendering Co Inc. (Recipient) Energy Commission Oroville--Butte The project funds the construction of an anaerobic digestion facility and biogas upgrading/compression system at Recipient's existing rendering facility that will provide 250 kilowatts of electrical power to the facility and provide compressed natural gas (CNG) as vehicle fuel for Recipient's fleet as well as other customers. The project benefits the Recipient, partner biogas Energy, and the public by reducing reliance on petroleum fuels, reducing greenhouse gas emissions, and increasing local green jobs.	<b>NOE</b>	
2011058210	Grant Award # ARV-10-041 to Sacramento Municipal Utility District (Recipient) Energy Commission Sacramento--Sacramento The project will fund a demonstration test of the Chrysler Ram 1500 plug-in hybrid electric vehicle pick-up to collect performance data under real-world conditions. The project will also fund installation of electric vehicle charging infrastructure throughout the Sacramento area. These chargers are small, sited in existing parking lots, and any trenching to install them will restore the land to its original condition. The project benefits the public by demonstrating the cost-effectiveness and feasibility of alternative and renewable vehicle technology, thereby reducing reliance on petroleum fuels and reducing greenhouse gas emissions.	<b>NOE</b>	
2011058211	Gas Line 220 Robben Road Irrigation Ditch Maintenance Project Regional Water Quality Control Board, Region 5 (Central Valley), Sacramento Dixon--Solano Pacific Gas and Electric will perform maintenance activities to secure the integrity of Gas Line 220 within Robben Road irrigation ditch. Erosion in Robben Road irrigation ditch has exposed the buried pipeline, and without further attention, the pipeline may be subject to corrosion and damage.	<b>NOE</b>	
2011058212	Issuance of Streambed Alteration Agreement No. 1600-2011-0017-R1 East Valley Creek, Tributary to East Fork Stillwater Creek Fish & Game #1 Redding--Shasta The Project is limited to the extraction of accumulated stream bed gravel out to East Valley Creek in the amount not to exceed 500 cubic yards per year for non-commercial use only.	<b>NOE</b>

2009022100	Kirkwood Meadows Power Line Reliability Project Kirkwood Meadows Public Utility District --Amador, Alpine, El Dorado Note: Shortened Review Period  Kirkwood Meadows Public Utility District (KMPUD) is proposing to construct, maintain and operate a 28-mile power line that would connect Kirkwood to the regional electric grid near Salt Springs Reservoir. The line would be owned and operated by KMPUD and dedicated to serve only the Kirkwood Community in order to provide a more reliable and cleaner source of electricity. The project is located within Amador, Alpine and El Dorado Counties. Approximately 3.1 miles would be built along an existing overhead line between Salt Springs Reservoir and Bear River Reservoir. The remaining ~25 miles would be buried within existing roadways and disturbance corridors to Kirkwood. The power line would be located predominately across Eldorado national forest and 15% of the line would cross private land.	<b>JD</b>	06/21/2011
2011051064	Tentative Tract Map No. 69124 Lancaster, City of Lancaster--Los Angeles A subdivision of two parcels into four lots and the construction and occupancy of two single family dwellings in addition to the two existing single family dwellings in the SRR zone.	<b>MND</b>	06/21/2011
2011052066	Wastewater Treatment Plant and Constructed Wetlands Project Rio Alto Water District --Tehama The proposed on-site treatment plant improvements include: the addition of an improved screening unit at the headworks, construction of a biological selector, optimization of the existing secondary clarifier, construction of another secondary clarifier, conversion of the existing return activated sludge (RAS) pump station to an aerobic digester, construction of a new RAS pump station, and improvements to an existing pump station to convey flows to the constructed wetlands area. The proposed off-site improvements include: installation of +/- 12,00 lineal feet of underground reclaimed-water pipeline within existing roadways and across undeveloped parcels, and construction of a +/- 77-acre wetland area to allow for the biological uptake of nutrients and percolation if reclaimed water.	<b>MND</b>	06/22/2011
2011041076	Huntington Education and Visitor Center Project San Marino, City of San Marino--Los Angeles NOTE: Revised NOP  The Huntington Education and Visitor Center Project (proposed project) has three basic components: 1) modifying the existing Historical and Cultural Zone Ordinance; 2) a conditional use permit to allow redevelopment of facilities, parking, landscaping, and other improvements within the existing entry complex area, and 3) a conditional use permit to allow The Huntington to occasionally exceed maximum daily vehicle counts and standard operating hours a limited number of days per year, and to allow larger outdoor events with amplified sound to be conducted only in certain areas on the site.	<b>NOP</b>	06/21/2011

2011051065	DIR-2011-485-SPR, ENV-2011-0486-MND Los Angeles, City of Los Angeles, City of, Gardena, Carson--Los Angeles A Site Plan Review to allow a change of use of 72,000 square feet of warehouse space to retail space, a change of use of 8,008 square feet of office space to retail space, and the construction of a new 5,000 square-foot-retail, resulting in a total of seven tenant retail spaces. The existing 20,231 square-foot commercial school and 29,969 office space will remain. The total floor area of the proposed project will be 124,000 square feet. The project includes demolition of the existing buildings, a new monument sign, and new landscaping. The proposed project will have 531 on-site parking spaces. Pursuant to the Los Angeles Municipal Code Section 16.05 a Site plan Review is required for any change of use which results in a net increase of 1,000 or more average daily trips as determined by, and using the trip generation factors promulgated by the Department of Transportation. The project site is a 403,179 square-foot site, consisting of a rectangular-shaped lot located at the northeast corner of 190th Street and Orchard Avenue. The site is currently developed with a 47,200 square-foot three-story business office/commercial school use and an 88,000 square-foot light industrial/warehouse use, for total of 135,200 square feet of building area. The existing structures include a commercial school (UEI), vacant and leased business offices, and a vacant warehouse lease space.	<b>Neg</b>	06/22/2011
2011052063	HW3, LLC - MS1105 - MS1105 Del Norte County --Del Norte Division of 356 acres of TPZ parcels and a remainder. No development is proposed or anticipated. This is a resource subdivision.	<b>Neg</b>	06/22/2011
2011052065	RBS Washington Blvd/Summer Lane, LLC - Major Subdivision - MS1101 Del Norte County Crescent City--Del Norte Major Subdivision of a 10.13 acre parcel into one 3.48 parcel and a 6.65 acre remainder. The application is processed as a major subdivision as the land owner has previously created more than 5 parcels from the parent parcel. A Major Use permit for a Planned Community was approved for the construction of a phased apartment project with a total of 162 units. The proposed land division is to create a separate parcel for the first phase, 57 apartments. The project area is served with public water and sewer. Access will be from a new road constructed from Summer Lane.	<b>Neg</b>	06/22/2011
2005052060	State Route 28 EIP Project Caltrans #3 --Placer The Transfer of Jurisdiction Agreement would permit Caltrans to install a pedestrian light standard at the corner of Onyx Street and State Route 28 as part of the Placer 28 EIP.	<b>NOD</b>

2010091085	Market Street Properties Riverside Community College District Riverside--Riverside	<b>NOD</b>	
	The proposed RCCD Market Street Properties project (herein referred to as the project; includes the development of a facility to house District offices and RCC Culinary Arts program and renovation and restoration of the Heiting Building into a gallery and archives center, as further described below). The project involves demolition of the existing Plaza Hotel (~20,250 sf) and the existing RCCD System Office buildings consisting of ~ 17,620 sf of building space to provide for the construction of a three story building of 51,600 sf atop a two story sub-grade parking structure of 46,600 sf. The proposed project also includes restoration of the exterior facades of the Heiting building (former Citrus Belt Savings and Loan Building), and renovation of the facility to provide for a gallery and archives center. The proposed new office/culinary arts building will be located along Market Street from the corner of University Avenue to the Heiting building. The ~0.58 acre project site has been planned for the relocation of the Culinary Arts program along with the consolidation of all the RCCD administrative functions that are currently located at separate sites through the District. The art gallery and archives center, within the renovated Heiting building, will house existing and loaned collections of the district.

**Documents Received on Tuesday, May 24, 2011**

2010021069	<p>Southern California Gas Company La Goleta Storage Field Enhancement Project Santa Barbara County Goleta--Santa Barbara</p> <p>The project involves drilling four new wells (two development/exploratory wells identified as Todd 1 and 2 and two exploratory wells identified as Chase and Bryce 3, and More 6), installation of approximately 2,800 linear feet of six-inch diameter underground piping, and construction of an additional gas dehydration unit and other appurtenant facilities at the La Goleta Storage Field. The two exploratory wells would be converted into development wells if native gas production is determined feasible. Native gas from the development/exploratory wells would be routed through the new underground pipeline to the new dehydration unit prior to connecting to existing gas transmission and distribution pipelines for local distribution. SoCal Gas estimates that there are three to five billion cubic feet of recoverable gas reserves in the target reservoir, and production of these reserves would take approximately three to five years. The proposed new facilities would be converted to storage uses after sufficient depletion of the native gas reserves has been achieved.</p>	<b>EIR</b>	07/07/2011
2011051066	<p>Treatment-Perchlorate Facility (PTP) Pomona, City of Los Angeles, City of, Pomona--Los Angeles</p> <p>City of Pomona proposes installing an Ion Exchange (IX) perchlorate treatment facility and ancillary improvements on the City's existing Well No. 6 site and the adjacent Anion Exchange Plant-1 (AEP-1) site. The proposed PTP facility would be located on the City of Pomona's existing Well No. 6 site, with improvements extending across Electra Street and onto the City's adjacent Anion Exchange Plant-1 (AEP-1) site. Alternatively, the proposed PTP facility and all associated improvements would be located on the AEP-1 site. Pomona's Well No. 6 and AEP-1 sites are respectively located at 1375 and 1374 East 3rd Street, on opposite sides of Electra Street, in the City of Pomona, Los Angeles County, California. The purpose of the proposed facilities is to reduce concentrations of nitrate and perchlorate in groundwater through treatment and blending.</p>	<b>MND</b>	06/22/2011

2011051070	Kern 99 North 8-Lane Widening Caltrans #6 Bakersfield--Kern Caltrans proposes to improve an approximate 1.39 mile segment of SR 99 located within the northern portion of the City of Bakersfield in Kern County. This existing segment is a six-lane highway and would be widened to an eight-lane highway by constructing two additional lanes, one in each direction, within the existing median. The project proposes to add a 12-foot lane and 10-foot inside shoulder in each direction, separated by a concrete median barrier. The project also proposes an auxiliary lane in the northbound direction between the SR 204/99 connector and the Olive Drive Interchange.	<b>MND</b>	06/23/2011
2011051071	Nutmeg Investments Minor Use Permit DRC 2006-00234 San Luis Obispo County --San Luis Obispo Request by Nutmeg Investments Partnership for a Minor Use Permit / Coastal Development Permit to allow redevelopment of the subject property in two phases. The first phase includes demolition of three existing detached single family residences and redevelopment of the site into (2) 4-unit apartments (4-attached one bedroom units), totaling 8 units. The second phase includes (1) 4-unit apartment (4-attached one bedroom units) and (1) 3-unit apartment (3 attached one bedroom units), totaling 7 units. Phase II will not occur until a community-wide wastewater system is available. The project will result in 15 total units for both phases. Each unit is approximately 892 sq. ft. in size, two-story and includes a single car garage. The project will result in the disturbance of approximately 35,000 sq. ft. on a 1.04 acre parcel. The proposed project is within the Residential Multi-family land use category and is located at 1990 Mountain View Drive in of community of Los Osos. The site is in the Estero planning area.	<b>MND</b>	06/24/2011
2011051072	Kellaway Minor Use Permit D990336P San Luis Obispo County --San Luis Obispo Request by Thomas Kellaway for a Minor Use Permit / Coastal Development Permit to allow a new two story 11,412 sq. ft. single family residence with attached 968 sq. ft. garage. The project will result in the disturbance of approximately 11,320 sq. ft. on a 5 acre parcel.	<b>MND</b>	06/24/2011
2011052071	New Santa Rosa Criminal Courthouse Judicial Council of California Santa Rosa--Sonoma The AOC proposes to construct an approximately 173,500 gross building sq. ft. courthouse containing 15 courtrooms in the city of Santa Rosa for the Superior Court. The proposed site, located within the Sonoma County Administration Center campus is currently owned by the county, but is within the city of Santa Rosa's jurisdiction. The proposed project will construct a six-story, 173,500 building gross sq. ft. courthouse facility surrounded by landscaping and parking. A 20-foot high enclosed penthouse would be constructed on top of the building to conceal the mechanical equipment. The design will be consistent with other facilities recently constructed by the AOC, and will include location-specific considerations. The new courthouse will include 15 courtrooms, space for court administration, the court clerk, court security operations and holding, a juror assembly room, and building support space. The basement level will include secure parking for 20 vehicles, a sally port along with a connection point for a possible future tunnel connecting the MADF, building storage, and in-custody	<b>MND</b>	06/23/2011

	holding. Parking for courthouse business will be provided in parking lots within the Administration Center campus, including existing parking lots north of the courthouse location and across Ventura Drive, as well as a new lot where the existing Fleet Services Building is located. The AOC plans to acquire the proposed courthouse site from the County in 2011. Construction of the proposed project would begin in 2013, and would be completed by 2015. Building occupancy, including the consolidation of court facilities and operations, is expected to be complete by mid to late 2015.		
2011052072	U.S. Pipe and Foundry Baghouse Project Union City Union City--Alameda The project applicant, the United States Pipe and Foundry Company, LLC (U.S. Pipe) is proposing to replace the existing baghouse (air filtration equipment) on its iron pipe manufacturing plant with a new, more efficient baghouse. The existing positive pressure, shaker baghouse would be replaced with a more modern induction draft pulse jet baghouse. Emission gases from the new baghouse would be vented through a new 100-foot-tall stack. The project would also include installation of a new heat exchange flue gas cooler upstream of the baghouse in the plant's cupola emission system, replacing an existing water-injection gas cooler.	<b>MND</b>	06/23/2011
2011052073	6731 Tahoe Timeshare (PCPA 20090078) Placer County --Placer The project proposes to remove and replace the existing motel facility with ten, two to three-story duplex fractional timeshare units (Tourist Accommodation Units), a +/- 1,757 square-foot clubhouse with a two bedroom manager's unit above and three single-story residences that will house four employee-owned one-bedroom units.	<b>MND</b>	06/23/2011
2011051068	Owens Dry Lake Phase 7a Dust Control Measures Los Angeles, City of --Inyo The City of Los Angeles Department of Water and Power (LADWP) is currently implementing the Owens Lake Dust Mitigation Program (OLDMP) on Owens Dry Lake in order to reduce exceedances of the state and federal particulate matter (PM10) air quality standards. LADWP construct and operates dust control measures (DCMs) on the lake in compliance with Agreements with the Great Basin Unified Air Pollution Control District (GBUAPCD) under the authority of California Health & Safety Code Sec. 42316, legal settlement agreements with GBUAPCD, lease agreements for use of state lands (administered by the California State Lands Commission (CSLC)), and other regulatory approvals. Phase 7a will expand and modify the existing system of dust control on the lake by installation of Best Available Control Measures (BACM) (Gravel Cover, Shallow Flooding and Managed Vegetation) on 3.1 square miles of area identified as emissive by GBUAPCD. In addition, 3 to 4 sq miles of existing Shallow Flooding dust control areas (DCAs) will be transitioned to a Hybrid dust control method. Hybrid dust control is a new concept that will incorporate a combination of the three BACM to minimize dust while conserving water sue on Owens Dry Lake.	<b>NOP</b>	06/23/2011

2003051094	10-MER 99 KP0.0/10.5 (PM 0.0/7.1) Plainsburg Arboleda Freeway Project Caltrans #6 Merced--Merced The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement, pursuant to Section 1602 of the Fish and Game Code, to the Project applicant. Caltrans proposes the following: Convert the four-lane expressway to a six-lane freeway. To accomplish this, Caltrans will construct three new bridges and remove the existing SR 99 northbound bridge which is 40 feet wide by 97 feet long. The two new freeway bridges to the east will be 58 feet wide and 90 feet long with 18 concrete piles each 15 inches in diameter. Approximately 2,000 cubic yards of imported soil will be placed on the creek bank to construct the bridge embankments for the three structures. Approximately 325 cubic yards of Rock Slope Protection (RSP) spread over 650 square yards will line the creek bank to provide erosion protection and would be kept free of vegetation as required by the Amended Biological Opinion for San Joaquin kit fox passage. The RSP along with the concrete piles and the abutments will have a permanent impact of approximately 0.29 acres, and temporary impacts of 0.30 acres. Removal of the existing northbound bridge will require the removal of 33 concrete piles and the abutments to at least three feet below the finished grade of the channel. Excavated soil from nearby will be used to backfill the holes and reestablish the natural channel grade. The proposed work will have a temporary impact to approximately 0.17 acres, bringing the total temporary impacts to 0.47 acres.	<b>NOD</b>

2006121075	Atascadero City Hall Repair and Rehabilitation Project Amendment Atascadero, City of Atascadero--San Luis Obispo The project consists of a series of actions for the repair, maintenance, and rehabilitation of Atascadero's City Hall a National Register Historic Building. The project will occur in three phases. Funding for the project is derived from separate sources including FEMA, a California Stat CCE grant and local redevelopment funds.  The project will include the following specific items as delineated by a team of architectural and engineering consultants retained by the City of Atascadero. The items fall within seven major categories of work, as follows:	<b>MND</b>	06/24/2011
2011051074	Simms Tentative Tract Map with Zoning/General Plan Use Amendment Temecula, City of --Riverside The proposed project consists of a Tentative Tract Map application proposing to subdivide four lots totaling 32.85 acres into 15 residential lots. Lots will range in size from 1.31 - 2.80 acres. CC&R's as well as a HOA with an architectural control committee will also be formed. The project is located approximately 1,500 feet east of Santiago and Ynez Road. The project also includes a Zoning Map and General Plan Land Use Map Amendment application. The current zoning and General Plan designation is Very Low Residential. The proposed zoning and General Plan designation is L-1 (Low Density Residential). The site is currently vacant, yet disturbed by various off-road/hiking trails. Access to the project will be provided by John Warner Road near the intersection with Santiago Road will be reconstructed to repair storm damage and reconnect with Santiago Road.	<b>MND</b>	06/24/2011
2011051075	NRG Borrego Solar One San Diego County --San Diego The project is a Major Use Permits to authorize a Major Impact Utility Pursuant to Section 1350 of the Zoning Ordinance. The project consists of an Unmanned Photovoltaic Solar Farms (26 MW), a 69kV transmission line, and improvements to the Borrego Springs 69kV Substation, which is owned and operated by SDG&E.	<b>MND</b>	06/24/2011
2011051079	Garguis Mixed-Use Development Huntington Beach, City of Huntington Beach--Orange To construct of a three-story, 35-foot tall, approximately 8,972 sq. ft. mixed-use, visitor-serving commercial/residential development on an 11,525 sq. ft. lot. The project includes approximately 2,399 sq. ft. of ground floor commercial retail space and four residential units totaling 6,349 sq. ft. located on the second and third floors. Parking will be provided in semi-subterranean spaces. The project includes variance and special permit requests to deviate from the minimum lot frontage, minimum side yard setbacks, and maximum parking structure transition ramp slope requirements.	<b>MND</b>	06/24/2011
2011052076	Fourth Street Outfall and Storm Drain Replacement Santa Rosa, City of Santa Rosa--Sonoma The project is to abandon and replace approximately 780 linear feet of an existing 24 inch clay storm drain pipe currently running from the intersection of 4th Street and Wilson Street in Railroad Square (Santa Rosa, CA) west to a new outfall to	<b>MND</b>	06/24/2011

	<p>Santa Rosa Creek. 550 linear feet of the existing storm drain is severely deteriorated and is proposed to be slurry filled/or capped and abandoned in place in conformance with the City of Santa Rosa abandonment standards. The remaining 230 linear feet are proposed to be removed and replaced in the existing storm drain location. The existing outfall is proposed to be abandoned in compliance with the Sonoma County Water Agency standards and a new outfall is proposed to be constructed at a new location.</p>		
2011052084	<p>Richmond-Ohlone Greenway Gap Closure Richmond, City of Richmond--Contra Costa</p> <p>The City of Richmond proposes to construct the Richmond-Greenway Gap Closure Project, a multi-use trail connection in Richmond, CA. The Richmond-Ohlone Greenway Gap Closure Project represents the third phase of the Richmond Greenway Project, which would provide a continuous bicycle and pedestrian pathway in Richmond from Garrard Boulevard and the Richmond Parkway to San Pablo Avenue. The Richmond Greenway would connect the San Francisco Bay Trail at the west with Ohlone Greenway in the City of El Cerrito at the east. The proposed project includes installation of the new multi-use trail, a new crosswalk and traffic signal on San Pablo Avenue, and a new bridge over realigned Baxter Creek as well as associated improvements (i.e., lighting) and landscaping.</p>	<b>MND</b>	06/24/2011
2011051078	<p>Fountain Valley Civic Center Fountain Valley, City of Fountain Valley--Orange</p> <p>The project includes the demolition of a vacant office building, a city storage building and a city building that is leased for classroom space to construct a four-story, 127 room Ayres hotel, 88 residential units and 2,272 sf of storage space for the Fountain Valley Police department. The hotel is proposed for 2.0 acres, totals 78,807 sf and includes a restaurant (breakfast only) swimming pool, Jacuzzi, 1,875 sf of conference facilities and 126 parking spaces. The remaining 6.3 acres is proposed for 88 residential units (61 townhomes and 27 single-family detached units) and 270 parking spaces (176 garages spaces/94 guest spaces. On-site recreational facilities include a swimming pool, restrooms, showers, and seating. A homeowners association will maintain the open space, landscaping, electronic access gate, block walls, and street within the townhome development.</p>	<b>NOP</b>	06/27/2011
2011052077	<p>General Plan Circulation and Land Use Elements (LUCE) Update American Canyon, City of American Canyon--Napa</p> <p>The American Canyon General Plan is a state-required legal document (Government Code Section 65300) that provides guidance to decision makers regarding the conservation of resources and the future physical form and character of development for the City. It is the official statement of the City's goals and policies regarding the extent and types of development of land and infrastructure that will achieve the community's physical, economic, social, and environmental goals. Although the General Plan consists of individual sections, or "elements," that address a specific area of concern, it embodies a comprehensive and integrated planning approach for the City.</p>	<b>NOP</b>	06/24/2011

2008031050	ER 2004-48, TR 892, 2004-52-CZ/PD/GE/PZ/DA, 2004-06-AN (Rincon Oaks Estates) Escondido, City of Escondido--San Diego This Supplemental MND is being undertaken solely to comply with the request of a responsible agency (San Diego LAFCO) to provide additional analysis of State Law and LAFCO Policy L-101 regarding prime agriculture and recirculate the document for public comment. The project being evaluated in this supplemental MND is exactly the same as in the previously adopted FINAL MND as no changes have been proposed by the applicant of the City of Escondido. No new or more severe environmental impacts were identified as part of this update and the same mitigation included in the Final MND approved in 2008 will continue to be implemented through the adopted Mitigation Monitoring Reporting Program.	<b>Neg</b>	06/24/2011
2011051073	Environmentally Acceptable Food Packaging Ordinance (Environmental Review 2010-006) Salinas, City of Salinas--Monterey Amend the City of Salinas Municipal Code to regulate and limit the use of polystyrene foam food packaging by food providers within the City of Salinas.	<b>Neg</b>	06/24/2011
2011051076	Stericycle, Inc. Vernon, City of Maywood--Los Angeles In February 2009, a CUP was issued by the City of Vernon to Enserv West, LLC ("Enserv") to operate a medical waste transfer station and treatment facility located at 4726 Loma Vista Avenue. The operation consists of transferring and treating of medical waste from generators such as hospitals, medical clinics or other producers of medical waste. The medical waste is treated via stream sterilization also known as "autoclaving". The autoclave is a device used for medical waste disposal which renders the material inert by applying intense steam heat. On December 4, 2009, Stericycle, Inc. acquired the assets of Enserv West LLC and their parent company, Medserv, Inc. Stericycle wishes to add the treatment of "foreign garbage" regulated by the Animal Plant Health Inspection (commonly referred to as APHIS waste) as outlined under the authority of the U.S. Department of Agriculture (USDA) at the Loma Vista site. The CUP that was issued by the City of Vernon to Enserv did not permit the treatment of APHIS waste; it only permitted the treatment and transfer of medical waste. Therefore, Stericycle is requesting an amendment to its existing CUP to allow for the treatment of APHIS waste at the subject site. The project is subject to the CEQA because it requires discretionary approval. The City has performed a comprehensive evaluation of the potential impacts for this project in accordance with the State CEQA Guidelines. The City has determined that this project will not have significant effect on the environment and proposes to adopt a Neg Dec for this project.	<b>Neg</b>	06/24/2011
1997031065	MRWMD Master Plan Update and Revised SWFP (Acceptance of Santa Cruz County Municipal Solid Waste) Supplemental ND Monterey Regional Waste Management District Marina--Monterey Revision of the Solid Waste Facility Permit to revise the maximum tonnage of 3,500 tons per day, to 21,000 tons per week (3,500 tons per day x 6 days per week) with a daily maximum tonnage of 4,500 tons. This will allow handling of waste from special events or one-time projects generating additional waste	<b>NOD</b>

	materials.		
2005061051	La Pata Avenue Gap Closure and Camino Del Rio Extension Orange County San Clemente--Orange The proposed project would widen La Pata Avenue from three to five lanes from approximately 2,700 feet south of Ortega Highway in the County of Orange to the existing road terminus at the County's Prima Deshecha Landfill; implement a gap closure by constructing four new lanes from the existing terminus to the intersection of Calle Saluda and Avenida La Pata in the City of San Clemente; and extend Camino Del Rio as a four-lane roadway from its existing terminus in the Forster Ranch community of San Clemente to the proposed Avenida La Pata roadway. Typical roadway cross sections for the proposed project are 100 feet for La Pata Avenue and 80 feet for Camino Del Rio.	<b>NOD</b>	
2007072023	Modesto Master EIR Update and General Plan Amendment Modesto, City of Modesto--Stanislaus The current Planned Development zoning, P-D(589) allows all uses as permitted in the General Commercial (C-2) Zone on the front portion of the property, including a car wash, which typically would require a conditional use permit approval in the C-2 Zone. The rear half of the property is restricted to RV storage. The applicant no longer wishes to pursue a car wash at this location and is therefore proposing to rezone the site from P-D(589) to C-2, and to eliminate the requirement that any development be consistent with the approved plan for P-D(589). In doing so, this will allow for a broader range of commercial uses for the site. The existing O'Brians's Bar and Cocktail Lounge, located on the northeast corner of the parcel will be preserved as part of the new rezone, as bars/cocktail lounges are a permitted use in the C-2 zone.	<b>NOD</b>	
2008042067	Loma Rica Ranch Specific Plan Grass Valley, City of Grass Valley--Nevada The proposed project is a Specific Plan for a mixed-use development on ~452 acres. The project includes the applications noted above. The plan clusters development into four neighborhoods and includes development of 700 low, medium and high density primary residential dwelling units; 54,000 s.f. of commercial, mixed-use, and retail uses; and 364,161 s.f. of business and light industrial uses. Approximately 313.9 acres are proposed as open space, including improved parks, farm land and natural open space. In addition, the project includes the rezoning and annexation of a 3.15 acre parcel McCarthy property, located at the intersection of Sutton Way and Idaho-Maryland Road. The McCarthy property would be rezoned Light Industrial and no development is proposed at this time.	<b>NOD</b>

2011052078	<p>The Hill Slough Restoration Project Fish &amp; Game #3 Suisun City--Solano</p> <p>The purpose of the project is to restore natural hydrologic processes within a significant portion of the project area, thereby promoting restoration of ecological processes and functions, which will aid in the recovery of listed plant and wildlife species while contributing to primary productivity in the estuary.</p> <p>DFG developed a range of restoration alternatives to meet the project purpose. The alternatives represent different numbers and locations of levee breaches resulting in different mixes of tidal and seasonal wetlands.</p>	<b>NOP</b>	06/27/2011
2011051077	<p>July 2011 Friends of Oceano Dunes Poker Run and Safety Event Parks and Recreation, Department of --San Luis Obispo</p> <p>Friends of Oceano Dunes proposes to hold the annual poker Run at ODSVRA Thursday through Sunday, July 1-4, 2011, over the July 4th holiday weekend. The Poker Run event would comprise safety displays and merchandising booths on four days (July 1-4, from 9 a.m. to 8 p.m.) and a non-timed poker run and raffle event on a single day (July 3, 9 a.m. to 6 p.m.). All activity would occur in the camping and open riding area of the ODSVRA. The Poker Run is a low speed, non-race event on a linear course roughly five miles with six checkpoints each comprising a small card table and a pole with a flag staffed by volunteers. It is anticipated up to 200 vehicles may participated by visiting the checkpoints and drawing cards for poker hands. All pre-existing ODSVRA camping and vehicle limits would remain in effect during the event.</p>	<b>Neg</b>	06/27/2011
2011052081	<p>Countywide Siting Element, First Amendment Solano County --Solano</p> <p>First Amendment to the countywide Siting Element (CSE) of the Solano County Countywide Integrated Waste Management Plan. The amendment: 1) projects disposal needs for wastes generated within the borders of Solano County for the next 15-year planning period of 2010-2025; updates technical information on the existing facilities, Recology Hay Road and Potrero Hills Landfill; 3) incorporates the approved expansion of Potrero Hills Landfill into the existing facility description; and 4) adds the existing Tonnessen Pet Cemetery waste disposal facility into the siting element. No new solid waste facilities are proposed.</p>	<b>Neg</b>	06/27/2011
2011052082	<p>Remedial Action Plan for TI Site 27/Former Clipper Cove Skeet Range Toxic Substances Control, Department of San Francisco--San Francisco</p> <p>DTSC is proposing to approve a draft Remedial Action Plan pursuant to authority granted under Chapter 6.8, Division 20, CA Health &amp; Safety Code (H&amp;SC). The purpose of this RAP is to implement remedial actions for Site 27 that are protective of public health and safety and the environment. Site 27 is the shot fall zone at the former naval skeet range and consists of about 19 acres off shore in Clipper Cove. The remedial action objective is to prevent or minimize ingestion of lead shot by diving ducks within 75 feet of the shoreline where there is a complete exposure pathway under current conditions. The RAP accomplishes the remedial action objective by implementing the following activities: focused dredging and backfill, off-site disposal of sediment, Institutional Controls (ICs), and sediment monitoring. No human health risk is associated with Site 27; therefore, there are no remedial</p>	<b>Neg</b>	06/29/2011

	action objectives for human health.		
2008071012	General Plan and Zoning Code Update El Monte, City of El Monte--Los Angeles Note: Response to Comments	<b>Oth</b>	
	The proposed project is an update to the City of El Monte General Plan and Zoning Code.		
1995103069	Competitive Local Carriers Petitions For Local Exchange Public Utilities Commission VARIOUS--VARIOUS The four project sites (C-1, C-2, C-3 and C-4) are located on LedgeWood Creek and a drainage canal within the City of Fairfield, Solano County. The project includes installation of a two-inch high density polyethylene conduit by the horizontal directional drilling method. No equipment will be operated within a minimum 150 feet of a stream. Small-diameter bore pits will be located within existing public easement right-of-ways. A Frac-out Plan and Procedures has been prepared. The California Department of Fish and game is executing a Lake and Streambed Alteration Agreement Number 1600-2011-0095-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Carl D. Hirchenhofer/MCImetro Access Transmission Services LLC.	<b>NOD</b>	
2007122033	Diamond Springs Parkway Project Draft EIR Traffic Information Reissuance El Dorado County Diamond Springs--El Dorado The project is located in central El Dorado County, north of the community of Diamond Springs, between Missouri Flat Road and State Route 49 (Diamond Road). Construction of a 4-lane, divided roadway connecting Missouri Flat Road to SR49, north of the community of Diamond Springs. The project extends from Missouri Flat Road, north of its intersection with China Garden Road, and connects to SR-49 to the east to include minor improvements and/or realignment of China Garden Road, Throwita Way, Truck Street, Bradley Street, and Old Depot Road as well as a new Truck Street/Bradley Drive connection. A tie into the El Dorado Multi Use Trail (EDMUT) to the signalized intersection of Diamond Springs Parkway and Missouri Flat Road and a 40-space parking lot for trail users would also be constructed. SR-49 (Diamond Road) would be improved to a 4-lane highway by widening to the west between Lime Kiln Road and Pleasant Valley Road (SR-49), and providing a new frontage road along the existing SR-49 roadway. The Sr-49 improvements require minor improvements and/or realignment of Black Rice Road, Happy Lane, and Lime Kiln Road.	<b>NOD</b>	
2008102093	District-Wide FEMA 2006 Storm Damage Repair Projects East Bay Regional Parks District --Alameda, Contra Costa The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement Number 1600-2010-0072-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, East Bay Regional Park District. The project is limited to repair of landslides at two locations in Alvarado Park. Site 1, a retaining wall with concrete piers, steel piles and wooden lagging will installed at the top of the bank to protect an existing maintenance road. A new riprap apron will be installed above the ordinary High Water Mark below the outlet of an existing	<b>NOD</b>

<b><u>Documents Received on Friday, May 27, 2011</u></b>			
	12-inch storm drain for energy dissipation. Construction activities will permanently disturb approximately 1,312 square feet of vegetation and will be limited to the upper banks, above the OHWM. At Site 2, a 3' by 3' trench will be excavated at the toe of the slope on the southern bank, and approximately 91.3 cubic yards of 1-ton and 1/2 -ton riprap will be keyed into the trench. The lower portion of the slope (approximately 774 square feet) will be excavated and backfilled with engineered fill material and compacted native soils.		
2009061099	Mixed Use Overlay and R-4, Maximum Density, Zone Hawthorne, City of Hawthorne--Los Angeles The proposed project consists of a mixed-use overlay designation that would allow density of up to 30 dwelling units per acre in mixed use developments and in R-4 (maximum density) zones in certain appropriate areas, and changes in land use designations for selected areas from industrial to commercial and from commercial to medium density residential uses.	<b>NOD</b>	
2010112014	700 Block of K Street Sacramento, City of Sacramento--Sacramento A mixed-use development with 137 residential units, 64,881 square feet of retail/restaurant/entertainment uses and a parking structure. The project would renovate the majority of the existing building facades along K Street on this fully developed site. The retail and restaurant uses would be located on the ground floors, with the upper floors of several of the buildings converted to residential uses. The south half of the half block, along the K/L Alley, would be demolished and a five-story residential building with a parking garage would be constructed. The implementation of the project would cause a substantial change in the significance of historical resources - the alley façade of the K/L Alley between 7th and 8th Streets.	<b>NOD</b>	
2010112046	New Brentwood Center Contra Costa Community College District --Contra Costa The project proposes the construction of a new education center, a satellite site of Los Medanos College, that would serve a maximum of 5,000 full- and part-time students. The center would have a total of 80 full-time and 200 part-time employees, including faculty and staff. As an education center, the proposed project would offer general education curriculum, but would not function as a full-service community college campus. Two, approximately 42,000-sf buildings would be located near the center of the project site for a total of approximately 84,000sf of classroom/office space. Each building would be two stories and approximately 35 feet in height.	<b>NOD</b>	
2010122013	Hayward Maintenance Complex Project Bay Area Rapid Transit District Union City--Alameda Acquisition of three parcels with four existing warehouses adjacent to BART's Hayward Yard for conversion to new BART maintenance facilities, construction of additional storage tracks for a maximum of 250 vehicles on undeveloped BART property, and related improvements and trackwork.	<b>NOD</b>

2011032030	Design Air Coastal Development Permit, Special Permit, & Conditional Use Permit Humboldt County Eureka--Humboldt Demolition of an 800 ft.^2 former service station office/garage and development of a new commercial structure (approximately 6,380 ft.^2 in size) to be occupied by an existing business specializing in heating systems and the fabrication and installation of rain gutters as well as the custom fabrication of sheet metal. Portions of the property which dedicated to parking and ingress/egress will be paved or resurfaced with A/C pavement. The parcel borders and contains wetlands. Consequently all development will be located within the wetland buffer (though no wetlands will be filled as part of this project). Wetland setbacks were determined using the "stringline method" (which authorizes new development to enjoy similar setbacks to those of existing development both on-site and in the vicinity). The project includes the restoration and development of several small wetlands that will be connected to a larger network of wetlands southeast of the property. A Special Permit is requested to consider allowing a modification to the size of the required loading space (a 10' x 34' space is proposed). Research & Light Industrial Uses such as metal-working shops and associated administrative offices are allowed with a Conditional Use Permit in the "CG" Zone. The project includes the following on-site mitigation measures: installation of bio-swales along the South Broadway and Eich Road frontages, as well as the creation/restoration of approximately 744 ft.^2 of wetlands to be connected to a larger network of wetlands southeast of the property.	<b>NOD</b>	
2011032056	Brentwood Capital Improvement Program 2011/12-2015/16 Brentwood, City of Brentwood--Contra Costa The project is the City's Capital Improvement Program (CIP) budget for fiscal years 2011/12-2015/16, which identifies proposed capital improvements and preliminary budgets for projects throughout the City over a five-year period. Capital improvements include a range of public works and infrastructure project to improve the quality of life for local residents and visitors. Proposed projects include: roadways, parks and trails, water, wastewater, drainage and community facility improvements, plus development-funded improvements throughout the City of Brentwood.	<b>NOD</b>	
2011041041	Conditional Use Permit/Variance 2011-01 (Benavides Academy Charter School) Farmersville, City of Farmersville--Tulare Construction and operation of a charter school for grades K-6. A Variance was also approved for reduced yard setback between buildings on the same site.	<b>NOD</b>	
2011042092	Farms to Fuel Project - PLP11-0010 Sonoma County Windsor, Santa Rosa--Sonoma The proposed project would involve constructing and operating a facility to collect organic waste that would otherwise be field-applied or hauled to a landfill, and processing the waste using anaerobic digestion to produce renewable natural gas (biomethane or biogas) that would be used as a source of energy for distribution to the Sonoma County Water Agency (Water Agency) and Pacific Gas and Electric (PG&E). Solids generated in the process would be used to produce commercially viable fertilizer.	<b>NOD</b>

2011059015	Minor Discretionary Permit 2011-02 (Mi Pueblo Grocery Store) Turlock, City of Turlock--Stanislaus The proposed project would authorize an approx. 37,000 square foot "Mi Pueblo" grocery store on this property. This project also includes a change in use of an approximately 32,000 square foot tenant space within the same commercial building, from "Light Industrial" to "Retail", thereby requiring additional parking. A new parking lot, located where the current storm water basin exists, would be constructed as part of this project to provide additional parking for the grocery store and the change in use from the current light industrial user.	<b>NOD</b>	
2011058274	STA-99 Pavement Resurfacing and Restoration Caltrans #10 Modesto, Turlock, Ceres--Stanislaus A pavement resurfacing and restoration project on State Route 99 in Stanislaus County from the Merced County line to the San Joaquin County line. Construction would occur on paved and improved areas within existing Clatrans right-of-way.  The purpose of the project is to restore the affected segment of State Route 99 to a good state of repair, so the roadway will require minimal maintenance. The project is needed to repair major structural distress to prevent further deterioration of the pavement.	<b>NOE</b>	
2011058275	Doherty Drive Storm Drain Outfalls Fish & Game #3 Larkspur--Marin The project is limited to the repair and replacement of existing storm drain facilities and the installation of new storm drain facilities. Six storm drain outfalls will be installed. Five will replace existing infrastructure and one will be new. Issuance of a Streambed Alteration Agreement Number 1600-2010-0338-R3 is pursuant to Fish and Game Code Section 1602.	<b>NOE</b>	
2011058276	Airport Neighborhood Community Center Site Acquisition Modesto, City of Modesto-- The project is acquisition of an existing duplex, with the intention to convert the duplex into a neighborhood center.	<b>NOE</b>	
2011058277	Caltrans, Highway 254 - Myers Flat Roadway Stabilization Project Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa --Humboldt The purpose of the proposed project is to restore the highway to its pre-damage condition under the Major Damage (Permanent Restoration) Program. The project includes improving drainage facilities, reconstructing 360 feet of roadway, and constructing a 226-foot long tieback wall on the west side of Highway 254. The project will also include the placement of metal beam guard railing and re-striping 520 feet of highway. Caltrans has determined that total project permanent impacts to waters of the U.S. and State will be approximately 12 feet <sup>2</sup> (4 linear feet). The temporary project impacts to water of the U.S. and State will be approximately 112 <sup>2</sup> (40.3 linear feet). The total disturbed soil area (DSA) for this project is estimated at 0.28 acres. The DSA is based on the footprint of the areas needed to reconstruct the roadway and install the wall and drainage system including access and staging areas. Since the impacts associated with the project are minor, no compensatory mitigation is required appropriate native vegetation. Caltrans'	<b>NOE</b>

contractor will be required implement Best Management Practices (BMPs) for construction and post construction phases of the project. Caltrans will utilize BMPs to provide erosion and sediment control and pollution prevention throughout the project area during construction. All graded areas within the project affected by the construction activities will be appropriately stabilized and BMPs will be implemented to ensure erosion is minimized and controlled. The project is tentatively scheduled for the period from March 1, 2011 to October 28, 2012; however, work within the drainages will only be conducted in the dry season (May 15th to October 15th).

2011058278	800 Block of K and L Streets Sacramento, City of Sacramento--Sacramento The Project consists of the construction of a new building on the currently-vacant parcels within the 800 Block of K Street combined with the construction of a new building addition to the Bel Vue, demolishing non-historic structures, on the project's parcels within the 800 Block of L Street. 800 Block of K Street Components: There will be approximately 12,000 square feet of retail space on ground level, and 144 residential units on levels two through six. The basement will include parking. There are no buildings currently on these parcels. 800 Block of L Street Components: The rehabilitated historic building and the new addition will be a single structure with a ground level parking garage and four levels above grade, for a total building size of approximately 82,000 gross square feet. The Bel Vue will contain 30 parking spaces and 13,000 square feet of retail space on ground level, and 56 residential units on levels two through four.	NOE

<b><u>Documents Received on Tuesday, May 31, 2011</u></b>			
2009032077	Tres Vaqueros Windfarm Repowering Project Contra Costa County Byron--Contra Costa NOTE: Extended Per Lead  The project involves "repowering" one of the two windfarms at the project site. Ninety-one wind turbines and their related infrastructure would be removed, to be replaced with up to 21 turbines and their related infrastructure. The make and model of the new turbine has not yet been decided, but they would likely be Gamesa G90 2.0 MW or Siemens 2.3-101 2.3 MW models. Installation of these turbines would increase the nameplate generating capacity of the repowered area from 29.1 MW to approximately 42 MW and increase energy production by approximately 38 percent.	<b>EIR</b>	07/19/2011
2011042068	Laguna Treatment Plant Driveway Widening Santa Rosa, City of Santa Rosa--Sonoma The project proposes to cap and abandon the existing northern inlet and storm drain in favor of routing water from the existing and new impervious surfaces on the northern portion of the driveway through a "over side drain" or curb inlet and into the ditch below. This will allow landscaped based treatment of the runoff and ground water recharge of the water from the northern side of the drive to occur. The existing drain inlet connected to the 42" concrete pipe currently serving the ditch would provide for water conveyance during large storm events and times of high water flows. Portions of the southern driveway expansion would continue to be served by the existing catch basin blind connected to the larger concrete storm drain while the areas further south along Llano Road will be served by a new curb drain which conveys any remaining water into the ditch below, also allowing land based treatment of the runoff and ground water recharge of the water from the southern side of the drive along Llano Road.	<b>MND</b>	06/29/2011
2011051081	Transit Center Atascadero, City of Atascadero--San Luis Obispo The City of Atascadero Public Works Department proposes the construction of a new transit center adjacent to the Colony Square development and the existing City Hall. The new transit center will replace the existing Regional Transit Authority of San Luis Obispo County (RTA) and Atascadero Transit (North County Shuttle) bus stop and shelter at Capistrano Avenue and Lewis Avenue. The proposed transit center would include accommodations for three on-street angled bus parking, and two feet bus shelters. Additional improvements include new streetscape sidewalks, lighting, and street trees. Additional bicycle racks for commuters and transit kiosks will be installed.	<b>MND</b>	06/29/2011
2011051082	Cuesta College - Trades and Technology Center Paso Robles, City of Paso Robles--San Luis Obispo The proposed project includes up to 17,500 sq. ft. of educational buildings to provide a community college "Trades and Technology Center" to support instructional programs for Cuesta College.	<b>MND</b>	06/29/2011

2011051083	Las Vegas/San Pedro Creeks Capacity Improvement Project Santa Barbara County Flood Control District Goleta, Santa Barbara--Santa Barbara The Santa Barbara County Flood Control District in partnership with Caltrans is proposing hydraulic capacity improvements along Las Vegas and San Pedro Creeks under Calle Real, Route 101, and the UPRR. The proposed project would increase the hydraulic capacity of the two creeks from a 10-year to a 25-year storm water event.	<b>MND</b>	06/29/2011
2011061002	Delhi North Annexation Delhi County Water District --Merced The proposed project is the annexation of 22 parcels totaling approximately 383 acres into the Delhi County Water District in order to extend water and sewer services to these parcels in the future. No construction of infrastructure is to be implemented as part of the project; it is only the annexation of land into the District. All land is to be annexed into the District is within the Delhi Community Plan boundary and is designated as various urban uses in that plan. Future construction of infrastructure or any other "urban" development will be subject to subsequent environmental analysis. An EIR was prepared and certified for the Delhi Community Plan. This EIR analyzed environmental impacts attributed to the conversion on land from predominantly agricultural uses to urban uses (e.g. biological, aesthetics, agriculture and cultural/historical), as well as other environmental factors in relation to community plans (traffic, geology, hydrology and etc.).	<b>Neg</b>	06/30/2011
1998052052	Pacific Herring Commercial Fishing Regulations Fish & Game Commission -- The project goal is to maintain healthy herring stocks in CA. Objectives for achieving this goal include: - Restore healthy age structures to stocks in need of rebuilding; - Avoid and/or minimize the harvest of two and three-year-old herring, many of which are first-time spawners; - Manage commercial harvest of herring to achieve a sustainable fishery; - Provide sufficient herring to conserve living resources of the ocean that utilize herring as a food source; - Provide sufficient herring to support recreational take.  Under existing law, herring may be taken for commercial purposes only under a fish revocable permit, subject to such regulations, as the Commission shall prescribe (Fish and Game Code Section 8550). Current regulations specify permit qualifications, permit validation requirements, permit limitations, permit areas, seasons, fishing quotas, gear restrictions, and landing and monitoring requirements.	<b>SIR</b>	07/14/2011
1993112027	River Islands at Lathrop Lathrop, City of Lathrop--San Joaquin Construction of a four lane, two structure bridge over the San Joaquin River within the City of Lathrop, san Joaquin County. The bridge may be built in phases, with the right bridge structure constructed initially.	<b>NOD</b>

<b><u>Documents Received on Tuesday, May 31, 2011</u></b>			
1999081019	Lagunitas Mixed Use Development Carpinteria, City of Carpinteria--Santa Barbara The project consists of 37 single family homes, 36 condominiums on 14 acres, the construction of 84,550 square feet of commercial/office with a 162,400 sq. ft. of parking space on 8.5 acres. Included are 2.5 acres of restoration/open space along the creek from property line to property line, with a 50 foot wide buffer zone. A temporary vehicle bridge will be built for the construction, and the final plan includes a permanent vehicle bridge and two pedestrian bridges. Also included is a sewer line that crosses the creek, three new 24 inch underground storm drain pipes, two storm water detention basins in upland areas, replacement of a 36 inch storm drain pipe with a 48 inch pipe, and three rip-rap outlet structures with headwall, and two will have ungrouted rock energy dissipating structures within the banks. An area near the Highway 101 will be set aside for while tail kite habitat.	<b>NOD</b>	
2000112054	Temporary Barriers Project, 2001-2007 Water Resources, Department of Lathrop, Tracy--San Joaquin The proposed project involves annual installation and removal of three flow-control temporary rock barriers installed at Middle River near Victoria Canal (MR), Old River near Tracy (ORT), and grant Line Canal near Tracy Boulevard Bridge (GLC). It also includes the bi-annual installation and removal of one temporary rock barrier serving a dual purpose of fish control and flow control in the Spring and Fall at the head of Old river (HOR)near the San Joaquin River. As an alternative to installing the HOR barrier in the spring, DWR may opt to install a non-physical barrier at the head of Old River, as was done in 2009 and 2010. In addition, the MR weir height shall be raised by one foot, and in 2011, the project would include replacement of the GLC culverts and culvert frames, and incidental sediment removal adjacent to the culvert structures at the GLC barrier. Also, a 3-month fish monitoring program (2011 Fish Monitoring Program) shall be implemented from March 15 through June 15, concurrent with operations of the NPB (when installed). The study includes tagging and releasing salmon and steelhead throughout the south Delta, installing an acoustic receiver network, implementing a mobile monitoring effort to find acoustic tags on the river bottom using global positioning system (GPS), and sampling , tagging, and releasing up to 100 predatory fish 9obtained though electrofishing and/or hook and line sampling). DWR will also design and implement the Head of Old River (HOR) Predator Study with the intent of improving salmon smolt survival past the HOR during spring outmigration. This study would be implemented in conjunction with operation of the NPB.	<b>NOD</b>	
2002042035	Revision of the Lafayette General Plan Lafayette, City of Lafayette--Contra Costa GP01-09: Amendments to the Housing Chapter of the Lafayette General plan (Housing Element) to accommodate the regional housing needs allocation established by the State Department of housing and Community Development. Key changes include revisions to the goals, policies and implementation programs, the inventory of housing sites, and background data.	<b>NOD</b>

2006102114	UTC Facility Site Closure Program EIR Santa Clara County San Jose--Santa Clara The proposed project entails the closure, general restoration, and remediation of the United Technologies Corporation - Pratt & Whitney Rocketdyne (UTC-PWR) San Jose Facility. Between 1959 and 2004, the facility was used to design and manufacture solid propellant rocket motors for the U.S. Department of Defense as well as the aerospace industry.	<b>NOD</b>	
2007082107	Freight Railroad Relocation and Lower Berryessa Creek Project Santa Clara Valley Transportation Authority Fremont, Milpitas--Alameda, Santa Clara The California Department of Fish and Game is executing Lake and Streambed Alteration Agreement Number 1600-2011-0087-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Santa Clara Valley transportation Authority, for culvert improvements on Toroges, Agua Fria, and Agua Caliente Creeks. Culvert improvements will be within the Valley Transportation Authority (VTA) and Union pacific Railroad (UPRR) right-of-way (ROW) from station 45+00 to station 102+00 in the City of Fremont, County of Alameda (approximately 750 feet west of Warm Springs Boulevard). At Toroges Creek, 39 linear feet of an existing culvert and channel will be reconstructed as a concrete box culvert under the railroad corridor. At Agua Fria Creek, the creek will be realigned and approximately 422 linear feet of existing concrete-lined channel will be converted to enclosed culvert, and 249 linear feet of abandoned concrete channel will be converted to an earthen bioswale. At Agua Caliente 249 linear feet of abandoned concrete channel will be converted to an earthen bioswale. At Agua Caliente, a second culvert will be added roughly parallel to an existing culvert to increase flood flow capacity.	<b>NOD</b>	
2008121051	Boulder Avenue Bridge Replacement Highland, City of Highland--San Bernardino CDFG is executing a Lake and Streambed Alteration Agreement (SAA #1600-2010-0138-R6) pursuant to Section 1602 of the Fish and Game Code to the protect Applicant, the City of Highland, represented by Mr. Lawrence A Mainez, 27215 Base Line, City of Highlands, State of California, 92346, Phone (909) 864-8732 Ext. 215. The Applicant is proposing to do the following: 1) replacing the existing bridge with a new bridge widened to four lanes, 2) the widening of Boulder Avenue, 3) improvements to existing pipe culverts 600 feet and 1,000 feet from the south abutment within City Creek, as well as the replacement and extension of the reinforced concrete box in Bledsoe Creek, 4) as well as to accommodate a trail within City Creek, which will not be done as a result of this project. A total of 0.26 acres of permanent impacts to jurisdictional streambed will result from the construction activities, and a total of 4.00 acres of temporary impacts to jurisdiction streambed will result from the construction activities.	<b>NOD</b>	
2010081015	Prop D - Cannon Road Agricultural/ Open Space Lands - ZCA 09-02/ZC 09-06/LCPA 09-05/SP 207(I)/SP 144(K) Carlsbad, City of Carlsbad--San Diego The proposed project consist of 1) a Zone Code Amendment (ZCA09-02) to create a new zoning classification, Chapter 21.209 - Cannon Road Agricultural and Open Space Zone (CR-A/OS) and amend Chapter 21.06 - Qualified Development Overlay Zone to incorporate a minor site development plan review process; 2) a	<b>NOD</b>

	Zone Change (ZC 09-06) to apply the new zone to several parcels of land located on the north and south sides of Cannon Road east of the I-5 Freeway and remove the Commercial/Visitor-Serving Overlay Zone; 3) a Local Coastal Program Amendment (LCPA 09-05) to implement the Zone Changed and Zone Code Amendments, and to amend sections of the Mello II Local Coastal Program (LCP) , Agua Hedionda LCP, and Carlsbad Ranch Specific Plan SP 207(I) for consistency with the provisions of the new zone; and 4) two amendments to existing Specific Plans (Carlsbad Ranch Specific Plan - SP 207(I) and Specific Plan 144(K) to ensure that provisions of the Specific Plans are consistent with the provisions of the new zone. The Cannon Road Agricultural and Open Space Zone is being created in order to implement the provisions of "Proposition D-Preserve the Flower and Strawberry Fields and Save Taxpayers Money" (Prop D) approved by the City of Carlsbad voters in November, 2006. Prop D applied to approximately 300 acres of privately owned lands located east of Interstate 5 along the north and south sides of Cannon Road including the existing strawberry and flower growing agricultural areas. Prop D placed a permanent open space designation on the lands.		
2010111073	WB State Route 91 Lane Extension and Auxiliary Lane Project Caltrans #12 Anaheim--Orange To alleviate weaving/congestion on State route 91 (SR 91) in the City of Anaheim, Orange County, the project proposes to extend a westbound (WB) lane from the northbound (NB) State route 55 (SR 55)/WB SR 91 connector through the Tustin Avenue Interchange and reconstruct the WB auxiliary lane from east of the NB SR 55/WB SR 91 connector to the Tustin Avenue off-ramp.	<b>NOD</b>	
2011041011	Edward C. Little Water Recycling Facility West Basin Municipal Water District El Segundo--Los Angeles West Basin Municipal Water District (West Basin) is proposing the Phase V Expansion of the Edward C. Little Water Recycling Facility (ECLWRF) located in the City of El Segundo. The proposed project would include the modification of various existing facilities and the construction of new treatment and support systems to meet the planned Phase V capacity expansion. The proposed project would increase treatment capacity from the existing 46.8 million gallons per day (mgd) to 72.2 mgd and would include expanding the Title 22 (pretreatment and filtration processes) recycled water system, the microfiltration (MF) treatment system, the reverse osmosis (RO)treatment system and ultraviolet (UV) disinfection treatment systems to meet the proposed increase in capacity, installation of ozone pretreatment process for the MF treatment system, and the upgrade to the support facilities that manage the waste-handling processes and various ancillary process capacities. The proposed project components would be constructed entirely within the existing footprint of the ECL WRF property.	<b>NOD</b>	
2011041039	Mission Plaza Riverside County --Riverside The acquisition of property, the demolition of existing structures, the redevelopment of the Mission Plaza shopping center and surrounding properties, infrastructure improvements to serve the new development, and the potential sale or lease of all or a portion of the Project by the redevelopment Agency for the County of Riverside to another public agency or a private party.	<b>NOD</b>

2011058285	<p>community changes. Each of the four reaches will contain three large wood elements and each element will have one to four pieces of large wood installed. There will be two unsecured site with two to three log clusters installed per site. Additionally, there will be two secured sites, with each site consisting of a log-vane structure with a rootwad, a log cluster, and a rootwad anchor. The purpose of the project is to contribute to the survival and recovery of federally and State endangered coho salmon in this watershed, as well as the survival and recovery of federally threatened steelhead, by increasing habitat complexity and pool frequency.</p> <p>Boggs Mountain Demonstration State Forest - Parking Lot Restroom Project Forestry and Fire Protection, Department of --Lake</p> <p>The project represents the replacement of an existing vault toilet (outhouse) with a restroom facility for forest visitors at Boggs Mountain Demonstration State Forest. The restroom will be in the same general location of the existing facility, within the main parking area (dirt and gravel surface) located at the entrance to the state forest. The BMDSF main parking area is located at the end of Forestry Road, 1/4 mile off CA hwy 175 and is adjacent to the Forest Office and the Boggs Mountain Helitack Station. The replacement restroom lies approximately 150 feet from the existing vault toilet. The existing vault toilet will be removed and the excavated hole will be backfilled with material excavated during the installation of the new restroom. Installation of the restroom requires the following: level and compact the 12'x 14' restroom footprint area, excavate a 150', 1' x 2' septic line trench, lay the septic line and backfill, install toilet and sink hardware components, and construct and enclosure structure. Plumbing the facility will require excavating a 180', 1'x1' trench across parking lot area to water access, laying the pipe and backfilling the trench. Only minor amounts of vegetation (grasses and forbes) will be disturbed during the construction.</p>	<b>NOE</b>	
2011058286	<p>Restore Sage Scrub and Grasslands Parks and Recreation, Department of --Orange</p> <p>This project combines several smaller weed control efforts on the inland side of interstate 5. Weeds to control include significant acres of artichoke thistle, sweet fennel, tamarix, pampas grass, veldt grass, and black mustard. Seed collection, propagation, and replanting in weed control areas are included in this project. Work will focus on areas immediately around the federally endangered Brodiaea filifolia. Targeted herbicide application will be the main control method for exotics. Broadcast prescribed burning will also be considered and used for further weed control in the grassland areas to control for invasive grasses and other exotics.</p> <p>DPR-approved standard project requirements have been incorporated into this project. A copy of these requirements may be obtained by submitting a request to the project Environmental Coordinator listed below.</p>	<b>NOE</b>	
2011058287	<p>801 K Space Reduction Resources Recycling and Recovery, Department of Sacramento--Sacramento</p> <p>Currently residing in space at 801 K Street under a Memorandum of Understanding with Department of Conservation. Scope of project is to complete and independent lease from Conservation and reduce the space currently occupied.</p>	<b>NOE</b>
