STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**

May 16 – 31, 2013

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **May 16 – 31, 2013**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Director

CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

USPS:

State Clearinghouse

2012-08	<p>Agua Caliente Band of Cahuilla Indians - APNs: 684-040-005, 006 Bureau of Indian Affairs --Riverside</p> <p>The subject property consists of two parcels of land, encompassing ~10.00 acres more or less, commonly referred to as the "Service/Delgado" property and Assessor's Parcel Numbers: 686-040-005, 006. The parcels are located within the boundaries of the Agua Caliente Indian Reservation and are completely surrounded by Tribal Trust and Allotted property. Currently, there is no specific use for the subject properties at this time; however the Tribe is actively managing land which contains cultural and natural resources unique to the Tribe and within its Reservation.</p>	BIA	06/14/2013
2012092031	<p>Nut Tree Airport Master Plan Update Solano County Vacaville--Solano</p> <p>The Master Plan update for Nut Tree Airport establishes guidelines for improving the Airport's facilities over the next 20 years. The Master Plan represents a comprehensive effort to identify the type and extent of facilities that are required to meet forecasted aviation demand and FAA standards for a public use airport designated as a general aviation airport in the National Plan of Integrated Airport Systems (NPIAS). The Proposed Project includes three phases of development that would occur over the next 20 years. These three phases of development represent the preferred alternative, as identified in the current airport layout plan (ALP) for Nut Tree Airport.</p>	EIR	07/01/2013

	archaeological resource; and (3) a Design Approval.		
2013051042	Val Rock Shell Canyon Imperial County --Imperial The proposed project is the amendment of an existing Plan of Operations (mining permit) and a (County) Reclamation Plan. The mining permit (BLM Plan of Operations) has been environmentally assessed per National Environmental Protection Agency regulations (NEPA) (CA-670-2010-02). Per CEQA, as lead Agency for State Mine and Reclamation Act (SMARA), we must analyze the entire project, which includes the mining operation as well as the reclamation of the site even though we do not issue the mining permit on federally-owned land. Based on a Memorandum of Understanding (MOU dated October 1992) between Bureau of Land Management (BLM) and the State of CA, the "Plan of Operations" can be utilized as the mining permit as required by SMARA. The "Operator" Val Rock, Inc. (Vulcan) has completed the required federal approvals, which includes a "Plan of Operations" and the "Decision Record".	MND	06/14/2013
2013052050	Crows Landing Road Bridge Over the San Joaquin River Stanislaus County Modesto--Stanislaus The purpose of the project is to replace the existing functionally obsolete (FO) bridge structure on Crows Landing Road over the San Joaquin River with a 670-700 ft long two-lane bridge (including one two-way turn lane for safe access to existing levee maintenance roads). The existing bridge is listed in the September 10, 2009 Caltrans Bridge Inspection Report as being FO. The existing bridge is also scour critical and is vulnerable to liquefaction at key pier foundations during a seismic event. Two seismic retrofit studies have been conducted on the bridge by separate parties; both concluding that it is more cost effective to replace the existing bridge than seismically retrofit and rehabilitate it. Thus, the existing structure qualifies for replacement under the LLSSRP and the HBP.	MND	06/14/2013
2013051039	Eagle Ranch Specific Plan & Annexation Atascadero, City of Atascadero--San Luis Obispo The proposed project consists of the development of residential, resort, recreational, highway commercial, small retail, agricultural, and open space uses, as well as associate infrastructure, on the 3,430(+/-) acre project site. The project would be guided by a Specific Plan and the project site would be annexed into the City of Atascadero. The Specific Plan has a buildout potential of 494 single-family residential lots; 93 multi-family dwelling units; up to 63 second units, a 100-room resort hotel; a 1.8 (+/-) acre Village Center featuring 15,000 sf of retail; a 15.2(+/-) acre highway commercial area containing a 200- room hotel with conference and event facilities and a sit down restaurant, a 10.7(+/-) acre public park, a 1.5(+/-) acre equestrian area, and 2,585(+/-) acres of open space. The Specific Plan would be developed in ~10 phases.	NOP	06/14/2013
2013051043	Loma Linda University Health (LLUH) Campus Transformation Project Loma Linda, City of Loma Linda--San Bernardino LLUAHSC, doing business as LLUH, is proposing the renovation of its campus. The LLUH Campus Transformation Project is a Master Plan that consists of a multi-phased development to construct new facilities and improvements to the	NOP	06/14/2013

	existing campus facilities in order to accommodate growth in the services provided, and to meet regulatory requirements. The proposed project would provide construction of new facilities, modernization of existing facilities, and replacement of the 1967 portion hospital structure in response to California SB 1953 Hospital Seismic Safety Act mandate. The existing campus and all improvements proposed as part of the Master Plan are in the City of Loma Linda; the City is the Lead Agency for CEQA purposes. It is anticipated that the Master Plan would be built out in phases over a 10-year period.		
2013051040	Pyramid Construction & Aggregate, Inc. Imperial County --Imperial The proposed project is the amendment of an existing Plan of Operations (mining permit) and a (County) Reclamation Plan. The mining permit (BLM Plan of Operations) has been environmentally assessed per National Environmental Protection Agency regulations (NEPA) (CA-670-2010-02). Per CEQA, as lead Agency for State Mine and Reclamation Act (SMARA), we must analyze the entire project, which includes the mining operation as well as the reclamation of the site even though we do not issue the mining permit on federally-owned land. Based on a Memorandum of Understanding (MOU dated October 1992) between Bureau of Land Management (BLM) and the State of CA, the "Plan of Operations" can be utilized as the mining permit as required by SMARA. 2013052048	Health Care Facility Improvement Projects for the CA Medical Facility and CA State Prison, Solano Corrections and Rehabilitation, Department of Vacaville--Solano Note: Shorten Review The proposed project includes renovations and additions to existing health care facilities, the construction of small new facilities, and associated infrastructure improvements all within the existing CA Medical Facility and CA State Prison, Solano. Specifically, the project at CMF includes construction of a new primary care clinic, emergency room, and medication distribution room totaling approximately 9,900 sf of new building space, and interior renovations. The project at SOL includes construction of a new facility care clinic, and four medication distribution rooms totaling approximately 17,000 sf of new building space and interior renovations. The projects do not include any new beds and would not increase inmate capacity. One addition employee would be hired at each institution.	Neg	06/03/2013
2013052049	Project #RPSTPLE-5161 (013) Solano Street Transportation Enhancement Project Corning, City of Corning--Tehama Improve downtown streetscape along Solano Street from Third Street to Hoag Street.	Neg	06/14/2013
1992100959	STATE WATER PROJECT COASTAL BRANCH PHASE II LOCAL FAC San Luis Obispo, City of SAN LUIS OBISPO--SAN LUIS OBISPO The project consists of constructing a new turnout facility that will connect the existing County Service Area No. 16 (CSA 16) water distribution pipeline to the existing Coastal Branch, Phase II State Water Project pipeline in Shandon, California. The turnout is designed to permit delivery of up to 100 acre-feet per	NOD

2012031082	ENV-2012-131-MND / 16990-17000 W. Sunset Boulevard Los Angeles, City of -- The proposed project is a Coastal Development Permit to allow for the construction of a five-story, 49-unit residential structure with a two-level subterranean garage within the Coastal Zone, an associated Haul Route for the export of approximately 44,500 cubic yards of materials and Mellow Act compliance. Revisions are based on comments received during the original comment period.	MND	06/17/2013
2013051045	ENV-2012-1881-MND / 3331 N. North Broadway Los Angeles, City of --Los Angeles A Conditional Use to permit 38 tandem parking spaces, as not otherwise permitted by the Commercial Corner regulations of the Code, and to permit a zero-foot non landscaped setback, as otherwise required by the Commercial Corner regulations of the Code, in conjunction with the construction, use and maintenance of a 47,300 sf, three-story medical office building with an adjacent four level parking structure on a 48,573 sf lot in the [Q]C4-1VL-CDO Zone. Existing retaining walls and concrete pavement on the site will be demolished.	MND	06/17/2013
2013051044	San Marcos K-8 School San Marcos Unified School District San Marcos--San Diego The District is proposing to construct a K-8 school for approximately 1,500 students on a 36-acre project site in the San Elijo Hills community. The proposed project would include various educational buildings, hard courts, play fields, and parking areas.	NOP	06/17/2013
2013052053	Pit 1 Hydroelectric Project 401 Water Quality Certification Amendment State Water Resources Control Board --Shasta The Applicant is proposing to amend the existing 401 Water Quality Certification to permanently eliminate or modify the requirement for flushing flows that may be detrimental to the Shasta crayfish (<i>Pacifastacus fortis</i>), which was listed as endangered under the Federal Endangered Species Act (ESA) (16 U.S.C Section 1531 - 1544) on September 30, 1988 (53 FR38460) and as endangered under the California ESA (Fish & Game Code Section 2050 2097) on February 26, 1988.	NOP	06/17/2013
2013052054	Lower American River Flow Management Standard Update Sacramento, City of Sacramento--Sacramento An amendment to the Water Forum Agreement, to include the Lower American River Flow Management Standard Update. The FMS Update is a strategy for flow and temperature management within the LAR that is proposed to preserve the fishery, wildlife, recreational, and aesthetic values of the LAR. The proposed FMS Update would implement a flow pattern in the Lower American River that is different than the Improve Pattern of Fishery Flow Releases included in the original Agreement. Therefore, implementation of the FMS Update qualifies as a "change condition" that warrants amendment of the Agreement by the Water Forum, which would be a discretionary action under CEQA. 2013051057	Solvang Senior Apartments Solvang, City of Solvang--Santa Barbara The project is a 45 unit senior apartment project in one building with 45 parking spaces. The site is an in-fill parcel. The project involves extension of a public street.	MND	06/19/2013
2013051048	State Route 67 Median Barrier Feasibility Safety Project Caltrans #11 Poway--San Diego Caltrans is proposing three build and one no-build alternative to be studied for this project. The proposed project is approximately 13 miles in length and proposes to study the feasibility of installing a median barrier to reduce the number and severity of cross centerline accidents. Alternatives 1 and 2 each have three types of barrier as options: either a concrete barrier, high tension cable barrier, or metal barrier rail. Alternative 1 proposes removing the existing inside lane to install the median barrier Alternative 2 proposes to install a median barrier on the existing centerline. Alternative 3 proposes to remove a lane and install a 12' median buffer. Alternative 4 is the no-build alternative.	NOP	06/18/2013
2013051049	Central Metal Expansion (Project No. R2004-00324-(2)/CUP No. 200500040/ENV No. 200500053) Los Angeles County --Los Angeles Central Metal is a currently operating scrap metal processing facility at 8201 Santa Fe Avenue in the unincorporated communities of Florence-Firestone and Walnut Park. The project site is 11.28-acres, which includes the eastern 4-acre portion which currently operates as a scrap metal processing facility and western 7.28-acre portion which is currently used for truck storage. The proposed project expands the operations of the scrap metal facility operations to include the western and southern portion of the project site. The volume of scrap metal processed is projected to increase from 50,000 annual tons up to 80,000 annual tons. The site is currently developed with two main structures (a 46,500 sf warehouse and a 2,379-sf office building). The site is enclosed by a solid metal fence that varies in height from 8 to 12 feet. A railroad spur runs through the site diagonally from its northwest corner to its southeast corner. Currently, the facility has authorized hours of operation Monday to Friday from 7:30 AM to 4:00 PM and the proposed operations include limited operations on Saturdays from 7:30 AM to 2:00 PM. The facility is expected to employ approximately 20 workers per shift, up to 2 shifts per day. The existing scrap metal facility was authorized under CUP No. 01-262 to operate on the eastern 4-acre portion of the site in September 2002 for a grant term of ten years, and the applicant is requesting the continuance of the existing facility.	NOP	06/18/2013

2013032053	Ord Bend Boat Launch Rehabilitation Glenn County --Glenn Ord Bend Boat Launch Rehabilitation includes restoration of the existing boat launch facility and instream access. Removal and replacement of the existing two-lane boat launch ramp will utilize push slab construction techniques. The existing backwater channel will be dredged. The rest rooms will be rehabilitated and new fixtures installed. Dredged material will be placed approximately 1,100 feet from the boat ramp. Additional project information/documentation is included.	NOD	
2013032067	Justin Gaffney - UP1306 - Use Permit for an Overheight/Size Accessory Building (Hanger) Del Norte County --Del Norte The property owner proposes to construct a private airplane hangar on his property for storage of his personal aircraft in conjunction with Gasquet's Ward Airfield. The subject parcel is located on Forks Placer Mine Road which adjoins Ward Field. The zoning for the subject parcel is single family residential; the proposed airplane hangar is considered an accessory to the principal (residential) allowed use. The standard height and size restrictions for accessory buildings is 16-feet in height and 1,200 sf in area; exceeding these limits requires a use permit. The proposed hangar is indicated to be 3,360 sf in area and 15-feet in height.	NOD	
2013058271	Determination of DNA-based Fecal Marker Aging Char. for Use in Quant. Microbial Source Tracking State Water Resources Control Board -- This is a research project that would gather data and understanding regarding how fecal material from human, cow, and gull change in different water and sediment matrices in California. Such information will enable quantitative microbial source tracking that is important for pollution remediation and risk assessment.	NOE	
2013058272	Autonomous System for Measuring Microbial Water Quality Indicators State Water Resources Control Board -- This research will upgrade an existing automated instrument from an open-ocean design to a vehicle-based system, and develop a novel qPCR module that can rapidly test for multiple targets at once and accurately quantify them in situ. This will allow beach managers to more quickly identify and remediate the problem.	NOE

2000021015	New San Diego Central Courthouse Project Administrative Office of the Courts San Diego--San Diego The AOC will construct and operate a new courthouse for the Superior Court. The facility will include as much as approximately 750,000 square feet for 71 courtrooms and other improved facilities. Following construction of the new courthouse, the AOC will demolish the existing County Courthouse and Old Jail. The purpose of this addendum is to disclose and evaluate the AOC's deletion of a tunnel between the proposed courthouse and the County's existing Central Jail and the addition of several bus trips per day for the Sheriff's transport of in-custody detainees from the jail to the new courthouse.	ADM	06/21/2013
2012061066	Affordable Housing Land Use and Zoning Designation Project Diamond Bar, City of Diamond Bar--Los Angeles In 2011, the Diamond Bar City Council adopted its 2008-2014 Housing Element update, which was subsequently accepted by the California Department of Housing and Community Development (HCD). Implementation of the approved Housing Element requires that the City take several actions to bring its General Plan and Development Code in compliance with state laws addressing affordable housing. Specifically, the "Project" would involve amending the City's General Plan (including its Land Use Plan Map) and Development Code (Title 22 and including its associated Zoning Map) to establish a new multi-family residential development commensurate with the City's required housing obligation (per state law), including that area needed to accommodate provisions for lower-income housing. 2013051064	Ducor Nitrate Exceedence - Remediation/Water Supply Project Ducor Community Services District --Tulare The Project includes replacement of the existing south well, with a new well at a new 0.44 acre well site (APN: 321-080-075). If water without Hydrogen Sulfide is found, the well will be equipped with a pressure tank and connected into the water distribution system. If Hydrogen Sulfide is found, the well will pump thru about 1,700 feet of 8 inch pipeline along the east side of Carlisle Road to connect to the existing south storage tank and water system. Both well options include installation of a pump, chlorinator, electrical equipment with housing and fence at the new well site, replacement of old water meters and gate valves on the Districts' existing water mains located with Ducor roads & alley ways. The old north well (#2) & the old south well (#3) will be destroyed. Construction of these facilities will take place within the Ducor Community Services District.	MND	06/21/2013
2013052063	Arcata Bay Shellfish Mariculture Facility Humboldt Bay Harbor Eureka--Humboldt Hog Island proposes to establish a shellfish mariculture operation at an existing pier facility and an approximately 3.5-acre adjacent upland site. The existing pier will be used for loading/unloading, and approximately 15,000 sf to the north side of the pier will be used to moor floating upwelling systems (FLUPSYs) and nursery rafts. The upland building, covered work area, equipment storage area, parking area, loading facilities, and septic mound system will utilize up to 20,000 sf. The septic will be approximately 500-800 sf. Upland facilities include a shellfish hatchery, a seed setting facility, wet storage tanks, a sorting area, office, and employee restroom and break room; a 20- by 60-ft greenhouse for microalgae culture; a 2,000-gallon water storage tank, parking, and a stormwater infiltration area.	MND	06/21/2013
2013051063	EEMP Grant Riverside Avenue Restoration and Enhancement Project Paso Robles, City of Paso Robles--San Luis Obispo The proposed project includes street, sidewalk and drainage improvements on Riverside Avenue between 13th Street and 17th Street. These improvements will contour Riverside Avenue to drain toward the west side of the street to bioswales that will be installed between the street and the sidewalk. Additionally, the project includes completing sidewalk improvements along the west side of the street. Thirty street trees will be installed as well as bioswale landscaping. Bike lanes will be striped on both sides of Riverside Avenue. The project also includes reconstruction of an existing concrete drainage swale that conveys storm water runoff from streets to the west of the project upstream to the Salinas River.	Neg	06/21/2013

1996052075	South Sacramento Corridor Light Rail Project Phase 2 Extension Project Modifications Sacramento Regional Transit District Sacramento, Elk Grove--Sacramento To construct a 368-foot pedestrian bridge (Deer Lake Pedestrian bridge) over Unionhouse Creek to provide access from Deer Lake Drive to the proposed Franklin Light Rail Station for the South Sacramento Corridor Phase 2 Project.	NOD	
1996082016	Tuolumne County General Plan Update Tuolumne County On December 26, 1996, the Board of Supervisors certified an environmental impact report (EIR) for the Tuolumne County General Plan Update. The EIR for the General Plan Update was prepared as a program EIR under the provision of Section 15168 of the State CEQA Guidelines. As a program EIR, the document adopted the Board of Supervisors adequately addressed the potential environmental impacts associated with comprehensive update of the County's constitution for growing including certain implementation activities and provided for streamlining of the environmental review process for projects proposed subsequent to the certification of the EIR.	NOD	
2003022082	Dublin Ranch West/Contra Costa County Parcel Dublin, City of Dublin--Alameda, Contra Costa The project involves the construction of up to 1,023 residential units (including low, medium, and medium-high density homes) in 6 neighborhoods on 91.7 acres. Additional, there will be internal open space areas on 4.1 acres, 2 neighborhoods on 7.1 acres, a public use site on 1.3 acres, a storm water detention basin and storm water outfall on 2.9 acres, trails on 1.9 acres, and 2 access bridges and roadways (including widening of a portion of Tassajara Road) on 4.0 acres. The total acreage of the Project area is 159.0 acres, of which 137.9 acres will be permanently impacted, 15.7 acres will be temporarily impacted, and 5.4 acres have been avoided and will not be impacted by the Project construction activities. The Project will result in permanent impact to 136.8 acres of California tiger salamander habitat; Project-related impacts are expected to result in the take of California tiger salamander, a species protected by CESA. CDFW is issuing the ITP referenced above as a responsible agency under the California Environmental Quality Act (CEQA).	NOD	
2006052076	Modesto Wastewater Master Plan Update Modesto, City of Modesto--Stanislaus To construct two direction borings under the Tuolumne River and install two 18 inch diameter sewer lines.	NOD	
2008091026	Topaz Solar Farm (Optisolar) Conditional Use Permit (DRC2008-00009) San Luis Obispo County --San Luis Obispo The Project includes installing and operating arrays of photovoltaic modules and associated electrical production and transmission infrastructure. The Project will tie directly into the existing Pacific Gas and Electric Morro Bay/Midway 230 kV transmission line. Project construction will take approximately three years. The Project will result in impacts to 3,510 acres of San Joaquin Kit fox habitat. The Project is expected to result in incidental take of San Joaquin kit fox, which is designated as a threatened species under the California Endangered Species Act.	NOD

2010101061	Chino Desalter Phase 3 Expansion Project Chino Basin Municipal Water District Ontario--San Bernardino The California Department of Public Health (Department), as a Responsible Agency, will be providing funds for this project from the Proposition 50 Program to Inland Empire Utilities Agency (IEUD) which is currently a member of the Chino Basin Desalter Authority. IEUD proposes expansion of treatment facility Chino 1 Desalter from 12.6 mgd to 14.2 mgd and Chino 2 Desalter from 10 mgd to 20.5 mgd with reverse osmosis and ion exchange treatment, construction of the Chino Creek Wellfield and expansion of the Chino II Desalter Wellfield, and construction of 2.6 miles of 24" and 30" diameter raw water pipeline and appurtenant structures.	NOD	
2011081063	Jurupa Community Services District-Rubidoux Community Services District Interconnection Booster Pump Station and Pipeline Project Jurupa Community Services District --Riverside The California Department of Public Health (Department) is a responsible agency for this project. The Department's Safe Drinking Water Proposition 50 Program is providing state funds for the project. The Rubidoux Community Services District proposes to construct approximately 4,600 feet of 24-inch diameter pipeline, 300 feet of 16-inch diameter pipeline and interconnection booster station.	NOD	
2012071076	Wasco State Prison Reception Center Solar Project General Services, Department of Wasco--Kern The Proposed Project is a solar PV power generation system for Wasco State Prison Reception Center. The Proposed Project would be located on approximately 15 acres. The site corresponds to a portion of Section 8, T27S, R24E (MDB&M) of the Wasco SW, CA 7.5-minute quadrangle. The solar array would convert incident sunlight to direct current (DC) electrical power which would then be converted to alternating current (AC) by four centrally-located inverters before being delivered to the WSPRC owned distribution system.	NOD	
2012082046	Middle Fork American River Project Relicensing Placer County Water Agency --Placer, El Dorado Placer County Water Agency (PCWA) owns and operates the Middle Fork American River Project (MFP) under a 50-year Federal Energy Regulatory Commission (FERC) license that expired on February 28, 2013. On March 7, 2013, FERC issued an order authorizing PCWA to continue to operate the MFP under an annual license that is automatically renewed until action is taken by FERC on PCWA's Application for New License filed on February 23, 2011. Using FERC's Integrated Licensing Process, PCWA is seeking the renewal of its license to continue operation and maintenance of the MFP. The project under consideration is PCWA's operation and maintenance of the MFP under proposed conditions to be included in the new license issued by FERC. Compliance with CEQA is necessary to support PCWA's Board of Directors future discretionary action of accepting the new license issued by FERC.	NOD

2013032065	<p>Runnymede Storm Drain Project Phase II and Repair of the O'Connor Pump Station Outfall Structure Project East Palo Alto, City of East Palo Alto--San Mateo</p> <p>The action which is the subject of this Notice of Determination is the approval by the East Palo Alto City Council on May 21, 2013 of an Initial Study for the Runnymede Storm Drain Phase II and Repair of the O'Connor Pump Station Outfall Structure Project. The project proposes to excavate accumulated sediments and widen the Runnymede drainage ditch, install new culverts under an existing footpath, install an additional footpath with culverts underneath, complete the box culvert outfall which feeds the Runnymede drainage ditch at the north end and repair the O'Connor Pump Station outfall structure.</p>	NOD	
2013041034	<p>Expansion of Dry Creek Extension Basin Fresno Metropolitan Flood Control District Fresno--Fresno</p> <p>This project is for the expansion and improvement of the Dry Creek Extension Basin. The District acquired a 20 acre parcel next to the expansion area and material is being removed to create storage for stormwater. An additional 23 acres is needed for the development of the property into a function detention basin. The expansion will increase storage to 795 acre-feet. The ability to improve the flood routing system upstream of this location is restricted by the flow capacity downstream of the Dry Creek Extension Basin. The added capacity of the Dry Creek Extension Basin Expansion will create sufficient flood routing capacity. When possible, water will be stored in the detention basin for groundwater recharge.</p>	NOD	
2013042017	<p>Land Use Permit for a Proposed AT&T Free-Standing Telecommunications Facility Contra Costa County Martinez--Contra Costa</p> <p>The applicant requests approval of a land use permit to establish an AT&T telecommunications facility on an undeveloped lot. The project for the installation of a 30-foot tall free standing telecommunication facility disguised as a monopine tree. The proposed project includes the installation of nine panel antennas, fifteen remote radio units, two surge protector dome units, and one 230-sf equipment shelter. The project area is located on top of a hill directly south of the intersection of Franklin Canyon Road and Cummings Skyway. Access is provided via an unpaved road leading eastwards from the eastern edge of the southern terminus of Cummings Skyway.</p>	NOD	
2013042020	<p>Moore Street - Russian River Bridge Seismic Retrofit Project Mendocino County Ukiah--Mendocino</p> <p>The Mendocino County Department of Transportation, in conjunction with Caltrans and FHWA proposes to seismically retrofit the Moore Street Bridge (Bridge # 10C-0048) over the Russian River in Mendocino County. Proposed seismic improvements include installation of shear keys and catcher blocks at each pier, requiring construction of additional concrete supports connected at the top of each bent cap or pier wall. In addition, large diameter Cast-in-Drilled-Hole (CIDH) piles will be placed behind both abutments to absorb a portion of the longitudinal seismic forces. The project will also include pavement rehabilitation of the approach roadways on both sides of the bridge. Along with seismic retrofit work, the proposed project will also include placement of Rock Slope Protection (RSP) around Piers 2 and 3 as a scour countermeasure. Construction staging will occur</p>	NOD

2012091050	2040 Regional Transportation Plan & Sustainable Communities Strategy Santa Barbara County Association of Governments Buellton, Carpinteria, Goleta, Guadalupe, Lompoc, ...--Santa Barbara The proposed 2040 RTP-SCS will guide the development of the Regional and Federal Transportation Improvement Programs as well as other transportation programming documents and plans throughout Santa Barbara County. Specifically the project is intended to develop the region's goals and policies for meeting current and future mobility needs and identify programs, actions, and a plan of projects intended to address these needs consistent with adopted goals and policies. The 2040 RTP-SCS includes a newly required element called the Sustainable Communities Strategy (SCS) pursuant to the requirements of SB 375. Accordingly, the 2040 RTP-SCS identifies transportation improvement projects and a land use scenario that would effectively meet the greenhouse gas emissions requirements of SB 375.	EIR	07/12/2013

Schulz - Sonoma County Master Plan Implementation Project Sonoma County Windsor, Santa Rosa--Sonoma This proposed project involves the installation of Runway Safety Areas (RSAs) and associated changes to be in compliance with the Federal Aviation Administration design standards required by 14 CFR Part 139 RSAs. The project entails grading, filling, and paving for construction of runway extensions, blast pads, aprons, taxiways, access roads, and associated RSAs occurring over two phases.	NOD	
2012041010	Wastewater Flow Re-Routing Project Templeton Community Services District Paso Robles--San Luis Obispo The Templeton Community Services District proposes a change (project change) to the proposed pipeline route for its Wastewater Flow Re-routing Project (MND), which was approved by TCSD on May 22, 2012. A Notice of Determination for the Project was filed on May 25, 2012. The proposed pipeline has been changed in two locations as shown below. The route has been shifted for a segment along the railroad tracks to follow Marquita Avenue west to La Cruz Way and south to Cow Meadow Place, turning back east up a driveway to resume the railroad alignment. Along this alignment where existing mature oak trees canopy over the right of way, the pipeline will be bored if necessary to avoid tree roots. The second change shifts a segment between Main Street and US 101 south crossing open fields to a new location where boring under the freeway for the pipeline will occur. The proposed changes are to pipeline alignments and the changes do not alter the characteristics of the remainder of the Project.	NOD

2011032066	Downtown San Francisco Ferry Terminal Expansion Project San Francisco Bay Area Water Emergency Transit Authority San Francisco--San Francisco The San Francisco Bay Area Water Emergency Transportation Authority is considering improvements to the existing Ferry Terminal in downtown San Francisco. There are two alternatives: the No Action Alternative and the Action Alternative. The Action Alternative, or proposed project, includes expansion and improvement of the Ferry Terminal at the Ferry Building to accommodate construction of three new gates and overwater berthing facilities, in addition to supportive landside improvements, such as additional passenger waiting and queuing area, and circulation improvements. The proposed construction is scheduled to commence as early as 2014 and be completed by 2020. The project is proposed to support existing and planned future water transit services operated by WETA, as well as WETA's emergency response operations.	EIR	07/12/2013				
2012092019	Camino Ricardo Subdivision Moraga, City of Moraga--Contra Costa The proposed Camino Ricardo Subdivision would consist of an infill development of 26 single-family homes on a 14.26-acre hillside site in the center of the Town of Moraga. The site is located within the planning area of the Moraga Center Specific Plan (MCSP). The two-story detached homes would range in size from approximately 2,800 sf to 3,200 sf and would be located on lots of varying shapes ranging in size from 8,028 sf to 22,657 sf, with an average size of 12,593 sf. 	Denniston Creek between the Denniston Water Treatment Plant and the Denniston Reservoir to improve water quality for the surrounding habitat and reservoir.		
2010091030	County of San Diego Wind Energy Ordinance San Diego County --San Diego The project proposes amendments to the County of San Diego Zoning Ordinance for wind energy systems. The amendments consist of clarifications, deletions, and revisions to provide an updated set of definitions, procedures, and standards for review and permitting of wind energy systems. The proposed project includes the allowance of small wind turbine projects and metrological facilities that meet the zoning verification. The project also updates the requirements for large wind turbine projects which require Major Use Permits. A General Plan Amendment is included with the ordinance amendment.	NOD
