STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**

October 1 – 15, 2012

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **October 1 – 15, 2012**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Director

CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

USPS:

State Clearinghouse
P.O. Box 3044
Sacramento, CA 95812-3044

OR

USPS/Courier Service / Hand Deliveries:

State Clearinghouse
1400 Tenth Street, Room 113
Sacramento, CA 95814

INFORMATION AVAILABLE ON-LINE

The 2011 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

Environmental Document Filings with the State Clearinghouse 1999-2011

All CEQA documents filed with the State Clearinghouse are available for viewing on the internet at www.ceqanet.ca.gov.

<u>Documents Received on Monday, October 01, 2012</u>			
2012102004	Use Permit Application No. PLN2012-0006 - Maring Private Airport Stanislaus County --Stanislaus Request to establish a private airport, including three (3) airplane hangars totaling 7,300 sf and a 2,800 foot runway, on two (2) parcels totaling 97+/- acres.	CON	10/30/2012
2012082037	Watmaugh Road Bridge Replacement Project Sonoma County --Sonoma Caltrans and Public Works proposes to replace the existing Landmarks status Warren pony truss bridge at Watmaugh Road over Sonoma Creek with a 32-ft wide concrete bridge. DTPW proposes to preserve the existing structural steel and include it as a detail on the new structure.	EIR	11/14/2012
2012101001	General Plan/Zoning Amendments No. 2011-108; Land Division No. 2011-109 Mariposa County --Mariposa An equal exchange of 34.69 acres of land zoned and classified Mountain Home (MH) and Residential, respectively, with adjacent land zoned and classified Agriculture Exclusive and Agriculture/Working Landscape, respectively. The 141.96 project site would then be divided into two parcels; the 34.69 acres with the new MH and Residential classification would be one parcel, and the 102.27-acres that would all be rezoned AE and classified Agriculture/Working Landscape would be a Remainder.	MND	10/30/2012
2012101002	CUP 3364: Allow an Exploratory Oil/Gas Well with Production Facility in the AE-20 Zone District Fresno County --Fresno This proposal entails the drilling of an exploratory petroleum oil and natural gas well on a 37,500 sf portion of a 116.93-acre parcel. If exploratory drilling is not successful, the well will be plugged and abandoned in compliance with the CA Department of Conservation, Division of Oil, Gas and Geothermal Resources regulations. If oil and/or gas is discovered, a production facility will be established on the project site, and a secondary exploratory well may be drilled on the project site utilizing directional drilling techniques. This secondary exploratory well would utilize the same production facility established for the first exploratory well.	MND	10/30/2012
2012101006	Colton Senior Housing Project Colton, City of Colton--San Bernardino A 120 unit affordable replacement senior housing project (in-fill). Reconstruction of a recently demolished senior housing development adjacent to the City of Colton Civic Center.	MND	10/30/2012

<u>Documents Received on Monday, October 01, 2012</u>			
2012102003	Klayko Residence Santa Clara County Monte Sereno--Santa Clara This application is for a Building Site Approval with Grading Approval and Design Review Exemption to construct a new 4,500 sf single family residence including attached 3 car garage with associated driveway and clear-span bridge crossing tributary of San Tomas Aquino Creek (avoiding top of bank). Bridge improvements include support on a drilled pier and grade beam foundation and armored with 12 to 18 inch hard rock rip rap 15 ft. on each side of the bridge.	MND	10/30/2012
2011011027	General Plan Amendment No. GPA 09-003/Zone Change No. PZ 09-004 and Use Permit No. PSP 10-062 for Pena's Material Recovery Facility & Transfer Station Tulare County --Tulare 1) General Plan Amendment to the Culter-Orosi Community Plan to change the land use designation of ~6.77 acres of an 18+/- acre site from Residential Reserve to Industrial and the remaining 11.3 acres of the site from Industrial Reserve to Industrial; 2) Zone Change on the same 18.01 acres to change the zoning from the AE-20 (Exclusive Agricultural - 20 acre minimum) Zone to the M-1 (Light Industrial) Zone; 3) Special Use Permit to expand a solid waste recycling facility, now existing on the site, to increase capacity from 500 tons per day to 2,000 tons per day (increasing processing volumes of construction & demolition debris, inert materials & green waste), include commercial recycling for business & multi-family residences, process co-collected residential green waste with food waste, change a temporary household hazardous waste collection facility to a permanently facility, add processing of commercial food waste & a biomass gasification unit.	NOP	10/31/2012
2012052074	Targeted General Plan Amendment and Zoning Ordinance Update El Dorado County Unincorporated--El Dorado The County of El Dorado is proposing a limited number of targeted amendments to its 2004 General Plan and the adoption of a comprehensive update to the Zoning Ordinance. Targeted General Plan Amendments mostly consist of proposed policy revisions for the Land Use Element; Transportation and Circulation Element; Public Services and Utilities Element; Public Health, Safety and Noise Element; Conservation and Open Space Element; and Agriculture and Forestry Element and Economic Development Element. The proposed comprehensive Zoning Ordinance Update consists of revising the zoning maps and text to bring them into conformance with the General Plan.	NOP	10/30/2012
2012101003	Back Bay Landing Project Newport Beach, City of Newport Beach--Orange The proposed project involves various legislative approvals for the future development of the Back Bay Landing Project (the "proposed project"), which is proposed to be an integrated, mixed-use waterfront village on 6.974 acres in the City of Newport Beach.	NOP	10/30/2012

<u>Documents Received on Monday, October 01, 2012</u>			
2012101004	Warner Avenue Widening Santa Ana, City of --Orange The project would widen Warner Avenue from Main Street to Grand Avenue, from the existing variable ROW to a consistent 110-foot ROW. Warner Avenue would have six 11-foot lanes, 14-foot raised landscaped media, 5-foot bike lanes, 4-foot parkways, and 6-foot sidewalks. The project requires City acquisition of 35 full parcels and a portion of 25 parcels.	NOP	10/30/2012
2012101005	Tentative Parcel Map to Subdivide One Lot into Three Buildable Lots Malibu, City of Malibu--Los Angeles The proposed project consists of the subdivision of one legal lot with a gross lot area of 5.93 acres and a net lot area of 5.16 acres into three buildable lots. The net lot area of each buildable lot will be greater than 1.5 acres.	Neg	10/30/2012
2011031028	Fresno North Walmart Expansion Fresno, City of Fresno--Fresno Note: Response to Comments. The proposed project consists of the expansion and alteration of the existing 159,376 sf Walmart store. The store would be expanded by a maximum of 37,874 sf to 197,250 sf. The expanded store would retail general merchandise and groceries, and operate 24 hours a day.	Oth	
1988021025	EL MONTE SAND PIT; P86-091/R86-004; LOG # 86-14-94 San Diego County The project is a Minor Amendment to a Reclamation Plan. The applicant's request is to modify the reclamation plan to allow backfilling with a portion of the existing pond area and to revise the revegetation plan to emphasize the establishment of natural habitats.	NOD	
2001071065	Stream Gaging Station Maintenance Project Water Resources, Department of --Madera, Merced, Stanislaus To authorize an existing gaging station and install a water quality probe in the Eastside Bypass.	NOD	
2001071065	Stream Gaging Station Maintenance Project Water Resources, Department of --Madera, Merced, Stanislaus To remove and replace an existing streamgage station in the Stanislaus River.	NOD	
2004082014	Yuba River Levee Repair Project Three Rivers Levee Improvement Authority Marysville--Yuba To remove trees, stumps and roots at the toe of the levee and establish a 20-foot operations and maintenance (O&M) corridor, remove existing fence and install a minimum six-foot high new chain link fence with gates at the edge of the O&M corridor; demolish and remove an existing three-foot high non-engineered rock retaining wall; and relocate two power poles from the toe of the levee to just outside of the 20-foot O&M corridor.	NOD

2005101047	Pipeline Maintenance Program EIR Santa Clara Valley Water District San Jose, Santa Clara, Morgan Hill, Hollister, Campbell--Santa Clara The Operator proposes to flush, disinfect, de-chlorinate, and monitor wells and pipelines for three pump stations. The California Department of Fish and Game (DFG) is executing a Lake and Streambed Alteration Agreement Number 1600-2012-0280-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Vanessa De La Piedra / Santa Clara Valley Water District.	NOD	
2007081125	San Joaquin River Restoration Program Water Resources, Department of Fresno, Firebaugh--Fresno, Madera, Merced, Tulare, Kern SJRRP will implement the Stipulation of Settlement (Settlement) in NRDC et al. v. Kirk Rodgers et al., consistent with the San Joaquin River Restoration Settlement Act (Act) (Public Law 111-11). The Settlement and the Act authorize and direct specific physical and operational actions (such as flow releases, channel/bypass modifications, salmon reintroduction, fish screens, etc.) consistent with the Restoration and Water Management goals of the SJRRP. All project-level actions addressed in this PEIS/R (release, conveyance, and recapture of Interim and Restoration flows; related monitoring and management actions; and conservation measures.) will be undertaken by reclamation, and the effects of these actions are the sole responsibility of Reclamation. DWR serves as the CEQA lead agency for the SJRRP, although DWR is not taking any discretionary action for the project-level actions analyzed in the PEIS/R.	NOD	
2008102079	Northside Bicycle Path Project El Dorado County --El Dorado The 35-acre Northside Bicycle Path Project will construct a 2-mile long multi-use bicycle and hiking trail adjacent to Highway 49 and 193. The project is located in the community of Cool. The purpose of the project is to provide a safe pedestrian and bicycle route between elementary schools, community centers, and residential/commercial centers.	NOD	
2009032097	Natomas Levee Improvement Program, Phase 4a Landside Improvements Project Sacramento Area Flood Control Agency Sacramento--Sacramento, Sutter To remove and replace an existing pump with support frames from the channel and waterward berm; remove and replace an existing discharge pipe through the levee and on the landward levee toe.	NOD	
2009071022	West Kern Water District Groundwater Banking Project West Kern Water Agency --Kern The California Department of Public Health (Department), as the responsible agency, will be issuing a water supply permit. The West Kern Water District proposed project includes the development of additional water recharge areas and establish new domestic water supply sources for West Kern Water District.	NOD	
2009091121	06-FRE 180 PM 77.1 Caltrans #6 --Fresno To remove the SR180 (East Kings Canyon Road) bridge (No. 42-0074) over the Kings River Overflow channel and replace it with a wider, concrete slab bridge (No. 42-0437) along the existing roadway alignment and profile.	NOD

2011042097	Central Valley Independent Network Fiber Optic Communications Network Project Public Utilities Commission Merced--Merced To attach a 4-inch diameter steel casing pipe to the south side of the State Highway 20 (Colusa Highway) Bridge that will contain fiber optic cable.	NOD	
2011092028	Aptos Village Project Santa Cruz County --Santa Cruz The project proposes to construct mixed-use commercial and residential development (including a maximum of 63 residential units and 75,000 square feet of commercial space) for the core area of the Aptos Village, as identified in the Aptos Village Plan, adopted February 23, 2010.	NOD	
2011121077	Sheep Creek Channel Invert Restoration San Bernardino County --San Bernardino The upper reaches of Sheep Creek are subject to severe erosion during storm events such that adjacent residential properties will be affected if measure to remedy the problem is not implemented. The county proposes to stabilize and restore the upper segment of Sheep Creek by installing concrete control structures in the channel bed and side slopes. The existing box culvert and crossing at Lone Pine Canyon Road would also be replaced with an arch culvert or bridge-span structure.	NOD	
2012042018	Castillian Hall Redevelopment University of California Davis--Yolo UC Davis proposes to demolish the existing residential buildings at 1440 Wake Forest Drive in Davis. The University is planning an eventual redevelopment of the site following demolition and would consider approval of the redevelopment proposal as a subsequent action. For CEQA purposes, the demolition (Phase 1) and redevelopment (Phase 2) were considered together in the FEIR; however, Phase 2 is not proposed for approval at this time.	NOD	
2012061017	Final Site Plan No. PSR 12-001 Tulare County --Tulare The project would allow a trench, an underground water transfer pipeline, and a pump to connect two storm water retention basins on a 2,460 foot-long portion of a 14-acre site in the M-1-SR (Light Manufacturing - Site Review) and AE-40 (Exclusive Agricultural - 40 acre minimum) Zones. The construction would last 8 weeks and employ 6 people. Storm water would be pumped from the primary basin to the secondary basin during heavy rain events to reduce the potential of flooding.	NOD	
2012071034	Permit for D/K Environmental Hazardous Waste Transfer and Storage Facility (CAT080033681) Toxic Substances Control, Department of Vernon, Los Angeles, City of--Los Angeles The project involves the issuance of a Hazardous Waste Facility Permit (Permit) for the D/K Environmental (DKE) Hazardous Waste Transfer and Storage Facility by the Department of Toxic Substances Control (DTSC), as authorized by the California Health and Safety Code, Chapter 6.5, and the Resources, Conservation	NOD

	and Recovery Act (RCRA). In January 2011, DKE submitted its permit request to continue its hazardous waste storage and transfer activities. Upon issuance of a RCRA permit, DKE will become a RCRA Permitted Facility for transfer and storage activities for RCRA, and California Regulated Wastes received from off-site generators. No treatment, disposal, and recycling of hazardous waste will be performed at the facility.		
2012072047	Pulgas G20 Shaft Site Drainage Improvement and Erosion Repair Project San Francisco, City and County of San Carlos--San Mateo Replacement of culvert under an existing PG&E substation.	NOD	
2012109002	Rosendahl Non-Industrial Timber Management Plan #1-10NTMP-004 SON Fish & Game #4 --Sonoma The project is limited to the replacement and modifications of two existing stream crossings as referenced in the Rosendahl Timber Management Plan #1-10TNP-004 SON.	NOD	
2011118055	Sewer Pipeline Rehabilitation Phase R - 1 San Diego, City of San Diego--San Diego The Project will allow the City to comply with the United States Environmental Protection Agency (USEPA) Final Consent Decree, and improve the quality of sewer pipelines within the City. The Project will implement a pipeline rehabilitation program that will meet the USEPA requirements in reducing sanitary sewer spills and maintenance costs, and extending the service life of aging sewer pipelines. The Project will involve rehabilitating approximately 14 miles of sewer pipeline using the cured-in-place or the Ribioc spiral liner trenchless pipeline repair methods.	NOE	
2011118061	Sewer Pipeline Rehabilitation Phase R - 1 San Diego, City of San Diego--San Diego The Project will allow the City to comply with the United States Environmental Protection Agency (USEPA) Final Consent Decree, and improve the quality of sewer pipelines within the City. The Project will implement a pipeline rehabilitation program that will meet the USEPA requirements in reducing sanitary sewer spills and maintenance costs, and extending the service life of aging sewer pipelines. The Project will involve rehabilitating approximately 14 miles of sewer pipeline using the cured-in-place or the Ribioc spiral liner trenchless pipeline repair methods.	NOE	
2012108001	Install Holding Tank at Peninsula Campground Lift Station Parks and Recreation, Department of --El Dorado Install a 3000 gallon sewage holding tank adjacent to the lift station at the Peninsula Campground lower loop to provide extra sewage storage capacity and prevent spills in the event of a lift station failure. Work will remove one 8 inch DBH blue oak, excavate a hole 5 feet wide by 8 feet long and 5 feet deep, place holding tank and back fill to cover the tank.	NOE

2012108002	Operation of Well NO. 1 Treatment Modifications Public Health, Department of --Kings The California Department of Public Health (Department). as the responsible agency, will be issuing a water supply permit. The Armona Community Services District proposed project included the addition of modifications to their existing treatment plant. This treatment plant assists in removing arsenic from the existing water supply so it may be compliant with the state's MCL for arsenic.	NOE	
2012108003	Golden State Water Company - Calipatria System, Niland Aeration Project Public Health, Department of --Imperial The California Department of Public Health (Department) as the lead agency will be issuing a water supply permit. The Golden State Water Company - Calipatria System proposes the installation of a Disinfection Byproduct removal technology that will be installed in the Niland reservoirs (Niland Tanks). A positive pressure forced air exhaust/intake will be installed above the tanks and a mechanical egg beater type mixer will be installed internally.	NOE	
2012108004	Hellman Quon building Improvements Parks and Recreation, Department of --Los Angeles The project will provide ADA improvements and renovations to the existing Historic Hellman Quon Building at el Pueblo de Los Angeles Historical Monument. The project would improve ADA accessibility within the building including addition of a restroom and kitchenette, interior modifications and additional utility infrastructure. Existing finishes affected by the work shall be restored. Measures to avoid and/or minimize impacts shall be implemented into the project.	NOE	
2012108005	Amendment of Conditional Use Permit No. 208 - Broadway Residential El Cajon, City of El Cajon--San Diego The project involves a change of use from a state licensed 49-bed residential care facility for severely mentally disabled adults to a non-state licensed 49-bed group residential family (boarding house) for mildly disabled adults.	NOE	
2012108006	Citibank Landscaping Site Development Review Dublin, City of Dublin--Alameda The Applicant is requesting Site Development Review approval to remove four (4) mature pine trees from the site and replace them with new trees and groundcover to match the existing landscaping on the adjoining Sports Authority parcel. The project also includes parking lot repaving, exterior ADA site upgrades, and minor repairs to curbing, walkways, and sidewalks. No changes to the buildings are proposed.	NOE	
2012108007	Environmental Testing for SR 85 Express Lanes Project Caltrans #4 --Santa Clara This work consists of basic data collection and resource evaluation activities, backhoe trenching and core sampling, for the interstate 85 Express Lanes project in Santa Clara County.	NOE

2012108008	Gas Line 21 E Dig Site at Shiloh Road Fish & Game #3 Windsor--Solano The project will excavate and repair an existing gas pipeline. The initial excavation will be an approximately 12-foot long, 8-foot wide trench around an existing natural gas pipeline within the south bank of Pool Creek. Additional excavations may be necessary to locate and repair the pipeline anomaly, increasing the excavation to an approximately 70-foot long, 25-foot wide trench.	NOE	
2012108009	Tidewater-Sobrante 230kV Transmission Line Vegetation Management Project Fish & Game #3 Martinez--Contra Costa The project is limited to removal of vegetation along 100 linear feet of the stream bank to provide clearance below an existing 230 kilovolt transmission line. A total of 13 trees and tall shrubs will be removed or heavily trimmed. Tree removal crews and equipment will access site via Medford Court. Equipment will not enter the creek or disturb riparian vegetation, except within the vegetation removal area. The trees will be accessed on foot and removed using hand tools. SAA #1600-2011-0215-R3.	NOE	
2012108010	Line 132 ECDA-San Tomas Aquinas Creek Project Fish & Game #3 Santa Clara--Santa Clara The project shall excavate an approximately 14-foot long, 8-foot wide and 20-foot deep trench along the east bank of San Tomas Aquinas Creek to expose the existing natural gas line for inspection. Excavation shall occur from above the top of bank, and shoring shall be used to stabilize the area. The pipeline may be repaired or replaced if corrosion or anomalies are discovered during the inspection. All excavation work shall occur above the wetted channel. SAA #1600-2012-0302-R3.	NOE	
2012108011	Line 109 ECDA-Calabazas Creek Fish & Game #3 Santa Clara--Santa Clara The project shall excavate an approximately 14-foot long, 20-foot wide and 10-foot deep trench to expose an existing natural gas line for inspection. If slope shoring is possible, the width of the excavation may be reduced to approximately 8 feet. The project dig site lies on a gravel maintenance road adjacent to Calabazas Creek. The majority of the excavation will be within the access road; however, approximately 70 square feet (0.0016 acres) will be below top of bank. The pipeline may be repaired or replaced if corrosion or anomalies are discovered during the inspection. All excavation work shall occur above the wetted channel. SAA #1600-2012-0279-R3.	NOE	
2012108012	Bariani Recreation Field; 1600-2012-0074-R2 Fish & Game #2 --Yolo The project is limited to re-contouring the existing abrupt banks to a more gradual slope, to remove the danger to people and equipment working in this field.	NOE

<u>Documents Received on Monday, October 01, 2012</u>			
2012108013	Noble Pier Repair Project Fish & Game #2 South Lake Tahoe--El Dorado The project is limited to those activities necessary to repair an existing private pier that was damaged during a storm event in winter of 2011. Proposed repair activities include rebuilding damaged catwalk sections and replacing mission decking, as well as the replacement of three existing 4x6 inch fender pilings. All project debris or project staging will be contained on a floating barge, no construction on project staging/debris is proposed to be located on the shore.	NOE	
2012108014	Ridge Road Rehabilitation Fish & Game #2 --Sierra The project for the purpose of this Agreement is limited to the replacement of four existing culverts that drain ephemeral streams beneath Ridge Road and the installation of a reinforced concrete headwall at the outlet of an existing culvert at intermittent stream Wet Ravine as part of the larger Ridge Road Rehabilitation project.	NOE	
2012108015	Hangtown Creek Routine Maintenance Agreement 1600-20120110-R2 Fish & Game #2 Placerville--El Dorado The Permittee performs routine maintenance work to maintain the functional and structural integrity of its facilities. Routine maintenance work, as described in the Agreement includes the following: removing debris, sediment, vegetation, rubbish, downed trees, and other material that could obstruct the natural flow; controlling weeds, grasses, emergent vegetation, and woody vegetation; repairing gates, barricades, and small structures; making repairs to control erosion and stabilize banks; and other work necessary to maintain the functional and structural integrity of the waterway.	NOE	
2012108016	New Office & Warehouse Space; DGS Project #131662 / CDFG Lease 1007-30-001 Food and Agriculture, Department of Anaheim--Orange The Department of Food and Agriculture proposes to lease new office and warehouse space of approximately 13,815 square feet for the Plant Health and Pest Prevention Services Division.	NOE	
2012108017	Woodacre Bank Stabilization Fish & Game #3 --Marin There are two components to the project, one component is on the left bank, and the second component is on the right bank. There is no access for machinery for the project, so all labor will be done by hand with hand tools. The labor force will consist of SPAWN and volunteers with some supervision of Streamline Engineering. The left bank component will consist of addressing an eroding/drainage section of the bank. The right bank component will address the eroding bank. SAA #1600-2012-0304-3.	NOE

2012108018	Assignment of Stream Environment Zone Restoration Credit to Placer County APN 97-191-01 (McKinney Shores Property Owners Association) Tahoe Conservancy Unincorporated--Placer Project consists of the sale and assignment of 495 square feet of SEZ Restoration Credit from Conservancy-owned land, to a receiving parcel where an existing pier access wood boardwalk will be permitted. The assignment enables the receiving landowner to carry out the project without any net increase in the amount of existing land coverage in a Bailey Class 1b (SEZ) within the Lake Tahoe Basin.	NOE	
2012108019	Acquisition of Ramirez Canyon Properties; APNs 4465-004-045; 4465-004-084 Mountains Recreation and Conservation Authority --Los Angeles acquisition of 2 parcels (APNs 4465-004-045; 4465-004-084) in the Ramirez Canyon Watershed of the Santa Monica Mountains in unincorporated Los Angeles County.	NOE	
2012108020	Install Three Sections of Metal Beam Guardrail on Southbound State Route 101 Caltrans #3 --Humboldt Install two "Vehicle Speed Feedback Radar Signs" at Postmile 3.3 and Postmile 4.7 on State Route 255 in Humboldt County. This safety project will make drivers more aware of their speed when traveling through the Town of Manila and encourage them to observe.	NOE	
2012108021	Lee Vining Re-Vegetation Project Caltrans #6 --Mono The proposed project will revegetate 3 small eroding cut slopes by stabilizing the slope surface through minor slope rounding and revegetation efforts.	NOE	
2012108022	Bridge Rehabilitation Project Caltrans #3 --Sacramento, Yolo Bridge preservation project located on State Routes 45, 80, 113 in Sutter and Yolo Counties. The project proposes to place polyester concrete overlay, methacrylate deck treatment, remove chip seal, and replace traffic striping.	NOE	
2012108023	Gateway of the America County Service Area Water Treatment Plant and Sewer Treatment Plant Modifications Agreement Imperial County --Imperial For the Sewer Treatment Plant, the Phase 2A modification would add two small aerator pumps to the existing two small aerator pumps and 13,342 cu.ft. of evaporation pond facilities, which amounts to minor 4% increase in cubic feet of pond facilities from the existing 329,296 cu. ft. of combined lagoon and evaporation ponds. The modification requires no expansion of the lagoon system because it merely converts the facultative lagoons from parallel operations to series, partial mix aerated lagoon, while maintaining the same volume capacity.	NOE	
2012108024	Culinary Arts Center Expansion, American River College Los Rios Community College District Sacramento--Sacramento The project enhances student services at American River College (ARC) by reconstructing and expanding the Culinary Arts Center by approximately 15,500 square feet. The modernized classrooms and new construction include teaching	NOE

	frontage roads, railroad overhead crossings, new bridges, controlled access, and utility relocations.		
2012101007	Rice Creek Re-alignment Regional Water Quality Control Board, Region 4 (Los Angeles) Ojai--Ventura This project will re-route Rice Creek, an ephemeral tributary of the Ventura River, from a man-made diversion ditch and back into its historic route. In the 1920's, Rice Creek was diverted from its historic route to facilitate the installation of an orange orchard. The diverted stream was substantially shortened, confined by levees, and discharged over a 30 foot cliff into the Ventura River floodplain. The orange orchard has been retired and partially removed. Replacing the stream to its historic route will re-wet 2,900 feet of the historic channel. Revegetation will enhance and expand riparian habitats for the benefit of birds and wildlife. Rice Creek is a seasonal drainage and will be dry during construction.	MND	10/31/2012
2012101008	Sol Orchard Solar Project El Centro, City of El Centro--Imperial The project involves the construction, operation, and maintenance of a photovoltaic (PV) solar facility located on Imperial Irrigation District (IID) land both in the City of El Centro and Imperial County. The project would have a production capacity of 20 Megawatts (MW) alternating current (AC). The 100,000 - to 120,000-panel project would be installed on portions of four parcel totaling 140 acres, although development would be limited to approximately 118 acres. The project would also include the undergrounding of the portion of Central Drain No. 5 and laterals within the project site, as required by the El Centro General Plan.	MND	10/31/2012
2012102005	Recreation Wellness Center Project University of California, San Francisco San Francisco--San Francisco Note: Tiered from SCH # 2006102050 The proposed project would involve the construction of a new 112,270 gsf Recreation Wellness Center building with an outdoor softball field, outdoor recreation fields, and an outdoor hammer throw practice area on a 7-acre project site. The proposed project would also include pedestrian street improvements along Winston Drive and a new pedestrian tunnel under Winston Drive. A minor revision to the Campus Master Plan would be required to relocate the planned Recreation Wellness Center from a site on North State to the proposed project site on Winston Drive. The project site is located in the northern portion of the SF State campus, north of Winston Drive, east of Buckingham Way, west of Lake Merced Boulevard, and south of Lowell High School.	MND	10/31/2012
2012102006	Stony Point Rock Quarry (Cotati) Sonoma County Cotati--Sonoma Request for a revised Reclamation Plan and 20 year surface mining Use Permit including a 14 acre expansion (for a total area of 87.8 acres) and Zone Change to MR (Mineral Resources Combining District), and allowance to excavate the existing pit (now at 120 feet above mean sea level (MSL)) to a final quarry floor 80 feet MSL. The proposal includes the relocation of the operations plant to be positioned approximately 500 feet south of the existing plant. Requested operation levels are as follows: a maximum 480,000 tons of mining; 100,000	MND	10/31/2012

	tons/yr of imported recycled materials; and 20,000 tons/yr of other imported materials for a total of 600,000 tons of annual sales. The project does not result in any changes to the quarry's vested production rights.		
2012102008	Long-term Contract for the Exchange of Water Between Bureau of Reclamation and BBID and Wholesale Water Byron Bethany Irrigation District --Alameda, San Joaquin The Proposed Project includes the construction and operation of facilities to allow for the delivery of water supplies to accommodate the anticipated demand of Tracy Hills. BBID would introduce up to 4,500 acre-feet per year (plus losses) of its non-CVP water to meet Tracy Hills demand, at the Delta Mendota Canal (DMC) between March and October, depending on the availability of excess capacity. Introduced water would be exchanged with Reclamation at the point of introduction. Exchanged water would be delivered to DMC Mile Post 15.88L for treatment at the City's water treatment plant prior to delivery to Tracy Hills. Improvements to existing BBID Pump Station 3 as well as a new underground pipeline would be required for delivery of the non-CVP water to the DMC.	Neg	10/31/2012

2006022091	Folsom Dam Safety & Flood Damage Reduction - Prison Staging Area & Stilling Basin Drain Central Valley Flood Protection Board Folsom--Sacramento This Supplemental Environmental Assessment / Environmental Impact Report discusses in detail and evaluates the refinements for: 1) using 10 acres of Folsom State Prison land for staging and operating a concrete batch plant, 2) installing a temporary traffic signal on Folsom Lake Crossing, 3) widening an existing dirt access road, and 4) constructing a drain at the stilling basin.	NOD	
2008042067	Loma Rica Ranch Specific Plan Grass Valley, City of Grass Valley--Nevada This action pertains to the City's previous approval of the Loma Rica Ranch Specific Plan. The resolution adopts the final findings to overrule ALUC's determination of inconsistency between the NCALUCP and a portion of the Loma Rica Ranch Specific Plan. The plan clusters development into four neighborhoods and includes development of 700 low, medium and high density primary residential dwelling units. 54,000 square feet of commercial, mixed-use, and retail uses: and 364,161 square feet of business and light industrial uses. Approximately 313.9 acres are proposed as open space, including improved parks, farm land and natural open space.	NOD	
2009021009	California Valley Solar Ranch & Twisselman Conditional Use Permits (DRC2008-00097, DRC2009-00004) San Luis Obispo County San Luis Obispo--San Luis Obispo The Project entails constructing, operating, and maintaining a 250-megawatt solar photovoltaic energy facility, including solar panel arrays, gathering power lines, a substation, access roads, buildings, two evaporation ponds, and an approximately three-mile long generation tie-line to convey electricity to the existing Morro-Bay-Midway transmission line. The Project as originally permitted would result in permanent impacts to 1,782 acres and temporary impacts to 80 acres of San Joaquin kit fox (<i>Vulpes macrotis mutica</i>), giant kangaroo rat (<i>Dipodomys ingens</i>), and San Joaquin antelope squirrel (<i>Ammospermophilus nelsoni</i>) habitat. The Project is expected to result in incidental take permit and the previous three Amendments (collectively referred to herein as "ITP") for this Project, as issued by the Department of Fish and Game, authorizes incidental take of species listed under CESA that may occur as a result of Project implementation. Minor Amendment No. 4 to the ITP adds a fourth phase to mitigation lands acquisition and allows that acquisition to occur after the final construction phase, permits a specific activity to occur at night. Includes additional habitat restoration activities as Covered Activities, reduces the allowable permanent impact by 195 acres, increases the allowable temporary impacts by 131 acres, and replaces the Project layout maps with more accurate, up-to-date, Project plan sheets that reflect minor adjustments in the Project footprint.	NOD

2012108040	Jakov Dulcich & Sons Water System Improvements Public Health, Department of McFarland--Kern The California Department of Public Health (Department) as the lead agency will be issuing a water supply permit. The Jakov Dulcich & Sons, LLC proposes to add two ion exchange vessels to its existing facility to address an ongoing high nitrate presence in the existing water supply. Backwash water will be stored in an onsite tank and then hauled away by an authorized environmental waste hauler.	NOE	
2012108041	West Walley Detention Center Project Fish & Game Eastern Sierra-Inland Deserts Region Rancho Cucamonga--San Bernardino SAA # 1600-2012-0059-R6 The West Valley Detention Center Project includes the repair and stabilization of exposed portions of an existing main water line and sewer line, stabilizing adjacent stream bank erosion, and restoration of prior impacts to riparian habitat within Day Creek Channel. Repair and stabilization activities will include: removing eroded concrete riprap over the water and sewer line; installing lower elevation concrete aprons over the water and sewer lines; shifting a portion of the east stream bank approximately 12.5 feet; contouring the stream bank slopes adjacent to the exposed utilities; and placing non-grouted light weight rock on the banks.	NOE	
2012108042	San Marcos Channel Maintenance Fish & Game #5 San Marcos--San Diego SAA #1600-2012-0163-R5 - The project is routain maintenace activities within three public drainage facilities; the La Rosa Channel (CH045), villa vista Channel (CH042), and the Edwards Cinema Channel (CH043). Activities include removal of all accumulated trash and debris and the cutting of vegetation. Equipments includes backhoe, dump trucks, weed whips, weed eater, power shears, pole hedgers, hedgers, chainsaws, shovels, rakes, pitchforks and burlap sacks for the vegetation. All trash, debris and vegatation will be removed from the channels and hauled offsite.	NOE	
2012108043	Install Changeable Message Signs (CMS) - EA 0Q920 Caltrans #8 --Riverside Install Changeable Message Signs (CMS) to help the Traffic Management Center (TMC) inform the travelling motorist about road conditions before they are impacted by accidents, adverse weather conditions, localized flooding, and traffic jams. 2007041015	Community Recycling and Resource Recovery Los Angeles, City of Los Angeles, City of--Los Angeles NOTE: FYI Final	FIN	
	<p>The project site is used as a solid waste facility and a recycling and resource recovery operation which is currently permitted for a 1,700 tons per day (TPD) transfer station/materials recycling facility MRF and which for recycling receives approximately 1,200 TPD of construction materials, 1,200 TPD of organics, 350 TPD of source-separated supermarket trim and cull, and 150 TPD of source-separated wood waste. The Proposed Project includes construction of an ~107,00 sf enclosure building with air filtration system to be located over the existing source-separated green waste, supermarket trim and cull, and wood waste areas, with 40 parking spaces (already existing), and a revised Solid Waste Facilities Permit for the entire facility. The purpose of the revised permit is to consolidate all resource recovery operations under one comprehensive permit in order to respond to new recycling industry regulations. Under the new permit, the applicant is seeking approval to receive up to 2,000 TPD of construction material, up to 1,500 TPD of source-separated green waste, up to 500 TPD of source-separated supermarket trim and cull, and up to 200 TPD of source-separated wood waste. The applicant is also seeking to increase the permit for the transfer station/MRF to 2,500 TPD. The permit increase in tonnage over time would require up to one additional shift to be added to the operations.</p>		
2012101009	ENV-2011-2478-MND / 1600 W. Palos Verdes Drive N Los Angeles, City of --Los Angeles The addition of 192 bedrooms to the existing 86 units, construction of a 27,000 sf student services building with a dining hall, 50 faculty and administrative offices and nine classrooms, construction of a 2,200 sf maintenance facility, including the removal of six dwelling units, construction of a sixteen classroom academic building with studio, laboratories and 32 faculty offices and the addition of 342 parking spaces.	MND	11/01/2012
2012101011	Highway 86 Domestic Water Transmission Main Phase 2 and Pump Station Coachella Valley Water District --Riverside, Imperial Note: Reference SCH # 2009041034	MND	11/01/2012

The proposed 30-inch-diameter pipeline is approximately 7.2 miles long and will connect to an existing 30-inch-diameter pipeline located on the west side of Highway 86 at Avenue 74. From Avenue 74 south to Avenue 81, the pipeline will be aligned approximately 35 feet from existing centerline within the roadway right-of-way. Approaching Avenue 82, the proposed pipe will be located 110 feet from the centerline (ten feet west of the existing roadway right-of-way). Just north of Avenue 84, the pipeline swings southwesterly around Caltrans' future interchange right-of-way and turns southeasterly returning to the previous described alignment of 10 feet west of Highway 86S right-of-way. At Avenue 86, the pipeline connects to an existing 16-inch diameter pipeline that currently

	supplies ID 11 with groundwater from a small well field located west of the project along Avenue 86.		
2012101012	Oceano Dunes District Routine Riparian Maintenance Parks and Recreation, Department of --San Luis Obispo CDPR, Off-Highway Motor Vehicle Recreation Division proposes riparian maintenance activities to facilitate resource protection at Pismo State Beach and Oceano Dunes State Vehicular Recreation Area. These activities include: removing sediment, debris, and vegetation from 15 culverts and the Pismo Lake spillway; trimming riparian trees and shrubs; and controlling emergent species and exotic species populations within riparian corridors.	MND	11/01/2012
2012101013	Whittier Boulevard and Beach Boulevard Intersection Improvement Project La Habra, City of La Habra--Orange To improve the level of service (LOS) and vehicular capacity of the intersection the Proposed Project would widen and restripe an approximate 1,500-foot portion of Whittier Boulevard from approximately Chantry Drive to the west and Hacienda Boulevard to the east and restripe the northbound approach of Beach Boulevard. Improvements would consist of the addition of an exclusive eastbound right-turn lane and the addition of a third westbound left-turn lane. The exclusive eastbound right-turn lane would provide 200 feet of storage, however a defacto right-turn lane would continue along the Whittier Boulevard frontage to Chantry Drive/Lindauer Drive to maximize the available storage for this lane. The storage for the westbound left-turn lanes (inclusive of the additional third lane) would provide 465 feet of storage. There would be no U-turns allowed on Whittier Boulevard at either Beach Boulevard or Hacienda Road; same as the existing condition. The Proposed Project would also include the modification of the traffic signals at the intersection as well as all incidental utility relocations and signage modifications (e.g. relocation of existing fire hydrants within the project area per City Standard W-2 after curb and gutter relocation; valve lids to be raised/adjusted after final pavement).	MND	11/02/2012
2012102010	Telecommunications Infrastructure Improvements Phase A University of California, Santa Cruz Santa Cruz--Santa Cruz The project consists of upgrades to the interior telecommunications infrastructure in existing buildings, installation of new telecommunications conduit, fiber, and vaults between various locations on the campus, and construction of a new, 1,100-sf telecommunications equipment building in the Campus Facilities area near the southern end of the campus.	MND	11/01/2012
2012101010	Harvest - Tulare Anaerobic Digester and Compressed Natural Gas Facility Project Tulare County Tulare--Tulare The Harvest-Tulare composting facility currently holds operating permits to compost green material, food, and dairy manure. The proposed project will increase and shift types of materials and quantities accepted at the facility. Harvest Power California LLC is proposing to add an anaerobic digester to the existing Harvest-Tulare composting operations to process organic materials into fuel and digestate that will contribute to soil amendment production. Both a high solids digester (processing food and green material) and a low solids digester (processing primarily food material) alternatives will be evaluated in the	NOP	11/01/2012

	environmental document. The proposed project will increase total tonnage at the site from 86,000 tons per year to a potential 216,000 tons per year. The increase includes both the proposed anaerobic digester and increasing tonnages at the composting facility. The facility will produce transportation fuel either through a compressed natural gas (CNG) refueling station or by injecting directly into a nearby natural gas pipeline. Therefore, both a CNG refueling station and direct injection to the natural gas pipeline will be evaluated.		
2012102009	PA-1200158-Site Approval Application to Expand an Existing Seed and Research Facility in Two Phases San Joaquin County Lodi--San Joaquin A Site Approval application to expand an existing seed and research facility in two phases over ten years. Phase 1, with building permits to be issued within 18 months, to include additions to two existing greenhouse buildings totaling 1,980 sf. Phase 2, with building permits to be issued within 10 years, includes the construction of four green houses, each consisting of 3,360 sf, an 8,062 sf work room, a 1,020 sf maintenance shop addition, a 1,200 sf maintenance shop addition, and a 400 sf irrigation buildings. Phase 2 also includes a sign modification request to modify the maximum permitted height requirement for a monument sign from six feet to ten feet and modify the maximum permitted sign area from 60 sf to 80 sf. This parcel is under a William Act contract.	Neg	11/01/2012
2011121092	Construction of Bowman Road - Realignment to US 395 to 1.3 Miles East Kern County Ridgecrest--Kern Note: Response to Comments The County of Kern in cooperation with the U.S. Bureau of Land Management (BLM) proposes to construct a 24-foot-wide asphalt concrete roadbed with 6-foot-wide paved shoulders and 2 feet of shoulder-backing along a 1.3 mile road segment. Improvements will include installation of box culverts at four channel locations and demolition of the original asphalt road upon completion of the new road. The project will be within approx. 200-feet of right-of-way with portions under the jurisdiction of BLM, Caltrans & the County. The centerline of the roadway is not located on the section line per county standards; therefore, it is the intent of this project to construct a new road approx. 100 feet north of its current location in order to provide congruence and continuity to existing paved sections of Bowman Road. Any existing utilities that would conflict with the project design will be relocated. This project will help provide an adequate east-west circulation to alleviate congestion on SR 178 and improve air quality in the Indian Wells Valley Air Basin and Mojave Desert sub region.	Oth	
1997021006	Pajaro Valley Water Management Agency - Local Water Supply and Distribution Seawater Intrusion Control Project Pajaro Valley Water Management Agency Pajaro Valley WMA has water right permit 21039 (Application 30522) to divert water from Harkins and Watsonville Sloughs. They have requested a ten-year time extension on the permit to allow for more time to maximize the amount of water diverted and beneficially used. The primary purpose of the project is to balance water demands with water supplies in the Pajaro groundwater basin. The objectives of the project include reducing overdraft problems associated with groundwater withdrawal, improving groundwater quality due to a decrease in	NOD

	seawater intrusion related to overdraft, and improving regional water supply problems by providing additional fresh water.		
2008122064	Amendment to Gilead Sciences Corporate Campus Master Plan Foster City Foster City--San Mateo The proposed project would amend the previously approved Vintage Park General Development Plan approved for the Gilead Sciences Corporate South Campus Master Plan to change the use of the office building planned to replace the building located at 355 Lakeside Drive from office to laboratory and building planned between 353 and 357 Lakeside Drive; 2) a larger building footprint for NLB-2; 3) removal of building NLB-3 has been removed off the plan; 4) a change in the orientation of the office buildings planned along the edge of Vintage Lake; and 5) a change in the nomenclature of the building names to address the proposed amendments.	NOD	
2011081028	Saddle Crest Homes Orange County --Orange General Plan Amendment, Specific Plan Amendment, and Area Plan to allow for development of Saddle Creek Homes, a gated community comprised of 65 detached single family residential units concentrated off Santiago Canyon Road, with proposed open space dedication along the northeastern portion of the property.	NOD	
2012062077	Fairway Oaks Subdivision Project Galt, City of Galt--Sacramento The Fairway Oaks Subdivision Project would consist of 100 single-family lots, ranging from 8,000 square feet to 18,291 square feet. A 10.7-acre Open Space area would also be located on the project site, which includes a neighborhood park with an oak tree preserve and a Class I bike trail that travels along Dry Creek. In addition to the Open Space features on the project site, a variety of environmental features including water, energy, and solid waste conservation measures shall be included in the proposed project design. A 30-foot-wide pedestrian and bicycle connection is proposed from Chase Drive to Glendale Avenue, between lots 98 and 99. The proposed project would incorporate fully paved roads conforming to 50-foot and 60-foot right-of-way sections. An alternative access route to the project site shall be implemented as part of the proposed design features. The alternative access would be a direct connection from the project site to the Glendale Avenue/SR 99 southbound ramps intersection, which would be located at the proposed 30-foot-wide pedestrian and bicycle connection site. Project entitlements include approval of a Rezone from R1A-PD to R1C-PD and approval of the Vesting Tentative Map.	NOD	
2012098049	Anderson Village Elementary School Solar Photovoltaic Installation Project Moreland School District San Jose--Santa Clara Project will consist of about 15,182 square feet of solar photovoltaic arrays installed on the tops of 12-foot high carport structures that will be constructed in current parking lots along with associated inverters and interconnections.	NOE

2008122007	<p>Sonoma County Compost Facility Sonoma County --Sonoma NOTE: Recirculated</p> <p>The Sonoma County Waste Management Agency is a joint powers authority composed of the County of Sonoma and the nine incorporated jurisdictions within Sonoma County: Cloverdale, Cotati, Healdsburg, Petaluma, Rohnert Park, Santa Rosa, Sebastopol, Sonoma and Windsor. SCWMA has prepared this DEIR to assess the environmental effects of the construction of a new compost facility in Sonoma County that would replace the existing composting facility at the Central Disposal Site. SCWMA, as the Lead Agency responsible for administering the environmental review for the proposed project, determined that preparation of an EIR is needed because the project has the potential to cause significant effects on the environment. The proposed project would process (either through windrow or aerated static pile [ASP] methods) up to 200,000 tons of compost materials per year. The new compost facility may be selected from the three sites studied at project-level in this document.</p>	EIR	11/19/2012
2011081099	<p>Warner-Nichols Project Huntington Beach, City of Huntington Beach--Orange</p> <p>The proposed project involves a General Plan amendment and a zone change to amend the designation uses of the project site from residential to industrial and commercial to make this site more compatible with the adjacent industrial uses. The land use and zoning designation are also intended to provide a buffer for the existing residential uses that are adjacent to the east of the project site. Concurrent with the General Plan amendment and zone change, the project also includes the demolition or removal of all of the existing buildings and improvements on the site, which are included in the City of Huntington Beach's list of local landmarks. The project does not include any development. Therefore, the site would remain vacant after implementation of the project.</p>	EIR	11/19/2012
2012101014	<p>Undergrounding Utility District Project Residential Block 1J West San Diego, City of La Jolla--San Diego</p> <p>This project requires approval of a Coastal Development Permit and Site Development Permit for work within the Coastal Zone (City Jurisdiction) and when an Important Archaeological Site is present and cannot be exempt pursuant to Section 143.0220 of the Land Development Code. These actions do not authorize construction prior to or without subsequent approval by City Council to prioritize</p>	MND	11/02/2012

	and form an underground utility district which would allow San Diego Gas & Electric (SDG&E) to construct an Underground Utility System per the franchise agreement. The project would excavate trenches approximately 5 feet deep and 2.5 feet wide. The trenches would be located along one side of the public right-of-way, and would install conduit, substructures, and transformers located on concrete pads. In addition, the project would install cable through the conduits; provide individual customer connections, removal of existing overhead lines and poles, and the installation of streetlights where applicable. Curb ramps would be installed where missing and, if applicable, street trees would be relocated or installed. All work will be entirely within the public right-of-way.		
2012101015	Conditional Use Permit No. 12-0323 Bakersfield, City of Bakersfield--Kern The project consists of the establishment and operation of an oil well drill site to accommodate one well.	MND	11/02/2012
2012101016	CUP 3363; Allow a Photovoltaic Solar Power Generation Facility in the AE-20 Zone District Fresno County --Fresno Allow a photovoltaic solar power generation facility with related improvements including one pad-mounted inverter/transformer and a six-foot tall chain-link fence on an 8.68-acre portion of a 14.00 acre parcel in the AE-20 (Exclusive Agricultural, 20-acre minimum parcel size) Zone District. The proposed facility will utilize subterranean conduit to connect to an existing 12kv PG&E electrical distribution line adjacently located along the western boundary of the project site. The project site is located on the east side of Bethel Avenue, between Jefferson and Lincoln Avenues, approximately one mile east of the unincorporated community of Del Rey (5652 S. Bethel Avenue) (Sup. Dist.: 4) (APN: 350-190-01).	MND	11/02/2012
2012102012	Holman Tank Demolition and Pressure Zone 3/5 Water System Intertie Improvements Fortuna, City of Fortuna--Humboldt 1) New pipeline connecting Pressure Zones 3 and 5 including pipeline installation by trenching and directional drilling; pressure reducing station, interconnections with existing piping and installation of individual pressure reducing valves on homes as required. 2) Removal of existing pump and installation of a new pump to augment fire flow, along with a standby generator, new controls and site improvements. 3) Demolition and removal of the Holman tank, tank foundation and associated appurtenances.	MND	11/02/2012
2012102013	Tracy Aquifer Storage and Recovery Project Tracy, City of Tracy--San Joaquin The project would involve the injection of treated potable water into the local aquifer for storage and future recovery. No physical improvements or construction activities would occur. The project would utilize the existing well (Well #8) at 609 W. 6th Street in Tracy. The project would provide water storage for peak summer demand and drought conditions.	Neg	11/02/2012

1995112065	SPECIFIC PLAN NO. 184 RANCHO BELLA VISTA Riverside County TEMECULA--RIVERSIDE CDFG is executing a Streambed Alteration Agreement (SAA # 1600-2011-0279-R6) pursuant to Section 1602 of the Fish and Game Code to the project Applicant: Lennar Homes of California represented by Mr. Jeffery T. Clements, 391 N. Main Street, Ste 300, Corona, CA 92880. The Project is limited to the construction of an approximately 3,200-foot segment of Butterfield Stage Road including a bridge crossing Tualota Creek and the construction of a sewer line across Tualota Creek approximately 600 feet downstream of the bridge. The existing Arizona crossing of Puorroy Road over Tualota Creek will be removed and the streambed will be restored to natural conditions. The construction of the new bridge will require the placement of falsework of the Creek. The sewer line will be constructed by trenching Tualoca Creek, laying the sewer line, encasing the sewer line with concrete, placing rip-rap around the pipe, and then placing fill over the pipe to return the soil surface elevation to pre-project elevations. All the disturbed area will be revegetated and restored to previous conditions.	NOD	
2001082058	Oakland Army Base Area Redevelopment EIR Oakland, City of Oakland--Alameda Implementation of the already approved 2012 Oakland Army Base Project by the Oakland Redevelopment Successor Agency Adopting a Resolution Ratifying and Approving the Lease Deposition and Development Agreement and Related Documents Between the City of Oakland, and Prologis CCIG Oakland Global, LLC for a Mixed-Use Development on Approximately 130 Acres in the Central, East and West Gateway Areas of the Former Oakland Army Base ("Project").	NOD

2011122047	The 2012 Fisheries Restoration Grant Program Fish & Game #2 -- Improve fish passage on Water Gulch by demolition of an abandoned dam, removal of two failed log stringer bridges, and replacing an undersized culvert.	NOD	
2011122080	Airport Sewer Infrastructure Stanislaus County Modesto--Stanislaus Proposing a sewer infrastructure project within the unincorporated area of Stanislaus County's Airport Neighborhood which consists of approximately 150 acres including approximately 481 residential parcels. The site is not located within any FEMA designated floodplains. The area is zoned R-1, R-2, R-3, P-D, M and C-1. The project will include the installation of a sewer system with approximately 23,000 linear feet of sewer main and street overlays. The new sewer infrastructure will connect into the City of Modesto existing public sewer system.	NOD	
2012012039	Parklawn Sewer Infrastructure Stanislaus County Modesto--Stanislaus Proposing a sewer infrastructure project within the unincorporated area of Stanislaus County's Parklawn Neighborhood which consists of approximately 85 acres including approximately 308 residential parcels. The site is located outside any FEMA identified floodplains. The area is zoned R-1, C-2, C-1 and M. The project will include the installation of a sewer system with approximately 13,755 linear feet of sewer main, a pump station, and street overlays. The new sewer infrastructure will connect into the City of Modesto's existing public sewer system.	NOD	
2012012043	Gravity Sewers and Reclamation Project Lincoln, City of Lincoln--Placer The 28-acres Gravity Sewer and Reclamation Project consist of installing approximately 13,800-feet of sewer line and removing or upgrading storm water facilities.	NOD	
2012052059	Dumbarton Quarry Reclamation Plan Amendment Fremont, City of Fremont--Alameda The project consists of an amendment to an existing and previously approved Reclamation Plan for Dumbarton Quarry, CA Mine ID#91-01-0001. The project sponsor has submitted applications for a Preliminary Grading Plan and amendment to CUP U-66-53 to import up to six million cubic yards of fill material that will be placed in the former quarry pit. Site grading, erosion control and revegetation measures are also included in the project. This analysis evaluates the potential on-site impacts from limited earthwork activities to move material into the pit and establish contour grades in areas outside of the pit. Up to one bulldozer, one grader and one water truck would be used on site for these activities.	NOD	
2012072036	Kingridge Sanitary Sewer Line Improvements - Phase III San Mateo, City of San Mateo--San Mateo The proposed Kingridge Driver sanitary sewer line project includes three main components: (1) replacing a section of an undersized (per the City's standards) and structurally compromised sanitary sewer line, (2) providing slope stabilization	NOD

2012108078	Well 11D Rehabilitation Project Elk Grove Water Service Elk Grove--Sacramento This project rehabilitates Well 11D. The beneficiaries of this project are the customers of the Elk Grove Water District.	NOE	
2012108079	McCartney Residence - Culvert Installation, Unnamed Tributary to Mill Creek Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa --Humboldt The primary purpose of the project is to improve the existing roadway and wet stream crossing to provide reliable access to the Applicant's residential parcel during all seasons. The project will eliminate the existing wet ford crossing so vehicles will no longer be driving directly through the muddy streambed. Road improvements include installation of two culverts. A 24-inch diameter and 30-foot long corrugated plastic culvert will be installed where the road crosses an intermittent stream channel and an 18-inch diameter and 20-foot long culvert will be installed at a location where water will flow during storm events. The 30-foot long culvert will be embedded six inches into the road bed and the 20-foot long culvert will be installed at the existing grade. Excavated soil will be incorporated into the 75-foot long roadway and a 75-foot long section of the roadway will be elevated approximately three feet with clean imported quarry rock. The inlets and outlets will be armored with rock. All work will occur within the existing 17-foot wide roadway.	NOE	
2012108080	Modesto Lease Renewal Unemployment Insurance Appeals Board, California Modesto--Stanislaus Lease renewal, installation of a bullet-resistance reception window.	NOE	
2012108081	North Burnett Road Neighborhood Permanent Water Source Replacement Project Tipton Community Services District --Tulare The proposed project would replace the existing distribution lines by installing the new distribution system in road right-of-way along North Burnett Road. North Burnett Road residents will now have a new permanent distribution system in place.	NOE	
2012108082	Emergency Project 0C630; Replace Failed Culvert and Restore Highway Caltrans #1 --Humboldt A failed culvert resulted in a sink hole within the northbound highway travel lane. The failed culvert needs immediate replacement in order to prevent further roadway damage and highway closure. Work will include the replacement of the existing culvert and the restoration of the road surface.	NOE	
2012108083	Chico Air Attack Base Retardant Color Test Forestry and Fire Protection, Department of Chico--Butte This is a one time project involving a color visibility test of aerial fire retardant material. The retardant would be applied by a CAL FIRE air tanker onto two small test plots. The first is a one acre closed canopied forest and the second is a one acre closed canopied brush vegetation type in a remote mountain area north and east of Chico Air Attack Base (CAAB) located in Chico, CA. The purpose of this project is to test nine different shades of retardant to determine the most visible and effective coloration. There will be nine drop lines on each of the two test	NOE

	areas. Individual drops will be approximately thirty feet in width and one hundred feet in length covering from one half to three quarters acre in total area per unit. Total project area for both units will be 2 acres or less.		
2012108084	<p>Spooner Cove Accessibility Improvement Project Parks and Recreation, Department of --San Mateo</p> <p>Upgrade existing facilities at Montana de Oro State Park to comply with the Americans with Disabilities Act (ADA) and meet requirements in the "CA State Parks Accessibility Guidelines".</p>	NOE	
2012108085	<p>Cache Creek Gas Line 400/401 Maintenance Project, SAA 1600-2012-0111-R2 Fish & Game #2 --Yolo</p> <p>The project consists of installing one high-load hanger pipe support on each gas line to ensure the pipeline remains in place and stable during peak creek flows. The hanger pipe support includes one piling installed 15' to 20' deep on each side of the two gas pipelines, attached to a pipeline clamp insulated with neoprene that will encircle the pipeline. Hand crews will cut and remove debris and vegetation along the bank and within the pipeline easement to ensure safe access, pipe line inspection and installation of the supports. A mini excavator and hand tools will be used to remove approximately 5 cubic yards of sediment from around the pipelines. The excavator will then pound the 11" diameter pilings into the ground using a sonic side grip vibratory hammer or similar tool. The pilings will be attached by hand to a plate that connects the pilings to the wall sleeve and the clamp, which will be secured around each pipeline.</p>	NOE	
2012108086	<p>Widen Brick Walkway (on South side of Fiesta de Reyes Plaza) Parks and Recreation, Department of --San Diego</p> <p>Install additional matching bricks to increase the width of the walkway from 36" to 48" at the south side of the Fiesta de Reyes Plaza in Old Town San Diego State Historic Park to improve visitor services, accessibility and public safety.</p>	NOE	
2012108087	<p>Rehabilitate Critical Components of the Grant Grove Water System within Kings Canyon National Park National Park Service --Fresno</p> <p>The NPS is proposing to rehabilitate critical components of the water system in the developed area of Grant Grove, within Kings Canyon National Park (park). The proposed project activities are needed to ensure high quality drinking water to the Grant Grove area and to improve the operation of the water system. The existing Grant Grove water system includes three water sources (artesian well, 400-ft well, and Rona Spring), a 200,000-gallon raw water pressure break tank, a limestone contactor water treatment facility, and a 1.2 million gallon finished water storage tank. There are a number of modifications needed, such as replacing and sliplining existing water lines, replacing the wellheads and associated protection structures on two wells, abandoning one well, replacing a mechanical building to eliminate confined space entry, and improving the water treatment facility to comply with CA Department of Public Health standards. A small portion of the project would occur in wetlands and near Abbott Creek. This project work would include the rehabilitation of the artesian well head, consolidation of existing electrical and waterlines, and removal of a concrete vault.</p>	NOE

	Process provides CSP with an objective and systematic approach for making decisions regarding the addition or removal of non-motorized uses of a State Park System road or trail.		
2012101017	Deep Creek Solar - Conditional Use Permit San Bernardino County Apple Valley, Hesperia--San Bernardino NOA for IS / Proposed MND for a CUP to establish a 2-MW solar power generating facility on a 26-acre portion of a 40-acre parcel, in an unincorporated portion of Apple Valley, San Bernardino County / 1st Supervisorial District/ Project No. P201100391/CUP	MND	11/05/2012
2012101018	Chevron / Union Oil of California Minor Use Permit Coastal Development Permit DRC2011-00088 San Luis Obispo County --San Luis Obispo Minor Use Permit/Coastal Development Permit to: demolish an existing 1,560 sf metal shed building (old fuel loading rack), construct up to 15 ground water monitoring wells, and destruct the same 15 ground water monitoring wells following completion of monitoring activities, at the (former) Avila Tank Farm. The concrete pad under the metal building is proposed to remain in place and no grading is proposed. The project would result in the disturbance of approximately 1,700 sf of a 90 acre site and is located at 10 San Rafael Street, in the community of Avila Beach, in the San Luis Bay Coastal.	MND	11/05/2012
2012101020	PM069664 Los Angeles County --Los Angeles The project is a request for the subdivision of a 10-acre parcel into two 5-acre lots for the development of two new single-family residences and associated improvements (grading, driveways, and septic system). Lot 1 depicts a 28,731 sf building pad served by an approximately 550-foot long, 20-foot wide driveway off of Burlwood Drive which is a private and future street with 24 feet of paving. Lot 2 depicts a 21,976 sf split building pad accessed by an approximately 250-foot long, 20-foot wide driveway off of Hasley Canyon Road, a public street with 24 feet of paving. The anticipated grading quantities associated with development are 27,500 cubic yards of cut and 26,000 cubic yards of fill (approximately 53,500 cubic yards of earth work) which will be balanced on site.	MND	11/05/2012
2012101021	Santa Maria High School New Classrooms at Broadway Santa Maria Joint Union High School District Santa Maria--Santa Barbara SMJUHSD proposes to construct a new toy-story 14-classroom wing at SMHS. The new classroom building will be placed on the northeast section of the campus adjacent to the existing Ethel Pope Auditorium. A new quad area will be formed by the new building and other existing buildings; a new band shell is planned for performances. No changes to the existing ingress/egress are proposed. Construction of the new classroom building is expected to take place over approximately 14 months, commencing in May 2013.	MND	11/05/2012

2012101023	Planned Development/Zone Change (PD12-01/ZC12-02) - City of Brawley Downtown Specific Plan Brawley, City of Brawley--Imperial A Planned Development/Specific Plan (PD12-01) and zone change (ZC12-01) for a Mixed Use Overlay Zone for the downtown area consisting of 110 acres and eventually accommodating 942 dwelling units and a population of 3,053. The property is currently zoned R-3 (Residential Medium Density), C-2 (Medium Commercial), M-1 (Light Manufacturing), M-2 (Heavy Manufacturing) P-F, and R. The project will allow mixed uses per the Downtown Specific Plan according to 8 frontage types: Downtown Civic, Civic Center Main Street, Civic Center Neighborhood, West Village Main Street, West Village Neighborhood, East Village Main Street, East Village Neighborhood, East Village Enterprise. Currently, 1,075 parking spaces are provided. An estimated 580 additional spaces would be provided with implementation of the plan.	MND	11/05/2012
2012101024	Venoco Platform Holly Power Cable Replacement Project California State Lands Commission Goleta--Santa Barbara Venoco, Inc. proposes to replace the existing 46-year-old, 16.5 kilovolt power cable between the Ellwood Onshore Facility (EOF) and Platform Holly as part of repair and maintenance. The new power cable would be sized as an in-kind replacement, with similar electrical power transmission capability to support existing operations and newer technology fiber optics to replace existing wire telecommunications. The replacement cable would follow the general route of the existing cable through existing easements. It would begin at the EOF and be routed underground to a Horizontal Directional Drilling (HDD) site just west of the EOF fence, then via a HDD-installed conduit under the beach and surf zone to a HDD exit pit on the seafloor. The cable would then be laid on the seafloor to Platform Holly and installed in a new 8-inch diameter "I" tube riser on the Platform.	MND	11/05/2012
2012102014	Honda and Volkswagon Dealerships Vacaville, City of Vacaville--Solano The proposed project will include the construction of a 35,636 sf, two-story building for a Honda dealership and a 21,108 sf, two-story building for a Volkswagen dealership. Each building will contain a showroom, tech facility, delivery and customer service support facilities, servicing and parts support facilities, and a reception service. The 7-acre site will include 533 parking spaces for employees, customers and new vehicles, and associated infrastructure. The subject site will be accessed via two driveway entrances along Orange Drive.	MND	11/05/2012

<u>Documents Received on Friday, October 05, 2012</u>			
2012102018	Wise Villa Winery Community Center (PMPB 20120092) Placer County Lincoln--Placer The project proposes a Minor Use Permit to expand the uses allowed at the site to enable the existing winery/tasting room to function as a "Community Center", and a Variance to allow for an all-weather surface throughout the overflow parking area to facilitate large agricultural equipment movement throughout the vineyards.	MND	11/05/2012
2012102019	Vineyard Pointe Elementary School Project Elk Grove Unified School District Elk Grove--Sacramento The EGUSD proposes to construct a new elementary school approximately 95,000 sf in size to accommodate 850 students under a traditional schedule. The project would include administrative offices, classrooms, a library, and a cafeteria / multi-purpose room. In addition, the project would provide outdoor athletic / recreational facilities with features such as hard courts and turf play fields. The proposed project would be developed over a 16-month period and would be comprised of five phases.	MND	11/05/2012
2000071051	Murrieta Creek Phase 2 U.S. Army Corps of Engineers Murrieta, Temecula, Wildomar--Riverside The U.S. Army Corps of Engineers (Corps) proposes to construct various improvements to provide flood control, a multi-purpose trail, and higher quality riparian habitat along the existing Murrieta Creek Channel within the location described below. The project will increase the channel capacity by excavating a wider and deeper channel section. Riprap and soil cement are proposed to protect the banks from erosion. The project will also include the establishment of a riparian corridor to provide higher quality native habitat for wildlife species. The Corps is the Federal lead agency and will construct the project. The District owns the channel right of way, will provide funding, and will operate and maintain the project.	NOP	11/05/2012
2012101019	LAX Runway 7L/25R Runway Safety Area (RSA) Project and Associated Improvements Los Angeles World Airports Los Angeles, City of--Los Angeles NOTE: Review Extended Per Lead LAWA prepared an RSA Practicability Study and concluded that the existing RSA for Runway were needed. Additionally, Runway 7L/25R, as the primary departure runway on the south airfield, and its connecting taxiways which provides the main access to both runways, handle a large amount of traffic. Due to heavy usage the pavement on the east end of both the runway and taxiways has deteriorated over the years and needs reconstruction. The reconstruction of the runway and taxiway will force their temporary closure and necessitate the extension of Taxiway C to maintain access to Runway 7R/25L. To comply with FAA standards for taxiway centerline to fixed or movable objects, Air Freight Building No. 8 will be demolished and the Ground Service Equipment (GSE) maintenance uses currently housed in the building, relocated to a new GSE Maintenance Facility. 2009032075	PA-0900009(TE) San Joaquin County Lodi--San Joaquin One year time extension for an approved use permit application for the expansion of an existing large winery in four phases over ten years.	Neg	11/05/2012
2012102015	423-451 Page Mill Road Palo Alto, City of Palo Alto--Santa Clara The proposal is to rezone four existing properties from Single Family Residential (R-1) to Service Commercial (CS) as well as a Land Use Map Designation amendment from Single Family Residential to Service Commercial.	Neg	11/05/2012
2012102016	PA-1200183(SA) San Joaquin County Lodi--San Joaquin A site approval application to expand an existing farm services operation installing irrigation system for farmers in two phases over five years (use type: farm services). Phase one includes the construction of a 9,000 sf warehouse building. Phase two includes the construction of 9,000 sf warehouse building.	Neg	11/05/2012
1999111130	Westlake Village Community Park/Triunfo YMCA Westlake Village, City of Westlake Village--Los Angeles The proposed project consists of developing a multi-purpose recreational park and sports complex, with a YMCA facility.	SIR	11/19/2012
2002011085	Carpinteria Valley Water District's Water Storage Tank Project and Rancho Monte Alegre Annexation Carpinteria, City of Carpinteria--Santa Barbara The Permitte proposes to complete a previously started project under notification no. 1600-2010-0255-R5. The project consists of a span bridge to replace an existing temporary rail car bridge with the new bridge. The new bridge will be a 108-foot long pre-fabricated steel truss bridge with a concrete deck and the existing ranch road was already realigned to provide an adequate turning radius. Bin walls have been installed to protect the road bank from storm flows and several storm drain outlets have been installed on Santa Monica Creek and its ephemeral tributaries.	NOD	
2005121165	Motel Inn Siphon San Luis Obispo, City of San Luis Obispo--San Luis Obispo The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code to the Project applicant, Mr. Freddy Otte. The Project consists of replacing an existing sewer line that has become exposed as it crosses the Creek with a new, 6-inch diameter high density polyethylene (HDPE) line that will run approximately 12 feet below the existing grade of the Creek. The line will be installed utilizing horizontal direction drilling (HDD) that will require drilling pits to be located on either side of the creek approximately 150 feet from tops of banks. An existing, stable gravel bar on the east side of the creek will be used as a staging area for emergency equipment should a frac-out occur. Requirements for Contingency Plans for cleanup operations in the event of frac-out have been made part of the Streambed Alteration Agreement.	NOD

	Agreement Number 1600-2012-0266-R3 is pursuant to Fish and Game Code Section 1602.		
2012108098	Dolcini Ranch Channel Restoration Fish & Game #3 --Marin The project involves restoration of 1,250 feet of creek channel that was previously altered without agency approval. The 250-foot upper section will be recontoured and graded. Three spot treatments will occur within the 1000-foot lower section. New planting and fencing will be installed along the entire reach. Issuance of a Streambed Alteration Agreement Number 1600-2012-0344-R3 is pursuant to Fish and Game Code Section 1602.	NOE	
2012108099	Bear Creek #3 Barrier Notching Project Fish & Game #3 Woodside--San Mateo The Project consists of the lowering by notching a small concrete and rock dam to remove a barrier to migrating steelhead and to provide access of up to 12 additional miles of habitat. The existing notch of the dam lowered approximately 4 feet to reduce the steelhead jump height over the dam. The notching of the dam will be accomplished by hand with pneumatic rock hammers powered by an off-site air compressor. The mortar that currently holds the small boulders together will be chipped away until each boulder can be manually removed. Removed grout and smaller debris will be prevented from entering the stream during project activities by placing tarps and canvas hammocks under the work area. The collected debris will be hauled out of the area by people and disposed of at an offsite location.	NOE	
2012108100	Transportation Worker Identification Credential and Communications Infrastructure Project Fish & Game #3 -- Installation of a communication and fiber optic cable line which will connect Building 120 on Rough and Ready Island to the Port of Stockton's administration building in the Port East Complex. The communication line will be installed under the San Joaquin River by horizontal directional drilling. Issuance of a Streambed Alteration Agreement Number 1600-2012-0186-R3 is pursuant to Fish and Game Code Section 1602.	NOE	
2012108101	Line 191 Tributary to East Antioch Creek Crossing ECDA Project Fish & Game #3 Antioch--Contra Costa The project is limited to the excavation for inspection and repair of an approximately 14-foot long, 8-foot wide and 14-foot deep trench within a freshwater marsh within the banks of an unnamed tributary. Within the freshwater marsh, 21 cubic yards of soil will be excavated over an approximately 392-square-foot area using a mini-excavator to expose the approximately 14-foot long section of the gas pipeline for inspection. No work will be conducted in the normal flowing channel and work will occur when the tributary is dry. Additional construction equipment will be staged within an approximately 0.15-acre area of ruderal vegetation of top of the hill. Issuance of Streambed Alteration Agreement Number 1600-2012-0229-R3 is pursuant to Fish and Game Code Section 1602.	NOE

	aromatic hydrocarbons- (PAHs), and petroleum hydrocarbons-impacted soils, soil gases, and/or groundwater. The purpose is to eliminate the Potential of human health risks when zoning for land use is changed to residential or redevelopment. The remedial activities include 1) removal of approximately 35,000 cubic yards or approximately 2,200 truckloads of impacted soils to an off-site permitted facility; 2) importation of approximately 42,000 yd3 clean soils or approximately 2,500 truckloads; and 3) dewatering and treatment of chemicals of potential concern (COPCs) in groundwater prior to discharging under permit to a sanitary sewer.		
2010081020	Glen Mor 2 Student Apartments University of California, Regents of the Riverside--Riverside The Glen Mor 2 Student Apartments project, a student housing project approved by the University in May 2011 that is currently under construction, includes restoration of a 0.4 mile stretch of an arroyo that flows along the site's northern boundary, as well as construction of two bridges over the arroyo. The arroyo work was analyzed in the Glen Mor Student Apartments Environmental Impact Report (EIR) (SCH#2010081020), which the University certified in May 2011.	NOD	
2011091080	Major Modification 11-04-0001 (CR&R Green Energy Facility) Perris, City of Perris--Riverside The revised permit allows for the following: 40,000 square foot expansion of the MRF, anaerobic digester, biogas flare, biogas storage tank, biogas clean up system, Biofilter and RNG fueling station. Also, the permit allows the anaerobic digester to operate 24 hours per day Monday through Sunday, and increase the permitted operations area from 1.11 to 8.03 acres.	NOD	
2012108113	Memorial Park Channel Clean Out Parks and Recreation, Department of --Nevada Clean out the Magenta Drain channel in Memorial Park adjacent to Empire Mine State Historic Park to remove mining- derived sediment.	NOE	
2012108114	Long Canyon Dispersed Campground Improvements Parks and Recreation, Department of --El Dorado The Long Canyon Dispersed Campground Improvement Project includes designating for authorized travel two very short (380 feet total) existing but unauthorized roads that provide access to a dispersed camping and parking area, installing a pre-fabricated vault toilet to provide sanitation facilities for this area, and constructing road drainage structures to reduce erosion on Road 14N08A. The project also includes installing barrier rocks that would camping areas. The barrier rocks would prevent further soil compaction, destruction of vegetation, sedimentation into the creek, and damage to heritage resources. The project also includes installing aggregate base rock to an existing non-motorized trail that accesses Long Canyon Creek. Dead Hazard trees would be removed.	NOE	
2012108115	Chaparral Trail Hill Climb Restoration Parks and Recreation, Department of Hollister--San Benito This project is to close and restore a redundant part of Chaparral Trail in the Upper Ranch of hollister Hills SVRA. Currently there are two steep climbing trails right out of the Sycamore campground, Blue Oak and Chaparral. Both of these trails go to the same place and provide the same type of recreation. The portion of the	NOE

	Chaparral trail is generally less sustainable due to its placement on the slope and is losing more top soil from erosion. The entrance to the current Chaparral Trail is in a desirable location just outside the campground while Blue Oak comes out from the middle of a potential camp site. To better the traffic flow in the campground this project will also re-route the current trail entrance to Chaparral into Blue Oak Trail about 100 feet after the start of the trail. The new connector trail will be about 125 feet long and will avoid existing trees.		
2012108116	Air Pollution Test Plot; Vegetation Islands Parks and Recreation, Department of --San Luis Obispo The purpose of the Oceano Dunes SVRA 2012/13 Restoration Program is to stabilize, restore or maintain the ecological integrity and function of the native habitat found within Oceano Dunes SVRA. Without programs to stabilize certain areas of moving sand and habitat islands, active sand movement can displace established native plant habitats and soil. A continual invasive exotic species program to restore the area back to its historical plant community composition will also be used to prevent native plant community loss.	NOE	
2012108117	Bootjack Campground Improvements Parks and Recreation, Department of --Marin Improve campsites at Bootjack Campground in Mt. Tamalpais State Park to increase visitor access and comply with the Americans with Disabilities Act (ADA) and meet requirements in the "California State Parks Accessibility Guideline". Work will convert 13 to 35 existing picnic sites to campsites, add two new sites to meet ADA requirements and grade to install a two feet high by 35 foot long retaining wall. Additional work will install two ADA parking spaces to the adjacent parking area bringing total ADA parking to four spaces and total parking to 40.	NOE	
2012108118	Chip Seal Project Caltrans #1 --Shasta, Lassen Using only State funds, the California Department of Transportation (Caltrans) will place a chip seal on approx. 13.8 mi. of (SR) 44 in Shasta County and approx. 10 mi. of (SR) 139 in Lassen County. All work will remain within the existing roadbed hinge points and no work will occur on bridge decks. Specific pull-outs have been identified for staging and stockpile use. Description is attached. The pavement is at the age where a preventive type treatment will extend the service life of the road before it needs major repair.	NOE	
2012108119	Chip Seal - West of Cedar Pass Caltrans #2 --Modoc Using only State funds, the California Department Transportation (Caltrans) will place a chip seal over the paved surface of approx. 6.1 mi. of (SR) 299 west of Cedar Pass in Modoc County. All work will remain within the existing roadbed hinge points and will not include work on bridge decks. Specific pull-outs have been identified for staging and stockpiling use.	NOE

2012032024	Daly City General Plan and Coastal Element Update Daly City Daly City--San Mateo The proposed General Plan includes goals, policies, and specific tasks that give direction to land use, transportation, conservation, and other issue areas that affect city growth and development through the year 2030. The plan represents the City's attempt to improve the lives of existing residents while accommodating and planning for the needs of future residents.	EIR	11/26/2012
2012061052	Northeast Annexation Area and Skyridge VTTM Mission Viejo, City of Mission Viejo--Orange The proposed project includes both a development proposal by Standard Pacific Corp. and an annexation initiated by the City of Mission Viejo. The project applicant, Standard Pacific Corp., is proposing to construct 84 single-family detached residential dwelling units on an approximately 28.45-acre project site. Although the subject site is located in unincorporated Orange County, the applicant is proposing to annex the property into the City of Mission Viejo, which would be responsible for approving the proposed residential subdivision. The Skyridge site, which includes development of approximately 28.45 acres with 84 homes, would equal 2.9 dwelling units per acre and fall into the City's lowest density residential classification, which is 0 to 3.5 dwelling units per acre. Therefore, the project includes a proposal to designate the site as Residential 3.5 on the Land Use Policy Map on the General Plan and as RPD 3.5 for the zoning district. This property is currently designated Open Space and 1B (Suburban Residential) on the County's General Plan and is zoned A-1/SR and RHE-10000 PD.	EIR	11/26/2012
2009012054	Walnut Creek BART Station Transit Village Walnut Creek, City of Walnut Creek--Contra Costa NOTE: Final 1 - Hard Copy The Project site is located at 200 Ygnacio Valley Road (Walnut Creek BART Station). The Applicant proposes to redevelop existing on-site surface parking lots with a mixed-use residential and commercial complex, including 596 residential units, 22,000 sf of commercial/retail, 16,700 sf of flex space (for commercial or residential use), and 4,000 sf of office space. The Project would also involve circulation improvements, landscaping, and construction of new parking facilities. The existing CCCTA bus terminal would be relocated and expanded. The Project would require General Plan and Zoning Amendments, Tentative Map Approval, Design Review Approval, Building Permits, Grading and Excavation Permits, and a Tree Removal Permit. For a detailed project description, please refer to chapter 3 of the Draft EIR.	FIN	
2012041067	Simbol Calipatria I Plant Project CUP #12-0004 Imperial County Calipatria--Imperial FYI - Final Simbol, Inc. is proposing to construct and operate the SmCP-1, a commercial mineral extraction plant in the Salton Sea Known Geothermal Resource Area. The facility would use geothermal brine from the existing HR-1 geothermal flash plant to produce lithium carbonate, lithium hydroxide, hydrochloric acid, zinc, and	FIN

	manganese products for commercial sale. After the geothermal brine is processed, it would be returned to HR-1 for injection into the geothermal reservoir. In addition to the mineral extraction and processing facilities, the project includes geothermal brine supply/return pipelines, new driveway access from Davis Road and from McDonald Road, a new power line and substation, paving McDonald Road, between SR 111 and English Road and three options for off-site upgrades to the Imperial Irrigation District's existing transmission system.		
2012101028	ENV-2012-1958-MND / 1824 N. Highland Avenue Los Angeles, City of --Los Angeles The Project includes the construction of a six-story, 60-foot tall building with 118 residential dwelling units that include a manager's unit, 216 parking spaces, and a total of approximately 166,000 sf of floor space. The project involves the export of approximately 58,000 cubic yards of dirt. The project requires a Site Plan Review for the development of 50 or more new dwelling units.	MND	11/07/2012
2012101029	ENV-2004-5331-MND-REC1 / 11201 Chalon Road Los Angeles, City of --Los Angeles The project is the construction of a single-family dwelling, accessory living quarters, staff quarters, tennis pavilion, pool cabana and gate house on a 7.88 acre site. The main residence will be 35'9" in height and is 32,604 sf of floor area in size. The combined accessory buildings will have a total floor area of 12,990 sf. Total combined floor area for all the buildings is 50,443 sf. The project site was previously graded, (from previous approvals in 2006-2009) and a waiver of the tract map requirement per (Section 91.70068), creating two building pads and retaining walls for the construction of two single family residences. The revised development is within the boundaries of the previously graded pads. There will be two driveways, one located on the southwestern corner of the site with access to/from Chalon Road and a secondary access point would be provided to/from Chalon Road at the northwestern portion of the project site. The requested entitlements are for a Parcel Map Exception, Lot Line Adjustment to merge four lots into one legal lot, and for a Haul Route Permit for exporting soil.	MND	11/07/2012
2012101030	LU10-0069 Ventura County Malibu--Ventura amp Hess Kramer, Inc., the applicant, requests approval of a CUP (Case No. LU10-0069) to: (1) operate a camp known as "Camp Hess Kramer;" and, (2) conduct temporary outdoor festivals, not to exceed 60 events annually. The request for a CUP life of 20 years within an option to extend the CUP for an additional 20 years with a minor modification.	MND	11/07/2012
2012101031	Family Dollar Commercial Development Zoning Text Amendment & Lot Line Adjustment Holtville, City of Holtville--Imperial The project site is composed of two parcels (APN's 045-282-001 and 045-282-002) in a commercial area zoned Downtown B. The proposed project would consist of demolishing the existing structures and constructing a new 8,320 sf Family Dollar commercial retail facility. The proposed project would require a lot line adjustment as well as a zoning text amendment to change the requirements from a 10-foot minimum setback in the Downtown B Zone and enable the	MND	11/07/2012

2008042077	Noble Gulch Sewer Improvement Project Santa Cruz County Sanitation District Capitola--Santa Cruz The Noble Gulch Sewer Improvement Project involves the replacement of approximately 6,600 linear feet of 12-inch sewer pipeline between Capitola Avenue and Soquel Drive. Presently, the pipeline is located along the bottom of the gulch in a riparian corridor. The proposed project would realign the sewer pipeline in public streets where feasible. The project would replace aging sewer infrastructure, improve efficiency of the sewer network, and relocate a pipeline out of potentially environmentally-sensitive areas.	NOD	
2012071046	Replacement of Chapters 12.04 and 12.16 of the Pacific Grove Municipal Code Pacific Grove, City of Pacific Grove--Monterey The proposed project is the replacement of Chapters 12.04 and 12.16 - Tree Preservation and Protection of the Pacific Grove Municipal Code with Chapters 12.10 to 12.90 - Trees and Urban Forest. Additionally, the City Council will formally adopt a new set of Urban Forestry Standards designed to provide additional direction and clarification regarding the protection and management of the City of Pacific Grove's urban forest. The purpose of the proposed project is to address urban forestry practices on a city-wide basis and to require a more comprehensive set of tree management standards that will apply to both private and public land.	NOD	
2012071066	Berry Petroleum Company (BPC) Project San Joaquin Valley Air Pollution Control District --Kern Berry Petroleum Company (BPC) has proposed to install five (5) 85.0 MMBtu/hr gas fired steam generators. Four (4) 85.0 MMBtu/hr steam generators will be located at the existing McKittrick Oilfield (21Z Lease) and one (1) 85.0 MMBtu/hr steam generator will be located at the Midway Sunset Oilfield (Ethel D Lease). In the future, BPC plans to install an additional four (4) 85.0 MMBtu/hr gas fired steam generators and add 255 thermally enhanced oil recovery (TEOR) wells within the existing Ethel D Lease site. Construction will occur over a 5 1/2 year period.	NOD	
2012081062	Conditional Use Permit #2012-010, Lotus Solar Farm Madera County Madera--Madera 41 MB 8ME, LLC is proposing to install a solar energy facility that would allow up to 90 MW of power generation. The proposed site is located on approximately 459 acres northwest of the intersection of Road 33 and Avenue 13, (no situs) in Madera. Approximately 175 acres of the subject parcel is not intended for project development, but will be left to its existing use, including a shop building, almond orchard, and fallow ground. The facility proposed consists of free standing ground mounted photovoltaic panels as high as twenty feet from ground level. An operations and maintenance building is proposed onsite, including an office, restroom, storage, control room, and a septic tank and leach field. A parking lot will serve the building, with access from Road 33. The property would be surrounded with a chain link fence for protection.	NOD

	to create level surfaces to accommodate the RSA, in conjunction with engineered materials arresting system (EMAS) beds. The relocation of existing vehicle service roads on the east and west ends of the runway is also included in the project. The east vehicle service road would connect directly with SR-68 due to terrain in the project area and would provide access to Tarp's Restaurant as a condition of a Caltrans Encroachment Permit. The proposed project has not changed since the previous EIR; rather, this EIR revises portions of the previous EIR found to be inadequate by the Monterey County Superior Court.		
2011051002	AMC Theater Development Agreement Project Santa Monica, City of Santa Monica--Los Angeles The proposed project would involve demolition of an existing 325 space public parking structure (City Parking Structure #3) and development of an ~83,000 sf theater building with 12 auditoriums (providing ~ 2,197 theater seats), ~ 2,100 sf of retail tenant space, and ~ 1,800 sf of interior restaurant/lounge space that would be open to the public. The proposed project would consist of ~three levels (which include a below-grade level for two auditoriums) and have a height of ~54 feet above grade.	EIR	11/26/2012
2011101031	North Hemet Specific Plan Hemet, City of Hemet--Riverside The Housing Authority of the County of Riverside is seeking the City of Hemet's approval of the North Hemet Specific Plan. The North Hemet Specific Plan would permit a maximum of 442 high-density units (100 units within mixed-use acres) and 83 medium density residential units; 118,919 sf of commercial uses; and 16,335 sf of office uses. The 28.6-acre project site is west of State Street between Oakland Avenue on the south and the multifamily residential land uses north of Menlo Avenue. The North Hemet Specific Plan would establish development standards, regulations, infrastructure requirements, design guidelines, and implementation programs for subsequent development activities.	EIR	11/26/2012
2012062070	Redevelopment of the Beach Boulevard Property Pacifica, City of Pacifica--San Mateo The City of Pacifica is proposing the redevelopment of a 3.5 acre, publicly-owned property located at 2212 Beach Boulevard in the City of Pacifica (the proposed project). The city is proposing to rezone the site to allow for a mixed-use development that would include an approximately 36,500 sf library, and up to 84 attached residential units, a boutique hotel of up to 75 rooms, and a waterfront restaurant of up to 4,500 sf. The library will have a large meeting space which will also function as the City Council chambers and multipurpose meeting room for the community.	EIR	11/26/2012

2012062078	Napa Berryessa Resort Improvement District Wastewater Treatment System Upgrade and Expansion Napa County Resource Conservation District Calistoga--Napa Note: Revised The project includes the land disturbing activities associated with the increase in storage capacity of the wastewater ponds through the construction two near effluent ponds, disturbing 3 acres of oak woodland and grassland. The project site is located in the Lake Berryessa - Steele Canyon Arm Drainage on the west side of Steele Canyon Road approximately 6.0 miles east its intersection with Highway 128.	MND	11/09/2012
2012101038	Boeing S-50 Building Addition El Segundo, City of El Segundo--Los Angeles The applicant is proposing to build the addition to match the height of the existing office building. The El Segundo Municipal Code definition of height and how it is measured has changed since construction of the original S-50 building. When originally constructed, the building was considered 45 feet tall, which is compliant with the CO Zoning District height limit for parcels not adjacent to residentially zoned property west of Sepulveda Boulevard. As a result of changes to the ESMC height definition, the existing office building is now considered up to 49 feet tall. The applicant's variance request is to allow the new addition to be built to match the height of the existing building. This will result in efficiencies in design and building operation, as the proposed three floors of the addition will then align with the three floors of the existing building.	MND	11/09/2012
2012102030	Murray Elementary School Kindergarten Classroom and Parking Lot Project Dublin Unified School District Dublin--Alameda The project would demolish one kindergarten building and two day care buildings and replace them with two kindergarten buildings containing 7,200 sf and one day care building containing 1,920 sf. The parking lots would be reconfigured and expanded to provide 89 parking spaces and student drop-off drive way.	MND	11/09/2012

2006092057	<p>Geotechnical Investigations for the I-80 Across the Top Bus/ Carpool Lanes Project Caltrans #3 Sacramento--Sacramento</p> <p>DFG issued the existing CESA ITP in order to address and authorize, as fully mitigated, the incidental take of giant garter snake (<i>Thamnophis gigas</i>), a species designated as threatened under CESA. Minor Amendment No. 1, as approved, modifies the previously issued CESA ITP, modifying the 2012 work window by allowing work to continue until November 30, 2012, requiring the installation of snake-fencing, and by requiring the submittal of weekly monitoring reports. In approving Minor Amendment No. 1, the DFG determined, among other things, that no substantial increase in the nature of scope of the previous authorization provided by the CESA ITP, and that no new significant or substantially more severe environmental impacts than previously considered and disclosed would occur.</p>	NOD	
2007102030	<p>San Antonio Backup Pipeline Projects San Francisco, City and County of --Alameda</p> <p>The project consists of installing approximately 7,000 foot long, 66-inch diameter backup pipeline (e.g. the San Antonio Backup Pipeline) extending from Alameda Siphon No. 3 (located near the San Antonio Pump Station), along the west side of Calaveras Road, to a new discharge facility on the southern slope of an existing quarry pit. The project would provide reliable conveyance capacity for planned and emergency discharges of Hetch Helchy water of the SFUC regional water system under future flow conditions.</p>	NOD	
2008091026	<p>Topaz Solar Farm (Optisolar) Conditional Use Permit (DRC2008-00009) San Luis Obispo County --San Luis Obispo</p> <p>The Project includes installing and operating arrays of photovoltaic modules and associated electrical production and transmission infrastructure. The Project will tie directly into the existing Pacific Gas and Electric Morro Bay/Midway 230 kV transmission line. Project construction will take approximately three years. The Project will result in impacts to 3,510 acres of San Joaquin Kit fox habitat. The Project is expected to result in incidental take of San Joaquin kit fox, which is designated as a threatened species under the California Endangered Species Act. The incidental take permit for this Project, as issued by the Department of Fish and Game, authorizes incidental take of species listed under CESA that may occur as a result of Project implementation. Minor Amendment 3 to the ITP extends by 20 additional days the time period to transfer fee title to DFG or record conservation easement for the Phase 1 habitat mitigation lands. The activities covered in the ITP and the extent of habitat compensation lands is unchanged.</p>	NOD	
2010072001	<p>Downtown Community Plan (Formerly Midtown Community Plan) Fremont, City of Fremont--Alameda</p> <p>The Downtown Community Plan and Downtown District rezoning is an implementation program of the General Plan 2035 Community Plan Element. The Downtown Plan allows for development totaling approximately 2.5 million square feet of commercial and office development and 2,500 multi-family housing units, including existing development, within the Fremont City Center. The project also includes adoption of design guidelines and zoning standards to implement the Downtown Plan.</p>	NOD

2012082032	Phase 2 Meridian Farms Fish Screen Project Fish & Game #2 --Sutter MFWC is proposing to remove the existing Meridian Diversion/Pumping Plant along the Sacramento River in the vicinity of the Town of Meridian, Sutter County CA and replace it with a new diversion/pumping plant equipped with retractable cylindrical fish screens to preventing entrainment of migrating, at-risk, native fish species. The project would also include improvement of the Main Canal to increase flow capacity to the Drexler Service area, extension of the Drexler Pipeline, and construction of a new Drexler re-lift pump station on the Main Canal east of the Sacramento River. The existing Drexler Diversion/Pumping Plant located south of the Meridian Diversion on the Sacramento River would be removed. The Proposed Project/Action would not increase MFWC's overall diversion capacity from the Sacramento River. All work would be performed in compliance with Reclamation Board, CDFG, NMFS, and the U.S. Fish and Wildlife Service requirements.	NOD	
2012082080	48-inch Force Main Reliability Improvement Project (CIP No. 6001) South Bayside System Authority San Carlos, Redwood City--San Mateo SBSA is proposing to construct and install a replacement 48-inch high density polyethylene (HDPE) sewer force main. The 48-inch (project) section of the force main is located between the Redwood City and San Carlos Pump Stations within the cities of San Carlos and Redwood City. The project is part of the SBSA's overall Capital Improvement Program which replaces and upgrades aging infrastructure, and will ensure the reliable operation of the overall sanitary sewer conveyance system. The new force main is intended to reduce the likelihood of spills and discharge of untreated wastewater to surrounding environments, which has occurred with the existing reinforced concrete pipe sewer force main. The existing 48-inch force main would remain in place but not function as a sewage transmission line.	NOD

	designations.		
2012052061	Halus Power Systems Wind Turbine (PLN2012-00006) San Leandro, City of San Leandro--Alameda The proposed project is an 80-foot tall, single wind turbine to be located at 2539 Grant Avenue, San Leandro, CA 94579. Blades will extend an additional 20 feet from the structure for a maximum height of 100 feet. The turbine will operate at times when wind conditions are suitable and the blades will rotate at a maximum of 44 rpm's. The proposed turbine will generate a peak of approximately 50 kW of electricity. The annual production is expected to be about 75,000 kWh's. Noise levels for the proposed wind turbine are anticipated to not exceed 55 dBA. The proposed wind turbine will be located on a monopole in the interior of the site. Structures up to sixty (60) feet in height are permitted in the IG Zoning District and a variance to height is required for exceeding 60 feet. The proposed tower would be an accessory use to the primary manufacturing/R&D use of the site.	MND	11/13/2012
2012062024	Angelo Coast Range Visiting Researcher Housing University of California, Berkeley --Mendocino The University previously issued an IS and proposed MND analyzing the environmental effects of the proposed Angelo Coast Range Reserve Replacement Housing project (SCH #2012062024), which was circulated for review from June 11-July 10, 2012. The University has revised the project description and will therefore not finalize the previously circulated IS and proposed MND. The campus proposes to construct 5 structures to provide housing for visiting researchers and students at the Angelo Reserve, located on the South Fork of the Eel River. The Reserve is one of 38 field stations owned and managed by the University of CA as part of its Natural Reserve System. The new buildings would be built in 2 phases: Phase I would consist of a 2-bedroom apartment (900 sf) and an 8-bed bunkhouse (400 sf); Phase II would consist of demolition of a 1950's Headquarters house (1320 sf) that is in poor condition that currently houses 6 beds, the construction of two 8-person bunkhouses (400 sf each) and a common kitchen/dining hall (1500 sf) with laundry and bath facilities that would serve up to 25 visiting researchers who use the Reserve on a temporary basis. Currently the Reserve has capacity to house 45 visitors. At the completion of the project, the Reserve would have the capacity to house up to 20 additional visitors in new buildings totaling 2300 sf net (after demolition of the HQ house).	MND	11/13/2012
2012101039	Comprehensive Airport Land Use Plan Update Tulare County --Tulare Note: Refer to MND submitted 10/25/12. The project is a Countywide update to the Tulare County Comprehensive Airport Land Use Plan. Changes to the plan include an update to the Safety, Noise, Overflight, and Height policies and safety zones. The Countywide plan update affects Visalia, Tulare, Exeter, Woodlake, Sequoia, Eckert, and Porterville Airports and their surrounding communities.	MND

2012101040	<p>Billboard Removal and Reconstruction Agreement at 410 & 446 Cloverleaf Dr. Baldwin Park, City of Baldwin Park--Los Angeles</p> <p>The proposed project includes the removal and replacement of three existing static billboard sign faces with electronic/digital sign displays (i.e. "digital billboards"). These three billboards are located on two separate structures (both structures support two sign faces, but only one structure would have two digital sign faces; the other structure would retain one static sign face). The applicant would construct, maintain, and operate the new digital billboards under the terms of a development agreement. The proposed new sign faces are 48 feet in width by 14 feet in height. Total height of the proposed new billboard structures would be 48 feet from existing grade. Construction would include removal of the existing structures, drilling of footings, concrete placement, electrical upgrades, and minor landscaping; each structure would require 6 construction days.</p>	MND	11/13/2012
2012101041	<p>Wastewater Treatment Facility Expansion and Upgrade Farmersville, City of Farmersville--Tulare</p> <p>The City of Farmersville proposes to upgrade its wastewater treatment facility (WWTF) and expand the capacity of its WWTF from 1.25 million gallons MGD to 1.4 MGD. To accommodate the expansion, it is anticipated that the City will acquire approximately 17 acres from the adjacent land owner to the north of the existing facility. The proposed project consists of an Aeration Lanes (Extended Aeration) design. The proposed project includes aeration lanes activated sludge process with nitrification/denitrification to provide secondary treatment of the wastewater prior to discharging the effluent to percolation/storage basins.</p>	MND	11/13/2012
2012101042	<p>AT&T Wireless Communications Facility at CA State University Monterey Bay California State University Trustees Seaside--Monterey</p> <p>The proposed project includes the construction and operation of a wireless communications facility in the form of a faux water tank (the project). The design of a faux water tank is meant to create conformity of the wireless communications tower with the surrounding area and reduce potential visual impacts. The faux water tank is proposed to house the wireless communications system would be 20 feet in diameter and 70 feet in height. An equipment building approximately 13.5 feet in height and 29 feet in width would be constructed immediately adjacent to the faux water tank. All project components would be located on a concrete support slab and surrounded by a security fence.</p> <p>The purpose of the proposed project is to improve wireless communications capacity and capabilities on the CSUMB campus, including CSUMB's East Campus Apartments, and surrounding area.</p>	MND	11/13/2012
2012101044	<p>Pebble Beach Community Services District Undergrounding Overhead Utilities Program Pebble Beach Community Services District --Monterey</p> <p>The proposed Undergrounding Overhead Utilities Program is a multi-year, phased program with the goal of undergrounding approximately one mile of overhead utilities each year until all of the main lines have been undergrounded. The first phase of the project includes undergrounding approximately 1.25 miles of overhead utility lines from Congress Avenue, where David Avenue in Pacific Grove terminates, south along Colton Road toward the PG&E stepdown located on Lopez Road at Forest Lake Road. After Phase I is completed, PBCSD staff</p>	MND	11/13/2012

	estimates there are approximately 10 miles of remaining main electric distribution lines overhead that would be undergrounded in future phases of the program. All undergrounding is proposed within the existing paved roadway of road right-of-way.		
2012102031	American Family Entertainment Center Rancho Cordova, City of Sacramento--Sacramento Phase I of the project consists of a new 72,682 sf entertainment center building on the eastern end of the 13.2-acre development site, 708 ground-level parking spaces, and landscaping, lighting, and other site improvements. The building will contain eight theaters with a total of 1,402 seats, 24 bowling lanes, a laser tag area, an elevated ropes course, amusement games, shuffleboard, billiards, a bar/lounge, event rooms, concessions, and restrooms, as well as storage areas, employee areas, and a kitchen. Phase II consists of an expansion of the entertainment center building with eight additional bowling lanes and two 500-seat theaters, as well as 20,000 sf of retail uses, and a new 3,600 sf.	MND	11/13/2012
2012102033	Newport Pointe Contra Costa County --Contra Costa Subdivide 20-acre project site into 67 residential lots with open space and 6 acres of preserved/created wetlands.	MND	11/13/2012
2012102035	Indian Springs Expansion Project Calistoga, City of Calistoga--Napa The project involves resort expansion by adding 75 guest rooms (i.e. 9 8-unit bungalows and 3 cottage units), a restaurant, conference facility (i.e. Event Building), gym & yoga studio and hotel registration building. Landscaping, new parking areas, driveways and pedestrian pathways will also be developed. On and off site water, sewer, recycled water and storm drainage improvements will be installed to serve the project. The off site improvements will include the construction of new sewer and storm drain lines across the adjoining Gliderport property using a subgrade "jack and bore" method. The existing tennis court, several out buildings, trees, and mud ponds will be demolished and/or removed from the property to accommodate the expansion. The project requires approval of a CUP and Design Review. The Developer has also requested a Development Agreement.	MND	11/13/2012
2003041105	City of Anaheim Housing Opportunities Sites Rezoning Project Anaheim, City of Anaheim--Orange The City of Anaheim Housing Opportunities Sites Rezoning Project is proposed to implement the Housing Element's Housing Production Strategy 1V to rezone properties identified as Housing Opportunities Sites to facilitate "by-right" residential development at these locations. In addition, the City proposes to update the General Plan's Land Use Build-out Estimates and facilitate streamlined review per the Statutory Infill Housing Exemption and SB 226 (Simitian, 2011). 	<p>The FRV Valley Solar Project is a proposal to construct and operate 3 solar photovoltaic power generating facilities that would generate a combined 115 megawatts of electricity, on three sites totaling 1,063 acres in unincorporated portions of Kern County, California. The project sites are within the jurisdictional boundaries of the Kern County General Plan. Currently; all the parcels are zoned A (Exclus. Agric) with map code designations 8.1 and/or 8.4.</p> <p>The project includes proposed CUPs and General Plan Amendments to amend the Circulation Element of the Kern County General Plan. The GPA requests are to eliminate future road reservations along midsection lines of Sections 22 and 27, T30S, R29E, MDB&M and S34, T32S, R28E, MDB&M, in order to remove the required setbacks on the subject parcels. There are no existing roads developed along any of the subject midsection lines. In addition, the project includes a request to cancel Williamson Act Land Use Contracts on approximately 1,010 acres of farmland. 16 of the 19 parcels are under Williamson Act Land Use contracts (1,010 acres) and cancellation of the contracts is required.</p>

2011101029	<p>Authorizing Helicopter Landings By the CDFG for Capturing Sierra Nevada Bighorn U.S. Forest Service Bishop--Inyo, Mono</p> <p>The Inyo National proposes to authorize helicopter landings by the CDFG within designated wilderness areas for the purposes of population monitoring and translocation of endangered Sierra Nevada bighorn sheep. This action is needed to meet recovery actions established in the Sierra Nevada Bighorn Sheep Recovery Plan (hereafter, Recovery Plan, USDI 2007a). Recovery of this unique subspecies depends on gathering information on habitat use and demographic rates that determine population dynamics through the placement of Very High Frequency and Global Positioning System collars on individual bighorn sheep, as well as augmenting populations of bighorn sheep and introducing animals into currently unoccupied portions of their historic range. These actions require the use of a helicopter in capturing and transport efforts.</p>	NOD

1999062060	Draft 2030 General Plan Danville, City of Danville--Contra Costa The proposed action analyzed by this Draft EIR is the implementation of the Draft 2030 General Plan. The Draft 2030 General Plan is an update of the Danville 2010 General Plan, adopted in 1999. The Draft 2030 General Plan would be the principal policy document to guide future conservation and development in Danville. The Draft 2030 General Plan not only provides concepts for long-term planning through 2030, it also provides overall direction to the day-to-day actions of Danville, its elected officials, and staff. The Draft 2030 General Plan is described in detail in Chapter 3 of the Draft EIR. The proposed Draft 2030 General Plan includes goals, policies, and implementation measures that are intended to achieve the community's vision for Danville. The goals, policies, and implementation measures are to be used by Danville to guide everyday decision-making and to ensure progress toward the attainment of the goals outlined in the plan. 2011041009	Falcon Ridge Substation Project Public Utilities Commission Fontana, Rancho Cucamonga, Rialto--San Bernardino FYI - Final	FIN	
	Southern California Edison proposes to construct a 66/12 kV substation (Falcon Ridge substation) and related facilities, including two 115 kV subtransmission source line segments to connect the proposed substation to the existing Alder and Etiwands substations; construction of three underground 12 kV distribution getaways; installation of telecommunications facilities (i.e., fiber optic cable) to connect the proposed substation to SCE's telecommunications network, and upgrades to the switchrack positions at both existing substations as well as an extension of the operating and transfer buses at Alder Substation.		
2011121051	Cemetery Area Water Pipeline Replacement Project Escondido, City of Escondido--San Diego The proposed project consists of the abandonment of approximately 17,500 linear feet of existing 12- to 24 inch-diameter concrete-lined steel potable water pipeline within the City of Escondido and unincorporated County of San Diego. The pipelines would be replaced with approximately 12,600 lf of new pipe generally ranging between 12 and 24 inches in diameter and comprising steel, ductile iron, polyvinylchloride (PVC), or high-density polyethylene (HDPE) pipe material, as well as PVC or copper service laterals off the main lines. An approximately 5-foot-long section of 30-inch-diameter pipe would provide a connection point near the Oak Hill Memorial Park (Cemetery) entrance. New meters also would be constructed and, in some cases, existing meters would be relocated. The project would include construction of an approximately 2,545-foot-long, 20 inch-diameter HDPE recycled water pipeline which would not be activated until some point in the future. The project also would include construction of an approximately 10-by-20-foot pressure-reducing structure. The project would replace aging potable water transmission and distribution infrastructure, increase water delivery capacity and pressure to the project area, and maintain a reliable water supply and distribution system. The primary objective of the increase in pressure or capacity that could result from the proposed project is to improve the flow of water to existing property owners during a wildfire-related emergency. The existing pipelines would stay in service throughout the duration of construction, and would be capped and abandoned in place following implementation of the proposed replacement pipelines, or removed if necessary to provide room for the replacement lines.	FIN	
2012041067	Simbol Calipatria I Plant Project CUP #12-0004 Imperial County Calipatria--Imperial FYI - Final	FIN	
	Simbol, Inc. is proposing to construct and operate the SmCP-1, a commercial mineral extraction plant in the Salton Sea Known Geothermal Resource Area. The facility would use geothermal brine from the existing HR-1 geothermal flash plant to produce lithium carbonate, lithium hydroxide, hydrochloric acid, zinc, and manganese products for commercial sale. After the geothermal brine is processed, it would be returned to HR-1 for injection into the geothermal reservoir. In addition to the mineral extraction and processing facilities, the project includes

	geothermal brine supply/return pipelines, new driveway access from Davis Road and from McDonald Road, a new power line and substation, paving McDonald Road, between SR 111 and English Road and three options for off-site upgrades to the Imperial Irrigation District's existing transmission system.		
2012101045	R2010-00492/ROAK 201000024/RENV 201000043-1941 Waltonia Drive, Montrose Los Angeles County --Los Angeles Oak Tree Permit to authorize the removal of one oak tree and the encroachment into the protected zone of another, in association with the construction of a 12-unit apartment building (RPP 201000357). The Plot Plan includes the demolition of two existing structures to construct a new three-story apartment building with parking on the first level and units on the second and third levels. The project proposes grading at 800 cubic yards of cut and 950 cubic yards of fill. The project site is currently served by public water and utilities.	MND	11/13/2012
2012101046	Conditional Use Permit 2012-04 Branson Inyo County --Inyo The applicant proposes to build a 30-foot tall communications tower at 1579 Indian Dr., in the Alabama Hills, southwest of Lone Pine, CA and remove a 26-foot existing antenna attached to a garage located next door to the proposed project location at 1601 Indian Springs Dr. The goal of the project is to provide wireless internet access to customers in the Alabama Hills with a more permanent and better functioning facility. The proposed tower at 1579 Indian Springs Dr. will re-transmit wireless internet signals from existing towers located at 125 North Lakeview Street in Lone Pine, and 585 Alabama Drive in the Alabama Hills, making wireless internet service available to residential clients in the Alabama Hills.	MND	11/13/2012
2012101049	Biddle Park Master Plan San Luis Obispo County Arroyo Grande--San Luis Obispo Request by County Parks to update the Biddle Park Master Plan. The Master Plan is a 20 year phased plan that involves reconfiguring and upgrading some of the existing Biddle Park facilities, and the addition of some new facilities to maximize the parks recreational opportunities while maintaining the natural character of the area. Limited grading is needed as the master plan was designed with existing grades. There will be some fine grading but no cut and fill is needed. All development to implement the Master Plan will be done in increments over a 20 year time frame as funding becomes available.	MND	11/14/2012
2012071008	Condition Use Permit Application No. C-12-127 Fresno, City of Fresno--Fresno CUP Application No. C-12-127 requests authorization to construct Water Well Pump Station No. 250A for the City of Fresno. The proposed facility will pump groundwater into the City's municipal water distribution system and has been configured to use water remediation tools such as an iron manganese filtration system, a Granular Activated Carbon treatment system and/or an air stripping tower. The facility will be constructed in three phases.	Neg	11/14/2012

2012101047	San Luis Drainage Feature Reevaluation Demonstration Treatment Facility at Panoche Drainage District Panoche Water District Firebaugh--Fresno Note: EA/FONSI review per lead	Neg	11/16/2012
	<p>Panoche Drainage District proposes to grant an easement and related access to Reclamation for Reclamation's proposed project on constructing, operating, and maintaining for 18 months a demonstration Facility for drainage treatment within the geographical boundaries of the existing San Joaquin River Improvement Project reuse area on land in Fresno County owned by Panoche Drainage District. The Facility would occupy a rectangular area approximately four acres in size. Pipelines would be constructed to convey drainage water from the seven existing reuse sumps to the Facility. Proposed drainage water treatments would include RO, microfiltration (MF) or ultrafiltration (UF), a proprietary biological treatments system for selenium removal, and potentially up to two innovative technologies. Treated water will be returned to the re-use area supply channels for re-application on the reuse project, and solid wastes will be stored in accordance with the Resource Conservation and Recovery Act and disposed of at a Class 1 Hazardous Waste Landfill.</p>		
2012101050	Sapwi Trail at Santa Margarita Lake San Luis Obispo County --San Luis Obispo	Neg	11/14/2012
	<p>A Proposal by The County Parks Division of the General Service Department of the County of San Luis Obispo to construct a 2.5 mile Sapwi Trail is a multi-use backcountry trail that is open to pedestrians, equestrians and mountain bikers. The proposed 2.2 mile extension would provide a more user friendly access to the Parks north shore trail system that includes the Blinn Ranch Trail and Falcon Trail. The propose extension would include grubbing and compaction of approximately 2.5 miles of native soil. The trail width is approximately 3 feet wide and will be located in areas with less than 20 percent slope. No trees will be removed or impacted for the creation of this trail extension. All work will be done with hand tools such as shovels. Pruning of brush will be done with chain saws and hand pruners. Brush will be scattered by hand in the surrounding landscape out of view of the user. Erosion control measures will be used where necessary. No grading is proposed This proposal will disturb 287,496 sf. This is a phased project to be completed by volunteers sections at a time, not to exceed one acre at any one time.</p>		
2011012021	Water Treatment Plant Improvement Project Mountain Gate Community Services District --Shasta	NOD	
	<p>The proposed Project results entails: the construction of a 0.5 MG water tank that is 60 ft in diameter and 27 ft high; recoating the interior and exterior of an existing 0.25 MG water tank to be converted to a recycle water tank to provide water to the Lehigh Cement cooling pond; expansion of the existing 624 sq ft control building by 555 sq ft; installation of an additional 8 ft diameter by 30 ft long horizontal filter; replacement of the existing emergency standby generator; removal of an existing 300 foot long 8 inch vinyl pipeline lying on the surface and replacement with 6 inch diameter PVP piping at a minimum depth of 36 inches; and, lining the existing backwash pond for sludge drying with a high density polyethylene liner.</p>
