

Jerry Brown, Governor

STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**
(Formerly SCH NEWSLETTER)

October 16 – 31, 2011

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **October 16 – 31, 2011**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Director

CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

USPS:

State Clearinghouse
P.O. Box 3044
Sacramento, CA 95812-3044

OR

USPS/Courier Service / Hand Deliveries:

State Clearinghouse
1400 Tenth Street, Room 1113
Sacramento, CA 95814

INFORMATION AVAILABLE ON-LINE

The 2011 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

**ENVIRONMENTAL DOCUMENT FILINGS WITH THE STATE CLEARINGHOUSE
1999 through 2010**

All CEQA documents filed with the State Clearinghouse are available for viewing on the Internet at <http://www.ceqanet.ca.gov/>

<u>Documents Received on Monday, October 17, 2011</u>			
2011092006	<p>Mountain View High School Expansion Project Mountain View-Los Altos Union High School District Los Altos--Santa Clara</p> <p>Construction of two new one-story (up to 20 feet) classroom buildings that consist of a total of 12 classrooms (including restroom facilities) on the existing Mountain View High School campus. The two buildings total ~15,280 sf. The proposed buildings would be located along Bryant Avenue between the existing staff and student parking lots, north of the existing buildings. The Classrooms would be used for art and general education, and operate during normal school hours. The proposed project would allow the School District to accommodate projected growth.</p>	EIR	11/30/2011
2007071029	<p>City of Industry Phase IIB Recycled Water Project Upper San Gabriel Valley Municipal Water District Walnut, West Covina, Unincorporated--Los Angeles</p> <p>Note: Review Per Lead</p> <p>Construct 17 miles of recycled water pipelines and a 2 million gallons recycled water reservoir.</p>	MND	10/31/2011
2011101044	<p>Pratt Mutual Water Company System Improvement Project and Consolidation with the City of Tulare Tulare, City of Tulare--Tulare</p> <p>The project will include installation of transmission mains to provide two points of connection to the City's water system. One transmission main will be located in "I" Street and cross the UPRR continuing along the Goodin Avenue alignment. This transmission main will connect to the City's water system at the intersection of Goodin Avenue and "K" Street. The second transmission main will be located in Pratt and Paige Road, north of Matheny Tract. This transmission main will extend north of Paige Avenue, along the future "E" Street alignment, in an easement across APN 174-030-010 and connect to the City's water system adjacent to Well 40.</p>	MND	11/15/2011
2011102025	<p>HTO Winery (UPE11-0007) Sonoma County Santa Rosa--Sonoma</p> <p>Request for a Use Permit for a winery with a maximum annual production capacity of 10,000 cases with tasting by appointment only, participation in four industry-wide events a year and 15 winemaker dinners with less than 35 attendees. There would be a maximum of five full time employees and the proposed hours of operation for the winery would be 8:00 a.m. to 5:00 p.m., allowing extra hours during crush. The hours for the tasting facility would be from 9:00 a.m. to 6:00 p.m., seven days a week. Wine maker dinners would end by 9:30 p.m.</p>	MND	11/15/2011

<u>Documents Received on Monday, October 17, 2011</u>			
2011102022	Cortopassi Minor Subdivision and Lot Line Adjustment for Three Parcels and a Designated Remainder San Joaquin County Lodi--San Joaquin Minor Subdivision and Lot Line Adjustment between two parcels to result in four parcels. Parcel 1 to contain 10.0 acres, parcel 2 to contain 400 acres, parcel 3 to contain 240 acres and the designated remainder to contain 350 acres. This parcel is under a Williamson Act Contract.	Neg	11/15/2011
2011102024	Waterford Avenue Bridges and Multi-Use Path Project Mammoth Lakes, City of Mammoth Lakes--Mono A new segment of the Main Path envisioned in the Town's adopted Trails System Plan and General Bikeway Plan. The new trail segment would close an existing gap in the Main Path from Old Mammoth Road along Waterford Avenue to a segment of the existing Main Path north of Mammoth Creek near North Waterford Avenue. The new trail segment would require construction of two bridge crossings over Mammoth Creek at the northern terminus of Waterford Avenue. The proposed paved multi-use path would support pedestrian and bicycle use and could be groomed during winter conditions for cross-country skiing use.	Neg	11/15/2011
2011102026	Petition for Extension of Time and Petition for Change Related to Application 20601 Sierra Lakes County Water District --Placer Under the Proposed Project, the time provided to SLCLWD to put all water granted to them pursuant to Application 20601 to beneficial use would be extended from 1995 until 2035. The granting of the time extension would allow SLCWD to continue diverting, treating, and conveying water to its customers. SLCWD has also filed a Petition for Change that would amend the method of diversion under its water right permit to include the direct diversion of water from Lake Serena. The proposed project would not require any new construction by SLCWD.	Neg	11/15/2011
2011081027	PA 100028 - Oak Flat Towers Project Orange County Corona--Orange Note: Response to Comments The project proposes construction of four radio transmitting towers and an equipment building, removing existing site structure and site preparation. The four towers are to be located in the approximate center of the project site equally spaced from each other. The proposed equipment building will be located between towers 3 and 4. Each of four proposed towers will be located within the perimeter security fencing, consists of 10-foot-high Concrete masonry Unit walls.	Oth	
2008102019	Spring Lake Village Expansion and Annexation Project Santa Rosa, City of Santa Rosa--Sonoma The project expands & improves the existing Spring Lake Village community care campus. Improvements to the existing campus include replacement of the auditorium with a new fitness center/auditorium, renovations to the Village Center bldg, renovation of two residential bldgs, & improvements to parking, lighting, & landscaping throughout the campus. The expansion area, located to the west of the existing campus, includes 62 independent living units, bioswales, landscaping,	NOD

	lighting, underground utilities, 41 parking spaces, & a 55-space underground parking.		
2008102079	Northside Bicycle Path Project El Dorado County --El Dorado The California Department of Fish and Game is executing Lake or Streambed Alteration Agreement number 1600-2011-0074-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, El Dorado County - Department of Transportation. The project consists of altering, inserting culverts, and re-routing roadside ditches; as well as adding culvert extensions to accommodate a wider road over Knickerbocker Creek and an unnamed tributary to Kickerbocker Creek for the purposes of creating a bicycle path.	NOD	
2009111033	UCLA Wasserman Building University of California, Regents of the --Los Angeles UCLA proposes tenant improvements within the Wasserman Building (104,699 gsf) to accommodate outpatient programs and related support space for the Jules Stein Eye Institute and the David Geffen School of Medicine Institutes for Neurosurgery and Urologic Oncology. The scope of work would include installation of the following: interior partitions, lazed partitions and clerestory windows; ceilings and lighting; casework, signage, window blinds, fixed equipment (projection screens, white boards, lockers and fixed medical equipment); and provisions of finishes throughout the building. The project would include installation of procedure room and exam room sinks, surgical scrub sinks, and patient toilet room fixtures; piping for medical utilities (oxygen, air, vacuum, nitrous oxide); chilled beams and fan coil units; branch ducting, dampers, diffusers, and mechanical system controls; ventilation equipment; provisions of power to point of use; a fire sprinkler system and fire alarm devices. As stated above, an Initial Study/mitigated Negative Declaration was prepared and approved by The Regents in May 2010. All actions related to construction of the building, which includes interior improvements, were determined to result in either no impact or less than significant impact.	NOD	
2010044007	Marine Corps Air Ground Combat Center (MCAGCC) TwentyNine Palms U.S. Marine Corp Twentynine Palms--San Bernardino Construction of a new electrical substation at the Mainside Center located at 29 Palms, CA. Project also includes connecting subtransmission lines from existing substations and installing new fiber optic lines on existing poles to connect to SCE's existing telecommunications system.	NOD	
2010102032	Quito Basin Sanitary Sewer Rehabilitation Project West Valley Sanitation District Monte Sereno, Saratoga, Los Gatos--Santa Clara The Project is the highest priority sewer rehabilitation project in WVSD's service area. The existing clay sewer lines were installed in the 1950s and have exceeded their useful life. Over 36,000 feet of these sewer lines in WVSD Subbasins Q-7 Area 1, Q-7 Area 2, and Q-5 Area 2 will be rehabilitated using various construction techniques.	NOD

2010122088	The 2011 Fisheries Restoration Grant Program Fish & Game #2 --Del Norte, Humboldt, Madera, Mendocino, Napa, ... The Project proposes the placement of 270 logs or root wads, for improvement of instream habitat on approximately 9.8 miles of stream.	NOD	
2010122088	The 2011 Fisheries Restoration Grant Program Fish & Game #2 --Del Norte, Humboldt, Madera, Mendocino, Napa, ... The Project proposes treatment of 24 stream crossings, rocking of 9 fords, and treatment of 50 other sites with a variety of site specific erosion prevention techniques.	NOD	
2011042097	Central Valley Independent Network Fiber Optic Communications Network Project Public Utilities Commission --Amador, Calaveras, Colusa, El Dorado, Fresno, Kern, Kings, ... The proposed network would cross 17 California counties, in portions of the northern Sacramento Valley, Sierra Nevada foothills, and the northern and southern San Joaquin Valley. The proposed project involves developing approximately 817 miles of fiber-based infrastructure. Approximately 723 of the proposed route would require new construction; for the remainder of the route, approximately 94 miles of new fiber optic cable would be installed in existing conduits.	NOD	
2011052083	Plumas-Sierra Rural Electric Cooperative Middle-Mile Fiber Project Public Utilities Commission Susanville--Plumas, Lassen, Sierra The Plumas Sierra rural Electric Cooperative (PSRE) is proposing to build, operate, and maintain a 183-mile fiber optic communications network in northeastern California and northwestern Nevada. The proposed network would provide access capabilities for the following three California counties: Plumas, Sierra, and Lassen Counties, California. The proposed network would also accommodate future statewide interconnection of major Public safety Answering Points, a future California statewide and Nevada public safety network.	NOD	
2011061088	Lot Line Adjustment and Construction of Two Residences at 6271 & 6277 Zuma Mesa Drive Malibu, City of Malibu--Los Angeles The proposed project consists of two applications for coastal development permits on adjacent undeveloped lots. Coastal Development Permit No. 10-067 includes a lot line adjustment to reconfigure the lot lines of two legal lots with a combined gross lot area of 1.6 acres. The lot areas of the reconfigured parcels will be 0.61 acre (Parcel A) and 0.99 acre (Parcel B). No new parcels will be created by the project application.	NOD	
2011062025	Integrated Greenhorn Creek Restoration Project Plumas County Quincy--Plumas The California Department of Fish and Game is executing Lake or Streambed Alteration Agreement number 1600-2011-0118-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, Feather River Coordinated Resource Management. The project is limited to six treatment units: two fish passage structures and four boulder vane treatments. Total project area is approximately 21 acres within a	NOD

	400-acre meadow system.		
2011071091	Gateway Center Specific Plan Salinas, City of Salinas--Monterey Retail commercial shopping center on 17.49 acres with associated stormwater detention/retention basin on 2.74 acres of the total 20.23 acre site. A total of 207,500 square feet of commercial development with a major anchor of 121,000 square-feet plus an outdoor garden center of 31,500 square feet. The remaining 55,000 square feet of building is comprised of five smaller retail/service commercial outbuildings. The plan for site development is contained in the Gateway Center Specific Plan, which was prepared by the applicant with input from the City of Salinas.	NOD	
2011072023	Baker Curve Improvement Project Caltrans #2 Red Bluff--Tehama Caltrans proposes a curve improvement project on a segment of SR 36 in Tehama County, approximately 1 mile west of Red Bluff (from postmile 39.7 to postmile 40.2). The project will widen the travel lanes, provide 8-foot shoulders, improve the roadway geometrics, improve sight distance, and increase the clear recovery zone. The project will involve soil excavation, culvert extension and replacement, tree and vegetation removal, utility relocation, and right of way acquisition.	NOD	
2011072037	Bella Diddy Roadway Rehabilitation Project Caltrans #2 Redding--Shasta Caltrans proposes a project to rehabilitate the roadway on a segment of SR 299 in Shasta County, from postmile (PM) 30.3 to PM 40.7. The project will replace the structural section and pavement, provide eight foot shoulders, improve the roadway geometrics, improve sight distance, and increase the clear recovery zone.	NOD	
2011081025	Reece Variance/Coastal Development Permit San Luis Obispo County --San Luis Obispo Request by Thad Reece for a Variance/Coastal Development Permit to allow for the grading and construction of a new four-story 3,938 s.f. single family residence with an attached 1,180 s.f. of garage and variance to allow grading on slopes greater than 30%. The project will result in the disturbance of approximately 3,500 s.f. of a 6,240.5 s.f. parcel, as well as approximately 9,400 s.f. of off-site improvements to Richard Avenue to meet County standards to the nearest County maintained road, for a total of 12,900 s.f. of disturbance.	NOD	
2011108188	State Water Exchange Between CCWA, Dudley Ridge Water District with Delivery to the Kern Water Bank and Four Member Units of KCWA with Delivery to Westside Bank Central Coast Water Authority --Kern CCWA will deliver up to 20,000 acre-feet of CCWA's 2011 Table A water to DRWD and the Westside Districts. The water will be stored in the Kern Water Bank and used to serve existing DRWD customers and the Kern Water Bank and/or Berrenda Mesa Banking facilities for the Kern Westside Districts. In exchange, prior to December 31, 2021, DRWD and the Kern Westside Districts will repay CCWA with 2 AF for every 3 AF delivered, less losses incurred. All	NOE

	water will be transferred via SWP facilities.		
2011108189	Amendment of CUP No. 1980 El Cajon, City of El Cajon--San Diego The project includes the addition of an outdoor food preparation area within an existing restaurant's outdoor dining area, indoor and outdoor live entertainment and enhanced exterior building elevations.	NOE	
2011108190	CUP No. 2152 El Cajon, City of El Cajon--San Diego Establish an automobile sales facility on an existing, developed site.	NOE	
2011108191	Jameson Canyon Creek Flood Prevention and Habitat Restoration Project Fish & Game #3 Fairfield--Solano The project includes removal of small and large debris such as trash and wood at five locations along 1,960 linear feet of Jameson Canyon Creek. The accumulated debris has resulted in substantial flooding on two adjacent residential properties. Most debris will be removed manually using hand tools. Larger items will be removed using a long-reach excavator located a minimum of 10 feet from the edge of the channel. Dead and live tree limbs may also be removed from the channel. No live trees will be removed. Disturbed areas will be seeded with creeping wildrye and planted with willow poles. The total revegetation area will be approximately 8,711 s.f. Issuance of a Streambed Alteration Agreement No. 1600-2011-0315-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2011108192	Stream Bank Repair on Cutting Property Fish & Game #3 Martinez--Contra Costa An existing 25-foot retaining wall that collapsed into the creek in April 2011 will be lifted out of the creek channel. Following removal, existing fill soils on the eastern side of the creek will be re-contoured and set back from the existing toe of slope at a maximum 1.5:1 ratio. A trench will be keyed into the toe of the slope and filled with rock riprap. Riprap will also be used to line the lower five vertical feet of the bank. The upper portion of the bank will be lined with filter fabric and planted with a native grass hydroseed mix and native trees and shrubs. Issuance of Streambed Alteration Agreement No. 1600-2011-0344-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2011108193	Agreement 2011-0153-R4 - Heritage Ranch Community Services District Gallery Wells Repair Project Fish & Game #4 Paso Robles--San Luis Obispo Approximately 61,000 cubic yards of riverbed will be excavated to access and repair damaged gallery wells. The air grid system used for back flushing will be replaced. If the damage is extensive, the gallery wells will be relocated closer to the embankment or slightly downstream to help prevent future damage. Once the gallery wells are repaired, approximately 5 feet of plaster sand will be placed over the drain-rock bedding, and native riverbed material will be backfilled over the plaster sand. Imported fill material will measure approximately 11,000-cubic yards. The approximate 0.25 acres of disturbed area will be restored to original conditions and contours.	NOE

2011-13	In Trust for Orval Hayward, Mac Hayward, William Hayward, and Karen Hayward Hart of the Redding Rancheria. APNs: 049-400-012 Bureau of Indian Affairs --Shasta The heirs of Arthur Hayward would like the land to be placed in trust so that it can be protected for future generations. Additionally, they would like to ensure that the Tribe can exercise jurisdiction over the property. This property is considered "on reservation" because it is within the exterior boundaries of the Redding Rancheria, which as been designated as "Indian Lands." Containing 1.50 acres, more or less. The subject parcel is on original Rancheria.	BIA	11/16/2011
2011101045	Building Permit No. 29412 (Demolition of Historic Structures) Mariposa County --Mariposa Demolishment of three structures, two unoccupied residences and a storage structure, listed as contributing structures to the Mariposa Town National Register District. The two residences are identified as historically significant on the List of Historic Sites and Structures in Appendix C of the Mariposa Town Planning Area.	MND	11/16/2011
2011101047	Tentative Parcel Map No. PPM 11-001 (van Gilluwe) Tulare County --Tulare Division of 62 acres into three parcels plus a remainder (Parcel No. 1 - 12.40 acres, Parcel No. 2 - 7.96 acres, Parcel No. 3 - 3.48 acres and remainder - 36.14 acres). The two potential additional residences following the land division may impact large oak trees and nesting birds. A Botanical Survey was conducted and mitigation measures have been agreed to by the applicant.	MND	11/17/2011
2011102028	General Plan 2012 IS/MND Woodside, City of Woodside--San Mateo General Plan 2012 would guide growth and development in Woodside through 2035. It outlines a vision for the future of Woodside and reinforces the community's passionate desire to maintain and preserve its distinctive rural character, scenic vistas, and natural landscapes. General Plan 2012 would retain existing land uses in the Town, with only minor changes, and allowable development would be largely limited to low-density residential uses. General Plan 212 also includes goals, policies, and strategies which seek to minimize risks from identified natural and man-made hazards; conserve, protect, and enhance	MND	11/16/2011

	the open space system and natural resources in Woodside and the surrounding area; and reduce or control consumption of renewable and non-renewable resources in Woodside.		
2011102032	Via Verdi Repair Project - San Pablo Creek Culvert Replacement Richmond, City of Richmond--Contra Costa Proposed reconstruction and repair of an emergency culvert and the restoration of a portion of San Pablo Creek near the intersection of Via Verdi and El Portal Drive in Richmond, CA.	MND	11/17/2011
2011102033	Water Supply Arsenic Mitigation Project Keyes Community Services District --Stanislaus The community of Keyes is an incorporated community of Stanislaus County. It is located north of Turlock, south of Modesto and Ceres off of SR 99. The project is generally located community wide. Wells 7, 8, 9, and 10 specifically and consists of the construction of water transmission lines from each well to the proposed centralized water treatment facility and new and replacement water distribution lines. There are four alternative facility sites, and the locations for construction of water transmission lines and the replacement and construction of distribution lines is dependent on each specific alternatives. The facility is proposed to be constructed at the preferred site, which is Alternative 3 (APN 045-045-018), located south of Jessup Road at the end of Jessup Road public access. Alternative 1 (APN 045-026-040) is located north of Jessup Road, adjacent to the ethanol production facility. Alternative 2 (APN 045-026-040) is located on the eastside of Faith Home Road, across from Well 9. Alternative 4 (APNs 045-069-035 and 045-021-001) is located east of SR 99 north and adjacent to a drainage basin and contiguous with a lift station.	MND	11/17/2011
2011102034	PG&E Pittsburg-Tesla Reconductoring Project State Water Resources Control Board Pittsburg, Tracy--Alameda, Contra Costa Note: Review Per Lead PG&E proposes to replace approximately 31 miles of 230 kilovolt transmission line conductors between Pittsburg and Tesla Substations to minimize potential future power demand overloads and ensure service reliability to the East San Francisco Bay Area. As part of this project, PG&E proposes to modify approximately 43 of 147 existing steel lattice towers. Work at the towers will be conducted by helicopter. Ground access to replace wire will take place at twelve areas along the existing right-of-way. The project is located within or alongside areas with land uses which include industrial, residential, agricultural, recreational, and natural resource protection. The project is scheduled to begin construction in March 2012, with an estimated duration of approximately 19 months, completing in October 2013.	MND	11/21/2011
2011101046	Salem Lutheran Church and School Specific Plan Orange, City of Orange--Orange The project site contains approximately six acres and is known as the Salem Lutheran Church and has been in operation at this location since 1969. The church proposes to redesign the existing church campus by constructing a new sanctuary, relocating the existing on-site preschool to an existing onsite vacant	NOP	11/16/2011

2010012066	Capital SouthEast Connector Project Capital SouthEast Coonector Joint Powers Authority Elk Grove, Rancho Cordova, Folsom--Sacramento, El Dorado The project is a 35-mile roadway, the majority of which is along existing roads, linking El Dorado and Sacramento Counties and the Cities of Elk Grove, Rancho Cordova and Folsom. Project limits extend from the interstate 5/Hood-Franklin Road interchange in southwest Sacramento County east and north approximately 35 miles, terminating at US Highway 50 approximately 3 miles past the El Dorado County line in the community of El Dorado Hills. The Connector is expected to accommodate the projected volume of vehicles in MTP and general plans.	NOD	
2011108205	Camp San Luis Obispo Motor Transport Operators Course (88M) Army National Guard, California -- The CA ARNG is proposing to construct and operate a Motor Transport Operators Course (88M) at Camp San Luis Obispo, CA. The purpose of this course is to provide soldiers with the knowledge, skills, and ability to function as motor transport operators and to safely maneuver tactical wheeled vehicles under varying conditions, including convoy operations. The entire project includes trail rehabilitation, armoring several stream and spring crossings, out sloping, installation of rolling dips, trail re-alignment, berm removal, gully repair, and installation of rock weir sedimentation traps. The construction phase of the proposed action would improve approximately 2.5 miles of an existing trail network, in Training Area H, between Guard Hill and Range Road.	NOE	
2011108206	Loftus Basin Maintenance Project Fish & Game #5 Brea--Orange CDFG is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code (SAA # 1600-2011-0172-R5) to the project applicant, Orange County Parks. The applicant plans to conduct routine maintenance of the Loftus Basin that will include sediment and debris removal up to two-times per year. Herbicides may also be used to control vegetation growth within the Loftus Basin. The application of herbicides shall only occur by a licensed applicator and shall only use herbicides approved for use in an aquatic environment (such as rodeo). Routine maintenance shall also include the replacement of any rip rap dislodged from the upstream end of the basin. All activities within the Loftus Basin shall occur outside of the breeding bird season.	NOE	
2011108207	San Clemente Inn Building Stabilization Project (Right of Entry Permit) and Storm Drain Easement Parks and Recreation, Department of San Clemente--Orange The San Clemente Inn is requesting a right-of-entry permit to perform the Buildings 1 & 2 Foundation Underpinning System & Drilled Pier Retaining Wall/Slope Stabilization project ("Project") followed by a storm drain easement. The scope of the stabilization project includes the repair of the San Clemente Inn's buildings 1 and 2 which have subsided and caused breakage to the foundation and flooring. The planned project will fix the broken sections and add support under the buildings. The final phases of the project will replace landscaping (with natives) and direct site drainage to the small ravine below these two buildings.	NOE

	The easement requested for the purposes of maintaining an 8" storm drain to terminate with an energy dissipater in a small canyon on State Park property. The design is that of the least erosive nature and will serve to protect both property interests long term.		
2011108208	Repairs to Historic Cottage No. 2 Parks and Recreation, Department of San Clemente--Orange The proposed Project seeks to make necessary repairs to Historic Cottage No. 2 at San Clemente State Beach. The Proposed Project's scope is to remove the existing foundation and stem wall of the bedroom portion. Proper structural supports will be employed during all work phases. Excavations will be made below the building to install a new foundation and stem wall to bring the building to code compliance.	NOE	
2011108209	Fullerton Historic Theatre Foundation: Fox Fullerton Theatre Restoration California Cultural & Historical Endowment Fullerton--Orange The project consists of the restoration and preservation of various architectural and artistic features of the Fullerton Fox Theatre.	NOE	
2011108210	Vallejo Community Arts Foundation: Empress Theatre Improvements California Cultural & Historical Endowment Vallejo--Solano This project will improve stage lighting, upgrade the projection system, provide for stage and production upgrades, correct ADA issues, secure building access, provide improved directional and emergency signage and fire alarm additions.	NOE	
2011108211	South Beach Lot Fencing (11/12-SD-05) Parks and Recreation, Department of --San Diego This project entails constructing "peeler pole" fencing around much of the South Beach parking lot of Torrey Pines State Beach. The intent of the project is to provide for additional public safety by keeping the public from crossing roads at inappropriate locations and to protect natural and cultural resources by restricting the places that the public can move from the parking lot onto the park road. The fencing type will match the existing fencing at the West Lot. Installing the fencing will require digging post holes on 8' centers and using cement to retain the poles. This project will be completed in multiple phases as volunteers and funds come available. The project leads will remain the same to maintain consistent materials and construction methods. DPR-approved standards project requirements have been incorporated into this project. A copy of these requirements may be obtained by submitting a request to the project Environmental Coordinator listed below.	NOE	
2011108212	Marek Restoration Parks and Recreation, Department of San Fernando--Los Angeles The proposed restoration work, which comprises approximately five acres, includes: 1) covering off-highway vehicle trails with an erosion control material such as wood straw, rice straw, or rice wattles; 2) scarifying and seeding OHV areas with native locally collected seed; 3) installation of vehicle barriers (fencing, gates, etc.); and 4) monitoring any illegal OHV use after completion of the restoration work.	NOE

<u>Documents Received on Tuesday, October 18, 2011</u>			
2011108213	Lopez Canyon Restoration Parks and Recreation, Department of San Fernando--Los Angeles The proposed restoration work, which comprises approximately five acres, including: 1) covering off-highway vehicle (OHV) trails with an erosion control material such as wood straw, rice straw, or rice wattles; 2) seeding OHV areas with native, locally collected seed; 3) filling in a gully caused by erosion off an OHV route with erosion control material previously described; 4) removing concrete used as a motorcycle jump from the OHV trail; and 5) monitoring and illegal OHV use after completion of the restoration work.	NOE	
2011108214	Replacement of Residences Wood Fences Parks and Recreation, Department of --San Luis Obispo The purpose of this project is to replace two sections of dilapidating fencing for Oceano Dunes SVRA park residences. Fence replacement will be occurring in the east-facing, backyards for residence #1, facility No. 446-A-3-05-3-001, and residence #2, facility No. 446-A-3-05-2-001. The project will stay within existing residence lots and follow approximately the same footprint as the old fence. The replacement fences will be made of new cedar panels and metal posts. Some site modifications will need to take place such as tree trimming and brush removal which will be necessary to gain access due to overgrown vegetation that has displaced sections of the existing fence.	NOE	
2011108215	Token Vending Pedestal, North Beach Campground Parks and Recreation, Department of --San Luis Obispo The project proposes construction of two pedestal structures. Each pedestal will house two token vending machines. The tokens will be used to operate bathing showers in the North Beach Campground. The pedestal structure will be approximately five feet wide by two feet deep by seven feet four inches high. The attached roof, with light fixtures within, will make the overall height nine feet. The pedestal will be constructed with reinforced concrete block. The concrete block and roof tile will match, as closed as possible, the color and texture of the adjacent restroom building. The project includes construction of concrete pads for the pedestals. One pedestal will be located at the southwest corner of restroom building #5. The other pedestal will be located at the northeast corner of restroom building #8. Both pad locations are approximately five feet from the buildings and on the existing building foundation base that extends approximately 10' from the restroom buildings. Both pads, each measuring seven feet by five feet by four inches thick, will be installed adjacent to the existing concrete sidewalk. The pad locations will be excavated to approximately eighteen inches deep. Base gravel will be installed to create the concrete pad base. Electrical connection is currently available at the proposed pad location at restroom #5. Electrical connection will be installed at the restroom #8 pad location by trenching approximately 18 inches deep by 1 foot wide by 60 feet long. Trenching will be in the existing building foundation base gravel. A handicapped accessible parking space exists at each restroom building. The machines will be mounted on the pedestals in compliance with accessibility standards.	NOE

2009062093	Berkeley Aquatic Park Improvement Project EIR Berkeley, City of Berkeley--Alameda The Preferred Project would include rehabilitation of the existing tide tubes connecting the lagoons to San Francisco Bay in order to increase tidal exchange between the lagoons and Bay waters, thereby increasing the levels of dissolved oxygen and lowering the water temperature in the lagoons. The Preferred Project would eliminate the inflow of stormwater runoff to the lagoons from adjacent storm drains. An additional alternative will be evaluated that would allow no additional stormwater into the lagoons than under current conditions. Unlike the Preferred Project, the alternative would not eliminate stormwater runoff from storm drains and the primary difference between the Preferred Project and the alternative would be how the storm drain infrastructure is operated.	NOP	11/17/2011
2011101051	Collier Park Renovations Project La Mesa, City of La Mesa--San Diego The proposed project is organized into four areas: 1) Panhandle; 2) Spring House; 3) History Hill; and 4) Collier Club House. The improvements proposed are conceptual in nature, and detailed plans have not been finalized, except for the Panhandle area of the park. The EIR analysis will evaluate a worst-case scenario with respect to the impacts associated with the construction and operation of the proposed project.	NOP	11/18/2011
2011102035	Acheson Commons Berkeley, City of Berkeley--Alameda The proposed project would involve the construction of 202 new dwelling units and 3 live/work units and the rehabilitation of ~33,250 sf of commercial space. The project site is currently developed with four one-story commercial buildings, one four-story office building and two two-story residential buildings. Residential uses would be constructed above two of the single story buildings. The two residential buildings would be removed and a mixed-use building would be constructed in their place. The office building would be converted to residential uses (~16,800 sf of office use would be removed from the project site.) Several of the buildings on the project site are City of Berkeley Landmarks and, according to the criteria set forth by the State Office of Historic Preservation (OHP), appear eligible for listing in the National Register of Historic Places.	NOP	11/17/2011
2011102036	Child Study Center at College of Marin, Kentfield Campus Marin Community College District Larkspur--Marin The new CSC would have a gross floor area of about 8,285 gross sf on a site area of 46,128 sf. The building footprint would be about 5,936 sf. The remaining portions of the site would be used for on-site parking; landscaping, gardens, hardscape play areas, softscape play areas, and pathways/circulation. An existing restroom trailer at the eastern edge of the site would remain in place. The new CSC would replace the College's existing CSC, which is located on the main campus in a building proposed to be demolished for the College's planned New Administrative Center (NAC). The existing CSC is used by about 28 children while the proposed project would accommodate 32 children.	NOP	11/17/2011

2011108221	<p>UC Davis Walnut Tree Inoculation Research University of California, Davis --Solano, Yolo</p> <p>UC Davis will conduct a research project to test the effectiveness of Inoculation walnut trees will collect fungus. Small walnut tree branches growing at the UC Davis Wolfskill Ranch Facility in Solano County will be inoculated with the fungus <i>Geosmithia morgida</i> and after a two-two six-week period, the test branches will be transported to the main UC Davis campus in Yolo County, analyzed, autoclaved, and then transported to a landfill for disposal. The fungus used for the research is prevalent within the Wolfskill Ranch area and the isolates of the fungus used obtained from naturally infected trees at the Wolfskill Ranch and surrounding environs within Solano County. Upon collection, the branches may contain beetles such as the walnut twig <i>Pityophthorus juglands</i> and the research protocol includes measures to contain and dispose of any insect accidentally collected during the research program. The research would pose no risk of infection from the fugues to other organisms and no risk to spreading organisms from the Wolfskill Ranch to other locations because the fungus already is prevalent is provalcnet prevalent in the area and would not create a new exposure pathway.</p>	NOE	
2011108222	<p>Fresnel Lens Protection Parks and Recreation, Department of --San Mateo</p> <p>Temporarily remove, disassemble and reassemble the Fresnel lens at the Pigeon Point Light Station Tower at the Pigeon Point Light Station State Historic Park to protect the lens while a renovation occurs in the tower. The lens will be moved to the adjacent Fog Signal building on a secure mount designed to stabilize, secure and protect the lens. All work will comply with the Department of the Interior's "Guidelines on the Care and Maintenance of Historic Classical Fresnel Lenses Transferred with their associated Lighthouses under NHLPA." The Fresnel lens will be returned to its original location upon completion of Lighthouse Tower restoration.</p>	NOE

2011101055	CUP Application No. C-11-151 Fresno, City of Fresno--Fresno CUP Application No. C-11-151 was filed by Chris Ward, on behalf of Clay Miranda, and pertains to 15.03 acres of property located on the northwest corner of West Nielsen and North Valentine Avenues abutting the Houghton Canal. The applicant proposes an on-site concrete debris storage facility with the ability to crush the concrete debris and recycle the product. The property is zoned M-2/UGM.	CON	11/21/2011
2008061123	Boyle Heights Mixed Use Community Los Angeles, City of --Los Angeles Thurman Interim CA, LLC, a Delaware limited liability company through its affiliate, Fifteen Group Land and Development plans to develop the Boyle Heights Mixed-Use Community Project. The project site is currently developed with 1,187 units of rental housing. The proposed project would replace existing residential development with a new mixed-use residential/commercial community that would include rental units and increased homeownership opportunities, complemented by neighborhood-serving retail and office space, civic uses, green/open space, and amenities. Specifically, the project would include up to 4,400 residential units comprised of no less than 1,200 rental units and up to 3,200 condominium units, 325,000 s.f. of neighborhood-serving retail, office, and civic uses, approximately 24 acres of public, semi-private, and private usable open space and approximately 18.21 acres of planted streetscape and yard areas. Upon completion of the project, there would be no net loss of rental housing units within the project site as compared to current conditions. Overall, the project is intended to provide a walkable community with modern amenities and high-quality design that promotes sustainability.	EIR	12/05/2011
2011101053	Tuscan Village Specific Plan Ontario, City of Ontario--San Bernardino The Project proposes the construction of a pedestrian-oriented urban village mixed use development. As envisioned, the Specific Plan would allow for development of up to 255,404 s.f. of commercial uses, 693,327 s.f. of business park uses, and up to 200 residential units.	MND	11/21/2011

2011101054	Northwest Corner of Badger Flat Road and Pacheco Blvd. Annexation and Site Plan Los Banos, City of Los Banos--Merced The project proposes a co-branded structure with a McDonald's fast food restaurant with a drive-thru and an AM/PM gas station with a convenience store and 18 gas pumps. Implementation of the project would result in the development of 6,800 s.f. of commercial use. The Proposed project would provide 59 parking spaces in accordance with the Los Banos Municipal Code. Further, the required six car stacking distance relating to the drive-thrus has also been met. Exhibit A, Site Plan, displays the conceptual Site Plan for the project.	MND	11/21/2011
2011102040	T-Vine Cellars - Winery and Wine Tasting/Administrative Office Buildings Calistoga, City of Calistoga--Napa T-Vine Cellars has been producing wine within the Calistoga AVA (outside of the City) since the early 1990's. With this proposal, winery administration, hospitality and ~2500 cases (6000 gallons) of production would occur at this site. In general terms the proposed project consists of two small structures; a ~1300 s.f. winery and ~2000 s.f. administration and tasting room building, separated by a small parking lot and associated landscape/pedestrian spaces.	MND	11/18/2011
2011101050	Brisa Del Mar Subdivision San Diego County --San Diego The proposed project would subdivide 213 acres into 20 residential and equestrian lots (2 acre minimum) and 4 biological open space lots. In total, the project would include 126 acres of biological open space.	NOP	11/18/2011
2011102039	Zone File #2011-0044 (Turkovich Winery) Yolo County Winters--Yolo The proposed project is a request for a Use Permit to construct and operate a wine making, seed drying, and cheese processing facility in the unincorporated area of the County. The project is proposed to locate on approximately three acres of a 160-acre agriculturally zoned parcel, which is in active crop production. The applicant, Turkovich Family Wines, currently operates a tasting room in the City of Winters for their custom small-lot wines and cheese produced by Winters Cheese Company.	Neg	11/18/2011
1996072046	Eddie Conner Use Permit And Reclamation Plan Siskiyou County Amendment to the previously approved Use Permit (UP-96-15) and Reclamation Plan (RP-96-04) to expand an existing quarry from 25.6 acres to 28.1 acres (2.5 acre total). The elevation of the expansion area is proposed to be lowered up to 5 to 10 feet, and would result in the removal of approximately 20,000 cubic yards of material. The remaining scope of the previously approved surface mining operation and reclamation plan would continue as previously established in the current use permit and reclamation plan.	NOD

2004031111	Calleguas Creek Widening Project Camarillo, City of Camarillo--Ventura The project proposes to widen an approximately 5,700-linear foot stretch of Calleguas Creek from 80 feet to 110 feet. The widening of Calleguas Creek would accommodate future projected flow rates that have been recently updated to account for new development occurring upstream, north of US Highway 101. The majority of the widening would occur on the western bank of Calleguas Creek, shifting the centerline of the creek slightly to the west. Dirt and vegetation as well as some agricultural land are located in the area to be cut. Rip-rap, which currently exists on the eastern bank of this stretch of the creek, is proposed to stabilize the newly widened area. The bottom of the creek would remain soft-bottom as it is currently.	NOD	
2006102091	Well 14 Arsenic Treatment Facility Project Rio Linda/Elverta Water District --Sacramento The proposed project has been revised to include minor changes, which are: 1) reconfiguring the layout of the project components; 2) installing a monitoring well; and 3) rescheduling Project construction. 	vents within the Department of Water Resources right-of-way. The underground pipeline connecting the turnout to the discharge facility on the West Side Canal will be approximately 1510 feet long, 78-inches diameter, and of reinforced concrete pipe. The temporary trench will have a maximum depth of approximately 13 feet deep with a maximum trench width of approximately 30 feet. It will be necessary for the pipeline and trench to traverse the Kern River Flood Channel in order to deliver water into the West Side Canal.		
2011064007	Sierra Nevada Bighorn Sheep EA: Research and Recovery Actions National Park Service --Tulare, Fresno The National Park Service (NPS), in cooperation with the California Department of Fish and Game (CDFG), the U.S. Geological Survey (USGS), and the U.S. Forest Service (USFS) Inyo National Forest, (Inyo NF) is proposing to conduct population monitoring, research, and translocation of federally endangered Sierra Nevada bighorn sheep (<i>Ovis Canadensis sierra</i>) within Sequoia and Kings Canyon National Parks (SEKI). These activities are being proposed primarily to facilitate meeting the goals of the Recovery Plan for Sierra Nevada Bighorn Sheep (hereafter, Recovery Plan; USFWS 2007) but also to inform the development of a new Wilderness Stewardship Plan and Environmental Impact Statement (WSP/EIS) for Sequoia and Kings Canyon National Parks.	NOD	
2011081061	ENV 10-0005, Benton Burn Site Remediation Project Escondido, City of Escondido--San Diego The proposed project is the remediation of the former Benton Dump site by implementing the Final Remedial Action Plan Benton Burn Site, SWIS No. 37-CR-0008, dated October 5, 2009, prepared by URS for the CA Integrated Waste Management Board. The activity involves less than one acre and would consist of consolidating waste and capping the surface with an engineered soil cover. The cap would include clean soil to meet the State Minimum Standards and minimize the potential for human exposure to burn ash-containing waste present on the ground surface and in shallow soil (less than two feet). A small area of unoccupied coastal sage scrub (0.05 acre) will be removed and mitigated at a 2:1 ratio with the purchase of 0.10 acre conservation credits. The remediation will also affect 0.06 acre of a drainage area, which may be un-vegetated jurisdictional waters that would be subject to permits from US Army Corps of Engineers and/or the CA DFG. Construction activities will be limited to the hours between 8 A.M. and 5 P.M. Upon completion of construction, the project site would return to the relative appearance of existing conditions. The project would not construct any buildings and does not include lighting components. Existing non-native vegetation would be replaced by native seed mix over the soil cap.	NOD	
2011108225	Fremont Academy of Engineering & Design Facility Improvement Project Pomona Unified School District Pomona--Los Angeles The proposed project involves the addition of 11th and 12th grade students, the construction of a new computer lab building, parking area, and other aesthetic Improvements to the campus. The new building would be single story, and approximately 4,000 square feet in size. Other existing building would be renovated, and converted into additional computer and science labs, a library, and a counseling and attendance office. In addition, three new outdoor basketball courts, and a lunch shelter would be constructed. Construction activities would start in September 2011, and terminate in October 2012.	NOE

	<p>have approximately 65 faculty and staff. It would operate on a traditional school year calendar, with classes typically beginning in mid-August and ending in early June. During the school year, the school would be open during the day and would be open in the evening and on weekends for school and community-related special events. Use of the school for community-related special events would be subject to approval by the District. The District is targeting August of 2013 for the opening of the school.</p>		
2011101056	<p>RD 108 Groundwater Well Production Element Project Reclamation District No. 108 --Yolo, Colusa</p> <p>This project includes the installation of three groundwater well to supplement existing district surface and groundwater supplies. The well would be constructed on lands currently used for agriculture within the RD 108 service area. The well would be operated 24 hours a day during the months of April through October in dry and critically dry water years. Preliminary information obtained from the local aquifer indicates that the well would likely have a capacity between 1,500 and 3,000 gallons per minute, require 150 horsepower pump motor and have a pumping level of approximately 120 feet below ground surface.</p>	MND	11/21/2011
2011101057	<p>Willard Intermediate School Athletic Field Improvement Project Santa Ana, City of Santa Ana--Orange</p> <p>The City of Santa Ana proposes to improve the current athletic field facilities located at Willard Intermediate School. The proposed improvements will not change the capacity of the athletic field, or significantly alter its current use. The improvements will provide the opportunity for an increase in the amount of hours that the field may be used by introducing field lighting that will allow evening play. Improvements consists of installing a synthetic turf multi-purpose track and field, which will include sports lighting, construction of outdoor community exercise equipment and a children's play area with restrooms, replacement of basketball courts, and installation of a decorative fence around the new facilities. The proposed project does not include the construction of any seating facilities or the installation of bleachers. The track will be used for school physical education uses during school hours, and will serve as a jogging track for community use outside of school hours. The soccer field is, and will continue to be used by community soccer leagues outside of school hours. The field will be used by community soccer leagues after school hours up until 10 p.m. on weekdays. Soccer games will also be held on weekends. All games hosted at the field will terminate by 10 p.m. in compliance with City of Santa Ana Municipal Code requirements. It is anticipated that the majority of people who will be attending the soccer games will arrive on foot, based on the current conditions. Parking for those who will be using vehicles as their means of transportation to the games will be available on the school grounds via a joint use agreement with the District, and along the streets surrounding the school. Three outdoor basketball courts will be constructed as part of the project. The basketball courts will be provided on a first come first serve basis. The City proposes to provide the courts for casual recreational use and not for use by community leagues. The tot lot and exercise equipment area will be completely fenced, and no access to the school will be provided. The tot lot will be open to the public both during and after school hours. Construction activities related to the athletic field improvements are anticipated to begin in June 2012 and continue through December 2012.</p>	MND	11/21/2011

2011101059	640 Veterans Boulevard Multi-Family Residential Project Redwood City Redwood City--San Mateo NOTE: Extended Per Lead The proposed project would construct and operate a multi-family residential development consisting of 265 residential units on the 3.6-acre project site. The project would consist of two residential structures each containing four stories of residential units over two stories of parking. The two residential structures would be separated by a landscaped private street with parking and loading areas as well as access to parking garages. This common area would also serve as a pedestrian promenade and provide an open space setback with decorative fencing and landscaping. The project area would primarily be accessed from Veterans Boulevard. The project would improve the Veterans Boulevard frontage with improvements to landscaped areas, public parking, lighting, and paving.	MND	12/21/2011
2011101060	South Palm Canyon Drive Low Water Crossing Bridge Replacement at Arenas Canyon South Palm Springs, City of Palm Springs--Riverside The City of Palm Springs proposes to replace the existing low-water crossing on South Palm Canyon Drive at Arenas Canyon South with a four-lane bridge structure to provide all-weather access. Currently, access is disrupted on South Palm Canyon Drive during storm events due to flooding. Storm runoff would be directed through the new structure and the existing Arenas Canyon South tributary would be excavated and channelized. Levees will be constructed along the new channelized alignment of the Arenas Canyon South tributary from South Palm Canyon Drive to the west.	MND	11/22/2011
2011102041	River Garden Farms Company Groundwater Well Production Reclamation District No. 108 --Yolo This project includes the installation of one groundwater well to supplement existing district surface and groundwater supplies. T Reclamation District 108 is acting as the lead agency under the CEQA on behalf of RGFC, because RGFC is a private entry. The well would be constructed on lands currently used for agriculture within the RGFC service area. The well would be operated 24 hours a day during the months of April through October in dry and critically dry water years. Preliminary information obtained from the local aquifer indicates that the well would likely have a capacity between 1,800 and 3,000 gallons per minute, required a 100 to 150 horsepower pump motor and have a pumping level of approximately 120 feet below ground surface.	MND	11/21/2011
2011102044	Ulatis Creek Bike Path - Nut Tree Road to Leisure Town Road Vacaville, City of Vacaville--Solano The City of Vacaville Department of Public Works is proposing to construct a Class I asphalt concrete bike path on an existing maintenance road which runs along an approximately 0.97-mile section of the north bank of the Ulatis Creek Flood Control Channel from Nut Tree Road to Leisure Town Road. The project includes an approximate 100-foot long Class I bike path segment extending from the end of Green Tree Drive to the proposed bike path in order to provide a neighborhood connection at the mid-point of the trail. The project is located near the existing eastern edge of the City of Vacaville, within the City limits.	MND	11/21/2011

2011102046	Suisun City 2035 General Plan Update Suisun, City of Suisun City--Solano The General Plan establishes the goals and policies upon which the City Council and Planning Commission will base their decisions. The General Plan will identify the types of land use change that will be allowed, the spatial relationships among land uses, and the general pattern of future development over the long term within the City's planning area. The 2035 General Plan will contain written text with policy direction, as well as policy diagrams illustrating the location of future land uses, circulation systems, open space, and other features. Each Element will have goals, policies, and implementation programs that will guide land use and development decisions. Goals are a description of a future desired state. Policies are a decision-making guide. Implementation programs are proactive measures to be undertaken, as necessary, to achieve General Plan goals.	NOP	11/23/2011

Avenue Transit Center and Santee Town Center. The project proposes construction of new traction power substations to establish the power requirements for low-floor vehicle service. The use of low-floor vehicles would improve passenger loading, including wheelchairs, from the platform. Development of substation will require property acquisition. Subject properties are under current ownership by Union Pacific Railroad, City of San Diego, and private owners. The substations are metal enclosure of rectangular shape and neutral color that measure approximately 10 feet high, 15 feet wide, and 40 feet long. Construction would include site preparation, minor trenching and excavation, concrete foundation, extending new feeder cables to feeder poles or existing vaults, and resurfacing.

	Street, the site would be subdivided and a residential building containing up to 13 units would be constructed on the southern portion of the site fronting Shipley Street.		
2002082057	Fiddymment Ranch Specific Plan Amendment 3 Roseville, City of Roseville--Placer Affected Parcels: 017-101-038; 017-117-045, 047, and 048; 492-010-002, 003, 005, 015, 020, 021, 031, and 033. The applicant proposes to amend the West Roseville Specific Plan (WRSP) to accommodate 1,905 additional residential units in Fiddymment Ranch Phases 1, 2, and 3. The revised land use plan will not change the footprint of the WRSP, but would redistribute certain land uses (Low Density Residential, Low Density Residential (Pocket Parks), Medium and High Density Residential, Community Commercial, Parks, Open Space, Public/Quasi-Public, and Right-of-way) within the project area. In addition, the project proposes to change development densities within certain Fiddymment Ranch residential areas.	SIR	12/12/2011
2009081074	Citracado High School Escondido Union School District Escondido--San Diego The California Department of Fish and Game is issuing an Agreement regarding the Stream Alteration to the project applicant, Hanson Aggregates Pacific Southwest, Inc. The Project is limited to the construction of a new career technology high school within a 23-acre foot print, and installation of landscaping elsewhere on the 35.72 acre project site. The school will include three main buildings (a classroom building, administrations building, and a multipurpose building), parking lots, playfields, an outdoor amphitheater, and other ancillary features common to schools. The school plans include approximately 876 500 square feet of total landscape area, with 83 percent being planted with native species. 26.92 acres of the 36.35-acre site will be cleared of vegetation as part of grading activities. Approximately 101,500 cubic yards of cut and fill material will be graded on-site to create relatively level building pads for the structures, parking lots, and playfield area. The onsite stream (Drainage A) is 1,108 linear feet (0.10 acre) and passes through a recently cleared eucalyptus woodland area. Currently the stumps remain in place. Approximately 30,000 cubic yard of native onsite soil will be used to fill the upper 110 linear feet (0.01 acre) of Drainage A in order to create a playfield for the high school. The remaining 778 linear feet of Drainage A shall be enhanced and restored through herbicide treatment of blue gum (Eucalyptus sp.) stumps, suckers and seedlings, and hydroseeding and/or broadcast seeding the area with native vegetation.	NOD	
2011082025	Bertolotti Transfer Station and Recycling Center Resources Recycling and Recovery, Department of Modesto--Stanislaus The proposed project consists only of an increase in the total amount (in tons per day) of waste that may be received by the transfer facility. The currently maximum daily waste tonnage allowed is 750 tons/day. The proposed project would allow the facility to receive up to 950 tons/day of waste. However, the facility owner may eventually request an increase to 1,250 tons/day of waste. While an increase to 950 tons/day is being requested by the applicant at this time, this Initial Study addresses potential impacts associated with the receipt of up to 1,250 tons/day.	NOD

2011108279	Borrego Canyon Wash Bank Repair Project Fish & Game #5 Irvine--Orange CDFG is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code (SAA #1600-2011-0265-R5) to the project applicant, the City of Irvine. The applicant proposes to remove sediment from a 300-linear foot segment of Borrego Canyon Wash Located just upstream from the box culvert at Barranca Parkway. Vegetation located along the eastern channel bank will be left in place to protect the bank. Vegetation within the channel invert will be removed. All native willows and mulefat from the channel invert will be removed in such a fashion as to facilitate the creation of live stakes for use in protection of the newly created bank adjacent to the Metrolink parking lot.	NOE	
2011108280	Crown Point Road Fuel Reduction Project Forestry and Fire Protection, Department of --Butte This project sponsored by the Forest Ranch Fire Safe Council involves the hand clearing of brush, small trees and dead woody debris along both sides of Crown Point Road to reduce the fire hazard and create a fuel break within the 60' road right of way. The project will be 17,360' in length and 60' in width, totaling 23.9 acres. Fuels will be piled for burning later in the season when moisture levels are sufficiently high enough to allow for safe disposal and minimal risk for escape. All work will be performed by hand crews, and all equipment will be limited to paved or graveled roadbeds and/or driveways. Rare Plant survey, Natural Diversity Data Base inquiry, and Cultural Resources survey have been performed for this project. No sensitive species, nor cultural resources were identified within the project area or immediate vicinity of the project area. CAL FIRE Region Archaeologist has been consulted, no issues or concerns were identified.	NOE	
2011108281	Lindbergh Field Water Line Replacement San Diego, City of San Diego--San Diego The Lindbergh Field 16-inch cast iron pipeline replacement project includes the replacement of 8,000 feet of 16-inch CI and AC pipe. The existing pipeline on airport land would be abandoned in place and a new water transmission main constructed in the public right-of-way on Harbor Drive. The project also includes the replacement of 3,500 feet of small diameter distribution mains along airport property. No impacts to biological or archaeological resources are anticipated as all work would occur in the improved right-of-way.	NOE	
2011108282	Ludford/Hudson Rear and Side Setback Variance Placer County Auburn-- The project approved a Variance for a reduced rear and side setback to allow the construction of a 792 square foot detached storage building. The applicant was granted a two-year approval period.	NOE

	<p>placed across the pipe outlet to completely contain any sediment-laden water at the outlet, and the pipe will be flushed from the outlet to the inlet. An approximately two-foot diameter by two-foot deep pit will be excavated by hand at the pipe outlet to allow the flushed water to collect. The Vac-Con hose will be placed in this pit and will vacuum out the water and sediment from the pipe as it is being flushed. All materials will be stored in the truck and deposited off-site in a contained area. The project will be conducted while the site is dry and all heavy equipment will be operated from the road. Issuance of a Streambed Alteration Agreement Number 1600-2011-0318-R3 is pursuant to Fish and Game Code Section 1602.</p>		
2011108284	<p>Final Short Range Transit Plan (S RTP) for the Western Placer Consolidated Transportation Services Agency Western Placer Consolidated Transportation Services Agency (WPCTSA) --Placer The WPCTSA Short Range Transit Plan (S RTP) is the document through which the continuing, comprehensive and coordinated specialized transit planning process is implemented in western Placer County. The S RTP looks at countywide demographics, analyzes demand for specialized transit services, presents a series of goals, objectives and performance standards, analyzes a series of service alternatives, identifies operating, maintenance and capital program needs, addresses regulatory and funding requirements, and present the steps that WPCTSA will take over a seven year planning period (through FY 2017/18) to improve and enhance specialized transit services in western Placer County.</p>	NOE	
2011108285	<p>Sewer Pipeline Rehabilitation Q-1 San Diego, City of San Diego--San Diego The project proposes to rehabilitate 178 sewer mains totaling approximately 38,380 linear feet (7.27 miles) of existing eight-inch polyvinyl chloride (PVC) sewer pipeline using trenchless technology that includes rehabilitation of 20 manholes (MHs) and the replacement of five MHs and 40 plugs with new cleanouts. One sewer main totaling approximately 69 feet (0.01 mile) would be replaced via trenching with new eight-inch PVC pipe. In all instances, the project combined with the related scope has been identified to occur within areas classified as 'non-sensitive'. Two methods of sewer main rehabilitation may be used for this project, both utilizing existing MHs and/or cleanouts. Both require access from two MHs and/or a MH and cleanout for the each pipe segment. Cured-in-place pipe liner is pulled through the sewer main, cured used hot water or steam, and but at both manholes. Ribloc liner is pulled through the sewer main as plastic strips and then formed to the pipe to create a new pipeline within the existing pipe. In areas where secondary sewer MH/cleanout access is required, a new MH/cleanout shall be installed. Depth of new MHs, spot/point repairs would occur at a maximum depth of 14 feet below grade. The installation of a MH requires a 5'L x 5'W area, cleanouts a 3'L x 3'W area, and approximately 10'L x 3'W area from the ground surface to the existing pipeline for external point repairs. Internal and/or external point repairs may occur in portions of the pipe that require repair due to offset joints, sags, intruding laterals, et etera. Internal point repairs use similar rehabilitation methods as stated above, and are contained solely within the existing pipe.</p>	NOE

2011102051	Revised SMP-30 Use Permit, Sunol Valley Aggregate Quarry Alameda County --Alameda The current Sunol Valley Aggregate Quarry is under operation on an approximately 323-acre site. The quarry was approved for aggregate mining by the County in 1992 pursuant to Surface Mining Permit-30 (SMP-30). Under this currently effective permit, quarry operations can continue through year 2021. An adjacent 58-acre parcel has now become available, and the applicant seeks to revise the SMP-30 permit to increase aggregate reserves by expanding and deepening the quarry pit, which will ultimately be used for water storage. The proposed revised permit (the project) seeks to increase the area under permit, deepen the excavation, extend the permit expiration date to 30 years after approval, to add an on-site asphalt batch plant and a concrete batch plant, and to amend the Reclamation Plan for the site. 2010021040	Claremont Colleges East Campus Upland, City of Claremont, Upland--Los Angeles, San Bernardino The proposed Project consists of a subdivision, master site plan, site plan, and development agreement for the phased development of a college sports complex with recreation/athletic fields, sports, parking, and supporting building facilities on a 75-acre former aggregate quarry within the cities of Upland and Claremont. The proposed Project is scheduled to be completed in five phases over a 10-15 year timeframe starting with approval of the tentative parcel maps within phase 1, parking and street improvements for Claremont Blvd. and Arrow Rte. within phase 2, portions of the sports complex, supporting buildings and Foothill Blvd. improvements within phase 3, the remainder of the sports complex, supporting buildings and Monte Vista Ave. within phase 4 and ultimate build-out within phase 5. Existing land uses include an archery range and a temporary construction parking area adjacent to Claremont Boulevard in addition to a permitted Class III landfill site. The purpose of the phased development is the relocation of sports facilities and associated parking from the main college campuses to the former quarry site and to provide additional parking for the campuses.	EIR	12/12/2011
2010041056	Pacific Coast Highway/Del Prado Avenue Phase 1 Street Improvement Proeject Dana Point, City of Dana Point--Orange The project area encompasses Pacific Coast Highway (PCH) and Del Prado Avenue in the City of Dana Point, extending from Copper Lantern on the east to Blue Lanterns on the west, within the Dana Point Town Center. The City of Dana Point is proposing the Pacific Coast Highway/Del Prado Avenue Phase I streetscape improvements for the Dana Point Town Center. Implementation of the proposed project will re-establish two-way circulation for both PCH and Del Prado. In addition to the return to two-way operations, the proposed improvements along PCH include traffic signal improvement/modifications, striping, and signing modifications, improved transit stops, and initial traffic and beautification related	EIR	12/12/2011

	<p>modifications to the "gateways" at Blue Lantern and Copper Lantern. The traffic signal improvement/modifications include new signals at Ruby Lantern and new intersection between Blue Lantern and Ruby Lantern. In addition, modifications are also proposed at other traffic signals within the project area to accommodate the two-way travel proposed for the two arterials. Other improvement include the incorporation of landscaped medians, street improvements as needed to accommodate bus turnouts and u-turns at designated locations, the modification of certain vehicular access points and the relocation of some on-street parking. Some of these improvements will require acquisition of rights of way for sidewalk easements, to accommodate the refined project design. The curb and gutter of PCH will generally remain in the existing location. A two-lane left-turn pocket will be included on southbound Golden Lantern at Pacific Coast Highway, along with other key signing and striping adjustments to accommodate the change to two way traffic and the associated traffic volumes.</p>

	rock crushing and export of 1,069,200 cubic yards of material over a two to four year period.		
2008041082	Lazer Broadcasting San Bernardino County --San Bernardino CUP to establish an unmanned self-supporting (no guy wires), 43-foot tall monopole for radio broadcast. The CUP also includes a 100 s.f. equipment shelter. A Major Variance is also requested to reduce the required 100-foot perimeter fuel modification area to 30 feet.	MND	11/28/2011
2011102053	350 Ocean Street Mixed-Use Development Santa Cruz, City of Santa Cruz--Santa Cruz The project application consists of a Demolition Authorization, Planned Development Permit, Design Permit, and Tentative Map to construct a mixed-use development with 58 residential apartments and 5,269 s.f. of commercial space within a four story building. The property currently is developed with two single-family units and 20 older multi-family units, which all will be demolished. Thus, the project will result in a net increase of 36 dwelling units on the site. The project requires the removal of 14 Heritage trees.	MND	11/28/2011
2011052046	Alexander Crossing Apartments Napa, City of Napa--Napa The project is a 134 unit multifamily residential development with a 4,800 community clubhouse and pool. The project is located on 6.39 acres in an area designated and zoned for residential development.	NOP	11/28/2011
2011101072	Wal-Mart Expansion Project Santee, City of Santee--San Diego The Wal-Mart Expansion Project consists of a proposal to enlarge an existing Wal-Mart retail store in the City of Santee, CA, from its current size of 131,220 s.f. to 180,339 s.f., thereby adding 49,119 s.f. The existing Wal-Mart store sells general consumer merchandise, including household and soft goods, automotive supplies, electronics, pharmaceuticals, limited food items, clothing, kitchenware, hardware, sporting goods, and a variety of other merchandise. The proposed expansion would allow the business to offer a larger selection of groceries to its customers. An application to amend the City of Santee Town Center Specific Plan has also been submitted to clarify that the sale of groceries in conjunction with other retail sales is an allowed use in the Town Center zone. Accompanying the proposed store expansion would be the development of new parking, mostly on a 5.26 acre undeveloped lot situated adjacent to and immediately south of the existing Wal-Mart store site. Development of the undeveloped lot would necessitate the approval of a merger of two parcels as well as abandonment and/or relocation of easements on the site, including water, utilities, and access/open space easements. The merger would eliminate the lot line separating the 14.78-acre lot on which the existing Wal-Mart is located and the 5.26 acre undeveloped parcel needed for the expansion and additional parking. Landscaping and infrastructure improvements would also be constructed.	NOP	11/28/2011

2011101071	<p>2011 Amendment to the 2007 French Valley Airport Land Use Compatibility Plan Riverside County Airport Land Use Commission Murrieta, Temecula--Riverside</p> <p>The 2011 Amendment would revise the boundaries of Airport Land Use Compatibility Zones (A, B1, B2, C, D, and E) identified in the previously adopted 2007 FVALUCP to reflect the removal and deletion of the previously planned (but never built) secondary runway from the French Valley Airport Master Plan. As the 2011 Amendment proposes to reconfigure the Compatibility Zones, the proposed amendment would modify the applicability of the previously adopted 2007 FVALUCP to various properties within the French Valley Airport Influence Area ("AIA"). The proposed amendment, however, would not change the development restrictions or criteria established for each Compatibility Zone by the 2007 FVALUCP. Practically speaking, the 2011 Amendment would reduce the restrictiveness of the 2007 FVALUCP. The 2011 Amendment also would revise projected noise level contour maps around the Airport and make changes to informational tables in the 2007 FVALUCP to reflect adoption of the French Valley Airport Master Plan and changes to airport features and activity since 2002.</p>	Neg	11/28/2011

2006051107	Vulcan Materials Company Mining and Reclamation Project Irwindale, City of Irwindale--Los Angeles The Final EIR for the Vulcan operations (certified by the City of Irwindale on January 24, 2008) included three sites - the Durbin Quarry, Reliance I Landfill, and the Reliance I Quarry. The Final EIR noted that a portion of the Reliance I Quarry lied within the City of Azusa, outside of the City of Irwindale's jurisdiction. The present proposal to treat the quarry under a single jurisdiction for purposes of mining and reclamation was made in response to a recommendation of the Department of Conservation, Office of Mine Reclamation, since the physical configuration does not warrant treating the quarry as two separate mines. Therefore the proposed change covered by the Addendum to the FEIR is to add the Azusa portion (51.56 acres) to the total project footprint. The reclamation Plan has been amended to include this additional area as well.	NOD	
2010042093	Fairfield Train Station Specific Plan Fairfield, City of Fairfield--Solano The focal point of the Specific Plan is the approved Capitol Corridor train station at the intersection of Peabody and Vanden Road. The Specific Plan provides for a minimum of 3,000 dwelling units within a one-half mile radius of the station. At buildout, the Specific Plan could accommodate up to an additional 6,800 dwelling units, an added population of ~19,277, roughly 5 million sf of commercial and industrial development, and a range of public and open space uses on ~2,972 acres of land.	NOD	
2011051081	Transit Center Atascadero, City of Atascadero--San Luis Obispo The City of Atascadero Public Works Department proposes the construction of a new transit center adjacent to the Colony Square development and the existing City Hall. The new transit center will replace the existing Regional Transit Authority of San Luis Obispo County (RTA) and Atascadero Transit (North County Shuttle) bus stop and shelter at Capistrano Avenue and Lewis Avenue. The proposed transit center would include accommodations for three (3) on-street angled bus parking, and two feet bus shelters. Additional improvements include new streetscape, bicycle racks.	NOD	
2011072054	Bellevue School Modernization Project Bellevue Union School District Santa Rosa--Sonoma The Bellevue Union School District is proposing to reconfigure bus passenger loading, student drop-off and pick-up access, parking and internal driveway access at the existing Bellevue Elementary School in unincorporated Sonoma County. Current parking and site access is substandard and results in traffic backups onto Primrose Avenue during school drop-off and pick-up times. Site access will be reconfigured utilizing existing driveways from Primrose Avenue to facilitate child drop-off and pick up by construction of a new parking area.	NOD	
2011081037	Fletcher Basin Improvement Project Orange County Water District Orange--Orange Proposed project involves the construction and operation of a 4.5 acre basin that would be used for flood control protection and groundwater recharge.	NOD

2011108331	Rowher Flats OHV Staging Areas Development Parks and Recreation, Department of --Los Angeles The project involves ungrading the existing Rowher Flats OHV Staging Areas (SAs) 1, 2, and 3. The upgrades will take place within six acres of the three existing SAs.	NOE	
2011108332	Toner Nursery Parks and Recreation, Department of -- The purpose of this project is to provide a nursery structure with shade for future restoration projects. The nursery structure will be built at the Toner site near the airport at Ocotillo Wells SVRA. A nursery at this location will alleviate water consumption at the District Office and central well. The nursery structure will be 33' long by 12' wide and 8' tall, with an open walled lath design similar to the nursery currently in use at the district office. The nursery structure will be supported by twelve, 4'x4' posts (six on each side). Twelve 18" x 2' deep holes will be dug for the posts. To provide water for the nursery a 554' trench will be dug (6" wide by 24" deep) to connect to an existing water source. A 154' trench will be dug, (6 inch wide by 24 inch deep), to provide electricity to the nursery structure from an existing power source. The two utility trenches will be dug around several Tamarisk trees to avoid harming their root structures. Crushed gravel will be laid down over the bare dirt foundation of the nursery structure to provide additional stability and traction. Two Tamarisk tree limbs growing away from the main stem along the ground will be removed (about 3' each) to clear enough space for the nursery structure. No Tamarisk trees will be removed and no native vegetation will be disturbed.	NOE	
2011108333	Construction of Bishop Well 03 Public Health, Department of --Monterey The California Department of Public Health, as the Lead Agency, will be issuing a water supply permit to California American Water for proposed project includes the drilling of Well No. 3 as a replacement well for Well No. 2 that failed due to structural problems. 2007072036	San Francisco Bay and Delta Sand Mining California State Lands Commission San Francisco, Pittsburg, Oakland--San Francisco, Marin, Contra Costa, Solano Hanson Marine Operations and Suisun Associates have applied for renewed leases and related permits that would allow them to continue mining sand for 10 years following the end of the regular 10-year term that ends in June, 2008. Mining occurs in Central San Francisco Bay, Middle Ground Shoal and within the navigation channels of Suisun Bay. The purpose of this sand mining is to obtain marine aggregate, which is primarily used for construction purposes within the greater San Francisco Bay Area.	EIR	12/14/2011

2011042089	<p>New Ukiah Courthouse Administrative Office of the Courts Ukiah--Mendocino</p> <p>1. Library Site (near the existing county public library, bounded by E. Perkins Street, N. Main Street, Mason Street, and including properties fronting Smith Street): This site is comprised of 14 parcels within the immediate downtown area of Ukiah. The site is approximately six acres in size and is bounded by E. Perkins Street on the south, N. Main Street on the west, and Mason Street on the east. The Mendocino County Assessor Parcel No. include: 002-191-20, -21, -22, -23, 002-192-1, -2, -3, -11, -14, -17, -18, -22, -24, -25. The city of Ukiah owns six of the 14 parcels; the remaining parcels are privately-owned. Gibson Creek flows through the northeastern portion of the site; however, the Creek is contained by a culvert and is situated primarily underground. The site is currently improved with a number of structures.</p> <p>2. Railroad Depot Site (bounded by E. Perkins Street, Leslie Street, Clay Street, and railroad tracks, located adjacent to 309 E. Perkins Street): This site was utilized as the former Ukiah rail yard. The approximately 10-acre site is located south of E. Perkins Street and west of Leslie Street. The Mendocino County APNs for the site include 002-232-12, -13, and 002-282-18 and -19. The site is owned by the North Coast Railroad Authority, which is located in Ukiah. Inactive railroad tracks from the western boundary of the site. Gibson Creek flows through the northeastern portion of the site. The site is no longer an active rail yard, and is primarily vacant, with the exception of a historic train depot (which would not be removed), and two small warehouses.</p> <p>The proposed project includes the construction of a three-story (maximum), approximately 114,000 s.f. courthouse with a basement, and nine courtrooms.</p>	EIR	12/14/2011
2011052007	<p>North Cabrillo Highway Subdivision Project Half Moon Bay, City of Half Moon Bay--San Mateo</p> <p>An IS/MND was previously circulated for public review for the original project (SCH# 2011052007). Based on comments received on the Draft IS/MND, a new, avoidable significant effect has been identified and mitigation measures have been added in order to reduce the effect to a less-than-significant level. This revision triggers a recirculation of the IS/MND pursuant to Section 15073.5 of the CEQA. Additionally, minor changes to the Tentative Parcel Map were made for the proposed project related to bridge design and the proposed storm drain outfall. The proposed project consists of an application for a Coastal Development Permit (CDP), Planned Unit Development Plan, Use Permit, and Tentative Parcel Map to divide approximately 2.1 acres of ruderal fields and coastal scrub into four lots, and to construct a new on-site storm drain system to replace an existing open channel (Pullman Ditch), located on adjoining properties along the northern boundary of the Project Area. No development other than the installation of streets, drainage and other utilities is proposed at this time. The development of single family residences on the four new lots would be evaluated with the submittal of a CDP application in the future.</p>	MND	11/29/2011

	General Aviation (GA) Airport; E) Public Facilities; F) Infrastructure and public facility improvements; and G) Water supply and wastewater collection services to the community of Crows Landing. Details provided in the attached NOP.		
2011101073	Zoning Text Amendment A00-013 Amending Section 17.48.32 Morro Bay, City of Morro Bay--San Luis Obispo The purpose of these amendments is to comply with the amendment made in 2002 to State Law Section 65852.2 which requires cities to set standards for the development of second dwelling units with ministerial review in an effort to increase supply of small, affordable housing units while ensuring that those units remain compatible with the existing neighborhood.	Neg	11/29/2011
2011101074	Ord Community Sphere of Influence Amendment and Service Area Annexation Marina Coast Water District --Monterey The proposed project is the Marina Coast Water District's Ord Community Sphere of Influence amendment and Service Area annexation in accordance with relevant codes and ordinances of the District and local jurisdictions, and the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000. MCWD proposes to amend their SOI and expand their SA to include all of the former Fort Ord, the development of which is guided by the Fort Ord Reuse Authority and their Fort Ord Reuse Plan, and the relevant City and County General Plans, and Master Plans for the CSUMB, Fort Ord Dunes State Park, and University of CA Monterey Bay Education, Science and Technology Center. The District currently provides service to this area as outlined in the Water/Wastewater Facilities Agreement between FORA and MCWD (1998). The end of FORA's legal existence is scheduled for 2014. The proposed project will allow water and wastewater service to continue beyond the FORA expiration, and will provide customers the ability to vote for the MCWD Board of Directors. In addition, a small area containing a school and a church that presently receive water from MCWD and are within MCWD's Central Marina customer area will be added to MCWD's SA to eliminate an island within the District that was inadvertently created during the last SA annexation of property north of Marina. 2011108347	Orick Property Fire Cleanup Forestry and Fire Protection, Department of --Humboldt The project involves the removal of a fire damaged structure and grading of the site. No further development is planned after site rehabilitation. The project is situated near the confluence of Little Lost Man Creek and Prairie Creek. The site is flat and located more than 150 feet away from both watercourses. The site is surrounded by a compacted gravel driveway, which provides access off of Highway 101. Removal of the fire debris and grading of the site will remove a public hazard and improve the aesthetics of the site. Grading and minor backfilling of the building footprint will be limited to approximately 1/4 acre on slopes less than 10 percent.	NOE
