

Jerry Brown, Governor

STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**

October 16 – 31, 2014

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **October 16 – 31, 2014**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Director

CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

USPS:

State Clearinghouse
P.O. Box 3044
Sacramento, CA 95812-3044

OR

USPS/Courier Service / Hand Deliveries:

State Clearinghouse
1400 Tenth Street, Room 113
Sacramento, CA 95814

INFORMATION AVAILABLE ON-LINE

The CEQA Statute and Guidelines are available through the Natural Resources Agency's website at:

<http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

Environmental Document Filings with the State Clearinghouse 1999-2013

All CEQA documents filed with the State Clearinghouse are available for viewing on the internet at <http://www.ceqanet.ca.gov>

Key:

- NOP** Notice of Preparation
 - EIR** Environmental Impact Report
 - ND/MND** Negative Declaration/Mitigated Negative Declaration
 - NOD** Notice of Determination
 - NOE** Notice of Exemption
 - EA** Environmental Assessment
 - EIS** Environmental Impact Statement
 - Oth** **Other** types of documents, including Final EIRs, Early Consultation notices, etc.
- **NOTE: Documents included are: BIAs (Bureau of Indian Affairs) Gaming and Non-Gaming – Land into Trust documents.**

CEQA Documents

Key for abbreviations of Document Type:

ADM	Addendum
CON	Early Consultation Notice
EIR	Draft Environmental Impact Report
SIR	Supplemental EIR
SBE	Subsequent EIR
EIS	Draft Environmental Impact Statement
EA	Draft Environmental Assessment
JD	Joint Document (CEQA/NEPA)
FONSI	Finding of No Significant Impact
NOI	Notice of Intent
FIS	Final Environmental Statement
Neg Dec/ND	Negative Declaration
MND	Mitigated Negative Declaration
NOE	Notice of Exemption
NOD	Notice of Determination
NODe	Notice of Decision
NOP	Notice of Preparation (of an EIR)
FIN	Final Document
TRI	Tribal Compact Environmental Evaluation
BIA-LA	Bureau of Indian Affairs Notice of Land Acquisition
BIA-ND	Bureau of Indian Affairs Notice of Decision
OTH	Other type (none of the above)

<u>Documents Received on Thursday, October 16, 2014</u>			
1985042404	Urban Runoff Diversion System Maintenance, Addendum to Supplement and FEIR Sweetwater Authority Note: Final In 1987, Sweetwater Authority certified the Supplement and Final EIR for the construction of the Sweetwater Reservoir Urban Runoff Diversion System (URDS I) Project. The URDS I Project consisted of the construction of Gum Tree Cove, Alacena Court, and Hansen's Creek ponds (including detention ponds and forebays); construction of the force main and pump station; and construction of the gravity pipeline from Gum Tree Cove pond to Hansen's Creek pond.	ADM	11/17/2014
2012012013	Moody Flats Quarry Shasta County Shasta Lake--Shasta The project includes a General Plan Amendment and Zone Amendment to designate and zone the entire site as Mineral Resource. It also includes a Use Permit for a 345-acre quarry with a 75 acre processing area for aggregate processing, Portland cement plant, asphalt plant, truck and rail loading facilities. At full production, the quarry would produce up to 2 million tons/year of aggregate. The project time period would be 100 years, during which time a Reclamation Plan would be implemented.	EIR	12/01/2014
2012042051	New Placerville Courthouse Judicial Council of California Placerville--El Dorado The proposed project includes the acquisition of property and the construction of a new courthouse. The proposed new, courthouse would consolidate the courthouse functions currently in the existing Main Street Courthouse (currently the Main Street Courthouse has four courtrooms) and the court functions located in the county administrative complex Building C. Building C currently has two courtrooms. The proposed project site is undeveloped land adjacent to the El Dorado County Jail located off Forni Road in the City of Placerville.	EIR	12/01/2014
2013112008	State Route 82 at Floribunda Ave. Intersection Safety Improvement Project Caltrans #4 --San Mateo The proposed project would create a center channelized left turn lane by widening the existing four-lane undivided highway (SR 82) within Caltrans state right-of-way, along the north and southbound approaches to the intersection at Floribunda Avenue to accommodate the construction of a 10' Left Turn lane, two 11' through lanes in both directions and 1.5-foot shoulders. Protected left turn signals, intersection street lighting and upgraded ADA curb ramps at 3 corners would be added. SR 82 would be widened within the existing Caltrans state Right-of-way. The purpose of the project is to improve safety at the intersection of SR 82 and Floribunda Avenue by reducing existing and the potential for collisions involving left turn traffic movements.	EIR	12/01/2014

2014101040	<p>Toxic Air Contaminant Reduction for Compliance with SCAQMD Rules 1420.1 and 1402 Exide Project South Coast Air Quality Management District Vernon--Los Angeles</p> <p>The proposed project is intended to reduce toxic emissions of arsenic, benzene and 1,3-butadiene to comply with the recent amendments made to SCAQMD Rule 1420.1 - Emission Standards for Lead and Other Toxic Air Contaminants from Large Lead-Acid Battery Recycling Facilities, as well as to assure compliance with requirements to SCAQMD Rule 1402 - Control of Toxic Air Contaminants from Existing Sources including the proposed Final Revised Risk Reduction Plan. This will be accomplished by ensuring exhaust gas streams containing high levels of arsenic emissions are vented to appropriate air pollution control systems capable of controlling arsenic emissions which exist in gaseous or unfilterable form. The proposed project will also control gas streams containing gaseous organic air contaminants, carbon monoxide, and oxides of sulfur which previously escaped control because they were vented only to dry filter media or were emitted into the building enclosure due to a lack of sufficient negative pressure in the reverberatory and blast furnaces.</p>	MND	11/14/2014
2014102042	<p>Mormon Island and Lakeridge Oaks Lift Station Removal Project El Dorado Irrigation District --El Dorado</p> <p>The El Dorado Irrigation District is proposing to implement the Mormon Island and Lakeridge Oaks Lift Station Removal Project. Removal of these lift stations is necessary since these facilities have reached the end of their design life and need complete replacements to continue reliable service. The District has determined the best course of action is to bypass the two lift stations and send all sewer flows via gravity to the nearby Promontory 3 Lift Station. The District would then remove the two out-of-service lift stations thereby reducing the cost of rehabilitating the lift stations, reducing the potential for sewer system overflows, and reducing the overall operations and maintenance costs associated with these lift stations.</p>	MND	11/14/2014
2014102043	<p>Complete Streets General Plan Amendment South San Francisco, City of South San Francisco--San Mateo</p> <p>The proposed project consists of an update to the South San Francisco General Plan's Circulation Element. The proposed update includes a revision of goals, principles, and policies addressing the concept of "Complete Streets". The Complete Streets GPA would include edits and additions to existing text and policies in various sections of the Transportation Element. Together, these amendments integrate the objectives of the Complete Streets GPA into the City's long-term planning framework. The amendments provide a policy framework design to support implementation of Complete Streets concepts, including integrating Complete Streets infrastructure and design features into street design and construction projects and to make Complete Streets practices a routine part of South San Francisco's everyday operations.</p>	MND	11/14/2014

1985041404	CUP CASE #10, MAP #166-20 Kern County TEHACHAPI--KER The Urban Runoff Diversion System Phase I (URDS I) Maintenance is a habitat improvement action that will restore the freshwater marsh habitat within the URDS I detention ponds and forebays, protect the Sweetwater Reservoir from first flush storm flows, urban runoff, and associated pollutants, and ultimately improve the water quality of the captured runoff. The URDS I detention ponds and forebays have been negatively affected by sedimentation, vegetation excess, and detritus accumulation. The restoration goals of this Maintenance action will be accomplished by conducting sediment removal from detention ponds and forebays, and establishment of freshwater marsh within the same areas.	NOD	
1985042404	Urban Runoff Diversion System Maintenance, Addendum to Supplement and FEIR Sweetwater Authority The Urban Runoff Diversion System Phase I (URDS I) Maintenance is a habitat improvement action that will restore the freshwater marsh habitat within the URDS I detention ponds and forebays, protect the Sweetwater Reservoir from first flush storm flows, urban runoff, and associated pollutants, and ultimately improve the water quality of the captured runoff. The URDS I detention ponds and forebays have been negatively affected by sedimentation, vegetation excess, and detritus accumulation. The restoration goals of this Maintenance action will be accomplish by conducting sediment removal from detention ponds and forebays, and reestablishment of freshwater marsh within the same areas.	NOD	
2008072103	Big Bear Flat Restoration Project Fall River Resource Conservation Demonstration --Siskiyou The project is limited to the addition of a single rock vane to the existing grade control structure and any required routine maintenance at the downstream end of the Big Bear Flat Restoration Project. Estimated material for the additional vane includes approximately 48 cubic yards of rock sized between six and 36 inches.	NOD	
2010041078	City of Visalia General Plan Update Visalia, City of Visalia--Tulare Visalia General Plan Update: This document is intended to replace the existing General Plan, which was adopted in 1991 and last updated in 1996, and other general Plan elements that were adopted generally before and after 1991. The General Plan is composed of goals, policies, a land use diagram, and other graphic figures and maps (e.g. open space systems, a transportation network, and public facilities) to guide future development within the City's boundaries, through the year 2030, full development under the General Plan Update is referred to as "buildout". Although the General Plan envisions policies and land of a site for a certain use docs not necessarily mean the site will be built or redeveloped with that use in the next 20 years. The Land Use Element of the General Plan provides a more detailed discussion and analysis of General Plan buildout. At buildout, the General Plan will accommodate a population of 207,900 persons, an increase of about 83,400 persons over the 2010 US Census population of 124,440. Over a 20 year period, this represents an annual growth rate of 2.6%. Also at buildout, the General Plan Update will accommodate approximately 76,100 housing units (an increase of 32,000 units) and 22.75 million square feet of non-residential floor area over existing conditions. 	<p>The proposed General Plan includes the following elements: Land Use, Circulation, Open Space, Conservation, Noise, Safety, and Air Quality and Greenhouse Gasses (GHG). It also includes two optional elements that address local concerns: Historic Preservation and Parks, Schools, Community Facilities, and Utilities. The Housing Element was adopted in March 2010 as a separate volume and is not included in this update.</p>		
2012061042	<p>Conditional Use Permit No. 11-03 (SunPower Henrietta Solar Project) Kings County Lemoore--Kings CUP No. 11-03 permits the construction of a 136 Megawatt solar photovoltaic energy facility. Addendum No. 1 to CUP No. 11-03 eliminates Mitigation Measure AQ-6 since updated emission estimates show that the potential impacts related to nitrogen oxides (NOx) are below San Joaquin Valley Air Pollution Control District's regional thresholds of significance and Addendum No. 1 to CUP No. 11-03 adds additional detail concerning the off-site Pacific Gas and Electric Company's switching station facility. The revised Project will remain consistent with the approved CUP and will continue to be subject to the same Conditions of Approval and Mitigation Measures as previously approved by the County Planning Commission, except for the elimination of Mitigation Measure AQ-6 and the addition of Planning Division Condition Numbers 33 and 34 modified by Addendum No. 1.</p>	NOD	
2012071064	<p>Tulare General Plan Revision, TOD Plan, and CAP Tulare, City of Tulare--Tulare An update to the City's existing General Plan (excluding the Housing Element) but including a Transi-Oriented Development Plan and Climate Action Plan. The General Plan is composed of goals, policies, a land use diagram, and other graphic figures and maps to guide future development within the City's boundaries through the year 2035. An EIR analyzes the impacts to the environment that would occur in the General Plan, TOD and CAP.</p>	NOD	
2013122050	<p>The 2014 Fisheries Restoration Grant Program Fish & Wildlife #2 --Mendocino The project will address high and medium priority sediment delivery features as identified by Mendocino Redwood Company in their Watershed Analysis while also storm-proofing 5.4 miles of riparian roads that deliver sediment into adjacent Class I watercourses in a core recovery area. This project will reduce road-related sediment at 43 sediment source locations and protect and improve instream habitat for all salmonid species within the North Fork Navarro River watershed by permanently decommissioning 4.4 miles and upgrading 1 miles of streamside road. This project will also address several other high priority tasks within both the NMFS Recovery Plan and CDFG Recovery Plan by adding at least 53 pieces of large woody material at approximately 12 sites along 1.5 miles of stream.</p>	NOD	
2014061009	<p>Line 96 Decommissioning Project Goleta, City of Goleta--Santa Barbara The Project consists of the decommissioning in place and removal of portions of the Line 96 pipeline segments, located within the Hollister Avenue Right-of-Way, Pacific Oaks Road Right-of-Way, Phelps Road Right-of-Way, the removal of</p>	NOD

2014108217	Technalloy Company, Inc. (Name Changing to Central Wire Inc.) -- Class 1* Modification Toxic Substances Control, Department of Perris--Riverside The Facility continues to operate a manufacturing plant in Perris, California, Riverside County that specializes in stainless steel and nickel alloy wire for the aerospace and other related industries.	NOE	
2014108218	Van Gordon Creek Restoration (Streambed Alteration Agreement No. 1600-2013-0094-R4) Fish & Wildlife #4 -- The Project includes restoration performed as remediation for previous, unauthorized, on-site impacts. Restoration activities include revegetation, removing bentonite from on adjacent pond, replacing stream crossings installed without local approvals, stabilizing banks and removing erodible materials, and regrading and contouring a previously straightened channel.	NOE	
2014108219	Unnamed Tributary to Deer Creek Debris Cleanout (Streambed Alteration Agreement No. 1600-2014-0217-R2) Fish & Wildlife #2 --El Dorado The project is limited to trimming of riparian vegetation that is interrupting flows within the drainage and removal of accumulated dead vegetation and debris within the channel and the lower bank of the drainage that has previously resulted in backed up flows within the drainage and flooding of an adjacent residence. Work will occur along an approximately 30 foot section of the drainage channel. Following vegetation thinning, any areas of drainage bank that is significantly eroded will be reinforced using rock slope protection (RSP). All RSP shall be placed by hand.	NOE	
2014108220	Issuance of Streambed Alteration Agreement No. 1600-2014-0228-R1, Seiad Creek Off-Channel Coho Rearing Habitat Project Fish & Wildlife #1 --Siskiyou The project is limited to the construction of an off-channel coho rearing pond on Seiad Creek, 0.4 miles above the Highway 96 Bridge and 1.3 miles upstream from the Klamath River. The pond will provide favorable temperature and low velocity habitat requirements for winter rearing and will complement the Seiad Creek Habitat Enhancement Project.	NOE	
2014108221	SR 371 Shoulder Widening EA 0M200: 0800000467 Regional Water Quality Control Board, Region 9 (San Diego), San Diego --Riverside The project entails the widening of the existing roadbed on State Route (SR) 371 to provide four foot shoulders in both directions. Five existing culverts will be extended, and approximately 48 down-drains will be removed, replaced, or created.	NOE	
2014108222	District Pipeline Replacement - 2015 Truckee Donner Public Utility District Truckee--Nevada Installation of approximately 4,915 feet of PVC and/or ductile iron pipeline to replace portions of existing steel pipelines.	NOE

2013112019	Jennings Avenue Pedestrian and Bicycle Rail Crossing Santa Rosa, City of Santa Rosa--Sonoma The City proposes improvements at an existing, unofficial at-grade pedestrian and bicycle rail crossing at Jennings Avenue and the SMART rail corridor to provide an official rail crossing. Two types of rail crossings are evaluated in the Draft EIR: an at-grade pedestrian and bicycle crossing, which would include crossing surfaces at the same elevation as the existing railroad tracks; and a pedestrian and bicycle rail overcrossing, which would provide crossing surfaces over the railroad tracks. The EIR also evaluates the closure of one existing rail crossing at either W. Sixth Street, W. Seventh Street, or W. Eighth Street in exchange for a new pedestrian and bicycle at-grade crossing at Jennings Avenue. A public hearing will be conducted by the City Council on Tuesday, November 18, 2014 at or after 5:00 p.m., in the City Council Chamber, City Hall, 100 Santa Rosa Avenue, Santa Rosa.	EIR	12/01/2014
2014011069	Lincoln Specific Plan Whittier, City of Whittier--Los Angeles The Project involves a Specific Plan with the following primary components: demolition of 50 structures (approximately 400,156 sf of non-operational institutional building area) associated with the site's poor use as a correctional facility; construction of approximately 750 dwelling units; approximately 208,350 sf of commercial land uses (including adaptive reuse of two vacant structures on-site); 8.5 (7.3 net) acres of open space; and offsite infrastructure improvements including roadway improvements to Whittier Boulevard, Sorensen Avenue, the extension of Elmer Avenue, and construction of a sewer main between the Project site and Washington Boulevard. Buildout of the area could not exceed the maximum allowed development under the Specific Plan.	EIR	12/01/2014

2014062021	<p>2015-2023 Housing Element Update Orinda, City of Orinda--Contra Costa</p> <p>The proposed project is an update of the City's General Plan Housing Element for the 2015-2023 planning period. The housing element is required to identify and analyze existing and projected housing needs, and include statements of the city's goals, policies, quantified objectives, and scheduled programs for the preservation, improvement, and development of housing. ABAG has determined the City's Regional Housing Needs Allocation (RHNA) is 227 units (131 lower-income, 54 moderate-income, 42 above-moderate income). The City is considering three alternatives for meeting the lower-income requirement. There are no specific proposed housing projects or development applications for any of the sites. Depending on the alternative selected, implementation of the Housing Element Update may require General Plan land use designation changes as well as rezoning.</p>	EIR	12/01/2014
2014101041	<p>Auxiliary Maintenance Yard Modernization and Improvements Los Alamitos Unified School District Los Alamitos--Orange</p> <p>The District proposes to improve and modernize approximately 2.8 acres of the existing Auxiliary Center Maintenance Yard. No improvements are proposed for the remaining 0.58 acre except to bring required utilities to the site such as natural gas and water. Improvements would include: (1) installation of a compressed natural gas (CNG) fueling station, (2) construction of a warehouse building, (3) construction of a vehicle maintenance/bus wash building, (4) interior renovation of the existing administration building, (5) relocation or repaving of parking areas, (6) demolition and removal of selected existing structures, and (7) modification to drainage features.</p>	MND	11/17/2014
2014101042	<p>Simms Tract Map No. 36218 Temecula, City of Temecula--Riverside</p> <p>The proposed project consists of a Tentative Tract Map application to subdivide one lot totaling 24.26 acre into seven residential lots and one lot for a water quality feature. Lots will range in size from 0.86 to 4.36 gross acres. Approximately 30% of the project site will be graded. CC&Rs as well as an HOA with an architectural control committee will be formed. The project will include site preparation for the required infrastructure. The graded areas will allow for the construction of housing pads, a street to provide access to the lots, landscaping, and site trenching for wet and dry utilities. John Warner Road, near the intersection with Santiago Road, will be reconstructed with a vehicular bridge to repair storm damage and to reconnect it with Santiago Road. The site is currently vacant, yet disturbed by various off-road and hiking trails.</p>	MND	11/17/2014
2014101044	<p>Santa Anita Stormwater Flood Management and Seismic Strengthening Project Los Angeles County Flood Control District Arcadia, Monrovia--Los Angeles</p> <p>The Project would modify existing flood management and water conservation facilities along the Santa Anita Canyon Watershed, including the Santa Anita Dam, the Santa Anita Headworks, the Wilderness Park Culvert Crossing, and the Santa Anita Debris Dam. The LACFCD facility improvements would: (1) reduce flood risk to downstream communities; (2) enhance sustainability of the local water supply and increase recharge to the groundwater basin by over 500 acre-feet per year; (3) improve all-weather access to the Arcadia Wilderness Park by constructing a</p>	MND	11/18/2014

<u>Documents Received on Monday, October 20, 2014</u>			
	proposes to construct an approximately 4.4 mile segment of a class 1 and class 2 bike path from the City of San Luis Obispo to the staging area of the existing area of the existing Bob Jones bike path at Ontario Road within the Avila Valley area. The project includes improvements to a staging area at the Octagon Bark parking lot, construction of four bridges and crossings along South Higuera Road. The proposed project is within the Agriculture and Rural Lands land use categories and is located in between the south-western edge of the City of San Luis Obispo, approximately 2,000 feet south of the intersection of South Higuera and Los Osos Valley Road down South Higuera, along San Luis Obispo Creek, Monte Road and Ontario Road.		
2010071036	Austin Quarry (PRJ #2009-001) Madera County Madera--Madera NOTE: Extended Per Lead	EIR	01/05/2015
	CalMat Co., dba Vulcan Materials Company, Western Division is proposing a new hard rock quarry in central Madera County. The Project would be located on approximately 356 acres of the 671-acre Austin Quarry property, a privately owned parcel currently used for dry land cattle grazing. The Project would excavate, process, and distribute hard rock aggregate material, and would include facilities and operations for the production and sale of asphalt, the acceptance and processing of recycled asphalt for use in Recycled Asphalt Pavement (RAP), and the acceptance and processing of recycled concrete for use in base products. The project also includes a reclamation plan to provide for use of the site following the completion of quarry excavation.		
2012072046	Phillips 66 Company (Formerly Conocophillips) Propane Recover Project Contra Costa County San Pablo--Contra Costa The proposed project would add and modify processing and ancillary equipment within the refinery. New equipment includes a hydrotreater, fractionation columns to recover propane and butane, and propane storage vessels and treatment facilities, as well as two new rail spurs. To provide the steam required by the proposed project, either a new 140 million Btu/hr steam boiler would be added or more steam would be provided by the existing steam power plant if the new boiler were not built. There would also be minor modifications to existing process units and utility systems for the purpose of tie-ins and to address any changes in operating pressure or temperature at the tie-in points. The proposed project would require hydrotreating a portion of the RFG, a process that would reduce the amount of sulfur in the fuel gas, and because fuel gas is now burned to produce heat for refinery processes, would ultimately reduce the refinery's SO2 emissions to the atmosphere. The project would be built in two phases. The first phase would provide enhanced recovery and increased rail shipments of butane. Phase I would include all project components except propane storage and the additional rail loading rack and spurs. During the second phase, the facilities to store and ship propane would be added along with the piping and other ancillary equipment necessary to get the propane from the Propane/Butane Recovery Unit to the storage vessels and loading racks. Startup would occur after the completion of construction, which is estimated to take 12 to 15 months.	EIR	12/04/2014

2014101045	Ferrari Annexation, General Plan Amendment, and Prezoning Atwater, City of Atwater--Merced Annexation of 330-acre site located adjacent to the City of Atwater (cross streets of N. Buhach Road/Ashby Road). Site is within the City of Atwater Sphere of Influence. General plan amendment to modify existing City land use designations, with majority of project being amended from Commercial and Low Density Residential designations to Business Park designation. Prezoning proposed commensurate with proposed land use amendments. Concurrent approval of a Planned Development Master Plan and Vesting Tentative Map for the Ferrari Ranch, an approximately 160-acre portion of the annexation area is to be considered. Planned Development Master Plan and Vesting Tentative Map approvals would enable Ferrari Ranch project applicant to submit future final development plans for individual projects within the master plan area. Ferrari Ranch is currently being planned for regional commercial, regional medical, and regional park uses. Final development plans are not being submitted for consideration by the Ferrari Ranch applicant at this time.	NOP	11/18/2014
2014102047	Estero Americano Bridge Replacement Project Caltrans #4 --Marin, Sonoma Caltrans proposes a project to replace a bridge on SR 1 over the Marin and Sonoma County line southeast of Valley Ford, CA with a new 266'-long cast-in-place concrete box girder bridge.	Neg	11/18/2014
2014091009	Stone Creek Casitas Chula Vista, City of Chula Vista--San Diego Note: Response to Comments The project proposal consists of a 97 unit apartment complex comprised of one and two bedroom units with attached carports within six buildings. Additionally, proposed on-site improvements for the parcel include a recreation building, 181-space parking lot, new landscaping and children's play area, and four trash enclosures. Off-site improvements include street improvements to Main Street with a 24-ft. street dedication. The proposal consists of Design Review, Rezone, and Planned Sign Program applications. The Rezone of the property proposes to change the zone from Limited Industrial (ILP) to Apartment Residential (R3) zone, which is consistent with the General Plan designation of Residential High (RH).	Oth	
1985042404	Urban Runoff Diversion System Maintenance, Addendum to Supplement and FEIR Sweetwater Authority CDFW is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code (#1600-2014-0126-R5) to the project applicant, Sweetwater Authority. The project proposes to remove accumulated sediment, vegetation, and detritus from detention ponds and forebays constructed in 1990 as part of the Urban Runoff Diversion System, and reestablish freshwater marsh habitat in the same areas. <u>Documents Received on Monday, October 20, 2014</u>			
2003101142	Dana Point Harbor Marina Improvement Project Orange County Dana Point--Orange The Project consists of the installation of 20 round, 14-inch outer diameter steel guide pile sleeves over the 20 existing 10-inch outer diameter round steel guide piles of Docks 1 and 2 at the Sport Fishing Docks. The internal pile guides will be replaced with new larger ones to fit the new larger diameter piles. Each pile will be backfilled with high strength grout material to ensure the existing and new pile act together when subjected to loading. An approximately 100 foot by 60 foot area will be used for staging in the launch ramp parking area.	NOD	
2004101076	Interstate 5 North Coast Corridor Project Caltrans #11 San Diego, Oceanside, Carlsbad, Solana Beach, Del Mar, ...--San Diego Caltrans proposes to widen the bridge and add HOV/Managed as well as pedestrian and bicycle upgrades. The State Lands Commission action is an approval of a Public Agency Permit and Right-of-way maps at the San Elijo Lagoon Bridge. The Term is continuous use, plus one year.	NOD	
2007072036	San Francisco Bay and Delta Sand Mining Project California State Lands Commission San Francisco, Pittsburg, Oakland--San Francisco, Marin, Contra Costa, Solano The proposed project involves commercial hydraulic sand mining operations for the next 10 years in central San Francisco Bay, the Middle Ground Island Shoal, and Suisun Channel of Suisun Bay. This operation provides local marine aggregate for use in highway maintenance and construction, new residential complexes, and commercial and public buildings within the greater San Francisco Bay Area. Project activities include hydraulic sand mining and san offloading. CDFW issued the existing CESA ITP in order to address and authorize, as fully mitigated, the incidental take and related impacts to Central Valley spring-run Chinook salmon (<i>Oncorhynchus tshawytscha</i>), Sacramento River winter-run Chinook salmon (<i>O. tshawytscha</i>), Delta smelt (<i>Hypomesus transpacificus</i>), and longfin smelt (<i>Spirinchus thaleichthys</i>) and their habitat. Major Amendment No. 1, as approved, modifies the previously issued CESA ITP, by allowing sand mining upstream of the X2 location in the Middle Ground Shoal and Suisun Bay lease areas from December 1 through June 30. Major Amendment No. 1 restricts the volumes of sand depth of sand that can be mined upstream of the X2 locations during that time period and requires the purchase of additional Covered Species credits. In approving Major Amendment No. 1, CDFW determined, among other things, that with the sand volume restrictions, depth restrictions, and additional credit purchase, there would be no substantial increase in the nature or scope of the previous authorization provided by the CESA ITP, and that no new significant or substantially more severe environmental impacts than previously considered and disclosed would occur.	NOD	
2007102037	Sears Point Wetland and Watershed Restoration Project Fish & Game #3 Novato--Solano The Project would restore approximately 955 acres of tidal marsh, and preserve and enhance a 106-acre area of non-tidal seasonal wetland while maintaining existing agriculture between the SMART line and Highway 37. The State Lands Commission action is an approval of a 20-year General Lease - Other, through October 13, 2034.	NOD

2009041068	Sweetwater Phase III Trail San Diego County Unincorporated--San Diego Trail repairs, trail closures, wetland habitat restoration, bridge replacement, and the installation and replacement of culverts.	NOD	
2011061018	Department of Water and Power Specific Plan Amendment Seal Beach, City of Seal Beach--Orange The proposed project involves amendments to the 1996 DWP Specific Plan (proposed Specific Plan Amendment) that would allow for the development of a 32-lot residential development (Tentative Tract Map No. 17425). The residential uses would be located on approximately 4.5 acres in the northern portion of the project site. The remaining approximately 6.4 acres of the project site would be used for open space passive recreation uses. The State Lands Commission action is a land exchange with Bay City Partners, LLC within the project boundary.	NOD	
2011071049	EIR MDH 08-11; Rising Tree Wind Energy Project by Rising Tree Wind Farm LLC Kern County Mojave--Kern This proposed Project involves the development of a wind energy production facility on an approximately 1,600 acre site. Project activities would occur on a smaller area within the 1,600-acre site and would include clearing, grubbing, and grading for roads, a laydown area, wind turbine pads, a substation, meteorological towers, and underground and overhead transmission and collection lines. The Project will result in impacts to 163 acres of desert tortoise (<i>Gopherus agassizii</i>) and Mohave ground squirrel (<i>Spermophilus mohavensis</i>) habitat, and 7.64 acres of Bakersfield cactus (<i>Opuntia basilaris</i> var. <i>treleasei</i>) habitat including temporary impacts to 91 acres; the Project will permanently remove 72 acres of desert tortoise and Mohave ground squirrel habitat, and 7.64 acres of Bakersfield cactus habitat. The Project is expected to result in incidental take of desert tortoise and Mohave ground squirrel, which are designated as threatened species, and Bakersfield cactus, which is designated as an endangered species, under the California Endangered Species Act (CESA). The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation. Minor Amendment No. 2 adjusts portions of the construction envelope to allow avoidance of unanticipated archaeological resources. The extent of habitat disturbance and other effects to desert tortoise, Mohave ground squirrel, and Bakersfield cactus are unchanged by Minor Amendment No. 2.	NOD	
2011092032	SR-70/Feather River Blvd Interchange Yuba County --Yuba On June 11, 2013, the California Department of Fish and Wildlife (CDFW) issued ITP No. 2081-2012-050-02 to the Yuba County Public Works Department, authorizing take of giant garter snake (<i>Thamnophis gigas</i>) associated with and incidental to the Feather River Boulevard Interchange Project in Yuba County, California. The proposed interchange will consists of a compact diamond layout for south bound movements and an L-9 partial-clover leaf for north bound movements on	NOD

2013101097	EIR RGF 07-13; Redwood Cluster Solar Project by 61LK 8ME, LLC Kern County Bakersfield, Arvin, Lamont--Kern The Redwood Cluster Solar Project is a proposal to construct and operate six solar photovoltaic (PV) power generating facilities that would generate a combined 135 megawatts (MW) of electricity, on six sites. The facilities would operate year round and would generate electricity during daylight hours. Power generated from each site would be delivered from the site via a new generation tie line of up to 115kV, originating from an on-site substation and terminating at the Lamont Substation. Alternatively, power from the project sites would be delivered via new 34.5 kV overhead or underground lines to a new-offsite station near the Lamont Substation.	NOD	
2013111057	Amend the City of Encinitas Opportunistic Beach Fill Program Encinitas, City of Encinitas--San Diego Amend the City of Encinitas' (City) existing Opportunistic Beach Fill Program to include two new receiving beaches, Leucadia Beach and Cardiff Beach, to allow streamlined approval of projects proposing placement of beach compatible materials derived from opportunistic sources (e.g., upland construction projects, wetland restoration, dredging). Addition of these beaches will allow flexibility in placement locations to address areas of localized erosion and/or minimize haul or dredge distances from a given sediment source. The additional sites are: 1) Leucadia Beach between Range Street and Diana Street; and 2) Cardiff Beach in the vicinity of Restaurant Row. The State Lands Commission action is issuance of a 5-year General Lease - Public Agency Use to the City of Encinitas for deposition of up to a maximum of 117,000 cubic yards (cy) of sand annually at Batiquitos Beach, up to a maximum of 105,000 cy of sand annually at Moonlight State Beach, up to a maximum of 132,000 cy of sand annually at Leucadia State Beach, and up to a maximum of 101,000 cy of sand annually at Cardiff State Beach.	NOD	
2014032085	The Rivers Erosion Site Project West Sacramento Area Flood Control Agency West Sacramento--Yolo The Project consists of repairing an erosion site through the installation of a ScourStop TM channel, placing vegetated mechanically stabilized earth (VMSE), and constructing a longitudinal stone toe. Placement of the VMSE would restore the slope of the bank, as well as help retain soil placed as part of the project. The longitudinal stone toe would retard erosion from fluvial forces, boat wake, and discharged flows for the ScourStop channel. These repairs would address the	NOD

	existing erosion problems, enhance fish habitat values, and prevent future erosion from encroaching on the levee, the levee maintenance road, the adjacent recreation features. The State Lands Commission action is an approval of a 20-year General Lease - Public Agency Use through October 13, 2034, for use of lands in the Sacramento River for the longitudinal stone toe and other erosion repairs.		
2014052039	Mira Monte Marsh Restoration Project Sonoma Marin Area Rail Transit Commission Novato--Marin, Sonoma The Project site includes a total of 62.16 acres, including 2.59 acres of tidal channel. The site is currently developed with a marina, recreational vehicle/boat storage facility, and two residences. The Project proposes to remove all existing structures and re-establish 8.08 acres, rehabilitate 4.55 acres and preserve 42.19 acres of tidal marsh. The State Lands Commission action is an approval of a 10-year General Lease - Public Agency Use for maintenance of eight existing unattached pilings and a term of two year for the restoration and enhancement activities of the Mira Monte Marsh area.	NOD	
2014081042	East Campus Parking Structure 2 University of California, San Diego La Jolla--San Diego The East Campus Parking Structure 2 is located at UCSD's East Campus Medical Center in the East Campus Health Sciences (ECHS) neighborhood. The project involves construction of a 446,000 gross square-foot (GSF) parking structure and a thermal energy storage (TES) tank where a surface parking lot currently exists. The project would involve demolition of the existing parking lot, minimal grading of slopes and clearing of existing ornamental vegetation, and construction of a multi-level parking structure. The parking structure would include a minimum of 1,200 parking spaces to primarily serve patient and visitor needs, while also providing some staff parking. The parking structure would include two vehicle access points, two elevators and staircases, parking control booths and ADA-accessible spaces, one unisex ADA-accessible staff restroom, custodial closets, one administrative office, and a network hub room. The project would also include installation of a bicycle storage cage, vehicle charging stations, and sustainable landscaping.	NOD	
2014081084	Parkhill Fuel Reduction Project Forestry and Fire Protection, Department of --San Luis Obispo The project includes approximately 1,331 acres of roadside brush removal along 52 miles of designated truck trails, ranch roads, highways, and throughout selected fuel breaks and reduced fuel zones to reduce the wildfire threat. Accomplished by strategically removing dead and small diameter trees, shrubs, and brush. The project will utilize a variety of fuel treatment techniques and may include any or all of the following as specified: felling, removing, and disposing of dead and dying trees and snags, hand crew fuel treatment with chain saws, mechanical mastication (shredding), chipping, brush/slash pile mastication, lopping and scattering, pile burning, and road grading. 2013102017	San Joaquin County 2035 General Plan Update San Joaquin County --San Joaquin San Joaquin County, as the lead agency, has prepared the San Joaquin County 2035 General Plan (2035 General Plan which contains proposed policies, diagrams, text, and implementation measures that will guide land use decisions within the unincorporated areas of the County. The 2035 General Plan includes a comprehensive update of the policies of the County's current 2010 General Plan (adopted in 1992) While some of the existing policies of the adopted General Plan are carried forward, the 2035 General Plan includes a number of new policies that address changes in State law. The 2035 General Plan update also addresses new issues, such as climate change and energy efficiency and emerging County priorities, such as economic development and the provision of public infrastructure and services.	EIR	12/04/2014
2013121074	F.E. Weymouth Water Treatment Plant Improvement Program Metropolitan Water District of Southern California La Verne--Los Angeles The Proposed Project would upgrade existing and/or construct new facilities at Metropolitan's Weymouth Plant to accommodate the plant's maximum operating capacity and update the overall facility. The Proposed Project would involve rehabilitating and refurbishing aging treatment structures, upgrading systems to improve treatment processes, enhancing rehabilitating and refurbishing aging treatment structures, upgrading system to improve treatment processes, enhancing worker safety, reducing carbon emissions, improving stormwater management, and ensuring compliance with recent legislation pertaining to the State Drinking Water Act.	EIR	12/04/2014
2014101046	Children's Pool Walkway Replacement San Diego, City of La Jolla--San Diego The project consists of improvements to an existing public sidewalk located above a public beach (Children's Pool). The improvements include the demolition of existing parking lot paving, curb and gutter, sidewalk, and the removal of existing irrigation and plant materials, as well as the construction of asphalt paving, concrete curb and gutter, concrete sidewalk, rock walls, landscape boulders, fencing, parking stalls, landscaping, and irrigation. A Traffic Control Plan will be implemented during construction activities in accordance with all applicable provisions in the Municipal Code.	MND	11/19/2014
2014101047	Cool Valley Photovoltaic Solar Generating Project Valley Center Municipal Water District --San Diego The proposed Cool Valley Photovoltaic Solar Generating Project involves the installation of 416-516 solar panels on ground mounted fixed plane racks in rows covering a .5-.75 acre area of the Cool Valley Reservoir site. The construction area is located adjacent to the existing pump station building. It is relatively flat, graded and comprised of fill material. The solar panels would be connected to an existing meter box located along the north wall of the pump station building via conduit located in an underground trench. The project would off-set electricity costs associated with operating the Cool Valley Reservoir mixing and circulation pump and two new Rincon pumps that will be relocated to the Cool Valley Reservoir site. Surplus electricity would be metered back to San Diego Gas & Electric through an electrical distribution system interconnect.	MND	11/19/2014

	size to be 272.568). The applicant states in the application that the purpose of the lot line adjustment is to add 40 acres of open space to Lot 161 to be used for personal recreation and enjoyment. Parcel A is within the Yosemite West Maintenance District boundaries, which provides water, sewer, and road maintenance. Parcel B is not within the Yosemite West Maintenance District. The lot line adjustment will not change the district boundaries. In order for any portion of the added 40 acres to receive any services (water and sewer) from the district, the district boundaries would have to be amended. This is not being proposed as part of this project. Road maintenance fees will be required to be provided for the additional 40 acres. No development is being proposed or has been proposed with this project. Any future development will be reviewed to ensure compliance with the CEQA and applicable regulations.		
2014101049	Avalon Freight Services IS/Neg Dec Los Angeles, Port of --Los Angeles The project involves the shifting of freight operations from Berth 184 to Berth 95 and includes the construction of a 20,000 sf warehouse/office space with additional waterside improvements to allow for the new vessels needed for freight movement. The project site has been identified as being included on the Cortese List (Government Code Section 65962.5).	Neg	11/20/2014
2014102056	Kenneth McDonald - Minor Subdivision - MS1501 Del Norte County Crescent City--Del Norte The project involves an application to split a 5.19-acre parcel into two parcels of 3.19-acres in size (Parcel 1) and 2 acres in size (Parcel 2). Parcel 2 is currently developed with a single family residence. Proposed Parcel 1 is undeveloped. Both parcels are located on Pine Ridge Road, off of Ashford Road, in the community of Hiouchi. Each parcel would be served by an onsite private well and onsite sewage disposal system. Zoning in the project area is FR-2 (Forest Recreation - 2 acre minimum).	Neg	11/21/2014
2014102054	Lancaster Metrolink Station Closure Lancaster, City of Lancaster--Los Angeles Note: Review Per Lead Notice of Scoping meeting for the Lancaster Metrolink Station Closure Initial Study. The City of Lancaster is proposing to close the existing metrolink station and either establish a van/shuttle service to the Palmdale Station from Lancaster or require the public to drive to the Palmdale Station. 2008062022	Charles M. Schulz - Sonoma County Master Plan Implementation Project Sonoma County Windsor, Santa Rosa--Sonoma The Operator proposes to enhancement and restoration of 2,623 linear feet of Hessel Creek through riparian planting and stream enhancements. The California Department of Fish and Wildlife (CDFW) is executing a Lake and Streambed Alteration Agreement Number 1600-2014-0062-R3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Jon Stout, Charles M. Schulz - Sonoma County Airport.	NOD	
2011071049	EIR MDH 08-11; Rising Tree Wind Energy Project by Rising Tree Wind Farm LLC Kern County Mojave--Kern This Project involves the development of a wind energy production facility on an approximately 1,325 acre site. Project activities would occur on a smaller area within the 1,325-acre site and would include clearing, grubbing, and grading for roads, a laydown area, wind turbine pads, a substation, meteorological towers, and underground and overhead transmission and collection lines. The Project will result in impacts to 74.8 acres of desert tortoise (<i>Gopherus agassizii</i>) and Mohave ground squirrel (<i>Spermophilus mohavensis</i>) habitat, and 1.41 acres of Bakersfield cactus (<i>Opuntia basilaris</i> var. <i>treleasei</i>) habitat including temporary impacts to 44.7 acres; the Project will permanently remove 30.1 acres of desert tortoise and Mohave ground squirrel habitat, and 1.41 acres of Bakersfield cactus habitat. The Project is expected to result in incidental take of desert tortoise and Mohave ground squirrel, which are designated as threatened species, and Bakersfield cactus, which is designated as an endangered species, under the California Endangered Species Act (CESA). The ITP referenced above as issued by CDFW authorizes incidental take of species listed under CESA that may occur as a result of Project implementation.	NOD	
2012022074	Napa Countywide Bicycle Plan Update Napa County American Canyon, Calistoga, Napa, St. Helena--Napa The project is limited to: 1) installing and attaching a pre-fabricated approximately 5-foot long, 8-foot wide and 7-foot tall reinforced concrete box culvert to the south side of an existing stone box culvert. The reinforced box culvert will be attached to the existing stone culvert using grout. 2) Installing a pre-manufactured concrete block wall along the roadway directly above the culvert extension. 3) Placing angular stone rock over approximately 200 square feet of stream channel at the culvert outlet. The California Department of Fish and Wildlife is executing a Lake and Streambed Alteration Agreement Number 1600-2012-0155-3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Napa County Department of Public Works, as represented by Anthony Morales.	NOD	
2012082004	North Lane Stormwater Mitigation Project No. 4070 Orinda, City of Orinda--Contra Costa The project was proposed because of previous flooding that cascaded over Camino Pablo and into the East Bay Municipal Utility District (EBMUD) water treatment plant during storm event. Existing 48" culverts and ditches overflowed. The project involves (1)construction of a new upstream headwall; (2)construction	NOD

All on-site infrastructure will be removed and the property will be restored to create 8.08 acres of tidal marsh wetlands. The existing 4.55 acres of muted tidal marsh wetlands will be rehabilitated by creating a direct connection to San Antonio Creek. All other land will be preserved.</p>	NOD	
2014071080	<p>Middlewater Natural Gas Pipeline Project by Phillips 66 Pipeline LLC Fish & Wildlife #4 --Kern</p> <p>The proposed Project would allow the installation of a natural gas pipeline, which will transport natural gas to fuel existing equipment at the Middlewater Pump Station located in western Kern County, California. Construction activities would occur adjacent to an existing pipeline right-of-way (ROW) and existing dirt access road. The purpose of the proposed Project is to allow Phillips 66 (the Project proponent), to continue to operate its pipeline system, which transports crude oil from the oil fields in Kern County to its refinery in the San Francisco Bay Area. The proposed Project may potentially impact listed species and/or their habitat; therefore, a Section 2081 Incidental Take Permit (ITP) would be required prior to commencement of development activities.</p>	NOD	
2014072002	<p>North Coast System Rehabilitation Project - Phase 3 Coast Segment Santa Cruz, City of Santa Cruz--Santa Cruz</p> <p>The City of Santa Cruz Water Department proposes to replace approximately 18,500 linear feet of 16- to 22-inch diameter raw water main that runs along Highway 1 in Santa Cruz County. The proposed project is Phase 3 (Coast Segment) of the North Coast System Rehabilitation Project (NCS). The Phase 3 segment is 19,800 feet in total length. The overall project will: 1) install/replace 18,500 feet of new pipeline; 2) use/retain 1,300 feet of existing pipeline; and 3) remove 800 feet of old, above ground pipeline. The majority of the proposed pipeline would be built using standard open trench construction techniques. The remainder would be built using a trenchless construction method such as horizontal direction drilling and jack and bore. These methods would be used at proposed crossings of Highway 1, Lombardi Gulch, and the Santa Cruz Branch rail line.</p>	NOD

2014108380	Burt - Front Setback Placer County Auburn--Placer The project proposes to reduce the minimum setback to the base zoning setback of a 20-foot minimum rather than a 45-foot minimum to the centerline of Russell Loop. The project would allow for the construction of a 58-square-foot kitchen addition, sited 35 feet from the centerline of Russell Loop, but up to a minimum of 20 feet from the edge of the easement.	NOE	
2014108381	Penryn Philips 76 Image Refresh Placer County --Placer The project proposes to make exterior re-image of an existing Philips 76 gas station, to include new paint for the building, modifications to the fuel pumps fuel pump canopy fascia and new/replacement building and canopy fascia signs. The existing thick red trim will be replaced with the new orange and silver corporate branding elements. No proposed changes to landscaping, parking, circulation or building footprint.	NOE	
2014108382	76 Image Refresh - Highway 49 and Dry Creek Road Placer County Auburn--Placer The project proposes to make exterior re-image of an existing Philip 76 gas station, to include new paint for the building, modifications to the fuel pumps, fuel pump canopy fascia and new/replacement building and canopy fascia signs. The existing thick red trim will be replaced with the new orange and silver corporate branding elements. No proposed changes to landscaping, parking, circulation or building footprint.	NOE	
2014108383	Stefani Canal Setbacks Placer County Auburn--Placer The project is a request to reduce the minimum setback from 100 feet to 50 feet from the centerline of a PCWA's Boardman Canal. The project would allow for the construction of a 2,990-square-foot residence proposed at 90 feet from the centerline of Boardman Canal, but up to a minimum of 50 feet from te canal, PCWA appraisal is required.	NOE	
2014108384	Eel River Bridge Overhead Strengthening Project Caltrans #3 Fortuna--Humboldt The California Department of Transportation (Caltrans) proposes to strengthen the Eel River Bridge to allow safe and efficient movement of oversize/overweight vehicles and loads on State Route 101 in Humboldt County; which will restore the permit load ratings through the region and avoid lengthy detours for permit loads.	NOE	
2014108385	State Route 58 Highway Resurfacing Caltrans #6 --Kern Resurface State Route 58 with 0.10' Rubberized Hot Mix Asphalt (Gap Graded) on the existing AC pavement and a 1' wide shoulder backing by placing imported dirt/gravel mix, beginning at West Boron Road (PM R136.0) and ending at the Kern County line (PM R143.8), in Kern County. No new right-of-way is required.	NOE

2014071044	Flair Spectrum El Monte Specific Plan El Monte, City of El Monte--Los Angeles The proposed mixed-use development consists of 640,000 gsf of retail and 50,000 sf of restaurant for an outlet mall, a 250-room hotel, and 600 residential units of the 14.66 acre project site. The project also includes the option for up to 20 percent of the proposed retail square footage to be developed as office use. Parking would be provided in subterranean and above-grade parking structures. The project includes the proposed retail, restaurant, hotel, residential, parking, and all facilities proposed within the project site, on- and off-site supporting improvements, and associated discretionary actions. The project would be developed in 2 phases (Phase 1: retail, restaurant, hotel, most parking; Phase 2: residential and remaining parking).	EIR	12/08/2014				
2014101051	Oak Hills and Bandicoot Basin Project San Bernardino Flood Control District Hesperia--San Bernardino The purpose of the proposed project is to attenuate flow to reduce the potential for downstream flooding in both large and small storm events as part of the Master Plan Drainage System. Implementation of the proposed project will provide flood protection for the existing structures, residences, and businesses within the project area. The Bandicoot basin is designed to accommodate a storage capacity of 526 acre-feet at spillway depth. In order to meet the County of San Bernardino Flood Control District Drainage Master Plan ultimate condition outflow from Bandicoot Basin of 1,460 cfs with planned improvements up-and downstream of the basin, the proposed Oak Hills Basin will be constructed upstream. The basins will range in size from approximately 50 to 60 acres in size and will be connected via an existing improved drainage channel.	MND	11/24/2014

2014101053	<p>Belridge II, Tract Map, Conditional Use Permit and Lot Line Adjustment/SUB2013-00042, SUB2014-00017 San Luis Obispo County --San Luis Obispo</p> <p>Request by Belridge Park II, LLC for a Lot Line Adjustment and Tract Map and Conditional Use Permit. The Lot Line Adjustment will adjust the lot lines between two legal parcels of 43,271 and 40,799 sf each. The adjustment will result in two parcels of 9,822 sf and 1.7 acres each. The Lot Line Adjustment portion of the project will not result in the creation of any additional parcels. The reason for the adjustment is to provide a parcel for the existing residence that can be sold while the remainder of the site continues through tract improvements and final map portion of the subdivision process.</p> <p>The Tract Map/Conditional Use Permit portion of the proposal is to subdivide two existing parcels totaling 1.92 acres into 14 parcels ranging in size from 3,548 to 12,509 sf as a planned development.</p>	MND	11/24/2014
2014102058	<p>Childs Meadows Head Cut Stabilization and Repair Project Tehama County Mineral--Tehama</p> <p>This head cut control structure is designed to provide a maximum assurance that the head cut will be arrested in place while providing an esthetically pleasing, biotechnical component that is consistent with existing conditions in the Childs Meadow area.</p>	MND	11/24/2014
2014102060	<p>Tehama Community Corrections Reentry and Day Reporting Center Project Tehama County Red Bluff--Tehama</p> <p>To establish a 34,460 sf Multi-Purpose Corrections Reentry and Day Reporting Center Facility that will accommodate a variety of functional uses on a 53,800 sf (1.235 acres) parcel in a Public Agency Zoning District. The project is located in central Tehama County in the City of Red Bluff. The project generally abuts Madison Street to the east, Pine Street to the north, Oak Street to the south, and the UPRR tracks to the west.</p>	MND	11/24/2014
2014102062	<p>Planned Development Permit No. PL12-0163 Ventura County --Ventura</p> <p>The applicant requests that a Planned Development Permit be granted to authorize the construction; use and maintenance of a 24-unit multi-family affordable housing development on the subject parcel.</p>	MND	11/24/2014
2014102065	<p>Recycled Water Project Hayward, City of Hayward--Alameda</p> <p>The City proposes to construct and operate a recycled water project located within the City of Hayward. The RWF would deliver an estimated 290 acre-feet per year of recycled water to 24 customers within the City of Hayward. The RWF will be served by approximately 1.5 miles of new distribution lines (ranging in diameter from 6 to 8 inches) to the north and south of the WPCF, rehabilitation and connection to an existing and abandoned Shell Oil Pipeline, and over 3 miles of laterals to customers including installation of customer connections.</p>	MND	11/25/2014

1999081121	Inland Rail Trail Bikeway San Diego Association of Governments -- SANDAG has prepared an Addendum to the Final Subsequent Mitigated Negative Declaration (MND) for the Inland Rail Trail Bikeway to address changes to the bikeway since initial approval of the bikeway and adoption of the Final Subsequent MND on July 26, 2013. The changes include temporary use of vacant portions of four private properties for access and equipment staging during construction, permanent acquisition of private properties for access and equipment staging and vehicular safety, and allowing for limited night-time construction of the Buena Creek Bridge to avoid adverse effects to Buena Creek by allowing construction techniques that would conflict with SPRINTER light-rail service if performed during the day. SANDAG has determined that the project changes do not create any of the conditions in CEQA Guidelines 15162 requiring preparation of a Subsequent EIR and therefore has adopted an Addendum pursuant to 15164.	NOD	
2007072036	San Francisco Bay and Delta Sand Mining Project California State Lands Commission San Francisco, Pittsburg, Oakland--Contra Costa, Sacramento, Solano This proposed project involves commercial hydraulic sand mining operations for the next 10 years in central San Francisco Bay, the Middle Ground Island Shoal, and Suisun Channel of Suisun Bay. This operation provides local marine aggregate for use in highway maintenance and construction, new residential complexes, and commercial and public buildings within the greater San Francisco Bay Area. Project activities include hydraulic sand mining and san offloading. CDFW issued the existing CESA ITP in order to address and authorize, as fully mitigated, the incidental take and related impacts to Central Valley spring-run Chinook salmon (<i>Oncorhynchus tshawytscha</i>), Sacramento River winter-run Chinook salmon (<i>O. tshawytscha</i>), Delta smelt (<i>Hypomesus transpacificus</i>), and a longfin smelt (<i>Spirinchus thaleichthys</i>) and their habitat. Major Amendment No. 1, as approved, modifies the previously issued CESA ITP, by allowing sand mining upstream of the X2 location in the Middle Ground Shoal and Suisun Bay lease areas from December 1 through June 30. Major Amendment No. 1 restricts the volumes of sand and depth of sand that can be mined upstream of the X2 location during that time period and requires the purchase of additional Covered Species credits. In approving Major Amendment No. 1, CDFW determined, among other things, that with the sand volume restrictions, depth restrictions, and additional credit purchase, there would be no substantial increase in the nature or scope of the previous authorization provided by the CESA ITP, and that no new significant or substantially more severe environmental impacts that previously considered and disclosed would occur.	NOD	
2007072036	San Francisco Bay and Delta Sand Mining Project California State Lands Commission San Francisco, Pittsburg, Oakland--Contra Costa, Marin, Sacramento, Solano, San Francisco This proposed project involves commercial hydraulic sand mining operations for the next 10 years in central San Francisco Bay, the Middle Ground Island Shoal, and Suisun Channel of Suisun Bay. This operation provides local marine aggregate for use in highway maintenance and construction, new residential complexes, and commercial and public buildings within the greater San Francisco Bay Area. Project activities include hydraulic sand mining and san offloading.	NOD

2010041060	<p>South Bay Bus Rapid Transit San Diego Association of Governments Chula Vista, National City, San Diego--San Diego SANDAG has adopted an Addendum to the Final Environmental Impact Report (EIR) for the South Bay Bus Rapid Transit Project to address changes since initial approval of the project and certification of the Final EIR on July 26, 2013. The project changes include modifying a traffic signal to change the outbound access from a shopping center's mid-block driveway to right-turn out only, acquiring property in order to relocate a fiber optic facility, and making other related physical improvements. The proposed changes are located along East Palomar Street between Medical Center Drive/Brandywine Avenue and Davies Drive in the City of Chula Vista. SANDAG has determined that the project changes do not create any of the conditions in CEQA Guidelines 15162 requiring preparation of a Subsequent EIR and therefore has adopted an Addendum pursuant to 15164.</p>	NOD	
2012121083	<p>Visalia Technical Education Center (VTEC) Expansion Visalia Unified School District Visalia--Tulare The project consists of approval by the Department of Toxic Substances Control (DTSC) of a Removal Action Workplan (RAW) submitted by Padre Associates, Inc. dated June 14, 2014 on behalf of the Visalia Unified School District (VUSD). DTSC's approval action is being undertaken pursuant to regulatory authority granted under Chapter 6.8, Division 20 of the Health and Safety Code. The purpose of the RAW is to remediate potential risk to human health and the environment by reducing or eliminating future exposure to soils impacted by elevated concentrations of organochlorine pesticides (OCPs), the metals arsenic and lead, and petroleum hydrocarbons identified as motor oil (THPmo) in an area proposed for expansion (Project Site) on the Visalia Technical Education Center (VTEC) campus. Activities to be conducted pursuant to the approved RAW include the following:</p> <ol style="list-style-type: none"> 1. Excavate approximately 450 CY (in-situ) of impacted soil from the identified areas. 2. From the excavation, segregate soil stockpile(s) by chemicals of concern (COCs) at quantities no greater than 250 CY per pile, for waste characterization purposes. 	NOD

2014092033	<p>Eureka Waterfront Trail Project Phase A Eureka, City of Eureka--Humboldt</p> <p>The City is proposing to construction an approximately 1.2-mile long segment of Class 1 multi-use trail from Del Norte Street south to Truesdale Street. The project, also known as "Phase A," would be an extension of a trail ("Phase B") that is proposed to follow the Humboldt Bay coastline along the Eureka waterfront. (A Mitigated Negative Declaration was adopted for Phase B in July 2012, State Clearinghouse Number 2012052053). The project purpose is to further enhance non-motorized and pedestrian connectivity, and increase public access to and along Eureka's waterfront on Humboldt Bay. The project is intended to encourage nature study, appreciation of the environment and historic uses of the area, increase opportunities for active living to improve public health, increase the safety of non-motorized transportation, improve public safety, and recover native vegetation community values where possible. In addition, the project seeks to reclaim an area that is frequented by transients and the local homeless population and in which significant accumulations of trash and other waste have occurred. The proposed alignment is an important piece in the statewide initiative to complete the California Coastal Trail. The proposed Eureka Coastal Trail system (which includes Phase A) and associated coastal access improvements are key elements in the City's General Plan and Eureka City Council's Strategic Plan 2013-2018.</p>	NOD

2014101054	ENV-2014-328-MND / 17335 W. Tramonto Drive Los Angeles, City of --Los Angeles A Coastal Development Permit for the construction of a new two-story, 6,487 sf single family residence in a Hillside Area. This site is within an Equine keeping area, Baseline Hillside Ordinance area, the Coastal Zone, a Very High Fire Hazard Severity Zone, a Special Grading Area, the Santa Monica Fault Zone, and a Landslide Area.	MND	11/25/2014
2014101055	ENV-2014-2153-MND / 729 N. Hudson Avenue Los Angeles, City of --Los Angeles The proposed project is on a site that is approximately 27,200 sf, spanning four lots, and includes the construction of a five-story, 56-feet tall, 46-unit multifamily dwelling that includes four units four very low income households, and 72 parking spaces in a one-level at grade parking garage. The total project size is approximately 59,906 sf of floor area in the Hollywood Community Plan Area. The project is zoned R3-1 with a General Plan Designation of Medium Residential. The project includes the demolition of the four existing residential structures on the site, including two single family dwellings and two multifamily dwellings, which consist of 13 units (approximate 1,882 sf of floor area). In consideration of providing four affordable units, the applicant seeks the following on-menu incentives: an 11-foot height increase (56-feet tall as opposed to 45-feet tall) and a 20% reduction in the required open space requirement (4,560 sf as opposed to 5,700 sf). There are 25 trees existing on the project site. All shall be removed.	MND	11/25/2014
2014101056	Moss Landing Utility Undergrounding - Utility Rules 20A and 20B Monterey County --Monterey Coastal Development Permit for development with a positive archaeological report to allow the installation of underground electrical utilities, cable, phone, and associated infrastructure throughout the community of Moss Landing. The project will ultimately implement Moss Landing Underground Utility Rule 20A and 20B. Equipment will be installed, owned, and operated by PG&E Company and AT&T. Most of the area required for installation is in the public right-of-way; however, several locations are on privately owned parcels in the Moss Landing Community Plan of the North County Coastal Zone.	MND	11/25/2014
2014101057	Swift Minor Use Permit / Coastal Development Permit DRC2012-00117 San Luis Obispo County --San Luis Obispo Minor use permit to: a) construct a new 2,340 sf single family residence with a 280 sf attached garage; b) grading to widen and extend an existing 1,700 foot long access road; c) installation of two 8 gallon water tanks and associated utilities; and d) conversion of an existing single family residence to farm support quarters. 2014102066	Fair Way Extension Path Project Calistoga, City of Calistoga--Napa The project involves construction of a .6 mile Class I path, to be used by bicyclists and pedestrians, connecting Lincoln Avenue in the central business district of the City of Calistoga, with the existing Class I path that extends approximately 600 feet from the southern terminus of Washington Street south to Dunaweal Lane.	MND	11/25/2014
2014102067	Cordelia Hills-Sky Valley Improvement Project Solano County --Solano The project includes the purchase of three parcels comprising approximately 264 acres, the maintenance of existing roads on the parcels, the construction of new dirt trails, parking areas, and public access points, and the transfer of ownership of the parcels to the Solano Land Trust. The parcels will be adjacent to the Solano Land Trust's existing Lynch Canyon Open Space. The parcels will be managed as part of the Lynch Canyon Open Space.	MND	11/25/2014
2014102068	Randall Musgraves Tentative Parcel Map (TPM-13-03) Siskiyou County --Siskiyou The proposed project is located along Jackson Ranch Road and Dwinell Road within a residential area served by the Lake Shastina Community Services District. The proposed project consists of a tentative parcel map to create four 1.3-acre parcels and a 22.4-acre remainder. A cul-de-sac, approximately 350 feet in length, off of Dwinell Way, is proposed for access to the four 1.3-acre parcels and may be utilized to access the remainder.	MND	11/25/2014
2014102069	Northpointe Specific Plan Ripon, City of Ripon--San Joaquin Adoption of Specific Plan to provide more precise vision for 310-acre residential and commercial development in existing incorporated area, including core commercial area, residential neighborhoods, transitional areas, improved circulation, including pedestrian and bicycle ways, open space.	NOP	11/25/2014
2014072052	Draft Butte County Special Events Ordinance Butte County --Butte Note: Reference SCH# 2012022059 The Draft Special Events Ordinance is a County initiated amendment to the Butte County Zoning Ordinance that would be located under Part 4, Supplemental Use Regulations, as new Section 24-175.2 of the Zoning Ordinance. It is applicable to the unincorporated area of the County of Butte. The Draft Special Events Ordinance sets forth a permit process and various standards and requirements for special event facilities. A special event is defined as a celebration, ceremony, wedding, reception, corporate function, or similar activity. A special event facility is a facility where special events are permitted to occur subject to a use agreement between a private group or individual and the facility owner, and subject to a minor use permit approved in compliance with the Special Events Facilities Ordinance. 1997122002	Addendum to the Lent Ranch Marketplace Final EIR Elk Grove, City of Elk Grove--Sacramento Periodic Review of the 2001 Development Agreement for the Lent Ranch Marketplace and Finding of Default for Elk Grove Town Center, L.P. under the 2001 Development Agreement; Approval of an Amendment to the Lent Ranch Special Planning Area; approval of a District Development Plan & Review (amendment to the District Development Plan) for the Regional Mall and Conditional Use Permit for the Outlet Collection at Elk Grove; approval of a new Development Agreement with Elk Grove Town Center, L.P.; approval of an Amended and Restated Agreement Regarding the Regional Mall, Fees, and Infrastructure with Elk Grove Town Center, L.P. and related License Agreement.	NOD	
1999102083	Branciforte Creek Federal Flood Control Channel Maintenance Santa Cruz, City of Santa Cruz--Santa Cruz The project sites are for routine maintenance activities located on multiple stream channels, drainages and waterways within the city limits of the City of Santa Cruz. 'Maintenance' refers to generally limited tasks that occur repeatedly over time and are necessary to maintain and preserve facilities and amenities in good condition. Maintenance activities include , but are not necessarily limited to the following: repairs, replacement, and cleaning of existing facilities and infrastructure (such as roads, trails and culverts); installation of minor new structures or infrastructure undertaken to improve an existing road, trail or facility activities such as minor grading, sediment removal or vegetation control to correct conditions that threaten or degrade natural environments (such as non-native plant species control, removal of trash from channels or drainage and erosion repairs, and habitat enhancement). Portions of this project were analyzed previously in the Negative Declaration and Supplemental Negative Declaration. The California Department of Fish and Wildlife is executing a Lake and Streambed Alteration Agreement Number 1600-2013-0176 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Mark Dettle/City of Santa Cruz Department of Public Works.	NOD	
2004091159	Tijuana River Valley Regional Park Trails and Habitat Enhancement Project San Diego County San Diego--San Diego CDFW is intending to execute a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code (#1600-2014-0145-R5) to the project applicant, County of San Diego Department of Parks and Recreation. The project proposes to formally designate approximately 15 miles of existing informal trails; construct approximately 5,000 linear feet of new trail; widen, narrow, and resurface existing trails in specific areas; repair erosion; install 12 culverts to allow runoff to flow under the trail; trim vegetation overhanging the trail in select areas; and install trail markers, signage, and lodge pole fencing; as well as maintain the formal trail system including repair, rehabilitation, or replacement of permitted culverts and removal of accumulated sediments and debris in the vicinity of existing trail-related structures, including intake and outfall structures. The project also includes the decommissioning of 18.9 miles of informal trails, including active and passive restoration, and restoration of 2.5 acres of riparian habitat in a currently ruderal area near the Butterfly Garden. 2005061157	Rosedale-Rio Bravo Water Storage District (RRBWSD) Water Banking and Exchange Program Castaic Lake Water Agency San Joaquin, Bakersfield-- The Project is enhanced extraction facilities in RRBWSD's Groundwater Storage, Banking, Exchange, Extraction & Conjunctive Use Program (Program). CLWA proposes to jointly develop new wells and transmission facilities to take delivery of its total SWP Table A Amount allocation and any other imported water supplies stored in the Program. CLWA delivers water to RRBWSD that is not needed to meet its demands (typically in wetter years), up to 20,000 acre-feet per year (AFY) in the Program. RRBWSD stores a portion of CLWA's unused deliveries for later withdrawal and delivery to the CLWA service area in a future year or years when demand in the CLWA service area is greater than supply (i.e., in dryer years).	NOD	
2006112031	DeNova Homes Subdivision Gilroy, City of Gilroy--Santa Clara The California Department of Fish and Wildlife (CDFW) has executed Lake and Streambed Alteration Agreement number 1600-2014-0289-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Meritage Homes. Construction of two site drainage culverts and two spillways (four separate structures in total) as part of the site drainage improvements for a new subdivision.	NOD	
2007102107	Patterson Ranch Planned District Fremont, City of Fremont--Alameda The Project is part of a residential development on approximately 111 acres of the 428-acre Patterson Ranch Property and is limited to construction of two permanent bridges, one temporary bridge, one storm water outfall, modifications to an existing wing wall and removal of one existing railcar bridge. The California Department of Fish and Wildlife (CDFW) is executing a Lake and Streambed Alteration Agreement Number 1600-2014-0203-3 pursuant to Section 1602 of the Fish and Game Code to the Project Applicant, Ray Panek/KB Homes-Bay Area.	NOD	
2009011040	San Diego State University's Plaza Linda Verde Project California State University Trustees San Diego--San Diego The Final Environmental Impact Report (EIR) for the San Diego State University Plaza Linda Verde Project was certified as adequate by the Board of Trustees of the California State University (CSU) on May 9-10, 2011. Concurrent with certification of the Final EIR, CSU approved the Plaza Linda Verde Project. The Project is a mixed-use development - located on an approximately 18-acre site - featuring ground floor retail and upper-floor student housing, parking facilities, and a campus green and pedestrian malls that link the Project site to the main SDSU campus. Subsequent to this action, the project is planned to be revised to include certain improvements, referred to as the Complete Streets Scenario. These improvements will revise the project described in the 2011 EIR in limited respects to provide two travel lanes in each direction on College Avenue (instead of the planned three lanes in each direction); bike lanes in the northbound and southbound direction, with intervening buffers adjacent to segments of the bike lanes; and a 13-foot-wide sidewalk on the west side of College Avenue. The revised road configuration	NOD

	<p>would be accomplished by replacing the existing median with a landscaped median; replacing the existing street curb on the west side with new curbing to facilitate a 13-foot-wide sidewalk; and re-stripping College Avenue to provide the identified bike and vehicle travel lanes.</p> <p>In accordance with CEQA, an Addendum to the Plaza Linda Verde Final EIR dated September 2014 was prepared to provide an analysis of the potential environmental effects associated with the Complete Streets Scenario as compared to the analysis contained in the certified Final EIR. The analysis presented in the Addendum concludes that the Complete Streets Scenario would not result in new significant environmental effects or a substantial increase in the severity of previously identified significant effect. Therefore, the proposed Complete Streets Scenario does not trigger the need for further environmental analysis in a subsequent or supplemental EIR under the requirements of CEQA and the State CEQA Guidelines, and preparation of an Addendum is the appropriate CEQA document (Cal. Code Regs., tit. 14, 15000 et seq.). The Board of Trustees of the California State University, through the Office of the Chancellor, considered the Addendum with Final EIR prior to its action approving the proposed project revisions.</p>		
2012082004	<p>North Lane Stormwater Mitigation Project No. 4070 Orinda, City of Orinda--Contra Costa</p> <p>The California Department of Fish and Wildlife (CDFW) has executed Lake and Streambed Alteration Agreement number 1600-2012-0168-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, City of Orinda as represented by Larence Theis. The Project is limited to the construction of a flood flow bypass culvert consisting of a new upstream headwall, 60 inch - 1,300 foot long underground culvert and a new headwall at the outlet of San Pablo Creek. The existing channel will remain in place. The new culvert will be pre-cast concrete installed by open trenching on the upper 900 foot segment and jack and bore on the lower 310 foot segment. The trench will be cut in the roadway of North Lane and will be a minimum of 8 feet wide and 5.3 feet deep. Following installation the trench will be backfilled and paved. An outfall structure will be paved at the mouth of San Pablo Creek using a reinforced concrete apron, cutoff wall and straight wingwalls. A 20 x 21 foot area of rock slope protection will be placed around the outfall.</p>	NOD	
2012112019	<p>Dougherty Road Improvements Dublin, City of San Ramon--Alameda</p> <p>The California Department of Fish and Wildlife (CDFW) has executed Lake and Streambed Alteration Agreement number 1600-2014-0267-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Ferd Del Rosario/City of Dublin.</p> <p>This proposed project involves the expansion of 1.9 miles of Dougherty Road to a six-lane arterial and the addition of on-street bicycle lanes. The purpose of these improvements is to address traffic congestion and multi-modal circulation issues for commuters traveling Dougherty Road. Improvements will include adding Class II bicycle lanes in both directions of travel and reconstructing or resurfacing the existing 8-ft wide bicycle and pedestrian path on the east side of the roadway. The Project will also widen the roadway from a four-lane roadway to a six-lane divided</p>	NOD

	roadway with a raised landscaped median.		
2013011010	Guadalupe Court Multifamily Housing Project Guadalupe, City of Guadalupe--Santa Barbara The Guadalupe Court Multi-Family Housing Project (proposed project) located at 4202 11th Street involves the construction of a 38-unit multi-family affordable residential development, including 37 affordable multi-family units and one manager's unit. The project would include a mix of one, two and three bedroom units, a community center and common open space.	NOD	
2013052006	Franklin Canyon/Fernandez Ranch Project Hercules, City of Hercules--Contra Costa The California Department of Fish and Wildlife (CDFW) has executed Lake and Streambed Alteration Agreement number 1600-2014-0194-R3, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Muir Heritage Land Trust. The Project is limited to the construction of eight pedestrian, clear-span, stream crossings associated with the installation of 3.25 miles of 4 foot wide, multi-use dirt trails connecting the Fernandez Ranch Open Space to the Franklin Ranch. All bridges/boardwalks will be four feet wide with abutments above top of bank for a clear-span at each crossing. The bridges will consist of 8x8 pressure treated beams placed on 8 inch deep by 16 inch wide bases of gravel and secured in place using 5-foot pieces of rebar as necessary. Each crossing will require excavation of a 1.5 foot wide, 4 foot long area for the abutments. When the distance to the bottom of the channel is greater than 30 inches wooden railing will be installed. All staging and personnel will enter and exit the Project area at the staging location off Christie Road in the Fernandez Ranch.	NOD	
2013061027	Santa Ana Harbor Boulevard Mixed Use Transit Corridor Plan Santa Ana, City of Santa Ana--Orange The Harbor Boulevard Mixed Use Transit Corridor Plan would replace the existing 425-acre North Harbor Specific Plan (NHSP) to change the boundaries into two areas: 1) Harbor Corridor Plan (HCP): 305-ac within the existing NHSP generally along the Harbor Blvd, and 2) Conventional Zoning Area (CZA): 120-ac within the NHSP in the Willowick Golf Course area. The HCP regulates 252-ac through four districts: Transit Node, Corridor, Neighborhood Transitional, and Open Space. Buildout of the HCP could generate 3,884 additional dwelling units and 13,721 additional sf commercial space. No change in units or population are proposed in the CZA.	NOD	
2014022024	North Rodeo Gulch 4.75 Stream Bank Stabilization Santa Cruz County --Santa Cruz The project is limited to construction of a steel soldier pile wall with timber lagging approximately 75 feet in length; toe slope protection between the creek channel and the base of the retaining wall (i.e. rock slope protection); and reconstruction of the roadway, roadway shoulder and metal guard rail. The construction area is approximately 130 feet long by 50 feet wide. Two construction staging areas will be located along Rodeo Gulch Road. A temporary access road will be installed in the northwest corner of the construction area. The construction access road will be	NOD

	<p>removed upon project completion and measures will be taken to stabilize bare soil. All loose sediment will be removed from the active channel upon project completion and all bare areas will be seeded or planted and covered in mulch, blanket or straw. Temporary dewatering of a 130-linear-foot section of stream channel may occur. Implementation of erosion control and revegetation plans will provide short-term stability for areas disturbed during construction activities and long-term slope stability for the roadway embankment below the new retaining wall. The project will have no net fill within the limits of the ordinary high water mark. Debris from the failed roadway and embankment will be removed from the stream channel. Approximately 100 cubic yards of rock will be installed at the toe of the embankment beneath the streambed. The California Department of Fish and Wildlife is executing a Lake and Streambed Alteration Agreement Number 1600-2014-0230-R3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Matthew Johnson, Santa Cruz County Department of Public Works.</p>		
2014082036	<p>Pescadero Lagoon Interim Management Project Fish & Wildlife #3 --San Mateo</p>	NOD	
	<p>The National Oceanic and Atmospheric Administration (NOAA) Restoration Center proposes to manually breach the Pescadero Lagoon sandbar up to three times per year for approximately three years and potentially up to five years. The project is designed to reduce Delta-Butano Marsh inundation prior to a natural breach event to avoid decreased water quality within Pescadero Lagoon and reduce the likelihood of a fish kill upon opening of the lagoon. Project work will consist of excavating a shallow channel across the sandbar at the mouth of Pescadero Creek. The excavated channel will be approximately 300 feet long, 4 feet wide, and 3 to 4 feet below the lagoon water surface elevation. The channel will extend from the edge of the lagoon to the ocean. Excavated sand (approximately 200-800 cubic yards) will be deposited on the beach. Since the location and timing of sandbar formation varies year-to-year, specific excavation locations, sizes and volumes may vary, and will be determined following a site-specific evaluation of conditions (size and volume of the lagoon, water quality levels in the lagoon, marsh inundation, and inflow and tidal regimes) prior to implementation. Historically, the sandbar has formed anywhere from 200 feet west to 100 feet east of the Highway 1 Bridge, and breaching activities will occur within this area.</p>		
2014091025	<p>635 South Citrus Avenue Project Covina, City of Covina--Los Angeles</p>	NOD	
	<p>On October 21, 2014, the City Council of the City of Covina adopted a Mitigated Negative Declaration and a Mitigation Monitoring Program for the 635 South Citrus Avenue Project. The Project entails the conversion of an existing car rental facility (Enterprise Rent-A-Car) to a car dealership. This conversion would involve modifications to the project site and to the existing commercial building on the site. The existing building footprint would be expanded by approximately 8,777 square feet and the building height would be raised by approximately 6 feet. The Project would be developed over two phases; Phase 1 would involve construction and operation of temporary dealership facilities and Phase 2 would involve construction and operation of the permanent dealership facilities. During construction, four temporary trailers would be placed at the southeast end of the existing surface parking lot. The existing surface parking lot would be replaved and the existing landscaping would generally remain in place.</p>

2014108405	<p>PW 1118 - Storm Drain Outlet Restoration Fish & Wildlife #3 Petaluma--Sonoma</p> <p>Project is limited to the replacement of a culvert storm drain outlet into the Petaluma River. The pipe currently outlets into the river in the stream bank at an elevation that is frequently inundated by the tide. To isolate the area from the tide a temporary sheet pile coffer dam will be installed around the area and the interior space dewatered. The existing culvert will then be excavated and replaced with a 60-inch corrugated metal pipe. The outlet and wing walls will then be armored with approximately 36-cubic yards of 1/4- ton rock slop protection. Issuance of a Streambed Alteration Agreement No. 1600-2014-0246-3 is pursuant to Fish and Game Code Section 1602.</p>	NOE	
2014108406	<p>PW 1277 - Petaluma Boulevard North Bridge Fish & Wildlife #3 Petaluma--Sonoma</p> <p>Project is limited to the repair of the stream banks underneath the Petaluma Blvd North Bridge over the Petaluma River. The project will remove sediment deposits below the bridge on both sides of the stream and then cement grout will be pumped under each abutment and wingwall of the bridge to fill the scour undercuts. The area will then be dewatered using a coffer dam upstream of the project site to allow excavation of a toe trench for the placement of riprap. Approximately 244 cubic yards of 1/4 -ton riprap will be placed along an area approximately 40-foot long from the toe of the stream bank to under the bridge abutments along the southern stream bank. Approximately 371 cubic yards of 1/4 ton riprap will be placed along an area approximately 35-foot long from the toe of the stream bank to the area under the bridge abutments along the northern stream bank. Staging will occur in an upland area outside the riparian corridor. Issuance of a Streambed Alteration Agreement No. 1600-2014-0247-3 is pursuant to Fish and Game Code Section 1602.</p>	NOE	
2014108407	<p>PW 2420 - Storm Drain Outlet and Trail Maintenance Fish & Wildlife #3 Petaluma--Sonoma</p> <p>Project is limited to the repair of the stream bank and storm drain culvert outlets on Washington creek in the vicinity of a pedestrian bridge over the stream. The east bank of the stream will be stabilized with 8.9 cubic yards of 1/4 to 1/2-ton riprap along a 20-foot long section of steam bank just downstream of the bridge. Locally harvested vegetation, mostly willows, will be sprigged in between the rock joints. The upper bank at this location will be vegetated with locally collected vegetation. Upstream of the bridge, the area under the east bank culvert outlet will be armored with 13.3 cubic yards of 1/4-ton minus riprap and planted with local vegetation in a 30-foot, 6-foot wide area. The west bank culvert outlet will be armored with 13.2 cubic yards of 1/4-ton minus riprap and revegetated with locally collected vegetation in a 30-foot long, 6-foot wide area. Issuance of a Streambed Alteration Agreement No. 1600-2014-0248-3 is pursuant to Fish and Game Code Section 1602.</p>	NOE

	within a trench followed by the placement of 705 cubic yards of 1/4-riprap from the footing to the top of bank. Prior to excavation of the footing trench, sheet piles will be installed to create a cofferdam that will be dewatered. Issuance of a Streambed Alteration Agreement No. 1600-2014-0249-3 is pursuant to Fish and Game Code Section 1602.		
2014108409	Reclamation District 2060 Annual Routine Levee Maintenance Fish & Wildlife #3 --Solano Reclamation District 2060 Annual Routine Levee Maintenance Project Issuance of a Streambed Alteration Agreement No. 1600-2014-0291-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2014108410	Hellman Bridge Project Fish & Wildlife #3 Petaluma--Sonoma As part of the construction of a new driveway, the Permittee will install a new bridge over an unnamed tributary to Ellis Creek. The new bridge will be 55-foot long by 14-foot wide steel and concrete structure with concrete abutments located outside the top of the bank and above the 100-year flood elevation. Bridge piers will be 2-foot diameter cast-in-drilled-hole concrete piers with concrete abutments extending approximately 6-foot on either side of the bridge to retain road fill. No trees will be removed as part of the project and staging will be located at least 50-foot from the top of the bank. Issuance of a Streambed Alteration Agreement No. 1600-2014-0342-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2014108411	TUL-99 Packwood Scour Mitigation; Streambed Alteration Agreement NO. 1600-2014-0037-R4 Fish & Wildlife #4 --Tulare CDFW is executing a Lake or Streambed Alteration Agreement, pursuant to Section 1602 of the Fish and Game Code to the Project applicant, Caltrans. Authorized activity includes replacing missing sacked concrete previously installed for erosion protection with galvanized steel wire gabion baskets filled with clean rock.	NOE	
2014108412	Sediment Removal from the Mouth of Wildwood Creek (Lake or Streambed Alteration Agreement No. 1600-2014-0087-R2) Fish & Wildlife #2 --Nevada CDFW has executed Lake and Streambed Alteration Agreement No. 1600-2014-0087-R2, pursuant to Section 1602 of the Fish and Game Code to Lake Wildwood Association. Accumulated soil and road base gravel that entered Wildwood Creek as a result of an upstream failure of a culvert system and associated road will be removed from the confluence of Wildwood Creek with Lake Wildwood by means of a floating suction dredge system. The dredged materials will be placed in an adjacent upland area where they will dewater by natural percolation. The solidified spoils will be incorporated into the upland area as part of the natural restoration plan for the area.	NOE

	improved beach access, stormwater rain gardens, and signage.		
2014081059	Aircraft Demolition Facility Project San Bernardino International Airport Authority San Bernardino--San Bernardino The San Bernardino International Airport Authority (SBIAA) has received an application from Unical Aviation to establish an aircraft demolition facility in the northeastern-portion of the Airport. Aircraft demolition consists of manually stripping reusable equipment and then demolishing the fuselage, tail and wings by using large crushing equipment to obtain all recyclable materials such as aluminum. Retired jet aircraft will be brought to the demolition site and stripped of all its reusable and recyclable equipment/parts and this equipment will be transported to an offsite storage location. Then, the aircraft is crushed and the residual material, primarily aluminum, is transported to an offsite recycling facility. Thus, in effect the whole aircraft is recycled for equipment reuse and new material for future use. The key component of the project site will be the demolition pad.	NOD	
2014081063	Kenwood Transmission Main Extension Project San Bernardino Valley Municipal Water District San Bernardino--San Bernardino The Project pipeline alignment will begin approximately 500 feet northwest of the Kenwood Avenue and Cajon Boulevard intersection and travel northwest along Cajon Boulevard for approximately 150 feet before turning southwest toward Cajon Wash. The pipeline alignment will then travel southwest across private property for approximately 500 feet, to the tie-in point with the existing 16-inch pipeline. The new pipeline will serve the same function of conveying groundwater from existing wells to an existing reservoir.	NOD	
2014082017	Santa Cruz Auto Shop New Construction Project Forestry and Fire Protection, Department of --Santa Cruz The Project consists of the construction of new auto shop located at the Ben Lomond Conservation Camp (BLCC) and replace an existing fuel storage facility located within the BLCC campus. The property is currently managed by both California Department of Corrections and Rehabilitation and CAL FIRE. The Proposed Project would consolidate facilities, improve capacity and useable space, provide a safer environment for employees and local residents, and creates a facility that complies with state and federal regulations. 	under preparation by DTSC, and includes; groundwater plume containment at the southern boundary of the Site, limited removal and either on-site or off-site treatment of shallow soil in two locations, pilot test and possible groundwater treatment, and institutional controls that would restrict future land use at the site.		
2010051001	Mid-Coast Corridor Transit Project San Diego Association of Governments San Diego--San Diego FYI Final	Oth	11/21/2014
	The Mid-Coast Corridor Transit Project would extend the San Diego Trolley Blue Line from the Santa Fe Depot in Downtown San Diego north to the Old Town Transit Center via the existing Trolley tracks. New tracks would then extend north for 11 miles to the University Towne Centre Transit Center in University City. Nine new stations (four at grade and five aerial) would be built at the following locations: Tecolote Road, Clairemont Drive, Balboa Avenue, Nobel Drive, Veterans Administration Medical Center, University of California, San Diego West Campus, University of California, San Diego East Campus, Executive Drive, and the University Towne Centre Transit Center. With this extension, the project would provide for continuous service on the Trolley Blue Line from the San Ysidro Transit Center at the U.S.-Mexico international border to University City. In addition to the 11 miles of new Trolley tracks and nine new stations, the project includes upgrades to existing facilities between the Santa Fe Depot and the Old Town Transit Center, and the acquisition of new Trolley vehicles for the extended project operation. The project alignment would be located primarily within existing Metropolitan Transit System, City of San Diego, or Caltrans right-of-way; along local streets; and within the Los Angeles-San Diego-San Luis Obispo Rail Corridor Agency and I-5 corridors.		
2014109014	Huntington Beach Energy Project Energy Commission Huntington Beach--Orange	Oth	
	The Huntington Beach Energy Project will be natural gas-fired, combined-cycle, air-cooled, 939-megawatt electrical generating facility using existing linear facilities, and is designed to support both electrical reliability and grid stability to support peak demand and resource adequacy requirements.		
	On October 29, 2014, the California Energy Commission approved the above-described project pursuant to a regulatory program certified by the California Secretary of Resources under Section 21080.5 of the California Public Resources Code. The Energy Commission adopted the Revised Presiding Member's Proposed Decision (RPMPD), and Errata for the convenience of the parties and the public; in the meantime, please refer to the individual documents.

2013032042	CEQA Initial and MND for Waiver of Waste Discharge Requirements and General Water Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa--Sonoma The California Department of Fish and Wildlife (CDFW) has executed Lake and Streambed Alteration Agreement number 1600-2012-0263-R1, pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Mr. Arthur Reeve representing Humboldt County Department of Public Works. The Agreement is for 15-years to conduct routine maintenance, repair, and limited replacement or installation activities on hydrologically-connected roads and stream encroachments on 1,350 roads (1,200 miles of road length), 165 bridges, and over 4,000 culverts.	NOD	
2014061026	SR-76 at Valley Center Road Intersection Improvement Project Caltrans #11 Pauma Valley--San Diego Caltrans proposes to improve the safety of the SR-76/Valley Center Road intersection from postmile 32.6 to 33.2 by increasing sight distance for vehicles entering the intersection, upgrading the intersection, and realigning the curve just east of the intersection to meet current design standards. There are two Build Alternatives for the proposed project, one involving a signalized interchange and another involving a modern-day roundabout. There is one No Build alternative for the project, under which no construction would occur.	NOD	
2014081046	Oceanside High School Performing Arts Center Oceanside Unified School District Oceanside--San Diego The project is the construction and operation of a 29,000-square-foot performing arts center including a 502-seat performance theater; a 120-seat black box theater; a detached ticket office; two classrooms; and accessory office, labs, studios, and storage areas. The project would involve the creation of a new theater program at OHS, and the two classrooms would add 54 seats to the school's capacity. The new facility may operate approximately 100 events per year outside of school hours.	NOD	
2014082002	2014-2022 Draft Hillsborough Housing Element Hillsborough, City of Hillsborough--San Mateo The proposed 2014-2022 Housing Element addresses housing needs and opportunities for the 2014-2022 planning period, as required by State Planning Law. The purpose of the Housing Element Update is to identify and analyze existing and project housing needs, and to identify objectives, policies and programs which the Town intends to implement to address those needs. The Town of Hillsborough's housing allocation requires that the Town plan for 91 new units between 2014 and 2022. The new distribution includes 49 lower income, 21 moderate income and 21 higher income homes/sites. The proposed Housing Element is a policy level document. It provides policy direction for the implementation of various programs to accommodate the housing needs of projected population growth, and to encourage the production of housing units in a range of prices affordable to all income growth, and to encourage the production of housing units in a range of prices affordable to all income groups. While adoption of the Housing Element Update results in no direct physical impacts on the environment, the Town has prepared an initial study to analyze	NOD

2014102075	Use Permit Application No. PLN2014-0094 - Blaker 40 Brewing Stanislaus County Turlock--Stanislaus Request to change the use of an existing 1,944 sf converted milking parlor into a microbrewery which produces hand-crafted beer. On-site agricultural crops will be used in the microbrewery operation.	CON	11/17/2014
2012112061	Tuscany Meadows Project Pittsburg, City of Pittsburg--Contra Costa The proposed project includes an amendment to the city of Pittsburg Spere of Influence to encompass the project boundaries. In addition, the project includes annexation to the City of Pittsburg of both the approximately 170-acre area of proposed improvements (APN 089-150-013) and the existing approximately 23-acre Chevron facility property located near the northern portion of the project site (APN 089-150-015). It should be noted that the Chevron facility land use and operations would remain unchanged as result of the proposed project. Annexation of the site also includes annexation to the Contra Costa Water District (CCWD) and the Delta Diablo Sanitation District (DDSD) and amendment of service boundaries for the provision of water and wastewater services.	EIR	12/15/2014
2013061020	White Knob-White Ridge Limestone Quarries Expansion San Bernardino County --San Bernardino The Amended Plan would expand operations at the White Knob/White Ridge Limestone Quarries. The Amended Plan includes expansion of the three existing quarries and the existing overburden (OB) site, the creation of two new OB sites, and the expansion of the ancillary disturbance limits, which include haul and access roads, sediment basins and other erosion control features, storage pads, crusher location, west slope impacts, and incidental impacts from boulder roll-down. In addition, the proposed project would increase operational years of the quarries by 24 years from the existing permit expiration date of 2031 to the year 2055. The total existing permitted operational area is 145 acres. The Amended Plan would add 190.1 acres, for a total permitted operational area of approximately 375.1 acres. The amendment does not propose any new quarries.	EIR	12/15/2014
2014031008	Eastwood/Odello Water Right Change Petition State Water Resources Control Board Carmel-by-the-Sea--Monterey The proposed project would split existing License 13868 into two new licenses and result in changes to the authorized POD, POU, and purposes of use of the new licenses. License 13868 would be revoked and Licenses 13868A and 13868B would be issued. License 13868A would maintain the existing PODs, POU, and purpose of use and include new authorized PODs, POU, and purposes of use. With the changes, the right holder would receive additional authorization to divert water from three existing Cal-Am wells (Canada #2, Cypress and Pearse) in order to provide potable water for municipal purposes to existing lots of records within	EIR	12/15/2014

	the parts of Cal-Am's service area that are within the Carmel River watershed or the City of Carmel-by-the-Sea. License 13868B would be dedicated to instream uses within the Carmel River. The project would not increase the maximum authorized annual diversion rate or the maximum authorized instantaneous diversion rate beyond the existing authorized rates in License 13868.		
2013072064	American River Common Features, WRDA 96 Remaining Sites: Sites L7, L10, R3A, and R7 Central Valley Flood Protection Board Sacramento--Sacramento Project consist of four sites analyzed in previous document. Delays and design refinements may result in new or greater impacts than previously analyzed. New analysis focuses on Site L7 refinements, including light impacts due to nighttime construction of a jet grout slurry wall through roadway near the H-Street Bridge. Other sites have minor refinements that are analyzed, including extended construction hours. Construction is anticipated to take place during the summer of 2014 through spring 2015.	FIN	
2014101062	Garden Grove United Methodist Church Project Garden Grove, City of Garden Grove--Orange The proposed project is a mixed-use development comprised of 47 affordable housing units, a 3,485 sf Head Start facility, and a 2,975 sf leasing office/commercial space. The project proposes to change the General Plan land use designation of the 0.51 acre vacant parcel on the 5.2 ac project site from Medium Density Residential (MDR) to Civic Center Mixed Use (CCMU) and re-zone the parcel from Community Center Specific Plan-Community Center Residential Area 20 (CCSP-CCR20) to Civic Center Core (CC-3).	MND	12/01/2014
2014101064	Recycled Water Facilities Plan Palmdale Water District Palmdale--Los Angeles The Palmdale Recycled Water Authority is proposing to implement their 2014 Recycled Water Facilities Plan, which includes construction and operation of distribution pipelines and laterals and pumping facilities. The proposed project would provide approximately 1,325 AFY of tertiary-treated recycled water to PRWA customers, primarily for landscape irrigation at parks, schools, and golf courses. The proposed project also would potentially provide up to 9,450 AFY of recycled water for groundwater recharge in Little Rock Creek, the feasibility of which is currently being studied by the Palmdale Water District.	MND	12/01/2014
2014102074	Hughes Park Trail Project Roseville, City of Roseville--Placer Development of the Proposed Project would involve the construction of a paved or decomposed granite (DG) trail, a pedestrian and bicycle bridge over Pleasant Grove Creek, the cutting and replacing of existing Pleasant Grove Creek Trail pavement near the east end of the project alignment, and related drainage and flood control improvements within Huges Park in the City of Roseville. The proposed project would connect the existing Pleasant Grove Creek Trail to Bent Tree Drive. The proposed trail segment would extend approximately 1,000 feet in length and would be constructed to a width of 10 feet with 2-foot shoulders on either side.	MND	12/01/2014

2014108464	Temporary Emergency Permit for Treatment by Detonation, Naval Air Station (NAS) North Island Toxic Substances Control, Department of El Centro--Imperial The Department of Toxic Substances Control has issued an Emergency Permit to NAS North Island marine flares. The items were discovered and recovered from Pacific Beach, La Jolla Beach and Imperial Beach. They are currently being stored at NAS North Island in an Explosive Ordinance and Disposal (EOD) safe holding area. The items along with items that may be discovered will be transported to the Naval Air Facility (NAF) Bombing Range in El Centro, California where they will be treated by open detonation. Both transport and open detonation will be done following military protocols. Nas North Island EOD personnel have determined that the items are unstable and considered unsafe for continued storage. 2014091078	Alta Verde - Linea Homes Palm Springs, City of Palm Springs--Riverside The project proposes a residential community of 14 single family lots, private streets and three common lots for landscaping and drainage systems. The residential lots will range in size from 15,834 sf to 24,005 sf.	EIR	12/15/2014
2010051001	Mid-Coast Corridor Transit Project San Diego Association of Governments San Diego--San Diego FYI Final	FIS	

The Mid-Coast Corridor Transit Project would extend the San Diego Trolley Blue Line from the Santa Fe Depot in Downtown San Diego north to the Old Town Transit Center via the existing Trolley tracks. New tracks would then extend north for 11 miles to the University Towne Centre Transit Center in University City. Nine new stations (four at grade and five aerial) would be built at the following locations: Tecolote Road, Clairemont Drive, Balboa Avenue, Nobel Drive, Veterans Administration Medical Center, University of California, San Diego West Campus, University of California, San Diego East Campus, Executive Drive, and the University Towne Centre Transit Center. With this extension, the project would provide for continuous service on the Trolley Blue Line from the San Ysidro Transit

	Center at the U.S.-Mexico international border to University City. In addition to the 11 miles of new Trolley tracks and nine new stations, the project includes upgrades to existing facilities between the Santa Fe Depot and the Old Town Transit Center, and the acquisition of new Trolley vehicles for the extended project operation. The project alignment would be located primarily within existing Metropolitan Transit System, City of San Diego, or Caltrans right-of-way; along local streets; and within the Los Angeles-San Diego-San Luis Obispo Rail Corridor Agency and I-5 corridors.		
2014101068	MUNEM MAIDA Convenience Store, Gas Station, and a Care-Taker Residence on .90 acre - Conditional Use Permit San Bernardino County --San Bernardino NOA for IS / Proposed MND for a CUP to establish a 6,793 sf convenience store, gas station, and a care-taker residence on 0.90 acre in the community of Erwin Lake/Big Bear Lake / Third Supervisorial District; APN: 0315-231-17 & 0315-085-28; Project No.: P201300086	MND	12/01/2014
2014101069	Zavaro Residence San Diego, City of San Diego--San Diego The project is a Coastal Development Permit to construct a single-family residence on a 0.512 acre (22,291 sf) parcel at 1994 Via Casa Alta. The proposed project is located in the La Jolla Community Planning area.	MND	12/01/2014
2014101072	Earl Warren Middle School Master Plan San Dieguito Union High School District Solana Beach--San Diego The Project entails the design and construction of a new middle school on the site of the existing Earl Warren Middle School. The new middle school would serve the current students of Earl Warren Middle School and would include sixteen classrooms, a new administration building, a new food service building, a multi-purpose/athletic building, an art building with a courtyard, a new music building with an adjoining performance stage, four science classrooms, a new Warren Hall, and an area to allow for an additional four relocatable classrooms to provide flexibility for enrollment and program. An additional 56 parking spaces would be added to the existing 76 parking spaces for a total of 132 parking stalls. An interim campus would be constructed to supplement the existing campus that would be displaced by construction. This interim campus would consist of 31 relocatable classrooms, three restroom buildings, one administration building, one student support building, two multi-purpose buildings, and one food service building. The project site is located on the southwest corner of Lomas Santa Fe and Stevens Avenue in the City of Solana Beach, situated on approximately 20 acres.	MND	12/01/2014
2014102076	R Street Phase III, 13th to 16th Streets Improvements Project (T-15135900) Sacramento, City of Sacramento--Sacramento The purpose of the project is to provide improvements to the R Street Corridor according to the Central City Community Plan and the R Street Corridor Urban Design and Development Plan. The City proposes to construct streetscape improvements, street lighting, landscaping, hardscaping, and pedestrian enhancements on R Street between 13th to 16th Streets. The following work elements are proposed: reconstructing R Street, improving parking areas,	MND	12/01/2014

	providing raised sidewalks, planting trees, installing lighting, and updating the storm drainage system. The work will be completed in conformance with the Americans with Disabilities Act requirements, and bring the roadway up to the current City roadway standards. No new right-of-way is required.		
2014102081	Gerald Smith 4-Lot Split Scotts Valley, City of Scotts Valley--Santa Cruz Divide parcel into 4 lots for future residential construction located on a private road which will be widened to City minimum standard of 20 feet. Preliminary grading estimates are 752/744 cubic yards cut/fill. Earth disturbance will be limited to development envelopes, outside of the one identified riparian/seasonal drainage channel and other natural drainage swales. Average slopes of potential building pads range from 17% to <25%. Individual septic systems will be installed. A CalFire permit is needed for some tree removal. Approximately 228 trees/tree groups will be removed, 104 of which meet the City's protected criteria, while 29 are dead or diseased.	MND	12/01/2014
2014102082	Alameda Creek North Levee Improvement Project Alameda County Union City--Alameda The Alameda County Flood Control and Water Conservation District proposes to raise 8,650 linear feet of the north levee of Alameda Creek downstream of Union City Boulevard by approximately 4 feet to provide adequate freeboard to meet Federal Emergency Management Agency (FEMA) 100-year (1% annual chance) flood protection requirements. Approximately 40,000 cubic yards (CY) of imported levee material, will be used to raise the levee height within the project limits. The project would remove about 210 trees that conflict with the project. Following completion of the project, the existing public access trail atop the levee would be replaced.	MND	12/01/2014
2006051110	The Preserve at San Juan Orange County Lake Elsinore--Orange, Riverside Note: Revised NOP The project proposes to construct 72 single-family residences on 583.3 acres in an unincorporated portion of Orange County, adjacent to unincorporated Riverside County. The proposed project also includes development of 25 acres of vineyards that would be located through the site. Of the 583.3 acres, 507.8 acres would remain as open space. A previous NOP is being distributed due to project changes that increased the development of the site from 52-single family homes to the current proposal of 72-single family homes within the same project footprint.	NOP	12/01/2014
2014101070	Slover Avenue Distribution Center Fontana, City of Fontana--San Bernardino The Project includes an amendment to the Fontana Gateway Specific Plan (SPA 14-000003) and a Design Review Project 14-000020 (DRP 14-000020). These applications are collectively referred to as Master Case Number 14-000052 (MCN 14-000052), and would allow for the construction and operation of one high cube distribution warehouse building that would contain 671,324 sf of total floor space, as well as surface parking areas and drive aisles, utility infrastructure, landscaping, and other site improvements on the subject property.	NOP	12/01/2014

2014102083	Phasing in of Nonlead Ammunition Requirement No Later Than July 1, 2019 Fish & Wildlife Commission --Sacramento AB 711 (Chapter 742, Statutes of 2013) requires the Fish and Game Commission to promulgate regulations by July 1, 2015 that phase in the use of nonlead ammunition for the take of wildlife with a firearm in California. The statute requires that nonlead ammunition be used for the take of all wildlife in the state by July 1, 2019.	NOP	12/01/2014
2014102084	Pilot Flying J Travel Center Project Orland, City of Orland--Glenn The proposed project includes two components: 1) the annexation by the City of Orland of a total of six parcels, and 2) the development of a proposed Pilot Flying J Travel Center. While all of the six parcels would be annexed by the City, for clarification purposes the Annexation Area analyzed in this EIR consists of five parcels totaling approximately 10.43 acres which are analyzed at a program-level. The 9.2-acre Pilot Flying J Travel Center site is analyzed separately in this EIR at the project-level. Other than development of the Pilot Flying J Travel Center on the 9.2-acre site, all uses in the Annexation Area are to remain as currently existing; no development of these areas has been proposed as a part of this project.	NOP	12/01/2014
2014101073	Safety Element Update Maricopa, City of Maricopa--Kern The Safety Element is a mandatory element of the General Plan required by Senate Bill 351, an act that became law on February 23, 1971. Originally addressed in two separate element of the General Plan, the Safety Element and Seismic Safety Element were combined into one element under California Government Code Article 5-65302 (1986). This update is intended to supersede and combine the existing Seismic Safety Element, which was adopted in 1974, and the Safety Element, which was adopted in 1975. The purpose of the General Plan Safety Element is to identify natural or human activity-related hazards that exist in Maricopa and to define policy objectives and implementation actions to address them. Some naturally occurring hazards may be unavoidable, but the potential impact on Maricopa can be reduced through advanced planning and preparation. The Safety Element addresses geologic, seismic, flood, and fire hazards, as well as hazards created by human activity such as hazardous materials and incidents that call for emergency protection. The Safety Element describes the City's efforts to prepare for and respond to emergencies.	Neg	12/01/2014

2014051032	<p>09-0008) on SR 70 and construct a new, single-span bridge on the same alignment as the existing bridge (Figures 3 and 4). The proposed single-span bridge structure will measure 48-feet-wide by 204-feet 6-inches in length, which would provide a 12-foot-wide lane in each direction, with an eight-foot-wide left shoulder and 12-foot 6-inch-wide right shoulder. The proposed bridge structure will consist of a cast-in-place, pre-stressed, concrete box girder superstructure on reinforced concrete seat-type abutments supported by 24-inch diameter cast-in-drilled-hole (CIDH) concrete piles. Two retaining walls will be constructed parallel to the Feather River to support the southern edge of roadway directly before and after the bridge.</p> <p>Castor Solar Project by Green Light Energy, Corp; CUP 5, Map No. 139-22 Kern County --Kern Note: Response to Comments</p>	Oth	
	<p>The Castor Solar Project proposes to construct and operate a 1.5 megawatt (MW) solar photovoltaic (PV) power-generating facility with 5,800 PV solar panels, on 12 acres of 20.11 acre parcel in unincorporated Kern County, California near the community of Dustin Acres. The entire project site is within the jurisdictional boundaries of the Kern County General Plan. Implementation of the project would require approval of a Conditional Use Permit (CUP) (CUP No. 5, Map 139-22). The proposed project would construct an offsite overhead or underground 12.74kV generation tie-line along Evans Ranch Road. This 0.25 mile-long line would connect the project to the PG&E approved point of interconnection utility pole on the Elk Hills 1104 12.74kV distribution line on Evans Ranch Road to a point ~0.25 mile north of the parcel on which the proposed solar facility would be constructed. The facility would consist of the following project components: (1) PV modules and support structures; (2) direct current (DC) to alternating current (AC) inverters and transformers; (3) additional electrical equipment; (4) interconnection point and equipment; and (5) security improvements including fencing.</p>		
2005052146	<p>Moller Ranch Development Project/Moller Creek Culvert Replacement Dublin, City of Dublin--Alameda</p> <p>The Project is the construction of a residential development that includes up to 381 single-family detached dwelling units, installation of associated utilities and infrastructure, grading to repair previous landslides in the Project area and to install subdrains, development of trails and parks, construction of a 36-inch diameter storm drain outfall at the Tassajara road culvert, and riparian planting and bank stabilization along the lower portion of Moller Creek. In addition, off-site activities include 8.0 acres of grading to conduct wetland enhancement and creation at the Cayetano Creek Preserve.</p>	NOD	
	<p>The Project will result in 206.05 acres of permanent and temporary disturbance to upland grassland refugia habitat for two species listed as threatened under the California Endangered Species Act (CESA): California tiger salamander (<i>Ambystoma californiense</i>) and San Joaquin kit fox (<i>Vulpes macrotis mutica</i>), and is expected to result in take of these species, as defined in Fish and Game Code section 86. To authorize such take, CDFW issued to the Project applicant, an incidental take permit pursuant to CESA (No. 2081-2012-041-03).</p>
