STATE CLEARINGHOUSE

**SUMMARY
OF
POSTINGS**

September 16 – 30, 2013

STATE CLEARINGHOUSE SUMMARY OF POSTINGS

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Summary of Postings summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **September 16 – 30, 2013**.

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Director

CLEARINGHOUSE MAILING ADDRESS

The mailing address is:

USPS:

State Clearinghouse
P.O. Box 3044
Sacramento, CA 95812-3044

OR

USPS/Courier Service / Hand Deliveries:

<u>Documents Received on Monday, September 16, 2013</u>			
2013071037	Climate Action Plan (CAP) Chino, City of Chino--San Bernardino The CAP is a plan for the reduction of GHGE within the City of Chino. As such, the Project site includes the entire City, which occupies approximately 30 square miles. Through an informal partnership led by SANBAG Chino obtained the GHG inventories. The CAP has a quantified 2008 baseline GHGE inventory; a 2020 Business As Usual (BAU) inventory; and a 2020 reduced emissions inventory. The CAP includes a reduction target of achieving 15% below 2008 levels of emissions by 2020, a set of reduction measures to achieve the reduction target, an implementation section, and a CAP monitoring and update program.	EIR	10/30/2013
2011091085	Santa Maria Energy Oil Drilling and Production Plan Santa Barbara County --Santa Barbara Note: Recirculated Shortened Review Drilling and production of 136 oil and gas wells using cyclic steaming.	FIN	
2010061070	(a) Amendment of Zoning Map No. 165, Zone Change Case No. 67; (b) Tentative Parcel Map No. 11506 Kern County Tehachapi--Kern (a) A change in zone classification from A (Exclusive Agriculture) to E (5) RS (Estate - 5 acres - Residential Suburban Combining) or a more restrictive district; (b) Tentative Parcel Map 11506 proposing to divide an approximate 31-acre site into four parcels ranging in size from 5.05 acres to 5.38 acres for residential use and a 10.22-acre designated remainder; development variation to allow a width of less than 60 feet for the proposed private access easement.	MND	10/16/2013
2013091048	MWTP Reclaimed Water Distribution System Phase IV Ventura County Waterworks District #8 Moorpark--Ventura Note: Reference SCH# 2010041035 The proposed Project includes the installation of approximately 16,500 linear feet of reclaimed water pipeline and a booster pump station. The reclaimed water pipeline will be constructed of 12-inch ductile iron pipe or polyvinyl chloride (PVC) pipe. The booster pump station would be located at the existing reclaimed water tank site on Championship Drive and would include three 150-gallon per minute (gpm) capacity pumps and is proposed to be an above-ground facility. Reclaimed water from the MWTP would be served to customers along the route as they are identified and request service. This phase will provide 425 AFY of reclaimed water. The preliminary construction start date is mid-December 2014 and completion is expected to occur by mid-December 2015.	MND	10/15/2013
2013092031	Animal Shelter Placer County Auburn--Placer The relocation of the existing Placer County animal shelter to a new and larger facility within 250 feet of the existing facility. This project is located at the Placer County Government Center, the central hub of government services for Placer	MND	10/15/2013

	County. The new Animal Shelter facility will include approximately 37,000 sf on a site approximately 4.5 acres in size.		
2013062004	Riverfront Mixed Use Project Petaluma, City of Petaluma--Sonoma The project consists of a Tentative Subdivision Map to create 144 lots and four parcels on an existing 35.7 acre site. The project would allow for future development of a mix of land uses with a maximum project buildout of 273 residential units, 90,000 sf of commercial and office space, a 120-room hotel, approximately 4.0 acres of parks and a system of multi-use trails. Offsite improvements include an emergency access route, a riverfront park.	NOP	10/15/2013
2013092033	MROSD Integrated Pest Management Project Midpeninsula Regional Open Space District --Santa Clara, San Mateo, Santa Cruz The Midpeninsula Regional Open Space District proposes to implement a formal Integrated Pest Management (IPM) Program to comprehensively direct management of all pests on District properties. IPM is a long-term, science-based, decision-making system that uses a specific methodology to manage damage from pests. The proposed IPM Program would provide guidance for careful management of pests while protecting natural resources and public health.	NOP	10/15/2013
2013091047	Enhanced Reductive Dechlorination of Volatile Organic Compounds Impacted Groundwater Regional Water Quality Control Board, Region 4 (Los Angeles) El Segundo--Los Angeles Under the oversight of the Regional Board, Honeywell International, Inc. proposes to implement periodic injections of pH buffer, organic substrates, tracer, bioaugmentation culture, and anaerobic chase water into the subsurface for remediation of volatile organic compounds (VOCs) impacted groundwater beneath the Southwest Corner Lot of the former Honeywell El Segundo facility. The bioaugmentation culture is an enriched natural bacteria culture that contains Dehalococcoides species which can promote complete degradation of chlorinated VOCs.	Neg	10/15/2013
2013092032	Grazing Management Policy Santa Clara County --Santa Clara The OSA manages more than 12,000 acres throughout its jurisdiction. The Grazing Management Policy (GMP) would apply to open space preserve lands within this area, and would be used to conserve biodiversity, while protecting watersheds and water quality, cultural resources, scenic and aesthetic values, and recreational opportunities. The GMP would be used to guide the overall planning, budgeting, and decision making processes for grazing of OSA lands. The suitability and scope of implementation of a specific GMP for such lands will be determined on a site- or issue- specific basis given the circumstances and conditions to be addressed. Therefore, the GMP will be implemented through site-specific management plans or prescriptions consistent with this policy, subject to appropriate environmental review.	Neg	10/15/2013

2006011077	North Costa Mesa High Rise Residential Projects Costa Mesa, City of Costa Mesa--Orange The Addendum to Final PEIR 1052 modifies the original master plan to eliminate the two high-rise residential towers of 216' and 270'; above ground level and replace the towers with a single mid-rise residential structure consisting of five levels of residential units over one level of subterranean parking and two levels of above-ground parking for a total building height of 87' above ground level. Modifications include a reduction in parking from 533 spaces to 438 spaces and elimination of the resident serving retail in the amount of 2,350 square feet. The number of residential units will not change and remain a 250 acre with of mix of studio, one bedroom and two bedroom units.	NOD	
2007061004	Perris Dam Remediation Project Water Resources, Department of Perris--Riverside Installing 32 piezometers, 11 inclinometers, and 2 observation wells. Also advancing 15 CPTs and 6 SPTs.	NOD	
2007072023	Modesto Master EIR Update and General Plan Amendment Modesto, City of Modesto--Stanislaus The project is limited to the abandonment of an alley that bisects the property located at 629 Second Street. The property located at 629 Second was formerly occupied with a Fire Station and City pump house; however these structures have been removed and the site is currently vacant. The alley is not improved for vehicular traffic. There are overhead electrical lines running along the alley and an underground wastewater line below the alley. Easements will be recorded to protect these utilities prior to abandoning the alley. No new physical construction or changes are proposed as part of the abandonment.	NOD	
2007092059	Van Ness Avenue Bus Rapid Transit (BRT) Project San Francisco County Transportation Authority San Francisco--San Francisco BRT is a new mode of transit in San Francisco and represents a package of features that together create rapid and reliable transit service for the benefit of passengers along a given corridor, and the transit system as a whole. The Van Ness Avenue BRT Project includes: - Dedicated Bus Lanes - Level Boarding - Consolidating transit stops - High-quality stations - Platform Proof of Payment - Traffic signal optimization - Fewer left-turn pocket lanes - Transit Signal Priority - Pedestrian safety enhancements	NOD

	Arrizo Plains, San Luis Obispo County and replacing the conductor cables on that existing transmission line between the Carizzo plains and the Midway Substation in Buttonwillow, Kern County.		
2012072019	Use Permit Application No. 2012-06 - GJ Silva Dairy Stanislaus County Turlock--Stanislaus Request to expand an existing dairy facility by increasing the milk/dry cows by 1,600 for a total of 3,000 milk cows, 340 dry cows, 790 bred heifers, 422 large heifers (7-14 months), and 200 calves. The operation currently houses 1,540 milk cows, 200 dry cows, 790 bred heifers, 422 large heifers (7-14 months), and 200 calves. All housing, milking, waste storage structures and utilities are in place. The site was previously permitted for and housed 4,140 dairy cows although in 2008 the operation reduced the total number to 1,640 mature dairy cows. The dairy is situated on two assessor parcels of 39.50 and 72.65 acres for a total of 112.15 acres.	NOD	
2012102012	Holman Tank Demolition and Pressure Zone 3/5 Water System Intertie Improvements Fortuna, City of Fortuna--Humboldt The project is limited to one stream encroachment to replace an existing culvert on Unnamed Tributary to Eel River along an unimproved road. The 74-foot long by 30-inch diameter metal culvert will be replaced with a plastic culvert of the same size and length, and put to the grade and alignment of the stream.	NOD	
2012112051	Scott River Riparian Restoration Siskiyou Resource Conservation District Etna--Siskiyou The Project is limited to approximately 650 of bioengineered stream bank/willow cutting plantings and elevated floodplain planting of Cottonwood and Golden Willow poles.	NOD	
2013071080	Reservoir 4701-2 Coachella Valley Water District Indio--Riverside CVWD proposes to construct a 100,000 gallon, domestic water storage reservoir immediately adjacent to existing Reservoir 4701. The proposed steel-tank reservoir will measure 41 feet in diameter and 15 feet in height and will occupy a one-half acre site immediately south of existing Reservoir 4701, a 21,000 gallon steel tank.	NOD	
2013072006	Colusa Indian Community Council, Compton Diversion Fish Screen Project Fish & Wildlife #2 Colusa--Colusa The California Department of Fish and Wildlife (CDFW) is executing Lake or Streambed Alteration Agreement number 1600-2012-0233-R2, pursuant to Section 1602 of the Fish and Game Code to the project applicant, Colusa Indian Community Council. The project is limited to the installation of a new self-cleaning fish screen and pipe assembly on an existing agricultural diversion. The Colusa Indian Community Council (CICC) operates two slant pumps off Sacramento River for agricultural purposes under claimed riparian right ID S020214; the combined maximum pumping rate of both pumps is 22 cubic feet per second (cfs) and 2,383 acre-feet	NOD

	is diverted annually.		
2013082021	New Work Dredging at F-Dock (Site) Redwood City Redwood City--San Mateo The Port of Redwood City is conducting new work dredging at F-Dock along the Redwood Creek. A total of 6500 CY of sediment will be removed from the sub-tidal bay bottom to a design depth between -10' to 14' with a -1' over-dredge allowance. The dredged sediments will be transported to the Federal and State approved San Francisco Deep Ocean Disposal site (SF-DODS) in compliance with the Long Term Management Strategies (LTMS) program run by the USACE - San Francisco District which prohibit any new work dredging sediments from in-bay disposal.	NOD	
2013082026	2900 Sand Hill Road - Sharon Heights Golf and Country Club Membership Increase Menlo Park, City of Menlo Park--San Mateo The Sharon Heights Golf and Country Club is requesting a use permit revision to allow a membership increase 550 to 680 members (130 member increase) and remove an existing condition that limits the number of vehicular trips during the a.m. and p.m. peak hours at a golf and country club located in the OSC (Open Space and Conservation) zoning district.	NOD	
2013099017	Michael Mayes Land Division project; Agreement 2013-0096-R4 Fish & Wildlife #4 --Mariposa The California Department of Fish and Wildlife is executing a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code to the Project applicant, Michael Mayes. The Project includes the construction of a rural road over a seasonal tributary to Ownes Creek. The road will be constructed over two parallel 65-foot by 40-foot arched, corrugated steel pipes, approximately 35 feet in length. Approximately 3 cubic yards of material will be excavated from the streambed and banks in order to install the culverts. Approximately 250 cubic yards of fill will be placed on and around the culverts to construct the road base and driving surface. At the upstream end of the culverts there a precast concrete headwall will be installed. At the downstream end, each culvert will be fitted with a flared outlet and rip rap apron, consisting of approximately 16 cubic yards of 12 inch diameter D50 rock, placed over filter fabric.	NOD	
2013099018	Lake or Streambed Alteration Agreement No. 1600-2013-0129-R1 for Timber Harvesting Plan (THP) 1-13-026-HUM Forestry and Fire Protection, Department of --Humboldt The Dept. of Fish and Wildlife is issuing an agreement for seven Stream Crossings and one water drafting site.	NOD	
2013099019	Lake or Streambed Alteration Agreement No. 1600-2011-0312-R1 for Timber Harvesting Plan (THP) 1-11-138 MEN, "Blackrock" THP Forestry and Fire Protection, Department of --Mendocino The California Department of Fish and Wildlife (CDFW) is entering into a lake or streambed alteration agreement (Agreement) with Mr. John Ramaley, representing Mendocino Redwood Company, LLC. 2013098179	Issuance of Streambed Alteration Agreement No. 1600-2012-0063-R1, Dill Slough Bridge (7C-01) Replacement at Maples Road Fish & Wildlife #1 --Lassen The project is limited to the replacement of an existing 23 foot wide by 39 foot long bridge with a 35 foot wide by 60-foot long bridge.	NOE	
2013098180	Issuance of Streambed Alteration Agreement No. 1600-2012-0064-R1, Dill Slough Overflow Bridge (7CD-02) Replacement at Maples Road Fish & Wildlife #1 --Lassen The project is limited to the replacement of an existing 23 foot wide by 115 foot long bridge with a 35 foot wide by 120 foot long bridge.	NOE	
2013098181	Issuance of Streambed Alteration Agreement No. 1600-2013-0139-R1 Anderson Driveway Crossing Repair Fish & Wildlife #1 --Shasta The project is limited to repair of the existing crossing on the unnamed tributary from damage occurring during the winter of 2012-2013. The Permittee wishes to add an additional 4'-6' culvert adjacent to the existing culvert to add capacity to the crossing during future storm events. Additionally, approximately 50 yards of 12"-24" clean rock would be placed along the downstream banks and culvert outlet where the fill was washed out.	NOE	
2013098182	Issuance of Streambed Alteration Agreement No. 1600-2013-0215-R1, Alpine Trinity Mobile Home Park Seep Well Fish & Wildlife #1 --Trinity The project is limited to using a backhoe adjacent to the river's edge to clear accumulated silt away from the existing seep well. The Permittee will remove less than 15 cubic yards of silt around the outside of the 6'-7' deep well casing and backfill the excavated area around the seep well with clean rock and filter fabric, if necessary.	NOE	
2013098183	Issuance of Streambed Alteration Agreement No. 1600-2013-0224-R1, Fortenberry Repair Work to Salt Creek Fish & Wildlife #1 Shasta Lake--Shasta The project includes three components: 1) repair/restoration of the bed, bank, and channel; 2) removal and control of invasive species; and 3) routine maintenance of the stream channel to allow unhindered passage of water through the Permittee's property.	NOE	
2013098184	Issuance of Streambed Alteration Agreement No. 1600-2013-0216-R1, Scott Culvert Fish & Wildlife #1 Redding--Shasta The project is limited to the installation of a culvert crossing for access to property. Clean boulders (no broken concrete) will be used for erosion control at inlet and outlet of culvert pipe. Seed and straw will be used on all disturbed banks for erosion control as well.	NOE

2013098193	New Hope Bridge Project; SAA #1600-2013-0156-R2 Fish & Wildlife #2 Galt--Sacramento The project consists of Geotechnical Drilling into the bridge deck of the Grizzly Slough Bridge over Grizzly Slough. Two sampled and logged test boring (approximately 4-6" in diameter) will be drilled to a depth of approximately 120 feet within the channel of Grizzly Slough. Borings will be performed through the existing bridge deck. The bridge will be cored and a casing set into the subgrade at these boring locations to facilitate drilling and sampling. Cuttings and drill fluid will be contained, placed in drums, and disposed appropriately at another location. Holes will be backfilled per Sacramento County Environmental Health requirements.	NOE	
2013098194	Alta Mesa Road Bridge; SAA #1600-2013-0124-R2 Fish & Wildlife #2 Galt--Sacramento The project consists of Geotechnical Drilling into the bridge deck of the Alta Mesa Road Bridge over Laguna Creek. Two sampled and logged test boring (approximately 4-6" in diameter) will be drilled to a depth of approximately 100 feet within the channel of Laguna Creek. Borings will be performed through the existing bridge deck. The bridge will be cored and a casing set into the subgrade at these boring locations to facilitate drilling and sampling. Cuttings and drill fluid will be contained, placed in drums, and disposed appropriately at another location. Holes will be backfilled per Sacramento County Environmental Health requirements.	NOE	
2013098195	Sir Francis Drake Milepost Marker 18.19 Bio-Technical Repair of Road Slip-Out Fish & Wildlife #3 Unincorporated--Marin The project involves repairing a 30-foot long roadside slip-out below Sir Francis Drake Boulevard and adjacent to Lagunitas Creek. The repair will utilize a biotechnical approach consisting of fabric reinforced earth fill (FREF) layers with live willow cuttings placed between the FREF layers. SAA #1600-2013-0130-R3.	NOE	
2013098196	Burton Creek Restoration Fish & Wildlife #3 Unincorporated--Napa The project is limited to: 1) Installing a live crib wall with a framework of logs, native soil material and live native willow cuttings to protect a severely eroded bank. 2) Removing an existing 3-inch diameter plastic diversion pipe approximately 300-foot long and all associated infrastructure including: eight 8-foot long, 2-inch by 4-inch timber planks, 30 supportive t-posts, and 2 plastic sheets used as methods to divert the active channel around the destabilized bank. All work will occur using hand tools. SAA #1600-2013-0029-R3.	NOE	
2013098197	Agreement No. 2013-0093-R4; Farm Side Riverbank Reinforcement Project Fish & Wildlife #4 --Monterey The Project consists of stabilizing approximately 450 linear feet of right bank (looking downstream) of the Salinas River by: installing fill in a section between the levee at the top of bank of the Salinas River and the existing farm field. The section's elevation will be raised using approximately 2,142 cubic yards of material cut from re-grading the existing farm field. The newly raised section will be re-contoured to re-position the existing drainage swale and it will be restored with	NOE

2008101110	Zone Change 15, Map 140; PD Plan 5, Map 140; Exclusion from Ag Preserve 10; Tentative Parcel Map 11235 Kern County Bakersfield--Kern The Project involves the development of an oilfield equipment staging/storage area and warehouse of two portions of an 80-acre vacant parcel. The project as authorized in the ITP will result in permanent impacts to 7.5 acres of San Joaquin kit fox (SJKF)(<i>Vulpes macrotis mutica</i>), San Joaquin antelope squirrel, and Tipton kangaroo rat. Major Amendment No. 1 (Amendment) includes the installation, removal, and restoration of an additional temporary storage facility constructed after ITP issuance, which resulted in temporary impacts to 0.02 acres associated with a facility comprised of compacted gravel base and three tanks within a 45 feet by 20 feet or 900 sf feet footprint. The Amendment requires a corresponding increase to the required Habitat Management (HM) lands by 0.06 acres, for a total of 30.06 acres.	NOD	
2013032075	555 South Saratoga Condominium Project Santa Clara, City of Santa Clara--Santa Clara Rezone from CN (Neighborhood Commercial) to PD (Planned Development and Tentative Map to construct 13 condominiums.	NOD	
2013042044	Juvenile Hall Gym Santa Cruz County --Santa Cruz Proposal to construct a 6,880 sf pre-fabricated steel-frame building to be used as a recreational facility for the Santa Cruz County Juvenile Hall.	NOD	
2013062051	South San Francisco / San Bruno WQCP Capital Improvements Projects South San Francisco, City of South San Francisco--San Mateo The proposed project, which would consist of three components: Wet Weather Improvements Project, Green Energy Project, and Digester Replacement Project. The Wet Weather Improvements Project would include secondary treatment improvements and capacity increase to 40 million gallons per day; headworks and stormwater improvements; and aeration basin rehabilitation. The Green Energy Project would involve installation of solar panels to generate 150 kilowatts of solar photovoltaic energy. Under the Digester Replacement Project, two of the existing three digesters would be demolished and replaced at the same location and the third digester would be rehabilitated.	NOD

2013071029	<p>Diversion Dam Maintenance Dredging Project, Rio Bravo Hydroelectric Project Olcese Water District Bakersfield--Kern</p> <p>The CA DFW is executing a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code to the project applicant, Olcese Water District. The project includes dredging an area of 2 acres within the reservoir by a suction dredge placed by crane onto a barge in the reservoir near the diversion dam. Approximately 35,000 cubic yards of sediment will be pumped from the dredge to a settling basin through a 12-inch plastic pipe placed on the ground surface.</p>	NOD	
2013082024	<p>Lewiston Community Services District Water Treatment and Storage Improvements Project Public Health, Department of --Trinity</p> <p>The Department's Safe Drinking Water State Revolving Fund Program and Safe Drinking Water Proposition 50 Program are both providing state funds for the project. The Lewiston Community Services District proposes to construct a new water treatment plant, treated and finished water pipelines, and new water storage tank. The existing water treatment system uses in-line filtration, which is no longer an approved technology. A new water treatment plant would be constructed to house a new water filtration system. A new treated water pipeline would extend east to a new 315,000 gallon capacity water storage tank. A new finished water pipeline would extend from the new tank to the distribution system. The existing water treatment plant and storage tanks would be dismantled and removed from the project area.</p>	NOD	
2013082025	<p>Ukiah Valley Medical Hospital Support Building and Central Yard Ukiah, City of Ukiah--Mendocino</p> <p>Construction of an 11,200 sf Hospital Support Building (HSB) for Ukiah Valley Medical Center (UVMC), modified parking lot, central yard, removal of 38 trees and planting of new landscaping and 38 trees, and use of two adjacent off-site for temporary parking, contractor trailers and construction staging. The Project would relocate existing hospital support functions scattered throughout the UVMC campus to one building. The two buildings currently housing the support functions would be demolished. The Project would also relocate existing utilities (transformers, generators, oxygen tank, etc.) to a central yard with CMU enclosure. A new 6-foot tall CMU wall would be constructed along the east property line. The Project would not increase the number of employees, visitors or patients.</p>	NOD

2013098228	Conditional Use Permit 13-04 Los Alamitos, City of Los Alamitos--Orange The Planning Commission has approved a Resolution (13-16) for Conditional Use Permit (CUP 13-04) to allow an indoor recreational establishment use (batting cages), and a retail sales use, in an existing 8,868 square foot space at 10714 Reagan Street, Unit #A, in the Planned Light Industrial (P-M) Zoning District APN 242-242-69.	NOE	
2013098229	Install Evidence Storage Shed and Vessel Storage Awning Parks and Recreation, Department of --Sacramento Install a 10 foot by 12 foot evidence storage shed and a 24 foot by 30 foot covered vessel/vehicle awning within the Folsom Lake State Recreation Area corporation yard to meet State regulations regarding providing a separate identified evidence storage area. The Shed and awning area will be fenced with a 6-foot chain link fence topped with razor wire. The area to be fenced will be 40 feet by 50 feet. This area will require minor grading to level and 3/4" Class II AB road base will be installed. A 10 foot by 12 foot by 2 inch thick concrete pad will be installed for the storage shed.	NOE	
2013098230	Stiles Mill Property Removal Action Workplan Toxic Substances Control, Department of Nevada City--Nevada The purpose of the proposed project is to minimize human exposure to arsenic, lead, mercury, cadmium, and chromium impacted mine waste (rocks/tailings/soils). To facilitate the investigation of the Site it was divided into 3 areas of concern (AOCs). AOCs 1 and 2 contain mine waste from the former mining operations that occurred on the property. The third AOC consists of the trails that exist on the Site as well as some surrounding property. The selected remedy will involve the redistribution and covering of exposed mine waste on the property to make it safe for the current use.	NOE	
2013098231	Bank Stabilization Project SAA 1600-2013-0159-R2 Fish & Wildlife #2 Chico--Butte The Project consists of repair and maintenance of existing rip-rap along 75 to 100 ft. of creek bank. Instream work will include the placement of filter fabric that will be toed into the bottom of the creek bank and then covered by approximately 150-200 tons of 12-18 inch rip-rap. Bank stabilization and rip rap placemtn will be limited to the right side of the bank.	NOE	
2013098232	Sulphur Creek Streambank Restoration Fish & Wildlife #3 St. Helena--Napa The project is limited to: 1) Installing a live willow brush mattress approximately 100 feet long and extending approximately 8 feet vertically up the bank; 2) Installing an approximately 100-foot long fascine toe along the base of the live willow mattress; 3) Excavating bed material and installing a rock stream barb using 30-inch rock material along an approximately 7-foot long section of the channel to be angled upstream as determined in the field. No work will occur in the wetted portion of the channel. SAA #1600-2013-0218-R3.	NOE

2013041032	Duarte Station Specific Plan Duarte, City of Duarte--Los Angeles The City-initiated Duarte Station Specific Plan (Specific Plan) is intended to establish the general type, parameters, and character of the development in order to develop an integrated TOD that is also compatible with the surrounding area. The Master Land Use Plan provides flexibility for property owners to respond to market conditions and develop a mixed-use "transit village" that revitalizes the Plan Area through the provision of multiple land uses that complement one another. Land uses consist of residential, office, hotel, commercial/retail, and open space. For purposes of the environmental analysis, a development scenario that shows one potential implementation of the Master Land Use Plan has been identified.	EIR	11/04/2013
2009012070	Richardson Grove Operational Improvement Project Caltrans #1 --Humboldt FYI Final Adjust roadway alignment to accommodate Surface Transportation Assistance Act (STAA) truck traffic, thereby removing restriction of STAA vehicles, improving operation of US 101. Supplement to Final EA presents updated old growth redwood tree maps and analysis requested by federal court's order. Document also presents information on proposed minor modifications to the existing barrier rail, the results of surveys for the marbled murrelet, as well as updated information on the smaller-diameter trees to be removed.	FIN	
2009091045	Moore Conditional Use Permit San Luis Obispo County San Luis Obispo--San Luis Obispo FYI Final Request by Jason Moore for a Conditional Use Permit to authorize: 1) As-built (unpermitted) grading associated with the construction of driveways, building pads, and preparation of land for agricultural activities (orchard development) involving 10,918 cy of cut, 10,918 cy of fill, and a site disturbance area and vegetation removal.	FIN	
2011041066	Salinas River Channel Maintenance Program Monterey County Salinas--Monterey Note: FYI Final 1 CD MCWRA is proposing the Salinas River SMP, located in the Salinas River Watershed, Monterey County, CA. MCWRA would coordinate voluntary stream maintenance activities with Participants and appropriate federal, state, and local agencies. The proposed SMP provides guidance and outlines maintenance procedures that will be used by the Participants to effectively implement routine stream maintenance activities in a timely, cost-effective and environmentally-sensitive manner. The Program Area is defined as the Salinas River mainstem from the Highway 1 Bridge, River Mile (RM) 2, upstream to RM 94, including portions of the tributaries, Gonzales Slough (at RM 31.6), Bryant Canyon Channel (at RM 47.1), and San Lorenzo Creek (at RM 69.0), for a total of approximately 94 linear miles. 2013091058	IS 6729 and CUP 3417: Proposing a New Pistachio Huller Facility and a Gas Connection Fresno County Firebaugh--Fresno Proposing a new pistachio huller facility (hulling, drying, and storing 15 million pounds of pistachios per year) with related improvements on an approximately 154.29-acre parcel and proposing a gas connection at PG&E main line at the northwest corner of N. San Diego Avenue and W. Shaw Avenue in the AE-20 Zone District. The project is located at 5454 N. Jerrold Avenue on the southeast corner of N. Jerrold Avenue and W. Shaw Avenue approximately five miles southwest of the City of Firebaugh (SUP. DIST.: 1) (APN: 011-100-07S, -14S, -15S, -17S, -20S, -23S, -24S).	MND	10/18/2013
2013091059	Site Plan PLN13-00011 - SCLA Lot 19 Victorville, City of Victorville--San Bernardino A Site Plan to allow for a speculative industrial concrete tilt-up building up to approximately 1,311,059 sf on 66.47 acres of previously cleared land. The building may be built in phases of roughly 500,000, 750,000, and 1,000,000 sf. The proposal includes associated infrastructure improvements, such as auto/trailer parking, landscaping, street improvements and drainage basins. The building's internal clear height is approximately 36 feet (32' to 40'). Potential uses include warehousing, distribution, assembly, manufacturing and similar permitted industrial uses.	MND	10/18/2013
2013091060	Paramount Farms, International, LLC El Dorado Pistachio Plant Expansion Regional Water Quality Control Board, Region 5 (Central Valley) Coalinga--Fresno Paramount Farms International, LLC proposes to increase water use during hulling operations at its Pistachio Processing Plant at 39840 El Dorado Avenue near Coalinga in Fresno County. The increased water use will result in increased wastewater flows up to 1 million gallons per day. Wastewater generated during the hulling operations will be reused as supplemental irrigation water on approximately 600 acres of pistachio trees. No increase in production capacity is proposed. The project will involve trenching for installation of a new irrigation line to transfer wastewater to the new land application areas where it will be tied into the existing irrigation system.	MND	10/18/2013
1995101004	Sierra Madre General Plan Update Sierra Madre, City of SIERRA MADRE--LOS ANGELES The proposed project is the update of the Sierra Madre General Plan, which will guide the growth and development (e.g., infill development, redevelopment, and revitalization/restoration) of the City 20 years or more into the future. The General Plan Update involves a revision to the current land use map and all elements except Housing. It will guide growth and development within the City by designating land uses in the proposed land use map and through implementation of the goals and policies of the General Plan Update. Assuming a theoretical buildout (post-2035 scenario) of the land use plan, the City is projected to accommodate approximately 5,017 residential dwelling units (4,911 existing plus 106 new) and 8,808,401 sf of non-residential sf (8,757,035 existing plus 51,366 new), which includes commercial, manufacturing and institutional land uses. Additionally, approximately 544 acres will be dedicated to open space and hillside management. The General Plan Update consists of the following elements: Land	NOP	10/21/2013

	Use, Resource Management, Hazard Prevention, and Community Services, which are included as individual chapters in the General Plan Update.		
2013091061	Sports Field Project Valley Center Pauma Unified School District --San Diego The project proposes development of a multi-use turf sports field in the southeastern quadrant of Cole Grade Road and Valley Center School Road on a 1.9-acre site (within APN 188-240-1800) owned by the Valley Center - Pauma USD. The project site is characterized as flat, vacant, previously developed land. Site access is provided off Valley Center School Road.	NOP	10/18/2013
2013091062	JEG 5-13; Alon Bakersfield Refinery Crude Flexibility Project by Paramount Petroleum Corporation Kern County Bakersfield--Kern The Alon Bakersfield Refinery Crude Flexibility Project is a Modification of a Precise Development Plan that would allow greater flexibility for the Refinery to utilize a variety of crude oils that can be processed onsite. The project proponent is requesting: 1) expansion of rail, transfer and storage facilities including an addition of up to three boilers; 2) process unit upgrades and/or modifications; 3) repurposing of existing tankage; and 4) relocation and modernization of existing Liquefied Propane Gas (LPG) truck rack and upgrades to sales rack. The rail expansion would consist of the construction of a double rail loop from a new spur connection off of the existing Burlington Northern and Santa Fe Railway (BNSF) and would be fully contained onsite. Most of the proposed process unit changes are minor in scope. The Refinery's 70,000 barrels per day (BPD) maximum crude processing capacity would not be increased.	NOP	10/18/2013
2009042016	Addendum to the Adopted MND for the Biggs Wastewater Improvement Project Biggs, City of Biggs--Butte The project involves installation and/or upgrade of wastewater pre-treatment mechanical equipment at the City's wastewater treatment plant. The project will assist the City in meeting current wastewater effluent discharge standards, reducing maintenance and operation costs and increasing plant operating efficiencies. Proposed improvements include a new mechanical bar screen and head-works apparatus.	NOD	
2009091048	Lost Hills Interchange Improvement Caltrans #7 Calabasas--Los Angeles The City of Calabasas proposes to replace the existing Lost Hills Road/ U.S. Highway 101 overcrossing and modify the interchange (proposed project). The interchange is currently inadequate due to closely spaced intersections and the relatively high traffic flows. The proposed improvements would increase roadway widths to accommodate proper lane arrangement on the overcrossing; modify the existing northbound and southbound ramps and replace the existing overcrossing with a new one designed with increased vertical clearance and current seismic safety standards. Without the proposed project, traffic conditions would continue to worsen with time. The Caltrans is the lead agency for both the National Environmental Policy Act (NEPA) and CEQA.	NOD

2008121014	Los Angeles River Ecosystem Restoration Study Los Angeles, City of Los Angeles, City of--Los Angeles The primary purpose of the proposed project and alternatives considered in this study is to restore approximately 11 miles of the Los Angeles River from approximately Griffith Park to downtown Los Angeles. This reach is identified as the "Area with Restoration Benefits and Opportunities for Restoration" reach, or ARBOR reach. Restoration would occur by reestablishing riparian strand, freshwater marsh, and aquatic habitat communities and reconnecting the River to major tributary confluences and its historic floodplain, while maintaining existing levels of flood risk management. Opportunities for future regional connections to the habitat zones of the Santa Monica, San Gabriel, and Verdugo Mountains would also be created. A secondary purpose is to provide recreational opportunities consistent with the restored ecosystem within this 11 mile reach of the river.	EIR	11/04/2013

2012052008	Broadway/Valdez District Specific Plan Oakland, City of Oakland--Alameda The Broadway Valdez District Specific Plan will be a 25-year planning document that provides a vision and planning framework for future growth and development within the Plan Area, which runs along Oakland's Broadway corridor between Grand Avenue and I-580. The plan provides a comprehensive vision for the Plan Area along with goals, policies and development regulation to guide the Plan Area's future development and serves as the mechanism for insuring that future development is coordinated and occurs in an orderly and well-planned manner.	EIR	11/04/2013
2013051092	General Plan Update La Habra, City of La Habra--Orange The proposed project is a new La Habra General Plan that meets CA Code requirements for a general plan, and a Climate Action Plan. The proposed General Plan revises the existing "2020 General Plan" land use map and includes elements required by the State of CA and optional elements. Buildout of the proposed General Plan would result in approximately 5,229 additional dwelling units and 4.4 million additional sf of nonresidential uses in La Habra. The planning area for the proposed General Plan includes both the City of La Habra and its sphere of influence.	EIR	11/04/2013
2013092038	River Pines Public Utility District Water Rights Extension State Water Resources Control Board --Amador, El Dorado The project is located in the community of River Pines, Amador County and El Dorado County, CA and lies within Section 14, T8N, R11E, MDB&M and Meridian shown on the "Aukum, CA" U.S. Geological Survey (USGS) 7.5 minute topographic quadrangle (Figure 1). The project site is at the RPPUD water extraction and treatment facilities property, 15077 Shenandoah Valley Road (APN No. 014-085-006-000), (Figure 2). The point of permitted water diversion is located East 850 feet and North 3,200 feet from SW corner of Section 14 in the SW 1/4 of NW 1/4 of Section 14, T8N R11E MDB&M.	EIR	11/04/2013
2013091063	"Beacontree Lane" / Project No. R2008-00493 / Case Nos. RVAR 200800014; RENV 200800039 Los Angeles County Calabasas--Los Angeles The project proposal is to construct a new single-story residence atop a graded pad in the Santa Monica Mountains. Pad location is over a delineated ridgeline of the Santa Monica Mountains North Area Plan, adopted on October 24, 2000. Pad was created with an approved grading permit, finalized in 2001. The Santa Monica Mountains North Area Community Standards District (CSD) was adopted on August 20, 2002 and amended with a Significant Ridgeline Protection section adopted on December 7, 2004.	MND	10/21/2013
2013091066	Middle School 5 Redlands Unified School District Loma Linda--San Bernardino Redlands Unified School District (RUSD) proposes to construct a new public middle school facility for 6th through 8th grade students with a student capacity of ~ 1,330 students, ~60 staff. The new school facilities would consist of a total of six buildings totaling 73,540 sf. The buildings would include an administration	MND	10/21/2013

	building, library and media room: multipurpose building with a kitchen, two classroom building clusters (24 standards classrooms, 10 science and art classrooms, and 2 locker rooms), and a technology building with 6 classrooms. The project would also include the future addition of ~16,000 ft. of classroom space to the northern classroom building cluster to accommodate potential future with RUSD does not anticipate the project starting until 2018 or later. Assuming construction begins in 2018, the school would be expected to open sometime in 2020.		
2013092039	Spanish Ranch Road Bridge (No. 9C-0039) Replacement Project Plumas County --Plumas The Plumas County Department of Public Works proposes to replace the existing Spanish Ranch Road Bridge (9C0039) over Spanish Creek approximately 5 miles west of the unincorporated community of Quincy in rural Plumas County. The existing bridge is a 50 foot long single-lane bridge with steel stringers and a laminated timber deck. The proposed new bridge will occupy essentially the same alignment as the existing structure. It will be 114 feet long and 29 feet wide with metal tube bridge railings mounted on curbs. The new bridge approaches will be approximately 125 feet in length and will conform back to the existing roadway.	MND	10/21/2013
2013091065	North Pleasant Valley (NPV) Treatment Facility Camarillo, City of Camarillo--Ventura Note: Reference SCH# 200841159 The proposed project consists in the construction and operation of a reverse osmosis groundwater treatment facility including the drilling of two new wells, installation of pipelines necessary distribution of raw well water product water, and brine. The proposed facility's average design capacity is 4,700 gallons per minute or 7,500 acre-feet year. The proposed facility would provide treatment water to drinking water customers served by the City of Camarillo. The proposed facility's treatment includes: filtration, reverse osmosis, and disinfection. Brine generated from the treatment would be discharged into the Calleguas Salinity Management Pipeline (SMP) located along Lewis Road.	NOP	10/21/2013
2013091069	General Plan Update and Sphere of Influence Expansion Project San Joaquin, City of San Joaquin--Fresno The project is the update of the San Joaquin General Plan with a planning horizon to 2030. The comprehensive update includes the seven mandates elements as well as economic, public facilities, community design, and health elements. Also included in the project is a proposed expansion of the Sphere of Influence as adopted by the Fresno LAFCO. The SOI would be expanded from 962 acres to 2,097 acres. The General Plan land use element includes land use designations for the existing City as well as the SOI expansion area. The holding capacity of the General Plan is estimated to be 18,000 at build-out of the plan.	NOP	10/22/2013

	and sidewalks and associated drainage improvements from McGowan Parkway on the south end to 7th Avenue on the north end of Olivehurst Avenue. Instream work will occur at Clark Slough where the culverts will be extended or replaced. The extension or replacement includes 9 feet on the east side of Olivehurst and 14 feet on the west side plus 10 feet of rip rap on the up and downstream side of the new culverts. Culvert extension will match the invert elevation of the existing culverts. Minor excavation of the Clark Slough may be required to install the extensions.		
2013041022	Nimitz Marine Facility (MarFac) Berthing Wharf and Pier Replacement Project University of San Diego San Diego--San Diego The proposed project would replace the existing 18,250 square foot pier and 9,517 square foot wharf at Scripps Institution of Oceanography's Nimitz Marine Facility (MARFAC) in Point Loma, San Diego Bay with a facility of similar size/shape, as well as associated utility upgrades.	NOD	
2013042042	Smith Road Culvert 0.35 Santa Cruz County Watsonville--Santa Cruz The project is limited to the replacement of a 42-foot by 48" by 57" HDPE culvert. During a storm event, high water flows caused failure of the cross-culvert and undermined a portion of the roadway. The repair will replace the culvert with one HDPE pipe of the same dimensions and repair existing headwalls. The damaged roadway area (30' length, 4' width and 12' depth) will be backfilled with compacted soil, 25 cubic yards of concrete slurry and 2 tons of asphalt concrete. Exposed bare earth areas will be seeded with a native plant seed mix.	NOD	
2013042043	Paulson Road Culverts Santa Cruz County Watsonville--Santa Cruz The project is limited to the replacement of two corrugated metal pipe (CMP) culverts on Paulson Road. Both culverts are in a state of collapse due to undermining and have begun to compromise the integrity of the roadway. Both culvert replacements will require reconstruction of roadside slopes and concrete headwalls at culvert inlets and outlets. Both culverts shall be replaced with HDPE culverts of equivalent size or greater. The CA DFW is executing a Lake and Streambed Alteration Agreement Number 1600-2012-0390-R3 pursuant to Section 1602 of the Fish and Game Code to the project Applicant, Joel LaCagnin, Santa Cruz County Department of Public Works.	NOD	
2013042043	Paulson Road Culverts Santa Cruz County Watsonville--Santa Cruz The project is limited to the replacement of a 40-foot long by 3-foot diameter corrugated metal pipe (CMP) culvert with a 5-foot invert below road level located on Paulson Road, reconstruction of the slopes and concrete headwalls at the culvert inlet and outlet, and repair of the roadway. The culvert is undermined at the base and has begun to collapse causing undermining of the roadway. Culvert replacement will require reconstruction of roadside slopes and concrete headwalls. The culvert will be replaced with an HDPE culvert of equivalent size or greater.	NOD

The port of Stockton will dredge the docks to a depth of 35 feet below lower low water. Dredging activities will remove a maximum of 100,000 cubic yards of material, from approximately 13.61 acres. Materials will be removed with a hydraulic dredge and transported to Roberts Island No. 1 dredged placement site. Issuance of a Streambed Alteration Agreement Number 160-2013-0243-R3 is pursuant to Fish and Game Code Section 1602.</p>	NOE	
2013098259	<p>Elkhorn Irrigation Inlet Sediment Removal Fish & Wildlife #2 West Sacramento--Yolo</p> <p>The project is limited to removal of accumulated sediments from the mouth of either diversion inlet using an extended reach excavator or a dragline in order to allow water to reach diversion pumps and in the back end of each inlet. This work is only performed during low water years when river flows do not over-top accumulated sediments. Accumulated sediments are removed from the back of the inlets, moving toward the mouth in order to minimize turbidity in the river channel with breakthrough to the channel.</p>	NOE	
2013098260	<p>Line 21C-15 Replacement Project Fish & Wildlife #3 Santa Rosa--Sonoma</p> <p>The project shall replace an approximately 12-inch diameter, 0.9 mile long section of Gas Line 021C (L-021C), a natural gas pipeline. The replacement of L-21C will be performed primarily by directed burial in open trenches. At Santa Rosa Creek, an 800-foot section of pipe will be replaced via horizontal directional drilling (HDD) beneath Santa Rosa Creek. At this location, entrance and exit bore holes will be dug in landscaped areas no less than 200 feet from the Santa Rosa Creek bank and shall not impact riparian vegetation. A frac-out contingency plan has been prepared to respond and minimize potential impacts in the event of a frac-out that may impact Santa Rosa Creek. Issuance of a Streambed Alteration Agreement Number 1600-2013-0294-R3 is pursuant to Fish and Game Code Section 1602.</p>	NOE	
2013098261	<p>Gas Pipeline 21 F ECDA Dig-Vineyard Creek Project Fish & Wildlife #3 Novato--Marin</p> <p>The Project will excavate and approximately 14-foot long, 8-foot wide, and 8-foot deep trench within the bed and banks of Vineyard Creek to expose an existing natural gas pipeline for inspection and repair as needed. Once the excavation is approximately 3.5 feet deep, shoring will be installed to prevent the excavation from collapsing. Prior to construction, an approximately 100-foot long and 15-foot wide (0.034 Acres) area will be isolated from the active channel. The isolated area will allow a small rubber tracked elevator and construction personnel to access the site. The excavator will access the channel from the top of bank approximately 60 feet upstream of the proposed dig site. Equipment and excavation spoils will be staged above the top of bank in the adjacent upland area. All work will occur when there is no or low flow in the active channel. Two multi-stemmed willow trees will be trimmed for equipment access. Issuance of a Streambed Alteration Agreement Number 1600-2013-0270-R3 is pursuant to Fish and Game Code Section 1602.</p>	NOE

2013098276	<p>Tidelands Use and Occupancy Permit to Chris W. Snow and Mary A. Bridgen for 945 Square Feet of Tideland Area San Diego Unified Port District San Diego--San Diego</p> <p>The proposed project is a tidelands use and occupancy permit (TUOP) to Chris W. Snow and Mary A. Bridgen (tenant) for their use of approximately 945 square feet of tideland area located easterly of 668 San Antonio Avenue in the City of San Diego. The tidelands area proposed for use under this TUOP would be used only and exclusively for the purpose of vehicular parking and access as an authorized vehicle and subsurface sewer lateral for the residence at 668 San Antonio Avenue. The TUOP does not allow activities or potential future improvements of the tenant to interfere with the use and enjoyment of the tidelands area to and from the La Playa path by the general public, including emergency and authorized vehicles. Additionally, no new development, construction, or increase in the size of the property is proposed or authorized as part of this TUOP.</p>	NOE

2002101020	High School 5 Irvine, City of Irvine--Orange Note: Shorten Review IUSD proposes to construct and operate a comprehensive high school housing 2,600 students with various recreational amenities such as main and practice gymnasium, 2,940-seat stadium with nighttime lighting and PA system, 720-seat performing arts center, aquatics complex, hard courts, tennis courts, and softball/baseball fields.	EIR	10/22/2013
2011071036	Summerland Community Plan 2013 Update - SEIR Santa Barbara County --Santa Barbara The project proposes to amend the Summerland Community Plan and County Code Chapter 35, Zoning and replace the 1992 Design Guidelines with separate commercial and residential design guidelines. Amendments to Chapter 35 will implement Summerland Community Plan policies, development standards, actions, and Design Guidelines.	EIR	11/06/2013
2013091068	Castroville Bicycle/Pedestrian Path and Railroad Crossing Project Monterey County --Monterey The project proposes a new 3,878-foot (0.74-mile) Class I Bicycle and Pedestrian Path from McDougall Street to Castroville Boulevard. The proposed bike path will include a new pedestrian/bicycle bridge, approximately 1,170 ft in length, over the UPRR track and right of way, to provide a convenient and safer railroad crossing for bicyclists and pedestrians. The proposed project will require a Local Coastal Plan Amendment and Combined Development Permit, including a Coastal Development Permit and Use Permit (PLN130153).	MND	10/22/2013
2013091073	Mormann Lot Line Adjustment / SUB2008-00039 San Luis Obispo County San Luis Obispo--San Luis Obispo A request by Kerry Mormann for a Lot Line Adjustment (SUB2008-00039) / COAL 08-0145) to adjust the lot lines between three parcels of 3.19, 62.81, and 19.24 acres each for the purpose of sale and/or development. The adjustment will result in three parcels of 32.0 (Parcel 1), 29.0 (Parcel 2), and 24.2 (Parcel 3) acres each. The project will not result in the creation of any additional parcels. A 2.3 acre building envelope is proposed for Parcel 1, a 1.7 acre building envelope for Parcel 2 and a 1.6 acre building envelope for Parcel 3.	MND	10/23/2013
2013092040	Citrix Office Development Santa Clara, City of Sunnyvale--Santa Clara Architectural review for new construction of a 170,689 sf five-story office building in conjunction with demolition of existing 71,000 sf office building and addition of two parking levels to an existing three level parking garage. The project includes a modification increase maximum building height from 70' to 85', reduce parking standard stall dimensions from 9'x18' to 8.5' to 16' and reduce parking req. from 1,503 to 1,493 parking.	MND	10/22/2013

2013092042	<p>Sharp Park Safety, Infrastructure Improvement, and Habitat Enhancement Project San Francisco, City and County of Pacifica--San Mateo</p> <p>The proposed project consists of: 1) construction of a perennial pond, approximately 1,600 sf in size, located approximately 400 to 500 feet southeast of Horse Stable Pond (HSP); 2) realignment of a portion of an existing golf cart path located west of the fairway for golf course hole number 14 and east of the tee box for golf course hole number 15; 3) removal of sediment and emergent vegetation within HSP and the connecting channel that links HSP and Laguna Salada (LS); 4) construction of a maintenance walkway approximately 4.6 feet in width at the existing HSP pumphouse; 5) replacement of a wooden retaining wall near the pumphouse with a concrete retaining wall at the existing PSP pumphouse; and 6) construction of steps from the access road to the existing HSP pumphouse.</p>	MND	10/22/2013
2013091070	<p>SDG&E Master Special Use Permit (MSUP) and Permit to Construct (PTC) Power Line Replacement Projects Public Utilities Commission Pauma Valley--San Diego, Orange</p> <p>SDG&E's proposed MSUP/PTC Power Line Replacement Projects would consolidate over 70 previously issued special use permits for SDG&E facilities with the U.S. Forest Service (Forest Service) administrative boundary of the Cleveland National Forest (CNF) into one MSUP. The MSUP would allow the continued operation and maintenance of SDG&E's existing 69 kV transmission line (TL) also referred to as power lines, 12 kV circuits (C) also referred to as distribution lines and ancillary facilities, as well as approximately 45 miles of existing access roads require to maintain and operate SDG&E electric facilities within the CNF, specifically with the Trabuco Ranger District in Southern Orange County, CA, and the Palomar and Descanso Ranger Districts in unincorporated areas of San Diego County, CA.</p>	NOP	10/22/2013
2013091071	<p>Los Osos Community - Wide Habitat Conservation Plan and Implementing Agreement San Luis Obispo County --San Luis Obispo</p> <p>The purpose of issuing a programmatic incidental take permit is to allow the County to authorize the covered activities while conserving the covered species and their habitats. Implementation of a programmatic, multi-species Habitat Conservation Plan, rather than a species-by-species or project-by-project approach, will maximize the benefits of conservation measures for covered species and eliminate potentially expensive and time-consuming efforts associated with processing individual incidental take permits for each project within the proposed Habitat Conservation Plan area. It is important to note that completion of the Los Osos wastewater treatment plant, rather than adoption of the Habitat Conservation Plan and Issuance of the incidental take permit(s) to the County, is the action that will trigger lifting of the moratorium and allow new or expanded development to proceed subject to receipt of the required permits. Adoption of the Habitat Conservation Plan and issuance of the incidental take permit(s) would facilitate a streamlined permitting process and also provide a cohesive conservation strategy managed by one entity with a single funding source, but is not a requirement for activities covered in the Habitat Conservation Plan to proceed.</p>	NOP	10/22/2013

2013092043	Heritage Park Dublin, City of Dublin--Alameda On November 20, 2012, the Dublin City Council adopted a resolution approving the initiation of a General Plan and Specific Plan Amendment Study to change the land use designation from Retail/Office to Medium Density Residential. Following demolition of the Heritage Park Office Complex, the 6.6 acre project site would be developed with 54 small-lot single-family homes on 5.85 acres, and a three story 14,000 sf office building on the remaining 0.75 acres. The proposed project also includes relocation of an existing cell tower within the project site.	NOP	10/22/2013
2013092041	Robert Boucher - Minor Subdivision - MS1401 Del Norte County Crescent City--Del Norte Minor Subdivision of a 16,830 sf Lot into Two Parcels. This project is the split of one parcel into two parcels. Presently the parcel is developed with two residences. The subdivision would result in each resulting parcel being developed with one of the existing residences - no development would occur or be possible as a result of this subdivision. If approved, proposed Lot A would be 10,047 sf and Lot B would be 6,783 sf. An existing shed would be removed as a condition of approval; all other structures would meet the required construction setback. Parcels utilize public water and public sewer services. Access to each parcel is from Barker Street.	Neg	10/22/2013
1996052075	South Sacramento Corridor Phase 2 Extension 69 kV Transmission Line and Joint Pole Facilities Relocation Sacramento Regional Transit District Sacramento, Elk Grove--Sacramento To construct a retaining wall with a length of 103 and height of eight feet that encroaches eight feet into the south bank of Unionhouse Creek to support a portion of the inbound platform of the Center Parkway Light Rail Station.	NOD	
2001072089	West Shore Bike Path Project: Homewood Area Tahoe City Public Utility District --Placer The Homewood Bike Trail Project involves the award of up to \$500,000 for site improvement activities to the Tahoe City Public Utility District to construct a Class 1 bicycle and pedestrian path with a short Class 3 connection within the project area.	NOD	
2002042115	Stone Point Roseville, City of Roseville--Placer The proposed project is for the development of a gated community with 186 detached dwelling units by Taylor Morrison Homes, a 2 acre park and a bicycle and pedestrian trail connection within the Stone Point Master Plan area. A Rezone (RZ), General Plan Amendment (GPA) and Specific Plan Amendment (SPA) will change the zoning and land use designation on the park site (Lot 10a) to slightly reconfigure the boundaries. The RZ, GPA and SPA will also allow for 6.34 acres to be changed from Attached Housing (R3) and Medium Density Residential (MDR) to Open Space (OS) and to correct the zoning and land use on the overlook lot (Lot 10b). The SPA will also allow for revision to the Stone Point Master Plan to address the proposed project.	NOD

2013082049	Edwards Annexation Project The Westside Irrigation District Tracy--San Joaquin The project will consist of the annexation of approximately 234.60 contiguous acres of property into the District.	NOD	
2013098277	Maintenance and Rehabilitation of Highway - 4G700/041200002663 Caltrans #4 Fremont--Alameda Directors Orders for Proposed highway maintenance includes grouting, grind AC pavement and overlay with AC. The project is to preserve and maintain the safety and integrity of the Highway.	NOE	
2013098278	Campground Sewer Manholes Replacement Parks and Recreation, Department of --Santa Cruz Replace ten (10) failing manholes due to sewer gases eroding the concrete structure of the manholes and the material falling into the sewer channel causing blockages with a potential to cause a system failure to the septic system located at Henry Cowell Redwood State Park.	NOE	
2013098279	Intake Pumping Plant 2.4 kV Power Line Relocation-- Final Design Phase Metropolitan Water District of Southern California --San Bernardino The project consists of relocation of an existing power line to a new alignment that will facilitate maintenance and repairs. The existing line will be relocated from steep mountain slopes to areas adjacent to patrol and maintenance roads within existing Metropolitan fee property. The relocated power line will be approximately 2.5 miles long. Each pole will be fabricated of galvanized steel and will be approximately 40 feet in height. Planned final design phase activities include design of the overhead electric lines per the National Electric Safety Code and state of California Regulations, design of pole foundations and temporary systems during construction, preparation of drawings and specifications, receipt of competitive bids, and all other activities in advance of award of a construction contract.	NOE	
2013098280	Final Design of Two Projects to Improve the Electrical System at the Joseph Jensen Water Treatment Plant Metropolitan Water District of Southern California --Los Angeles Final design on two electrical system improvement projects at Joseph Jensen Water Treatment Plant, that will consist of replacing aging electrical equipment, providing backup for potential component failures, and upgrading the electrical system to be consistent with modern codes and industry practices.	NOE	
2013098281	Engineered Soils to Remove Barriers to Low Impact Development (LID) California State University, Sacramento Sacramento--Sacramento The goal of this project is to develop design specifications for engineered soils through the use of column studies. The purpose of the design specifications is to address specific constraints that limit LID implementation. The column studies will be conducted at an existing research site.	NOE

<u>Documents Received on Monday, September 23, 2013</u>			
2013098282	Administrative Zoning Permit No. 30 - Las Palmas Overheight Fence El Cajon, City of El Cajon--San Diego The permit the construction of a retaining wall and fence with a combined height up to 9 feet for the purpose to support a newly graded property and provide privacy fences for single-family residences.	NOE	
2013098283	Fairview Dam Resurfacing and KR3 Intake House Repair Project; Agreement 1600-2013-0088-R4 Fish & Wildlife #4 --Kern The Project includes resurfacing of Fairview Dam, repairing erosion on a concrete retaining wall on the intake housing, replacement of the current concrete block Control House, installation of boulder rip-rap at the toe of Fairview dam, and filling of cracks and depressions in the streambed near the calibrated flume.	NOE	
2013098284	Agreement 2013-0069-R4 - Santa Rita Creek Urban Greening Project Fish & Wildlife #4 Monterey--Monterey The Project consist of restoring the degraded, channelized Santa Rita Creek in an urbanized setting where it flows between an existing baseball field and residential housing for approximately 1025 feet. Methods used will include planting native riparian habitat where vegetation is currently lacking or is dominated by non-native annuals, restoring bankfull channel and activating floodplain hydraulics where the creek has been channelized to minimize downstream velocities and capture sediment, and stabilizing stream banks that are devoid of vegetation and are eroding.	NOE	
2013098285	Esterlina Vineyard Bank Restoration Project Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa Ukiah--Mendocino The primary purpose of the Project is to remedy the Notice of Violation and restore 170 linear feet of creek bank and bed damaged during the April 27, 2012, unauthorized discharge. The project involves restoration of creek bank using rock slope protection (RSP) with live willow plantings within the RSP, live willow mattress, native tree plantings on hillslope, temporary irrigation to maintain plantings until established and exposed areas will be seeded with native grasses.	NOE	
2013098286	Plant Sciences, Inc., Juniper Village Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa --Siskiyou Proposed farm labor housing development to consist of 21 pre-manufactured units that will accommodate 10 employees each. Wastewater treatment will include primary septic tanks and Advantex treatment units followed by leachfield disposal. Final treated wastewater effluent shall not exceed 10 mg/1 nitrogen.	NOE	
2013098287	State Route 99 Distressed Pavement Repair Caltrans #6 --Tulare Replace the existing distressed pavement on SR-99 by removal and replacement of failed pavement sections to the edge of existing travel way, where no shoulder work is proposed. The project would not require work outside of the existing right-of-way, therefore no acquisition of right-of-way is required.	NOE

2013098288	Slenna Court Residences Regional Water Quality Control Board, Region 1 (North Coast), Santa Rosa Healdsburg--Sonoma The project involves installation of culvert across a small tributary to Foss Creek as part of a single family residence driveway.	NOE	
2013098289	Searsville Dam Plunge Pool Dewatering for DSOD Inspection Fish & Wildlife #3 --San Mateo Dewatering existing plunge pool at the base of Searsville Dam by Stanford University to allow Division of Safety of Dams inspectors to evaluate the integrity of the dam. The project will be completed in accordance with SAA #1600-2012-0321-R3.	NOE	
2013098290	Stuhlmuller Driveway Culvert Fish & Wildlife #3 Healdsburg--Sonoma The project is limited to the installation of two side-by-side 54-inch diameter by 65-foot long corrugated high-density polyethylene (HDPE) culverts, in a stream with seasonal hydrology, as part of a new residential driveway. A limited amount of rock riprap will be placed at the inlet and an approximately 10-foot long by 16-foot wide area of rip rap placed at the outlet of the culvert to serve as an energy dissapater and reduce erosion. Two existing live oaks with a diameter of 6-inches and 12-inches at breast height (DBH()) will be removed to make way for the culvert crossing. SAA # 1600-2013-0279-R3.	NOE	
2013098291	115 Lawndale Road Bridge Fish & Wildlife #3 --Sonoma The project is limited to the decommissioning of dry ford crossing and the installation of a new bridge crossing to replace it. Dry Ford Decommissioning: The decommissioning of the existing dry ford crossing will consists of removing all the loose soil currently present within the stream channel as a result of vehicle traffic and recontouring the stream bank to match upstream and downstream contours. The exposed soils will be seeded and mulched and will have straw wattles installed prior to the first rain. Bridge installation: A 30-foot long prefabricated bridge with steel I-beam construction will be installed to replace the crossing.	NOE	
2013098292	Fryer Creek Cleanup Fish & Wildlife #3 Sonoma--Sonoma The project is limited to the removal of cattails, blackberry and other miscellaneous debris along an approximately 600-foot long section of stream channel in Fryer Creek. While this stream is typically culverted through the town of Sonoma, it is daylighted along the section in which vegetation removal is proposed. The project is intended to improve stream capacity and reduce overbank flooding that impacts an adjacent shopping center and elementary school.	NOE

	originally approved. The two interim access scenarios include: 1) the Market Street Connection Option; and 2) the Arch/13th Street Connection Option. The proposed modification would postpone the full extension of Dockweiler Drive and full build out of the Master Plan, with the except of the new dorm.		
2013091076	Stockdale Integrated Banking Project Rosedale-Rio Bravo Water Storage District --Kern The Rosedale-Rio Bravo Water Storage District, as the Lead Agency, in consultation with the Irvine Ranch Water District (IRWD), as the Responsible Agency, proposes the Stockdale Integrated Banking Project. The proposed project would be located on three properties in the vicinity of Stockdale Highway and Enos Lane (Hwy 43). The proposed project would develop groundwater banking facilities, including recharge basins and groundwater production wells, on the three properties. The proposed project would augment the recharge and extraction capacity of Rosedale's existing Conjunctive Use Program and provide greater operational flexibility. The proposed project would also enhance water supply reliability for IRWD by providing contingency storage to augment supplies during dry-year periods when other supply sources may be limited or not available.	NOP	10/23/2013
2013092047	UCSF Long Range Development Plan University of California, Regents of the San Francisco--San Francisco In support of its mission, the University of California, San Francisco (UCSF) proposes a new Long Range Development Plan (LRDP) to guide future campus growth the development over a 20+ year planning horizon through the year 2035. The LRDP will develop land use maps, or "functional zone" maps for each major campus site, that will guide capital construction and infrastructure development to accommodate a building program for campus growth. An LRDP is defined by statute (Public Resources Code Section 21080.09) as a "physical development and land use plan to meet the academic and institutional objectives for a particular campus or medical center for public higher education." Various projects are also proposed.	NOP	10/23/2013
2013092048	The Landing at Walnut Creek Apartments Walnut Creek, City of Walnut Creek--Contra Costa The proposed project would involve construction of 178 market-rate rental apartment units in one building. The project would demolish the existing residential buildings & remove all existing vegetation. Project requires a General Plan Amendments to change in the designation from MFVH (Multifamily Very High, 30.1-50 dwelling units per acre) to MFSH (Multifamily Special High, 50.1-100 du/ac) and General Plan 2025 Height Map change from 50 feet to 60 feet, consistent with the Measure A height limit of 89 feet. Project requires a Zoning Ordinance Amendment from Multi-Family Residential (M-1) to Planned Development (PO) to accommodate the higher density.	NOP	10/23/2013

	single-family residences at a density of 4.20 units per acre.		
2013091080	Oceano Dunes District Pismo Creek Estuary Seasonal Bridge Project Parks and Recreation, Department of Pismo Beach--San Luis Obispo The C DPR, Off-Highway Motor Vehicle Recreation Division proposes to install a seasonal, (spring, summer, fall), floating pedestrian bridge across Pismo Creek Estuary to provide pedestrian access from the Pismo Coast RV Resort to Pismo State Beach. The bridge would be an eight-foot wide, pontoon-style bridge with interlocking modules, handrails, and abutments. The abutments would be supported using two helical anchors at each abutment. The bridge would be installed when flows would not threaten to undermine the abutments or wash out of the bridge. If installed, the bridge would be removed for any event that could threaten to undermine the abutments or wash out the bridge.	MND	10/24/2013
2013091081	San Luis Rey Wetland Restoration/Mitigation Bank Oceanside, City of Oceanside--San Diego The proposed project involves the restoration of a riparian river corridor and floodplain along a portion of the San Luis Rey River. The project area includes the restoration area and several soil placement sites for a total project area of approximately 150 acres. Implementation of the project would require the removal of the fill, and its relocation to adjacent farm fields and agricultural areas (soil placement sites). The restoration area within the floodplain would be permanently protected with a conservation easement or other restriction which would prohibit future development activities. The project is intended to provide a designated area for compensatory mitigation that may be required by federal, state, and local agencies as compensation for unavoidable impacts to wetlands as a result of other actions approved by such agencies.	MND	10/25/2013
2013092049	Cascade Shores Community Leach Field Project Nevada County Nevada City--Nevada Construct a community septic system and related infrastructure. The purpose of the project is to decommission the existing Cascade Shores Wastewater Treatment Facility (CS-WWTF) and to transport wastewater flows from the Cascade Shores service area to a new community septic system located at APN: 38-570-04. Construction will consist of a sewer lift station, conveyance forcemain, leachate tanks, and related leach field pipes, motor control center and emergency generator. This project has been identified to reduce the cost of operation for the cascade shores residents while improving water quality. Over the past several years, the existing treatment plant has been unable to meet new permit limits for the copper effluent. Abandonment of the plant will lead to an elimination of discharging into Gas Canyon Creek while meeting discharge requirements for land application.	MND	10/24/2013
2013092050	Newcastle Storage Yard (PMPA 20080121) Placer County --Placer The project proposes the approval of a Minor Use Permit for a Contractor's Storage Yard that includes construction of a 4,500 sf metal building, and approximately 11,000 sf of outdoor storage of large equipment, and 3,700 sf of outdoor storage for materials. 	*Elk Reserve Turnouts		
	*West Side Canal Lining		
	*Semitropic Pipeline Turnout		
	<p>The Elk Reserve Turnouts consist of constructing three turnout connections along the eastern side of the East Side Canal to provide water to the Tule Elk State Natural Reserve. The three turnouts are termed the SWP BV2 Turnout, the Well 2 Turnout, and the Booster Pump Turnout.</p>		
	<p>The District's West Side Canal Lining consists of constructing and operating a turnout from Semitropic Water Storage District's existing ten-foot diameter pipeline (referred to as the Semitropic Pipeline) to the West Side Canal. Operation of the Semitropic Pipeline Turnout will eliminate the need for District use of up to 2.5 miles of the West Side Canal, thus reducing water seepage and evaporation over that length of the West Side Canal.</p>		
2013099022	Operation of a 1.5 Million Gallon Water Storage Tank 1, Station 68 Salinas, City of Salinas--Monterey The California Department of Public Health (Department), as the responsible agency, will be issuing a water supply permit. The California Water Service Company - Salinas proposed project was for the construction of 1.5 million gallon storage tank.	NOD	
2011128243	Consolidation of Arnold Park with City of Hollister Feasibility Study Public Health, Department of Hollister--San Benito The California Department of Public Health (Department) is the lead agency. The Department's Safe Drinking Water Proposition 84 Program will be providing state funds for the project at a future date. Arnold Mobile Home Park proposes to consolidate with the City of Hollister; approximately 1,400 feet of 8-inch pipeline and appurtenant structures will be constructed.	NOE	
2013098334	Upp Road Gully Stabilization Project Fish & Wildlife #3 Sebastopol--Sonoma The project is limited to the stabilization of a gully, headcut, and stream bank on a small stream with seasonal hydrology that is a tributary to Green Valley Creek. The erosion occurring along the stream is causing loss of property and is a significant source of excess sediment to the watershed. The project will stabilize the gully, headcuts and streambank through a combination of excavation of unstable materials and placement of fill and rock armor within the stream channel to prevent further incision and headcutting of the channel.	NOE	
2013098335	Administrative Zoning Permit No. 29 El Cajon, City of El Cajon--San Diego The project authorizes a nine foot high retaining wall, topped by a six foot high privacy fence, for a combined height of fifteen feet, on the rear property line of an existing single family residence. The property is surrounded by single family residences on the sides and a church adjacent to the rear property line.	NOE

2013091083	Terracina Specific Plan Project Lake Elsinore, City of Lake Elsinore--Riverside The Terracina Specific Plan Project consists of a residential development with approximately 76.5 acres of residential, 22 acres of open space, 22.5 acres of roadways, 1.6 acres of park, and 28.2 acres of graded slopes and basins. The Specific Plan has proposed two housing options. The IS analyzes the higher density option of 499 residential units (448 single-family detached units and 51 multi-family attached units) while the currently proposed Tentative Tract Map shows the lower density option of 468 units. The project requires approvals from the City including rezoning from Single-Family Residential to Specific Plan, approval of a tentative tract map, and construction/development permits.	MND	10/25/2013
2013091087	Planned Development No. 1, Parcel Map No. 19496 Redlands, City of Redlands--San Bernardino The proposed project consists of constructing of a 771,839 sf warehouse distribution center on approximately 35.59 acres located on the east side of CA Street, the south side of Almond Avenue and the north side of Lugonia Avenue in the EV/SD District East Valley Corridor Specific Plan. Parking for the building will include 154 automobile parking stalls and 274 trailer parking stalls. The maximum building height is proposed to be forty four feet. The East Valley Corridor Specific Plan encompasses a number of planned	MND	10/25/2013

2007062006	Rio Dell Wastewater Reuse Project Rio Dell, City of Rio Dell--Humboldt The City of Rio Dell is proposing a modification to the Dell Rio Wastewater Reuse Project. The alignment and methodology of the sewer transmission pipeline where it crosses the Eel River, northwest of the City of Rio Dell, are proposed to be modified. Rather than crossing the Eel River within the southbound highway 101 bridge, the pipeline is proposed to cross underneath the Eel River using horizontal directional drilling techniques. This represents a minor change to the pipeline alignment of treated effluent reuse Option Reuse 1A as evaluated in the 208 Certified EIR. No other change to the Rio Del Wastewater Reuse Project is proposed. The State Lands Commission action is a 25 year General Lease--Public Agency Use through August 23, 2038.	NOD	
2010122012	300 Airport Boulevard Burlingame, City of Burlingame--San Mateo The application proposes to develop a new office/site science campus, consisting of two 5-story buildings, one 7-story buildings and one 8-story buildings totaling 730,000 square feet, a two-story amenities building, a 5.5 level parking structure, realignment of Airport Boulevard, and Bay Trail improvements and connections on 18.13 acres. Applications include amendments to the Bay front Specific Plan to increase the allowable floor area ration (FAR) from 0.6 FAR to 1.0 FAR, rezoning of a small portion of the site from APS to APN, amendments to APN zoning district regulations and sign code, vesting tentative parcel map, development agreement, conditional use permit for day care use and commercial design review. The changes to the Bay front Specific Plan and the Anza North Point zoning district regulations would apply to the entirety of the APN subarea and zoning district, which includes the 300 Airport boulevard site and an adjacent undeveloped 8.58 acre area, the 350 Airport boulevard site. The State Lands Commission action is a 49 year General Lease--Recreational and Protective Structure Use through 2062 for the reconstruction of a portion of the existing airport road to be part of the San Francisco Bay Trail, construction of a private driveway to Fisherman's Park including public and commercial parking, and future alignment of Airport road. 	carry out the project without any net increase in the amount of existing land coverage in the hydrologic ally-related area.		
2013098371	Fort Sage Special Recreation Management Area (SRMA) Acquisition Parks and Recreation, Department of --Lassen The project consists of the activities required for acquisition of 320.88 acres of private land that is next to BLM lands already open to OHV use. Unauthorized OHV use currently takes place on the private parcel. The acquisition will cause no adverse effect on the physical environment.	NOE	
2013098372	Bureau of Land Management (BLM) - Travertine Hot Springs Area Restoration Parks and Recreation, Department of --Mono The Project will permanently close multiple roads and parking areas in sagebrush habitat and in a seasonal wet alkali meadow to motorized use. The purpose of the project is to restore natural resources systems damaged by vehicle use. Treatments include barricading motorized access by placing large native rocks, fencing, vertical mulching, seeding of native vegetation, interpretive and educational panels of BLM's actions, and public outreach.	NOE	
2013098373	Bureau of Land Management (BLM) - Bishop, Restoration Wild Willies Parks and Recreation, Department of --Inyo The project will permanently close a one-mile, dead-end road to motorized use. The purpose of the project is to improve sage grouse habitat in the area. Implementation of the project will also eliminate access to a seasonal wet meadow where vehicles are driving and camping. The project is located in Long Valley, an area of habitat containing meadows and sage steppe that is preferred for foraging and brood-rearing by sage grouse. Treatments include barricading motorized access by placing large, native rocks, vertical mulching, seeding of native vegetable, interpretive and eductional panels of BLM's actions, and public outreach.	NOE	
2013098374	Bureau of Land Management, Bishop\ -Route Map Digitizing for Restoration Planning Parks and Recreation, Department of Bishop--Inyo, Mono The project will digitize the Travel and Transporation Management (TTM) route maps that are authorized as the TTM system under the 1993 Bishop RMP and create a layer in Arc GS. Completion of the project will allow the Bishop BLM to conduct condition surveys of all routes, prioritize restoration projects, and determine restoration needs and techniques.	NOE	
2013098375	Bureau of Land Management - Restoration Volcanic Tableland Parks and Recreation, Department of Bishop--Inyo, Mono The project will permanently close duplicate, volunteer motorized roads and return land, plant communities, and plant covers to conditions comparable to those of surrounding lands. Several roads lead to a staging/camping space. Vehicles have created new routes and begun parking outside the previously disturbed area, which is damaging natural and cultural resources. The project will close all ancillary or duplicate roads, leaving the main road open, and ring the staging/camping site with large rocks to contain vehicles.	NOE

2013104001	Restoration of Native Species in High Elevation Aquatic Ecosystems Plan National Park Service --Tulare, Fresno Note: Per lead agency The NPS has prepared a draft EIS that analyzes a range of management alternatives for the restoration and conservation of high elevation aquatic ecosystems within Sequoia and Kings Canyon National Parks (SEKI). The Restoration Plan/DEIS is needed to provide long-term management direction to restore and conserve SEKI's high elevation aquatic species and ecosystems. The NPS is considering expanding the current high elevation aquatic ecosystem restoration program within SEKI to encompass additional sites and incorporate alternative treatment methods. The overall goal of the Restoration Plan/DEIS is to create high elevation ecosystems with more favorable habitat conditions for the persistence of native species and ecosystem processes by eradicating non-native fish from selected water bodies within SEKI.	EIS	11/25/2013
2010092076	Proposed City of Elk Grove Sphere of Influence (SOI) Amendment (LAFCO #09-10) Sacramento County Local Agency Formation Commission --Sacramento Final 1 CD/NOA The proposed project consists of a request initiated by the Elk Grove City Council (Resolution #2008-54) to Sacramento Local Agency Formation Commission (LAFCo) to amend to the City of Elk Grove's SOI. The current SOI is coterminous with the City boundary. The application to amend the SOI includes 7,869 acres generally described as the areas south of Bilby Road/Kammerer Road and Grant Line Road. Current City of Elk Grove land use projections indicates that future growth may require additional lands outside of the current city boundary. The City's available residential, industrial, and commercial land inventory is in the process of building out and may be unable to accommodate all anticipated urban growth within the city limits. As a result, the City needs to establish a direction to accommodate its anticipated future growth by designating an area for long-term planning. For purposes of analyzing environmental impacts, LAFCo has developed land use assumptions in the following sections that would allow LAFCo to understand environmental effects that may result from future anticipated growth during future annexations.	FIN	
2013091089	Meadows Community Association (CA American Water) Monterey County Monterey--Monterey Combined Development Permit consisting of a Map Amendment and amended Conservation and Scenic Conservation Easement Dead to allow a: 1) Use Permit for the replacement of two existing 55,000 gallon water storage tanks with two 200,000 gallon water storage tanks and an approximate 120 sf linear retaining wall, approximately 400 cubic yards of cut and fill, and the removal of one 8" Oak Tree and one 20" Oak Tree. 2012072028	2012 Draft Marin County Housing Element Marin County --Marin The purposed of the Housing Element is to achieve an adequate supply of decent, safe, and affordable housing for Marin's resident at all income levels, particularly the workforce, seniors and other special needs populations. The Housing Element assesses housing needs for all income groups and lays out a program to meet those needs. Housing affordability in Marin County and in the Bay Area as a whole has become increasingly important as climate change issues are addressed. A strategic infill approach that supports affordable housing for members of the workforce at selected mixed-use locations near existing jobs and transit, along with an emphasis on green building and business practices offers Marin communities a way to carry out the four E's of sustainability (Environment, Economy, Equity and Education) while also preserving agricultural land, open space, sensitive resource areas and existing single family neighborhoods. As noted above this strategy follows the Countywide Plan goal of focusing what little growth unincorporated Marin is expected to experience within the City-Centered Corridor. This approach has been in effect and adhered to for the past 40 years. The overall goal of the Housing Element is to present goals, objectives, policies, and action programs to facilitate housing for existing and future needs in a balanced way that retains these attributes. 	Hydroelectric Project's license expired on April 30, 2010, and currently operates under annual licenses as the Fire Mountain Lodge Hydroelectric Project undergoes relicensing by FERC. The Fire Mountain Lodge Hydroelectric Project consists of a small existing earth and concrete filled dam, reservoir, penstock, intake tower, powerhouse, and transmission line. The project requires a Clean Water Act, Section 401 water quality certification from the State Water Resources Control Board (State Water Board). Conditions of the water quality certification for the Project include stabilization of the adjacent unpaved road to reduce erosion, installation of flow measurement devices, and minimum streamflow requirements.		
2013062041	Clifton Court Forebay Fishing Facility Water Resources, Department of Byron--Contra Costa DWR proposes installing an Americans with Disabilities Act-compliant (ADA-compliant) fishing pier extending approximately 500 feet into Clifton Court Forebay. Other appurtenant features to be installed include a staging area; a concrete pad and retaining wall; security fencing, and gates; ADA-compliant public restroom; bicycle rack; equipment shed; ADA-compliant boat dock and road section on West Canal; two ADA-compliant parking spaces next to the Clifton Court Forebay public entrance gate; and lighting and signage.	NOD	
2013071093	Rancho Santa Margarita Housing Element Update for 2013-2021 Rancho Santa Margarita, City of Rancho Santa Margarita--Orange General Plan Amendment GPA 12-003 to update the Housing Element of the City of Rancho Santa Margarita General Plan for the 2013-2021 planning period as required by State law.	NOD	
2013081028	Poway Pump Station Secondary Power Source Project Ramona Municipal Water District Poway--San Diego The proposed project is located at the Poway Pump Station at the eastern edge of the City of Poway, in the Blue Sky Ecological Reserve. Lake Ramona is located to the north and Lake Poway is located to the south. The proposed pipeline would be located within an existing dirt access road that is located south of and generally parallels the Green Valley Truck Trail within the Blue Sky Ecological Preserve. The proposed new natural gas powered engine would be located at the existing Poway Pump Station. The Poway Pump Station is located on land owned by the Ramona Municipal Water District. The existing RMWD pipeline easement, which coincides with the dirt access road, traverses land owned by the City of Poway, County of San Diego, and State of California (in association with the Blue Sky Ecological Reserve). 2013098520	NextG/Crown Castle Webster/Posey Distributed Antenna System (DAS) Project Public Utilities Commission Oakland--Alameda Installation of underground fiber optic cable, DAS antenna to improve wireless signal strength and network capacity/coverage.	NOE	
2013098521	Regional University Specific Plan Fee & Reimbursement Program Placer County Roseville--Placer The project proposes a fee and reimbursement program to allow for the project proponent to recover expended monies associated with the development of the Specific Plan and its many associated documents.	NOE	
2013098522	North Fork American River Gage Installation (1600-2013-0148-R2) Fish & Wildlife #2 Auburn--Placer The project is limited to installation of a new stream gage in the North Fork American River above the American River Pump Station. The existing gage, which will be removed following installation of the new gage, is located downstream. The total size of the project, including installation of the following components: an equipment box (gage house), data logger, and spread spectrum radio; six eye bolts (three installed on each side of the river to allow for anchoring of cable to steady boat during measurement events); six porcelain and enamel staff gages; and approximately 150 linear feet of 1-inch galvanized conduit with a temperature probe and pressure transducer for collecting temperature and flow data.	NOE	
2013098523	Kilburn Road Bridge Geotechnical Investigation Fish & Wildlife #4 --Stanislaus The Project consists of geotechnical Investigation below the channel of Orestimba Creek. The investigation will take place using core sampling methods. All work will take place from the existing Kilburn Road bridge deck. A single sample site will occur in the exact center of the bridge, an opening will be made in the bridge deck and 10-inch casing will bore through the opening in the bridge approximately 100 to 120 feet. Approximately 1.5-foot of soil will be sampled at 5-foot intervals. All sampling will be contained within the casing.	NOE	
2013098525	Slab Creek Reservoir Road Repair (1600-2013-0141-R2) Fish & Wildlife #2 --El Dorado The project is limited to repair of a section of Slab Creek Reservoir Road that has slumped into North Canyon Creek. Specific proposed repair activities for the project include: dewatering of the work area within North Canyon Creek; stabilization of the slide area utilizing rock gabions 4" x 6" angular rock, compactable fill, jute netting, and live branch cuttings; repair to an existing culvert located at the top of the slide area along the road; and site remediation following completion of construction activities.	NOE	
2013098526	Sly Park Recreation Area Boat Ramps and Shorezone Stabilization Project Fish & Wildlife #2 --El Dorado The project is limited to repair activities to be undertaken by the District which are necessary to address erosion and undercutting currently occurring at three (Main Boat Launch, Stonebraker Boat Launch, and Group Area 5) separate sites located within the Sly Park Recreation Area. Implementation of the repair and stabilization	NOE

	activities will prevent the continued erosion and undercutting occurring at these areas will provide for safer recreational facilities. Tree removal will not be required to complete project activities and erosion control measures will be employed during and after construction to reduce water quality impacts.		
2013098527	Oroville Fish Barrier Pool Erosion Repair; Streambed Alteration Agreement No. 1600-2013-0209-R2 Fish & Wildlife #2 Oroville--Butte The project is limited to erosion repair and bank stabilization near the staff gauges at the north edge of the Fish Barrier Pool. The project includes grading, compacting, reshaping and gravelling both access roads for 80 to 120-feet up from the water's edge. Approximately 35-cubic yards of loose silt and sand will be excavated from the erosion site at water's edge and trucked off site to spoils area located at the Diversion Dam. A rip-rap lined "V"-shaped ditch will be installed where roads meet, to convey runoff down the pool. Approximately 50-cubic yards of gravel will be placed along the roadway and 4-cubic yards of large rip-rap to construct the new flow line.	NOE	
2013098528	Glen Fire Road Sediment Control Project Marin County Mill Valley--Marin The project nature is to reduce sediment contributions to the Warner Canyon creek subwatershed by improving drainage on the Glen, Elinor, and Corte Madera Ridge Fire Roads. The majority of the work will be on the Glen Fire Road, installing sediment reduction improvemens along the road.	NOE	
2013098529	Portola Redwoods SP-Abandoned Logging Road-(Culvert) Removal Fish & Wildlife #3 --San Mateo The project is limited to the removal of three culverts, concrete abutments, a boneyard and a 1,000-foot section of an abandoned logging road. The existing logging road alignment cuts mid-slope through highly erodible soils and crosses over three ephmeral drainages before disappearing at an abandoned boneyard containing old concrete piling and other debris. The road will be re-contoured and re-vegetated. At all culvert sites, the road surfaces will be excavated, culvert removed and the channel shaped to match the topography of the surrounding slopes.	NOE	
2013098530	2495 Reliez Valley Road Storm Drainage Replacement Project Fish & Wildlife #3 Martinez--Contra Costa The project is limited to the clearing of vegetation by hand tools and the re-contouring of the earthen lined drainage ditch by excavator and tractor within an existing drainage system to Alhambra Creek. Removal of sediment and debris will also occur along the approximately two-hundred-sixty linear foot drainage ditch and installation of rip-rap lined outfall structures will occur at both ends of the drainage system. The main channel will remain earthen soil and shall be revegetated with native species and result in an over increase in freshwater emergent vegetation. SAA #1600-2013-0325-R3.	NOE
